DICTIONARY
OF
THE BIBLE

SECOND EDITION

ORIGINAL EDITION

BY

JAMES HASTINGS, D.D.

REVISED BY

FREDERICK C. GRANT, Th.D., D.D , Litt.D.

AND

H. H. ROWLEY, D.D., B.Litt., F.B.A.

Edinburgh: T. & T. CLARK: 38 George Street

© T. & T. Clark and Charles Scribner's Sons 1963

The Publishers are indebted to the Division of Christian Education, National Council of Churches, for permission to use Scripture quotations from the Revised Standard Version of the Bible, copyrighted 1946 and 1952

PRINTED IN GREAT BRITAIN BY
MORRISON AND GIBB LIMITED
FOR
T. AND T. CLARK, EDINBURGH

First Edition *1909*
Second Edition (entirely revised and reset) *1963*

PREFACE

For more than fifty years James Hastings' one volume *Dictionary of the Bible* has been a valued work of reference in many libraries, both public and private. During that time much new knowledge has been acquired. The spade of the archaeologist has brought exciting new material into our hands, and our knowledge of the Biblical languages is fuller than it was half a century ago. Moreover, Biblical research has not stood still, and we have not rested in the positions of those days. In textual criticism there is greater caution to-day than there was, while interest in worship and in Biblical theology occupies a larger place in our study than it did formerly. It therefore seemed desirable to issue a revised edition of this Dictionary.

Not everything has been rewritten, but every entry has been read by a competent scholar. Some entries have been passed as needing no change; some have been partly modified; some have been wholly rewritten. Every effort has been made to ensure that the information here given is accurate and in line with present-day knowledge. Where no material change has been made in an article the initials of the original author stand alone at the end. Similarly, where an article has been completely rewrittten the initials of the new author stand alone. Where part of the old article has been retained and part supplied by the reviser, the initials of the original author are followed by those of the reviser. The editors express their thanks to all who have collaborated with them in this revision.

The old edition was based on the Revised Version of the Bible, and head entries were in the forms found in that version, with frequent cross-references from Authorized Version forms. The present edition is based on the Revised Standard Version, and Biblical quotations and head entries are, by permission, normally in agreement with that version, with cross-references from both Authorized Version and Revised Version forms. The number of cross references is therefore substantially larger than in the former edition, with the result that it is possible to use the Dictionary with any one of these versions. The New Testament of the New English Bible appeared while this Dictionary was in the press, and therefore too late to be used in its preparation.

In addition to a greater number of cross-references there are many new entries, sometimes dealing with new sources of knowledge, such as the Dead Sea Scrolls, and sometimes with Biblical terms which were not included in the old edition, though of comparable character with others which were. At the same time every effort has been made to keep the over-all length of the Dictionary as close as possible to that of the original edition.

The maps have been prepared by Messrs. Thos. Nelson & Sons, Ltd., and are identical with those which appear in the new edition of Peake's *Commentary on the Bible.*

In sending out this edition the Editors express the hope that it may be found useful to a further generation of Biblical students, giving not alone factual information about obscure and familiar Biblical persons and places, but mediating the fruits of Biblical scholarship and offering guidance on the significance of the Biblical revelation.

F. C. Grant.

H. H. Rowley.

Maps with Index of Place Names
at the end of the volume.

ABBREVIATIONS

I. General

Aq. = Aquila.
Arab. = Arabic.
Aram. = Aramaic.
Assyr. = Assyrian.

La = Lamentations.
Ezk = Ezekiel.
Dn = Daniel
Hos = Hosea.
Jl = Joel.
Am = Amos.
Ob = Obadiah.
Jon = Jonah.
Mic = Micah.
Nah = Nahum.
Hab = Habakkuk.
Zeph = Zephaniah.
Hag = Haggai.
Zec = Zechariah.
Mal = Malachi.

Apocrypha

1 Es, 2 Es = 1 and 2 Esdras.
Ad. Est = Additions to Esther.
Wis = Wisdom.
Sir = Sirach or Ecclesiasticus.
Bar = Baruch.
Ep. Jer = Letter of Jeremiah (Bar 6).
Three = Song of the Three Children.
To = Tobit.
Jth = Judith.
Sus = Susanna.
Bel = Bel and the Dragon.
Pr. Man = Prayer of Manasses.
1 Mac, 2 Mac = 1 and 2 Maccabees.

New Testament

Mt = Matthew.
Mk = Mark.
Lk = Luke.
Jn = John.
Ac = Acts.
Ro = Romans.
1 Co, 2 Co = 1 and 2 Corinthians.
Gal = Galatians.
Eph = Ephesians.
Ph = Philippians.
Col = Colossians.
1 Th, 2 Th = 1 and 2 Thessalonians.
1 Ti, 2 Ti = 1 and 2 Timothy.
Tit = Titus.
Phn = Philemon.
He = Hebrews.
Ja = James.
1 P, 2 P = 1 and 2 Peter.
1 Jn, 2 Jn, 3 Jn = 1, 2, and 3 John.
Jd = Jude.
Rev = Revelation.

DICTIONARY OF THE BIBLE

A

AALAR, 1 Es 5^{36} (AV).—See ALLAR.

AARON.—In examining the Biblical material concerning Aaron, it is important to attempt to distinguish between various strands of tradition, since the picture which may be drawn from different sources is by no means simple, and the Aaron of post-exilic material is a vastly more complex and developed figure than that of pre-exilic sources. The name Aaron is obscure, possibly of Egyptian origin; the meaning 'oracle-giver' has also been suggested.

1. It is worth noting at the outset that Aaron appears only in Mic 6^{4} in the prophetic books, together with Moses and Miriam as agents of deliverance in the Exodus. Similar references may be seen in Jos 24^{5}, 1 S $12^{6, 8}$, Ps 77^{20}. Greater elaboration is traceable in Ps 99^{6} (Moses and Aaron as 'among his priests') and further in 105^{26} 106^{16} where prominence is given to the position of Aaron. Other Psalm references are to the 'house of Aaron' ($115^{10, 12}$ 118^{3} 135^{19}) and to 'Aaron's beard' (133^{2}) where the anointing of the high priest is a metaphor of Divine blessing to the whole people.

2. Jg 20^{28} associates the family of Aaron with the sanctuary at Bethel (the Mosaic priesthood of the sanctuary at Dan may be compared; cf also Eleazar's burial in the hill country of Ephraim in Jos 24^{33}), though Jos 21^{13-19} assigns cities in the south to the descendants of Aaron.

3. Deuteronomy refers to Aaron in connexion with the story of the Golden Calf (9^{13-21}) as saved from destruction by Moses' prayer. It also preserves two traditions of his death: in 10^{6} at Moserah (cf the itinerary in Nu 33^{30f}), and in 32^{50} at Mount Hor (cf Nu 33^{37} 'on the edge of the land of Edom').

4. The distinction between J and E is not always sufficiently clear for a coherent picture to be drawn. It has been doubted whether Aaron appeared at all in J: certainly his position can have been only subordinate in the narrative. He was sent to meet Moses in the wilderness and together they performed signs before the people (4^{27-31}). He is also mentioned as spokesman for Moses in 4^{13-16} (prob. E) though the description of him as Levite is peculiar, since Moses was also of the tribe of Levi. The term seems here to have become a technical one, and the reference may belong to a later time when priestly descent was traced from Aaron. Moses and Aaron demanded release from Pharaoh, and on his refusal the people murmured (ch. 5). In the plague narratives (mainly J), Aaron is a silent figure, merely summoned with Moses four times when Pharaoh entreats for the removal of the plagues ($8^{8, 25}$ 9^{27} 10^{16}). In each case Moses alone answers and in the last three he alone departs. In 10^{3} Moses and Aaron went in to announce the plague, but Moses alone 'turned and went out' (v.6). The occurrence of Aaron's name seems likely in these passages to be due to later redaction, perhaps designed to assimilate the older plague narratives to those of P.

Aaron is brother of Miriam in 15^{20} (? J or E): in 17 he and Hur held up Moses' hands at Rephidim to ensure Joshua's victory over the Amalekites. In 18^{12} (E) Aaron is included with the elders in the sacrificial meal with Jethro. He alone is permitted to go up into the mountain with Moses (Ex 19^{24}), though in $24^{1, 9}$ they appear to be accompanied by Nadab and Abihu and seventy elders: here Moses alone actually goes up into the mountain. With Hur he is to act as deputy for Moses during the latter's absence (24^{14}). E has the story of the making of the golden calf during Moses' absence (Ex 32^{1-24}: the narrative is now not in a simple form, and has some connexion with the story of 1 K 12^{26-30}, for Jeroboam's words appear here in the mouth of Aaron). J appears to have a different tradition of rebellion in Ex 32^{25-29} where Aaron is said to 'have let them break loose, to their shame among their enemies': the story provides a basis for the consecration of the Levites (cf the parallel for the priesthood of Aaron in Nu 25^{7-13} and other traditions of the Levites in Nu 3^{44-46} 8^{5-19}).

In Nu 12, Aaron is involved with Miriam in a protest against Moses' marriage to a Cushite woman, though the real basis of their protest seems to be their claim that they too had received Divine revelation. Punishment fell in the form of leprosy upon Miriam alone, but Aaron intercedes with Moses and after Miriam has been excluded from the camp for seven days, order is restored: the halting of the people on the march for this period seems to indicate that Miriam's sin involves more than herself and Aaron.

5. In P, Aaron stands beside Moses, with Moses occupying much more the position of secular leader, while Aaron is his religious vice-gerent. Aaron plays a considerable part in the narrative of the Exodus—as spokesman to Pharaoh (7^{1}) in whose presence he changed his rod into a serpent (7^{8-13}; the word is *tannîn*=dragon, a primeval monster: in 4^{3} (J) *nāḥāsh*=snake is used). In P's narrative of the plagues, Aaron is conspicuous. Aaron as well as Moses suffered from the murmurings of the people (Ex 16^{2}, Nu 14^{2} $16^{3, 41}$ 20^{2}): both were consulted by the people (Nu 9^{6} 15^{33}); and many of God's commands were addressed to both (Ex 9^{8-10} $12^{1, 43}$, Lv 11^{1} 13^{1} 14^{33} 15^{1}, Nu 2^{1}). Aaron stayed a plague by offering incense (Nu 16^{46-48}) [on the combined narratives in Nu 16, 17 see AARON'S ROD, KORAH]. At Meribah-Kadesh he, with Moses, sinned against Yahweh (Nu 20^{1-13}), but the nature of his sin is obscure; he was consequently forbidden to enter Canaan and died on Mount Hor aged 123, Eleazar his son being clothed in priestly garments (Nu 20^{22-29} 33^{38f}; cf Dt 32^{50}).

The prominence of Aaron in P may in part be

accounted for by the supposition that there were traditions concerning Aaron already in existence—as indicated in JE—with perhaps some elements which allowed of Aaron being viewed as a wonder-worker, now incorporated with later presentation (*e.g.* 7[1-13]). But a very important factor in the shaping of the traditions appears to be the changing situation in the Jerusalem priesthood. The priesthood at Jerusalem was, from the time of Solomon at least, of Zadokite descent (1 K 1[39] 2[27]); this position appears to have lasted until the exile, and Ezekiel envisages a continuance of it in his ideal state (Ezk 43[19] 44[15ff]). When local sanctuaries were abolished at Josiah's reform and the country priests came up to Jerusalem to seek a livelihood (cf Dt 18[6-8]), the Zadokite priests charged them with idolatry and allowed them only an inferior position as servants (2 K 23[9], Ezk 44[9-15]; cf 1 S 2[36]). It is probable that many of these country priests traced their descent to Aaron. With the exile, the Jerusalem priests were presumably carried away (cf 2 K 24[14] 25[11]) or put to death (2 K 25[18-21]). Since it is unlikely that all religious observance ceased during the exile, priests of Aaronite descent may well have replaced the Zadokites. Some scholars think that the religious centre shifted to Mizpah or Bethel. After the exile, the return of a Zadokite priesthood (cf Jeshua ben Jozadak, Ezr 3[2], etc.) must have created a difficult situation. Some compromise was perhaps effected in which the Zadokite priests re-established their superiority and claimed Aaronic descent: others, tracing their ancestry by Ithamar, younger son of Aaron, could be regarded as inferior. Sixteen priestly courses were traced back to Eleazar and eight to Ithamar (1 Ch 24). Priests who could not claim a proper genealogy were evidently excluded (Ezr 2[61-63]).

Reference must be made to other articles for Aaron's consecration, his purely priestly functions and his relation to the Levites (see PRIESTS AND LEVITES, SACRIFICE, TABERNACLE).

6. In the NT, Elizabeth is of the family of Aaron (Lk 1[5]): Stephen refers to the Golden Calf narrative (Ac 7[40]): Aaron's priestly calling is mentioned (He 5[4]) but shown to be inadequate (7[11]). Cf also AARON'S ROD.

A. H. McN.—P. R. A.

AARON'S ROD.—In a very complicated section (Nu 16–18) which deals with the various revolts against authority in the wilderness period, the exclusive right of the tribe of Levi to the duties and privileges of the priesthood is miraculously attested (Nu 17[1-11]). Twelve rods, representing the twelve tribes, each inscribed with the name of the leader of the tribe, Aaron's being upon that of the tribe of Levi, were deposited 'in the tent of meeting before the testimony,' and the man chosen by Yahweh was to be the one whose rod sprouted. Aaron's rod was found the next day to have 'put forth buds, and produced blossoms, and it bore ripe almonds' (v.[8]). The rod was thereafter to be put back 'before the testimony, to be kept as a sign for the rebels' (v.[10]). The story has parallels in that of Joseph of Arimathaea at Glastonbury, and in the sprouting of Hercules' club and Romulus' spear. He 9[4], no doubt following later Jewish tradition, describes the rod as within the Ark, along with the tables of the covenant and the golden urn containing the manna. Aaron's rod also appears prominently in the plague narratives of Ex 7–9, notably in 7[8-12] where it swallows the rods of the Egyptian magicians, and probably also in Nu 20[1-13] in the narrative of the giving of the waters of Meribah from a rock at Kadesh. Later Rabbinical tradition identifies Aaron's rod with Moses' staff, and preserves much legend concerning it and its nature. It appears in Christian writings as the type of the Cross, and is also glorified in Islamic legend.

A. R. S. K.—P. R. A.

AB.—See TIME.

ABACUC (2 Es 1[40] AV, RV).—A form of the name **Habakkuk** (so RSV).

ABADDON.—A Hebrew word meaning 'destruction.' The RSV transliterates all six occurrences in the Bible. Five are found in the later OT Wisdom literature: as a general term for destruction, Job 31[12]; a parallel to **Sheol** (q.v.), Job 26[6], Pr 15[11] 27[20]; to death, Job 28[22]; and the grave, Ps 88[11]. In the only NT reference, Rev 9[11], the personification is complete: Abaddon is angel of the abyss and king over the destroying locusts. His name in Greek is **Apollyon** (q.v.), destroyer. In the later Jewish literature Abaddon is the lowest place of Gehenna, hell.

C. C. Ro.

ABADIAS (1 Es 8[35] AV, RV).—See OBADIAH, 6.

ABAGTHA (Est 1[10]).—One of the seven chamberlains or eunuchs sent by Ahasuerus (q.v.) to fetch Queen Vashti to his banquet.

ABANA (AV, RSV; RV **Abanah**).—One of the two rivers of Damascus mentioned by Naaman, 2 K 5[12]. It is identified with the mod. *Nahr Baradā*, which rises in the Anti-Lebanon and runs first southward, then westward, towards Damascus. After dividing fan-wise into a number of branches, it skirts the northern wall of the city and flows into the Meadow Lake. The Greeks called it Chrysorrhoas (Strabo, XVI. ii. 16), the 'golden stream.'

ABANAH, 2 K 5[12] (RV).—See ABANA.

ABARIM.—Name meaning 'parts beyond' given to the heights E. of Jordan (including Mt Nebo, q.v.) as viewed from the W. side. From there the land beyond Jordan rises as a mountain chain to a height of 3000 feet and more from the Jordan valley. Hence Abarim is joined with 'mountain' (Nu 27[12], Dt 32[49]; cf Nu 33[47]), and in Jer 22[20] is mentioned with Lebanon and Bashan. See also IYE-ABARIM. In Ezk 39[11] we should probably read 'Abarim' (AV 'passengers,' RV 'them that pass through,' RSV 'travellers').

ABBA, which occurs only in Mk 14[36], Ro 8[15], Gal 4[6], is an Aramaic word meaning 'father.' In Levantine Aramaic of NT times it could mean 'father,' 'the father,' or 'my father,' and both Chrysostom and Theodoret, who were Syrians by birth, state that children there commonly addressed their father as *Abbā*. Jesus so uses it of God in Mt 14[36], and it is highly probable that in many cases in the Gospels where in the words of Jesus we have *patēr, patēr mou, ho patēr, ho patēr mou*, the underlying Aramaic was simply *Abbā*. It is used of God only very rarely and uncertainly in Jewish Palestinian documents, this usage being an innovation of Jesus to whom God was always 'my Father.' The following *ho patēr* in Mt 14[36] would seem to be an addition by the evangelist, translating the Aramaic, as he does in 5[41] 7[11, 34], and using the Greek article to represent the Aramaic emphatic case. It is also followed by *ho patēr* in the Epistles, Paul apparently having received the saying in that form.

A. J.

ABDA ('servant' *sc* of the Lord).—**1.** Father of Adoniram, master of Solomon's forced levy (1 K 4[6]). **2.** A Levite (Neh 11[17]) who returned with Zerubbabel; called **Obadiah** in 1 Ch 9[16].

ABDEEL.—Father of Shelemiah (Jer 36[26]), one of those ordered by Jehoiakim to arrest Jeremiah and Baruch.

ABDI ('my servant,' or for 'servant of Y" ').—**1.** Grandfather of Ethan, 1 Ch 6[44]. **2.** Father of the Levite, Kish, 2 Ch 29[12]. **3.** A Jew who had married a foreign wife, Ezr 10[26]; cf Es 9[27] (AV **Aedias**, RV **Oabdius**).

ABDIAS (2 Es 1[39] AV, RV).—See OBADIAH (so RSV) the prophet.

ABDIEL ('servant of God').—Son of Guni, 1 Ch 5[15].

ABDON ('servile').—**1.** The last of the minor judges, Jg 12[13-15]. **2.** A family of Benjamites, 1 Ch 8[23]. **3.** A Gibeonite family, 1 Ch 8[30] 9[36]. **4.** A courtier of Josiah, 2 Ch 34[20]; called **Achbor**, 2 K 22[12, 14], Jer 26[22] 36[12]. **5.** A Levitical city of Asher, Jos 21[30], 1 Ch 6[74], mod. *Khirbet 'Abdeh*, E. of Achzib on the hills.

ABEDNEGO.—Name given by Nebuchadnezzar's chief eunuch to **Azariah,** one of Daniel's companions, Dn 1[7], who refused to worship the king's image, Dn 3[12]. The name is probably a corruption of Abed-nebo, 'servant of Nebo.'

ABEL.—The second son of Adam (Gn 4[2ff]). The Yahwist does not give a meaning to the name, as he usually does. The word *hebhel* means 'breath,' (tr. 'vanity' in Ec 1[1]). It is improbable that the name was given to Abel on account of his brief span of life. Neither is the derivation from Akkadian *aplu*, 'son' now accepted. A more probable suggestion connects it with the name Jabal (4[20]), the ancestor of nomadic shepherds. The name Abel in 2 S 20[18], and in several compound names of places is from a different Hebrew root.

The Yahwist's story of Cain and Abel rests upon sources other than those from which he has drawn the narratives of the Creation and the Fall. This is manifest from the fact that the story assumes the existence of other people on the earth; Cain says, 'whosoever finds me will slay me.' Moreover, the story is made up of two independent strands: one in vv.[1-15], dealing with the killing of Abel, and the other in vv.[16-26], dealing with the genealogy and traditions of the Kenite clan, of which Cain is the eponymous ancestor.

The Yahwist has used the tradition to develop the theme of the consequences of the breach between man and God described in the story of the Fall. The first result is the break-up of the family, brother slays brother, and man flees from the presence of God and builds up a godless civilization. But underlying the story in the form in which we have it now are several layers of tradition. The original tradition seems to represent a ritual slaying intended to secure fertility for the crops whose failure is implied by the rejection of Cain's offering. The ritual slaying is followed by the flight of the slayer who is protected by a mark which indicates his sacred character. But in the course of transmission the story had acquired other meanings. It had become an aetiological myth intended to explain the origin of the age-long feud between the nomad and the agriculturalist, although a distortion of the tradition is apparent in the fact that it is the agriculturalist who slays the pastoralist. Then, by a further transformation, the story assumed the form of an aetiological myth intended to explain the origin of the blood-feud. The suggestion that the story was intended to explain Yahweh's preference for animal sacrifices must be rejected, since both kinds of offering are prescribed in the Levitical code. He 11[4] gives 'faith' as the reason. In He 12[24] the 'sprinkled blood' 'speaks more graciously than the blood of Abel,' in that the latter cried for vengeance (Gn 4[10]).

In Mt 23[35] || Lk 11[51] Abel is named as the first of the true martyrs whose blood had been shed during the period covered by the OT, the last being Zechariah (see ZECHARIAH, **35**). In Jn 8[44] it is possible that Jesus was thinking of the story of Abel when He spoke of the devil as 'a murderer from the beginning,' *i.e.* the instigator of murder as he is of lies. A. H. McN.—**S. H. He.**

ABEL.—A word meaning 'meadow' and entering as an element into several place-names. In 1 S 6[18] a reference in AV to 'Abel' is corrected in RV, RSV to 'great stone.' Elsewhere in place-names Abel is found only in combination with another word.

ABEL-BETH-MAACHAH.—The AV spelling of **Abel beth-Maacah.** See ABEL (OF) BETH-MAACAH.

ABEL (OF) BETH-MAACAH.—Where Sheba took refuge from Joab (2 S 20[14-18]); it was captured by Ben-hadad (1 K 15[20]), and by Tiglath-pileser (2 K 15[29]); corresponding to the modern *Tell Abil,* W. of *Tell el-Qâḍi* (Dan), and N. of Lake Huleh.

ABEL-CHERAMIM, Jg 11[33] (RV).—See ABEL-KERAMIM.

ABEL-KERAMIM (RSV; RV **Abel-cheramim**; 'meadow of the vineyards' (cf AV)).—The limit of Jephthah's pursuit of the Midianites (Jg 11[33]); site uncertain, possibly modern *Na'ûr,* NE. of Nebo.

ABEL-MAIM ('meadow of waters').—An alternative name for **Abel of Beth-maacah** (q.v.), found in 2 Ch 16[4], which corresponds to 1 K 15[20].

ABEL-MEHOLAH ('meadow of the dance').—A place in the Jordan valley, the limit of Gideon's pursuit of the Midianites (Jg 7[22]); in the administrative district of Taanach and Megiddo under Solomon (1 K 4[12]); native place of Adriel, husband of Merab, Saul's daughter (1 S 18[19]), and of Elisha (1 K19[16]); the location is uncertain (Westminster Atlas, *Tell el-Maqlûb*; Grollenberg's Atlas, possibly *Tell Abû Sifri*).

ABEL-MIZRAIM ('meadow of the Egyptians').—The scene of the mourning for Jacob (Gn 50[11]) at the threshing-floor of Atad. There is a play on words with *'ābhēl,* 'meadow,' and *'ēbhel,* 'mourning.' The location was beyond Jordan, but is unknown.

ABEL-SHITTIM ('meadow of acacias').—In the plains of Moab (Nu 33[49]); also called Shittim; the last trans-Jordanic stage where the Israelites encamped (Jos 3[1]), and the scene of the offence of Baal-peor (Nu 25[1]). From here Joshua sent the spies (Jos 2[1]). Prob. mod. *Tell el-Ḥammâm,* S. of *Tell Kefrein.*

ABEZ, Jos 19[20] (AV).—See EBEZ.

ABI.—The name of Hezekiah's mother (2 K 18[2]), called **Abijah** in 2 Ch 29[1].

ABIAH.—1. 1 Ch 6[28] (AV); see ABIJAH, **2.** **2.** 1 Ch 2[24] (AV); see ABIJAH, **6.**

ABI-ALBON.—See ABIEL, **2.**

ABIASAPH ('father has gathered').—Son of Korah (Ex 6[24]), called **Ebiasaph** in 1 Ch 6[23, 37] 9[19], who gave his name to a division of the Korahite Levites, mentioned only in the genealogies of P and the Chronicler. A section of the division acted as doorkeepers (1 Ch 9[19] 26[1]; in the latter passage read Ebiasaph for Asaph).

ABIATHAR.—Son of Ahimelech and descendant of Eli. In the days of Saul, the family were priests at the shrine of Nob, and in charge of the Ephod. When the sanctuary priests were murdered at Saul's command he fled to David at Keilah, bringing the oracular ephod with him (1 S 22[20]—23[14] 30[7f]). He accompanied David during his days of outlawry and, with Zadok, occupied an important priestly position when David became king of all Israel. (At 2 S 8[17] the names of father and son have been transposed, cf 1 Ch 18[16] 24[6].) During the revolt of Absalom, Abiathar and Zadok supported David. Whatever element of personal loyalty is indicated by this, it was of great importance since by this action David was assured of the approval of traditional Yahwism. At the end of David's reign, Abiathar supported Adonijah (1 K 1[7, 19, 25]), was degraded by Solomon and relegated to Anathoth (1 K 2[26]), where apparently he and his descendants continued their priesthood until the days of Jeremiah (Jer 1[1]); but his association with the sacral kingship was broken by Solomon. This appears as the fulfilment of the prophecy against Eli's household in 1 S 2[27-36]. The reference to Abiathar as High-Priest at Mk 2[26] is due to a mistaken memory of the incidents of David's life; it is omitted in the Matthaean and Lukan parallels and, apparently by way of correction, in the Western text of Mark. A. S. H.

ABIB (the 'green ear' month, Ex 13[4] etc.).—See TIME.

ABIDA ('father hath knowledge').—A son of Midian (Gn 25[4] [AV **Abidah**], 1 Ch 1[33]).

ABIDAN ('father is judge').—Representative of the tribe of Benjamin at the census (Nu 1[11] 2[22]), who brought offerings (Nu 7[60, 65]) and led the tribe (Nu 10[24]).

ABIEL ('father is El').—**1.** Father of Kish and Ner, and grandfather of Saul (1 S 9[1] 14[51]). The latter passage should read, 'Kish, the father of Saul, and Ner, the father of Abner, were sons of Abiel.' In 1 Ch 8[33] 9[39] the father of Kish is called Ner, prob. in error. **2.** One of David's heroes (1 Ch 11[32]), from Beth-arabah (q.v.). **Abi-albon** (2 S 23[31]) is a copyist's error, the eye having fallen on *albon* below; some LXX MSS have Abiel.

ABIEZER (' father is help ').—**1.** The son of Hammolecheth, sister of Machir, the son of Manasseh (1 Ch 7^{18}). His descendants formed one of the smallest clans belonging to the Gileadite branch of the tribe of Manasseh, from which Gideon sprang (Jg 6$^{11, 15}$). According to Jg 6^{24} they were settled at Ophrah (q.v.); they were the first to answer the summons of Gideon to fight against the Midianites (Jg 6^{34}). In Nu 26^{30} the name stands in the abbreviated form **Iezer** (RV, RSV; AV **Jeezer**). **2.** One of David's heroes (2 S 23^{27}), 1 Ch 27^{12}), from Anathoth, who commanded the army in the ninth month.

ABIGAIL (' father is joyful ').—**1.** Wife of Nabal (1 S 25^{14}), who dissuaded David from avenging himself on the surly farmer, and after the latter's death married David (1 S 25$^{39-42}$), and accompanied him to Gath and Ziklag (1 S 27^{3} 30$^{5, 18}$). At Hebron she bore him a son, called Chileab (2 S 3^{3}) or Daniel (1 Ch 3^{1}). In 1 S 25^{32} the name stands in the Hebrew as **Abigal**. **2.** Stepsister of David, mother of Amasa (1 Ch 2^{16f}; in 2 S 17^{25} **Abigal** in Hebrew, and so RV, RSV).

ABIGAL.—See Abigail.

ABIHAIL (' father is might ').—The name of a man or a woman. **1.** Father of Zuriel, a Levite of the family of Merari (Nu 3^{35}). **2.** Wife of Abishur, of the family of Jerahmeel (1 Ch 2^{29}). **3.** Son of Huri, a Gadite of the land of Bashan (1 Ch 5^{14}). **4.** Mother of Rehoboam's wife, Mahalath, and daughter of Eliab, David's eldest brother (2 Ch 11^{18}). **5.** Father of Esther and uncle of Mordecai (Est 2^{15} 9^{29}).

ABIHU (' he is father ').—Second son of Aaron (Ex 6^{23}, Nu 3^{2}); he accompanied Moses to the top of Sinai (Ex 24$^{1, 9}$), and was admitted to the priest's office (Ex 28^{1}), but was later struck by fire with his brother Nadab for offering strange fire (Lv 10$^{1, 2}$, Nu 3^{4} 26^{61}).

ABIHUD (' father is majesty ').—A Benjamite (1 Ch 8^{3}).

ABIJAH.—**1.** Son and successor of Rehoboam, 2 Ch 13^{1}; also called **Abijam**, 1 K 14^{31}. The accounts of him in the Books of Kings and Chronicles are discrepant. The difference begins with the name of his mother, which 2 Ch gives as **Micaiah**, daughter of Uriel of Gibeah, while 1 K makes her to have been **Maacah**, daughter of Abishalom. As the latter is also the name of Asa's mother (1 K 15^{10}, 2 Ch 15^{16}), there is probably some confusion in the text. Beyond this, the Book of Kings tells us only that he reigned three years, that he walked in the sins of his father, and that he had war with Jeroboam, king of Israel. **2.** Samuel's second son, 1 S 8^{2}, 1 Ch 6^{28} (AV **Abiah**). **3.** A son of Jeroboam I. who died in childhood, 1 K 14. **4.** One of the ' heads of fathers' houses ' of the sons of Eleazar, who gave his name to the eighth of the twenty-four courses of priests, 1 Ch 24$^{3, 10}$, 2 Ch 8^{14}. To this course Zechariah, the father of John the Baptist, belonged, Lk 1^{5}. The name occurs also in the lists of priests who ' went up with Zerubbabel,' Neh 12^{4}, and of those who set their seal to the covenant in the time of Nehemiah, Neh 10^{7}. **5.** A son of Becher, son of Benjamin, 1 Ch 7^{8}. **6.** Wife of Hezron, eldest son of Perez, son of Judah, 1 Ch 2^{24} (AV **Abiah**; but RSV reads ' Caleb went in to Ephrathah, the wife of Hezron his father '). **7.** Wife of Ahaz, and mother of Hezekiah, 2 Ch 29^{1}; named **Abi** in 2 K 18^{2}.

H. P. S.—**P. W.-M.**

ABIJAM.—See Abijah.

ABILENE.—Mentioned in Lk 3^{1}, and also in several passages in Josephus, as a tetrarchy of Lysanias (q.v.). It was situated in the Anti-Lebanon and, its capital was Abila, a town whose ruins are found to-day on the northern bank of the river Baradā, near a village called *Sûq Wâdī Baradā*. It is one of the most picturesque spots on the railroad to Damascus. The ancient name is to-day preserved in a Latin inscription on a deep rock-cutting high up above the railway. It was a political entity until A.D. 37.

E. W. G. M.—**E. G. K.**

ABILITY.—In the Bible ' ability ' is either *material capacity* (Lv 27^{8}, Ezr 2^{69}, Ac 11^{29}) or *technical skill* (Ex 31^{3} 35^{25}, Dn 1^{4}, Mt 25^{15}). The modern meaning (' mental power ') is not found in the Bible.

ABIMAEL (? ' father is God ').—One of the sons of Joktan (q.v.), or S. Arabians (Gn 10^{28}, 1 Ch 1^{22}). This form of name (with medial *m*) is found in S. Arabian (*Abmi-'athtar*), and in Akkadian *Ili-ma-abi* is found.

ABIMELECH (' the father is king ').—**1.** King of Gerar. According to Gn 20 he took Sarah into his harem quite innocently, but on learning through a vision that she was Abraham's wife restored her to him uninjured and made ample amends. Subsequently he entered into a covenant of friendship with Abraham (21^{22ff}). A variant of the same tradition is recorded in Gn 26 as having taken place with Isaac. Apparently the stories were variants of Beersheba traditions. **2.** A son of Gideon by a Shechemite concubine (Jg 8^{31}), who made an illstarred attempt at becoming king of Shechem. After his father's death he with the help of a band of outlaws murdered all but one of his half-brothers and was accepted as king by the mixed Canaanite and Israelite populace of the Shechem area. The young brother, Jotham, who had escaped, was able to sow dissension among the subjects who after three years revolted under Gaal son of Ebed. Abimelech by ruthless action was able to defeat the Shechemites and raze their city. Thereupon he attacked Thebez but he was mortally wounded by a woman while assaulting the tower of that city. The account of the fortunes of this precursor of the monarchy is told in Jg 9. **3.** A son of Abiathar the priest according to 1 Ch 18^{16}. This should be corrected to Ahimelech; cf. 2 S 8^{17}. **4.** In the title of Ps 34; apparently this is intended to refer to Achish, king of Gath; cf 1 S 21$^{10-15}$.

J. T.—**J. W. W.**

ABINADAB (' father is generous ').—**1.** The second son of Jesse (1 S 16^{8} 17^{13}, 1 Ch 2^{13}). **2.** Son of Saul slain in the battle of Mount Gilboa (1 S 31^{2}, 1 Ch 10^{2}). **3.** Owner of the house whither the Ark was brought by the men of Kiriath-jearim (1 S 7^{1}), whence it was later taken by David to Jerusalem (2 S 6^{3}, 1 Ch 13^{7}). **4.** In 1 K 4^{11}, for ' the son of Abinadab ' (AV) RV, RSV have **Benabinadab** (q.v.).

ABINOAM (' father is pleasantness ').—Father of Barak (Jg 4$^{6, 12}$ 5^{12}).

ABIRAM (' father is the Exalted One ').—**1.** A Reubenite, who conspired with Dathan against Moses (Nu 16^{1}, Dt 11^{6}, Ps 106^{17}). See Korah. **2.** The firstborn son of Hiel the Bethelite, who died when his father rebuilt Jericho (1 K 16^{34}).

ABISEI, 2 Es 1^{2} (AV).—See Abishua, **1.**

ABISHAG (? ' father has wandered ').—A beautiful young Shunammitess, who attended upon David in old age (1 K 1$^{2ff. 15}$). After David's death, Adonijah desired to marry her, but the request cost him his life (1 K 2$^{13-25}$).

ABISHAI.—Son of Zeruiah, David's step-sister (1 S 26^{6}, 2 S 2^{18}, 1 Ch 2^{16}). His brothers were Joab and Asahel (2 S 2^{18}). He was a hot-tempered, ruthless soldier. Accompanying David into Saul's camp, he would fain have killed the sleeper (1 S 26^{8}). He is associated with Joab in the blood-revenge taken on Abner (2 S 2^{24} 3^{30}). During the campaign against the Ammonites, he shared the command of the army with Joab (2 S 10^{10}), while at the time of Absalom's uprising he was in charge of one-third of the army, the other two commanders being Joab and Ittai the Gittite (2 S 18^{2}). The text of 2 S 23^{18}, 1 Ch 11^{20} is emended to read " thirty " for " three " (see RSV), and so assumes that Abishai was commander of the famous thirty. He is credited with the slaughter of 300 foes (2 S 23^{18}), and David once owed his life to Abishai's interposition (2 S 21^{17}). Notwithstanding their relationship and their usefulness, there was a natural antipathy between king David and the two brothers Joab and Abishai (2 S 3^{39}).

J. T.—**E. R. R.**

ABISHALOM.—See Absalom.

ABISHUA (' father is salvation ' or ' rich ').—**1.** Son of Phinehas and father of Bukki (1 Ch $6^{4f.}$, ^{50f}, Ezr 7^{5}, 1 Es 8^{2} (AV **Abisum**, RV **Abisue**), 2 Es 1^{2} (AV **Abisei**, RV **Abissei**). **2.** A Benjamite (1 Ch 8^{4}; cf Nu 26^{38ff}).

ABISHUR (' father is a wall ').—A Jerahmeelite (1 Ch 2^{28f}).

ABISSEI, 2 Es 1^{2} (RV).—See Abishua, **1.**

ABISUE, 1 Es 8^{2} (RV).—See Abishua, **1.**

ABISUM, 1 Es 8^{2} (AV).—See Abishua, **1.**

ABITAL (' father is dew ').—Wife of David and mother of Shephatiah (2 S 3^{4}, 1 Ch 3^{3}).

ABITUB (' father is good ').—A Benjamite (1 Ch 8^{11}).

ABIUD (*i.e.* Abihud).—An ancestor of Jesus, Mt 1^{13}.

ABJECT.—In Ps 35^{15} (AV, RV) ' abject ' occurs as a noun, as in Herbert's *Temple*—' Servants and abjects flout me ' ; RSV has ' cripples.'

ABNER.—Saul's cousin (1 S 9^{1} 14^{51}) and commander-in-chief (1 S 17^{55} 26^{5}). He set Ish-bosheth on his father's throne, and fought long and bravely against David's general, Joab (2 S 2). After a severe defeat, he killed Asahel in self-defence (2 S 2^{23}). He behaved arrogantly towards the puppet-king, especially in taking possession of one of Saul's concubines (2 S 3^{7}). Resenting bitterly the remonstrances of Ish-bosheth, he entered into negotiations with David (2 S 3^{8-12}), and then, on David's behalf, with the elders of Israel (2 S 3^{17}). Dreading the loss of his own position, and thirsting for revenge for Asahel's murder, Joab murdered him at Hebron (2 S 3^{26f}). David gave him a public funeral, dissociated himself from Joab's act (2 S 3^{31-37}), and afterwards charged Solomon to avenge it (1 K 2^{5}). Abner was destitute of all lofty ideas of morality or religion (2 S $3^{8, 16}$), but was the only capable person on the side of Saul's family. J. T.

ABOMINATION.—Four Hebrew words from three different roots are rendered by ' abomination ' and, occasionally, ' abominable thing.' In almost all cases *tō'ēbhāh* has reference to objects and practices abhorrent to Y", and opposed to the moral requirements and ritual of His religion (for exceptions cf Gn 43^{32} 46^{34}, ' an abomination to the Egyptians '). Among the objects so described are heathen deities such as Milcom, the ' abomination ' of the Ammonites (2 K 23^{13}); images and other paraphernalia of the forbidden cults (Dt 7^{25} 27^{15}, and often in Ezk). Some of the practices that are an ' abomination unto Y" ' are the worship of heathen deities and of the heavenly bodies (Dt 13^{14} 17^{4} and oft), the practice of witchcraft and kindred arts (Dt 18^{12}), gross acts of immorality (Lv $18^{22, 26ff}$), falsification of weights and measures (Pr 11^{1}), and ' evil devices ' generally (Pr 15^{26}). The word *shekeṣ* is a technical term for the flesh of animals ritually taboo (Lv 11^{10ff}; see Clean and Unclean). Another word, *piggûl*, is a technical term for stale sacrificial flesh, which has not been eaten within the prescribed time (Lv 7^{18} 19^{7}, Ezk 4^{14} [RSV ' foul flesh '], Is 65^{4}). The fourth word, *shikḳûṣ*, is used particularly of objects connected with idolatry, or as a contemptuous term for heathen deities (Jer 4^{1} 7^{30}, 1 K $11^{5, 7}$ [Milcom, Chemosh], 2 K 23^{13} (Ashtoreth [Astarte], Chemosh) ^{24}, Is 66^{3}, Zec 9^{7}). This last word is frequently rendered ' detestable thing ' in EV. A. R. S. K.—H. H. R.

ABOMINATION OF DESOLATION (RSV ' desolating sacrilege ').—The phrase occurs in Mk 13^{14} and in the parallel passage of Mt 24^{15}. In form it is a quotation from the Book of Daniel (9^{27} 11^{31} 12^{11}) where it refers to the heathen altar set up in 168 B.C. by Antiochus Epiphanes on the altar of burnt offering in the Temple at Jerusalem. The Book of Daniel, supposed to be a prophecy of the future, had much influence on the development of apocalyptic ideas among Jews and Christians, and the striking phrase was variously interpreted. Mark's use of it is remarkable for the masculine participle ' standing ' instead of a neuter participle agreeing with the neuter word translated ' abomination,' which strict grammar would require. This would seem to mean that he had in mind a person rather than a thing, and most modern commentators suppose that he was influenced by the belief in Antichrist whose coming was expected by later Judaism (cf 2 Th 2^{3f}). Just as the power of God would be finally revealed in the coming of the Messiah, so the power of evil would be manifested in the appearance of Antichrist, whom the Messiah would destroy. Mark reflects the belief, founded on Daniel, that Antichrist would stand in the Temple at Jerusalem, and that this would be the signal for the final tribulation (Mk 13^{19}).

Whether Mark, or his source, connected this expectation with any particular historical situation is uncertain, but the words ' let him that readeth understand ' suggest that he did, and some commentators believe that we have here a reflection of the excitement aroused by Caligula's abortive attempt to have his statue erected in the Temple in A.D. 40, which Jewish Christians may have thought to mark the beginning of the end.

Matthew, though clearly using Mark, introduces several modifications ; he substitutes a neuter participle for ' standing,' changes ' where it ought not to be ' into ' in the holy place,' and makes express reference to Daniel. This last seems to suggest that he is still interpreting the Abomination of Desolation of Antichrist, and if so the neuter participle is no more than a grammatical correction. Luke departs more widely from Mark and interprets the passage with reference to the fall of Jerusalem in A.D. 70 : ' When you see Jerusalem surrounded by armies, then know that its desolation has come near ' (21^{20}). Luke may be drawing on an independent source, but it is more likely that he is eliminating ideas and phrases that would have been obscure to Gentile readers and giving what he believes to be the sense of the passage. P. G.-S.

ABRAHAM.—*Abram* and *Abraham* are the two forms in which the name of the first patriarch was handed down in Hebrew tradition. The change of name recorded in Gn 17^{5} (P) represents an attempt to give a theological explanation of this double tradition of the name, and involves a popular etymology of the latter of the two forms. Actually, *Abram* and *Abraham* seem to be dialectal or orthographic variations of a name of ancient type found in Babylonian (and perhaps also Egyptian) texts of the Patriarchal Age in the forms *Abarama*, *Abamrama*, etc., the West Semitic (and Hebrew) form of which is *Abiram*. Its meaning is ' My (Divine) Father is Exalted.' The history of Abraham (Gn 11^{27}–25^{18}) consists of a number of originally separate traditions which have been brought together into a semblance of biographical continuity. These narratives (with the exception of ch. 14, which is assigned to a special source) are apportioned by critics to the three main documents of Genesis, J, E, and P ; analysis shows that the biographic arrangement is not due solely to the compiler of the Pentateuch, but existed in the separate sources and, no doubt, in the oral tradition behind them. We can recognize, amidst much diversity, the outlines of a fairly solid and consistent tradition, which may be assumed to have taken shape at different centres where the traditions were handed down, such as the sanctuaries of Hebron and Beersheba.

1. *The account of J* opens with the divine call to Abraham, in obedience to which he separates himself from his kindred and migrates to Canaan (12^{1-8}).

In all streams of the tradition Abraham's migration was from Harran in Upper Mesopotamia, but in 11^{28ff} (cf 15^{7}) we find the further tradition that he had come originally from Ur of the Chaldees in S. Babylonia. Since both Ur and Harran were centres of the moon-cult, a migration from one to the other is not implausible. But the mention of Ur is not textually certain. Many scholars seek Abraham's home farther to the north.

Arrived in Canaan, Abraham builds altars at Shechem, where he received the first promise of the land, and Bethel, where the separation from Lot takes place ;

after which Abraham resumes his southern journey and takes up his abode at Hebron (ch. 13). J thereafter depicts Abraham for the most part either as residing at Hebron, or as leading a semi-nomadic life in the Negeb. It is possible, though not certain, that we have to do with two originally separate strata or cycles of tradition. To the latter belong the episode of Abraham's stay in Egypt, which breaks the connexion in chs. 12f, and the story of Hagar's flight and the prophecy regarding Ishmael in ch. 16. Chs. 18f have their locale in Hebron. Abraham in a theophany receives the promise of a son to be born to Sarah, and also an intimation of the doom impending over the guilty cities of the Plain. The destruction of Sodom and Gomorrah, and the deliverance of Lot, are graphically described in ch. 19, which closes with an account of the shameful origins of Moab and Ammon. Passing over some fragmentary notices in ch. 21, which have been amalgamated with the fuller narrative of E, we come to the last scene of J's record, the mission of Abraham's servant to seek a bride for Isaac, told with such dramatic power in ch. 24. It would seem that the death of Abraham, of which J's account has nowhere been preserved, must have taken place before the servant returned. A note is appended in 25^{1ff} as to the descent of various Arabian tribes from Abraham and Keturah.

2. Of *E's narrative* the first traces appear in ch. 15, a composite and difficult chapter, whose kernel probably belongs rather to this document than to J. In its present form it narrates the renewal to Abraham of the two great promises on which his faith rested—the promise of a seed and of the land of Canaan—and the confirmation of the latter by an impressive ceremony in which God entered into a covenant with the patriarch. The main body of Elohistic tradition, however, is found in chs. 20–22. We have here a notice of Abraham's arrival in the Negeb, followed by a sojourn in Gerar, where Sarah's honour is compromised by the deliberate concealment of the fact that she is married (ch. 20)—a variant form of the Yahwistic account of 12^{10-20}. The expulsion of Hagar, recorded in 21^{9-21} is an equally obvious parallel to J's account of the flight of Hagar in ch. 16, although in E the incident follows, while in J it precedes, the births of both Ishmael and Isaac. The latter part of ch. 21 is occupied with the narrative of Abraham's adventures in the Negeb—especially his covenant with Abimelech of Gerar—which leads up to the consecration of the sanctuary of Beersheba to the worship of Yahweh. Here the narrative has been supplemented by extracts from a Yahwistic recension of the same tradition. To E, finally, we are indebted for the fascinating story of the sacrifice of Isaac in ch. 22, which may be fairly described as the gem of this collection.

3. *In P* the biography of Abraham is mostly reduced to a chronological epitome, based on the narrative of J, and supplying some gaps left by the compiler in the older document. There are just two places where the meagre chronicle expands into elaborately circumstantial description. The first is the account, in ch. 17, of the institution of circumcision as the sign of the covenant between God and Abraham, round which are gathered all the promises which in the earlier documents are connected with various experiences in the patriarch's life. The second incident is the purchase of the cave of Machpelah after the death of Sarah, recorded at great length in ch. 23; this is peculiar to P but, as the fact that the transaction takes place in accordance with the ancient Hittite law shows, it rests, like so much in P, on very old tradition.

4. Such is, in outline, the history of Abraham as transmitted through the major strands of the national tradition. What is the historical value of these traditions? There has been no agreed answer to the question. The tendency has been widespread, while not denying that the traditions might contain some nucleus of fact, to doubt that documents so far removed in time from the events of which they tell could contain much of historical worth. Some have even denied that the Patriarchs ever actually existed. But it is evident to-day that a more positive verdict is required. While archaeological discoveries have cast only indirect light on the patriarchal narratives and have not proved them true in any detail, they have shown that they reflect authentically the situation of the first half of the 2nd millennium B.C. and not that of any later period. We must assume, therefore, that the documents as we read them rest on an unbroken stream of tradition reaching back to the age of Israel's origins. Since in the course of transmission the traditions were subjected to selection, expansion, combination, and refraction, it is impossible to reconstruct from them a biography of Abraham in the modern sense of the word. As is usual in epic material, the figure of the individual patriarch often masks the movements of a sizeable clan. But there is no reason whatever to doubt that Abraham (and Isaac and Jacob) was an individual who actually lived. In the early 2nd millennium Palestine was receiving an influx of North-west-Semitic ('Amorite' or Aramaean) clans, while similar groups were to be found all over Upper Mesopotamia. We may suppose that Abraham, whose stories fit perfectly in this context, was the chief of just such a clan. In one place (14^{13}) he is called a 'Hebrew,' which in this context may refer to a class of people (Khapiru, Ḫabiru, 'Apiru) who appear in texts of the day as rootless folk without fixed status, at times wandering adventurers, at times brigands, at times slaves. The religion of Abraham as described in Genesis is likewise of an ancient type. The God of the Patriarchs was the patron Deity of the clan and its unseen head. It is probable that the note of promise of land and posterity, as well as that of a contractual relationship (covenant) between clan-father and Deity, is an authentic feature of this type of religion. If so, the patriarchal religion was, as one scholar (A. Alt) has happily put it, a 'schoolmaster' to Moses. A precise date for Abraham cannot be given. If the Amraphel of ch. 14 could be identified with Hammurabi (*c* 1728–1686 B.C.), Abraham could be placed in the 18th–17th cents. But although this date is probably not far wrong, the identification cannot be carried through.

5. From the religious point of view, the life of Abraham has a surprising inner unity as a record of the progressive trial and strengthening of faith. It is a life of unclouded earthly prosperity, broken by no reverse of fortune; yet it is rooted in fellowship with the unseen. 'He goes through life,' it has been well said, 'listening for the true *tōrā*, which is not shut up in formal precepts, but revealed from time to time to the conscience; and this leaning upon God's word is declared to be in Yahweh's sight a proof of genuine righteousness.' He is the Father of the faithful, and the Friend of God. And that inward attitude of spirit is reflected in a character of singular loftiness and magnanimity, an unworldly and disinterested disposition which reveals no moral struggle, but is nevertheless the fruit of habitual converse with God. The few narratives which present the patriarch in a less admirable light only throw into bolder relief those ideal features of character in virtue of which Abraham stands in the pages of Scripture as one of the noblest types of Hebrew piety. J. S.—**J. Br.**

ABRAHAM'S BOSOM.—To Jews of NT times the place to which souls went to await the final judgment had compartments, mutually visible but decisively separated, where evil souls endured torment, while righteous souls enjoyed comfort. In Lk 16^{19ff} Jesus calls the latter 'Abraham's Bosom,' picturing Lazarus there, while Dives calls to him from torment. 'Bosom' as a place of rest was a common figure, *e.g.* the bosom of mother earth; so in Jn 1^{18} the Son is 'in the bosom of the Father.' The connexion with paternal tenderness is obvious, and so. since Abraham was the 'father' of the Jews (Lk 3^{8}), being 'gathered to the fathers' (Jg 2^{10}) was to go to the Patriarchs (4 Mac 13^{17}; *Gittin* 57b), and in particular to Abraham's bosom (Buber's *Eka rabbati*, I, 43a; *Pesiqta rabbati* 180b; *Qiddushin* 72b).

The phrase was widely used in Christian literature as a synonym for the intermediate state or for Paradise.

A. J.

ABRAM.—See Abraham.

ABRECH (AVm, RVm).—See Abrek.

ABREK (RSVm).—A word of doubtful signification, translated 'Bow the knee' in EV (Gn 41[43]). This rests on an improbable Hebrew derivation. An Assyrian etymology has been proposed, viz. *abarakku*, the title of one of the highest officials in the Assyrian empire, but no such borrowings from Assyria are shown in Egypt. It is more probable that it is of Egyptian origin. Two possible Egyptian explanations have been offered: (1) 'Praise!' but the word is rare and doubtful; (2) *abrak*, apparently meaning 'Attention!' 'Have a care!' (Spiegelberg). The latter seems the least improbable.

F. Ll. G.

ABRON.—A brook mentioned in Jth 2[24] (AV, RV **Arbonai**); its identification is unknown.

ABRONAH.—A station in the journeyings in the wilderness (Nu 33[34f]); poss. *'Ain ed-Defiyeh*, near Ezion-geber.

ABSALOM, ABISHALOM ('(my) father is Shalom,' *i.e.* 'Peace,' a divine name or title associated particularly with Jerusalem, cf 'Solomon').—Third son of David, by Maacah, dtr of Talmai, king of Geshur (2 S 3[3]). His history is told in 2 S 13–19. He murdered his half-brother Amnon for the rape of Tamar his sister, fled to his grandfather for three years, returned when Joab engineered the royal assent thereto, but being still excluded from court, set himself with his undoubted address (2 S 14[25]) and egotism to win support for his bid to supplant David as king (2 S 15[1-6]). Four (not 'forty') years after his return he set up the standard of rebellion at Hebron, his birthplace and the former capital. The rest of Judah, too, seems to have supported him, possibly being aggrieved at David's 'pan-Israel' politics. As an assertion of his claim to the throne Absalom appropriates the members of the royal harem left in Jerusalem by the fleeing David; but having lost his precious military initiative owing to the insidious advice of Hushai, Absalom's army is beaten in the field by David's veteran troops at Mahanaim. Against the king's express injunction, Joab personally kills Absalom, who has become entangled in a tree. There may be some mythological traits mixed up with his history, *e.g.* his burial and pillar (2 S 18[17f]), his excessive growth of hair (about 5 lb. per annum, 14[26])—though hair cutting, especially of royalty, is subject to many taboos in all primitive societies. More credence is usually given to 18[18], which makes him sonless, than to 14[27] which gives him four children. Rehoboam's favourite wife was a (grand-) daughter of Absalom (2 Ch 11[20f]). The 'house of Absalom' in DSH i, 13 can have no more than an allegorical reference to the above. J. T.—**D. R. Ap-T.**

ABSALOM (in Apocr).—**1.** The father of Mattathias, one of the captains who stood by Jonathan at Hazor (1 Mac 11[70]=Jos *Ant.* xiii. v. 7 [161]). It is perhaps the same Absalom whose son Jonathan was sent by Simon to secure Joppa (1 Mac 13[11]=Jos *Ant.* xiii. vi. 4 [202]). **2.** An envoy sent by the Jews to Lysias (2 Mac 11[17]).

ABUBUS.—Father of Ptolemy, the murderer of Simon the Maccabee (1 Mac 16[11, 15]).

ABYSS.—A Greek adjective meaning 'very deep' or 'bottomless' is used in the LXX, mainly as a translation of the Hebrew *t^ehôm* (Gn 1[2], etc.), and signifying therefore the primeval deep upon which the earth rests. It was then applied to the subterranean abode of the dead and came to have the meaning of dwelling place for the evil spirits or their fiery prison house. This latter view is present already in Enoch. The word is found nine times in the NT, the RV transliterating all nine, the RSV reverting to the AV 'bottomless pit' in all Rev. passages. Ro 10[7] uses it for the place of the dead; Lk 8[31] and Rev 9[1, 2, 11] 11[7] 17[8] 20[1, 3], refer to the abode of the demons, questionably as a place of punishment.

C. C. Ro.

ACACIA.—See Shittah Tree.

ACATAN, 1 Es 8[38] (AV).—See Hakkatan.

ACCABA, 1 Es 5[30] (RV).—See Hagab.

ACCAD.—See Akkad.

ACCEPTANCE denotes the being in favour with anyone. In EV the noun is found only in Is 60[7], but 'accept' and 'acceptable' are used frequently both in OT and NT to express the acceptance of one man with another (Gn 32[20], Lk 4[24]), but above all the acceptance of man with God. In OT the conditions of acceptance with God are sometimes ceremonial (Ex 28[38], Ps 20[3]). But of themselves these are insufficient (Gn 4[5, 7], Am 5[22], Jer 6[20] 14[10, 12]), and only moral uprightness (Pr 21[3], Job 42[8f]) and the sacrifices of a sincere heart (Ps 19[14] 119[108]; cf 40[6ff] 51[15ff]) are recognized as truly acceptable with God. In NT the grounds of the Divine acceptance are never ceremonial, but always spiritual (Ro 12[1], Ph 4[18], 1 P 2[5]). Jesus Christ is the type of perfect acceptance (Mk 1[11]||, He 10[5ff]). In Him as 'the Beloved,' and through Him as the Mediator, men secure their religious standing and fundamental acceptance with God (Eph 1[6]). In serving Him (Ro 14[18]), and following His example (1 P 2[20, 21]), they become morally acceptable in the Father's sight.

J. C. L.

ACCESS (Gr. *prosagōgē*).—The word occurs only in Zec 3[7], Ro 5[2], Eph 2[18] 3[12], and the question (regarding which commentators are much divided) is whether it ought to be understood in the transitive sense as 'introduction,' the being brought near by another, or in the intransitive sense as 'access' or personal approach. The transitive sense is most in keeping with the ordinary use of the verb *prosagō* in classical Gr. (cf its use in 1 P 3[18] 'that he might bring us to God')—the idea suggested being that of a formal introduction into a royal presence. 'Access,' moreover, does not so well express the fact that we cannot approach God in our own right, but need Christ to introduce us; cf 'by [RV, RSV 'through'] whom' (Ro 5[2]), 'through him' (Eph 2[18]), 'in whom' (3[12]). The word 'access' does not occur in Hebrews, but the writer has much to say on the subject of our approach to God through Christ, especially for the purpose of prayer (4[14ff]) and worship (10[19ff]). J. C. L.

ACCHO, Jg 1[31] (AV).—See Acco.

ACCO.—Jg 1[31] (AV **Accho**). See Ptolemais.

ACCOS.—Grandfather of one of the envoys sent to Rome by Judas Maccabaeus in 161 B.C. (1 Mac 8[17]). Accos represents the Hebrew **Hakkoz** (q.v.), the name of a priestly family (1 Ch 24[10], Ezr 2[61]).

ACCOZ, 1 Es 5[38] (AV).—See Hakkoz, **1.**

ACCURSED.—See Ban.

ACELDAMA, Ac 1[19] (AV).—See Akeldama.

ACHAIA.—This name was originally applied to a strip of land on the N. coast of the Peloponnese. On annexing Greece and Macedonia as a province in 146 B.C., the Romans applied the name Achaia to the whole of that country. In 27 B.C. two provinces were formed, Macedonia and Achaia; and the latter included Thessaly, Aetolia, Acarnania, and some part of Epirus, with Euboea and most of the Cyclades. A Senatorial province since Caligula, it was governed by a proconsul of the second grade, with headquarters at Corinth (Ac 18[12]). 'Hellas' (Ac 20[2]) is the native Greek name corresponding to the Roman 'Achaia.' There were Jewish settlements in this province, at Corinth, Athens, etc. (Ac 17[17] 18[4, 7]), and the work of St. Paul began amongst them and was carried on by Apollos (1 and 2 Co *passim*, Ac 17[16ff]. 18. 19[1]).

A. So.

ACHAICUS.—The name of a member of the Church at Corinth. He was with Stephanas and Fortunatus (1 Co 16[17f]) when they visited St. Paul at Ephesus and 'refreshed his spirit.' Nothing more is certainly known of him. As slaves were often named from the country of

their birth, it is a probable conjecture that he was a slave, born in Achaia. J. G. T.

ACHAN.—Son of Carmi, of the tribe of Judah (Jos 7^{1}). After the defeat at Ai, Joshua resorted to the sacred lot to find out who had transgressed by retaining some of the spoil of Jericho, which had been placed under the ban (q.v.), and Achan was singled out (Jos 7^{16ff}). He confessed his guilt, and according to the usage of the times, he and his family were stoned, and their dead bodies burned—the latter an even more terrible punishment in the eyes of ancient Israel. The sentence was carried out in the valley of **Achor** (Jos 7^{24}), whose name (' trouble ') is connected with the ' trouble ' Achan had brought on Israel and on himself (Jos 7^{25f}). In 1 Ch 2^{7} his name is given as **Achar,** as also in LXX^{B} in Jos 7. Koehler thinks this was the original form of the name.

W. O. E. O.—H. H. R.

ACHAR.—See ACHAN.

ACHBOR (' mouse ' or ' jerboa ').—**1.** An Edomite (Gn 36^{38}). **2.** A courtier under Josiah, son of Micaiah (2 K $22^{12, 14}$), and father of Elnathan (Jer 26^{22}; omitted in LXX, 36^{12}). Called **Abdon** (q.v.) in 2 Ch 34^{20}.

ACHIACHARUS, To 1^{21} (AV, RV).—Form of the name **Ahikar** (q.v.), which stands in RSV.

ACHIAS, 2 Es 1^{2} (AV, RV).—An ancestor of Ezra, omitted in Ezr and 1 Es; RSV **Ahijah** (q.v.).

ACHIM (perhaps a shortened form of **Jehoiachim**), an ancestor of our Lord (Mt 1^{14}).

ACHIOR (' brother of light ').—A general of the Ammonites (Jth 5^{5}, etc.), afterwards converted to Judaism (14^{10}).

ACHIPHA, 1 Es 5^{31} (RV).—See HAKUPHA.

ACHISH.—The king of Gath to whom David fled for refuge after the massacre of the priests at Nob (1 S 21^{10}). In 1 S 27^{2} he is called ' the son of Maoch ' (possibly = ' son of Maacah,' 1 K 2^{39}). He received David with his band of 600 men, and assigned him the city of Ziklag in the S. of Judah. Despite the wishes of Achish, the other Phil. princes refused to let David take part in the final campaign against Saul. [' Achish ' should be read for ' Abimelech ' in Ps 34 (title).]

ACHITOB, 1 Es 8^{2}, 2 Es 1^{1} (AV).—See AHITUB, **3.**

ACHMETHA, Ezr 6^{2} (AV, RV).—See ECBATANA.

ACHOR (' grief ').—In this valley **Achan** (q.v.), with his family, was stoned to death. It lay on the boundary between Judah and Benjamin (Jos 15^{7}), but its exact location is unknown. The *Wâdī Qelt*, a tremendous gorge which breaks down from the mountain W. of Jericho, has been suggested. In prophetic visions of the future it was to become a ' door of hope ' (Jos 2^{15}) and a place of pasture (Is 65^{10}).

ACHSA, 1 Ch 2^{49} (AV).—See ACHSAH.

ACHSAH (' anklet ').—The daughter of Caleb, Jos 15^{16}, Jg 1^{12}, 1 Ch 2^{40} (AV **Achsa**). Her father promised her in marriage to the man who should capture Debir or Kiriath-sepher—a feat accomplished by Othniel, the brother of Caleb. Her dowry was increased by the grant of ' the upper springs and the lower springs ' (Jos 15^{16-19}, Jg 1^{11-15}).

ACHSHAPH.—A city of Asher (Jos 19^{25}), whose king joined Jabin's confederacy, which was defeated by Joshua, the ruler of Achshaph being amongst the slain (Jos 11^{1} 12^{20}); or possibly these were two separate cities. The location is unknown; suggested identifications include *El-Kesâf*, *c* 17 miles E. of Tyre, *Tell Kîsân*, SE. of Acre, and *et-Tell* on the *Nahr Mefshuḥ*.

ACHZIB.—**1.** A town in Asher (Jos 19^{29}), from which the natives could not be dislodged (Jg 1^{31}); it lay on the coast between Acre and Tyre, modern **Ez-Zib.** In NT times it was called *Ekdippa*. **2.** A town in the S. of the Shephelah (Jos 15^{44}), near Mareshah. Mic 1^{14} predicts that Achzib shall become ' a deceitful thing ' (*'akhzābh*), *i.e.* failing those who trust it. Possibly modern *Tell el-Beiḍâ*.

ACIPHA, 1 Es 5^{31} (AV).—See HAKUPHA.

ACITHO, Jth 8^{1} (AV).—See AHITUB, **4.**

ACRA.—See CITADEL.

ACRABA (Jth 7^{18}).—Apparently the town of *'Akrabeh*, E. of Shechem, the capital of Akrabattene (AV, RV **Ekrebel**).

ACRE.—See WEIGHTS AND MEASURES.

ACROSTIC.—An acrostic poem is one so arranged that the initial letters of a sequence of literary units (single lines, two lines, three lines, etc., as the case may be) follow a definite arrangement or spell out a significant word or words. There are fourteen such poems in the OT: Nah 1; Pss 9–10, 25, 34, 37, 111, 112, 119, 145; Pr 31^{10-31}; La 1, 2, 3, 4; another instance is Sir 51^{13-30}, All these are of a similar type, and are so planned that the initials recurring at fixed intervals follow the order of the Hebrew alphabet; thus the first unit of the poem begins with the first letter of the Hebrew alphabet, the second unit with the second letter, and so on down to the last letter. Pss 111, 112 represent the one-line unit; in Pss 25, 34, 145, Pr 31^{10-31}, Sir 51^{13-30}, and in the fragment, which does not clearly extend beyond the thirteenth letter, contained in Nah 1, the unit is two lines; in La 4 it is two longer lines, in chs. 1 and 2 it is three longer lines; in Pss 9 and 10 (a single continuous poem) and in Ps 37, it is four lines. In La 3, where the unit is three lines, each line of each three-line unit begins with the appropriate letter; in Ps 119, where the unit is sixteen lines, each alternate line within the unit begins with the appropriate letter.

Certainly in La 2, 3, 4 and, according to the order of the verses in LXX, in Pr 31, probably also in Ps 34 (where the sense seems to require the transposition of vv. 15 and 16) and in Ps 9, the sixteenth and seventeenth letters of the Hebrew alphabet occupy respectively the seventeenth and sixteenth places in the acrostic scheme. The reason for this is unknown.

Comparatively few of these poems have come down to us intact. They have suffered from accidental errors of textual transmission, and probably also from editorial alterations. In some cases an entire strophe has dropped out of the text; thus the sixth strophe (of two lines) has fallen out between v. 6 and v. 7 in Ps. 34, and the fourteenth between v. 13 and v. 14 in Ps. 145, although in the latter case is still stood in the Hebrew MS from which the Greek version was made. Occasionally lines have been inserted, as, apparently, in more than one place in Ps 37 and in Nah 1^{2}. But such corruption of the text is really serious only in Pss 9–10, Nah 1, and Sir 51^{13-30}.

The earliest of these fifteen poems are probably La 2 and 4, which may have been written in the earlier half of the 6th cent. B.C.; but the custom of writing such poems may have been much more ancient. Perhaps the latest of the poems is Sir 51^{13-30} (*c* 180 B.C.), but the Jews continued to compose such poems long after that.

The English reader will find the strophes clearly distinguished and the initial letters with their names in English letters indicated, in the RV of Ps 119. Unfortunately the RV does not give the initials in the other poems; but they will be found, in the case of the Psalms, in (for example) Kirkpatrick's *Psalms* and other commentaries; for Lamentations, in Gottwald's *Studies in the Book of Lamentations*; for Nahum, in Stonehouse's *Nahum* or Driver's *Nahum*. Common though it is in other literatures and with such mediaeval Jewish poets as Ibn Ezra, no decisive instance of the type of acrostic in which the initial letters compose a name has been found in the OT, though some have detected the name Simeon thus given in Ps 110. Pss 25 and 34 contain each an additional strophe at the close of the alphabetic strophes; in each case the first word of the verse is a part of the Hebrew verb *pādhāh*, ' to redeem,' and it has been suggested that the author or a copyist has thus left us a clue to his name—*Pedahel*; but interesting as this suggestion is, it remains doubtful. G. B. G.—J. Ma.

ACTS OF THE APOSTLES.—See LUKE, GOSPEL ACCORDING TO.

ACUA, 1 Es 5[30] (AV).—See AKKUB, 3.

ACUB, 1 Es 5[31] (AV, RV).—See BAKBUK.

ACUD, 1 Es 5[30] (RV).—See AKKUB, 3.

ADADAH.—A city of Judah in the Negeb (Jos 15[22]), perhaps a corrupt reading for **Ararah,** to be identified with Aroer, **2** (q.v.).

ADAH.—1. One of the two wives of Lamech, and mother of Jabal and Jubal (Gn 4[19f]). The name possibly means 'brightness' (cf Arab. *ghadāt*), Lamech's other wife being named Zillah ('shadow'). **2.** Daughter of Elon, a Hittite, and one of the wives of Esau (Gn 36[2]). In Gn 26[34] Elon's daughter is named **Basemath** (q.v.).

ADAIAH ('Y" has adorned').—**1.** The maternal grandfather of Josiah, 2 K 22[1]. **2.** A Levite, 1 Ch 6[41], called **Iddo** (q.v.) in v.[21]. **3.** A son of Shimei (in v.[13] Shema) the Benjamite, 1 Ch 8[21]. **4.** The son of Jeroham, a priest, and head of a family in Jerusalem, 1 Ch 9[12]. **5.** The father of Maaseiah, a captain who helped to overthrow the usurpation of Athaliah, 2 Ch 23[1]. **6.** One of the family of Bani, who took a foreign wife during the Exile, Ezr 10[29], 1 Es 9[30] (AV, RV **Jedeus**). **7.** Another of a different family of Bani, who had committed the same offence, Ezr 10[39]. **8.** A descendant of Judah by Perez, Neh 11[5]. **9.** A Levite of the family of Aaron, Neh 11[12]; probably the same as No. **4.**

ADALIA.—The fifth of the sons of Haman (Est 9[8]), put to death by the Jews.

ADAM.—The derivation of this word is doubtful. Some derive it from a root signifying 'red' (cf *Edom,* Gn 25[30]). The Biblical writer (Gn 2[7]) explains it by a play on the word *'ᵃdhāmāh,* 'ground'; but that is itself derived from the same root 'red.' The word itself occurs in the Hebrew thirty-one times in Gn 1[5–5]. In most of these it is not a proper name, and the RSV and RV have rightly substituted 'man' or 'the man' in some verses where AV has 'Adam.' Since the name signifies 'mankind,' *homo, Mensch,* not 'a man,' *vir, Mann* (see 5[2]), the narrative appears to be a description, not of particular historical events in the life of an individual, but of the beginnings of human life (ch. 2), human sin (ch. 3), human genealogical descent (4[1, 25] 5[1–5]). In a few passages, the writer slips into the use of Adam as a proper name, but only in 5[3–5] does it stand unmistakably for an individual.

For the Babylonian affinities with the story of Adam, see CREATION, EDEN. A. H. McN.—J. W. W.

ADAM (city).—A city in the Jordan valley, 'beside Zarethan' (Jos 3[16]), where the waters were held back for the crossing of the river; modern *Tell ed-Dâmiyeh.* A cryptic reference stands in Hos 6[7] (RSV 'at Adam'; AV 'like men,' RV 'like Adam'). In 1 K 7[46] some read 'at the ford of Adamah' for EV 'in the clay ground,' and it may be that Hiram had his furnace here (note that it was near Zarethan, though 2 Ch 4[17] has Zeredah).

ADAM IN THE NT.—A. In the Gospels.—1. In Mt 19[4–6] || Mk10[6–8] Jesus refers to Gn 1[27] (5[2]) and 2[24] to support the view that the provision made for divorce in the Mosaic law (Dt 24[1]) was only a concession to men's perversity ('hardness of heart'). The truer and deeper view of marriage is to be based upon the primaeval nature of man and woman, as shown in the Creation story (see also Eph 5[28–31]).

2. In Lk 3[38] the ancestry of Jesus is traced back to Adam. As a Gentile writing for Gentiles, Luke took occasion to emphasize the universalism of the gospel. Jesus is not, as in Matthew's genealogy, a descendant of Abraham only (Mt 1[2]), but of Adam, the ancestor of all mankind. Moreover, not only is Jesus 'the Son of God' in a very special sense (Lk 1[35]), but, by the closing words of the genealogy, Luke claims that the first man, and hence every human being, is a 'son of God.' As Jesus is both human and divine, so all mankind partake of this twofold nature.

B. In the Epistles.—The truth taught by Luke is treated in its redemptive aspect by Paul.

1. 1 Co 15[22]. The solidarity of mankind in their physical descent from Adam and their spiritual union with Christ involves respectively universal death and eternal life as a consequence of Adam's sin (Gn 3) and of Christ's redemptive work.

2. In Ro 5[12–21] this theme is treated more fully.—(*a*) vv.[12–14]. *There is a parallelism between Adam and Christ.* Both had a universal effect upon mankind. Adam transmitted sin and therefore death; even those who lived before Moses received the Law sinned and were subject to death, though their sin cannot be held against them, since they were without the guidance of the Law. The Apostle, without attempting fully to reconcile them, places side by side the hereditary transmission of guilt ('original sin') and moral responsibility: 'and so death spread to all men *because all men sinned.*'—(*b*) vv.[15–17]. *The contrast is far greater than the similarity*; in quality (v.[15]), in quantity (v.[16]), in character and consequences (v. [17]).—(*c*) vv.[18–21]. *Summary.* Men are now to be evaluated not in the light of Adam but in the light of Christ. The Law (Torah, probably meaning here the entire OT revelation) made sin worse because it showed a better way; but the grace of God in Christ became all the more abundant in its saving power. (See K. Barth, *Christ and Adam,* for further implications.)

3. 1 Co 15[35–50]. In the foregoing passages Paul deals with the practical moral results of union with Adam and Christ respectively. This passage (*a*) goes deeper, showing that there is a radical difference between their two natures; and (*b*) it looks forward to show that this difference has a vital bearing on the question of man's resurrection.

(*a*) vv.[35–41]. It is shown, by illustrations from nature, that it is reasonable to believe man to exist in two different states, one far higher than the other.

(*b*) vv.[42–50]. Paul utilizes Gn 27, 'man became a living soul' (Hebrew *nephesh,* Greek *psychē*; RSV 'being'), deriving the doctrine that the body of the first man (Adam) was 'psychical' (so the Greek; AV 'natural,' RSV 'physical'), and thus equating the words ordinarily translated 'soul' in English with the carnal and the transitory. Since 'the last Adam became a life-giving spirit' (v.[45]), 'soul' and 'spirit' are set in contrast, contrary to popular understanding in our day, but in accord with Greek usage in NT times.

As the living soul or being (*psychē*) preceded the life-giving spirit (*pneuma*), so it is with the development of mankind (v.[46]). The first man had a nature in conformity with his origin from clay, while the Second has His origin 'from heaven' (v.[47]); thus the nature of some men remains earthy, while that of others has become heavenly (v.[48]). Moreover, in his present state man is the exact counterpart of the first man because of his corporate union with him; but the time is coming when we shall become the exact counterpart of the Second Man (cf Gn 1[26f]), because of our spiritual union with Him (v.[49]).

4. In Ph 2[5–6] there is an implied contrast between 'Christ Jesus, who . . . did not count equality with God a thing to be grasped,' and Adam, who took fruit from the tree of knowledge of good and evil, an act which God said had made him 'like one of us' (Gn 3[22]).

5. On 1 Ti 2[13f] see EVE; and on Jd [14] see ENOCH.

A. H. McN.—W. F. S.

ADAMAH.—1. A fortified city of Naphtali, Jos 19[36]; its situation is unknown, and the identification with *ed-Dâmiyeh,* 5 miles SW. of Tiberias (see ADAMI-NEKEB) is thought improbable. **2.** See ADAM.

ADAMANT.—In Ezk 3[9], Zec 7[12] EV use the word to render *shāmîr,* which is elsewhere rendered either 'brier' (Is 5[6] 7[23ff] and elsewhere) or 'diamond' (Jer 17[1]). 'Diamond,' which arose from 'adamant' by a variety of spelling ('adamant' or 'adimant,' then 'diamant' or 'diamond') has displaced 'adamant' as the name of

the precious stone, ' adamant ' being now used rhetorically to express extreme hardness. LXX has ' adamant ' for ' plumbline ' in Am 7^{7}, where Hebrew word is different; but few follow. See also JEWELS AND PRECIOUS STONES (*sub* **Diamond**).

ADAMI-NEKEB.—A place on the border of Naphtali, mentioned in Jos 19^{36} (AV Adami, Nekeb, taking as two places; so *Westminister Atlas*); modern *Khirbet ed-Dâmiyeh*, 5 miles SW. of Tiberias. See ADAMAH, **1.**

ADAR, Jos 15^{3} (AV).—See ADDAR.

ADAR.—See TIME.

ADASA.—A town near Bethhoron (1 Mac $7^{40, 45}$, Jos. *Ant.* XII. x. 5 [408]), now the ruin *'Adaseh* near Gibeon. See Map 10.

ADBEEL (? ' God disciplines ').—Third son of Ishmael (Gn 25^{13}, 1 Ch 1^{29}), eponym of the North Arabian tribe, which appears in cuneiform inscriptions as *Idibi'lu*, and which had its settlements SW. of the Dead Sea.

ADDAN.—A place in Babylonia from which some returned with Zerubbabel, who were unable to prove their Israelite descent by showing to what clan or family they belonged (Ezr 2^{59}; also 1 Es 5^{36} RSV, where AV has Charaathalar and RV Charaathalan, q.v.). The name does not appear in the later lists in Ezr 10, Neh 10. In Neh 7^{61} it appears as **Addon.**

ADDAR.—1. A town on the border of Judah south of Beersheba, Jos 15^{3} (AV **Adar**); Hezron and Addar, which appear to be distinct here, probably together constitute **Hazar-addar** (q.v.) in Nu 34^{4}. **2.** See ARD.

ADDER.—See SERPENT.

ADDI.—An ancestor of Jesus, Lk 3^{28}.

ADDO, 1 Es 6^{1} (AV, RV).—See IDDO, **7.**

ADDON, Neh 7^{61}.—See ADDAN.

ADDUS.—1. One whose sons returned with Zerubbabel, 1 Es 5^{34}; omitted in the parallel lists in Ezr 2, Neh 7. **2.** 1 Es 5^{38} (AV); see JADDUS.

ADER, 1 Ch 8^{15} (AV).—See EDER, **4.**

ADIDA.—A city in the Shephelah (Jos. *Ant.* XIII. vi. 5 [203]) fortified by Simon the Hasmonaean (1 Mac 12^{38} 13^{13}); probably identical with **Hadid** (q.v.).

ADIEL (' El is an ornament ').—**1.** A Simeonite prince, 1 Ch 4^{36}. **2.** A priest, 1 Ch 9^{12}. **3.** The father of Azmaveth, David's treasurer, 1 Ch 27^{25}.

ADIN.—One whose descendants returned with Zerubbabel to the number of 454 (Ezr 2^{15}, 1 Es 5^{14} ([RV **Adinu**]) or 655 (Neh 7^{20}). A second party of 51 (Ezr 8^{6}), or 250 (1 Es 8^{32}) accompanied Ezra. They are mentioned among ' the chiefs of the people ' who sealed the covenant (Neh 10^{16}).

ADINA.—A Reubenite chief, 1 Ch 11^{42}.

ADINO, 2 S 23^{8} (AV, RV).—The Hebrew text of this verse is corrupt, the true reading being preserved in the parallel passage 1 Ch 11^{11}, which is restored here in RSV.

ADINU, 1 Es 5^{14} (RV).—See ADIN.

ADINUS, 1 Es 9^{48} (AV).—See JAMIN, **3.**

ADITHAIM.—A city of Judah in the Shephelah, Jos 15^{36}; location uncertain.

ADLAI (? ' Y" is just ').—The father of Shaphat, one of David's herdsmen, 1 Ch 27^{29}.

ADMAH.—A city near Sodom (Gn 10^{19} $14^{2, 8}$), whose overthrow is not recorded in the account of the destruction of Sodom and Gomorrah (Gn 19), but is linked with them in Dt 29^{23}, Hos 11^{8}.

ADMATHA.—One of the seven counsellors of Ahasuerus (Est 1^{14}), who were granted admittance to the king's presence (cf 2 K 25^{19}).

ADMIRATION.—This word in AV means no more than *wonder*, as Rev 17^{6} ' I wondered with great admiration ' (RV ' with a great wonder,' RSV ' I marvelled greatly ').

ADNA (' pleasure ').—**1.** A contemporary of Ezra, who married a foreign wife, Ezr 10^{30}. **2.** The head of the priestly house of Harim, Neh 12^{15}.

ADNAH.—1. A Manassite officer of Saul's who deserted to David at Ziklag, 1 Ch 12^{20}. **2.** An officer in Jehoshaphat's army, 2 Ch 17^{14}.

ADONI-BEZEK.—A king of Bezek (see BEZEK, **1**), who was defeated by Simeon and Judah. The mutilation inflicted upon him—the cutting off of the thumbs and great toes—was in order to render him harmless, while retaining him as a trophy; but he died on reaching Jerusalem. Adoni-bezek boasted of having mutilated seventy kings in a similar manner. The passage which speaks of Adoni-bezek (Jg 1^{5-7}) does not appear to be intact; the original form probably gave more details. The name Adoni-bezek is perhaps a corrupted form of Adoni-zedek (Jos 10^{1}), with which cf Melchizedek (Gn 14^{10}), also of Jerusalem.

ADONIJAH (' Jah is Lord ').—**1.** The fourth of the six sons of David who were born in Hebron; his mother was Haggith, a name which is possibly of Phoenician origin (2 S 3^{4}). The story of Adonijah (typical of many an oriental court intrigue) is recorded in 1 K 1^{1}–2^{36} at the end of the court history of David, which may be acclaimed as probably the first and certainly among the greatest of all the historical narratives of antiquity. Apart from the disputed passage 2^{1-9}, the story is a unity, and marked by a strong sense of inevitable tragedy. Its main theme and interest is the succession to the Davidic throne and the necessity of ensuring that, in a kingdom so dependent on the personality of its founder, a successor of similar calibre may be chosen.

David's marriage with Saul's daughter Michal had proved childless. After the death of Absalom, Amnon and Chileab also being dead, Adonijah became the obvious heir to the throne. The old Israelite custom was that the first-born son took precedence without regard to the position of the mother in the hierarchy of the father's wives. 1 K 2^{15} suggests that the general populace expected Adonijah to succeed his father. He is described as ' very handsome,' but spoiled by his father who had failed to discipline him. But his succession was not taken for granted by everyone, since there was already a strong party in favour of Solomon, son of Bathsheba. It seems that the succession finally depended on the decision of David and, fatally, David postponed decision. Adonijah sought support from the immediate entourage of David; and Joab, one of David's generals, together with Abiathar, priest of the Jerusalem sanctuary, adhered to his cause. There was an opposition party, including Benaiah (a rival of Joab), Zadok (the other priest of the royal sanctuary), and, the leading mind, the court prophet Nathan. That Nathan should support the son of Bathsheba, the circumstances of whose marriage with David he had so strongly denounced, and that he should enter into a plot with her to induce David to decide in Solomon's favour, probably means that Nathan regarded Adonijah as a totally inadequate and unsuitable personality for the royal office. Thus Adonijah may be said to have come under unfavourable prophetic judgment.

The course of events is straightforward. Adonijah arranged an accession festival to which he invited all the men of note, except those who supported Solomon, and mention is made of ' all the men of Judah.' It appears that Adonijah tried to play upon the jealousy which still existed between the North and the South, as Absalom had done. His sacrificial act at the stone of Zoheleth proclaimed his kingship. But it also gave timely warning to his enemies. These, now on the alert, represented the gathering to the aged David as an attempt to usurp the throne while he was still alive. Bathsheba reminded David of his promise that Solomon should succeed him, and this is the first statement of the royal intention. It is possible that David thought it politic to prefer a Jerusalem-born son to those born at Hebron, as the best means of preserving the unity of North and South.

However that may be, David, guided by the influential Bathsheba who played her part with consummate tact, decisively named Solomon as his successor.

It was now the turn of Adonijah and his party to be caught by surprise. Adonijah took sanctuary. Solomon granted him his life, provided he behaved like 'a gentleman,' and dismissed him to private life. Tragically the prince then had the misfortune to fall in love with Abishag the Shunammite, the maiden who was brought to David in his old age. It is made clear that she was not the king's wife; otherwise, of course, Bathsheba would not have dared to support his suit to the king. Adonijah was probably moved by passion rather than by ambition for the throne (though this remains a matter of dispute). But so long as Adonijah was alive, however loyal he might be, he was a potential centre of disaffection. Solomon therefore seized his opportunity, interpreted Adonijah's suit as concealed conspiracy, condemned him and ordered Benaiah to execute him the same day.

2. One of the leading laymen who sealed the covenant in Neh 10[16] (probably = **Adonikam** Ezr 2[13]).

3. One of the Levites sent in the third year of Jehoshaphat to teach the Law in the cities of Judah (2 Ch 17[7-9]). W. O. E. O.—**D. R. J.**

ADONIKAM ('my Lord has arisen').—The head of a Jewish family after the Exile, Ezr 2[13] 8[13], Neh 7[18], 1 Es 5[14] 8[39]; apparently called **Adonijah** in Neh 10[16].

ADONIRAM, ADORAM ('my Lord is exalted').—An official who superintended the levies employed in the public works during the reigns of David, Solomon, and Rehoboam, 2 S 20[24], 1 K 4[6] 5[14] 12[18]. He was stoned to death by the rebellious Israelites when sent to them by Rehoboam. The shorter form of the name (2 S 20[24], 1 K 12[18]) is probably a corruption of the longer. In 2 Ch 10[18] he is called **Hadoram.**

ADONIS.—The Greek form of Semitic *'ādōn*, meaning 'lord.' Adonis was the Syrian deity of vegetation which wilted with the summer sun. The death of the god was mourned by the women of Phoenicia, particularly by the river Adonis (modern *Nahr Ibrahim*) near Beirut. The cult was known in Greece also, where Plato mentions Adonis-gardens (*Phaedrus*), pots of herbs, which were used in rites of imitative magic during the seven-day ascendancy of the Dog-star. There is a conceivable reference to this rite in *niṭ'ê na'ᵃmānîm* ('plantings of Adonis,' AV; cf RSV 'pleasant plants') mentioned in Is 17[10], the title of Adonis being *na'ᵃmān* ('pleasant'). See also TAMMUZ. J. Gr.

ADONI-ZEDEC (AV).—See ADONI-ZEDEK.

ADONI-ZEDEK ('my Lord is Zedek').—King of Jerusalem (AV **Adoni-zedec**) at the time of the invasion of Canaan by the Israelites under Joshua. After the Gibeonites had made a league with Israel, he induced four other kings to unite with him against the invaders. Joshua came unexpectedly upon them and routed them. They were captured in a cave at Makkedah, and brought to Joshua, who had them slain. Their bodies were hung up until the evening, when they were taken down and flung into the cave where they had hidden themselves. The mouth of the cave was filled up with great stones (Jos 10[1-27]). Some have identified Adoni-zedek with Adoni-bezek (q.v.). For the divine name, **Zedek,** associated with Jerusalem, cf MELCHIZEDEK.

ADOPTION.—The term 'adoption' is found four times in the undoubted Pauline letters (Ro 8[15, 23] 9[4], Gal 4[5]), once in Eph 1[5], which may be Pauline, and not elsewhere in the NT. In Ro 9[4] the Apostle refers to the privileged position of the Jews as the chosen people, the allusion no doubt being to Ex 4[22] where God calls Israel his first-born son. The other passages describe the privileges of the Christian, who is no longer under bondage to the Law, to sin and to death, but has the freedom of a son in the household. The free Christian is contrasted with the slave, and also with the heir who has not yet reached his majority, but is under guardians and trustees.

St. Paul's metaphor of adoption is usually traced to Roman law, but it has OT overtones as well. Adoption was of course a common feature of the ancient Nuzi law; cf Gen 15[2-4] where Abraham's household slave, Eliezer, is his heir. In Ex 2[10] Moses became the son of Pharaoh's daughter, and in Jer 3[19] the idea of adoption is applied to Israel's relation to Yahweh; see W. H. Rossell, *JBL*, lxxi (1952), 233 f.

The evidence of the Synoptic Gospels shows that Jesus taught His followers to think of themselves as sons of God. The disciples become God's sons in the true sense by loving their enemies, for their Father does the same (Mt 5[44-48], Lk 6[35f]) and those who do the will of God are Jesus' brother and sister and mother (Mk 3[35]). It is significant that Jesus is represented as using the word *Abba* in prayer to God (Mk 14[36]) and that this word probably underlies the *pater* of the Lord's Prayer (Lk 11[2]). According to St. Paul, the mark of the Christian's new sonship is that the spirit of God's Son (Gal 4[6]) or the spirit of adoption (Ro 8[15]) impels him to cry *Abba*.

Sir W. M. Ramsay attempted to identify peculiarities of Syro-Greek law in Gal 4, but the idea of adoption was very common in the whole Graeco-Roman world. The word *huiothesia* is very common in inscriptions and frequently occurs in the phrase *kath' huiothesian*; it occurs occasionally in literature, *e.g.* Diog. Laert. iv. 9 (53), but is not found in the LXX. St. Paul may have had Roman law specifically in mind. The form of *adoptio*, in which the person to be adopted was still subject to the *patria potestas* of his father or grandfather, seems to be the type more closely corresponding to what the Apostle had in mind. In ancient times this was effected by emancipation *per aes et libram* and surrender to the adoptive father by the legal form called *in jure cessio*. The Law of the XII Tables provided that if a father sold his son thrice the son would be free from his father; thus a triple sale was necessary, with two manumissions in between, after which the adopter by an action before the Praetor claimed the son as his own. In later times a simpler form was used whereby a declaration was made before the Praetor at Rome or the governor in the provinces; see S. Buss, *Roman Law and History in the NT* (London, 1901), pp. 271–82. The important point is that in Roman law the adopted son became a member of the new family just as if he had been born of the blood of the adopter. He was in all respects a real son: he underwent a change of family and *potestas*, of name and domicile, and acquired all the privileges and responsibilities of sonship; and he did not participate in the worship of the old family but in the *sacra privata* of the new. W. E. Ball (*Contemp. Review*, 1891) argued that the work of the Spirit as witness (Ro 8[16]) is parallel to the place of the five witnesses in the Roman process of adoption, but this analogy may not be in St. Paul's mind.

St. Paul speaks of adoption as both present (Ro 8[15]) and future (v.[23]). With Pfleiderer it is appropriate to distinguish three moments in adoption. It involves, here and now, freedom from the Law, and the possession of the spirit of adoption which enables the Christian to address God as Father. Adoption will be completed by the redemption of the body. 'Believers have this blessing (adoption) already, but only in an inward relation and as Divine right, with which, however, the objective and real state does not yet correspond' (Meyer on Ro 8[23]). It is the 'first-fruits' of the Spirit that Christians now possess.

In St. Paul's thought, 'adoption' does not represent believers as children of God by nature but only by grace which they accept. But it would be a mistake to press the term as giving a complete account of St. Paul's views of the relation of God to man; it is only one metaphor among many and subject to the imperfection of analogies and metaphors. The usage of the Synoptic Gospels shows that in Jesus' teaching the relation of sonship has only to be claimed to be made effective and that it is not just a status but a moral relationship always intended by God. See, further, INHERITANCE. S. E. J.

ADORA (1 Mac 13[20]).—The same as **Adoraim.**

ADORAIM.—A city of Judah fortified by Rehoboam on the SW. of his kingdom, 2 Ch 11[9]; modern *Dûrā*, W. of Hebron. In 1 Mac 13[20] called **Adora.**

ADORAM.—See Adoniram.

ADORATION.—The word is not found in AV or RV, and even for the verb RV substitutes 'worship' in Bel[4]; but both the idea and its expression in act are frequent.

Amongst the Hebrews the postures and gestures expressive of adoration underwent slight change in the course of time. Kissing the statue of a god (1 K 19[18], Hos 13[2]; cf Job 31[27]) was an early Arab custom, and became a technical meaning of *adoratio* amongst the Romans; but in this usage the sense is identical with that of worship. Adoration proper was expressed by prostration to the ground, or even by lying prone with the face touching the ground (Gn 17[3], Jos 5[14], Job 1[20], Ps 95[6] 99[5], Dn 3[5]). Primarily this posture was confined to man's approach to God, but it was adopted towards sacred persons; mysterious strangers (Gn 18[2]), kings (2 S 14[4], Est 8[3]), the son and heir of a king (1 S 20[41]), a 'man of God' (2 K 4[37]). In Gn 33[3] Jacob has a special desire to conciliate Esau, but the 'seven times' brings the ceremony within the realm of the magico-religious. 'Divine' honours were accorded to kings, and Mt 18[26] is an extension of this. 'Sat before the Lord' (2 S 7[18]) may refer to a special and solemn mode of sitting, as in 1 K 18[42]; the Arabs are said to have sat during a part of their worship in such a way that the head could easily be bent forward and made to touch the ground.

Outside the Christian sphere, prostration continued in the East to be a mark of submission and homage, rendered to such men as were for any reason or even by convention invested in thought with Divine qualities or powers. The NT, by example and less frequently by precept, confines this fullest mode of worship to God, and protests against its use towards men. Jairus' act (Mk 5[22], Lk 8[41]) was prompted by intense yearning, a father's self-abandonment in the sore sickness of his child, and must not be taken as implying a full recognition of Christ's Divinity. Like Mary's posture at Bethany (Jn 11[32]), it was a preparation for the attitude of the disciples after their visit to the empty tomb (Mt 28[9]). Whatever Cornelius intended (Ac 10[25f]), Peter found an opportunity to lay down the rule that no man under any circumstances is an appropriate object of adoration; and John repeats that rule twice not far from the end of Scripture (Rev 19[10] 22[8f]). The attempt to alienate from God His peculiar honours is a work of Satan (Mt 4[9]); and adoration naturally follows a conviction of the presence of God (1 Co 14[25]). R. W. M.—N. H. S.

ADRAMMELECH.—1. Adrammelech and Anammelech (q.v.), the gods of Sepharvaim to whom the colonists, brought to Samaria from Sepharvaim, burnt their children in the fire, 2 K 17[31]. The divine name *Adad-milki* has been found in an inscription from *Tell Ḥalâf* (Gozan), where it figures as part of a proper name (cf Pohl, *Biblica*, xxii, 1941, 35). **2.** Adrammelech and Sharezer (q.v.) are given in 2 K 19[37] as the sons of Sennacherib who murdered their father (the *Kᵉthîbh* omits 'his sons'). The Babylonian Chronicle says: 'On the 20th of Tebet, Sennacherib, king of Assyria, was killed by his son in an insurrection'; and all other native sources agree in ascribing the murder to one son, but do not name him. The sons of Sennacherib known to us are Ashur-nādin-shum, king of Babylon, 700–694 B.C.; Esarhaddon (q.v.), who succeeded his father, 681 B.C.; Ardi-Bēlit, Crown Prince, 694 B.C.; Ashur-shum-ushabshi, for whom Sennacherib built a palace in Tarbisi; Ashur-ilu-muballitsu, for whom Sennacherib built a palace in Ashur; and Shar-eṭir-Ashur. Possibly Ardi-Bēlit is intended. C. W. H. J.—H. H. R.

ADRAMYTTIUM.—A town of Mysia (in the Roman province of Asia) on the Adramyttene Gulf, originally a native State, and only later Hellenized by the Delians, who had been driven from their home by the Athenians (422 B.C.). In Roman times it was a place of considerable importance both politically and intellectually. It possessed a harbour, and a ship belonging to the place carried St. Paul from Caesarea by Sidon and Cyprus to Myra (Ac 27[2–6]). Money belonging to the Jews of that place was confiscated 62–61 B.C. by Gnaeus Domitius, legate of Flaccus (Cicero, *Pro Flacco*, 28). A. So.—E. G. K.

ADRIA (more correctly *Hadria*).—The name was at first confined to the northern part of what we call the Adriatic Sea, or to a stretch of land near that, and was derived from a once important Etruscan city, Atria, situated at the mouth of the Po. The rest of what we call the Adriatic Sea appears to have been at that time included in the term Ionian Sea or Ionian Gulf. It was only later, with the growth of the Syracusan colonies on the coasts of Italy and Illyria, that the name 'Hadria' came to include the whole Adriatic, and even then, at first, it was the practice to call the southernmost part the Ionian Sea. When the name 'Ionian Sea' was transferred to the Sicilian Sea in the W. of Greece, the term 'Hadria' was improperly extended to include the Tarentine Gulf, the Sicilian Sea, the Corinthian Gulf, and even the waters between Crete and Malta, as in Ac 27[27] and Josephus, *Vita*, 3 (15). A. So.—E. G. K.

ADRIEL ('my help is El').—Son of Barzillai, the Meholathite. He married Merab, the eldest daughter of Saul, who should have been given to David as the slayer of Goliath, 1 S 18[19], 2 S 21[8] (AV, RV here read 'Michal,' with Hebrew; RSV corrects to 'Merab,' with two Hebrew MSS and LXX[L]).

ADUEL.—An ancestor of Tobit, To 1[1]; a variant form of **Adiel**, 1 Ch 4[36].

ADULLAM.—A city in the Shephelah, assigned to Judah, Jos 15[35], named between Jarmuth and Soco; formerly a Canaanite royal city, Jos 12[15]. Rehoboam fortified it, 2 Ch 11[7], and the children of Judah returned to it after the Exile, Neh 11[30]. It is identified with *Tell esh-Sheikh-Madhkûr*. The **Cave of Adullam**, the refuge of David (1 S 22[1], 2 S 23[13], 1 Ch 11[15]) must have been in the adjoining valley. **Adullamite** (Gn 38[1]) is an inhabitant of Adullam.

ADULTERY.—See Crimes, Marriage.

ADUMMIM, THE ASCENT OF.—This is the steep pass in which the road ascends from Jericho to Jerusalem, named in Jos 15[7] 18[7]. In this pass, notorious for robberies and murders, is the traditional 'inn' of Lk 10[34]. Its modern name, *Tal'at ed-Damm*, 'the ascent of blood' or 'red,' is most probably due to the red marl which is so distinctive a feature of the pass.

ADVENT.—See Parousia.

ADVERSARY.—See Satan.

ADVERTISE.—In Ru 4[4] (AV), 'I thought to advertise thee,' *i.e.* inform (RSV 'tell'); so Nu 24[14] (AV, RV).

ADVOCATE.—See Counsellor.

AEDIAS (1 Es 9[27] AV, RV).—One of those who agreed to put away their 'strange' wives. The name is probably a corruption for **Elijah** of Ezr 10[26] (so RSV).

AENEAS.—The name of a paralytic at Lydda who was cured by Peter (Ac 9[33, 34]).

AENON.—Jn 3[23], meaning 'springs'; a site near Salim (q.v.).

AESORA (Jth 4[4]).—An unknown Samaritan town, possibly modern *'Aṣireh*, NE. of Shechem.

AGABA, 1 Es 5[30] (AV).—See Hagab.

AGABUS.—A Christian prophet of Jerusalem (Ac 11[27ff] 21[10f]), whose prediction of a famine over the (civilized) world occasioned the sending of alms from Antioch to Jerusalem. The famine happened, not simultaneously in all countries, in Claudius' reign (Suetonius, Tacitus). Agabus also foretold St. Paul's imprisonment, by binding his feet and hands with the Apostle's girdle (cf Jer 13[1ff]). A. J. M.

AGADE.—A city of Northern Babylonia and the capital of Sargon, the founder of the first Semitic empire (*c* 2850 B.C.). As was first discovered by George Smith, Agade was the Semitic Akkad(u) (see AKKAD). It stood near **Sippar** (see SEPHARVAIM, 2), and may have been in later times a suburb of that town.

AGAG.—**1.** In Nu 24^{7} the meaning of 'his king shall be higher than Agag' is uncertain. **2.** A king of Amalek, whom Saul defeated and spared, but who was slain by Samuel (1 S 15). Whether he met his death defiantly, cheerfully, or timidly cannot be determined from the text (v. ^{32}).

AGAGITE.—The designation of Haman, Est 3$^{1, 10}$ 8$^{3, 5}$ 9^{24}. The land of Agag is mentioned in Akkadian texts and was probably in Media. Josephus (*Ant.* XI. vi. 5 [209]) calls Haman an Amalekite, doubtless to link him with Agag (1 S 15). The author may have chosen the epithet here to indicate that, as Agag was Saul's enemy, so Haman was the foe of this other Benjamite, Mordecai.

AGAIN.—The English word 'again' means in AV either 'a second time,' as Ph 4^{16}, 'you sent once again'; or 'back,' as in Mt 11^{4} (AV) 'go and show John again those things which ye do hear' (*i.e.* 'go back and show John').

AGAPE.—See LOVE FEAST.

AGAR.—Greek form of the name **Hagar** (q.v.) found in Bar 3^{23} (RV; RSV Hagar; AV 'the Agarenes' for 'the sons of Agar')—where 'the sons of Hagar' may mean the **Hagrites** (q.v.)—and Gal 4^{24f} (AV; RV, RSV Hagar).

AGARENES, Bar 3^{23} (AV).—See AGAR.

AGATE.—See JEWELS AND PRECIOUS STONES.

AGE, AGED, OLD AGE.—In the OT advancing age is represented by words of different root-meanings. The aged man is *zāḳēn*, perhaps 'grey-bearded' (Gn 48^{10}, 2 S 19^{32}, Job 12^{20} 32^{9}, Ps 71^{18}, Jer 6^{11}); 'old age' is also *śēbhāh*, *i.e.* 'hoary-headedness' (Gn 15^{15}, 1 K 14^{4}; cf Gn 42^{38}, Ps 71^{18}). According to the Mishnah (*Ab.* v. 21) the latter word implies a greater age (70) than the former (60). But in Job 15^{10} (cf 29^{8}) *yāshîsh*, *i.e.* 'very aged,' marks a further advance in years, of which the sign is a *withering* of strength. Ps 90^{10} is the only passage in which a definite period is fixed for human life (apart from Gn 6^{3}, which is in a mythological context). The idea that 'ripe old age' (*kelaḥ*) is a blessing is expressed in Job 5^{26}; the contrast is furnished by the gloomy picture (30^{2}) of the 'fathers' whose age lacks vigour.

The wisdom of the old was proverbial (Job 12^{12} 32^{7}), though there were exceptions (Job 32^{9}, Ps 119^{100}). The experience of the older men fitted them for positions of trust and authority; hence by a natural transition of thought 'elders' became an official title (Ex 3^{16}, Ac 11^{30}). Respect is to be shown to the old (Lv 19^{32}, Pr 23^{22}), and the decay of reverence for age is an evil omen (Dt 28^{50}, 1 K 12^{8}, Is 47^{6}). It was to the grandmother of Obed that the Hebrew women said 'he shall be . . . a nourisher of your old age' (Ru 4^{15}); the dutiful affection of children's children illumined the gracious message of Israel's God: 'even to old age I am He, and to gray hairs I will carry you' (Is 46^{4}). J. G. T.

AGEE (? 'fugitive').—The father of Shammah, one of David's 'three mighty men,' 2 S 23^{11}.

AGGABA, 1 Es 5^{29} (AV, RV).—See HAGABAH.

AGGAEUS.—The Greek form or **Haggai** (q.v.) used in AV and RV in 1 Es 6^{1} 7^{3}, 2 Es 1^{40}; RSV has Haggai.

AGIA.—**1.** Wife of Jaddus (AV Addus), 1 Es 5^{38} (AV, RV **Augia**). **2.** 1 Es 5^{34} (RV); see HATTIL.

AGONY (Lk 22^{44}) is not a translation but a transliteration of the Greek *agōnia*, equivalent to St. Matthew's 'sorrowful and troubled' (26^{37}) and St. Mark's 'greatly distressed and troubled' (14^{33}). The word does not mean 'agony' in the English sense. *Agōn* was 'a contest,' and *agōnia* the trepidation of a combatant about to enter the lists. Christ's Agony in Gethsemane was the horror which overwhelmed Him as He faced the final ordeal. D. S.

AGRAPHA.—Since Jesus' sayings are known to us only through writing, the term *Agrapha* (Körner, 1776), *i.e.* 'unwritten,' is inept; nevertheless it has become current as a convenient abbreviation for 'words somewhere ascribed to Jesus but *not written* in the best MSS of the canonical Gospels.' The earliest Agrapha themselves are proof that the writing of the canonical Gospels did not once for all freeze the stream of living tradition of words believed to have been uttered by Jesus of Nazareth. This continuing oral stream is valuable historical testimony to the specific views of its custodians. Here and there it may even (rarely) preserve genuine words of Jesus not otherwise recorded. But he who turns to the Agrapha for any significant supplement to his knowledge of the historical Jesus is bound to be either disappointed or deluded. Even so, the study of the Agrapha is rewarding in what they reveal of either didactic or polemic alteration (whether of canonical sayings or of unwritten folk-memories) and invention of words of Jesus, usually with polemic tendency. The polemic may be inner-Christian (against an opposing faction), or against non-Christians or heretics, but may also come from the opposite direction: from heretics or non-Christians, as anti-Christian propaganda.

1. In secondary recensions of the canonical Gospels.—(*a*) Those contained in TR (and hence in AV) but relegated to the margin of most or all modern critical Greek texts. The most important are: Mt 6^{13b} 17^{21}, Mk 9^{49b} 16$^{15-18}$, Lk 9^{55f} 11^{2b} 23^{34}, Jn 7^{53}–8^{11}. All of these except Lk 23^{34} are omitted from the text of RSV; all likewise, with the same exception and the additional exception of the two long passages, from RV. (*b*) Those not in TR (and hence in no historic English version) but found in some MS or MSS. The most striking of them is offered by Codex D in place of Lk 6^{5} (this displaced verse then appears between vv.^{10} and ^{11}):

'The same day seeing a man working on the sabbath, he said to him, "Man, if you know what you are doing you are blessed; but if you do not know, you are accursed and a transgressor of the law."'

The same MS joined by several ancient versions offers an independent parallel to Lk 14$^{8-10}$ after Mt 20^{28}: 'As for you, seek to increase from [being] little and (not, syr^{c}) to be smaller from [being] greater. When you come in and are urged to dine, sit not in the raised places lest one in higher esteem than you also enter and the host approach and say to you, "Move farther down," and you be put to shame. But if you sit in the least place and one less than you come in, the host will say to you, "Advance higher up," and it will be to your advantage.' Another surplus of words of Jesus is contained in the Freer Logion (Codex W), a third variant for the end of Mark in addition to the two previously known. The exclusion of both classes (*a*) and (*b*) from the NT is purely a matter of the genuine text of the Gospels; it does not in itself preclude the possibility that each group may contain authentic tradition.

2. In the rest of the NT.—1 Co 11^{24f} as a whole is an Agraphon independent of Mk 14, Mt 26 and is the probable source of the later Lk 22^{19b-20} (omitted by RSV), particularly of the additional saying, 'Do this [as often as you drink it] in remembrance of me.' Also 'It is more blessed to give than to receive,' Ac 20^{35}. The sayings within Ac 1, as words of the Risen Christ, probably should not be included here; nor is it clear in what sense or how much of 1 Th 4$^{15-17}$ is a 'word of the Lord' (Jesus on earth? the exalted Christ? God?). The parenetic passages in Paul, especially Ro 12, abound in similarities to sayings later written down in the Gospels as uttered by Jesus, but Paul does not ascribe them to Jesus nor do they verbally agree with sayings in the Gospels. Rev 16^{15} is an enigma. Ja 5^{12}, though not explicitly quoted, may well be a more primary form of the saying in Mt 5^{37} (Dibelius).

3. In the Apostolic Fathers.—In the sober judgment of the compilers of *The NT in the Apostolic Fathers*, all

of these works show clear acquaintance with the synoptic *tradition*, either directly by the oral stream or indirectly through now lost documents, while only Ignatius alludes with reasonable clarity to any particular Gospel. The one direct quotation which Ignatius ascribes to Jesus (Smyr 3^2) comes, according to Jerome, from a Jewish apocryphal gospel known to him. The most interesting allusions in the Apostolic Fathers are the collections of sayings of Jesus that seem to be echoes of widely scattered canonical passages but because of their divergences must be agrapha: Did. 1^{3-6} (no attribution to Jesus, no formula of quotation), 1 Clem 13^2, Polycarp 2^3. 2 Clem 5^{2-4} is probably from the Gospel of the Egyptians.

4. In Apocryphal Gospels.—See APOCRYPHAL NEW TESTAMENT.

5. In the Fathers.—Of the many alleged agrapha in the Fathers many have turned out to be quotations of apocryphal gospels. Others presumably are from unidentified gospels. Among them are: Clement of Alex. (*Strom.* i. 28, 177), 'Be approved bankers' (related to Mt 25^{14-30} and 1 Th 5^{21}?); Didascalia ii. 8, 'A man that is not tempted is not approved'; Acts of Philip, 140, 'Unless you change your "down" to "up" [and "up" to "down" and "right" to "left"] and "left" to "right," you shall not enter my kingdom [of heaven]' (cf Mt 18^3).

6. In Papyri.—Among the many Oxyrhynchus Papyri discovered in 1897, 1903, and 1908 at least four (nos. 1, 654, 655, and 1224) contain words ascribed to Jesus. The most important can be consulted in *Gospel Parallels*, p. V; M. R. James, *Apocryphal NT*, pp. 25–30; and Evelyn White, *The Sayings of Jesus from Oxyrhynchus*. According to White the first three papyri are extracts from the Gospel according to the Hebrews, but according to Preuschen from the Gospel of the Egyptians. There are also Coptic papyri (James, pp. 30–32), and *Pistis Sophia* contains many fantastic agrapha. It is probable that Gnostic sources contained many such sayings. The discovery of Coptic texts of the *Gospel of Thomas* and the *Gospel of Philip*, among the collection found at Nag Hammadi in Upper Egypt in 1947, supports this view. (See APOCRYPHAL NEW TESTAMENT.)

7. In Heretical and non-Christian writings.—(*a*) *Gnostic.* Certain of the apocryphal gospels (see **4**, above) show tendentious distortion of canonical sayings in a Gnostic direction; for unbridled invention of sayings of Jesus, see Acts of John 94–96 (James, pp. 253 f) and *Pistis Sophia*, *passim.* The newly discovered *Gospel of Truth* has no professed quotation of Jesus, yet it surely cites Lk 15^{3-7}, which it allegorizes by identifying the parable's shepherd with Jesus: "He is the Shepherd who 'abandoned the ninety-nine lambs who had not strayed. He went in search of the one that had strayed. He rejoiced when he found it'" (*Ev. Ver.*, 31^{35ff}). (*b*) The uncensored editions of the *Talmud* and related literature contain various references to Jesus, usually veiled, but rarely quote him (cf the explicit alleged quotation, *Abodah Zarah* 16b, 17a, which first quotes Mic 1^7 and adds as Jesus' comment: 'From filth it came, to the place of filth shall it go'—probably spun out of Mk 7^{18f}). The most interesting agrapha here—(probably all parodies) concern neighbouring verses of Mt 5^{13} 'If the salt have lost its savour wherewith shall it be salted?' (*Berak.* 8b, but with only the subtlest reference to Jesus, if any. Is it perhaps a proverb in both Jesus' and the Rabbi's mouth?). V.^{17} 'Not to subtract from the Law of Moses did I [gloss: the Gospel] come, nor [var. lect: but] to add to the Law of Moses did I come' (*Shab.* 116b, but no mention of Jesus). V.^{16} (?) 'Let your light shine as a lamp' (*ibid.*, again no mention of Jesus). V.^{15} (by a punning allusion): 'The HMR came and stamped the lamp out' (*ibid.*, the Aramaic word can mean 1. bushel [*i.e. homer*], 2. lampstand, 3. ass; the pun involves double meaning of 3. and one of the others.) (*c*) *Manichaean. A Manichaean Psalm-book* (ed. Allberry, 1938) contains a long explicit composite quotation from Jesus (pp. 39–41) consisting both of nearly canonical sayings and unknown agrapha. Among the latter are: 'Repent, that I may forgive you your sins'; 'I am near to you, like the clothing of your body'; 'Pray for thine enemies, bless them that revile thee (Lk 6^{27f}), that thou mayest be good (*agathos*) like thy Father who is in [heaven]' (cf Lk 6^{36}); 'The fire that dwells in the body, its affair is eating and drinking; but the soul thirsts for the Word of God always' (gnosticized version of Mt $6^{31ff}+5^6$?). In other psalms: 'The will that is in heaven shall be upon the earth, the kingdom shall come which not many have known' (p. 156—from the Lord's prayer!); 'You received my name, but you did not do my works' (in a strange version of the Wise and Foolish Virgins, p. 191); 'He that dies shall live, he that humbles himself shall be exalted' (p. 93). (*d*) *Mandaean.* Both *Ginza* and *Book of Jahja* contain many transparently polemic inventions as words of Jesus or of Christ. Yet cf the following (Christ speaks): 'In whose name did you clothe with clothes and wrap with wraps, pay ransoms, and grant alms and benefits?' (Mt 25? *Ginza*, p. 187). 'That which is above is heaven, that which is below is earth; Jesus Christ am I, the Holy Spirit is here' (*ibid.*). 'I am the true God whom my Father sent hither. I am the first, I am the last Ambassador; I am the Father, I am the Son, I am the Holy Spirit, I who set forth from the city of Nazareth' (*Ginza* 50^{26}; cf 29^{29}). 'Behold how my glory has dawned upon the world' (*ibid.*). 'John, baptize me with thy baptism, and speak over me the name you are wont to speak. If I show myself to be your disciple, I will remember you in my book; if I prove a failure as a disciple, wipe out my name from off your page' (*Jahja*, p. 103). (*e*) *Mohammedan.* The Koran contains many sayings, some long, attributed to Jesus. Some are allusions to known apocryphal gospels (Sura 3, 43 from *Infancy* Gospel of Thomas), some to presumed Jewish-Christian apocrypha or dim recollections of oral tradition preserved by Jewish and Arabic Christians whom Mohammed had encounted in Arabia; most are polemic inventions. The infant Jesus is made to say, 'Verily, I am the servant of God; He hath given me the Book, and He hath made me a prophet; and He hath made me blessed wherever I may be, and hath enjoined me prayer and almsgiving so long as I shall live; and to be duteous to her that bare me: and he hath not made me proud, depraved. And the peace of God was on me the day I was born, and will be the day I shall die, and the day I shall be raised to life' (Sura 19, 32—from some apocryphon?). 'Now am I come to you with wisdom; and a part of those things about which ye are at variance I will clear up to you; fear ye God therefore and obey me. Verily, God is my Lord and your Lord; wherefore worship ye him: this is a right way' (Sura 43, 63; the last sentence in several other places). Jesus prays: 'O God, our Lord! send down a table to us out of Heaven [the Eucharist!] that it may become a recurring festival to us, to the first of us and to the last of us, and a sign from thee; and do thou nourish us, for thou art the best of nourishers' (Sura 5, 114). Perhaps by a pun on 'Paraclete' Jesus is made to predict and approve Ahmad-Mohammed: 'O children of Israel! of a truth I am God's apostle to you to confirm the law which was given before me, and to announce an apostle [the *Parakletos* ?] that shall come after me whose name shall be Ahmad [=Glorified; *periklytos*=glorified]' (Sura 61, 6). 'Jesus' is also made to deny the Trinity; see Sura 5, 116 and cf 4, 169. Some forty-eight of the extra-Koranic Mohammedan agrapha collected by D. S. Margoliouth in the *Expository Times*, 1893–94, are reprinted in Hastings' *Dictionary of the Bible*, Extra Volume, pp. 350 ff; many of them are not unworthy of the Jesus of the Synoptics. A curious additional one is furnished by the syncretist Emperor Akbar: in the gateway of the Great Mosque in his deserted capital, Fatehpur Sikri (near Agra), is the inscription, 'Jesus, on whom be peace, hath said, "This world is but a bridge; pass over, but build not thy dwelling there."' This is probably a quotation from *Historia Christi*, the earliest Jesus-novel, written for

Akbar in Persian by Jerome Xavier, 1602. Akbar's Christian instructor, Jerome Xavier, must have been the mediator of this Spanish agraphon. It has been traced back to a converted Spanish rabbi, Moise Sephardi (d. *c* 1140; Christian name, Petrus Alphonsi), whose *Disciplina Clericalis*, however, is full of Oriental wisdom. Consequently this saying must have a still earlier history in Jewish or Islamic tradition. K. G.

AGRICULTURE.—Throughout the whole period of their national existence, agriculture was the principal occupation of the Hebrews. According to the priestly theory, the land was the property of Y" ; His people enjoyed the usufruct (Lv 25[23]). In actual practice, the bulk of the land was owned by the towns and village communities, each free husbandman having his allotted portion of the common lands. The remainder included the Crown lands and the estates of the nobility, at least under the monarchy. Husbandry—the Biblical term for agriculture (2 Ch 26[10])—was highly esteemed, and was regarded as dating from the earliest times (Gn 4[2]). It was Y" Himself who taught the husbandman his art (Is 28[26]).

Of the wide range of topics embraced by agriculture in the wider significance of the term, some of the more important will be treated in separate articles, such as CART, FLAX, FOOD, GARDEN, OLIVE, OX, THORNS, VINE, etc. The present article will deal only with the more restricted field of the cultivation of the principal cereals. These were, in the first rank, wheat and barley; less important were the crops of millet and spelt, and those of the pulse family—lentils, beans, and the like.

1. The agricultural year began in the latter half of October, with the advent of the early rains, which softened the ground baked by the summer heat. Then the husbandman began to prepare his fields for the winter seed by means of the **plough.** From the details given in post-Biblical literature, it is evident that the Hebrew plough differed but little from its modern Syrian counterpart (see *PEFSt*, 1891). The essential part or 'body' of the latter, corresponding in position to the modern plough-tail or 'stilt,' consists of a piece of tough wood bent and pointed at the foot to receive an iron sheath or share (1 S 13[20]), the upper end being furnished with a short cross-piece to serve as a handle. The pole is usually in two parts: one stout and curved, through the lower end of which the 'body' is passed just above the share; at the other end is attached the lighter part of the pole, through the upper end of which a stout pin is passed to serve as attachment for the yoke. The plough was usually drawn by two or more oxen (Am 6[12]), or by asses (Is 30[24]), but the employment of one of each kind was forbidden (Dt 22[10]). The **yoke** is a short piece of wood—the **bar** of Lv 26[13] (RV, RSV)—fitted with two pairs of converging pegs, the lower ends connected by thongs, to receive the necks of the draught animals. Two smaller pegs in the middle of the upper side hold in position a ring of willow, rope, or other material, which is passed over the end of the pole and kept in position by the pin above mentioned. As the ploughman required but one hand to guide the plough, the other was free to wield the **ox-goad,** a light wooden pole shod at one end with an iron spike wherewith to prick the oxen (cf Ac 26[14]), and having at the other a small spade with which to clean the plough-share. Gardens, vineyards (Is 5[6] RV, RSV), and parts too difficult to plough were worked with the hoe or mattock (Is 7[25]).

The prevailing mode of **sowing** was by hand, as in the parable of the Sower, the seed being immediately ploughed in. It was possible, however, to combine both operations by fixing a seed-box to the plough-tail. The seed passed through an aperture at the bottom of the box and was conducted by a pipe along the tail. It thus fell into the drill behind the share and was immediately covered in. The patriarch Abraham was credited by Jewish legend with the invention of this form of seeding-plough (Book of Jubilees 11[23ff]). There is no evidence that **harrows** were used for covering in the seed.

2. During the period of growth the crops were exposed to a variety of risks, such as the delay or scanty fall of the spring rains (the 'latter rain' of the OT, Am 4[7]), blasting by the hot sirocco wind, mildew, hail—these three are named together in Hag 2[17]; cf Dt 28[22], Am 4[9] —and worst of all a visitation of locusts. The productiveness of the soil naturally varied greatly (cf Mt 13[8]). Under favourable conditions, as in the Ḥaurân, wheat is said to yield a hundredfold return.

3. Owing to the wide range of climatic conditions in Palestine, the time of the **harvest** was not uniform, being earliest in the semi-tropical Jordan valley, and latest in the uplands of Galilee. The average harvest period, reckoned by the Hebrew legislation (Lv 23[15], Dt 16[9]) to cover seven weeks, may be set down as from the middle of April to the beginning of June, the barley ripening about a fortnight sooner than the wheat.

The standing corn was reaped with the **sickle** (Dt 16[9] RV, RSV), the stalks being cut considerably higher up than with us. The handfuls of ears were gathered into sheaves, and these into heaps (not into shocks) for transportation to the threshing-floor. The **corners** of the field were left to be reaped, and the fallen ears to be gleaned, by the poor and the stranger (Lv 19[9f], Dt 24[19], Ru 2[2ff]).

For small quantities the ears were stripped by beating with a stick (Ru 2[17], Jg 6[11] RV, RSV), otherwise the threshing was done at the village **threshing-floor.** This was a large, specially prepared (Jer 51[33] RV, RSV) space on an elevated situation. Hither the corn was brought on asses or on a cart (Am 2[13]), and piled in heaps. Enough sheaves were drawn out to form a layer, 6 to 8 ft. wide, all round the heap. Over this layer several oxen, unmuzzled according to the law (Dt 25[4]), and harnessed together as represented on the Egyptian monuments, might be driven. More effective work, however, was got from the **threshing-drag** and the **threshing-wagon,** both still in use in the East, the former being the favourite in Syria, the latter in Egypt. The former consists of two or three thick wooden planks held together by a couple of cross-pieces, the whole measuring from 5 to 7 ft. in length by 3 to 4 ft. in breadth. The underside of the drag is set with sharp pieces of hard stone (cf Is 41[15]), which strip the ears as the drag, on which the driver sits or stands, is driven over the sheaves, and at the same time cut up the stalks into small lengths. The threshing-wagon is simply a wooden frame containing three or more rollers set with parallel metal discs, and supporting a seat for the driver. The former instrument was used by Araunah the Jebusite (2 S 24[22]), while the latter is probably referred to in 'the threshing wheel' of Pr 20[26] (RV, RSV). Both are mentioned together in the original of Is 28[27].

After the threshing came the **winnowing.** By means of a five- or six-pronged fork, the '**fan**' of the OT and NT, the mass of grain, **chaff,** and chopped straw is tossed into the air in the western evening breeze. The chaff is carried farthest away (Ps 1[4]), the light morsels of straw to a shorter distance, while the heavy grains of wheat or barley fall at the winnower's feet. After being thoroughly sifted with a variety of **sieves** (Am 9[9], Is 30[28]), the grain was stored in jars for immediate use, and in cisterns (Jer 41[8]), or in specially constructed granaries, the '**barns**' of Mt 6[26].

4. Of several important matters, such as irrigation, the terracing of slopes, manuring of the fields, the conditions of lease, etc., there is little direct evidence in Scripture. On these Vogelstein's treatise *Die Landwirtschaft in Palästina* is a mine of information for the Roman period. Cf also Dalman's *Arbeit und Sitte in Palästina*, 6 vols., 1928–39, especially vol. i, 1 and 2, 1928, where a detailed account of the year's work is outlined, with innumerable and interesting parallels with Arab customs. (In view of the rapidly changing customs of modern agriculture in Israel, this survey by Dalman is invaluable for OT study.) Agriculture, as is natural, bulks largely in the legislative codes of the Pentateuch. Some of the provisions have already been cited. To these may be added the solemn injunction against removing a neighbour's 'landmarks,'

the upright stones marking the boundaries of his fields (Dt 19^{14} 27^{17}), the humanitarian provision regarding strayed cattle (Ex 23^{4}, Dt 22^{1ff}), the law that every field must lie fallow for one year in seven (Ex 23^{10f}; see, for later development, SABBATICAL YEAR), the law forbidding the breeding of hybrids and the sowing of a field with two kinds of seed (Lv 19^{19} RV, RSV), and the far-reaching provision as to the inalienability of the land (Lv 25^{8ff}).

The fact that no department of human activity has enriched the language of Scripture, and in consequence the language of the spiritual life in all after ages, with so many appropriate figures of speech, is a striking testimony to the place occupied by agriculture in the life and thought of the Hebrew people. A. R. S. K. —**B. J. R.**

AGRIPPA.—See HEROD, **6, 7.**

AGUE.—See MEDICINE.

AGUR.—Son of Jakeh and author of the whole or part of Pr 30, one of the latest sections of the book. His name may mean 'hireling' or 'assembler'; cf Vulg. 'Verba *Congregantis filii Vomentis*.' The word *massā'* (AV 'the prophecy,' RV 'the oracle') is either out of place here, or is the name of his country (so RSV; cf. Gn 25^{14}).

AHAB.—1. Son of Omri, and the most noted member of his dynasty, king of Israel from about 875 to about 853 B.C. The account of him in our Book of Kings is drawn from two separate sources, one of which views him more favourably than the other. From the secular point of view he was an able and energetic prince; from the religious point of view he was a dangerous innovator, and a patron of foreign gods. His alliance with the Phoenicians was cemented by his marriage with Jezebel, daughter of Ethbaal, king of Tyre (1 K 16^{31}), who was also, if we may trust Josephus, priest of Astarte. At a later date Ahab entered into alliance with Judah, giving his daughter Athaliah in marriage to Jehoram, son of Jehoshaphat (2 K 8^{18}). His wealth is indicated by the ivory palace which he built (1 K 21^{1} 22^{39}).

The reign of Ahab was marked by frequent wars with the Syrian kingdom of Damascus. Benhadad, the king of that country, was so successful that he claimed suzerainty over Israel—a claim which Ahab was at first disposed to admit (1 K 20^{2ff}). But when Benhadad went so far as to threaten Samaria with indiscriminate plunder, Ahab resisted. In two campaigns he defeated the invaders, even taking their haughty leader prisoner. Contrary to the advice of the prophetic party, he treated his captive magnanimously, and concluded an alliance with him, stipulating only that the cities formerly taken from Israel should be restored. The alliance was one for trade and commerce, each party having bazaars assigned him in the capital of the other (1 K 20^{34}). It is not improbable also that common measures of defence were planned against the Assyrians, who were showing hostile intentions in the region of the Lebanon. In the battle of Qarqar, which was fought against these invaders in the year 854, Ahab was present with ten thousand troops. This we learn from the Assyrian inscriptions.

The religious innovation for which Ahab is held responsible by the Hebrew writers, was the introduction of the Phoenician Baal as one of the gods of Israel. It is clear that Ahab had no idea of displacing Yahweh altogether, for he gave his children names which indicated his devotion to Him. But to please his wife he allowed her to introduce and foster the worship of her own divinities. Her thought was that with the religion of her own country she would introduce its more advanced civilization. The champion of Yahweh's exclusive right to the worship of Israel was Elijah. This prophet, by his bold challenge to the priests of Baal, roused the anger of Jezebel, and was obliged to flee the country (1 K 17–19). Other prophets do not seem to have been disturbed, for we find them at the court of Ahab in the last year of his life (22^{6}). These, however, were subservient to the crown, while Elijah was not only a protestant against religious changes, but the champion of the common people, whose rights were so signally violated in the case of Naboth.

Ahab died fighting for his people. The Syrian war had again broken out—apparently because Benhadad had not kept his agreement. Ahab therefore tried to recover Ramoth-gilead, being assisted by Jehoshaphat of Judah. In the first encounter Ahab was slain, his reputation for courage being vindicated by the direction of his adversary to his soldiers—'Fight neither with small nor with great, but only with the king of Israel' (1 K 22^{31}).

2. A false prophet 'roasted in the fire' by the king of Babylon (Jer 29^{21f}). H. P. S.

AHARAH.—See AHIRAM.

AHARHEL.—A descendant of Judah, 1 Ch 4^{8}.

AHASAI, Neh 11^{13} (AV).—See AHZAI.

AHASBAI.—Father of Eliphelet (2 S 23^{34}) and a member of the family of Maacah, settled at Beth-maacah (20^{14}), or a native of the Syrian kingdom of Maacah ($10^{6,8}$).

AHASUERUS, old Persian *Khshayārshā*, Hebrew *'Aḥashwērôsh*, Greek *Xerxes* (486–465 B.C.), mentioned briefly in Ezr 4^{6} as receiving an accusation against the Jews. He figures prominently in the Book of Esther. Dn 9^{1} mentions an Ahasuerus, father of Darius; To 14^{15} uses Ahasuerus for Cyaxares the king of the Medes in the late 7th cent. B.C. The Daniel passage may contain a similar erroneous identification. The name was used in late Jewish tradition for the 'wandering Jew.' P. R. A.

AHAVA.—A settlement in Babylonia lying along a stream of the same name, probably a large canal near the Euphrates. None of the conjectures as to the exact locality can be verified. It was here that Ezra mustered his people before their departure for Jerusalem (Ezr $8^{15,21,31}$). Some district north or north-west of Babylon, near the northern boundary of Babylonia, is most probable. It is called **Theras** in 1 Es 8^{41}.

AHAZ.—1. Son and successor of Jotham as king of Judah *c* 735 B.C. His full name, Joahaz, appears in Tiglath-pileser's list of vassal kings. Early in his reign, he was threatened with invasion from the league formed by Pekah of Israel and Rezin of Syria (2 K 16^{5}, Is 7 f). Behind this attack lies the expansionist policy of Assyria. The two kings were in revolt against their overlord, and it was a military necessity for them to have the support or assured neutrality of Judah. They therefore proposed to replace Ahaz with a Syrian, 'the son of Tabeel.' The attack was initially successful, and Ahaz, in spite of the assurance given by Isaiah, took desperate measures to ensure his safety. He sacrificed his son as a burnt offering in order to obtain Yahweh's protection; and he offered himself as a vassal to the Assyrian king, accompanying the offer with a gift of gold and silver from the palace and Temple treasures. Tiglath-pileser quelled the revolt, and the threat to Judah's territorial integrity was removed. But Ahaz, with other kings, had to pay homage to the Assyrian at Damascus. As a mark of his submission he was compelled to replace at the Jerusalem shrine the worship of Yahweh with that of the Assyrian deities (1 K 16^{10ff}). A further result was that Edom regained independence.

A carnelian seal of this period has been discovered, bearing the inscription, 'to Ushna, servant of Ahaz.'

2. The name Ahaz also appears at 1 Ch 8^{35} 9^{41} as a great-grandson of Jonathan. A S. H.

AHAZIAH.—Two kings of this name are mentioned in the OT, one in each of the Israelite kingdoms.

1. Ahaziah of Israel was the son of Ahab, and ruled after him only two years or parts of years. He is said to have been a worshipper of Baal, that is, to have continued the religious policy of his father. By a fall from a window of his palace he was seriously injured, and, after lingering awhile, died from the accident. The Moabites, who had been subject to Israel, took this opportunity to revolt. Ahaziah is accused of sending messengers to inquire of the celebrated oracle at Ekron, and is said unexpectedly to have received his answer from Elijah (2 K 1).

2. Ahaziah of Judah was son of Jehoram and grandson of Jehoshaphat. Under the influence of his mother, who was a daughter of Ahab (and Jezebel), it is not surprising to read that he walked in the ways of Ahab. All that we know of him is that he continued the league with Israel, and that, going to visit his uncle Jehoram in Jezreel, he was involved in his fate at the revolt of Jehu (2 K 9^{27}). See JEHOAHAZ, **3.** H. P. S.

AHBAN (' brother of a prudent one ').—A Judahite, son of Abishur, 1 Ch 2^{29}.

AHER (' another ').—A Benjamite, 1 Ch 7^{12}.

AHI (' brother,' perhaps for ' brother is Y" ').—**1.** A Gadite, 1 Ch 5^{15}. **2.** An Asherite, 1 Ch 7^{34} (AV, RV) ; but RSV takes as a common noun, ' his brother.'

AHIAH.—A layman who sealed Nehemiah's covenant, Neh 10^{26} (AV **Ahijah**). See also AHIJAH, **1, 6.**

AHIAM.—One of David's heroes, the son of Sharar (2 S 23^{33}) or Sachar (1 Ch 11^{35}).

AHIAN (' fraternal ').—A Manassite, son of Shemida, 1 Ch 7^{19}. It is improbable that an individual is meant, however ; note in the context Shechem and Abiezer.

AHIEZER (' brother is help ').—**1.** Son of Ammishaddai, one of the tribal leaders representing Dan at the census in the wilderness and on other occasions, Nu 1^{12} 2^{25} $7^{66,\ 71}$ 10^{25}. **2.** The chief of the Benjamite archers who deserted to David at Ziklag, 1 Ch 12^{1-3}.

AHIHUD (' brother is majesty ').—**1.** The leader of the tribe of Asher, Nu 34^{27}. **2.** A Benjamite, 1 Ch 8^{7}.

AHIJAH.—**1.** 1 S $14^{3,\ 18}$ (AV **Ahiah**), a priest, son of Ahitub, who had charge of the oracular ephod and consulted it for Saul [read ' ephod ' for ' ark ' at v.[18]]. Ahijah is probably to be identified with Ahimelech (21^{1}), but they may have been brothers. **2.** 1 K 4^{3}, one of Solomon's secretaries, who conducted the king's correspondence and wrote out his decrees. His father, Shisha or Shavsha (cf 1 Ch 18^{16}), seems to have held the same office under David. **3.** 1 K $11^{29\text{f}}$ 12^{15}, 2 Ch 10^{15}, a prophet of Shiloh who foretold and apparently favoured the division of the kingdom and the elevation of Jeroboam. Subsequently he broke with Jeroboam and announced the overthrow of his house (1 K $14^{2\text{ff}}$). **4.** 1 K $15^{27,\ 33}$, father of Baasha. **5.** 1 Ch 2^{25} has an Ahijah, son of Jerahmeel. But the text is difficult and various emendations are suggested. **6.** 1 Ch 8^{7} (AV **Ahiah**), son of Ehud, a Benjamite ; at v.[4] **Ahoah,** but LXX *Ahijah*. **7.** 1 Ch 11^{36}, one of David's heroes, the ' Pelonite.' But the text is corrupt. The parallel list in 2 S $23^{24\text{ff}}$ reads another name. **8.** 1 Ch 26^{20}, a Levite, overseer of the Temple treasures. But we ought probably to substitute the words ' their brethren ' with LXX. **9.** Neh 10^{26} (AV) ; see AHIAH. **10.** An ancestor of Ezra, 2 Es 1^{2} (AV, RV **Achias**). J. T.—J. Br.

AHIKAM (' my brother has arisen ').—One of the deputation sent by King Josiah to Huldah the prophetess, 2 K $22^{12,\ 14}$, 2 Ch 34^{20}. Later he used his influence to protect Jeremiah from the violence of the populace during the reign of Jehoiakim, Jer 26^{24}. His son Gedaliah (q.v.) became governor for Nebuchadrezzar after the fall of Jerusalem (2 K 25^{22}) until he was murdered.

AHIKAR, BOOK OF.—An Oriental Wisdom book, which survives in Syriac, Arabic, Armenian, and other languages. Its antiquity was proved by the rediscovery of portions of an Old Aramaic version among the Elephantine Papyri (q.v.) of the 5th cent. B.C. It must have arisen in Mesopotamia and may ultimately be Assyrian in origin. Knowledge of the story of Ahikar is reflected in the Book of Tobit ($1^{21\text{f}}$ 2^{10} 10^{17} $14^{10\text{f}}$), a work of the early 2nd cent. B.C. The book purports to give the wise saws and fables which Ahikar ' a wise and ready scribe ' and vizier of Sennacherib king of Assyria gave his adopted son Nadin by way of instruction. He brought Nadin to Esarhaddon, who soon advanced him to his father's position, thus enabling Ahikar to retire to his country estates. Nadin falsely accuses Ahikar of plotting against the king, who orders the sage's execution. He is saved by the executioners and later is proved innocent. See R. H. Charles, *APOT* ii (1913), 715–784. J. B. Pritchard, *ANET* (1950), 427 f. E. G. K.

AHILUD (? ' my brother is born ').—**1.** Father of Jehoshaphat, the chronicler under David and Solomon, 2 S 8^{16} 20^{24}, 1 K 4^{3}, 1 Ch 18^{15}. **2.** Father of Baana, one of Solomon's twelve commissariat officers, 1 K 4^{12}.

AHIMAAZ.—**1.** Saul's father-in-law (1 S 14^{50}). **2.** Son of Zadok. He and Jonathan, son of Abiathar (2 S 15^{27}), were stationed outside Jerusalem to learn Absalom's plans ; after an adventurous journey they succeeded in warning David (2 S $15^{27,\ 36}$ 17^{17-21}). Ahimaaz was eager to carry the tidings of Absalom's defeat ; but Joab preferred to send by an Ethiopian slave the unwelcome news of the prince's death. Obtaining leave to follow, Ahimaaz outstripped this man, was recognized by the watchman through the style of his running, but left the Ethiopian to disclose the worst (2 S 18^{19-32}). It may be the same person who appears later as Solomon's son-in-law and commissioner in Naphtali (1 K 4^{15}). J. T.—R. A. B.

AHIMAN (' my brother is a gift ').—**1.** One of the sons of Anak who terrified the spies at Hebron, Nu 13^{22}. The three clans, of which this was one, were either destroyed by Judah (Jg 1^{10}) or expelled by the clan Caleb (Jos 15^{14}). **2.** A family of Levites who had charge of that gate of the Temple through which the King entered, 1 Ch $9^{17\text{f}}$.

AHIMELECH (' my brother is Melekh,' *i.e.* ' King,' a divine title).—**1.** Son of Ahitub, and grandson of Phinehas. He either succeeded his brother Ahijah in the priesthood, or was the same person under another name (1 S $14^{3,\ 18}$). For his fate see DOEG. **2.** Grandson of **1,** if 1 Ch $24^{3,\ 31}$ are correct, for in 2 S 8^{17} and 1 Ch 18^{16} 24^{6} the names of Abiathar and Ahimelech may have been transposed. **3.** A Hittite who joined David when a fugitive (1 S 26^{6}). D. R. Ap.-T.

AHIMOTH (' my brother is death ').—A Kohathite Levite, 1 Ch 6^{25}. Cf MAHATH, **1.**

AHINADAB (' my brother is noble ').—Son of Iddo, one of Solomon's twelve commissariat officers, 1 K 4^{14}.

AHINOAM (' my brother is delight ').—**1.** Daughter of Ahimaaz and wife of Saul, 1 S 14^{50}. **2.** A Jezreelitess whom David married after Michal had been taken from him. She was the mother of David's firstborn, Amnon (q.v.), 1 S 25^{43} 27^{3} 30^{5}, 2 S 2^{2} 3^{2}, 1 Ch 3^{1}.

AHIO (' fraternal ').—**1.** Son of Abinadab, **3,** and brother of Uzzah. He helped to drive the cart on which the Ark was brought from Abinadab's house to Jerusalem, 2 S $6^{3\text{f}}$, 1 Ch 13^{7}. **2.** A son of Jeiel, and brother of Kish, the father of Saul, 1 Ch 8^{31} 9^{37}. **3.** A Benjamite, 1 Ch 8^{14}.

AHIRA (' my brother is evil ').—Tribal leader representing Naphtali at the census in the wilderness and on other occasions, Nu 1^{15} 2^{29} $7^{78,\ 83}$ 10^{27}.

AHIRAM.—The eponym of a Benjamite family, the Ahiramites, Nu 26^{38}. The name occurs in the corrupt forms **Ehi** (Gn 46^{21}) and **Aharah** (1 Ch 8^{1}).

AHISAMACH (' my brother has supported ').—A Danite, father of Oholiab, Ex 31^{6} 35^{34} 38^{23}.

AHISHAHAR (' brother of the dawn ').—A Benjamite, 1 Ch 7^{10}.

AHISHAR (? ' my brother has sung ').—Superintendent of Solomon's household, 1 K 4^{6}.

AHITHOPHEL.—David's counsellor (2 S 15^{12}, 1 Ch 27^{33}), whose advice was deemed infallible (2 S 16^{23}). Being perhaps Bathsheba's grandfather (see ELIAM, **2**), he may have been alienated by David's conduct (11^{3} 23^{34}), and so readily joined Absalom (15^{12}). Ahithophel advised the prince to take possession of the royal harem, thus declaring his father's deposition, and begged for a body of men with whom he might at once overtake and destroy the fugitive monarch (17^{1-3}). Hushai thwarted this move (17^{11}). Disgusted at the collapse of his

influence, and foreseeing that this lack of enterprise meant the failure of the insurrection, Ahithophel withdrew, set his affairs in order, and hanged himself (17[23]).

AHITOB, 1 Es 8[2], 2 Es 1[1] (RV).—See AHITUB, **3.**

AHITUB (' my brother is goodness ').—**1.** Son of Phinehas and grandson of Eli, the father of Ahijah or Ahimelech, the priest who was put to death by Saul, 1 S 14[3] 22[9, 20]. **2.** According to 2 S 8[17], 1 Ch 18[16] the father, according to 1 Ch 9[11], Neh 11[11] the grandfather, of Zadok the priest, who was contemporary with David and Solomon. It is very doubtful, however, whether this has not arisen from a copyist's error. The text of 2 S 8[17] should probably run: ' And Zadok and Abiathar the son of Ahimelech, the son of Ahitub.' See ZADOK, **1.** **3.** Even more doubt attaches to another Ahitub, father of another Zadok, 1 Ch 6[11f]; cf 1 Es 8[2], 2 Es 1[1], in both of which AV has **Achitob** and RV **Ahitob.** **4.** An ancestor of Judith, Jth 8[1] (AV **Acitho**).

AHLAB.—A city of Asher, Jg 1[31]. Possibly Ahlab and Helbah in this verse are to be identified with one another and with **Mahalab** (q.v.).

AHLAI (? ' O! Would that! ').—**1.** The daughter of Sheshan, of the tribe of Judah, 1 Ch 2[31], cf v. [34]. **2.** The father of Zabad, one of David's heroes, 1 Ch 11[41].

AHOAH.—A Benjamite, son of Bela, 1 Ch 8[4]; but LXX[B] has Ahijah (see AHIJAH, **6**). The patronymic **Ahohite** occurs in 2 S 23[9] (AV, RV; but RSV has ' son of Ahohi ') v. [28], 1 Ch 11[12, 29] 27[4].

AHOHI.—In 2 S 23[9] RSV renders ' son of Ahohi,' where AV has ' the Ahohite ' and RV ' the son of an Ahohite.' AV rendering is here to be preferred. See AHOAH.

AHOLAH, AHOLIAB, AHOLIBAH, AHOLIBAMAH.—The AV forms of the correct RV and RSV Oholah, Oholiab, Oholibah, Oholibamah (q.v.).

AHUMAI.—A descendant of Judah, 1 Ch 4[2].

AHUZAM, 1 Ch 4[6] (AV).—See AHUZZAM.

AHUZZAM (' possessor ').—A man of Judah, 1 Ch 4[6] (AV **Ahuzam**).

AHUZZATH (' possession ').—The friend of Abimelech, the Philistine of Gerar, mentioned on the occasion when the latter made a league with Isaac at Beersheba, Gn 26[26]. The position of ' king's friend ' may possibly have been an official one, and the title a technical one (cf 1 K 4[5], 1 Ch 27[33]). The rendering of LXX gives a different conception, that of *pronubus*, or friend of the bridegroom.

AHZAI (' Y" hath grasped ').—A priest, Neh 11[13] (AV **Ahasai**); called **Jahzerah,** 1 Ch 9[12].

AI.—**1.** A place between which and Bethel Abraham camped before (Gn 12[8]) and after (13[3]) his sojourn in Egypt. The repulse of the Israelite attempt on the place (Jos 7[2–5]) led to the exposure of the crime of Achan, which being expiated, Ai was taken by a ruse and destroyed (8[1–28]). It is perhaps the **Aiath** of Isaiah's description of the advance of the Assyrians (10[28]), and the **Aija** mentioned in Nehemiah's account of the resettlement of Benjamites after the restoration from Exile (11[31], Ezr 2[28]), though these places may be identified with *Kh. Ḥayyân*, about a mile from Ai. Located ' to the E. of Bethel ' (Gn 12[8]), with which it is generally associated (*e.g.* Jos 12[9]), it is probably to be identified with *et-Tell*, meaning, like Heb. *hā-'ay*, ' the ruined mound.' Here excavations by Mme Marquet-Krause established that the place flourished, with palace, sanctuary, and impressive fortifications, in the Early Bronze Age (3rd millennium B.C.), when it had contacts with Egypt of the Pyramid Age, but lay derelict from *c* 2000 to *c* 1150. This raises the problem of the authenticity of the Hebrew tradition regarding the capture of Ai (Jos 8[1–23]), which can only be solved by supposing that the men of Bethel occupied the derelict site to resist the Hebrews advancing up the pass from Jericho. The account in Jos 7[3] suggests that Ai was not a formidable obstacle.

2. A wholly distinct place, mentioned in a prophecy against the Ammonites, Jer 49[3] (where it is possibly a scribal error for *Ar*, or more probably *shôdhēdh 'ālāh*, ' the plunderer is gone up ' should be read for MT *shudd[e]dhāh 'ai*, ' Ai is plundered ').

R. A. S. M.—**J. Gr.**

AIAH (' falcon ').—**1.** A Horite, son of Zibeon, Gn 36[24], 1 Ch 1[40]. **2.** Father of Rizpah, Saul's concubine, 2 S 3[7] 21[8, 10f].

AIATH, Is 10[28]; **AIJA,** Neh 11[31].—See AI, **1.**

AIJALON.—**1.** A town allotted to, but not occupied by, Dan (Jos 19[42], Jg 1[35]). It was assigned to the Levites (Jos 21[24]) and is named as a city of refuge in Ephraim. After the Disruption of the Kingdom it was fortified by Rehoboam as a frontier post (2 Ch 11[10]) and was later taken by the Philistines (2 Ch 28[18]).

Aijalon is mentioned in the Amarna Tablets and the list of Sheshonk's conquests in Palestine, and is to be identified with *Yâlō* in the Valley of Aijalon at the lower end of the Pass of Beth-horon, 3 miles N. of the old Jerusalem-Jaffa road and 14 miles W. of Jerusalem. Late Bronze Age remains are found on the village mound, and at the adjacent mound *Tell el-Qōqa'* occupation is carried back to *c* 2000 B.C.

2. The burial-place of the Judge Elon in Zebulun (Jg 12[12]), and possibly identical with Elon, which is named with Sered and Jahleel (Gn 46[14] and Nu 26[26]) as a family of Zebulun. The fact that Sered and Jahleel are also place-names suggests that Elon (or Aijalon) was also a place-name. *Khirbet el-Lôn*, a Late Bronze Age site in the Plain of the *Baṭṭûf*, may be Aijalon of Zebulun. Alternatively, on the assumption that Aijalon is a broken plural of *'ēlôn*, ' terebinth-tree,' the site may be located at *Tell el-Buṭmeh* (' mound of the terebinth '), also in the *Baṭṭûf*.

W. E.—**J. Gr.**

AIJELETH (HASH)-SHAHAR, Ps 22 title (AV, RV).—See PSALMS, **2.**

AIN.—**1.** A town in the neighbourhood of Riblah (Nu 34[11]); the site is unknown. **2.** A town in Judah, Jos 15[32], 1 Ch 4[32], where Ain and Rimmon should be taken together, see EN-RIMMON. **3.** A Levitical city, Jos 21[16]; but we should probably read **Ashan** (q.v.), with 1 Ch 6[59].

AIN.—The sixteenth letter of the Hebrew alphabet, and so used to introduce the sixteenth part of Ps 119, every verse of which begins with this letter.

AIRUS, 1 Es 5[31] (AV).—See REAIAH, **3.**

AKAN.—A descendant of Esau, Gn 36[27]; in 1 Ch 1[42] called **Jaakan** (AV Jakan).

AKATAN, 1 Es 8[38] (RV).—See HAKKATAN.

AKELDAMA (AV Aceldama).—The name of the field allegedly bought by Judas Iscariot and the scene of his suicide (Ac 1[19]). It is quite correctly interpreted there as ' field of blood ' (Aramaic *ḥ[a]kal d[e]mā'*). The name is given only in translated form in Mt 27[3], where the field is bought by the Temple authorities with the discarded blood-money and devoted to the burial of strangers. Matthew seems to know that it was once a potter's field and connects therewith the prophetic passage Zech 11[12–13], wrongly attributing it to Jeremiah. Antoninus (*c* 570) describes Akeldama as near the pool of Siloam; Arculf, a century later, as a place south of Jerusalem's western ridge (wrongly called Sion in Christian history), where corpses were still cast in his day. Since the Crusades a definite place has been pointed out on the E. side of the *Wâdī er-Rabābi*, and the remains of a charnel house of those days still exist there. It is called *ḥaqq ed-Damm* in Arabic, *i.e.* ' field of blood.' The connexion of the Aramaic name with the actions reported in Matthew and Acts cannot be regarded as certain.

E. G. K.

AKHENATEN (*c* 1366–50 B.C.), later name of Amenophis IV., son and successor of Amenophis III. He initiated a religious reform that led eventually to the banning of the old gods of Egypt and the substitution of a single god, the Aten or Sun's Disk. It is probable, though

still disputed, that he had a co-regency of nine or eleven years with his father. His wife was Nefertiti, by whom he had six daughters. In his fifth or sixth year he moved his capital to a new city, Akhetaten, 'the Horizon of the Disk' (the modern *Tell el-Amarna*), began the systematic elimination of the name of Amun from the monuments and changed his own name to Akhenaten, 'It is well with the Disk.' In the ninth year of the reign the movement became even more intolerant and extremist, but about the fourteenth year Akhenaten quarrelled with Nefertiti, probably because even he now realized that some compromise with the old religion was necessary, and banished her to a palace to the extreme north of Akhetaten. Akhenaten appointed his half-brother Smenkhkare as co-regent, married him to his eldest daughter Meritaten, and sent him to Thebes where in the next two or three years he effected some slight restoration of the old religion. Akhenaten himself married his third daughter, Ankhesenpaaten, and before his death in his seventeenth year had had a daughter by her. On his death Nefertiti seized power, installed on the throne Tutankhaten, another half-brother (?) of Akhenaten and married him to Ankhesenpaaten. Within about three years Tutankhaten abandoned Amarna, returned to Thebes and the old religion and changed his name to Tutankhamun.

The old views that Akhenaten was a man far in advance of his time, that Atenism was the first real monotheism and due to foreign or Semitic influence are all untenable. In origin and outlook Atenism was Egyptian, except in its intolerance. The movement was fundamentally political in origin, the culmination of a century long struggle to curb the power of the state priesthoods. Atenism was a form of the old solar cult, emphasizing the life-giving power of the sun graphically depicted by descending rays ending in hands that offer the sign of life. King and Aten are very intimately linked, they share the same regnal years and jubilees, the King is high priest and sole intermediary between men and Aten. But having swept away the old religion, Akhenaten had created a vacuum which he did not or could not fill: he produced a beautiful hymn, but no teaching, philosophy or ethic, and because Atenism thus gave the people nothing, it gained no hold and failed. H. W. F.

AKKAD (ACCAD), AKKADIANS.—*Akkad(u)* is the Semitic equivalent of the Sumerian **Agadê** (q.v.), the capital of the founder of the first Semitic empire. It was probably in consequence of this that it gave its name to Northern Babylonia, the Semitic language of which came to be known as *Akkadu* or 'Akkadian.' In the early days of cuneiform decipherment 'Akkadian' was the name usually applied to the non-Semitic language of primitive Babylonia now known to be Sumerian. When Babylonia became a united monarchy, its rulers took the title of 'kings of Sumer and Akkad' in Semitic, 'Kengi and Uri' in Sumerian. In Gn 10^{10} Accad is the city, not the country to which it gave its name.

A. H. S.—C. J. M. W.

AKKOS, 1 Es 5^{38} (RV).—See HAKKOZ, **1.**

AKKUB ('cunning').—**1.** A son of Eloenai and descendant of David, 1 Ch 3^{24}. **2.** A Levite, one of the porters at the E. gate of the Temple; the eponym of a family that returned from the Exile, 1 Ch 9^{17}, Ezr 2^{42}, Neh 7^{45} 11^{19} 12^{25}, 1 Es 5^{28} (AV **Dacobi,** RV **Dacubi**). **3.** The name of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2^{45}, 1 Es 5^{30} (AV **Acua,** RV **Acud**). Omitted in Neh 7. **4.** A Levite who helped to expound the Law, Neh 8^{7}, 1 Es 9^{48} (AV, RV **Jacubus**).

AKRABATTENE (1 Mac 5^{3}).—The region in Idumaea near Akrabbim (AV **Arabattine,** RV **Akrabattine**). See Map 10.

AKRABATTINE, 1 Mac 5^{3} (RV).—See AKRABATTENE.

AKRABBIM, ASCENT OF.—This name, 'ascent of the scorpions' was given to a pass in a very barren region on the south side of the Dead Sea, Nu 34^{4}, Jos 15^{3} (AV **Maaleh-acrabbim**), Jg 1^{36}; modern *Naqb eṣ-Ṣafā.*

ALABASTER.—See JEWELS AND PRECIOUS STONES.

ALAMETH, 1 Ch 7^{8} (AV).—See ALEMETH, **1.**

ALAMOTH, Ps 46 title, 1 Ch 15^{20}.—See PSALMS, **2.**

ALBEIT.—Albeit is a contraction for 'all be it,' and means 'although it be.' It occurs in Ezk 13^{7} (AV, RV), Phn 19 (AV), and in the Apocrypha (AV, RV).

ALCIMUS (the Greek for 'valiant' suggested by the Hebrew *Eliakim,* 'God sets up') was son or nephew of Jose ben-Joeser, pupil to Antigonus of Soco (190 B.C.). Antiochus v. (Eupator), king of Syria, appointed him high priest (162 B.C.). Either because he was not of high-priestly family (though of the stock of Aaron, 1 Mac 7^{14}), or, more probably, from his Hellenizing tendencies, his appointment was stoutly opposed by Judas Maccabaeus, and received but scanty recognition at Jerusalem. Demetrius Soter, cousin and successor to Antiochus, in response to Alcimus's solicitations, reinstated him by the means of Nicanor, the Syrian general. He now received, moreover, considerable local support from the Hellenizing party. It was not, however, till the defeat and death of Judas at Elasa that he was in a position to commence his Hellenizing measures, and shortly afterwards he died of paralysis (160 B.C.). A. W. S.

ALCOVE.—RVm in Nu 25^{8} for RV 'pavilion,' AV 'tent,' RSV 'inner room.' See PAVILION.

ALEMA.—A city in Gilead, 1 Mac 5^{26}; possibly **Helam** (q.v.).

ALEMETH.—1. A son of Becher, a Benjamite, 1 Ch 7^{8} (AV **Alameth**). **2.** A descendant of Saul and son of Jehoaddah (1 Ch 8^{36}) or of Jarah (1 Ch 9^{42}). **3.** A Levitical city of Benjamin, 1 Ch 6^{60} (RV **Allemeth**); called **Almon** in Jos 21^{18}; modern *'Almît.*

ALEPH.—First letter of Hebrew alphabet, and so used to introduce the first part of Ps 119, every verse of which begins with this letter.

ALEXANDER.—1. Son of Simon of Cyrene; like his brother Rufus, evidently a well-known man (Mk 15^{21} only). **2.** One of the high-priestly family (Ac 4^{6}). **3.** The would-be spokesman of the Jews in the riot at Ephesus, which endangered them as well as the Christians (Ac 19^{33}); not improbably the same as the coppersmith (2 Ti 4^{14}) who did St. Paul 'great harm,' and who was probably an Ephesian Jew; possibly the same as the Alexander of 1 Ti 1^{20} (especially if 2 Ti preceded 1 Ti, as B. S. Easton held), in which case we may regard him as an apostate Christian who had relapsed into Judaism. (See HYMENAEUS.) A. J. M.—F. C. G.

ALEXANDER BALAS.—A low-born youth called Balas, living in Smyrna, was put forward by the enemies of Demetrius I. as son of Antiochus IV., king of Syria. In their struggle for the throne the rivals sought to outbid each other for the support of Jonathan the Maccabee, who elected to side with Alexander, and was appointed high priest by him (153 B.C.). Jonathan defeated Apollonius, one of the generals of Demetrius, and received still further honours (1 Mac 10). But Alexander Balas cared more for sensual pleasures than for kingly duties: his father-in-law Ptolemy turned against him, and Alexander, fleeing to Arabia, was assassinated there (1 Mac 11^{17}). J. T.

ALEXANDER THE GREAT.—Alexander III. of Macedonia (356–323 B.C.) was the son of Philip II. and Olympias of Epirus. His tutor was Aristotle, whose influence on the young prince is hard to estimate. Certainly there were some things in the philosopher's teaching (*e.g.* the nature of barbarians, who were born to be slaves) which Alexander had to unlearn (see W. W. Tarn, *Alexander the Great,* 54 f), and some which he should have unlearned but did not (*e.g.* the king as 'god' among men). Alexander succeeded to the throne in 336 and two years later began his invasion of the Persian empire. His first objective was the liberation of the Greek cities in Asia Minor, after which he moved farther east and defeated the Persians at Issus (October 333), near the NE. corner of the Mediterranean; then he

turned southward to Egypt, then NE. toward Mesopotamia, where he finally defeated the Persian Great King, Darius III., at Gaugamela in October 331. After the conquest of Babylon his eastward march continued through Media, Parthia, Bactria, and Sogdiana, and then down the Indus to the sea and thence back to Babylon, where he died in June 323. His impact upon the Near and Middle East began a new era in history, the 'Alexandrine' or better the 'Hellenistic' age, when Greek language, commodities, art, customs, and ideas, including religious and theological conceptions, penetrated the whole inhabited world of western Asia; by the same route Asiatic ideas penetrated the West and affected the whole development of civilization from the 4th cent. B.C. onwards. His claim to divinity was partly, perhaps largely, political; for he aimed to succeed and not merely to supplant both the Persian Great King and also the Egyptian Pharaoh (the latter was always known as a son of a god, Amon Rē). This claim marked a stage in the development of the Hellenistic ruler cult, and was eventually reflected in Roman emperor worship, which was the political-religious cultus offered the 'divine' world-ruler.

His reputed interest in Judaism and his supposed visit to Jerusalem were a subject of later speculation and fancy. A Jewish legend reported by Josephus and the Talmud, relates that while the renowned Macedonian conqueror was besieging Tyre (333 B.C.), rival embassies from the Jews and the Samaritans solicited his protection. At the close of the siege he set out for Jerusalem, and was met outside by the entire population, with the high priest at their head. Recognizing the latter as the person who had appeared to him in a dream and promised him victory, the king prostrated himself. He then entered the city, offered sacrifice, was shown the passages in Daniel relating to himself, granted the people unmolested use of their customs, promised to befriend their eastern settlements, and welcomed Jews to his army (*Ant.* XI. viii. 4 ff [321 ff]). The objections to this story are: (1) that although there are references to Alexander and his successors in Daniel (2^{40ff} 7^{7} $8^{5, 8, 21}$ 11^{3f}), they were not written till the 2nd cent. B.C.; and (2) that the accounts given by Arrian and Quintus Curtius do not mention these events. It is also most likely that when Josephus declares that Alexander gave to the Jews in Alexandria equal privileges with the Macedonians (*c. Ap.* ii. 4 [35]), he is anticipating by some years what happened under the Ptolemies.

The deep impression made by Alexander's successes is shown by numerous other legends connected with his name in later Jewish literature. But his real importance to the Biblical student consists in this—his conquest of the Near and Middle East brought the Jews, along with all the other nations from the Mediterranean to the Indus, into contact with Greek literature and thought; and his inauguration of the new era of Hellenism, in this area, became the most important feature in the world-wide *praeparatio evangelica*. Perhaps his next greatest achievement was the foundation of the city of Alexandria, at the mouth of the Nile: a city which provided a centre for the dissemination of Hellenistic culture for over six centuries (see Map 16). J. T.—F. C. G.

ALEXANDRIA was founded (332 B.C.) by Alexander the Great after his conquest of Egypt. Recognizing the inconvenience caused by the want of a harbour for 600 miles along the shore, he selected as the site of a new port the village of Rhacotis, lying in the extreme west of the Nile delta on a strip of land between Lake Mareotis and the sea. This he united to the little island of Pharos by a huge mole about a mile long, and thus he formed two splendid havens, which speedily became the commercial meeting-place of Africa, Asia, and Europe. The city was laid out in shape like the outspread cloak of a Macedonian soldier; in circumference about 15 miles; and it was divided into quarters by a magnificent street nearly 5 miles long and 100 feet wide, running from E. to W., and crossed by another of somewhat lesser dimensions from N. to S. In the great palace area the corpse of Alexander was given a tomb by Ptolemy, after he took it from Perdiccas. The Ptolemies, who succeeded to the Egyptian portion of Alexander's divided empire, made Alexandria their capital, and by their extensive building operations rendered the city famous for the magnificence and beauty of its public edifices. The city had five quarters named after the first five letters of the alphabet. The Jews lived in the quarter of the Macedonians ('*Delta*') in Josephus' time. Beside the Royal Palace the Royal Mausoleum, the Temple of Neptune, the Great Theatre, the Gymnasium, the Hippodrome (3 Mac 4^{11} 5^{46}), and the vast Necropolis, Alexandria possessed three other structures for which it was celebrated. (1) The *Museum*, which was not a place where collections were laid out for instruction, but a spot where the fine arts, science, and literature were studied. The Museum of Alexandria became in course of time practically the centre of the intellectual life of the world. It answered very largely to what we associate with the idea of a great modern university. It had its staff of State-paid professors, its professorial dining-hall, its shaded cloisters, where eager students from all parts of the world walked about, listening to lectures from men like Euclid, Eratosthenes, and Hipparchus. (2) The *Library*, which was the greatest treasure of the city, was founded by the first Ptolemy. His successors increased the number of volumes till the collection embraced upwards of 700,000 MSS, in which were inscribed the intellectual efforts of Greece, Rome, Asia Minor, Palestine, and even India. The value of this unrivalled collection was immense. The Library was in two portions; and, in the siege of Alexandria by Julius Caesar, the part stored in the Museum was burned, a loss, however, which was largely made up by the presentation to Cleopatra, by Mark Antony, of the Royal Library of Pergamum. The other portion was stored in the Serapeum, which in 1895 was discovered to have been situated where 'Pompey's Pillar' now stands. Historians are uncertain whether this celebrated Library was destroyed in A.D. 391 by Bishop Theophilus or in A.D. 641 by the Caliph Omar. (3) The third structure which attracted the attention of the world to Alexandria was the *Pharos* (Lighthouse), erected by Ptolemy II. Philadelphus, on the island which had been joined to the mainland by Alexander. Rising in storeys of decreasing dimensions to a height of 450–490 feet, adorned with white marble columns, balustrades, and statues, it was justly reckoned one of the 'Seven Wonders of the World.' Though it was destroyed by an earthquake in A.D. 1303, it has nevertheless exercised a permanent influence on mankind. The idea of humanity to the mariner which it embodied was accepted by almost every civilized nation, and the thousands of lighthouses throughout the world to-day can all be traced to the erection of this first Pharos.

In its times of greatest prosperity, Alexandria had a population of between 800,000 and 1,000,000. Trade, amusement, and learning attracted to it inhabitants from every quarter. It was an amalgam of East and West. The alertness and versatility of the Greeks were here united with the gravity, conservatism, and dreaminess of the Orientals. Alexandria became, next to Rome, the largest and most splendid city in the world. Amongst its polyglot community, the Jews formed no inconsiderable portion. Jewish colonists had settled in Egypt in large numbers after the destruction of Jerusalem (Jer 42^{14}), and during the Persian period their numbers greatly increased. The Ptolemies, with one exception, favoured them, and assigned a special quarter of the city to them. More than an eighth of the population of Egypt was Jewish. Their business instincts brought to them the bulk of the trade of the country. They practically controlled the vast export of wheat. Some had great ships with which they traded over all the Mediterranean. St. Paul twice sailed in a ship of Alexandria (Ac 27^{6} 28^{11}). The Jews were under their own ethnarch, who was called 'Alabarch,' and observed their own domestic and religious customs. Their great central synagogue was

an immense and most imposing structure, where all the trade guilds sat together, and the seventy elders were accommodated in seventy splendidly jewelled chairs of state.

It was in Alexandria that one of the most important events in the history of religion took place, when the Hebrew Scriptures were translated into the Greek tongue. The *Letter of Aristeas*, written 130–100 B.C., gives a legendary account of this undertaking. But it is undisputed that during the reigns of the earlier Lagidae (somewhere between 250 and 132 B.C.) the 'Septuagint' made its appearance. It is certainly not the product of a syndicate of translators working harmoniously, as Jewish tradition asserted. The work is of very unequal merit, the Pentateuch (q.v.) being the best done, while some of the later books are wretchedly translated. The translation was regarded by the Jews with mingled feelings—execrated by one section as a desecration of the holy oracles, extolled by another section as the means by which the truth and beauty of the Law and the Prophets could be appreciated for the first time by the Greek-speaking Gentile world. The LXX became a most valuable preparation for Christianity. It familiarized the heathen nations with the God of righteousness as He had been revealed to the Jews. It diluted some Semitic ideas with more acceptable Greek ones. It formed the Bible of the early Church. In the Eastern Church to-day it is the only orthodox text of the OT.

The wars of the Ptolemies with the Seleucids at Antioch are described in Dn 11. Ptolemy II. *Philadelphus* left his mark on Palestine in the cities of Philadelphia (=Rabbath-ammon, Dt 3^{11}), Ptolemais (Ac 21^{7}=Acco, Jg 1^{31}), Philoteria, etc. Under Ptolemy III. *Euergetes* I. (247–222 B.C.) the famous 'stele of Canopus' was inscribed. With Ptolemy IV. *Philopator* the dynasty began to decline, and his alleged oppressions of the Jews are narrated in 3 Maccabees. Under Ptolemy V. *Epiphanes* the Alexandrian supremacy over Palestine was exchanged 198 B.C. for that of Antiochus III. *the Great* (Dn 11^{14-17}). The ten succeeding Ptolemies were distinguished for almost nothing but their effeminacy, folly, luxury, and cruelty. The city increased in wealth, but sank more and more in political power. Julius Cæsar stormed Alexandria in 47 B.C., and after a brief spell of false splendour under Cleopatra, it fell after the battle of Actium (31 B.C.) into the hands of the Romans, and its fortunes were henceforth merged with those of the Empire. Egypt as a whole became the private possession of the emperor.

But while its political power was thus passing away, it was developing an intellectual greatness destined to exercise a profound influence through succeeding centuries. Among its Jewish population there had arisen a new school which sought to amalgamate Hebrew tradition and Greek philosophy, and to make the OT yield up Platonic and Stoic doctrines. This attempted fusion of Hebraism and Hellenism was begun by Aristobulus, and reached its climax in Philo, a contemporary of Jesus Christ. The Jews found in the Gentile writings many beautiful and inspiring thoughts. They could logically defend their own proud claim to be the sole depositaries and custodians of Divine truth only by asserting that every rich and luminous Greek expression was borrowed from their Scriptures. Plato and Pythagoras, they declared, were deeply in debt to Moses. The Greeks were merely reproducers of Hebrew ethics, of Hebrew religious and moral conceptions. The next step was to rewrite their own Scriptures in terms of Greek philosophy, and the most simple way of doing this was by an elaborate system of allegory. Philo carried the allegorizing of the OT to such an extent that he was able to read philosophy into the most matter-of-fact narratives of the patriarchs and their wives. This allegorical method of interpretation was destined to have a large influence in Christian Church history. We read of a 'synagogue of the Alexandrians' in Jerusalem, furiously hostile to St. Stephen with his plain declaration of facts (Ac 6^{9}). Apollos of Alexandria (Ac 18^{24-28}) needed to be 'more accurately instructed' in Christian doctrine, though we have no direct evidence that he was a disciple of Philo. The Epistle to the Hebrews shows traces of Alexandrian influence, and there are evidences that St. Paul was not unfamiliar with Alexandrian hermeneutics and terminology (cf Gal 4^{24-31}). But there is no proof that St. Paul ever visited Alexandria. He seems to have refrained from going thither because the gospel had already reached the city (cf Ro 15^{20}). Eusebius credits St. Mark with the introduction of Christianity into Egypt—a legend which survived for centuries. In the 2nd and 3rd cents. Alexandria was the intellectual capital of Christendom. The Alexandrian school of theology was made lustrous by the names of Pantaenus, Clement, and especially Origen, who, while continuing the allegorical tradition, strove to show that Christian doctrine enshrined and realized the dreams and yearnings of Greek philosophy. The Gnostics (q.v.), Basilides, and Valentinus also flourished here. Alexandria became more and more the stronghold of the Christian faith. Here Athanasius defended *contra mundum* the true Divinity of Christ in the Nicene controversy, and the city's influence on Christian theology has been profound. In A.D. 641, Alexandria was occupied by the Caliph Omar's general Amr ibn el-Asi. Omar did not permit it to be a seat of government any longer, but established a more easily controlled one at Fosṭaṭ (Old Cairo). Alexandria now began to decline, and the discovery in 1497 of the new route to the East *via* the Cape of Good Hope almost destroyed its trade. At the beginning of the 19th cent. Alexandria was a mere village. To-day it is again a large and flourishing city, with a population of 928,237 (1956), and its port is one of the busiest on the Mediterranean shore. G. A. F. K.—E. G. K.

ALGUM.—See ALMUG.

ALIAH.—A chief of Edom, 1 Ch 1^{51}; called **Alvah**, Gn 36^{40}.

ALIAN.—An Edomite, son of Shobal, 1 Ch 1^{40}; called **Alvan**, Gn 36^{23}.

ALIEN.—See NATIONS, STRANGER.

ALLAMMELECH.—A town of Asher, Jos 19^{26}; site unknown.

ALLAR.—Name given to one of the leaders of the Jews who could not show their pedigree at the return under Zerubbabel, 1 Es 5^{36} (RV; AV **Aalar**). But 'Charaathalan (q.v.) leading them, and Allar' is due to some perversion of the original, and RSV reads 'Cherub, Addan and Immer,' as in Ezr 2^{59} (cf Neh 7^{16}); these are three places from which Jews returned.

ALLEGORY.—See PARABLE.

ALLELUIA.—See HALLELUJAH.

ALLEMETH, 1 Ch 6^{60} (RV).—See ALEMETH, 3.

ALLIANCE.—During the patriarchal age Abraham is pictured as making an alliance of friendship with Abimelech (Gn 21^{22ff}) at Beersheba; this is probably a popular aetiology on the name Beersheba ('well of swearing an oath'). The pact between Jacob and Laban may be similarly explained (cf Galeed—'heap of witness,' Gn 31^{44ff}). Abraham stood in tribal alliance with certain Canaanites (Eshcol and Aner, 14^{13}).

Formal alliances between nations appear under the monarchy. Such was Solomon's treaty with Hiram (1 K 5^{1-12}; cf 9^{10-14}). His marriage with Pharaoh's daughter undoubtedly had political implications as well (3^{1}; cf 9^{16}). Such a policy of treaty through intermarriage is apparent in Ahab's marriage with Jezebel of the Sidonian royal house (16^{31}). A marriage alliance between the house of David and that of the Omrids is also attested (2 K 8^{16-18}). Both kingdoms sought alliance with Benhadad of Damascus at one time (1 K 15^{19}), and later Ahab was in league with him (20^{34}). The later kings of these states, Pekah and Rezin respectively, made an alliance against Judah (2 K 16^{5}, Is 7^{1}) as a coalition against the Assyrians.

During the Assyrian Empire period both the Northern and the Southern Kingdoms sought to ward off Assyrian domination through alliance with Damascus and/or

Egypt. This led to the quick destruction of the Northern state (2 K 17^{1-6}), while the Judaean state miraculously survived. Reliance on Egypt on Judah's part was of little help, however (a 'broken reed of a staff'), as far as the Assyrians were concerned (18^{21-24}). The prophets were unanimously opposed to such alliances (Dt 17^{16}, Hos 8^{9}, Is 20. 30, Jer $2^{18, 36}$), advocating throughout a policy of isolation and reliance on Yahweh alone.

After the loss of national independence alliance with foreign states were of course impossible until the period of resurgent independence under the Maccabees, when alliances with Rome were made (1 Mac 8^{17}, 15^{16}). Cf also COVENANT. J. W. W.

ALLOM, 1 Es 5^{34} (AV).—See AMI.

ALLON.—1. A Simeonite, 1 Ch 4^{37}. **2.** Head of a family of Solomon's servants, 1 Es 5^{34} (RV; AV **Allom**); RSV has **Ami** (q.v.). **3.** Jos 19^{33} (AV); see ZAANANNIM.

ALLON-BACHUTH, Gn 35^{8} (AV).—See ALLON-BACUTH.

ALLON-BACUTH ('oak of weeping').—The place where Deborah, Rebekah's nurse, was buried, Gn 35^{8} (AV **Allon-bachuth**); it was near Bethel, but the site is unknown.

ALLOW.—To 'allow' generally means in AV 'to approve,' as Ro 7^{15} 'that which I do I allow not.' But in Ac 24^{15} it has the modern sense, *admit*. In RSV the word bears its modern meaning.

ALLOY, Is 1^{25} (RSV, RVm; AV, RV 'tin').—See MINING AND METALS.

ALL TO BRAKE, Jg 9^{53} (AV).—Phrase meaning 'altogether broke' (RSV 'crushed).' The 'all' is for 'altogether,' as in 1 K 14^{10}, 'until it is all gone'; and the 'to' is not the sign of the infin., but an adverb like German *zer*, meaning 'thoroughly.' Cf Chaucer, *Knight's Tale*, 2759: 'His breast to-broken with his sadil bowe.'

ALMIGHTY is the regular rendering of *Shaddai*, a term which occurs forty-five times in the OT, six times qualifying *El* (God) and thirty-nine times (thirty-one of these in Job) standing by itself. In the Hexateuch its use is almost wholly confined to P, according to which source it is the name by which Yahweh revealed himself to the patriarchs (Ex 6^{3}, cf Gn 17^{1} 35^{11}) 'God Almighty' AV, RV, RSV). LXX usually renders by *Pantokratōr* ('ruler of all') but six times it renders by the rather fanciful 'he who is sufficient.' But in Genesis *El Shaddai* is always represented in LXX by a pronoun, 'my (or thy) God': in Ezk 10^{5} it is merely transliterated. Other suggested renderings are 'The Destroyer,' *i.e.* 'the Storm-God,' 'the Pourer,' *i.e.* 'the Rain-God,' 'the Mountain' (cf 'Rock' as a divine title in Dt $32^{4, 18, 30, 31}$), or 'Lord.' The 'Mountain' seems most probable and Albright judges this 'explanation of the name inexpugnable' (*FSAC*, p. 326). In Babylon 'the Great Mountain' (*Shadu rabu*) is a common title of Bel: *El Shaddai* would thus be equivalent to Akkadian *Ilu-shadu-ni*, 'El is my mountain.' 'The symbol of a mountain was often used in antiquity to point to the might and awe-inspiring majesty of a particular deity' (G. E. Wright, *BA*, p. 52). In composition the word occurs in two personal names, Zurishaddai (Nu 1^{6}) and Ammishaddai (Nu 1^{12}), and perhaps also in Shedeur (Nu 1^{5}).

In the NT, with exception of 2 Co 6^{18} (quoted from 2 S 7^{14}) the name is confined to the Apocalypse. That it renders *Shaddai* rather than *Sabaoth* seems proved (in spite of the echo of Is 6^{3} present in Rev 4^{8}) by the fact that it always either stands alone or qualifies 'God,' never 'Lord.' The writer loves to pile up the titles and attributes of God, and among them is that ancient title which carries him back to the patriarchal period, the title *El Shaddai*. H. C. O. L.—**J. Pn.**

AL-MODAD.—Eldest son of Joktan (q.v.), mentioned in Gn 10^{26}, 1 Ch 1^{20}. From the position of the name in the list of 'sons,' he would seem to be located in the south of the Arabian peninsula, but the name cannot be connected with any known region.

ALMON.—A Levitical city of Benjamin, Jos 21^{18}; modern *'Almît*, between Geba and Anathoth; called **Alemeth** (q.v.) in 1 Ch 6^{60}.

ALMOND.—The fruit is mentioned in Gn 43^{11}, Ex 25^{33f} 37^{19f}; the tree in Jer 1^{11}, Ec 12^{5}. The almond (*Amygdalus communis*) is in Palestine the earliest harbinger of spring, bursting into beautiful white blossom late in January in Jerusalem, before its leaves appear. Hence its name and symbolism: *shāḳēdh* (almond) is from a root meaning 'waken' or 'watch,' and in Jer 1^{11f} there is a play on the name and *shōḳēdh* ('watching'). Probably the whiteness of the blossom from a distance—the delicate pink at the bases of the petals being visible only on closer inspection—suggested its comparison to the white hair of age (Ec 12^{5}). The fruit is a great favourite. It is eaten green before the shell hardens, especially by children, and the ripe kernels are eaten by themselves or made into sweetmeats with sugar. A present of Palestine almonds would be appreciated in Egypt (Gn 43^{11}), as they did not then grow in the latter country. In Gn 30^{37} a different word is used for 'almond' (AV 'hazel' is wrong); this is the word *lûz*, which is modern Arabic for 'almond.' Luz, the ancient name of Bethel, may be due to the abundance of almond trees in the district in ancient times.

E. W. G. M.—**H. H. R.**

ALMON-DIBLATHAIM.—A station in the journeyings, Nu 33^{46f}; probably identical with **Beth-diblathaim** (q.v.), mentioned in Jer 48^{22}. Site unknown, possibly modern *Khirbet Deleilât esh-Sherqîyeh*.

ALMS, ALMSGIVING.—'An alms' (Ac 3^{3}) is something freely given, in money or in kind, to the needy, from motives of love and pity for the recipient, and of gratitude to the Giver of all. Much might be said of the humane spirit which pervades the whole of the Hebrew legislation, and in particular the legislation of Deuteronomy, of which, in this respect, 15^{11} may be taken as the epitome: 'You shall open wide your hand to your brother, to the needy and to the poor, in the land.' The writings of the prophets, also, are full of generous advocacy of the rights of the poor. In the later pre-Christian centuries almsgiving became one of the most prominent of religious duties (Ps 112^{9}, Pr 14^{21} 19^{17} 31^{20}, Job 29^{12f}). The sentiment of the 2nd cent. B.C.—by which time it is significant that the Hebrew word for 'righteousness' had acquired the special sense of almsgiving as in the true text of Mt 6^{1} (see RSV)—is fully reflected in Sirach (7^{10} 17^{22} 29^{11ff}) and Tobit (see especially 4^{7-11}). From this time onwards, indeed, almsgiving was considered to possess an atoning or redemptive efficacy (Sir 3^{30} to 4^{10} 12^{3}, 'almsgiving delivers from death,' cf Dn 4^{27}). After the cessation of sacrifice, almsgiving appears to have ranked among the Jews as the first of religious duties, more meritorious even than prayer and fasting. Arrangements were made by Jewish authorities for the systematic collection and distribution of the alms of the people. An offertory for the poor also formed a recognized part of the synagogue service.

In sectarian circles like the Qumrân group, the practice of almsgiving took a more radical form: when a member was received into the sect, he abandoned to it all that he owned. Almsgiving thus became the foundation of community goods. The group as such undertook the support of its members, with a tendency to restrict the concept of 'poor' or 'neighbour' within the limits of the sect.

Almsgiving occupies a prominent place in the teaching of our Lord, who rebukes the ostentatious charity of His day (Mt 6^{1-4}), emphasizes the blessedness of giving (Ac 20^{35}), its opportunities (Mt 25^{35ff}), and its highest motive, 'in my name' (Mk 9^{41}). In the early Christian community of Jerusalem the needs of the poor were effectively supplied, for its members 'had everything in common . . . and there was not a needy person among

them ' (Ac 4[32, 34]). Concern for the careful distribution of the Church's alms led to the appointment of special officers (Ac 6[1ff]). The provision of a poor fund for the aid of the mother Church was much in the thoughts of the Apostle Paul (1 Co 16[1ff], 2 Co 9[1ff]), and until a period within living memory the care of God's poor has continued to be in some countries the almost exclusive privilege of the Christian Church.

A. R. S. K.—M. Si.

ALMUG.—A tree mentioned 1 K10[11f], imported from Ophir. In 2 Ch 9[10f] it is called the **algum** tree, while in 2 Ch 2[8] the algum is mentioned as imported from Lebanon. Both are commonly identified with the red sandalwood (*Pterocarpus santalinus*). Moldenke (*Plants of the Bible*, 188, 209) thinks the almug tree was native in Ophir, and was the red sandalwood, while the algum tree was the eastern savin (*Sabina excelsa*), which is native to Lebanon. This would involve correcting the text in 2 Ch 9[10f].

ALNATHAN, 1 Es 8[44] (AV).—See Elnathan, **3.**

ALOES.—An odoriferous tree, *'ahālîm* Pr 7[17], *'ahālôth* Ps 45[8], Ca 4[14]. This is not the bitter aloes of medicine, but the eaglewood (*Aquilaria agallocha*), a lofty tree, native to Cochin-China, Malaya, and Northern India. The fragrant parts are those which are diseased, and the odoriferous qualities are due to the infiltration with resin. The development of this change in the wood is hastened by burying it in the ground. In Nu 24[6] (RSV ' aloes ' ; AV, RV ' **lign aloes** ') it is unlikely that this tree is meant, since it was not native to the region. A slight emendation of the text would yield ' terebinths,' which some would read.

In Jn 19[39], where the word is *aloē*, it is possible that bitter aloes (*Aloe succotrina*) may be meant (so Moldenke, *Plants of the Bible*, 35, 47) ; this was used by the Egyptians in embalming. E. W. G. M.—H. H. R.

ALOTH, 1 K 4[16] (AV).—See Bealoth, **2.**

ALPHA AND OMEGA.—A title of God in Rev 1[8] 21[6], of Jesus in 22[13] [its presence in 1[11] AV is not justified by the MSS]. Alpha was the first and Omega the last letter of the Greek alphabet, as Aleph and Taw were the first and last of the Hebrew. In the Talmud, ' From Aleph to Taw ' meant ' From first to last,' including all between. Cf *Shabb.* 55a (on Ezk 9[6]) : ' Do not read " My Sanctuary," but " My Saints," who are the sons of men who have kept the whole Law from Aleph to Taw.'

This explains the title. In each instance the seer defines it. Rev 1[8] ' I am the Alpha and the Omega,' says the Lord God, ' who is and who was and who is to come, the Almighty ' (cf 1[4] 4[8]), *i.e.* the Eternal, the Contemporary of every generation. Rev 21[6] ' I am the Alpha and the Omega, the beginning and the end ' (cf 3[14] ; 22[13] ' I am the Alpha and the Omega, the first and the last [cf 1[17], Is 41[4] 44[6] 48[12]], the beginning and the end,' *i.e.* He who comprehends and embraces all things, from whom all come and to whom all return, the *fons et clausula*, the starting point and the goal of history (cf Ro 11[36], Col 1[17]).

Though the antecedents of this use of the first and last letters of the alphabet lie in Judaism, analogous practice is to be found among the Greeks (Martial, v. 26). We also find the thought that Zeus is the beginning, the middle, and the end of all things (Plato, Pausanias). What is especially striking in the book of Revelation as in Isaiah is the I-style of the divine revelation and the liturgical context suggested. Our MSS uniformly present the Alpha as a word written out but the Omega only as the letter Ω.

Aurelius Prudentius (A.D. 348–410) makes fine use of the title in his hymn on *The Lord's Nativity* (' Corde natus ex parentis '), thus rendered by J. M. Neale :

' Of the Father's love begotten
Ere the worlds began to be,
He is Alpha and Omega,
He the source, the ending He,
Of the things that are, that have been,
And that future years shall see,
Evermore and evermore.'

D. S.—A. N. W.

ALPHABET.—See Writing.

ALPHAEUS.—1. The father of Levi according to Mk 2[14] (cf Lk 5[27]). We know nothing more of him than his name. Matthew's identification of Levi with the apostle Matthew (Mt 9[9] 10[3]) and the reading of some manuscripts in Mk 2[14] (which identify Levi with James the son of Alphaeus) appear to be attempts to bring Levi within the circle of the twelve apostles. **2.** The father of James the apostle (Mt 10[3], Mk 3[18], Lk 6[15], Ac 1[13]). The attempts to relate Alphaeus the father of James with Alphaeus the father of Levi rest on the insufficient manuscript evidence referred to above and late tradition which asserts that both Matthew and James had been tax collectors (Chrysostom). More frequent has been the identification of this James with James the younger whose mother was Mary and whose brother was Joses (Mk 15[40], Mt 27[56]). This Mary is then identified with Mary the wife of Clopas mentioned in Jn 19[25]. If this is so, Clopas and Alphaeus are one and the same person and it is pointed out that either name may be derived from the Aramaic name Chalphai (cf 1 Mac 11[70]). Finally, some follow out the suggestion of Hegesippus that Clopas was a brother of Joseph (which was perhaps inferred from what appears to be a misunderstanding of Jn 19[25]) and thus introduce further complications into the picture. But none of this can be proved. For the names Mary and James are much too common to make identification certain and there is some evidence that Alphaeus and Clopas are not derived from the same Aramaic name. These identifications are made all the less likely since they are arrived at through an arbitrary combination of references from the Synoptic Gospels and John.

W. R. S.

ALTANEUS, 1 Es 9[33] (AV).—See Mattenai, **1.**

ALTAR.—A place where animals were slaughtered in sacrifice to a deity, then by extension a place where offerings of any kind were presented to him (Heb. *mizbēaḥ*, Gr. *thusiastērion*).

1. Varieties of altar.—A suitable rock might be used for the purpose, or a heap of stones, which in the earliest times must be unhewn (Ex 20[25]), or of turf (' an altar of earth,' Ex 20[24]). A good example of a natural rock-altar is that on which Gideon placed the ' present ' which he brought for the angel of Yahweh (Jg 6[20]) or that on which Manoah offered up a kid and a cereal offering to Yahweh (Jg 13[19]). Another is the outcrop of rock on the Temple hill at Jerusalem which to this day gives its name to the ' Dome of the Rock ' erected upon it. The ' great stone ' on which Saul's followers slaughtered their oxen after defeating the Philistines at Michmash was not strictly an altar, as these oxen do not appear to have been offered in sacrifice ; the altar which Saul built to Yahweh on that occasion was evidently distinct from the great stone (1 S 14[33ff]).

More elaborate altars might be made of bronze, like that of Ex 27[1ff] (constructed on a wooden framework) or the great altar of Solomon's Temple (1 K 8[64]). When Solomon's Temple was dedicated, the bronze altar was inadequate for the great number of sacrifices, and so Solomon ' consecrated the middle of the court that was before the house of Yahweh ' (1 K 8[64])—a reference, probably, to the outcrop of rock—to serve as a more spacious place of sacrifice. Both these bronze altars were equipped with ' horns,' as were also the altar at the Ark-shrine in Jerusalem before Solomon's Temple was founded (1 K 1[50] 2[28]) and the altar in Ezekiel's vision of the post-exilic Temple (Ezk 43[15, 20]). Altars with four horns have been recovered from Megiddo, belonging to the 10th and 9th centuries B.C., and horned altars and shrines, of varying stages of development from the Early to the Late Bronze Age have been discovered at Beycesultan in Anatolia.

2. Cosmic features.—Ezekiel's altar (Ezk 43^{13ff}) has features of recognizably cosmic significance, taken over probably from the altar in the Jerusalem Temple which he knew. It was a stepped structure in three stages. The lowest stage rested on a base or foundation-platform (lit. 'the bosom of the earth'), set in the pavement and surrounded by a border or 'rim.' The topmost stage is the *har'ēl*, conventionally rendered 'altar-hearth'; W. F. Albright, however, takes *har'ēl* ('hill of God') to reflect a popular etymology of Akk. *arallu*, which means both 'underworld' and 'mountain of the gods,' the significance here being 'underworld.' Since the foundation-platform also has an Akkadian counterpart in *irat erṣiti* ('bosom of the earth'), used of the foundation-platforms of the royal palace and the temple-tower of Etemenanki in Babylon, Albright takes the altar to have the same cosmic significance as the ziggurat (the summit of which was also equipped with four 'horns'). Further cosmic significance is recognized in the *kiyyôr* or bronze platform on which Solomon stood in front of the altar when he prayed to Yahweh at the dedication of his Temple (2 Ch 6^{12ff}, not mentioned in the parallel account of 1 K 8). Solomon's standing on this *kiyyôr* is illustrated by Albright from Syrian representations of a king or priest standing on a chest or tub-shaped vessel in the attitude of prayer. He derives the term *kiyyôr* (which elsewhere denotes a portable laver) from a Sumerian word meaning 'foundation of the earth' (again with cosmic significance). The details were no doubt the work of the Phoenician architects and builders whom Solomon employed, but in the Jerusalem Temple they were regarded (together with the cosmic symbolism of the structure as a whole) as representing Yahweh's enthronement as sole ruler over the cosmos.

3. Location of altars.—In early Israel, as even earlier in the patriarchal period, an altar was regularly erected wherever Yahweh manifested his presence among men, like Abraham's at Shechem (Gn 12^{7}), Isaac's at Beersheba (Gn 26^{24f}), Jacob's at Bethel (Gn 35^{7}), Gideon's at Ophrah (Jg 6^{24}) and David's on Mount Moriah (2 S 24^{25}). With this practice may be compared the promise associated with the command to make 'an altar of earth' (Ex 20^{24}): 'In every place where I cause my name to be remembered I will come to you and bless you.' There are also records of altar-building where no theophany is expressly mentioned, from Noah's altar (Gn 8^{20}) to Elijah's on Carmel (1 K 18^{31f})—although Elijah's action was the repairing of an old altar of Yahweh which had fallen into ruins (v.^{30}). From Josiah's reformation onwards, however, the Deuteronomic principle of one altar only for the nation was enforced—the one altar being that at the central sanctuary in Jerusalem. The altar on Gerizim was not intended to conflict with this principle, since the Samaritans believed that Gerizim was the true central sanctuary intended in Dt 12^{5}. The altar in the Jewish temple of Elephantine in Egypt (cf Is 19^{19}?) was technically an infraction of the Deuteronomic principle, although it was built at a time when the Jerusalem Temple lay derelict (during the exile). But the law of Deuteronomy does not envisage Israelites living in Egypt, and it is plain that the Jewish colony at Elephantine was largely uninfluenced by Josiah's reformation. The altar in the Leontopolis temple (*c* 160 B.C.–A.D. 73), founded by Onias IV., was equally irregular, but it was founded in the conviction that the legitimacy of the Jerusalem cultus had lapsed with the supersession of the Zadokite high priesthood there.

In Israel's earliest legislation altars provided **sanctuary** for fugitives from vengeance (Ex 21^{14}); the altar at David's Ark-shrine in Jerusalem was so used (1 K 1^{50} 2^{28}).

4. Pagan altars.—The altar which Ahaz saw at Damascus and which so attracted him that he installed a replica in the Jerusalem Temple (2 K 16^{10ff}) may have been a Damascene altar or one brought by Tiglath-pileser III. to establish the Assyrian cultus in what was now to be the capital of an Assyrian province. In the latter case, the installation of a replica in Jerusalem would be a token of Ahaz's vassalage to Assyria.

The 'abomination of desolation' which was erected upon the altar of burnt-offering in the second Temple under Antiochus IV. in December, 167 B.C., was a smaller altar dedicated to the worship of Olympian Zeus (1 Mac 1$^{54, 59}$; cf Dn 8^{13} 9^{27} 11^{31} 12^{11}); see under IDOLATRY. Three years later a new altar of unhewn stones was dedicated in place of the altar defiled by the pagan installation (1 Mac 4^{47})—an event commemorated in Israel by the festival of Hanukkah.

Altars of incense (Hebrew *ḥammānîm*), stands or braziers for the burning of incense, go back at least to the 2nd millennium B.C. A Canaanite incense-altar of basalt has been discovered at Hazor, and Megiddo supplies a limestone sample from *c* 1000 B.C. In earlier times they were commonly made of pottery. Whether incense-altars of metal were called by the same name is doubtful; in OT *ḥammān* is reserved for Canaanite or at least idolatrous installations, and other expressions are used for the golden incense-altars of the wilderness tabernacle (Ex 30^{1}) and Solomon's Temple (1 K 6^{22} 7^{48}, 2 Ch 26^{16}).

5. In NT.—Greek *bōmos*, the common classical word for 'altar,' is used once in NT—appropriately, for the Athenian altar 'To an unknown god' (Ac 17^{23}).

No Christian altar in the material sense appears in NT. In He 13^{10} 'we have an altar' refers by metonymy to the sacrifice of Christ, from which Christians derive their holy status and their spiritual sustenance, and in response to which they present to God the sacrifices of praise and charity of vv.^{15f}. The altar of Rev 6^{9} 8^{3} belongs to the heavenly temple; it is the eternal reality of which the incense-altar in the earthly temple was a material copy.

F. F. B.

AL-TASCHITH, Pss 57, 58, 59, 75 titles (AV).—See AL-TASHHETH.

AL-TASHHETH, Pss 57, 58, 59, 75 titles (RV).—RSV translates, 'Do not destroy.' See PSALMS, **2.**

ALUSH.—A station in the journeyings, Nu 33^{13f}, near Dophkah (q.v.); site unknown, but possibly modern *Wâdī el-'Eshsh*.

ALVAH.—A chief of Edom, Gn 36^{40}; called **Aliah,** 1 Ch 1^{51}.

ALVAN.—An Edomite, son of Shobal, Gn 36^{23}; called **Alian,** 1 Ch 1^{40}.

AMAD.—A city of Asher, Jos 19^{26}; site unknown.

AMADATHUS, Ad. Est 12^{6} 16$^{10, 17}$ (AV, RV).—See HAMMEDATHA (so RSV).

AMAL ('toil').—A descendant of Asher, 1 Ch 7^{35}.

AMALEK, AMALEKITES.—A tribe which roamed from the days of the Exodus till the time of king Saul, over the region from the southern boundary of Judah to the Egyptian frontier and the peninsula of Sinai. They are not counted among the kindred of the Israelites and probably were among the inhabitants of the region whom the Hebrew immigrants found already in the land. With this agrees the statement of a poem quoted in Nu 24^{20} 'Amalek was the first of the nations.'

Israel first met with the Amalekites in the region near Sinai, when Amalek naturally tried to prevent the entrance of a new tribe into the region (cf Ex 17$^{8–16}$). The battle which ensued produced such a profound impression, that one of the few things which the Pentateuch claims that Moses wrote is the ban of Yahweh upon Amalek (Ex 17^{14}). It appears from Dt 25$^{17–19}$ that Amalek made other attacks upon Israel, harassing her rear. On the southern border of Palestine the Amalekites also helped at a later time to prevent Israel's entrance from Kadesh (Nu 13^{29} 14^{25}).

During the period of the Judges, Amalekites aided the Moabites in raiding Israel (Jg 3^{13}), and at a later time they helped the Midianites to do the same thing (6$^{3, 33}$ 7^{12}). This kept alive the old enmity. King Saul attempted to shatter their force, and captured their king, whom Samuel afterwards slew (1 S 15). Although Saul is said to have taken much spoil, the Amalekites were still there for David to raid during that part of Saul's reign when

David was an outlaw (1 S 27[8]). The boundaries of the *habitat* of the Amalekites at this time are said to have been from Telem, one of the southern cities of Judah (Jos 15[24]), to Shur on the way to Egypt (1 S 15[4]). Most modern critics also read *Telem* for *Havilah* in 1 S 15[7], and for '*of old*' in 1 S 27[8].

It was formerly supposed, on the basis of Jg 5[14] and 12[15], that there was at one time a settlement of Amalekites farther north, in the hill country of Ephraim. That is, however, improbable, for both passages contain textual difficulties. Individual Amalekites, nevertheless, sojourned in Israel (2 S 1[8, 13]).

In 1 Ch 4[42ff] there is a remarkable statement that a remnant of the Amalekites had escaped and dwelt in Edom, and that 500 Simeonites attacked and smote them. Perhaps this accounts for the genealogies which make Amalek a descendant of Esau and a subordinate Edomite tribe (cf Gn 36[12, 16] and 1 Ch 1[36]). Perhaps here we learn how the powerful Amalek of the earlier time faded away.

According to Arab historians *Amálik* (*sic*) was a primitive 'Cushite' race which became extinct (Montgomery, *The Bible and Arabia*, Philadelphia, 1934, p. 20, n. 37). G. A. B.—S. H. Hn.

AMAM.—A city of Judah, Jos 15[26], S. of Beersheba; site unknown.

AMAN.—**1.** The ungrateful foster-son of Ahikar, To 14[10] (AV, RV); RSV **Nadab** (see NADAB, **4**). **2.** Form of the name **Haman** (q.v.) found in Ad. Est 12[6] 16[10, 17] (AV, RV; RSV Haman).

AMANA.—One of the mountains near the river Abana (which is called Amana in a variant reading in 2 K 5[12]), mentioned with Lebanon and Hermon in Ca 4[8].

AMARIAH ('Y" said').—**1.** Zeph 1[1], a great-grandfather of the prophet Zephaniah, and son of a Hezekiah, who may possibly be the king of that name. **2.** 1 Ch 6[7, 52], grandfather of Zadok the priest. **3.** 1 Ch 23[19] 24[23], a Levite, descendant of Kohath, in the time of David. **4.** 1 Ch 6[11], Ezr 7[3], 1 Es 8[2] (AV, RV **Amarias**), 2 Es 1[2] (AV, RV **Amarias**), son of Azariah, who is said to have ministered in Solomon's Temple. It is stated that Ezra belonged to the same family. The lists in which **2** and **4** occur are very uncertain, and the name may refer to the same person in both. **5.** 2 Ch 19[11], a high priest in the reign of Jehoshaphat, and appointed to have charge of 'matters of the Lord,' while Zebadiah was in charge of the 'king's matters.' **6.** 2 Ch 31[15], a Levite in the time of Hezekiah, and one of the six assistants to Kore, who was 'keeper of the east gate.' These assistants helped to 'distribute the portions to their brethren.' **7.** Neh 12[2, 13] 10[3], a priestly clan which returned to Jerusalem, and sealed the covenant under Nehemiah (probably the same as **Immer**, 1 Ch 24[14], Ezr 2[37] 10[20], Neh 7[40], 1 Es 5[24] (AV **Meruth**, RV **Emmeruth**). **8.** Ezr 10[42], 1 Es 9[34] (AV **Zambis**, RV **Zambri**), a Judahite, one of the sons of Bani (v.[34], 1 Ch 9[4]) who had taken strange wives. **9.** Neh 11[4], a Judahite, who offered to dwell in Jerusalem. **10.** Neh 12[12], where **Meraiah** is probably a corruption of Amariah (so Syr. and LXX[L]).

A. H. McN.—E. R. R.

AMARIAS, 1 Es 8[2], 2 Es 1[2] (AV, RV).—See AMARIAH, **4.**

AMASA.—**1.** The son of Ithra an Ishmaelite, and of Abigal (in 1 Ch 2[16f] Abigail) the sister of king David. He commanded the army of the rebel Absalom (2 S 17[25]); but was completely routed by Joab in the forest of Ephraim (18[6–8]). David not only pardoned him, but, probably to placate the Judahites, gave him the command of the army in place of Joab (19[13]). He was treacherously slain by Joab (2 S 20[9–12]). **2.** An Ephraimite who opposed the bringing into Samaria of the Jewish prisoners, whom Pekah, king of Israel, had taken in his campaign against Ahaz (2 Ch 28[12]).

AMASAI.—**1.** A Kohathite, 1 Ch 6[25, 35]; the eponym of a family, 2 Ch 29[12]. **2.** One of the priests who blew trumpets when David brought the Ark to Jerusalem, 1 Ch 15[24]. **3.** One of David's officers at Ziklag, 1 Ch 12[18]; possibly to be identified with Amasa, **1.**

AMASHSAI.—A priest of the family of Immer, Neh 11[13] (AV **Amashai**).

AMASIAH.—One of Jehoshaphat's commanders, 2 Ch 17[16].

AMATHEIS, 1 Es 9[29] (AV).—See EMATHIS.

AMAW.—The name of a country, found only in Nu 22[5] (RSV). AV and RV follow MT and render 'the land of the children of his people,' instead of 'the land of Amaw.' Samaritan Pentateuch, Peshitta, and Vulgate read 'the land of the children of Ammon.' Some scholars find the same name in Ex 15[14] (where RSV has 'the peoples') standing parallel to Philistia, cf Egyptian *ʿmw* = (Asiatic) or (Syrian).

AMAZIAH.—**1.** Son of Jehoash of Judah. He came to the throne after the assassination of his father. It is recorded in his favour (2 K 14[6]) that although he put the murderers of his father to death he spared their children —something unheard of up to that time, we infer. Our sources know of a successful campaign of his against Edom, and an unsuccessful one against Israel. In this he seems to have been the aggressor; and after refusing to hear the advice of Jehoash, whom he had challenged to a trial of strength, he had the mortification of seeing his own capital plundered. The conspiracy by which he perished may have been prompted by his conduct in this war. In the matter of religion he received qualified praise from the author of Kings (2 K 14[3f]), while the Chronicler accuses him of gross apostasy (2 Ch 25[14ff]). **2.** The priest at Bethel who opposed the prophet Amos (Am 7[16ff]). **3.** A Simeonite (1 Ch 4[34]). **4.** A Merarite (1 Ch 6[45]). H. P. S.

AMBASSADOR.—As diplomatic agents of sovereigns or other persons in high authority, ambassadors are frequently mentioned in the OT and Apocrypha from the time of Moses to the Maccabees (1 Mac 9[70] 11[9] 14[21] 15[17]) as they are in the diplomatic archives of the kings of the ancient Near East. Insult to their persons was a sufficient *casus belli* (2 S 10[4ff]). In several passages (*e.g.* Nu 20[14] 21[21], Dt 2[26], Jg 11[12, 19], 2 S 5[11], 2 K 19[9]) the 'messengers' of RSV are practically 'ambassadors,' as the Hebrew word is elsewhere rendered (Is 18[2], Ezk 17[15]) or 'envoys' (2 Ch 32[31] 35[21], Is 30[4] 33[7]). In NT the word is used only metaphorically (2 Co 5[20], Eph 6[2]; cf Phn [9] RSV).

AMBER, Ezk 1[4, 27] 8[2] (AV, RV).—This translation of *ḥashmal* is much questioned, and it is more probable that a metallic substance is meant, perhaps brass; RSV renders 'bronze.' There is no evidence that amber was imported into Palestine as early as the time of Ezekiel.

AMBUSH.—See WAR.

AMEN.—A Hebrew form of affirmation usually translated in the LXX by an equivalent Greek expression (Nu 5[22], Dt 27[15] 'so be it,' Jer 28[6] (35[6]) 'truly,' but sometimes transliterated (1 Ch 16[36]) as in English. It is an indication of solemn assent, chiefly in prayer, to the words of another, on the part either of an individual (Nu 5[22]) or of an assembly (Dt 27[15]); sometimes reduplicated (Ps 41[13]), sometimes accompanied by a rubrical direction (Ps 106[48]). In Is 65[16] it is rendered 'truth' in the phrase 'the God of truth.' From the synagogue the word passed into the liturgical use of Christian congregations, and is so referred to in 1 Co 14[16]—'the (customary) Amen to your thanksgiving' (? Eucharist). The use peculiar to the NT is that ascribed to our Lord in the Gospels, where the word—'truly' (AV, RV 'verily') followed by 'I say'—introduces statements which He desires to invest with special authority (Mt 5[18], Mk 3[28], Lk 4[24] etc.) as worthy of unquestioning trust. The Fourth Gospel reduplicates —a form which, though Christ may Himself have varied the phrase in this manner, is nevertheless stereotyped by this Evangelist (Jn 1[51] and twenty-four other places),

and marks the peculiar solemnity of the utterances it introduces. The impression created by this idiom may have influenced the title of 'the Amen' given to the Lord in the Epistle to Laodicea (Rev 3^{14}). A strikingly similar phrase is used by St. Paul in 2 Co 1^{20}—'we utter the Amen through Him' (*i.e.* Jesus Christ)—the seal of God's promises. Its use in doxologies is frequent.

J. G. S.—H. H. R.

AMETHYST.—See JEWELS AND PRECIOUS STONES.

AMI.—Head of a family of Solomon's servants, Ezr 2^{57}, 1 Es 5^{34} (AV **Allom**; RV **Allon**); called **Amon** in Neh 7^{59}.

AMINADAB, Mt 1^{4} (AV).—See AMMINADAB, **1.**

AMITTAI ('true').—Father of the prophet Jonah, 2 K 14^{25}, Jon 1^{1}.

AMMAH.—A hill near Giah, in the wilderness of Gibeon, 2 S 2^{24}; site unknown.

AMMI ('my people').—The name to be applied to Israel in the time of restoration, Hos 2^{1} (AV, RV; RSV 'my people'). It is to take the place of Lo-ammi ('not my people'), the name given by Hosea to Gomer's third child (Hos 1^{8}).

AMMIDIANS.—One of the families that returned with Zerubbabel, 1 Es 5^{20} (AV **Ammidoi**; RV **Ammidioi**; omitted in the parallel lists in Ezr 2, Neh 7.

AMMIDIOI, 1 Es 5^{20} (RV).—See AMMIDIANS.

AMMIDOI, 1 Es 5^{20} (AV).—See AMMIDIANS.

AMMIEL ('kinsman is El').—**1.** Son of Gemalli, and spy from the tribe of Dan, Nu 13^{12}. **2.** Father of Machir (see MACHIR, **2**), 2 S 9^{4f} 17^{27}. **3.** The sixth son of Obed-edom, who with his family constituted one of the courses of door-keepers in the time of David; to them was allotted charge of the S. gate of the Temple, and the storehouse, 1 Ch $26^{5, 15}$. **4.** Father of Bathsheba (here called Bath-shua), according to 1 Ch 3^{5}; called **Eliam,** 2 S 11^{3}; see ELIAM, **1.**

AMMIHUD ('kinsman is majesty').—**1.** An Ephraimite, father of Elishama, Nu 1^{10} 2^{18} $7^{48, 53}$ 10^{22}. **2.** A Simeonite, father of Shemuel, Nu 34^{20}. **3.** A Naphtalite, father of Pedahel, Nu 34^{28}. **4.** Father of Talmai, king of Geshur, 2 S 13^{37} (AV, RSV with *Ḳᵉrê*; RV **Ammihur** with *Ḳᵉthîbh*). **5.** Son of Omri and father of Uthai, 1 Ch 9^{4}.

AMMIHUR, 2 S 13^{37} (RV).—See AMMIHUD, **4.**

AMMINADAB ('kinsman is noble').—**1.** Son of Ram and father of Nahshon, Nu 1^{7} 2^{3} 7^{12} 10^{14}, Ru 4^{19f}, 1 Ch 2^{10}, Mt 1^{4}; father-in-law of Aaron, Ex 6^{23}. **2.** Son of Kohath and father of Korah, 1 Ch 6^{22}. **3.** A chief of a Levitical house, 1 Ch 15^{10f}.

AMMINADIB.—Occurs in an obscure passage, Ca 6^{12} (AV, RVm), where AVm and RV render 'my willing (AVm; RV 'princely') people,' and RSV 'my prince.'

AMMISHADDAI ('kinsman is Shaddai').—A Danite, father of Ahiezer, Nu 1^{12} 2^{25} $7^{66, 71}$ 10^{25}.

AMMIZABAD ('kinsman hath bestowed').—Son of Benaiah, 1 Ch 27^{6}.

AMMON, AMMONITES.—A people inhabiting the Transjordanian territory within the bend of the upper course of the river Jabbok, between the tribe of Gad and the Arabian desert. Rabbah (modern '*Ammân*) was its capital and centre.

The narrative of Gn 19 tells the story of the origin of the Ammonites from Ben-Ammi and through him from Lot, explaining also their relationship with the Moabites. They are regularly called 'children of Ammon,' or 'Ammonites' in the OT, twice simply 'Ammon' (1 S 11^{11}, Ps 83^{7}). The Hebrew expression *bᵉnê 'Ammōn* in the Syro-Palestinian usage corresponds to the *Bīt-Ammānu*, the name for the Ammonite state used in Assyrian inscriptions (Noth, *ZDPV*, lxviii [1951], 37). The story of Gn 19 reveals furthermore a consciousness on the part of the Israelites that the Ammonites were their kindred. The proper names of individual Ammonites, so far as they are known to us, confirm this view.

In Dt 2^{20} the Ammonites are said to have displaced the Zamzummim, a prehistoric people, of whom we know nothing. An Aramaic apocryphon to Genesis found among the Dead Sea scrolls mentions the Zamzummim among the people defeated by the four northern kings of Gn 14 instead of the Zuzim of the Massoretic text. It is still uncertain at what time the Ammonites settled in their country as a sedentary people. N. Glueck concluded from the absence of Middle or Late Bronze-Age pottery in the Ammonite territory that they had not settled before the 13th cent. B.C. (*BASOR*, 68 [1937], 16–20). However, the recent discoveries of Middle-Bronze Age tomb groups at Mount Nebo, Naur and 'Ammân, a Middle to Late Bronze-Age temple at 'Ammân, and a Late Bronze to Early Iron-Age tomb at Mâdebā, seem to indicate that a sedentary life in this area existed before the 13th cent. B.C. (Harding, *PEQ*, xc [1958], 12).

At the time of the conquest the Israelites did not disturb the Ammonites (Nu 21^{24}, Dt 2^{37}), or attempt to conquer their territory. During the period of the judges the Ammonites assisted Eglon of Moab in his invasion of Israel (Jg 3^{13}), and later attempted to conquer Gilead, but were driven back by Jephthah the judge ($11^{4-9, 30-36}$ 12^{1-3}). In the 11th cent. B.C., Nahash, their king, oppressed the town of Jabesh in Gilead, but Saul's victory over them delivered Jabesh from the Ammonites and established the liberator as Israel's king (1 S 11). Saul and Nahash thus became enemies. Consequently, later, Nahash befriended David, apparently to weaken the growing power of Israel. When David succeeded Saul in power, Hanun, the son of Nahash, provoked him to war, with the result that Rabbah, the Ammonite capital, was stormed and taken, the Ammonites were reduced to vassalage, and terrible vengeance was wreaked upon them (2 S 10–12). Afterwards, during Absalom's rebellion, a son of Nahash rendered David assistance at Mahanaim (2 S 17^{27}). Zelek, an Ammonite, was among David's heroes (2 S 23^{37}). These friendly relations continued through the reign of Solomon. He took as one of his wives the Ammonite princess Naamah, who became the mother of Rehoboam, the next king (1 K 11^{1} $14^{21, 31}$). After the reign of Solomon the Ammonites appear to have gained their independence.

In the reign of Ahab, Ba'sa, son of Ruḥubi, King of Ammon, was a member of the confederacy which opposed the progress of Shalmaneser III. of Assyria into the West (*ANET*, p. 279a). According to 2 Ch $20^{1, 10}$, the Ammonites joined with Moab and Edom in invading Judah in the reign of Jehoshaphat. Before the reign of Jeroboam II. the Ammonites had made another attempt to get possession of Gilead, and their barbarities in warfare excited the indignation of the prophet Amos (Am 1^{13-15}). Chronicles represents them as paying tribute to Uzziah of Judah, and as beaten by his son Jotham (2 Ch 26^{8} 27^{5}). Tiglath-pileser III. of Assyria received tribute from Sanipu, King of the Ammonites (*ANET*, p. 282a), Esarhaddon from King Puduil (*ANET*, p. 291b), and Ashurbanipal from King Amminadbi (*ANET*, p. 294a). The name of the last-mentioned Ammonite king appears on two ancient seals found at 'Ammân (*BA* xvi [1953], 4). When next we hear of the Ammonites, Nebuchadnezzar of Babylon is employing them to harass the refractory Judaean king Jehoiakim (2 K 24^{2}). Perhaps it was at this period that the Ammonites occupied the territory of Gad (Jer 49^{1ff}). Later, the domination of the Babylonians compelled Ammon and Judah to become friends, for Ammon conspired with king Zedekiah against Nebuchadrezzar (Jer 27^{3}). The Babylonian king regarded both Ammon and Judah as rebels, for Ezekiel represents him as casting lots to see whether he should first attack Rabbah or Jerusalem (Ezk 21^{20ff}, cf Zeph $2^{8, 9}$). During the Babylonian invasion of Palestine many Judaeans seem to have migrated to Ammon (Jer 40^{11}).

After the destruction of Jerusalem, Baalis, king of Ammon, sent a man to assassinate Gedaliah, whom Nebuchadrezzar had made governor of Judah (Jer 40^{14}).

Again, 140 years later, the Ammonites did everything in their power to prevent the rebuilding of the walls of Jerusalem by Nehemiah (Neh $2^{10, 19}$ $4^{3, 7}$). Nehemiah and Ezra fomented this enmity by making illegal the marriages of Ammonitish women with citizens of Judah (Neh 13^{23}).

Between the time of Nehemiah and Alexander the Great the country east of the Jordan was overrun by the Nabataeans. Perhaps the Ammonites lost their identity at this time; for, though their name appears later, many scholars think it is used of these Arabs. Thus in 1 Mac 5^{6ff} Judas Maccabaeus is said to have defeated the Ammonites; while Justin Martyr (*Dial. Tryph.*, 19) says the Ammonites were numerous in his day. As Josephus (*Ant.* I. xi. 5 [206]) uses the same language of the Moabites and Ammonites, though elsewhere (XIV. i. 4 [18]) he seems to call them Arabians, it is possible that the Ammonites had lost their identity at the time of the Nabataean invasion. Their capital, Rabbah, was rebuilt in the Greek style by Ptolemy II Philadelphus of Egypt in the 3rd cent. B.C. and named Philadelphia. Its ruins amid the modern city of 'Ammân are impressive. The God of the Ammonites is called in the OT **Milcom**, a variation of *Melekh*, 'king,' also **Molech**, to whom Solomon dedicated a sanctuary at Jerusalem (1 K 11^{7}).

G. A. B.—S. H. Hn.

AMNON ('faithful').—**1.** Eldest son of David by Ahinoam the Jezreelitess; he dishonoured his half-sister Tamar, and was on that account slain by her brother Absalom, 2 S 3^{2} 13^{1ff}, 1 Ch 3^{1}. **2.** Son of Shimon, 1 Ch 4^{20}.

AMOK.—A priestly family in the time of Zerubbabel and of Joiakim, Neh $12^{7, 20}$.

AMOMUM.—See SPICE.

AMON ('master workman').—**1.** Son and successor of Manasseh, king of Judah, who reigned for two years and followed the way of his father. He was killed in a palace conspiracy, but the assassins were punished by the populace, who put Josiah on the throne, 2 K 21^{19ff}. Some have connected his name with the Egyptian sun-god (see next article). **2.** A governor of Samaria, 1 K 22^{26}, 2 Ch 18^{25}. **3.** Head of a family of Solomon's servants, Neh 7^{59}; called **Ami** in Ezr 2^{57}.

AMON (Gr. *Ammōn*, Egyp. *Amūn*).—An Egyptian deity who was originally a fertility god and therefore often depicted with the head of a ram. He first comes into prominence with the rise of Thebes (whose local deity he was) after the expulsion of the Hyksos. In the 18th Dynasty, when Thebes was the capital of Egypt, he became the national god. As such he was often identified with the sun god Rē' and called Amūn-rē' 'the king of the gods.' His supremacy lasted as long as Thebes remained the capital, but when, in the 21st and subsequent Dynasties, the centre of gravity shifted to Lower Egypt, he relapsed into the status of god of the South and of Nubia, yielding place to Osiris in the North. Only once in the 500 years that he was the supreme God of Egypt was his position challenged: this was during the reign of the reformer king Akhenaton, who moved the capital to Tell el-Amarna and substituted the worship of Aton, the sun's disc, for that of Amūn. During the 18th and 19th Dynasties enormous temples, richly endowed, were built for Amūn, especially at Thebes, from the wealth which poured into Egypt as a result of the Asiatic campaigns. Their ruins are amongst the most impressive remains of ancient Egypt. T. W. T.

AMORITES.—An ancient people, called *'emōrî* in Hebrew, *Amurru* in Akkadian, and *'Imur* in Egyptian texts, who frequently appear in the early books of the Bible as one of the aboriginal tribes of Canaan.

The history of the Amorites is somewhat obscure since they have left no historical records in their own language, and those left by them in Akkadian cover only short periods or reigns of a few individual rulers like those of Hammurabi of Babylon or of Zimri-Lim of Mari. The first word about the Amorites comes from Sumeria. Shu-Sin, one of the last kings of the 3rd dynasty of Ur, records the building of a wall against the Amorites. This shows that they must have been on the move and posed a threat for the lower Euphrates valley. Shortly afterwards all of Syria and Palestine was simply called *Amurru* by the Babylonians, which may be an indication that they came from that area. During the period of the dynasties of Isin and Larsa two kings of Larsa appear with Amorite names in the 19th cent. B.C. The rule of these kings was not more than an intermezzo, but by the end of the 19th cent. B.C. Amorites were found firmly entrenched as kings and rulers throughout the Mesopotamian valley. They founded the 1st dynasty of Babylon whose famous 6th ruler, Hammurabi, built an empire that reached from the Persian Gulf to the Mediterranean Sea. Also the powerful kingdom of Mari in whose capital city French excavations have discovered a large palace archive, was of Amorite origin. Other Amorite Kingdoms mentioned in the records of that time are those of *Yamḥad* (Aleppo) and *Qaṭna* in Syria. The rule of the Amorites in Mesopotamia was brought to an end in the 16th cent. B.C. by the invasions of the Hittites and the Kassites.

The Amorites must have taken over Syria and Palestine towards the end of the 3rd millennium B.C., for the majority of cities in those countries were in the hands of Amorite rulers during the time of the powerful 12th dynasty of Egypt (1991–*c* 1780 B.C.). Many of their names are mentioned in the Egyptian execration texts by means of which the Egyptians attempted to curb the power of these dangerous princes. In the Amarna period (14th cent. B.C.) *Amurru* was the name of a kingdom in inland Syria, a vassal state of Egypt. Taking advantage of Egypt's political weakness at that time this state carried out an active warfare against many Syrian and Phoenician city states whose rulers were like the king of Amurru vassals of Egypt.

The Amorite language is not well known, since only a few Amorite phrases in Akkadian texts so far have come to light. Hence, most of our knowledge of that language is based on the personal names of Amorites. This evidence reveals that Amorite was a Semitic language, closely related to the West-Semitic tongues. That it differed only dialectically from Canaanite ('Sidonian'), which is also Hebrew, is revealed by Dt 3^{9}. In the Table of Nations the Amorites are listed among the Hamites (Gn 10^{6}) probably more for religious than for ethnological or linguistic reasons.

Biblical tradition attests that the Amorites were in possession of large parts of Palestine during the patriarchal period. They are said to have lived at Hebron in Abraham's time, whose confederates they became (Gn 14^{13}). In Gn 15^{16} they are simply synonymous with the population of the whole country, and Jacob is said to have taken a certain section of Canaan by sword and bow from the Amorites (Gn 48^{22}). They are also quite regularly mentioned in the lists of nations whom the Israelites were supposed to drive out from Canaan (Gn 15^{21}, Ex 3^{8}, Dt 7^{1}, etc.). At the time of the Exodus the Amorites are described as being in possession of the hill country of western Palestine and of two large areas in Transjordania (Nu 13^{29}, Dt $1^{19, 20, 44}$, Nu 21^{26-30}). The invading Hebrews defeated Amorite armies on several occasions and took much of their territory from them (Nu $21^{25, 31, 32}$, Jos $10^{5, 6, 28-43}$). However, strong remnants of these people remained in the country, and they kept many of their cities and territories (Jg 1^{35} 3^{5}). In Samuel's time they lived in peace with the Israelites and did not side with their enemies, the Philistines (1 S 7^{14}). Solomon incorporated all Amorites who were still found in his kingdom into his forced labour corps (1 K $9^{20, 21}$, 2 Ch 8^{7}). From that time on they disappear from view.

G. A. B.—S. H. Hn.

AMOS.—1. The man.—Amos, the earliest of the prophets whose utterances are preserved for us in the Bible, lived and prophesied in the 8th cent. B.C., at some time during the long and almost precisely contemporaneous reigns of Uzziah in Judah (*c* 783–42) and Jeroboam II. (*c* 786–46) in Israel (1^{1}). The further notice placing his ministry two years before the great eathquake

of Uzziah's reign (cf Zec 14^{5}) is, unfortunately, of no help to us, since we do not know in what year this catastrophe took place. His activity, however, fell well along in Jeroboam's reign after that king's victorious campaigns had been completed (6^{13f}). Of Amos himself we know almost nothing. His home was Tekoa, a village on the edge of the Judaean wilderness some six miles south of Bethlehem. He is said to have been a herdsman (1^{1} 7^{14}). Though some have argued that this term designated a cultic functionary, the probability is that it means just what it seems to mean: a small sheep-farmer. He is also said to have been 'a dresser of sycamore trees': *i.e.* one who nipped or bruised the coarse sycamore fig in order to hasten its ripening. Though it may be that something of the spiritual experience which led Amos to the prophetic office is reflected in such passages as 3$^{1-8}$ or 7$^{1-9}$, we do not know how his call came to him. He expressly denied that he had been a member of one of the prophetic guilds, asserting simply (7^{14f}) that the word of Yahweh had come to him commanding him to speak. Though a Judahite, Amos' public ministry was, so far as we know, carried out entirely in the northern Kingdom. But although this may have lasted over a period of years and taken him to various of the cities of Israel, we know of but one incident relating to it (7$^{10-17}$). Amos had come to Bethel, the official state shrine of the northern kingdom, and there had pronounced doom on the nation and on the royal house. Amaziah the priest, thinking him to be one of 'the sons of the prophets' stirring up revolution, as such prophets had often done before (*e.g.* 1 K 91^{n}), silenced him, contemptuously bidding him betake himself to Judah and earn his living prophesying there. Amos, indignantly denying that he was a professional prophet, cursed Amaziah and pronounced doom on him for interfering with the word of Yahweh which he had been commanded to speak. Whether this ended Amos' ministry in Israel or not, we do not know; but one gains the impression that he continued to speak—though perhaps no longer at the royal shrine.

2. The time in which he lived.—When Amos spoke, Israel and Judah were stronger and more prosperous than they had been since Solomon. In the preceding century, internally weakened by Jehu's purge of the house of Omri (842 B.C.), Israel had suffered severely at the hands of the Aramaean kingdom of Damascus, losing all of her territory east of the Jordan (2 K 10^{32f}, cf Am 1^{3}) and probably more besides (2 K 12^{17}), and becoming ultimately a dependency of the Aramaean king (2 K 13^{7}). At the end of the 9th cent., however, Assyrian invasions crippled Damascus while leaving Israel relatively untouched. Then the Assyrians withdrew and for some fifty years, busied with internal problems and with campaigns elsewhere, did not march into Syria and Palestine at all. This gave Israel her chance. Under Jehoash (*c* 801–786), and then under Jeroboam II., she won back all her lost territories and enlarged her borders considerably at the expense of her neighbours (2 K 14$^{25, 28}$). Judah meanwhile pursued a similarly aggressive policy. By the mid-8th cent. the two nations between them held a domain very nearly as large as that of Solomon.

The prosperity which accompanied this resurgence is reflected in every line of Amos. But it is equally evident that Israel was internally sick. The tribal structure of her society had long since disintegrated, leaving wide gaps between rich and poor. Covenant law, in which all social obligation had once been based, had largely ceased to have any real meaning. The rich took advantage of the poor at every opportunity (2^{6f} 5^{11}), amassing wealth by dishonest means and without regard for the rights of the weaker brother (8$^{4-6}$). Their womenfolk, 'cows of Bashan,' were equally guilty with them (4^{1}). Since the judges were venal, the poor had no recourse (5^{10f}). The shrines were busy and well supported (4^{4f} 5$^{21-24}$); but immorality and pagan practices were rife (2^{7f} 5^{26}), together with the pagan notion that religious obligation could be discharged by external observance. Religion had divorced itself from morality. The clergy, being servants of the existing order, could neither utter criticism of it nor tolerate any (7$^{10-13}$). The nation, nevertheless, was optimistic, proud of its strength (6^{13}), unconcernedly enjoying its luxuries without thought of the sickness of society (6$^{1-6}$), confident that Yahweh would always protect His people and at 'the Day of Yahweh' (5$^{18-20}$) intervene in their behalf to make all His promises actual.

3. Contents of the book.—The book of Amos is not a connected treatise written by Amos, but a collection of his utterances, or fragments of utterances, which were delivered orally, remembered and subsequently written down. Over a period of time these, and other utterances attributed to Amos, were brought together into the book as we know it. The book falls into three major sections.

(1) 1^{2}–2^{16}. A single connected discourse. Amos denounces Israel's neighbours for their crimes, all of which have shocked the common conscience of the day, and declares that Yahweh will surely punish. Then, having gained his hearers' agreement, he turns on Israel also and pronounces the righteous judgment of Yahweh upon her for her crimes of injustice and oppression of the poor.

(2) Ch 3–6. A series of oracles or fragments of oracles without original connexion with one another, but all with the theme of the national sin. Most of them are introduced by 'Hear (this word)!,' 'Woe——!' and the like.

(3) 7^{1}–9^{10}. A series of five visions interspersed with oracles and interrupted (7$^{10-17}$) by the account of Amaziah's attempt to silence Amos. The visions are: locusts (7$^{1-3}$), drought (7$^{4-6}$), the plumb-line (7$^{7-9}$), the basket of summer fruit (8$^{1-3}$), the sanctuary smitten at Yahweh's command (9$^{1-4}$).

In striking contrast to the rest of the book is 9$^{11-15}$. It speaks of promise for the future, which elsewhere in Amos is barely implicit (5^{14f}). Most scholars regard this as a later addition to the prophecy. This is very possibly correct, although there is nothing here that is inconsonant with prophetic theology. The further opinion that the passage comes from a time as late as the Exile should be received with caution, for the hopes expressed in it were popular ones of a sort that could be relatively old.

The fact that Amos was a countryman of humble background must not lead us to suppose that he was ignorant or rude in speech. His utterances are couched in an excellent, at times polished, Hebrew. His imagery is vivid, most of it drawn from nature. He displays wide knowledge of his world and of contemporary events; he is aware of the history of his nation's relationship with its neighbours, and also knows something of the history of neighbouring nations (*e.g.* that the Philistines had migrated from Caphtor and the Aramaeans from Kir: 9^{7}). He was, in short, an intelligent man who was above all a keen observer of conditions in his own country, which he knew well.

4. The Theology of Amos.—The message of Amos is on the surface terrifyingly simple, and one that gives classic expression to a theme which recurs in all the great prophets. It is essentially an attack upon the sins of society as sins against Yahweh, and a warning of the coming judgment. Amos singles out those powerful ones who have crowded their weaker brothers (2^{6f}), gained wealth dishonestly (8$^{4-6}$), and so corrupted the courts by bribery that a poor man can get no justice (5$^{7, 10-12}$). He scores the irresponsible wealthy class (6$^{1-6}$) and their womenfolk (4$^{1-3}$), who enjoy every luxury but are unconcerned over the plight of the less fortunate. He declares that the worship of such people is a sin (4^{4f}), a thing hateful to Yahweh (5$^{21-24}$), whose first demand is just behaviour. Amos likened Israel to a tottering wall which Yahweh will pull down (7$^{7-9}$); she will be left like a sheep that a lion has torn (3^{12}); she is already as good as dead (5^{2}). While he called for repentance (5^{14f}) and extended hope on that condition, it appears

that he expected none. His undisputed sayings point only to Israel's doom.

Amos was, then, primarily concerned to proclaim the justice of Yahweh. But he does not do this as one expounding a loftier idea of God, or as one who is concerned with teachings about the nature of God at all. To understand the prophets in this light is to misunderstand them, for they represented essentially a reform movement in the mainstream of Israel's historic faith. Amos, though his originality is unquestioned, propounded no fundamentally new doctrine. His preaching is based on the notion of covenant, a basic stipulation of which was that Israel obey covenant law in all dealings with the brother upon pain of divine displeasure. Concern for social righteousness, especially toward the weak, is prominent in the Book of the Covenant (*e.g.* Ex 22^{21ff}), which reflects legal practice of pre-monarchial days. One sees it also in Nathan's rebuke of David (2 S 12^{1ff}) and Elijah's denunciation of Ahab (1 K 21). Amos' preaching thus carried forward an ancient tradition. The people whom he addressed had perverted the notion of covenant and imagined that the bond between Yahweh and Israel was one based on nature and eternal, requiring of them at most attention to sacrifice and ritual. It is this paganized notion of covenant which Amos attacks. He reminded the people of the gracious acts of Yahweh toward them in the past (2^{9-12}), in the light of which their sins are sins against grace. He insisted that the righteous demands of Yahweh do not exempt Israel (chs. 1–2), for Yahweh (9^{7}) has no 'pet' people: election leads not to privilege only, but to double responsibility (3^{2}).

Because Israel had violated covenant, Amos pronounced doom on her. But he did not, like earlier prophets, attempt to purge the state by revolution. He was suspected of this, it is true, but his denial (7^{10-17}) is borne out by the facts: the classical prophets, however much they sought to influence the policies of state, never indulged in revolutionary action. They believed that the state was under the judgment of Yahweh, Who would himself execute sentence. Amos therefore declared that the expected Day of Yahweh, the day of His definitive intervention in history, would be a day of judgment for sinful Israel (5^{18-20}). J. Br.

AMOZ ('strong').—Father of the prophet Isaiah, 2 K 19^{2}, Is 1^{1}; the name (*'āmôṣ*) is to be distinguished from that of the prophet Amos (*'āmôs*).

AMPHIPOLIS.—A town in a part of Macedonia formerly reckoned to Thrace, on the river Strymon, about three miles from its mouth, where the harbour Eion was situated. It was founded by the Athenians, 436 B.C., and was a place of great strategic and mercantile importance. It underwent various vicissitudes, but retained its importance based on its abundant supplies of excellent wine, figs, oil, and wood, its silver and gold mines, its woollen fabrics. The Romans raised it to the rank of a free town and the chief town of the first district of the province Macedonia; through it the Via Egnatia passed. The verb in the Greek (Ac 17^{1}) seems to indicate that St. Paul passed through it without preaching there. A. So.

AMPLIATUS (AV **Amplias**).—Greeted by St. Paul (Ro 16^{8}), perhaps of the Imperial household (Lightfoot on Ph 4^{22}), and a prominent Christian (Sanday-Headlam). The name, a common slave designation, is found inscribed in the catacombs. A. J. M.

AMRAM ('kinsman is exalted').—**1.** A Levite, son of Kohath and grandson of Levi, Nu 3^{17-19}, 1 Ch $6^{2f, 18}$); he married Jochebed, his father's sister, by whom he begat Aaron and Moses (Ex 6^{18-20}) and Miriam (Nu 26^{59}, 1 Ch 6^{3}). The **Amramites** are mentioned in Nu 3^{27}, 1 Ch 26^{23}. **2.** A son of Bani, who had contracted a foreign marriage, Ezr 10^{34}, 1 Es 9^{34} (AV **Omaerus**, RV **Ismaerus**) **3.** 1 Ch 1^{41} (AV). See HAMRAN.

AMRAPHEL.—King of Shinar (Gn 14^{1}). Head of the league of four kings who invaded Canaan in the time of Abraham. The old identification of Amraphel with Hammurabi, the 6th king of the 1st Amorite dynasty in Babylon, is now generally rejected. While Shinar is used by the Yahwist to denote Babylon in Gn 10^{10} 11^{2}, there is another region mentioned in Egyptian and cuneiform documents which can be transliterated as Shinar and which cannot be Babylonia. Moreover, the Mari documents have shown that there were several kings bearing the name Hammurabi. Hence, even if the doubtful equation of Amraphel were accepted, it would still be uncertain whether Hammurabi of Babylon is the king referred to. No satisfactory solution has yet been proposed. S. H. He.

AMULETS AND CHARMS.—The terms are almost synonymous but also of loose definition. However, we may speak of them in general as signifying objects, commonly worn on the person but sometimes installed in a home, to protect or induce welfare. The origins of such practices are lost in far antiquity, quite evidently so remote in the Stone Ages that we may conclude they have characterized human life almost from its earliest evidences; and it persists into the present of even sophisticated societies, where, however, faith in its efficacy varies from sincerity to an amused concession to common 'superstition.'

From ancient Egypt we have a great variety of small religious objects; miniature figures of gods, some carved into real art pieces, are familiar in museums; and 'Horus eyes,' symbols of the mythical activity of Isis in restoring Osiris to life, are regular designs on coffins and mummies but also as independent trinkets. They are frequent in Palestinian archaeological excavation, as are also scarabs, miniature beetles in stone or faience with a religious design or a name on the under, flat surface. However this is merely a sampling of what our evidence shows to have been a pervasive mood of the entire ancient East; again for illustration one may mention the divine symbols on Babylonian boundary stones, or more relevant, the immense number of personal seals, engraved as they are with mythical symbols.

With Palestine geographically central in the cultures of the Biblical world, it is not surprising that such objects and beliefs are richly attested in archaeological discovery there. Typical of the land, however, as distinct from the import of foreign objects or impulses, are the clay figurines of Astarte with gross exaggeration of sex features. The guess is so obvious as to have won general acceptance that they were believed to assist in pregnancy and birth. A number of objects have been classed as children's toys; it is quite possible, though they may at the same time have been thought to have provided some sort of protection for the child—and in the deficiency of sanitation and medical skill, they needed it!

Doubtless the clearest reference to amulets in the OT is the legislation for 'tassels' (Dt 22^{12}), 'signs,' 'frontlets,' and the 'writing on the doorposts' (Dt 6^{8-9}); or rather we should say the allusion is to a popular use of amulets which the Deuteronomist here sublimates into a religious practice of high meaning. Indeed the word 'phylactery,' commonly applied to these 'frontlets' means a protective object, though the Hebrew word has no such value. A similar exalted interpretation of popular superstitions is to be recognized in the official robe of the High Priest, with its pomegranates and bells and its ornate 'breastpiece' (Ex 28^{33} 39^{25}). Clear mention of the popular use, so richly attested in archaeology and by later evidence, is rare in the Bible. It is plausibly believed that the 'earrings,' still more the 'crescents and the pendants' and the camels' 'collars' taken by Gideon from the pagan Midianites (Jg 8^{25}) were really amulets (cf Gn 35^{4}). A similar guess relates to some items of women's finery listed in Is 3^{18-21}. Indeed RSV uses the word 'amulets'; it is highly probable, for the Hebrew word means 'charms.' Here again we have come upon the overlapping of decorative with magical purpose.

The 'sacred tokens' (2 Mac 12^{40}) found by Judas Maccabaeus on the bodies of his soldiers were heathen charms against death in battle, the peculiar Greek word being a translation of the Aramaic word for 'amulet.'
A. R. S. K.—W. A. I.

AMUSEMENTS.—See GAMES.

AMZI ('strong' or 'strong is Y" ').—**1.** A Merarite, 1 Ch 6^{46}. **2.** A priest in the second Temple, Neh 11^{12}.

ANAB.—A city in the hill country of Judah, once inhabited by Anakim, Jos 11^{21} 15^{50}; modern *Khirbet 'Anâb* near Debir.

ANAEL.—Brother of Tobit and father of Ahikar (To 1^{21}).

ANAH.—**1.** A son (so RSV, with LXX, Sam., Pesh.; AV, RV 'daughter' with Hebrew) of Zibeon, and mother of Oholibamah, one of Esau's wives, Gn $36^{2, 14, 18, 25}$, 1 Ch 1^{40f}; he is said to be a Hivite, but we should perhaps read 'Horite.' **2.** A Horite chief, brother of Zibeon, Gn $36^{20, 29}$, 1 Ch 1^{38}. It is possible that Anah is an eponym and these two are to be identified. In regard to **1** the note is appended: 'he is the Anah who found the hot springs (so RV, RSV with Vulg.; AV wrongly 'mules') in the wilderness, as he pastured the asses of Zibeon his father,' Gn 36^{24}.

ANAHARATH.—A city of Issachar, mentioned with Shion and Rabbith, Jos 19^{19}; possibly modern *en-Na'ūrah*, in the Valley of Jezreel.

ANAIAH ('Y" hath answered').—**1.** A Levite, Neh 8^{4}, 1 Es 9^{43} (AV, RV **Ananias**). **2.** One of those who sealed the covenant, Neh 10^{22}.

ANAK, ANAKIM.—Early inhabitants of the southern hill country of Judah, whom tradition credited with extraordinary height. The word *'Anaḳ* is properly a race-name, and, being often used with the article, it is really an appellative, probably meaning 'the necklace-wearing (people)' (Noth, *Joshua*, p. 63). They are possibly attested in the Egyptian execration texts of the Middle Kingdom (Dussaud, *Syria*, xxi, 175). In the genealogizing narrative of Jos $15^{13, 14}$ there were three sons or clans of Anak with Aramaic names: Sheshai, Ahiman, and Talmai. These were all driven out by Caleb (cf Jg 1^{20}). Jos 11^{21} gives them a wider *habitat*, as scattered over the hill-country of Palestine generally, whence they were exterminated by Joshua. In Gaza, Gath, and Ashdod some remnants were found after Joshua's time (11^{22}).
J. F. McC.—S. H. Hn.

ANAMIM.—A people not yet identified, named among the descendants of Egypt, Gn 10^{13}, 1 Ch 1^{11}.

ANAMMELECH.—A god worshipped by captives transplanted from Sepharvaim to Samaria by the Assyrians, 2 K 17^{24}; human sacrifice (v.^{31}) was the most prominent rite connected with the god's worship. The name probably stands for *Anu-milki* and means 'Anu is prince' (cf Albright, *AJSL*, xli, 86 f.). See also ADRAMMELECH.

ANAN.—**1.** One of those who sealed the covenant, Neh 10^{26}. **2.** Eponym of a family of Temple servants, 1 Es 5^{30} (AV, RV; RSV **Hana**); called **Hanan** in Ezr 2^{46}, Neh 7^{49}.

ANANI.—A son of Elioenai, 1 Ch 3^{24}.

ANANIAH.—**1.** The father of Maaseiah and grandfather of Azariah, who took part in rebuilding the walls of Jerusalem, Neh 3^{23}. **2.** A town inhabited by Benjamites after the return from exile, Neh 11^{32}; possibly modern *el-'Azarîyeh* (Bethany).

ANANIAS.—This name occurs frequently in the Septuagint where it is used for a variety of closely related Hebrew names, the most common of which is Hananiah. It is the name of three persons in the NT. **1.** A member of the early Church in Jerusalem who, according to Ac 5^{1-11}, died with his wife Sapphira for dishonesty in financial matters. **2.** A 'devout man according to the law' at Damascus, a disciple who instructed and baptized Paul after his conversion, restoring to him his sight by the imposition of hands (Ac 9^{1-19} 22^{4-16} 26^{9-18}). **3.** A Jewish high priest and a Sadducee, son of Nedebaeus, who held office from A.D. 47 to 59. He is mentioned several times by Josephus. In A.D. 52 he was sent to Rome by the legate of Syria because of a dispute with the Samaritans. With the aid of Agrippa II. he regained his freedom and returned to Palestine. Even after his high priesthood came to an end he exercised a despotic authority because of his wealth and his friendship with the Romans. He was finally murdered by the *sicarii* as a friend of the Romans at the beginning of the Jewish war (A.D. 66 or 67). He is mentioned twice in the NT. In Ac 23^{1-5} he plays an active role in the trial of Paul before the Sanhedrin. In Ac 24^{1} he is said to have gone down to Caesarea along with others to accuse Paul before Felix. **4.** 1 Es 9^{43} (AV, RV); see ANAIAH, **1**. **5.** 1 Es 5^{16} (AV); see ANNIAS. **6.** 1 Es 9^{21} (AV, RV); see HANANI, **4**.
W. R. S.

ANANIEL.—One of the ancestors of Tobit (To 1^{1}).

ANASIB.—A family that returned with Zerubbabel, 1 Es 5^{24} (AV, RV **Sanasib**).

ANATH.—The father of Shamgar, one of the minor Judges, Jg 3^{31} 5^{6}. The name is that of a goddess of war worshipped at Ugarit (see RAS SHAMRA), on whom cf Gordon, *The Loves and Wars of Anat* (1943); in the Elephantine Papyri (q.v.) we find reference to **Anath-yahu** in the Jewish Temple. On this goddess cf also Albright, *AJSL* xli, 73 ff.

ANATHEMA.—See BAN.

ANATHOTH.—**1.** A Levitical city in Benjamin, Jos 21^{18}; to it Abiathar went when dismissed by Solomon (1 K 2^{26}), and it was the home of Jeremiah (Jer 1^{1} $11^{21, 23}$); after the Exile it was reoccupied, Ezr 2^{23}, Neh 7^{27}; modern *Râs el-Kharrûbeh*, near *'Anâta*. The name is derived from that of the Semitic goddess **Anath** (see ANATH). **2.** A Benjamite, son of Becher, 1 Ch 7^{8}. **3.** One of those who sealed the covenant, Neh 10^{19}.

ANCESTOR WORSHIP.—The question of the existence of a cult of the ancestors among the ancient Israelites is bound up with the interpretation of their burial and mourning customs. In the first place it must be recognized that the early Hebrew attitude towards the dead is ambivalent, and in the second place it is clear that as the uniqueness of Yahweh became more sharply emphasized through the work of the 8th and 7th cent. prophets, the conception of the relation between the dead and the living underwent a change.

On the one hand, as Pedersen has said (*Israel*, ii, 486), 'The early Israelite relation to the dead shows that in older times there was no gulf between the divine and the human.' The ancestors were thought of as still part of the collective personality which was Israel; they continued to be the source of the vitality of the community and of the *b^{e}rākhāh* upon which its life and prosperity depended. The graves of the ancestors were sacred places, and there is some evidence that cultic rites may have been connected with the dead, *e.g.* in Dt 26^{14} the bringer of tithes has to declare, 'I have not offered any of it to the dead.' Moreover, although the mourning customs of rending the clothes, shaving the head, and gashing the face, may have had their origin in the fear of the dead and in the attempt to prevent the dead from recognizing the living and harming them, it is possible that at a later time such customs may have been intended to express sorrow and the wish to honour the dead. Thus, as Pedersen says, 'the mourning rites acquired the character of a cult; the deceased was honoured by them' (op. cit. 484). This tendency is most clearly seen in the ritual burning for the kings of Judah (Jer 34^{5}, 2 Ch 16^{14} 21^{19}), which it is difficult to regard as unconnected with the sacral character of the kingship in Israel.

On the other hand, there are aspects of the Israelite attitude towards death and the dead which point in a different direction: (*a*) Everything connected with death and the dead is unclean. In Nu 19 we have the torah o

uncleanness, where it is laid down that any kind of contact with a dead person caused ritual uncleanness. Even open vessels in the tent where death had occurred became unclean. The most efficacious method of defiling the places where idolatrous worship had been practised was by scattering dead men's bones upon them (2 K 23[14] *et al.*). By Ezekiel's time even the nearness of the royal tombs to the Temple in Jerusalem was to be regarded as defiling (Ezk 43[7]). (*b*) The grave, which is identified in Hebrew thought with Sheol, the dwelling place of the dead, lies beyond the domain of Yahweh; 'for in death there is no remembrance of thee; in Sheol who can give thee praise?' (Ps 6[5]); 'for Sheol cannot thank thee, those who go down to the pit cannot hope for thy faithfulness' (Is 38[18]). The state of the dead in Sheol is a pale shadow of their life on earth; they are 'shades' (Heb. *rᵉphā'îm*, 'powerless ones'); they cannot, like the Babylonian *etimmu*, harm the living.

But there is a third aspect of the relation between the living and the dead in Israel, namely the practice, old and deep-rooted, of resorting to the dead in times of crisis for counsel. As evidence for the existence of this practice we have the classic case of Saul and the witch of Endor (1 S 28[8ff]), the stringent prohibitions of the practice in Lv 19[26] and Dt 18[11], where it is stated that it was a Canaanite custom; and the passage in Is 8[19], where the people are represented as saying that in a time of crisis it is necessary for them to 'consult the dead on behalf of the living,' and use the term *'ᵉlōhîm* to describe the dead. That the practice had survived as late as the 8th cent. shows how deep-seated it was; but the prohibitions in Leviticus and Deuteronomy, and the prophetic comment in Is 8, show also that such practices were coming to be regarded as an invasion of the realm which belonged to Yahweh alone, 'the secret things belong unto the Lord our God' (Dt 29[29]).

One more feature of early Israelite practice has been appealed to as evidence of the existence of the cult of the ancestors, namely the existence of sacred objects called *tᵉrāphîm*. We are told that when Jacob fled from Laban, Rachel stole her father's *tᵉrāphîm*, and Laban refers to them as his 'gods' (Gn 31[30, 34]); they are mentioned among the sacred objects in Micah's household shrine (Jg 17[5]); and in Ho 3[4] the prophet says that Israel is to be deprived of 'ephod and teraphim' for a long period of time. But we do not know what they were like, and apart from the fact that they were connected with the household cult, there is nothing to connect them with a cult of the ancestors.

From these various references it is possible to draw the following conclusions: (*a*) it is clear that when the Israelites came into Canaan, they found the inhabitants of the land practising a cult of the ancestors, and also that they adopted the practice themselves, possibly in connexion with the graves of the patriarchs and the kings of Judah; (*b*) the practice of consulting the dead, also borrowed from the Canaanites, although condemned by the prophets and the codes, cannot strictly be called ancestor-worship; (*c*) that, as the unique character of Yahweh came to dominate the religious outlook of Israel, the powers of the dead tended to recede into obscurity; (*d*) as the holiness of Yahweh became more strongly realized, the idea of the uncleanness of death and the dead replaced the idea of honour done to the dead in the old Canaanite mourning customs, although those customs probably had their origin, during the animistic stage of Canaanite religion, in the fear of the dead. S. H. He.

ANCHOR.—See Ships and Boats, 2 (2).

ANCIENT OF DAYS occurs three times in Daniel (7[9, 13, 22]) as a title of God in His capacity as Judge of the world. In the Vision of the Great Assizes He is depicted as a very old and majestic figure, with white hair and white raiment, seated on a fiery throne, and having the books of the records of man opened before Him. The picture is no doubt suggested by the contrast between the Eternal God (Ps 55[19]) and the new-fangled deities which were from time to time introduced (Jg 5[8], Dt 32[17]), rather than, as Hippolytus (quoted by Behrmann, *Das Buch Daniel*, p. 46) suggests, by the idea of God as making the ages old without turning old Himself. In the troublous times which are represented by the Book of Daniel, it was at once a comfort and a warning to remember that above the fleeting phases of life there sat One who remained eternally the same (Ps 90[1–3] 102[24–27]). At the same time it is worth remembering that the phrase in itself has no mystical significance, but, by an idiom common in Hebrew as in other languages, is merely a paraphrase for 'an old man.' H. C. O. L.

ANDREW.—One of the twelve apostles. According to Jn 1[40–44] he was a brother of Simon Peter and a native of Bethsaida. The evangelist further relates that Andrew had been a disciple of John the Baptist before he became a follower of Jesus (Jn 1[35–40]). The Synoptic Gospels likewise indicate that Andrew was the brother of Simon Peter (Mt 10[2], Lk 6[14]), and add that they lived together, apparently in Capernaum (Mk 1[29]), and were fishermen on the sea of Galilee (Mt 4[18], Mk 1[16]). In one place Andrew is linked with the inner circle of disciples made up of Peter, James, and John (Mk 13[3]). According to Eusebius he evangelized Scythia, and later tradition adds that he was crucified at Patrae.

Andrew is a good Greek name, but is used of a Jew in Dio Cassius lxviii. 32. 2. W. R. S.

ANDRONICUS.—**1.** An officer of Antiochus Epiphanes who was instrumental in the removal of the legitimate high priest in Jerusalem shortly before the war of the Maccabees (2 Mac 4[30–38]). **2.** An officer of Antiochus Epiphanes mentioned in 2 Mac 5[23] usually distinguished from the Andronicus mentioned above. **3.** A Christian greeted by Paul in Ro 16[7]. From this passage we learn that he was a 'kinsman' of Paul, *i.e.* a fellow-countryman (cf Ro 9[3] 16[11, 21]), that he had suffered imprisonment at some unknown time with Paul, that Paul regarded him as an 'apostle,' and that he had been a Christian before Paul's own conversion. It has been suggested, therefore, that Andronicus along with Junias played a significant role in the establishment of the Roman church (G. A. Barton) or of the Ephesian church (B. W. Bacon). W. R. S.

ANEM.—A Levitical city of Issachar, mentioned with Ramoth, 1 Ch 6[73]. The parallel list in Jos 21[29] has **En-gannim** (q.v.). Perhaps modern *Khirbet 'Anîn*.

ANER.—**1.** One of the three Amorite chieftains, the others being Mamre and Eshcol, who were in covenant with Abraham, Gn 14[13f]. As Mamre is an old name for Hebron (Gn 23[19]), and Eshcol is the name of a valley near Hebron (Nu 13[23]), it is natural to suppose that Aner was also the name of a locality that gave its name to a clan. **2.** A Levitical city of Manasseh, W. of Jordan, 1 Ch 6[70]; site unknown.

ANETHOTHITE, 2 S 23[27] (AV), **ANETOTHITE**, 1 Ch 27[12] (AV) = man of **Anathoth** (q.v.).

ANGEL OF THE LORD (YAHWEH), also called 'Angel of God.'—He plays the leading role among the angels, both in heaven (*e.g.* Zec 3[1ff]) and on earth (*e.g.* Jg 6[11ff]), as Yahweh's personal representative. Cf Is 63[9], EV 'the angel of his presence,' or, with due recognition of Hebrew idiom, 'his personal messenger' (unless we should follow LXX and render by 'No envoy or messenger but he himself saved them'). He frequently appears, sometimes in seemingly human form, as the envoy through whom Yahweh communicates with mankind (*e.g.* Gn 16[7–13] 22[11ff], Ex 3[2], Nu 22[22ff], Jg 6[11ff] 13[3ff], 2 K 1[3, 15]) and keeps himself informed of conditions upon the earth (Zec 1[11f]). He also has what may be called civil and military responsibilities, for it is his task, not only to pronounce the Divine judgment (Zec 3[1ff]: cf 2 S 14[17] 19[27]) and, when necessary, inflict suitable punishment (2 S 24[16]: cf Nu 22[22ff]), but also to defend the faithful (2 K 19[35], Ps 34[7] 35[5f]). In fact his powers are so wide that, from first to last, he is virtually indistinguishable from Yahweh (*e.g.* Gn 16[7–13], Zec 3[1ff]); and

to see him is thought to be as dangerous as seeing Yahweh himself (*e.g.* Jg 6^{22f} 13^{21f}). The way in which he thus figures in the OT, *i.e.* at one moment identified with Yahweh and, at another moment, treated as quite distinct (*e.g.* Gn 16^{7-13} 22^{11f}, Jg 6^{11ff}, Zec 3^{1ff}: cf Gn 48^{15f}, Hos 12^{4}, Zec 12^{8}) is not to be explained in terms of a *growing* emphasis upon the transcendence of Yahweh. It can be properly understood only by bearing in mind the Hebrew conception of 'corporate personality,' specifically the part played by any member of a social body, particularly one of its leading figures, as an 'extension' of the personality of its founder or head (cf A. R. Johnson, *The One and the Many in the Israelite Conception of God*, 2nd edit. [1961], pp. 28 ff). A. R. J.

ANGELS.—Throughout the Near East, from comparatively ancient times, there was belief in the existence of beings, inferior in power and dignity to the great gods, but nevertheless potencies whose activity might affect human life for good or ill. Some of these were local deities, some were associated with the great forces of nature, others were less awesome powers whose activities might be concerned with the upper world, or the underworld, as well as with this world of man's habitation. At times these beings seemed benevolent, at others malevolent. Some groups, indeed, were thought of as generally benevolent, while others were in general malevolent. A great deal of the magic practised both in Egypt and in Mesopotamia was concerned with attracting the benevolence or avoiding the malevolence of these beings in the unseen world around men. We still preserve the distinction between angels and DEMONS (q.v.), the former generally benevolent and associated with the upper world, the latter generally malevolent and associated with the underworld.

Our word 'angel' derives from another ancient belief, namely, that the great gods commonly used these beings of lesser rank as agents, envoys, and messengers. As human potentates extended the range of their power and influence by envoys and agents, so it was to be expected that in the unseen world, usually thought of as monarchically organized, the great powers would have a similar arrangement. Where henotheism, and later monotheism, emerged, such lesser deities and spirits as continued to survive in the religion were commonly thought of as attendants on, or holding some subordinate position to, the Supreme God, in a court where they had their ranks and grades, held only delegated authority, and functioned at the bidding of their Lord.

In the OT the common word for 'angel' is *mal'ākh*, and in the NT *angelos*. Both words mean 'messenger' and are used for messengers sent by human potentates as well as for messengers, celestial or human, sent by God—precisely as *mal'ak* in Ugaritic texts from Râs Shamra, and *angelos* in ancient Greek texts, may be used of messengers sent by kings as well as of those sent by the gods. In the OT these celestials are referred to as 'divine beings' (*'elōhîm*, Ps $8^{6\,(5)}$ $82^{1,\,6}$ 97 138^{1}), 'sons of divine beings' (*bᵉnê 'elōhîm*, Gn $6^{2,\,4}$, Job 1^{6} 2^{1} 38^{7}; *bᵉnê 'ēlîm*, Ps 29^{1} $89^{7\,(6)}$), 'mighty ones' (*'abbīrîm*, Ps 78^{25}), 'holy ones' or 'saints (*kᵉdhōshîm*, Job 5^{1}, Ps $89^{6\,(5)}$, Zec 14^{5}, Dn $4^{14\,(17)}$ 8^{13}). They are 'the host of heaven' (1 K 22^{19}), the 'host of the height' (Is 24^{21}), the 'host of Yahweh' (Jos $5^{14,\,15}$), who form a courtly assembly around God (1 K 22^{19-22}, Job 1^{6} 2^{1}, Ps $89^{7\,(6)}$) much as the *ilm*, the *bn ilm* and the *bn qds* formed an assembly around El in the Ugaritic texts. This assembly, though subject to God, who as 'Lord of Hosts' held supreme position, was not entirely submissive to Him, so that He had to preserve peace among them (Job 25^{2} 21^{22}, cf Is 24^{21}), and some who revolted against Him became the fallen angels (Gn 6^{2-4} with Jd ^{6}, 2 P 2^{4}, and cf Is 27^{1} $34^{4,\,5}$).

Certain classes of celestials were recognized, for we read of Watchers (*'îrîn*, Dn $4^{14\,(17)}$), Seraphim (Is $6^{2,\,6}$), Cherubim (Ps $18^{11\,(10)}$, Ezk 9^{3}). Perhaps rank was also recognized, for in Jos 5^{14} one calls himself the 'captain' (*śar*) of Yahweh's host, the same word used in Dn $10^{20,\,21}$ of Michael and the angel 'princes' of Greece and Persia. In particular there is one exalted figure, the 'angel of the Lord' (*mal'akh Yahweh*) who, though an angel messenger, is yet greater than any angel and at times indistinguishable from Yahweh Himself (Gn 16^{7-13} 21^{7} 31^{11-13}, Ex 3^{2-6}, Jg 2^{1-5}). Possibly he was thought of in early days as a theophany, but in later writings is certainly only an angel, though one with superior authority (Zec 1–6). It was after the Jewish people had come more closely into contact with other cultures that we find a particular development in their angelology. With a growing sense of the transcendence of God came a stress on the activities of these celestial attendants, creatures whom He had created (Neh 9^{6}) before the creation of the earth (Job $38^{6,\,7}$), who acted as His agents, envoys, and intermediaries. Their normal abode was heaven (Gn 28^{12}, 1 K 22^{19}, Job 2^{7}, Neh 9^{6}, and cf Dt 17^{3} where the 'host' may be the stars as celestial beings), but they came down freely to earth (Gn $32^{2\,(1)}$, Ex 14^{9} $23^{20,\,23}$, Job 1^{7}, Is 6^{6}, Zec 4^{1}, Dn $10^{10,\,11}$). Normally they are invisible beings of a spiritual and fiery nature (Ps 104^{4}, Jg 13^{20}, 2 K 6^{17} Dn 10^{6}), of superhuman power (Ps 103^{20}, Gn $19^{10,\,11}$, Jg $6^{20,\,21}$, Zec 12^{8}, Dn 10^{5ff}) and wisdom (2 S $14^{17,\,20}$, Dn 10^{21}), though they are by no means perfect (Job 4^{18}). When they are seen in vision, or come down to perform tasks on earth, they are in human form (Gn 19^{1ff}, Jos 5^{3}, Jg 6^{11}, Dn 8^{15}) and can be spoken of as men (Gn $18^{2,\,16,\,22}$ $32^{25\,(24)}$, Jg 13^{6ff}, Ezk $40^{3,\,4}$, Zec 1^{8}, Dn 3^{25} $10^{16,\,18}$), for they speak in human fashion (Jos 5^{15}, Jg 6^{12} $13^{3,\,11}$, 1 K 19^{5}, Zec $4^{1,\,5}$), stand or sit (Dn 8^{16}, Jg 6^{11}), walk about (Gn $32^{2\,(1)}$, Job 2^{2}, Zec $1^{10,\,11}$), eat (Gn 18^{8}), wear clothes (Ezk 9^{2}, Dn 10^{5}), brandish weapons (Nu 22^{23}, Jos 5^{13}, 1 Ch $21^{16,\,30}$, Ezk 9^{2}), and even ride horses (Zec 1^{8} 6^{1ff}, cf Rev 9^{16}).

Their functions are many. In heaven they worship God (Neh 9^{6}, Ps $103^{20,\,21}$ $29^{1,\,2}$ 97 148^{2}, Is 6^{3}) and stand ready to do His will (Ps 103^{20}, Is 45^{12}, 1 Ch 21^{27}). They may report to the heavenly court the doings of men on earth (Job 1^{6ff}, 2^{1ff}, Zec 1^{11}), but more particularly they are the messengers of God to men, bringing instruction (Nu 22^{35}, Jos 5^{14}, Jg 13^{12ff}, Job 33^{23}, Zec 1^{9}, Dn 8^{16} 9^{22}), transmitting revelation to the prophets (Dn 10^{11}, Ezk 40^{4}, Zec 4^{1-7}, 1 K 13^{18}, 2 K 1^{3}), and announcing coming events, *e.g.* the destruction of Sodom (Gn 19^{13}), the birth of Isaac (Gn 18^{10ff}), the birth of Samson (Jg 13^{3ff}). They accompany God as His attendants when He appears on earth (Dt 32^{2}, Job 38^{7}). They may be sent as God's guardians over a people (Ex 32^{34} 33^{2}, Nu 20^{16}), whence later we find angels designated as the patrons of different national groups (Dn $10^{13,\,20,\,21}$). Or they may be guardians over places, as over Bethel (Gn $31^{11,\,13}$), or Jerusalem (Zec 12^{8}), over individuals, *e.g.* Hagar (Gn 16^{7ff}, 21^{17ff}), Isaac (Gn 22^{11ff}), Jacob (Gn $48^{15,\,16}$), the three children (Dn 3^{28}), Elijah (1 K 19^{5ff}, 2 K 1^{15}), and over the righteous in general (Ps 91^{11} $34^{8\,(7)}$, Is 63^{9} and cf Job 5^{1}). They are sent to guide both communities (Ex 14^{19} $23^{20,\,23}$) and individuals (Gn $24^{7,\,40}$). They are very numerous (Dt 32^{2}, Job 25^{3} 33^{23}, Ps $68^{18\,(17)}$, Dn 7^{10}), and are normally good (1 S 29^{9}, 2 S $19^{28\,(27)}$). So awesome were they that men were inclined to offer them that worship which should be offered only to God (Jos 5^{14}, Zeph 1^{5}, Jer 8^{2} and Jer 4^{19} where the stars as angels are meant, cf Neh 9^{6}). They may also, however, be the agents of God's testing, as when Satan tested Job, or of His wrath, thwarting (Nu 22^{22-35}) or bringing chastisement on evil men, as on Sodom (Gn 19^{11ff}), on Egypt (Ps 78^{49}), on Meroz (Jg 5^{23}), on Israel (2 S $24^{16,\,17}$, 1 Ch 21^{12ff}), on the Assyrian host (2 K 19^{35}, 2 Ch 32^{21}), or on evil doers in general (Ps $35^{5,\,6}$).

As the celestial agents who execute God's judgments among men are acting against men and not for them, *i.e.* are seemingly maleficent rather than beneficent, they are referred to as 'evil angels' (Ps 78^{49}, cf Job 33^{22}). So the troubling spirit which visited Saul is called an evil spirit from the Lord (1 S 16^{14-23}), and the spirit with the message persuading Ahab to go up to Ramoth-Gilead is 'a lying spirit in the mouth of all his prophets' (1 K 22^{20-23}). Similarly Satan, who in Job 1^{6} 2^{1} is one

of the *bᵉnê ʾᵉlōhîm*, because he is hostile to such pious servants as Job and the high-priest Joshua (Zec $3^{1,2}$), came to be regarded as an instigator to evil (1 Ch 21^{1} compared with 2 S 24^{1}), and was later identified with the serpent of the Eden story (Wis 2^{24}, Rev 12^{9}). Here a moral distinction has developed between powers working for good and those working for evil. This fitted in with popular memory of ancient cosmic myths about the dark forces of chaos which at creation fought against the introduction of order, some reminiscences of which are found in the OT (*e.g.* Ps 74^{12ff} $89^{9\ (8)}$, Job 26^{12}, Is $51^{9,10}$), and the already mentioned belief that the celestial powers are at times not completely submissive to God. In Dn 10^{20} there is reference to strife among the celestial powers, among whom God has to keep peace (Job 25^{2}). That He was not completely successful is suggested by the story in Gn 6^{2-4}. These unsubmissive powers came to be regarded as concerned with wickedness on earth, and ultimately God will have to deal with all such recalcitrant powers (Is 27^{1} $24^{21,22}$, Ps 82^{1} and cf Jd 6).

It has often been noted that there is a development of thought in the OT with regard to angels. In the earlier passages they are rarely called angels, and though always in attendance on God are limited in their relations with mankind, and no stress is laid on their moral character. Even Satan, though an ' adversary ', is still subject to the will of God. It was as the sense of God's uniqueness became clearer that there was on the one hand a tendency to emphasize the position of angels as intermediaries between Him and mankind, so that things formerly attributed to His action were attributed to the action of angels (cf 2 S 24^{11ff} with 1 Ch 21^{18}), or on the other hand to ignore, if not deny, the existence of such intermediaries. The writer of the priestly document P does not mention angels, and in such books as Proverbs, Esther, Ecclesiastes they receive little or no attention. Ezekiel would seem to belong to the period of transition. In some places the Lord speaks directly to him (44^{2}), but in others it is an angel who instructs him (40^{4}). Ezekiel does not use the word ' angel,' generally referring to them as men, but on the other hand he names various groups of celestials, the Seraphim, Cherubim, Ōphannim (wheels), Ḥayyôth (living beings), and a certain Spirit (2^{2} 3^{12} $9^{5,24}$). In still later books such as Daniel and Zechariah we find even fuller development, and certain important angelic beings are given personal names, *e.g.* Michael and Gabriel.

In the Intertestamental period as reflected in the Apocrypha and some Pseudepigrapha, we find again the two tendencies. Such books as Ecclesiasticus, Wisdom, Judith, Maccabees, Psalms of Solomon rarely mention angels whereas in Tobit, Jubilees, Fourth Ezra, the Testaments, and the Enoch literature, there is a considerable development of angelology. This tallies with early statements that some groups, such as the Sadducees, were sceptical about the activity of angels (Ac 23^{8}), while other groups, such as the Essenes, made much of them (Jos. *BJ* II. viii. 7 [142]). They figure prominently in the Dead Sea Scrolls of the Qumrân community. The angelology of this period continues that of the later books of the OT but develops it. Angels were thought of as very numerous (Enoch 40^{1} 60^{1} 71^{8}, Apoc. Bar 48^{10} 56^{14} 59^{11}, Jub 2^{18}). They still are busy praising and blessing the Lord (To 8^{15}, Enoch 61^{7}, Three 36), and are the instruments of Divine aid to men (2 Mac 11^{6} 15^{23}, 3 Mac 6^{18}, Bel 34–39, To 3^{17}, Jub 4^{21}), guiding them as Raphael guides Tobit, guarding individuals (Jub 35^{17}, 2 Mac $10^{29,30}$), places (4 Mac 4^{10}) and nations (Bar 6^{7}, Jub 15^{31}), and giving instruction (Jub 4^{15} 32^{21}, 4 Ezr 5^{31ff}, 7^{1ff}, To 6^{3ff} 12^{6ff}). But they are also the instruments of punishment (Enoch 53^{3-5} 56^{1} 62^{11} 63^{1}, Test. Levi 32). In this period the ' sons of God ' in the story of Gn 6^{2-4} have become clearly identified with a group of fallen angels (Enoch 6–15, Jub 5^{1} 7^{21}, Apoc. Bar 56^{11-13}), whose chief is Satan (=Belial=Mastema), so that the good angels (To 5^{21}, 2 Mac 11^{6}) are carefully distinguished from the demons (To 6^{14}, Jub 10^{3}, Enoch 99^{7}). The angelic organization also now appears more clearly. We find reference to **archangels** (Test. Levi $3^{5(a)}$; cf To 12^{15}, Enoch 20^{1-8} 40^{2-10})—Raphael, Uriel, and others are named along with Michael and Gabriel; there is a clearer distinction of classes of angels (Enoch 61^{10} 71^{7}), and a definite assignment of angels to have charge of the phenomena of nature (Jub 2^{2}, Enoch 60^{14-21}, 4 Ezr 8^{22}); and we find angels regarded as intercessors with God for mankind (Enoch 9^{3} 15^{2} 40^{6} 99^{3} 104^{1}, To $12^{12,15}$, Test. Dan 6^{2}, Test. Levi 5^{6}).

The NT teaching concerning angels is not very different from this. It also marks clearly the distinction between good and evil angels (Rev 12^{7}, cf Mt 25^{41}). The good angels, who are fiery spiritual beings (He 17), dwell normally in heaven, where they glorify God and attend on Him (Mt 18^{10}, Lk 1^{19} 2^{13-15} $12^{8,9}$, Jn 1^{51}, Rev 5^{11}), and form the armies of the Most High (Rev 7^{12} 19^{14}). They come down to earth (Mt 28^{2}, Lk 2^{9}, Ac 10^{3}, Rev 18^{1}) as instruments of divine aid to Jesus (Mt 4^{11} 26^{53}, Lk 22^{43}), or to men in general (Jn 5^{4}, Ac 5^{19} 12^{7ff}, He 1^{14}). They come also as messengers from God communicating to men (Mt 1^{20} 2^{13} 28^{5ff}, Lk $1^{11,28}$ 2^{10ff}, Ac 8^{26ff} $10^{3-7,30-32}$ 27^{23-26}, Rev 21^{9}), and as such are concerned with revelation (Rev 1^{1} 14^{6} 22^{16}, Ac 7^{53}, Gal 1^{8}, He 2^{2}). They are men's guardians (Mt 18^{10}, Ac 12^{15}), are interested in men's salvation (Lk 15^{10}, cf 1 Ti 5^{21}), present their prayers before God (Rev $8^{3,4}$), and at death convey their souls to rest (Lk 16^{22}). They may also be the instruments of chastisement (Mt $13^{49,50}$, Rev 9^{15} 16^{1} 21^{9}). When they appear in dream or on earth they usually appear in human form, even though more radiant than ordinary human beings (Mt 28^{3}, Lk 2^{9}, Ac 1^{10} 10^{30}, Rev 18^{1}). They wear garments (Lk 24^{4}, Jn 20^{12}, Rev 19^{14}), and speak like human persons (Mt 1^{20} $2^{19,20}$, Jn 12^{29}, Rev 7^{2}), and are of limited knowledge (Mt 24^{36}, Mk 13^{32}). There are ranks and grades amongst them, for we read of archangels (Jd 9, 1 Th 4^{16}), and of celestial groups called dominions, principalities, and powers (Col 1^{16}, Eph 1^{21} 3^{10}, 1 P 3^{22}), whom some were inclined to worship (Col 2^{18}, cf Rev 19^{10} $22^{8,9}$). There is an angel set over the bottomless pit (Rev 9^{11}), and angels are in charge of the phenomena of nature (Rev 7^{1} 14^{18} 16^{5} 19^{17}). In the events of the Last Day angels will have an important share (Matt 13^{39ff} 16^{27} 24^{31}, 2 Th 1^{7-10}). On that Day there will be a judgment also on the fallen angels (2 P 2^{4} Jd 6) with their principalities and powers (1 Co 15^{24} Eph 6^{12}), and their ruler Satan (Rev 12^{7} $20^{1-3,10}$). A. J.

ANGELS OF THE SEVEN CHURCHES.—The author of Revelation views each of the churches named in chs. 2 and 3 as having its angelic guardian: Ephesus, Smyrna, Pergamum, Sardis, Philadelphia, Thyatira, and Laodicea. In viewing these seven angels as seven stars, he is resorting to a view common in his day: the stars in their heavenly wonder were esteemed as gods or living beings, and out of this awesome feeling arose star-worship. Jewish cosmology personalized the stars (Jg 5^{20}, Job 38^{7}, Enoch 21^{6}). The personalized stars were thus akin to angels.

Several views have been held regarding the angels of the seven churches: **1.** Each angel is a bishop or presbyter of a church who acts as a messenger of God (cf Hag 1^{13}, Mal 2^{7} 3^{1}). But the Greek word for angel or messenger (*angelos*) has no such use elsewhere in the NT. It is doubtful if each church at the time of Revelation had its particular monarchical bishop with responsibilites as assigned to an angel. **2.** Each angel is a heavenly representative to act as a guardian of a church. In Persian religion each person had his guardian angel (*fravashi*); Tobit on his journey to Ragae is protected by his guardian angel Raphael (To 5^{4-21}); Peter's guardian angel will descend from heaven on the last days (Ascension of Isaiah 3^{15}, written about the same time as Revelation); the success or failure of a nation agrees with that of a nation's guardian angel. **3.** Each angel is a representative sent by a church from Asia Minor to John on the Isle of Patmos. This view, however, has little weight. **4.** Each angel is a personification of a church, in which the life of the church finds

embodiment. In apocalyptic thought angels were active in the waters, the abyss, the fire, the winds (cf Rev 9[11] 16[5] 7[1] 14[18]); each of the elements symbolized the life or personality of an angel.

The most probable view is one which sees a close correlation between each church and its angel, both the angel and the church sharing equally in the life of the community. In an age which held to the apocalyptic views of angelology, an angel was a special protector of each person or nation (or in this case, a church). In the seven churches of Revelation each angel is an immanent guardian sharing in the life of the church, not a transcendent heavenly creature. T. S. K.

ANGER.—In OT 'anger' represents about a dozen Hebrew roots, which occur as nouns, verbs (once 'angered' is used transitively, Ps 106[32]), and adjectives. By far the most frequent words are *'ānaph* (literally 'to snort') and its derivative noun *'aph*, which is used of the anger both of men (Gn 27[45] 30[2], Ex 11[8] 32[9], etc.) and God (Ex 4[14] 32[22], Ps 6[1] 7[6], etc.). In NT 'anger' is of much less frequent occurrence, and represents only two roots: (1) the noun *orgē* (which, however, is usually translated 'wrath'), the verb *orgizomai*, the adjective *orgilos* (only in Tit 1[7], RSV 'quick tempered'), and the transitive verb *parorgizō* (Ro 10[19], the only case of a transitive use of 'anger' in NT); (2) the verb *cholaō* (literally 'to be full of bile,' from *cholē*, 'bile'), used only in Jn 7[23] to express the bitter anger of 'the Jews' against Jesus. With regard to the distinction between *orgē* and the synonym *thymos*, it is to be noted that while *orgē* is very often translated 'wrath,' *thymos* is never translated 'anger,' and when the two words occur together, *thymos* in each case is 'wrath' (Ro 2[8], RSV) 'fury' (Eph 4[31], Col 3[8]) and *orgē* 'anger' (Eph 4[31], Col 3[8]) or 'wrath' (Ro 2[8] RSV). *Thymos* is the more violent word, denoting anger as a strong passion or emotion, while *orgē* points rather to a settled moral indignation. Thus *orgē* is used of the sorrowful anger of Jesus (Mk 3[5]); *thymos* of the rage of His enemies (Lk 4[28]; cf Ac 19[28]). And, outside of the Apocalypse, *thymos* is applied almost exclusively to the wrath of men (the only exception being Ro 2[8]) while *orgē* in the great majority of cases (Mt 3[7], Jn 3[36], Ro 1[18], etc.) denotes the righteous indignation of God. J. C. L.

ANGER (WRATH) OF GOD.—It might seem that the idea of the Divine anger, manifesting itself in judgments of destruction, belongs to an early and anthropomorphic stage of religion. Yet, on the whole, the Biblical conception will be found consistent and profoundly ethical. God is *holy*—a term which seems to unite all the unapproachable perfections of Deity, especially His majesty and awful purity. He is the 'Holy One of Israel,' in covenant relation with a nation to whom He has revealed Himself as holy, and whom He will fashion with slow redemptive purpose into 'a holy people.' Moreover, God is *righteous*, a moral governor and lawgiver, demanding obedience and punishing transgression of His commands. The Divine holiness is not an element in an abstract conception of Deity: it is not a passive perfection, but an active attribute of a self-revealing and redeeming God. It follows that one side of this activity is necessarily a reaction against, a repudiation of, what is unholy and unrighteous in His creatures. This disposition towards sin is the anger or wrath of God. In the history of Israel it appears as a terrible factor in the discipline of the nation to righteousness: the ungrateful, the rebellious, and especially the idolatrous, are destroyed by fire and sword, pestilence and famine (Ps 78, Dt 32[15–43]). So 'jealous' is God for His holiness, that even accidental profanation of its symbol, the Ark, is visited by extreme penalty (1 S 6[19, 20], 2 S 6[7]). But the anger of the Lord, though fierce, is also just: it is 'provoked' by moral causes and for moral ends, and is averted by penitence and moral acquiescence in the righteousness of His judgments (Ex 32, Lv 10[6], Nu 25[11], Dt 13[17]). Psalmist and Prophet dwell upon the subordination of the Divine anger to the Divine mercy. God is 'slow to anger' (Ps 103[8] 145[8], Jl 2[13], Jon 4[2], Nah 1[3]), and His anger passes away (Ps 30[5], Is 12[1], Jer 3[12], Mic 7[19]).

Yet the wrath of God remains an essential element of His revelation through the prophets, a real Divine attribute, complementary, not antithetic to the Divine mercy (Is 1[18–20] 5[25] 42[25] 54[8]). In the NT, although the stress has shifted to the love of God revealed to the world in Jesus Christ, the anger of God still holds place. The teaching of Jesus, while refusing to see in all physical ills the Divine displeasure against sin (Lk 13[1–5], Jn 9[3]), contains impressive warning of the terrible reality of God's judgments (Lk 13[3–5], Mt 25[30, 41], Lk 12[5]). In St. Paul's writings this conception of judgment, held in reserve against unrepentant sin, is expressed in the phrase 'the wrath of God,' or, more simply, 'the wrath' (Ro 1[18], Eph 5[6], Col 3[6], Ro 2[8] 5[9]). There is a coming 'day of wrath' (Ro 2[5]; cf Mt 3[7]); sinful man unredeemed by Christ is necessarily a 'vessel of wrath,' a 'child of wrath' (Ro 9[22], Eph 2[3]).

It is true that the NT references to God's anger are mainly eschatological and contain figurative elements (see especially Rev 6[16] 'the wrath of the Lamb,' 11[18] 14[10] 16[19] 19[15]). But for the significance of the Divine wrath as an ethical necessity in God, though His fundamental attribute is love, it may be noted that (1) the writer through whom the revelation of the Divine love attains its culminating expression ('God *is* love,' 1 Jn 4[8]) declares also of him that obeys not the Son, 'the wrath of God rests upon him' (Jn 3[36]). (2) The Epistle which shows how in Christ the aloofness and terror of Israel's worship are done away in favour of full and free access to a 'throne of grace,' has, as the climax to its glowing description of Christian privilege, the solemn warning 'our God is a consuming fire' (He 4[16] 12[18–29]).

S. W. G.

ANGLE.—Is 19[8], Hab 1[15] (AV, RV), where RSV has 'hook.' The same word in Job 41[1] is rendered 'hook' in AV, and 'fishhook' in RV, RSV.

ANIAM ('lament of people' or 'I am kinsman').—A Manassite, 1 Ch 7[19].

ANIM.—A town of Judah, in the mountains near Eshtemoh, Jos 15[50]; possibly modern *Khirbet Ghuwein et-Taḥtā*.

ANISE (RV, RSV 'dill,' Mt 23[23]) is the familiar plant *Anethum graveolens*, one of the Umbelliferae. It is indigenous in Palestine, and is extensively used both in cooking and in the form of 'dill water' as a domestic remedy for flatulence. It is expressly stated in Jewish writers that the dill was subject to tithe (*Maaseroth* 4[5]).

E. W. G. M.

ANKLE-CHAINS, ANKLETS.—See ORNAMENTS, 4.

ANNA (the Greek form of Hebrew *Hannah*, which means 'grace').—The name of an aged prophetess (Lk 2[36–38]), one of the godly remnant in Israel who in the dark days which preceded the Messiah's advent were looking for the dayspring from on high and waiting for the consolation of Israel. She was the daughter of Phanuel, and belonged to the ancient tribe of Asher, whose women were celebrated for their beauty, which fitted them for wedding with high priests and kings. She had attained the age of eighty-four (see RSV). She had given herself to a life of devotion, frequenting the Temple and 'worshiping with fasting and prayer night and day' (cf 1 Ti 5[5]). At the Presentation of the Infant Messiah (Lk 2[22–24]) she entered the sacred court, and, hearing Simeon's benediction and prophecy, took up the refrain of praise to God, and talked about the Holy Child to 'all who were looking for the redemption of Jerusalem.'

D. S.—F. C. G.

ANNAAS, 1 Es 5[23] (AV).—See SENAAH.

ANNAN.—Father of one who agreed to put away his foreign wife, 1 Es 9[32] (AV, RV Annas); perhaps the Harim of Ezr 10[31].

ANNAS.—1. High priest from A.D. 6 to 15. He is mentioned in three passages of the NT. In Lk 3[2] the

beginning of John the Baptist's ministry is dated 'in the high priesthood of Annas and Caiaphas.' In Ac 4^{6ff} Annas is introduced as playing a role in the trial of Peter and John. In Jn 18^{12-24} Jesus is brought to trial before him. In all these passages Annas appears as high priest (or as one of the high priests). In actual fact Caiaphas was sole high priest from A.D. 18 to 36 when these events took place. The confusion in the NT is usually explained as stemming from Annas' influence which continued long after the end of his high priesthood. The influence is attested among other things by the fact that five of his sons became high priests. John also asserts that Caiaphas was his son-in-law (Jn 18^{13}). The name Annas (or Hannas) is an abbreviated form of Hananus (=Hananiah) which is given as the name of this high priest in Josephus. **2.** Annas (or Hannas) appears in the Septuagint (1 Es 9^{32}=Ezr 10^{31}) for the Hebrew name Harim (RSV in 1 Es 9^{32}, **Annan**).

W. R. S.

ANNIAS.—The eponym of a family that returned with Zerubbabel, 1 Es 5^{16} (AV **Ananias**; RV **Annis**). Omitted in the lists in Ezr and Neh.

ANNIS, 1 Es 5^{16} (RV).—See ANNIAS.

ANNIUTH.—A Levite who expounded the Law, 1 Es 9^{48} (AV **Anus**; RV **Annus**); in Neh 8^{7} called **Bani** (q.v.).

ANNUNUS.—A Levite, 1 Es 8^{48} (AV, RV **Annuus**); not mentioned in Ezr 8^{19}.

ANNUS, 1 Es 9^{48} (RV).—See ANNIUTH.

ANNUUS, 1 Es 8^{48} (AV, RV).—See ANNUNUS.

ANOINTING, ANOINTED.—1. The Hebrews distinguished between anointing with oil in the sense of its application to the body in ordinary life (*sûkh*), and anointing by pouring sacred oil on the head as a rite of consecration (*māshaḥ*). As regards the former, olive oil, alone or mixed with perfumes, was largely used in the everyday toilet of the Hebrews, although among the poor its use would be reserved for special occasions (Ru 3^{3}). To abstain from anointing in this sense was one of the tokens of mourning (2 S 14^{2}), its resumption a sign that mourning was at an end (12^{20}). Honour was shown to a guest by anointing his head with oil (Ps 23^{5}, Lk 7^{46}), and still more by anointing his feet (Lk 7^{38}). For medicinal anointing see OIL.

2. Anointing as a religious rite was applied to both persons and things. **Kings** in particular were consecrated for their high office by having oil poured upon their heads. Though first met with in OT in the case of Saul (1 S 10^{1}, cf David, 2 S 2^{4} 5^{3}, Solomon, 1 K 1^{39}, etc.), similar rites were practised in Canaan and in other lands of the ancient world long before the Hebrew conquest. By the pouring of the consecrated oil upon the head (see 2 K 9^{3}), there was thought to be effected a transference to the person anointed of part of the essential holiness and virtue of the deity in whose name and by whose representative the rite was performed. By the Hebrews the rite was also believed to impart a special endowment of the spirit of Y^{w} (1 S 16^{13}, cf Is 61^{1}). Hence the sacrosanct character of the king as 'the Lord's anointed' (Hebrew *mᵉshîaḥ* [*Yahweh*] which became in Greek *messias* or, translated, *christos*—both 'Messiah' and 'Christ,' therefore signifying 'the anointed'). The application of this honorific title to kings alone in the oldest literature makes it probable that the similar consecration of the **priesthood** (Ex 29^{7} 40^{13-15}, Lv 8^{1-12}) was a later extension of the rite. Only one exceptional instance is recorded of the anointing of a **prophet** (1 K 19^{16}). Whether the speaker in Is 61^{1} is the Servant of Yahweh or the prophet is disputed; the usage, however, is metaphorical.

In the case of inanimate objects, we find early mention of the primitive and widespread custom of anointing **sacred stones** (Gn 31^{13}, etc., see PILLAR), and in the Priests' Code the **tabernacle** and its furnishings were similarly consecrated (Ex 30^{25ff} 40^{9}). For 2 S 1^{21} see WAR. See also MARY, No. **2.**

A. R. S. K.—J. Br.

ANON.—A contraction for 'in one (moment),' 'anon' means *at once*, as Mt 13^{20} 'he that received the seed into stony places, the same is he that heareth the word, and anon (RV 'straightway,' RSV 'immediately') with joy receiveth it.'

ANOS, 1 Es 9^{34} (AV, RV).—See VANIAH.

ANSWER.—An answer is (1) an apology or defence, as 2 Ti 4^{16} AV 'at my first answer (RV, RSV 'defence') no man stood by me'; so perhaps 1 P 3^{21} AV 'the answer (RV 'interrogation,' RSV 'appeal') of a good conscience'; (2) oracle, Divine response, as Ro 11^{4} AV, RV 'what saith the answer (RSV 'reply') of God?'

ANT.—Ants are mentioned only twice in the Bible, as a model of industry and requiring no overseer or ruler and, though having no strength, able to lay in a good store of food in the summer (Pr 6^{6-8} 30^{25}), presumably for use in winter. This practice has been disputed, on the two grounds that the ant is carnivorous and that it hibernates; these objections are partly true and partly false. All ants eat flesh, but they eat also many other things, *e.g.* more or less fruit, seeds and meal, cake and sweetmeats; they also abstract quantities of grain from threshing floors and granaries and put them away in their nests. Further, Arab peasants say that they feed on the grain during the season of non-production; that they begin by eating off the heads is not so much due to a conscious intention to prevent germination but rather because this is the softest part of the grain and the most accessible, not being protected by the silicious envelope. The stores of seeds collected by ants have been found so great that the Mishnah lays down rules regarding the ownership of them: if discovered in a field before reaping, they belong to the owner; if afterwards, they go all or in part to the poor. Ants also derive an important part of their sustenance from the sweet juice which aphides secrete and for which they keep flocks and herds of these creatures; they further collect the eggs and larvae of these aphides, keep them with their own during their long hibernation that they may be hatched in spring and again supply them with their favourite food. This behaviour affords 'a case of prudence unexampled in the animal kingdom.' That they are 'exceeding wise' is seen also in their nests, which are marvels of construction, some composed of chambers and galleries underground, others built as mounds or huts above ground; these are grouped in towns connected by surface-roads, sometimes arched over at places, and by subterranean tunnels. They also divide their labour suitably amongst themselves. Finally, ants make organized raids on other hives and seize their eggs, larvae and pupae, which they rear as slaves to do their work for them; and some 584 other species of insects are found in association with ants, serving them in various ways. These small creatures are exceedingly abundant all over Palestine, where they perform the functions of earth-worms in other countries, continually changing the surface of the soil by their operations.

E. W. G. M.—G. R. D.

ANTELOPE.—What the Hebrew *tᵉ'ô, tô'* denotes is uncertain; for the root is unknown and the word itself does not occur in the cognate languages. It is translated in the older versions (LXX, Aq., Symm., Theod., Vulg.) 'oryx,' *i.e.* a white antelope with straight pointed horns (*antelope leucoryx*, Tristram) found in the Belqâ and Ḥaurân and in Arabia. This is preferable to the wild 'ox' of the later versions (Targ., Onq., and Ps–Jn). It is mentioned only twice in the OT, in a list of clean animals (Dt 14^{5}) and in the comparison of Jerusalem's sons 'lying at the top of all the streets, like an antelope in a net' (Is 51^{20}).

G. R. D.

ANTHOTHIJAH.—A Benjamite, 1 Ch 8^{24} (AV **Antothijah**).

ANTICHRIST.—The great opponent and counterpart of Christ, by whom he is finally to be conquered. The word appears only in the NT (1 Jn 2^{18-22} 4^{3}, 2 Jn 7), where, when used in the plural, it describes those who oppose the true Christian message and display in the

present the spirit of the eschatological Antichrist. But the idea was present in Judaism and developed with the growth of the Messianic hope.

1. The origin of the conception.—While the precise term 'Antichrist' is lacking in Jewish literature, the idea of an opponent, who persecutes God's people and is ultimately to be conquered by the Messiah, is an integral part of that general hope, born in Prophetism, which developed into Messianism in the NT period. As in the case of so many elements of Messianism, the beginning of the 'opponent' idea may fairly be said to have been Dn 11[36] (cf also Zec 12–14), where the reference is to Antiochus IV.; but it would be a mistake to see in the Antichrist conception of the Johannine literature an unprecedented description of distinct personalities. There seems to have been rather a gradually developing anti-Messianic scheme, which at many points duplicated the developing Messianic hope. This general conception, which played an important role in early Christianity, was probably due to the synthesis of various factors, among which the following three deserve special mention.

(*a*) *The historical opponents of the Jews*, such as Antiochus IV., Pompey, and the Roman Empire in general (cf the rôle of Gog in Prophetic thought). These naturally aroused the most intense hatred on the part of important sections of the Jewish people. Their hostility was regarded as extending not only to the Jews as a nation, but, as heathen, to Yahweh Himself, and particularly to His plans for the Jewish people. This political hatred entered into the Antichrist expectation, just as the political hope of the Jews contributed to the Messianic programme. Both alike tended to grow transcendental.

(*b*) *The dualism of Babylonia and Persia, especially as it was expressed by the dragon*, between whom and the agents of righteousness there was to be a fight to the death. This dragon conception may with much probability be seen not only in the identification of the serpent of the Temptation with the devil, but also in the beast of the Johannine Apocalypse, the great opponent of the Christ, and in the sea monster of Rabbinism.

(*c*) *The Beliar* (or *Belial*) *myth*, which underlies NT thought (cf 2 Co 6[15]) as well as Jewish fears. The first reference to Beliar seems to have been in Jub 1[20], but the myth is not unlike that of the Babylonian *Tiamat*, queen of the abyss, who was conquered by Marduk. Subsequently he was identified with Satan, who was also identified with the dragon (cf Ascens. Is 4[3], Rev 12[10]). This identification was the first step towards the fully developed expectation in the Talmud of a conflict between God and the devil.

2. Synthesis of the elements.—These various elements, though independent in origin, possess so much in common that it was inevitable that they should be combined in the figure of the Satanic opponent whom the Christ would utterly destroy as a pre-condition of establishing His Kingdom of God. A study of the Book of Revelation, as well as of other NT writings (*e.g.* 2 Th 2[1–12], 2 Co 6[15], 1 Jn 2[18–22] 4[3], 2 Jn [7], Rev 11[4–13] 13[1–18] 17. 19[11–21], Mk 13[14–20]) will show that there was always present in the minds of the writers of the NT a superhuman figure, Satanic in power and character, who was to head the opposition both to the people of Christ and to the Christ Himself. This person is represented in *Assumption of Moses* (ch. 8), *Ascension of Isaiah* (ch. 4), as well as in other Jewish writings, as one who possessed the Satanic supremacy over the army of devils. He was not a general tendency, but a definite personality. As such it was easy to see his counterpart or incarnation in historical characters. Indeed, the entire anti-Messianic programme was employed to characterize historical situations. In the Dead Sea Scrolls, the wicked priest, as opposed to the teacher of righteousness, plays a part not unlike that of the eschatological Antichrist, whose action withholds the instauration of the Kingdom, *versus* Christ and His faithful. We must think similarly of the use of 'the man of lawlessness' of St. Paul (2 Th 2[3]; see MAN OF SIN) and the various opponents of Christ in the Apocalypse. Transcendental pictures and current eschatology set forth the Christian's fear on the one hand of the Roman Emperor or Empire as a persecuting power, and on the other of Jewish fanaticism. Just which historical persons were in the mind of the writers it is now impossible to say with accuracy, but Nero and Domitian are very likely. Belief in the return from death of the persecuting Emperor Nero seems to have been widely diffused throughout the Roman Empire in the latter part of the first Christian century (*Sib. Or.* iv. 119–150, v. 363 ff.). This expectation lies behind the figures of Rev 13, 16, and 17. He is apparently to return with the kings of Parthia, but he is also, in Rev 17[8–11], identified with the beast of the abyss (cf *Sib. Or.* v. 28–34). Similarly the legends developed around the figure of Simon Magus seem to have been widely diffused in Christian circles, and Simon Magus (q.v.) became the typical (Jewish) false prophet and magician who opposed Christianity.

In the Patristic period the eschatological aspects of the anti-Messianic hope were developed, but again as a mystical picture of historical conditions either existing or expected. In Ephraem Syrus the fall of the Roman Empire is attributed to Antichrist. He is also, by the early Church writers, sometimes identified with the false Jewish Messiah, who was to work miracles, rebuild the Temple, and establish a great empire with demons as his agents. Under the inspiration of the two Witnesses (Elijah and Enoch or, more probably, Moses) the Messianic revolt against the Antichrist was to begin—the Book of Revelation being interpreted literally at this point. The saints were to be exposed to the miseries that the book describes, but the Messiah was to slay Antichrist with the breath of His mouth, hold the Last Judgment, and establish the conditions of eternity.

Thus in Christian literature the fusion of those elements of the Antichrist idea which were present in Judaism and later Christianity is completed by the addition of the traits of the false prophet, and extended under the influence of the current polemic against Jewish Messianism. The figure of Antichrist, which is Satanic, Neronic, falsely prophetic, the enemy of God and His kingdom, moves out into theological history, to be identified by successive ages with nearly every great opponent of the Church and its doctrines, whether persecutor or heretic. See MAN OF SIN. S. M.—**M. Si.**

ANTILEBANON.—Jth 1[7] (AV, RV **Antilibanus**); see LEBANON.

ANTILIBANUS, Jth 1[7] (AV, RV).—See ANTILEBANON.

ANTIMONY.—Is 54[11] (RVm, RSV; AV, RV 'fair colours'), 1 Ch 29[2] (RSV; AV 'glistering stones,' RV 'stones for inlaid work'). See also EYE.

ANTIOCH (Syrian).—By his victory in the battle of Ipsus (301 B.C.), Seleucus Nicator (312–280 B.C.) secured the rule over most of Alexander the Great's Asiatic empire, which stretched from the Hellespont and the Mediterranean on the one side to the Jaxartes and Indus on the other. The Seleucid dynasty, which he founded, lasted for 247 years. He founded no fewer than thirty-seven cities, of which four are mentioned in the NT—(1) Antioch of Syria (Ac 11[19]), (2) Seleucia (Ac 13[4]), *i.e.* Seleucia Pieria, (3) Antioch of Pisidia (Ac 13[14] 14[21], 2 Ti 3[11]), and (4) Laodicea (Col 4[13–16], Rev 1[11] 3[14]). The most famous of the sixteen Antiochs, which he built and named after his father Antiochus, was Antioch on the Orontes in Syria. The spot was carefully chosen, and religious sanction given to it by the invention of a story that sacred birds had revealed the site while he watched their flight from a neighbouring eminence. It was politically of advantage that the seat of empire should be removed from Seleucia, near the present Baghdad, to a locality nearer the Mediterranean. The new city lay in the deep bend of the Levant, about 300 miles N. of Jerusalem. Though fourteen miles from the sea, the navigable river Orontes, on whose left bank it was built, united it with Seleucia Pieria and its splendid harbour. Connected thus by the main caravan roads

with the commerce of Babylon, Persia, and India, and with a seaport keeping it in touch with the great world to the west, Antioch speedily fell heir to that vast trade which had once been the monopoly of Tyre. Its seaport Seleucia was a great fortress, like Gibraltar or Sebastopol. Seleucus attracted to his new capital thousands of Jews, by offering them equal rights of citizenship with all the other inhabitants. The citizens were divided into eighteen wards, and each commune attended to its own municipal affairs.

His successor, Antiochus I., *Soter* (280–261 B.C.), introduced an abundant water supply into the city, so that every private house had its own pipe, and every public spot its graceful fountain. He further strove to render Antioch the intellectual rival of Alexandria, by inviting to his court scholars such as Aratus the astronomer, and by superintending the translation into Greek of learned works in foreign tongues. In this way the invaluable history of Babylon by Berosus, the Chaldaean priest was preserved for posterity.

The succession of wars which now broke out between the Seleucids and the Ptolemies is described in Dn 11. The fortunes of the war varied greatly. Under the next king but one, Seleucus II., *Callinicus* (246–225 B.C.), Ptolemy Euergetes captured Seleucia, installed an Egyptian garrison in it, and harried the Seleucid empire as far as Susiana and Bactria, carrying off to Egypt an immense spoil. Worsted on the field, Callinicus devoted himself to the embellishment of his royal city. As founded by Seleucus Nicator, Antioch had consisted of a single quarter. Antiochus I., *Soter*, had added a second, but Callinicus now included a third, by annexing to the city the island in the river and connecting it to the mainland by five bridges. In this new area the streets were all at right angles, and at the intersection of the two principal roads the way was spanned by a tetrapylon, a covered colonnade with four gates. The city was further adorned with costly temples, porticoes, and statues. But the most remarkable engineering feat begun in this reign was the excavation of the great dock at Seleucia, the building of the protecting moles, and the cutting of a canal inland through high masses of solid rock. The canal is successively a cutting and a tunnel, the parts open to the sky aggregating in all 1869 feet, in some places cut to the depth of 120 feet, while the portions excavated as tunnels (usually 24 feet high) amount in all to 395 feet.

With Antiochus III., *the Great* (223–187 B.C.), the fortunes of the city revived. He drove out the Egyptian garrison from Seleucia, ended the Ptolemaic sovereignty over Judaea, reduced all Palestine and nearly all Asia Minor to his sway, until his might was finally shattered by the Romans in the irretrievable defeat of Magnesia (190 B.C.). After the assassination of his son Seleucus IV., *Philopator* (187–175 B.C.), who was occupied mostly in repairing the financial losses his kingdom had sustained, Antiochus IV., *Epiphanes* (175–163 B.C.), succeeded to the throne. He promoted both Greek architecture and Greek culture. In his dreams Antioch was to be a metropolis second to none for beauty, and Greek art and Greek religion were to be the uniform rule throughout all his dominions. To the three quarters already existing he added a fourth, which earned for Antioch the title 'Tetrapolis.' Here he erected a Senate House, a temple to Jupiter Capitolinus on one of the eminences of Mount Silpius, and a strong citadel on another spur of the mountains that surround the city. From E. to W. of Antioch he laid out a splendid street with double colonnades, which ran for five miles in a straight line. In wet weather the populace could walk from end to end under cover. Trees, flowers, and fountains adorned the promenade; and poets sang of the beauty of the statue of Apollo and of the Nymphaeum which he erected near the river. To avert the anger of the gods during a season of pestilence, he ordered the sculptor Leios to hew Mount Silpius into one vast statue of Charon, the ferryman of Hades. It frowned over the city, and was named the Charonium. Epiphanes' policy of Hellenizing Judaea evoked the determined opposition of the Maccabees (q.v.). Succeeding rulers exercised only a very moderate influence over the fortunes of Palestine, and the palmy days of Antioch as a centre of political power were gone for ever.

The city was the scene of many a bloody conflict in the years of the later Seleucids, as usurper after usurper tried to wade through blood to the throne, and was shortly after overcome by some rival. In several of these struggles the Jews took part, and as the power of Antioch waned, the strength and practical independence of the Jewish Hasmonaean princes increased. In 83 B.C. all Syria passed into the hands of Tigranes, king of Armenia, who remained master of Antioch for fourteen years. When Tigranes was overwhelmed by the Romans, Pompey put an end to the Seleucid dynasty, and the line of Antiochene monarchs expired in 64 B.C. The strong *Pax Romana* gave new vigour to the city. Antioch was made a free city, and became the seat of the prefect and the capital of the Roman province of Syria. Mark Antony ordered the release of all the Jews in it enslaved during the recent disturbances, and the restoration of their property. As a reward for Antioch's fidelity to him, Julius Caesar built a splendid basilica, the *Caesareum*, and gave, besides, a new aqueduct, theatre, and public baths. Augustus, Agrippa, Herod the Great, Tiberius, and, later, Antoninus Pius, all greatly embellished the city, contributing many new and striking architectural features. The ancient walls were rebuilt to the height of 50–60 feet, with a thickness at the top of 8 feet, and surmounted by gigantic towers. The vast rampart was carried across ravines up the mountain slope to the very summit of the hills which overlook the city. Antioch seemed thus to be defended by a mountainous bulwark, seven miles in circuit. Earthquakes have in later ages demolished these walls, though some of the Roman castles are still standing.

When Christianity reached Antioch, it was a great city of over 500,000 inhabitants, called the 'Queen of the East,' the 'Third Metropolis of the Roman Empire.' In 'Antioch the Beautiful' there was to be found everything which Italian wealth, Greek aestheticism, and Oriental luxury could produce. The ancient writers, however, are unanimous in describing the cosmopolitan city as one of the most depraved in the world. Licentiousness, superstition, quackery, indecency, every fierce and base passion, were displayed by the populace; their skill in coining scurrilous verses was notorious, their sordid, fickle, turbulent, and insolent ways rendered the name of Antioch a byword. Their brilliance and energy, so praised by Cicero, were balanced by an incurable levity and shameless disregard for the principles of morality. So infamous was the grove of Daphne, five miles out of the city, filled with shrines to Apollo, Venus, Isis, etc., and crowded with theatres, baths, taverns, and dancing saloons, that soldiers detected there were punished and dismissed from the Imperial service. 'Daphnic morals' became a proverb. Juvenal could find no more forcible way of describing the pollutions of Rome than by saying, 'The Orontes has flowed in the Tiber.' In this Vanity Fair the Jews were resident in large numbers, yet they exerted little or no influence on the morals of the city. We hear in the NT of one Nicolas, a proselyte of Antioch (Ac 6^5). But after the death of St. Stephen, Christian fugitives from persecution fled as far north as Antioch, began to preach to the Greeks there (Ac 11^{19}), and a great number believed. So great was the work that Jerusalem Church sent Barnabas to assist, who, finding that more help was needed, sought out and brought Saul from Tarsus. There they continued a year, and built up a strong Church. Antioch had the honour of being the birthplace of (1) the name 'Christian' (Ac 11^{26}), and (2) of foreign missions. From the city Paul and Barnabas started on their first missionary journey (Ac 13^{1-4}), and to Antioch they returned at the end of the tour (Ac 14^{26}). The second journey was begun from and ended at Antioch (Ac 15^{25-41} 18^{22}); and the city was again the starting-point

of the third tour (Ac 18[23]). The Antiochene Church contributed liberally to the poor saints in Jerusalem, during the famine (Ac 11[27-30]). Here also the dispute regarding the circumcision of Gentile converts broke out (Ac 15[1-22]), and here Paul withstood Peter for his inconsistency (Gal 2[11-21]). A gate still bears the name of 'St. Paul's Gate.' It was from Antioch that Ignatius set out on his journey to martyrdom at Rome. The city claimed as its natives John Chrysostom, Ammianus Marcellinus, Evagrius, and Libanius. From A.D. 252–380 Antioch was the scene of ten Church Councils. The Patriarch of Antioch took precedence of those of Rome, Constantinople, Jerusalem, and Alexandria. Antioch was captured in A.D. 260 by Shapur of Persia; in A.D. 538 it was burned by Chosroes; rebuilt by Justinian, it again fell before the Saracens in A.D. 635. Nicephorus Phocas recovered it in A.D. 969, but in A.D. 1084 it fell to the Seljuk Turks. The first Crusaders retook it in 1098 after a celebrated siege, signalized by the 'invention of the Holy Lance'; but in 1268 it passed finally into the hands of the Turks. Earthquakes have added to the ruining hand of man. Those of 184 B.C., A.D. 37, 115, 457, and especially 526 (when 200,000 persons perished), 528, 1170, and 1872 have been the most disastrous. The once vast city still bears the name of *Antaki* (Turkish) or *Antakiyah* (Arabic). Its inhabitants have increased to nearly 40,000 in recent years. G. A. F. K.—E. G. K.

ANTIOCH (Pisidian).—The expression 'Antioch of Pisidia' or 'Antioch in Pisidia' is inexact as the town was not in Pisidia. Its official title was 'Antioch near Pisidia,' and as it existed for the sake of Pisidia, the adjective 'Pisidian' was sometimes loosely attached to it. It was actually in the ethnic district of Phrygia, and in the Roman province of Galatia (that region of it called Phrygia Galatica). Founded by the inhabitants of Magnesia, it was made a free town by the Romans, and a *colonia* was established there by the emperor Augustus to keep the barbarians of the neighbourhood in check. The municipal government became Roman and the official language Latin. St. Paul visited it at least three times (Ac 13[14] 14[21] 16[6]), and it is one of the churches addressed in the Epistle to the Galatians. A. So.

ANTIOCHIANS (2 Mac 4[9, 19]).—The efforts of Antiochus Epiphanes to spread Greek culture and Greek customs throughout his dominions were dilgently furthered by a section of the Jews. The leader of this Hellenizing party, Jason, brother of the high priest Onias III., offered a large sum of money to Antiochus to induce the king to allow him to 'enrol the men of Jerusalem as citizens of Antioch.' Antiochus acceded to the proposal, and shortly afterwards a party of 'Antiochians' from Jerusalem was sent by him with a contribution of money for the festival of Heracles at Tyre.

ANTIOCHIS (2 Mac 4[30]).—A concubine of Antiochus Epiphanes, who assigned to her the revenues of the two Cilician cities, Tarsus and Mallus.

ANTIOCHUS (1 Mac 12[16] 14[22]; cf Jos. *Ant.* XIII. v. 8 [169]).—The father of Numenius, who was one of the envoys sent (*c* 144 B.C.) by Jonathan the Maccabee to renew the covenant made by Judas with the Romans, and to enter into friendly relations with the Spartans.

ANTIOCHUS.—A name borne by a number of the kings of Syria subsequent to the period of Alexander the Great.

1. Antiochus I. (280–261 B.C.) was the son of Seleucus Nicator, the chiliarch under Perdiccas who was regent immediately after the death of Alexander. On the murder of his father he came into possession of practically the entire region of Asia Minor as far east as the provinces beyond Mesopotamia. The most important fact of his reign was his defeat of the Celts, who, after devastating Macedonia and Thrace, swarmed into Asia Minor and established a kingdom which was subsequently known as Galatia. The date and place of the victory are unknown, but it won him the name of *Sōtēr* ('Saviour'). His capital was Antioch in Syria, but he was never able to bring his vast empire into complete subjection. He was a friend of literature and art, and it is thought possible that under him a beginning was made in the Greek translation of the Pentateuch.

2. Antiochus II., *Theos* (261–246 B.C.).—Son of the foregoing, essentially a warrior, carrying on interminable struggles both with the free Greek cities of his own territory, to which he finally gave something like democratic rights, and with Ptolemy Philadelphus of Egypt. Under him, however, the Jews of Asia Minor gained many civic rights.

3. Antiochus III., *the Great.*—He ascended the throne when only 15 years of age, and he reigned from 223 to 187 B.C. Along with Antiochus I. and Antiochus II. he may be referred to in the early portions of Dn 11. His reign, like that of most of his contemporaries, was one of constant war, particularly with Egypt. In the course of these wars he gained possession of Palestine through the battle of Panion (198 B.C.), and established the Syrian administration over Judaea, although for a time he ruled the province jointly with Ptolemy Epiphanes of Egypt. Like Antiochus I., he was a great colonizer, and induced 2000 Jewish families to go from Mesopotamia into Lydia and Phrygia, thus laying the foundation for the influential Jewish Dispersion in those regions. So warlike a monarch could not fail to come into conflict sooner or later with Rome. He was defeated in the battle of Magnesia in 190 B.C., and three years later was killed, according to some authorities while plundering a temple at Elymais in Persia.

4. Antiochus IV., *Epiphanes* ('the Illustrious'; also nicknamed *Epimanes*, 'the Madman').—The son of the preceding, who had been sent as a hostage to Rome. In 175 B.C. he seized the Syrian throne, and began a series of conquests which bade fair to rival his father's. While in Egypt, however, he was ordered by the Romans to leave that country, and thus found himself forced to limit his energies to Syria. In the course of his conflict with Egypt he had become suspicious of Judaea, and determined to force that country into complete subjection to his will. His motives were probably more political than religious, but as a part of his programme he undertook to compel the Jews to worship heathen gods as well as, if not in place of, Yahweh. His plans were first put into active operation probably towards the end of 170 B.C., when he returned from Egypt, although the chronology at this point is very obscure and it may have been a couple of years later. He plundered the Temple of many of its treasures (1 Mac 1[21-24]). He also placed a garrison in the citadel of Jerusalem, and set about the complete Hellenizing of Judaea. Circumcision and the observance of the Sabbath were forbidden under penalty of death. Pagan sacrifices were ordered in every town in Judaea, and every month a search was made to discover whether any Jew possessed a copy of the Law or had circumcised his children. In December 168 B.C. a pagan altar, probably to Olympian Zeus (identified with *Baal Shamayim*; Zeus Shamayim was parodied as *shiḳḳûṣîm mᵉshōmēm*, the 'desolating sacrilege' of 1 Mac 1[54], Dn 9[27]), was erected on the altar of burnt-offering, and the entire Jewish worship seemed threatened with extinction. This probability was increased by the apostasy of the high priest.

This excess of zeal on the part of Antiochus led to the reaction which, under the Hasideans and Mattathias, the founder of the Maccabaean house, ultimately brought about the release of Judaea from Syrian control. The events of this period of persecution are related in detail—though with a large element of legend—in 2 Maccabees, and reference is to be found to them also in Dn 11[21-45]. Antiochus finally died on an expedition against the Parthians in 164 B.C. (For an account of the struggle of Mattathias and Judas against Antiochus, see MACCABEES).

5. Antiochus V., *Eupator.*—Son of the preceding; began to reign at the death of his father, when a mere boy of 9 (or 12) years. He was left by his father

under the control of Lysias, his chief representative in Palestine, and with him was present at the victory of Beth-zechariah, 163 B.C., when Judas Maccabaeus was defeated (1 Mac 6$^{32-47}$). The complete conquest of Judaea was prevented by the rise of the pretender Philip, who, however, was conquered. In the midst of their success, both young Antiochus and Lysias were assassinated by Demetrius I. (162 B.C.). Their death reacted favourably on the circumstances surrounding the rising Maccabaean house.

6. Antiochus VI.—Son of Alexander Balas (q.v.), Trypho, one of the generals of Alexander Balas, at first championed the cause of this boy after his father had been killed in Arabia. After a few months, however, he caused the assassination of Antiochus by the physicians of the court, and reigned in his stead (1 Mac 13^{31f}).

7. Antiochus VII., *Sidetes* (138–128 B.C.), the last of the energetic Seleucid monarchs, came to the throne during the imprisonment of Demetrius II. After defeating Trypho, he undertook to establish his sovereignty over the Jews. Simon partially won his favour by presents and by furnishing auxiliary troops, but at last refused to meet his excessive demands for permitting such independence as Judaea had come to enjoy under the weak predecessor of Antiochus. Thereupon Antiochus sent his generals into Judaea, but they were defeated by the sons of Simon (1 Mac 15, 16). He himself came during the first year of John Hyrcanus (135–134), and after devastating Judaea shut up Hyrcanus in Jerusalem. He was about to capture the city through starvation when he unexpectedly made terms with Hyrcanus, probably because of the intervention of the Romans. These terms laid very heavy demands upon the Jews, and included the destruction of the fortifications of the city. Until 129–128 B.C. Judaea was again subject to the Syrian kingdom, but at the end of that year Antiochus was killed in a campaign against the Parthians, and Hyrcanus was enabled to reassert his independence. See MACCABEES, 5. S. M.—F. C. G.

ANTIPAS.—1. See HEROD, No. 3.—**2.** A martyr of the church of Pergamum, mentioned only in Rev 2^{13}, unless some credit is to be given to the late accounts of his martyrdom. According to these, he was roasted to death in a brazen bowl in the days of Domitian. Cures of toothache were believed to be accomplished at his tomb.

ANTIPATER.—Son of Jason, one of two ambassadors sent by Jonathan to the Romans and to the Spartans to renew 'the friendship and the confederacy' (1 Mac 12^{16} 14^{22}).

ANTIPATRIS.—The place to which St. Paul was conducted in the night and from which he then was escorted to Caesarea (Ac 23^{31}). The town was founded by Herod the Great and named in honour of his father, Antipater. Josephus speaks of it as on the road from Lydda to Caesarea. It thus was at an important road intersection. It is held to be identical with *Râs el-'Ain* at the head of the stream called *el-'Aujeh*. E. G. K.

ANTONIA.—See CITADEL.

ANTOTHIJAH, 1 Ch 8^{24} (AV).—See ANTHOTHIJAH.

ANTOTHITE, 1 Ch 11^{28} 12^{3} (AV)=man of **Anathoth** (q.v.).

ANUB.—A man of Judah, 1 Ch 4^{8}.

ANUS, 1 Es 9^{48} (RV).—See ANNIUTH.

ANVIL.—See ARTS AND CRAFTS, 2.

APACE.—Means 'at a quick pace'; cf Ps 68^{12} 'did flee apace' (AV), 2 S 18^{25} 'he came apace' (AV, RV, RSV) Jer 48^{16} 'hastens apace' (RSV).

APAME.—Daughter of Bartacus, and concubine of Darius I. (1 Es 4^{29}).

APE.—Apes were imported from Ophir (q.v.) by Solomon, 1 K 10^{22}, 2 Ch 9^{21}. The Hebrew name for this animal, *kôph*, is probably from Sanskrit *kapi*, though not necessarily derived directly. The apes may have come from India, or from S. Arabia, or from Africa. No kind of monkey is indigenous in Palestine. In importing monkeys Solomon imitated the custom of Assyrian and Egyptian monarchs.

APELLES.—The name of a Christian who is greeted by St. Paul in Ro 16^{10}, and who is described as the 'approved in Christ.' It was the name borne by a distinguished tragic actor, and by members of the imperial household.

APHAEREMA, 1 Mac 11^{34} (RV).—See APHAIREMA.

APHAIREMA.—A district taken from Samaria and added to Judaea by Demetrius Soter (*Ant.* XIII. iv. 9 [127]), 1 Mac 11^{34} (AV **Apherema,** RV **Aphaerema**). See EPHRAIM, **1.**

APHARSACHITES.—See next article.

APHARSATHCHITES.—A colony of the Assyrians in Samaria, Ezr 4^{9} (AV, RV); probably the same as the Apharsachites, Ezr 5^{6} 6^{6} (AV, RV). Some scholars regard the word as an official title, rather than as a gentilic; so RSV, which renders 'governors.'

APHARSITES.—One of the colonies transported to Samaria by the Assyrians, Ezr 4^{9} (AV, RV). Some scholars hold them to be Persians, and so RSV; others find here an official title, 'secretaries.'

APHEK.—1. A Canaanite city in the plain of Sharon, Jos 12^{18}; the Philistines gathered here, 1 S 4^{1} 29^{1}; probably the same as **Antipatris** (q.v.) of Ac 23^{31}; probably modern *Râs el-'Ain*. **2.** A city of Asher, Jos 19^{30}; the tribe failed to take it, Jg 1^{31} (**Aphik**); probably modern *Tell Kurdâneh*. **3.** A city on the border between Canaanites and Amorites, Jos 13^{4}; possibly modern *Afqa*, E. of Byblos. **4.** The place where Ahab defeated Ben-hadad, 1 K 20$^{26, 30}$ (cf 2 K 13^{17}); possibly modern *Fiq*, E. of the Sea of Galilee.

APHEKAH.—A city of Judah, Jos 15^{53}; possibly modern *Khirbet Kana'an*, SW. of Hebron.

APHEREMA, 1 Mac 11^{34} (AV).—See APHAIREMA.

APHERRA.—One whose descendants returned with Zerubbabel, 1 Es 5^{34}; omitted in the parallel lists in Ezra and Nehemiah.

APHIAH.—One of Saul's ancestors, 1 S 9^{1}.

APHIK.—See APHEK, **2.**

APHRAH, Mic 1^{10} (AV).—See BETH-LE-APHRAH.

APHSES, 1 Ch 24^{15} (AV).—See HAPPIZZEZ.

APIS.—See MEMPHIS.

APOCALYPSE.—See REVELATION [BOOK OF].

APOCALYPTIC LITERATURE.—See PSEUDEPIGRAPHA.

APOCRYPHA.—The word 'Apocrypha' is of Greek derivation and signifies books that are 'hidden away.' From the point of view of those who approved of these books, they were 'hidden' or withdrawn from general use because they were deemed to contain mysterious or esoteric teaching, too profound to be communicated to any except the initiated. From another point of view, however, it was held that such books deserved to be 'hidden,' because they were spurious and/or heretical. Such books frequently bore, as their alleged authors, the names of notable personages in Hebrew history. These names were not sufficient, however, to carry the books over into the canonical collection of the Bible (see article CANON OF THE OLD TESTAMENT).

Traditionally there are fourteen or fifteen books of the Apocrypha. As regards literary type, they may be classified as follows:

1. *Historical*: First and Second Maccabees, and First Esdras (Third Esdras in the Vulgate).

2. *Legendary:* Additions to Esther, Prayer of Azariah and the Song of the Three Young Men, Susanna, Bel and the Dragon, Tobit, and Judith.

3. *Prophetical*: Baruch, Letter of Jeremiah (in AV and RV this is ch. 6 of Baruch), and Prayer of Manasseh.

4. *Apocalyptic:* Second Esdras (Fourth Esdras in the Vulgate).

5. *Didactic:* Ecclesiasticus and Wisdom of Solomon.

APOCRYPHA

In the 4th cent., when Jerome made his revision of the Old Latin Bible (which contained the Apocryphal books as carried over from the Greek Septuagint), he was careful to indicate by means of Prefaces those books and parts of books not found in the Hebrew canon. Subsequently, however, copyists of the manuscripts of the Latin Vulgate frequently omitted the Prefaces, and thus facilitated confusion as to the limits of the Hebrew canon. Consequently many of the Church Fathers made no distinction in quoting from both kinds of books. It is true, however, that from the time of Jerome down to the Reformation a succession of the more learned theologians in the West maintained the distinctive and unique authority of the books of the Hebrew canon. It was not until the Council of Trent (April 8, 1546) that the Roman Catholic Church set its seal of authority upon eleven of the Apocryphal books (or parts of books) and decreed an anathema upon any who would not receive the old Latin Vulgate Bible, with all its books and parts, as sacred and canonical. Thus Roman Catholic Bibles now contain the following mingled with the OT Books: Tobit, Judith, Additions to Esther, Wisdom of Solomon, Ecclesiasticus, Baruch (including the Epistle of Jeremiah), three Additions to Daniel, 1 and 2 Maccabees. The official Latin Vulgate Bible prints the Prayer of Manasseh and 1 and 2 Esdras (called 3 and 4 Esdras) in an Appendix after the NT. At the time of the Reformation Luther, Calvin, Zwingli, and other Reformers revived the ancient view that only the books of the Hebrew canon were to be regarded as authoritative, and in most Protestant editions of the Bible the Apocryphal books were gathered into a separate section, printed either between the OT and the NT, or at the close of the NT. It was included in the first edition of the AV in 1611, but not long after it began to be omitted from some copies and editions. In 1957 the Revised Standard Version of the Apocrypha was issued, being the first translation of these books which was prepared by a committee of American scholars.

The general character, contents, and date of the fifteen books of the Apocrypha are as follows:

1. The First Book of Esdras (Third Esdras in the Vulgate) is the canonical book of Ezra (and part of Nehemiah) in Greek, which in reconstructed form tells the story of the decline and fall of the kingdom of Judah from the time of Josiah. It recites the overthrow of Jerusalem, the Babylonian exile, the return under Zerubbabel, and Ezra's part in the reorganization of the Jewish State. Of special interest in the book is the section (3^{1}—4^{63}) which tells how it came about that the Jews were permitted to resume the work of rebuilding the walls of Jerusalem and the Temple. A contest of wits was held among three courtiers of Darius's bodyguard, and to the winner, Zerubbabel, Darius granted money and authorization to finish the work of construction. The date and author of the book are unknown. Most scholars date it between about 150 B.C. and A.D. 50.

2. The Second Book of Esdras [Vulg. Fourth Esdras. If *First* Esdras is the reconstructed Ezra, and the canonical Ezra and Nehemiah are taken as one book, then this is *Third* Esdras (as in the Septuagint). If Ezra and Nehemiah are left out of account, this book is *Second* Esdras (as in the Apocrypha of AV, RV, and RSV). If, as in the Vulgate, Ezra is reckoned as *First* Esdras, and Nehemiah as *Second* Esdras, and the reconstructed Ezra as *Third* Esdras, then this book is *Fourth* Esdras]. The literary form of 2 Esdras is known as an apocalypse, that is, a 'revelation' of the future. Like other Jewish and Christian apocalypses, the author makes use of many symbols, some of which are explained while others are not. The religious concern of the book centres in the problem of justifying the ways of God in dealing with His people, good and bad alike. The main part of the book (chs. 3–14 purports to record seven revelations granted to Ezra in Babylon during the 6th cent. B.C. The author of these chapters was an unknown Jew who probably wrote in Aramaic near the end of the 1st cent. A.D. During the following century an unknown Christian author prefixed an introduction (which is now chs. 1 and 2), and sometime in the 3rd cent. another Christian author appended what is now chs. 15 and 16, a tiny fragment of which has been found in Greek. From the Aramaic form of chs. 3–14 several Oriental versions were made, including Syriac, Coptic, Ethiopic, Arabic (two independent versions), Armenian, and Georgian. In the West the entire book (chs. 1–16) circulated in several Old Latin versions. A later Latin translation stands in the appendix to the NT of the Roman Catholic Vulgate Bible.

3. Tobit is a romantic story of the time of Israel's captivity. Tobit is a pious son of Naphtali who becomes blind. He sends his son Tobias to Rages in Media to collect a debt. An angel leads him to Ecbatana, where he marries a widow who was still a virgin though she had had seven husbands. Each of the seven had been slain on their wedding-day by Asmodaeus, an evil spirit. On the inspiration of the angel, Tobias marries the widow, and, by burning the inner parts of a fish, puts the spirit to flight by the offensive smoke. The blindness of Tobit is healed by using the gall of the fish, the burning of whose entrails had saved the life of Tobias. The lesson inculcated by this widely read book of pious fiction is that, though God permits calamities to befall the righteous, he exercises special care for them during their suffering and grants them a happy ending to their trials. Its popularity is attested by the multiplicity of forms in which it circulated, including several versions each in Hebrew, Greek, Latin, and Syriac. An Aramaic recension has been found at Qumrân. The date of its composition is uncertain, though it probably appeared sometime before the beginning of the 1st cent. B.C.

4. Judith is a thrilling tale of how Judith, a Jewish widow, secured the confidence of Holofernes, an Assyrian commander who was besieging Bethulia. With courage and cunning in the night she approached him in his tent, where he was already overcome with heavy drinking, took his own scimitar and cut off his head, and fled with it to the besieged city. This valorous act saved the distressed Israelites. The story bristles with absurdities in names, dates, and geographical details. It seems to have imitated in one respect Jael's murder of Sisera (Jg 4^{17-22}). Its unknown author may have written some time about 100 B.C., so long after the life of Nebuchadnezzar as to have made him king of Nineveh, instead of Babylon. Because the extant Greek text preserves many Semitisms, scholars generally believe that the original composition was in Hebrew (or Aramaic). The Greek version is preserved in three different forms or recensions. The Latin Vulgate text was made by Jerome from an Aramaic text (which is no longer extant). The religious teaching of the book culminates in ch. 8, where man's dependence upon God, who is absolutely sovereign, is emphasized, and in ch. 9, which records Judith's sublime prayer.

5. Additions to Esther.—Sometime in the 2nd or 1st cent. B.C. a certain Lysimachus (11^{1}) translated the Hebrew text of the OT Book of Esther into Greek. At six different places in the Greek narrative he or someone else added substantial episodes not in the Hebrew, totalling 107 verses. Though the canonical Book of Esther makes no reference to God, all but one of the additions contain the name of God. The literary style of the Greek continuator tends to be wordy and occasionally bombastic. Moreover, at several places the additions contradict the Hebrew text.

6. The Wisdom of Solomon appears to have been composed in Greek with several kinds of readers in view. The author attempts to rekindle in lukewarm and apostate Jews a genuine zeal for God and his law (chs. 1–5). Other Jews, loyal to their ancestral faith but perplexed and disheartened by persecutions, would find in this book encouragement in faith and practice (chs. 10–12 and 16–19). With an eye upon possible Gentile readers, the author argues for the truth of Judaism and the folly of idolatry (chs. 6–9 and 13–15). In supplying historical incidents illustrative of his doctrine he limits himself to those

recorded in the Pentateuch. Though purporting to be Solomon, the unknown author probably was an Alexandrian Jew who lived sometime between 100 B.C. and A.D. 50. He was a man of a certain degree of genius and piety; his philosophical and religious character is witnessed by expressions of belief in immortality. Parts of the book are characterized by a high rhetorical skill, while others degenerate into mere bombast. In its present form it ends abruptly, and apparently is incomplete.

7. Ecclesiasticus, or, **The Wisdom of Jesus the Son of Sirach,** is one of the most highly esteemed of the non-canonical books. Resembling the canonical books of Proverbs, Job, and Ecclesiastes, it is the only Apocryphal book the author of which is known. It was composed in Hebrew about 180 B.C. by a Jew of Palestine named Jesus [Hebrew, Joshua; Aramaic, Jeshua] the son of Sirach (50^{27}). About fifty years later the author's grandson took a copy of this work to Egypt, where he translated it into Greek for the large Jewish population at Alexandria. In modern times sizeable fragments of the Hebrew text of Ecclesiasticus have been discovered, and the entire work is extant in Greek, Latin, Syriac, Coptic, Ethiopic, Armenian, Georgian, Arabic, and Old Slavonic. The book embodies what the author was accustomed to teach in his academy for Jewish boys, and touches upon a wide variety of social relationships and religious duties. It is one of the most important sources for our knowledge of orthodox Jewish piety and customs in the 2nd cent. B.C.

8. Baruch.—This is a pseudepigraphic book attributed to Baruch, the scribe of Jeremiah. Its purpose seems to have been (1) to quiet the souls of the Jews in exile by telling them that they would soon return to their native land; and (2) to admonish them to flee the idolatry that was everywhere prevalent in Babylonia. On stylistic grounds it appears that this book is a composite work of two or more authors, the latest of whom may have lived just before or just after the beginning of the Christian era. Though parts of the book may have been written in Hebrew, to-day Baruch is extant in Greek, from which several ancient versions were made (in Latin, Syriac, Coptic, Armenian, Ethiopic, and Arabic).

9. The Letter of Jeremiah is ostensibly a letter of that prophet warning the Babylonian exiles against the sinful folly of worshiping idols. Who the author was and when and where he lived are unknown. In several ancient Greek and Syriac manuscripts the Letter stands after the OT Book of Lamentations. In other Greek and Syriac manuscripts, as well as the Latin version, it is attached to the book of Baruch (as ch. 6); consequently most English translations of the Apocrypha have printed it as part of that book. Since, however, the Letter is really quite independent of Baruch, the RSV prints it as a separate book.

10. The addition to Daniel called **The Prayer of Azariah and the Song of the Three Young Men** appears in Greek and Latin versions between vv.^{23} and ^{24} of Dn 3. The addition may have been composed in Hebrew sometime within the 2nd or 1st cent. B.C. The Song of the Three Young Men came to be widely used in the liturgy of the early and mediaeval Church, from which it has passed into modern liturgies (where it is commonly called the 'Benedicite').

11. The book of **Susanna** is a spirited detective story of how Daniel discovered and exposed the malicious slander of two lustful elders who had plotted against the beautiful wife of a prominent Jew of Babylon. In many Greek manuscripts this account is prefixed to the canonical Book of Daniel; in the Latin Vulgate it follows the last chapter of Daniel. Who composed the story is not known, nor can its date be fixed more exactly than some time during the two centuries preceding the Christian era.

12. Bel and the Dragon is a melodramatic detective story in which Daniel unmasks the chicanery of the priests of Bel. Later, having slain the dragon that the Babylonians venerated as a god, Daniel is thrown (a second time) into the lions' den. Here he is fed with food brought miraculously from Judaea by the prophet Habakkuk. When and where the unknown author lived cannot be determined with certainty.

13. The Prayer of Manasseh is attributed to the King of Judah of that name when he was a captive of Ashurbanipal in the city of Babylon (2 Ch 33$^{12, 13}$). It probably originated in some of the legends current regarding this notable king, and may have been intended for insertion in the narrative of 2 Ch 33^{13}. Its original is Greek. It is not a part of the Latin Vulgate Bible adopted at the Council of Trent, but is in the appendix thereof.

14. The First Book of the Maccabees is an historical work of considerable value recounting the heroic exploits of Judas Maccabaeus and his family during the struggle of the Jews for religious and political liberty during the 2nd cent. B.C. Beginning with the accession of Antiochus Epiphanes in 175 B.C., the book carries on the narrative of the Syrian invasions and religious persecutions to the death of Simon, the last of Judas's brothers (about 134 B.C.). The author of this stirring account is unknown, but was probably a Jew of Palestine who wrote in Hebrew about 100 B.C. or soon thereafter. Copies of the original Hebrew circulated until at least the time of Jerome (end of 4th cent.), but to-day the book is extant only in Greek and in versions made from the Greek (including two Latin translations and two Syriac translations).

15. The Second Book of the Maccabees is an abridgment of a five-volume work by Jason of Cyrene (2^{23}). It is prefaced by two letters said to have been sent from the Jews of Jerusalem to their brethren in Egypt. This book deals with the history of the Jews from the reign of Seleucus IV. (175 B.C.) to the death of Nicanor (160 B.C.). The multiplication of the marvellous and miraculous in the narrative discounts the value of the material as a source of historical data. The book was written some time between 125 B.C. and the fall of Jerusalem in A.D. 70 It is extant in Greek and in several versions made from the Greek, including Latin, Syriac, Coptic, and Armenian.

The influence of the Apocrypha has extended far and wide. Though no NT writer quotes explicitly from these fifteen non-canonical books, the NT contains several striking instances of parallels and/or allusions to words, phrases, or whole sections in the Apocryphal literature. It is probable that the Apostle Paul had at some time read and was impressed by the Wisdom of Solomon; cf Ro 1$^{20-23, 26, 29-31}$ with Wis 13$^{1, 5, 8}$ 12^{24} 14$^{24-27}$, and Ro 9$^{20-23}$ with Wis 12$^{12, 20}$ 15^{7}. Jesus' invitation in Mt 11$^{28-30}$ is couched in language that is reminiscent of Sir 51$^{23, 26, 27}$ (cf also Sir 6$^{24-25}$ and 24$^{19-22}$), In later ages many Church Fathers regarded Bar 3$^{36-37}$ as a witness to the Incarnation and Wis 2$^{12-20}$ and 14^{7} as predictive of Christ's Passion. In modern times many artists, poets, hymn-writers, and novelists have drawn upon the Apocrypha both directly and indirectly. Even Christopher Columbus was encouraged to set sail westward by what he understood 2 Es 6^{42} to imply with regard to the limited extent of the seas.

In addition to these fifteen Apocryphal books, there is an ever-increasing list of works that scholars call pseudepigrapha (q.v.). These were written at various periods, but mainly just before, during, and just after the time of Christ. Many of them deal with the doctrinal discussions of their day, and present revelations to the author under strange and even weird conditions. These writers attached to their books as a rule the name of some famous personage, not by way of deception, but to court favour for the views set forth. See PSEUDEPIGRAPHA.

APOCRYPHAL GOSPELS.—See APOCRYPHAL NEW TESTAMENT.

APOCRYPHAL NEW TESTAMENT.—The word 'apocryphal,' meaning properly 'hidden' or 'secret,' applied originally to books which were kept from the general public and reserved for initiates, or for a special sect. Because of the nature of such works, however, it gradually came to acquire the meaning 'false' or 'spurious.' (See APOCRYPHA.) Frequently the word is

used as the equivalent of 'non-canonical.' We shall here describe various works which were not included in the NT, but which claimed to be genuine Gospels, Acts, Epistles, or Revelations. These were often written under the names of NT writers, and purported to give information about the life and teaching of Jesus and the apostles. This literature is voluminous, but far the greater part of it was written later than the NT period and is 'apocryphal' in the bad sense. The NT Apocrypha, quite rightly, never attained to the importance of the OT Apocrypha, and have never been accepted by any orthodox branch of the Church.

This literature has come down to us in various ways. (1) Some works have survived by being copied through the centuries, and manuscripts exist in the original Greek or Latin, or else in translations made into languages such as Syriac, Coptic, or Ethiopic. (2) Others are known only through quotations or references given in early writers. In this way parts even of heretical works are preserved in the writings of Church Fathers who attacked the heresies involved. (3) Many books are mentioned by name in lists of canonical and non-canonical books issued by the Church. These include the *Gelasian Decree* (6th cent.), the *List of the Sixty Books* (7th cent.), and the *Stichometry of Nicephorus* (in its present form, 9th cent., but possibly as old as the 4th cent.). The last work gives the size of the books it mentions. (4) Apocryphal works have also come to light as the result of manuscript discoveries in modern times. Interesting finds were made by Grenfell and Hunt at Oxyrhynchus, in Egypt, at the end of last century and the beginning of the present century. The most valuable single find has been the discovery of the remains of a Gnostic library at Nag Hammadi, in Upper Egypt, in 1945.

The literature which makes up the apocryphal NT is diverse in character, but for the most part it originated: (*a*) *From the continuing tradition of the Church.* According to Lk 1^{1-4}, there were a number of written accounts of the life and teachings of Jesus in circulation in the 1st cent. Some of these, but not necessarily all of them, were used by the writers of the canonical Gospels. Similarly, earlier sources lie behind the book of Acts, and some of them may have survived separately. In addition, traditions about Jesus and the apostles must have continued to circulate orally. But the amount of genuine tradition which has been preserved in the apocryphal works is very small indeed. (*b*) *From the homiletic tendency* which has always given rise to stories like the Haggadah of Judaism. Works of this kind undertake to complete the accounts of the lives of Jesus and the apostles by supplying fictitious incidents, and in them the legend-making processes were given free scope. (*c*) *From the desire to support various heresies*, such as Docetism and asceticism, and especially to further the ends of the various Gnostic sects.

Even the most superficial reader of these works recognizes their inferiority to the NT, not merely in point of literary style, but also in general soberness of view. In the entire literature there are only one or two incidents, and a number of sayings (see AGRAPHA) which may be considered authentic. For the most part the narratives and teachings are either a working up of canonical material, or else pure inventions. In some cases it is not impossible that current pagan legends and folk-stories were taken over and attached, *e.g.* to Jesus or Mary. In spite of this, many of these works have enjoyed a considerable popularity and have had their effect on Christian art and literature. They have even influenced the development of doctrine in the Roman Church, particularly in the case of legends about the birth, girlhood, and death of Mary, although certain infancy gospels were declared by Leo XIII., in 1884, to be 'impure sources of tradition.'

None of these works has been unjustly excluded from the NT, as has sometimes been implied. M. R. James, in whose *Apocryphal New Testament* (Oxford, 1924) may be found English translations of all the main works, sums up well (pp. xi f.): 'It will very quickly be seen that there is no question of any one's having excluded them from the New Testament: they have done that for themselves.'

The main apocryphal Gospels, Acts, Epistles, and Revelations may now be mentioned.

I. GOSPELS. (A) Full Gospels. **1. An Unknown Gospel (Papyrus Egerton 2).**—This Gospel is known only through three papyrus fragments, written in Greek, purchased by the British Museum in 1934. Enough is preserved to discern the broad outlines, if not all the details, of four incidents.

1. A Conversation with the Rulers of the People. Jesus is engaged in a controversy with the lawyers and the rulers of the people. He turns to them and says, 'Search the scriptures, in which you think you have life; these are they that bear witness of me. Think not that I came to accuse you to my Father; there is one that accuses you, even Moses, on whom you have set your hope.' The hearers are then chided for their unbelief. At the top of the other side of this leaf, there is what was probably the conclusion of this incident, the account of an attempt to stone Jesus. The rulers lay hands on him in order to hand him over to the multitude. But 'the hour of his betrayal was not yet come,' and so 'he himself, even the Lord, going forth out of their hands, departed from them.'

2. The Healing of a Leper. A leper comes to Jesus and says, 'Master Jesus, journeying with lepers and eating with them in the inn, I myself also became a leper. If therefore thou wilt, I am made clean.' Jesus then heals the man, telling him to go and show himself to the priests.

3. The Question of the Tempters. Some people ask Jesus, in order to tempt him, about the duty of men to secular rulers, 'Is it lawful to render to kings those things which pertain to their rule?' Jesus discerns their motives and replies, 'Why do you call me with your mouth Master, when you do not hear what I say? Well did Isaiah prophesy of you saying, "This people honour me with their lips, but their heart is far from me."'

4. A Miracle by the Jordan. This incident is only very partially preserved. It begins with a question asked by Jesus; then, as he stands on the edge of the Jordan a miracle of some kind is performed. The only phrases in the description of the miracle that can definitely be made out are, 'he sprinkled it,' 'the water that was sprinkled,' and 'brought forth fruit.' Probably a nature miracle of some kind is narrated, connected with the saying of Jesus with which the incident opens.

The papyrus fragments date, on palaeographical evidence, from about the middle of the 2nd cent., so that the original gospel must have been written at an early date. Although there are resemblances to the canonical Gospels, the fragments are neither a copy, nor a harmony, of the canonical Gospels, for the story of the miracle by the Jordan has no parallel, while the other incidents, though they have resemblances to canonical stories, are told in a quite independent way. There are some sayings which recall parts of the Fourth Gospel; these may show that the author of the Unknown Gospel used John, or both writers may have drawn from a common source. The fact that the Gospel shows no heretical tendency, and is comparatively free from exaggeration confirms that it is to be dated in the early 2nd cent., or perhaps even the late 1st cent.

2. The Gospel according to the Hebrews.—Several early Christian writers mention a Gospel according to the Hebrews. Clement of Alexandria quotes it twice; Origen quotes from this gospel—'if anyone accepts it,' he adds. Eusebius also refers to it several times, and states (*HE* iii. 25) that it belongs to that class which was accepted in some parts of the Empire and rejected in others. Jerome obtained from the Syrian Christians a copy of this Gospel, which was written in Aramaic, and which he claims to have translated into Greek and Latin; he also calls it, 'The Gospel of the Nazarenes.'

Variant readings found in some manuscripts of Matthew and ascribed to the 'Jewish Gospel' may come from the Gospel according to the Hebrews.

Evidently this gospel stood in a close relationship to the Gospel of Matthew. Jerome thought that the Aramaic version he knew was in fact the original of Matthew's Gospel, but later he rejected this view. Comparison of the surviving quotations with the First Gospel show that they are on the whole later and of a secondary nature. For example, Jesus' reluctance to be baptized (cf Mt 3^{14}) is carried a stage further; and the temptation story, which has Jesus being carried by the Holy Spirit by one of his hairs, has been enlarged under the influence of Ezk 8^{3} and Bel ^{36}. On the other hand, some of the quotations suggest that the author had access to genuine early tradition. This is so in the case of the resurrection appearance to James, which is confirmed by 1 Co 15^{7}, and in some of the sayings such as, 'Never rejoice, except when you have looked upon your brother in love,' which may be regarded as being on the same level as the canonical sayings. The original Gospel must have been written some time in the first half of the 2nd cent.; it expands the Gospel of Matthew, though not in the interests of any heresy, and incorporates some early traditions not found in the canonical Gospels.

The Gospel contains an account of the baptism, in which Jesus is reluctant to be baptized, saying to his family, 'What sin have I done, that I should go and be baptized by him ?—unless perchance this very thing that I have said is a sin of ignorance' (Jerome, *adv. Pelag.* iii. 2).

There is a version, differing slightly from the canonical one, of the story of the Rich Young Ruler. When Jesus spoke to him, 'the rich man began to scratch his head, and it pleased him not. And the Lord said to him, "How do you say, I have kept the Law and the Prophets, since it is written in the Law, Thou shalt love thy neighbour as thyself; and behold, many of your brothers, sons of Abraham, are clad in filth, dying of hunger, and your house is full of good things, and nothing at all goes out from it to them"' (Origen, *in Matt.* xv. 14). According to Jerome (*in Matt.* 12^{13}), the man with the withered hand was a mason, who prayed to Jesus for help in these words: 'I was a mason seeking a livelihood with my hands; I pray you, Jesus, to restore me my health, that I may not beg meanly for my food.' The Gospel also had a variant version of the Parable of the Pounds, according to Eusebius.

When Simon asked if a brother must indeed be forgiven seven times in a day, Jesus replied, 'Yes, I say unto you, until seventy times seven; for with the prophets also, after they were anointed with the Holy Spirit, the word of sin was found' (Jerome, *adv. Pelag.* iii. 2). Clement of Alexandria quotes a saying, also found in Oxyrhynchus Papyrus 654: 'He who seeks shall not stop until he finds, and when he has found he shall wonder, and when he has wondered he shall reign, and when he has reigned, he shall rest' (Clement of Alexandria, *Strom.* II. ix. 45).

The Gospel tells of how Jesus, after his resurrection, appeared to James. 'For James had taken an oath that he would not eat bread from that hour in which he had drunk the cup of the Lord, until he should see him rising from them that sleep.' Jesus called for a table and for bread, and 'he took the bread, and blessed, and brake, and gave to James the Just, and said to him, "My brother, eat your bread, for the Son of Man has risen from them that sleep"' (Jerome, *de Vir. Illus.* ii).

3. The Gospel of the Egyptians.—This gospel is mentioned by Clement of Alexandria, and later by Hippolytus, Origen, and other writers. It would appear that it originally circulated without incurring the hostility of the Church, but by the end of the 2nd cent. it was used by at least one Gnostic sect, and was condemned as heretical. The name suggests an Egyptian origin, and the gospel must have been written some time in the first half of the 2nd cent.

APOCRYPHAL NEW TESTAMENT

Most of the surviving quotations are part of a dialogue between Jesus and Salome, and show that the gospel was of an ascetic character and discouraged the bearing of children. 'When Salome asked how long death should have power,' the Lord said, 'As long as you women bear' (Clem. of Alex. *Strom.* III. vi. 45). Jesus said, 'I come to destroy the works of the female' (Clem. of Alex. *Strom.* III. ix. 63). 'When Salome inquired when those things should be concerning which she asked, the Lord said, 'when you trample on the garment of shame, and when the two shall be one, and the male with the female, neither male nor female' (Clem. of Alex. *Strom.* III. xiii. 92). The 'garment of shame' evidently means the physical body.

A fragment discovered by Grenfell and Hunt, Oxyrhynchus Papyrus 655, may be part of the Gospel of the Egyptians. On one side of the leaf is a discourse on anxiety similar to that in the Sermon on the Mount; in what can be made out of the rest, Jesus appears to answer questions put to him by his disciples. Traces of Gnosticism and of sexual asceticism, and also the dialogue form, suggest a connexion with the Gospel of the Egyptians. If the fragment is not a part of this Gospel, then all that can be said is that it comes from a 2nd cent. Egyptian Gnostic gospel of a similar type.

Two versions of a Gospel of the Egyptians, also called the Book of the Great Invisible Spirit, were found at Nag Hammadi.

4. An Unknown Gospel (Oxyrhynchus Papyrus 840).—Discovered by Grenfell and Hunt, and published in 1908, this single leaf contains part of an otherwise unknown gospel.

The fragment begins with the conclusion of an exhortation by Jesus to avoid the example of certain evildoers. There then follows an almost complete incident in which a Pharisee, a chief priest, encounters Jesus in the Temple and demands why He and His disciples are walking in 'this place of purification' and looking at the holy vessels, when they are unclean. Jesus asks if the priest is clean and the priest replies that he is, having washed in the pool of David and put on clean, white clothes. Jesus gives a crushing reply contrasting outward cleanness with inward purity. Jesus and His followers have been 'dipped in the waters of eternal life.'

The references to Jewish customs have caused much debate, some holding that the writer shows gross ignorance of the Judaism of Jesus' day. But the fragment has also been defended on this score, and although it probably uses the Fourth Gospel, it may not be later than the mid 2nd cent.

5. The Gospel according to Peter.—This Gospel is mentioned by Eusebius (*HE* vi. 12) as having been rejected by Serapion, bishop of Antioch, in the last decade of the 2nd cent. He found it in circulation among the Syrian Christians, and at first did not oppose it, but after having studied it further, condemned it as Docetic. Origen in his Commentary on Matthew (Book x. 17, and occasionally elsewhere) mentions it, or at least shows an acquaintance with it. Eusebius (*HE* iii. 3, 25) rejects it as heretical, as does Jerome (*de Vir. Illus.* i.).

In 1886 a fragment of this Gospel was discovered by M. Bouriant, and published with a translation in 1892. It relates in some detail the death, burial, and resurrection of Jesus. It is particularly interesting as indicating how canonical material could be elaborated and changed in the interests of the Docetic heresy. Thus the words of Jesus on the cross, 'My God, my God, why hast thou forsaken me?' are made to read, 'My power, my power, thou hast forsaken me,' while it is said that when He was being crucified He kept silence, 'as one feeling no pain.' At the time of the resurrection the soldiers are said to have seen how 'three men came forth from the tomb, and two of them supported one, and the cross followed them; and of the two the head reached unto the heavens, but the head of him that was led by them overpassed the heavens; and they heard a

voice from the heavens saying, 'Thou hast preached unto them that sleep.' And a response was heard from the cross, 'Yea.' The Gospel was probably written about the middle of the 2nd cent.

6. The Gospel of the Ebionites.—This gospel comes down to us only in quotations from Epiphanius (*Haer.* xxx. 13–26, 22). It uses Matthew and Luke, and part of it is narrated by the disciples in the first person plural. Jesus is represented as saying, 'I come to put an end to sacrifices, and unless you cease from sacrificing, anger will not cease from you'; and some of the gospel stories are altered to suit the adoptianist Christology and vegetarianism of the sect in which the gospel originated. It is possible that this work is to be identified with a Gospel of the Twelve Apostles mentioned by Origen, Ambrose, and Jerome. The date may be late 2nd or early 3rd cent.

(B) Infancy Gospels. **1. The Book of James.**—This book, also known as the Protevangelium, is referred to by Origen and Epiphanius, and has survived in various versions.

It purports to be an account of the birth of Mary and of her early life in the Temple, whither she was brought by her parents when she was three years of age, and where at twelve years of age she was married to Joseph, then an old man with children. It includes also an account of the Annunciation and the visit of Mary to Elizabeth, of the trial by ordeal of Joseph and Mary on the charge of having been secretly married, of the birth of Jesus in a cave, and accompanying miracles of the most extravagant sort. The writing closes with an account of the martyrdom of Zechariah and the death of Herod.

The work as it now stands is probably composite. The writer betrays ignorance of Jewish customs, but is dependent both on the canonical gospels and on the OT. Clement of Alexandria and Justin Martyr both refer to incidents connected with the birth of Jesus which are related in the Book of James, but they may have derived the information from independent tradition. Probably the work is to be dated some time in the second half of the 2nd cent.

The author is a not unaccomplished story-teller and his work was used in the later Gospel of Pseudo-Matthew and the Arabic Gospel of the Infancy. The book is of no historical value, but is important as it shows an insistence in the 2nd cent. upon the miraculous birth of Jesus, and shows also the growing importance and the growing veneration of the Virgin Mary.

2. The Gospel according to Thomas.—Hippolytus quotes from a Gospel according to Thomas which was being used by the Naassenes. The Gospel was also known to Origen and to Eusebius, who classes it with the heretical writings. It was subsequently held in high regard by the Manichaeans. It exists to-day in Greek, Latin, and Syriac versions, which, however, do not altogether agree, and all of which are apparently abbreviated recensions of the original Gospel.

The Gospel of Thomas is an account of the childhood of Jesus, and consists largely of stories of His miraculous power and knowledge, the most interesting of the latter being the account of Jesus' visit to a school, and of the former, the well-known story of His causing twelve sparrows of clay to fly.

The book is undoubtedly of Gnostic origin, and its chief motive seems to be to show that Jesus was possessed of Divine power before His baptism. The original Gospel of Thomas, the nature of which is, however, very much in dispute, may have been in existence in the middle of the 2nd cent. Its present form is later than the 6th cent.

3. The History of Joseph the Carpenter, which may date from the 5th cent., has survived in various versions. Written to glorify Joseph, it was probably intended to be recited on his feast day. Other infancy gospels are of later date. The *Arabic Gospel of the Infancy* is a compilation which uses as its main sources the Book of James and the Gospel of Thomas. It can hardly be earlier than the 7th or 8th cent. The *Gospel of Pseudo-Matthew* also draws upon the two earlier infancy gospels. It contains many details, such as the ox and the ass in the birth story, which have influenced Christian art and literature. It may date from the 8th or 9th cent. Other late infancy gospels include the *Gospel of the Birth of Mary* and the *Armenian Gospel of the Infancy*.

(C) Other Gospels. **1.** Some gospels deal only with the narrative of the Passion. **The Gospel of Nicodemus,** also known as the **Acts of Pilate,** consists of two parts, a narrative of the Passion, and an account of the descent into Hades. Some such Acts are referred to by Tertullian, Eusebius, and Epiphanius, but it is very uncertain as to whether any of these are to be identified with this work which has survived in a variety of versions. The first part of the Gospel abounds in anecdotes concerning Jesus and his trial, in which the question of the legitimacy of Jesus' birth is established by twelve witnesses of the marriage of Mary and Joseph. It relates also that at the trial of Jesus a number of persons, including Nicodemus and Veronica, appeared to testify on His behalf. The accounts of the crucifixion are clearly based upon Lk 23. The story of the burial is further elaborated by the introduction of a number of Biblical characters, who undertake to prove the genuineness of the resurrection. This work belongs to the 4th or 5th cent. The second part, probably somewhat later in date, contains an elaborate account of Jesus' descent into Hades, related by two men, Karinus and Leucius, who reveal how Christ vanquished Satan and released Adam and all the saints. The Gospel of Nicodemus cannot be regarded as having any historical value, yet it has exercised considerable influence on the thought of the Church.

Various other works have come to be associated with the Gospel of Nicodemus. These include the **Letter of Pilate** which seeks to lay the blame for the crucifixion solely on the Jews. There are two versions of the **Report of Pilate.** The **Delivering up of Pilate** recounts how Pilate appeared before Caesar, and was beheaded. These and other similar works are all of a late date.

2. There are a number of gospels which, in content, are theological treatises rather than narratives of the life of Jesus. Various Gnostic sects produced gospels of this type which sometimes used the period after the resurrection of Jesus, of which the canonical Gospels say little, for accounts of special doctrines revealed by Christ to select disciples. These gospels can tell us nothing of the life and teachings of Jesus, but are of value for the study of the history of Gnosticism.

Such gospels include the **Gospel of Truth,** mentioned by Irenaeus, and recovered in the Nag Hammadi library; it is of the first importance for the study of Valentinian Gnosticism, and must have been written in the middle of the 2nd cent. The **Gospel of Philip,** referred to by Irenaeus, contained special revelations supposed to have been given by Christ to Philip. This work has been found at Nag Hammadi. Jerome mentions a **Gospel of Bartholomew.** There does exist a work known as the **Questions of Bartholomew,** which may incorporate parts of this gospel. A **Gospel or Traditions of Matthias** is mentioned by various writers, and Hippolytus connects it with the Gnostics, Basilides and Isidore. It is probably identical with a work found at Nag Hammadi. From Nag Hammadi also come several versions of the **Apocryphon of John,** purporting to contain special doctrines revealed by Christ to the Apostle John.

3. The Gospel of Thomas (not to be confused with the Infancy Gospel of the same name), which was found in the Nag Hammadi library, is of a unique kind, consisting of over 100 sayings of Jesus (it is also known as *The Secret Sayings of Jesus*). Its beginning coincides with Oxyrhynchus Papyrus 654, discovered by Grenfell and Hunt in 1903. Many of the sayings have a Gnostic ring, but others are of the Synoptic type and may preserve genuine tradition. The gospel is probably a collection of quotations from the Gospel according to

the Hebrews, the Gospel of the Egyptians and other works, and was compiled in the 2nd cent.

4. Many other gospels are known to us practically only by name. These include Gospels of *Andrew, Apelles, Barnabas, Bartholomew, Basilides, Cerinthus, Eve, Judas Iscariot, Thaddaeus,* and *Valentinus.* The **Gospel of Marcion,** although lost, we know as a probable reworking of Luke by the omission of the Infancy section and other material that in any way favoured the Jewish-Christian conceptions which Marcion opposed. The **Fayoum Gospel Fragment** contains the words of Christ to Peter at the Last Supper in a different form from that of the canonical Gospels, but may be merely a loose quotation rather than part of a lost gospel.

II. Acts.—The canonical Acts were not originally a separate book, but rather the second part of a two-volume work, the first half of which was the Gospel of Luke. With the appearance of other Gospels, however, Luke's Gospel came to be classed along with them, while Acts thus became separated, and so served as a model for later compositions. Of these apocryphal Acts, the earliest and most important are five in number. These five were used by the Manichaeans; they are described and condemned as heretical by Photius (9th cent.). But references and quotations in earlier writers show that some are as old as the 2nd cent. The motive of the authors of these Acts was largely to commend Gnostic doctrines, but also merely to expand what little was known about the lives of the apostles by means of highly imaginative and almost entirely mythical additions. However, it is possible that in a few cases genuine early traditions have been preserved. These works were very popular and the existence of different versions may be attributed to the fact that orthodox revisions were made of heretical works. In several cases the passion narratives of the various apostles circulated separately. The five main Acts are as follows:

1. **The Acts of John** date from the mid 2nd cent., and probably about two-thirds of the original work survives. It is attributed to Leucius, who is said to have been a companion of the Apostle John. (According to Photius, this Leucius was the author of all five Acts, but a common authorship for all these works is quite impossible.)

2. **The Acts of Paul** were composed in the second half of the 2nd cent. by a presbyter in Asia, who was condemned for producing this fictitious work, although it alone of these Acts is not heretical. Part of it survives as the **Acts of Paul and Thecla,** which contain an interesting description of Paul, uncomplimentary enough to suggest that it may preserve a true tradition—'A man of little stature, thin-haired upon the head, crooked in the legs . . . with eyebrows joining, and nose somewhat hooked. . . .'

3. **The Acts of Peter** are modelled on the Acts of John, and may date from around A.D. 200. Much of the narrative describes the struggles between Peter and Simon the Magician. Part of this work is preserved separately as the *Martyrdom of Peter,* which includes the well-known *Quo Vadis* legend.

4. **The Acts of Andrew,** dating probably from the 3rd cent., are the least well preserved.

5. **The Acts of Thomas** have survived in their entirety, and form a work of considerable length. The date of composition is uncertain.

Numerous other Acts are known, although many of them survive only in fragmentary form or even only in name. For the most part they are later than and inferior to the ones listed above. The following may be mentioned: *The Acts of Philip, The Acts of Andrew and Matthew,* and *The Acts of Peter and Andrew.*

III. Epistles.—The apocryphal epistles are of a wholly fictitious character. Eusebius is the first to refer to the correspondence of **Christ and Abgar,** the latter being a king of Edessa who writes asking Christ to come and heal him. A supposed correspondence between **Paul and Seneca,** consisting of fourteen letters, has survived; it is first mentioned by Jerome. We know from Col 4[16] that Paul wrote to the Laodiceans, and an apocryphal **Epistle to the Laodiceans** has survived, as also has a 'third' **Epistle to the Corinthians,** which was probably originally part of the Acts of Paul. **The Epistle of the Apostles,** purporting to have been written by the apostles to all Christians, may be as old as the 2nd cent. The **Letter of James** and the **Epistle of Peter to Philip** are Gnostic works found at Nag Hammadi.

IV. Revelations.—The most important of these is the **Revelation of Peter,** dating from the early 2nd cent., which is referred to by several early writers, and which survives in Ethiopic. A Greek fragment was discovered at Akhmim in 1884, attached to the Gospel of Peter. It contains a description of heaven, and of the many torments which the wicked endure in hell. The **Revelation of Paul** dates from the 4th cent., although earlier sources are incorporated in it. Other revelations are those of *Thomas,* of *the Virgin,* of *Stephen,* and of *Bartholomew.* Two *Revelations of James,* and *Revelations of Paul and of Peter* were found at Nag Hammadi. C. H. H. S.

APOLLONIA (Ac 17[1]).—Paul and Silas passed through this town on the way from Amphipolis to Thessalonica. It was on the important Egnatian road which ran between Dyrrhachium (modern *Durazzo*) and Thessalonica. It was about half-way between Amphipolis and Thessalonica, and lay between the rivers Axius and Strymon. To-day *Pollina.* A. So.—E. G. K.

APOLLONIUS.—1. A governor of Coele-Syria and Phoenicia under Seleucus IV. (2 Mac 4[4]), who suggested the abortive attempt of Heliodorus on the Temple-treasury. To this he perhaps owed the title *mysarches* (2 Mac 5[24]), which the Vulgate renders *odiosum principem,* AV 'detestable ringleader,' RV 'lord of pollutions.' But RSV reads, 'the captain of the Mysians.' In 168–167 B.C. he was sent to Hellenize Jerusalem, and he initiated the great persecution with a cruel massacre on the Sabbath (2 Mac 5[24–26]). Judas Maccabaeus defeated and slew him, wearing his sword ever after (1 Mac 3[10ff], Jos. *Ant.* XII. vii. 1 [287]). **2.** An envoy sent to Egypt by Antiochus IV., 173 B.C. (2 Mac 4[21]). Some MSS identify this man with the preceding, describing each as 'son of Menestheus.' **3.** An official under Antiochus V. who molested the Jews (2 Mac 12[2]). **4.** A governor of Coele-Syria who fought against the Jews (147 B.C.) on the side of Demetrius (1 Mac 10[69–85]; Jos. *Ant.* XIII. iv. 3 f [86 ff] is in error). From Jamnia he sent a pompous defiance to Jonathan who, however, captured Joppa and defeated Apollonius. J. T.—F. C. G.

APOLLOPHANES (2 Mac 10[37]).—A Syrian killed at the taking of Gazara by Judas Maccabaeus.

APOLLOS (a pet name, abbreviated from Apollonios, which appears in the D text of Ac 18[24], or from Apollodoros or Apollonides), was according to Ac 18[24–28] and 1 Co 1[12] 3[4–8] 4[6] 16[12] an Alexandrian Jew and Christian missionary, who preached effectively at Ephesus, Corinth (where his disciples formed a close group) and again at Ephesus. His picture in Ac 18[25f] is not quite clear: was he then a Jew with fervent messianic expectations, baptized by John, or already a Christian? The story told in Acts seems to be a compromise between these two views. That he used Philonic allegory is only a guess. Probably he was neither an adherent of the Jewish baptist movement nor a follower of St. Paul, but an independent Christian missionary. The old conjecture that he wrote the Wisdom of Solomon before, and the letter to the Hebrews after, his conversion has now been abandoned. Concerning Tit 3[13], see Pastoral Epistles. E. H.

APOLLYON ('the Destroyer').—The Greek equivalent in Rev 9[11] of **Abaddon,** the angel of the bottomless pit, who was also the king of the locusts (see Abaddon). The word does not appear in its Greek form in later Rabbinic writings, and only here in the NT. As an angel, Apollyon seems to have been regarded as equivalent to Asmodaeus, king of demons, in Judaistic mythology; but our data are too few to warrant precise statements. S. M.

APOPLEXY.—See MEDICINE.

APOSTASY.—A defection from the tenets of some religious community. In Ac 21[21] it describes the charge brought against St. Paul by the Jews, viz., that he taught that the Jews should abandon the Law of Moses. In 2 Th 2[3] (RSV 'the rebellion') it describes the defection of Christians which was to accompany the 'man of lawlessness'—*i.e.* the Antichrist. This expectation is an illustration of what seems to have been a common belief—that the return of Christ to establish His Kingdom would be preceded by violent activity on the part of His superhuman opponent, and that this would result in an abandonment of Christian faith by many nominal Christians. The seriousness of the act is reflected in He 6[6] where, probably as a result of persecution, some have defected and thus 'crucify the Son of God on their own account' (RSV). It is equally reflected in the Jewish prayer, Shemoneh Esreh (§ 12), where a malediction was pronounced against the apostates. Such persons had undoubtedly denounced their fellows, friends, and relatives to the authorities, thus virtually handing them over to torture and death. S. M.—F. C. G.

APOSTLES.—The New Testament word *apostolos* has a meaning which bears little relation to the almost uniform classical usage of the word, where it has for the most part a nautical flavour. Possibly its NT connotation of 'authorized agent,' 'a commissioned person,' 'one designated as envoy,' emphasizing not only the one sent but the one sending, is related to the Rabbinical legal term *shāliaḥ*, which has the same meaning but which is difficult to date as to early usage. Some scholars, on the other hand, find its beginnings in a pre-Christian Gnosticism. Or possibly the NT sense of the word is Christian in origin, although Herodotus (alone of classical authors) uses it in the sense of 'envoy.' The Talmud says, 'The one whom a man sends is the equivalent of himself' (*Berakhoth*, v. 5), *i.e.* so far as that particular commission is concerned. The term was applied, especially in Luke–Acts, to the twelve disciples whom Jesus attached to Himself to aid Him in His ministry and to be trained by the discipline of His example and precept for carrying it on after His departure (Lk 6[13], etc., and often in Ac, Mk 6[30], Mt 10[2]). Thus Jesus was regarded as the sender, and the twelve as the Gospel bearers.

By and by, when Jesus was setting out on His last journey to Jerusalem, He 'appointed seventy others, and sent them on ahead of him,' *i.e.* as His agents (Lk 10[1]; 'sent' is the verb cognate to 'apostle').

Later on the Twelve (the Eleven plus Matthias) were regarded as the Apostles *par excellence* (cf Ac 6[2, 6]). They were the men who had been with Jesus, and their peculiar function was to testify of Him, and especially of His resurrection (Ac 1[21f]; cf v.[8] and Lk 24[48]). But soon they were not the only Apostles. The title was given to Barnabas (Ac 14[4, 14], 1 Co 9[5, 6]), perhaps to Andronicus and Junias (Ro 16[7]), and possibly to others (see 1 Co 15[5, 7]). Why was it withheld from one like Timothy (2 Co 1[1], Col 1[1])? If Barnabas, as Eusebius declares (*HE* i. 12) and Andronicus and Junias (the possibility is raised by Origen: *ad Romanos*, xvi) belonged to the Seventy, it is just possible that the great majority of those others besides the Twelve who were styled 'Apostles' were of the Seventy. It is true that the title is given to James the Lord's brother (Gal 1[19]) and to Paul, who belonged neither to the Twelve nor to the Seventy. But it was natural that James, who was recognized as the head of the Church at Jerusalem, should be called an 'Apostle,' as well for the great piety which tradition ascribes to him, as for his relationship to Jesus. As for Paul, his Apostolic title was bitterly contested, but he triumphantly defended it (1 Co 9[1, 2], 2 Co 12[12]). Perhaps it was his example that emboldened others outside the ranks of the Twelve (and perhaps of the Seventy) to claim Apostleship on the score of Apostolic gifts, real or supposed (2 Co 11[13], Rev 2[2]).

The application of the term 'Apostle' to Jesus (He 3[1]) carries the general connotation of one who is an authorized agent. See also DISCIPLES. D. S.—J. H. Sc.

APOTHECARY.—This word is found eight times in AV, but should be rendered 'perfumer'; it is so rendered in RV in Ex 30[25, 35] 37[29], Ec 10[1], and in RVm in Neh 3[8], but RV retains 'apothecary' in 2 Ch 16[14], Neh 3[8], Sir 38[8] 49[1]; RSV renders by 'perfumer' in all cases save Sir 38[8], where it has 'pharmacist.' See PERFUMER.

APPAIM ('nostrils').—A man of Judah, 1 Ch 2[30f].

APPAREL.—See DRESS.

APPARITION.—In RV of Mt 14[26] and Mk 6[49] for AV 'spirit.' The Greek word (*phantasma*) differs from the usual word for 'spirit' (*pneuma*); it occurs only in these passages. RSV uses 'ghost' here and in Is 29[4]. See GHOST.

APPEAL.—See JUSTICE.

APPHIA.—A Christian lady of Colossae, a member o the household of Philemon, probably his wife (Phn [2]).

APPHUS (1 Mac 2[5]).—The surname of Jonathan the Maccabee. The name is usually thought to mean 'dissembler'; and some suppose that it was given to Jonathan for his stratagem against the tribe of the Jambri, who had killed his brother John (1 Mac 9[37–41]).

APPII FORUM.—Ac 28[15] AV; RV 'The Market of Appius.' See next article.

APPIUS, FORUM OF.—A market-town (without city rights) on the Appian Way, 43 miles from Rome, and about 10 miles from *Tres Tabernae* (Three Taverns), near the modern railway station, Foro Appio. As the Appian Way was the main road from Rome to the south and east under the Roman Empire, it was traversed by nearly all travellers from or to those parts (Ac 28[15]). A. So.

APPLE.—That the apple (*tappuaḥ*) of the OT is the fruit known by that name to-day is extremely doubtful. It is true that the tree in size and foliage would answer to the reference in Ca 8[5], Jl 1[12]; the fruit too in its sweetness (Ca 2[3]) and its smell (Ca 7[8]) is very appropriate. It is also suggestive that Hebrew *tappuaḥ* closely resembles the Arabic for 'apple,' *tuffāḥ*. On the other hand, it is a substantial difficulty that the apple does not grow well in Palestine proper, as distinguished from the Lebanon. The native fruit is small and wanting in sweetness; almost all eatable apples are imported from the North. In consequence of this, several fruits which to-day are found in Palestine have been suggested. The *citron*, a favourite with the Jews on account of its smell and golden colour, is certainly a more recent introduction. The *apricot*, suggested by Tristram, which flourishes in parts of Palestine in greater profusion than any other fruit, would seem to answer to the references well. It is deliciously sweet, with a pleasant smell, and, when ripe, of a brilliant golden colour. The tree is one of the most beautiful in the land, and when loaded with its golden fruit might well suggest the expression 'apples of gold in pictures of silver' (Pr 25[11]). Unfortunately there is considerable doubt whether this tree, a native of China, was known in Palestine much before the Christian era. A fourth fruit has been suggested, namely, the *quince*. This is certainly a native of the land, and is common all over Palestine. The fruit, when ripe, though smelling pleasantly, is not 'sweet' according to our ideas, but even to-day is much appreciated. It is a great favourite when cooked, and is extensively used for making a delicious confection. The quince, along with the true apple, was sacred to Aphrodite, the goddess of love. E. W. G. M.

APPLE OF THE EYE.—A figure for that which is most precious and most carefully guarded. It represents three different expressions in Hebrew: the 'little man of the eye' in Dt 32[10], Pr 7[2]; 'the daughter of the eye' in La 2[18] (AV, RV); 'the gate of the eye' in Zec 2[8]. In Ps 17[8] the first two of these are combined. It is used of God's care of His people in Dt 32[10], Ps 17[8], Zec 2[8], and of the preciousness of the Divine law in Pr 7[2]. In La 2[18],

where RSV has simply 'your eyes,' it is the source of tears.

APRON.—See DRESS.

AQUILA AND PRISCILLA.—The names of a married couple mentioned in Ac 18[2f, 18, 26], Ro 16[3-5], 1 Co 16[19], 2 Ti 4[19]. From the fact that only in 1 Co and Ac 18[2] is Aquila mentioned first, Harnack concluded that Priscilla (a diminutive; St. Paul calls her Prisca) was a more effective missionary than Aquila. The statement of Chrysostom (i. 306 D, 177 A; iii. 176 B, C) that Prisca was able to instruct Apollos, probably was an inference too.

Aquila was a Jew of Pontus. He lived (as a leather-merchant) with Prisca in Rome until they were driven out by the edict of Claudius (A.D. 49). Possibly they were already Christians when they came to Corinth; it is not said that St. Paul converted them. When he left Corinth after 18 months (A.D. 51), he followed them to Ephesus. There they remained; they are mentioned honourably in Ro 16[3]: this chapter was probably a letter to the Christians at Ephesus, where as in 2 Ti 4[19] Aquila and Prisca are supposed to be. E. H.

AQUILA'S VERSION.—See GREEK VERSIONS OF OT, 15.

AR.—A city or district of Moab in the region of the Arnon, the border between Moab and the Amorites, Nu 21[15], Dt 2[9, 18, 29], Is 15[1]; possibly modern *el-Miṣna'*. It is called Ar of Moab in Nu 21[28]; this may be the same as 'the city of Moab' (Nu 22[36]), 'Ar' and 'city' being consonantally the same in Hebrew. If this is the capital city, **Kir-hareseth** (q.v.) may be meant.

ARA.—A descendant of Asher, 1 Ch 7[38].

ARAB.—A city of Judah in the mountains, near Dumah, Jos 15[52]; possibly modern *Khirbet er-Râbiyeh*.

ARABAH.—The name given by the Hebrews to the whole of the great depression from the Sea of Galilee to the Gulf of 'Aqaba, *e.g.* 2 S 4[7], where it refers to the Jordan Valley east of Bethshan (see JORDAN). The 'Brook of the Arabah' (RV), named by Amos (6[14]) as the southern boundary of Israel may be the *Wâdī Nimrîn*, which flows into the Jordan from the east 7 miles N. of the Dead Sea, but here the Hebrew *'arābhāh* may mean 'willows' (cf Is 15[7], of the same region). The name in Ezk 47[8] applied to the desert W. of the Dead Sea, is now applied only to the southern part, extending from a line of white cliffs that cross the valley a few miles S. of the Dead Sea. The floor of the valley, about 10 miles broad at the north end, gradually rises towards the S., until at a height of *c* 2000 feet above the Dead Sea (*Jebel er-Rîsheh*) it narrows considerably and drops to the Gulf of 'Aqaba at an average width of 6 miles. The surface is formed of loose gravel, stones and sand (*raml*), and patches of mud-pans (*qa'a*). There is sparse seasonal herbage, confined mainly to watercourses, with occasional acacia trees. The escarpment of the great limestone plateau, *et-Tih*, the Wilderness of Paran, forms the western boundary, and the Edomite escarpment the eastern. Here copper ores were worked by the Egyptians in the Pyramid Age (3rd millennium), and were later more extensively exploited under Solomon. Traces of ancient mining and smelting, and fortified camps for slave-miners have been explored by Glueck, who, further, excavated *Tell el-Kheleifeh* at the head of the Gulf of 'Aqaba and found the remains of a refinery with possible evidence of ship-building of the Solomonic age. According to OT tradition Israel traversed the Arabah when they went to Kadesh-Barnea, and again when they returned to the south in their detour past Edom (Nu 20[21] 21[4], Dt 2[8]).

W. E.—J. Gr.

ARABATTINE, 1 Mac 5[3] (AV).—See AKRABATTENE.

ARABIA, ARABS.—Historians use the name Arabia sometimes with a wider, sometimes with a narrower connotation, but the Arabia of the Bible is the whole of that large, and somewhat barren, peninsula jutting out from south-west Asia just before it joins on to Africa. Geologically it is part of the great land mass stretching from Turkestan to the African Sahara. The great rift which formed the Red Sea cut it off from its western connexion, and a similar depression, now partially filled by Mesopotamia and the Persian Gulf, separated it on the east. Cut off by depressions of quite a different nature, the Mediterranean border to the north and the Indian Ocean to the south, it was left an almost rectangular peninsula, about twice as long as it is broad, set obliquely to normal longitude and latitude. It is for the most part a plateau whose steep escarpment is to the west, so that from the Red Sea it presents a mountainous appearance, but slopes gently eastwards, though not without interruptions, to the basin of Mesopotamia and the Persian Gulf. The western escarpment rises sharply in the south to the mountains of Yemen, and to the south-east there is a similar sharp rise to the highlands of Oman. This plateau is intersected by innumerable valleys, in which are many scattered oases, and has two large desert bulges, one to the north, the Nefud, and one to the south, the famous Empty Quarter. Save in the mountainous areas of Yemen and Oman, which catch some of the monsoon rains, the rainfall is scarce and uncertain, and the characteristic fauna and flora are consequently of the desert type. Continuous cultivation is possible only in the south and in the oases. This limited fertility, added to the fact that though the coast line is extensive it has very few practicable harbours, has prevented the development of settlements of any size and made the typical life of the country that of the nomad. Before the effective domestication of the camel the people were ass nomads, but in Biblical times their characteristic beast of burden was the camel. Horses are a relatively late importation, and are still in the nature of a luxury.

In early times there was no common name for the whole of this area, nor a common name for its inhabitants, who were known by local, or clan names, as Sabaeans, Amalekites, Midianites, Dedanians, Ishmaelites, Hagarenes, or even 'sons of the East.' The earliest inhabitants were not of a single racial stock, as is evident from an examination of even the few ancient skeletal remains so far brought to light, but it would seem that the cultural unity in which the Semitic family of languages arose was first attained on this plateau. There seems, however, to have been a marked feeling of distinction between peoples of the south and those of the north, a feeling which has survived into modern days. The word *'arab* means 'nomad,' and has connexions both with the Hebrew *'erebh* 'mixed multitude' and *'arābhāh* 'desert land,' much as the Arabic *badawī* (from whose plural comes our familiar *bedouin*) has with *bādiya*, the 'steppe land.' It occurs with this meaning of 'nomad' in Egyptian texts as early as the 13th Dynasty, as well as in both cuneiform and South Arabian inscriptions, and in the Qur'ān. This would seem to be its meaning in the OT in such passages as 'No Arab will pitch his tent there' (Is 13[10]), 'like an Arab in the wilderness' (Jer 3[2]), for the prophets doubtless mean 'nomad' rather than any particular ethnic group. Similarly the 'kings of Arabia' (1 K 10[15], Jer 25[24]) would be nomad chiefs just as those Arabians who attacked Judas Maccabaeus are expressly called 'nomads' (2 Mac 12[10-12]). In the Behistun inscription of Darius I., however, *Arbāya* is the province lying between Assyria and Egypt. Likewise in Greek writers from Herodotus onwards *Arabia* is the name for this area, so that in Is 21[13], Ezk 30[5], the reference could be to the geographical area in which the nomads roam. Similarly 'Arabs' as an ethnic name for the inhabitants of this area occurs both in the Old Persian inscriptions and in Herodotus, as indeed in the earliest occurrence of the word in Greek (Aeschylus, *Persae*, 316). It is so used in 2 Ch 21[16], Neh 4[7].

In the genealogical tables of the OT many names included among the descendants of Cush (Gn 10[7]), of Eber (Gn 10[25-30]), of Abraham by Keturah (Gn 25[1-4]), and by Hagar (Gn 25[13-16]), can be related to persons and places in Arabia, several being names which appear also

in accounts of Arabian contacts in Assyrian annals. Gn 21[20, 21] pictures Ishmael as dwelling in the desert country and places his 'sons' in the wilderness area stretching from near the Egyptian border across to Mesopotamia (Gn 25[13ff], Jth 2[23]). This is North Arabia, but the Joctanid genealogy in Gn 10[26–30] contains names which have good South Arabian correspondences. Saba, the land of rich merchandise, hard by Ethiopia (Is 43[3] 45[14]), belonged to this South Arabia the true greatness of whose civilization is only now beginning to be appreciated. The South Arabians were particularly interested in the incense and luxury trade, in the interests of which they established trade centres in the north. Possibly the Sheba which appears beside Saba in Gn 10[7], Ps 72[10] may refer to these North Arabian settlements (cf Job 1[15], Jer 6[20]), and the queen of Sheba who visited Solomon (1 K 10[1–13]) may have been a chieftainess from some such centre, since we know nothing of reigning queens in South Arabia.

The Ishmaelites in the Joseph story (Gn 37[25, 28]) appear as traders leading caravans between North Arabia and Egypt, which suggests they were a camel people, and in 1 Ch 27[30] the overseer of David's camels was an Ishmaelite and his chief herdsman a Hagarene. In Gn 37[28, 31] these Ishmaelites are equated with the Midianites (cf Jg 8[24], Jth 2[23, 26]), whom the prophets also knew as traders who brought to Palestine goods of the South Arabian trade (Is 60[6]), but who in the Moses story are a pastoral people (Ex 2[15ff]). The nomads are still frequently both. They were a people who dwelt in tents (Jg 6[5] 8[11], Ps 83[7 (6)]), as did the Qedar, the Bene Qedem (sons of the East) and other North Arabian peoples (Ps 120[5], Jer 49[29, 31], Ezk 38[11], Ca 1[5], 1 Ch 5[10]), who supplied Israel with small cattle (Is 60[7], Ezk 27[21], 2 Ch 17[11]), and were middlemen in the luxury trade (Jer 6[20], Ezk 27[20, 22], 1 K 10[15], 2 Ch 9[14]).

There was also, however, a tradition of hostility between the children of Israel and these nomadic Arabs. Ps 83 lists the Ishmaelites, the Hagarenes, and the Midianites among the traditional enemies. It was the Amalekites who harrassed them as they came up from Egypt (Ex 17[8–16], Dt 25[17–19], Nu 14[45]), the Midianites who troubled them during the desert wandering (Nu 22–25), and Amalekites, Midianites, and Bene Qedem were the enemies with whom Gideon had to deal (Jg 6[2–7, 33] 7[12]), and some of whom were still a source of trouble during the monarchy (1 S 15[7ff] 30[1ff], 2 Ch 21[16f] 22[1] 26[17]). It was Sabaeans who raided Job's cattle (Job 1[15]), and when Nehemiah commenced rebuilding Jerusalem after the 'exile,' a certain 'Geshem the Arab,' whose name has recently appeared in inscriptional evidence, was prominent among his opponents (Neh 6[1–6]).

In the Intertestamental period it was the **Nabataeans** who dominated the North Arabian scene. They were Arabs, and were still nomads when they first appear in history. By the 3rd cent. B.C., however, they had begun to settle down in places to agricultural life, proving themselves highly expert irrigators, and also came to control the caravan trade of North Arabia. From their chief centre at Petra they built up a kingdom extending from the Red Sea and the Egyptian border across to the head of the Persian Gulf, most of the caravan cities, even Damascus at times, being largely under their control. As their language of cultural expression they used Aramaic, and eagerly absorbed Hellenistic culture. Their earliest known king, Aretas I., became involved in Jewish affairs through the adventures of the High Priest Jason (2 Mac 5[6–8]), and they were the Arabs with whom the early Maccabees had friendly relations (1 Mac 5[24f] 9[35]), though the Hasmonaeans quarrelled with them. The Arabians who were present in Jerusalem on the Day of Pentecost (Ac 2[11]) would have been Jews from some Nabataean settlement, possibly in the area of Arabia beyond Damascus to which Paul withdrew after his conversion (Gal 1[17]). It was the ethnarch at Damascus of the Nabataean ruler Aretas IV. from whom Paul had to make a hurried escape (2 Co 11[32, 33]). This is the last Biblical reference to Arabia or the Arabs. See ARETAS. A. J.

ARABIC VERSIONS OF OT.—See GREEK VERSIONS OF OT, 11.

ARAD.—1. A city in the Negeb, the king of which provoked Israel (Nu 21[1] 33[40]) and was slain by Joshua (Jos 12[14]); in its vicinity the Kenites settled, Jg 1[16]; probably modern *Tell 'Arâd*, 16 miles south of Hebron. **2.** A Benjamite, 1 Ch 8[15].

ARADUS.—Name of the city of **Arvad** (q.v.), found in 1 Mac 15[23].

ARAH.—1. A descendant of Asher, 1 Ch 7[39]. **2.** Head of a family of exiles who returned with Zerubbabel, Ezr 2[5], Neh 6[18] 7[10], 1 Es 5[10] (AV, RV **Ares**). The numbers of those who returned are variously given as 775 (Ezr 2[5]), 652 (Neh 7[10]), and 756 (1 Es 5[10]). **3.** See MEARAH.

ARAM.—1. A grandson of Nahor, Gn 22[21]. **2.** An Asherite, 1 Ch 7[34]. **3.** Mt 1[3f] (AV); see RAM. **4.** Lk 3[33] (AV); see ARNI. **5.** Fifth son of Shem, Gn 10[22f], 1 Ch 1[17], eponymous ancester of the Aramaeans; see next article.

ARAM, ARAMAEANS (often in AV and RV '**Syrians**').—A number of scattered but kindred tribes which made their appearance in the Euphrates valley about 2000 B.C. Their chief *habitat* stretched from Harran, east of the Euphrates, south-westward to the Ḥaurân in Transjordania. The north-eastern part of this region was called 'Aram of the rivers' (**Aram-naharaim**, Ps 60, title). The Aramaeans are first mentioned in Akkadian texts, possibly in *c* 2250 B.C., but certainly about 2000 B.C., and seem to have become rather important before the 17th cent. as the Mari texts indicate. They are also mentioned in the texts from Ugarit of the 14th cent. and in the Amarna Letters of the same time. Tiglath-pileser I. (*c* 1100 B.C.) mentions Aramaeans (*ANET*, p. 275a) in the region of Palmyra, east of the Euphrates, and in this same area they were later (883–824 B.C.) encountered by Ashurnasirpal II. and Shalmaneser III. Many of them continued to live in the Euphrates valley where their language spread to such an extent that, in the reign of Tiglath-pileser III., Aramaic glosses begin (729 B.C.) to make their appearance on Babylonian contracts. In Nippur many similar documents from the Persian period have been found. They indicate that the use of Aramaic was spreading among the common people of Babylonia. It probably came into general use here, as the Babylonian Talmud is written in it.

The Aramaeans pushed into Syria in large numbers shortly after 1300 B.C. In course of time they occupied Hamath, Damascus, and a part of the country to the south as far as the Ḥaurân, founding several city states. Damascus became the leading Aramaean State (cf Am 1[5] and Is 7[8]), but other independent Aramaean kingdoms were **Aram-Geshur**, and **Aram-Maacah** in the Ḥaurân to the north of Bashan (Dt 3[14], Jos 13[13]); **Aram-Zobah**, farther north, apparently lying to the west of Damascus; and **Aram-Rehob**, which has not been identified although it seems to have been located near the town of Dan, now *Tell el-Qâḍī* (Nu 13[21], Jg 18[28], 2 S 10[6]).

King David married a daughter of the king of Geshur and she became the mother of Absalom (2 S 3[3]), who afterwards fled thither (13[38]). Damascus was conquered by David (8[6]), who also made Zobah, Rehob, and Maacah tributary (ch. 10). Zobah is mentioned by Ashurbanipal three centuries later as *Subatu* (*ANET*, p. 298a).

After the death of David, Damascus regained its independence. In the reigns of Baasha and Asa it was an ally now of Israel and now of Judah (1 K 15[18]). During the century from Ahab to Jehoash of Israel, Damascus and Israel were frequently at war, and Damascus held much of Israel's trans-Jordanic territory. After this the Aramaean kingdom became weaker, but

in the reign of Ahaz it attempted to force Judah to become its ally, probably against Assyria (Is 7). It was finally subdued by Tiglath-pileser III. of Assyria in 732 B.C.

The Aramaeans continued to form the basis of the population in the region from Aleppo to the Euphrates and beyond. Early in the Christian era this region became Christian, and in that Aramaic dialect called Syriac a large Christian literature exists.

G. A. B.—S. H. Hn.

ARAMAIC is found in the OT at Gn 31^{47} (two words), Jer 10^{11}, Ezr $4^{8-6:18}$ 7^{12-26}, Dn $2^{4b-7:28}$, and elsewhere as 'Aramaisms.' It was the language of the Aramaeans (*e.g.* 2 S 8^{5} 10^{16}—EV, 'Syrians') which, widely diffused at an early period, gained international currency in the Near East from the 7th cent. B.C. (cf 2 K 18^{26}) and thereafter was officially used in the western part of the Persian empire. Its many dialects grouped as eastern (Syriac, Babylonian Talmudic, and Mandaean) and western (Palmyrene, Nabataean, Samaritan, Targumic, Palestinian Christian, and Egyptian Aramaic) corresponded to its geographical sphere of influence—from Italy to India and Asia Minor to Egypt. It was from the beginning a component of Hebrew, and after the Exile, by reason of its syntactical flexibility and its capacity for absorbing foreign elements, it gradually ousted Hebrew from popular usage, even as, by its much simpler script, it had previously triumphed over Akkadian. The Aramaic of Ezra and Daniel is of the western variety and was current in Palestine between the 4th and 1st cents. B.C.

E. T. R.

ARAM-GESHUR.—See ARAM.

ARAMITESS.—A feminine gentilic, found in AV and RV in 1 Ch 7^{14}, for the elsewhere frequent term Syrian. RSV has 'his Aramaean concubine' for 'his concubine the Aramitess.'

ARAM-MAACAH, ARAM-NAHARAIM, ARAM-REHOB, ARAM-ZOBAH.—See ARAM.

ARAN (? 'wild goat').—Son of Dishan (q.v.) the Horite and descendant of Esau, Gn 36^{28}, 1 Ch 1^{42}.

ARARAH.—See ADADAH.

ARARAT (Gn 8^{4}, 2 K 19^{37} [|| Is 37^{27}], Jer 51^{27}) is the Hebrew form of the Assyrian *Urarṭu*, which on the monuments from the 9th cent. downwards designates a kingdom in the N. of the later **Armenia**. The extension of the name naturally varied with the political limits of this State; but properly it seems to have denoted a small district on the middle Araxes, of which the native name *Ayrarat* is thought to be preserved in the *Alarodioi* of Herodotus (iii. 94, vii. 79). Jerome describes it as 'a level region of Armenia, through which the Araxes flows, of incredible fertility, at the foot of the Taurus range, which extends thus far.' The Araxes (or *Aras*), on its way to the Caspian Sea, forms a great elbow to the S.; and at the upper part of this, on the right (or SW.) bank of the river, the lofty snowclad summit of Massis (called by the Persians the 'mountain of Noah') rises to a height of nearly 17,000 feet above sea-level. This is the traditional landing-place of the Ark; and, through a misunderstanding of Gn 8^{4} ('in [one of] the mountains of Ararat'), the name was transferred from the surrounding district to the two peaks of this mountain, Great Ararat and Little Ararat—the latter about 7 miles distant and 4000 feet lower.

Whether this is the site contemplated by the writer in Genesis (P) is not quite certain. The Syrian and Moslem tradition places it at *Jebel Jûdî*, a striking mountain considerably S. of Lake Van, commanding a wide view over the Mesopotamian plain. It is just possible that this might be included among the 'mountains of Ararat' in the wider sense of the term. This seems the view of Josephus (*Ant.* I. iii. 5, 6 [89 ff]), who is unconscious of any discrepancy between 'Armenia' and the 'Kordyaean' mountain of Berosus. His statement about relics of the Ark being shown in his time appears to be borrowed from Berosus, and applies to whatever mountain that writer had in mind—possibly *Jebel Jûdî*! The Targums and Peshiṭta, however, which are influenced by this tradition, read *Ḳardû* (Kurdistan), in verbal agreement with Berosus. The cuneiform Flood-legend puts it much farther S., at the 'mountain of Nişir, probably in one of the ranges E. of the Tigris and S. of the Lesser Zab. This, of course, is quite beyond any imaginable extension of the name Ararat. Assuming, therefore, that the Biblical and Babylonian narratives have a common origin, the landing-place of the Ark would seem to have been pushed gradually northward, the natural tendency of such a tradition being to attach itself to the highest mountain known at the time. On this principle the ultimate selection of the imposing Mount Massis would be almost inevitable; and it is *probable* that this is the view of Gn 8^{4}, although the alternative hypothesis that *Jebel Jûdî* is meant has still some claim to be considered. The suggestion of Nöldeke, that Ararat is a late substitution for Kardû in the original text of Genesis, has nothing to recommend it.

J. S.

ARARITE, 2 S 23^{33} (RV).—See HARARITE, **2.**

ARATHES, 1 Mac 15^{22} (RV).—See ARIARATHES.

ARAUNAH.—A Jebusite whose threshing-floor David bought in order to erect an altar to Y", because the plague which followed the numbering of the people was halted there, 2 S 24^{18}. He is called **Ornan** in 1 Ch 21^{15} (cf 2 Ch 3^{1}), where the price paid to him by David is given as 600 shekels of gold (1 Ch 21^{25}), as against the figure of 50 shekels of silver in 2 S 24^{24}.

ARBA is assumed as the founder of Kiriath-arba, later Hebron (q.v.). It is stated that he was the father of the giants (Jos 14^{15} 15^{13} 21^{11}), who were traditionally associated with Hebron in pre-Israelite days. *Arba'* means 'four,' and probably refers to four originally distinct settlements which became the later Hebron.

ARBAH, CITY OF, Gn 35^{27} (AV).—See KIRIATH-ARBA.

ARBATHITE.—A gentilic meaning 'a man of Beth-arabah' (q.v.), 2 S 23^{31}.

ARBATTA.—A district of Palestine, mentioned in 1 Mac 5^{23}; perhaps to be identified with **Arubboth** (q.v.).

ARBELA.—The discrepancy between 1 Mac 9 and Jos. *Ant.* XII. xi. 1 [421], our only authorities, makes uncertain the route of Bacchides in his march on Jerusalem. Josephus makes him pitch his camp at Arbela in Galilee: 1 Maccabees brings him 'by the road which leads to Gilgal,' where he encamped against 'Mesaloth in Arbela.' His course thence points to *Jiljilia* as Gilgal, about 5 miles N. of *Bîr ez-Zeit*, where the battle was fought with Judas. **Mesaloth** might then be sought in *Meselieh*, about 3 miles SE. of Dothan. But no name resembling Arbela, either of town or district, is found in the neighbourhood; although Eusebius (*Onomasticon*) seems to have known an Arbela not far from Lejjun. On the other hand, Arbela in Galilee survives in the modern *Irbil* or *Irbid*, a ruin on the S. lip of the gorge, *Wâdi Ḥamâm*, which breaks westward from Gennesaret. There is, however, no trace of a Mesaloth here, unless indeed Robinson's ingenious suggestion is right, that it may be the Hebrew *mesillîth*, referring to the famous caverned cliffs in the gorge, whence Bacchides extirpated the refugees.

W. E.

ARBITE.—A gentilic found only in 2 S 23^{35}, where LXX has 'Archite (q.v.); perhaps from **Arab** (q.v.). In the parallel passage in 1 Ch 11^{37} we find 'the son of Ezbai,' which some MSS of LXX have in 2 S 23^{35}.

ARBONAI, Jth 2^{24} (AV, RV).—See ABRON.

ARCH.—It is usually stated that the Hebrews were unacquainted with the architectural principle of the arch, but in view of the extreme antiquity of the arch in Babylonian mason work, as *e.g.* at Nippur, of the discovery of early arches by modern explorers, and of the vaulted roofs of later Jewish tombs, this view is

now seen to be erroneous, although the arch is not mentioned in Scripture. The word 'arch' occurs in AV and RV of Ezk 40[16ff], but this is an error for 'vestibule' (so RSV). See TEMPLE.

ARCHAEOLOGY.—1. Definition and limitations.—Archaeology can best be defined as a study of the material remains of the past. In this definition, some of its limitations are immediately apparent. In most conditions, only certain materials survive; for instance, only very rarely do organic materials such as wood and textiles survive. The picture of any settlement as recovered by archaeology is therefore an incomplete one. Secondly, ideas, social organization and many other aspects of the human element, can sometimes be inferred, but rarely proved. Thirdly, unless, exceptionally, inscriptional material is found, the actors on the archaeological scene remain anonymous.

2. Functions.—Archaeology has two main functions. For the period before written history, it must serve as a substitute in establishing, as far as its limitations allow, the sequence of events and the way men lived. Once these events are available from written documents, it can both fill in details and provide the background by showing how the common man, in whom history is often not interested, lived. Between the two extremes of prehistory and a full historical record, it can serve a combination of these purposes, and also help to unravel the complexities of an incomplete or confused historical record. In Palestine, the full historical record begins approximately with the establishment of the United Monarchy. From that time on, the course of events can be satisfactorily traced from the historical works of the Bible; archaeology provides the background of how the common people lived, and suggests an explanation for many obscure details. The period covered by the entry of the Israelites into Palestine and the times of the Judges is within the stage of written history, but a history for the most part compiled from orally-transmitted tradition. Such history must be confirmed and elucidated by archaeology. This applies with greater force to the earlier phase of the times of the Patriarchs, the Descent into Egypt and the Exodus. Written history thus begins to touch Palestine at a date probably in the 18th or 17th cent. B.C., but detailed contemporary records are not available until about the 10th cent. Before the 18th cent., Palestine itself is prehistoric, though an occasional gleam of light is thrown upon events there from the literate civilization of Egypt, and from the written records of Egypt and Mesopotamia the general course of events in the region can be established. For everything earlier than the 3rd millennium, archaeology is the only source.

3. Chronology.—As will be described in a subsequent paragraph, archaeology can establish a sequence, but not as a rule an exact chronology.

Calendars were developed in Egypt and Mesopotamia in the 4th and 3rd millennia. In both countries, king lists exist from early in the 3rd millennium. Reasonably accurate dates for rulers in Egypt can be established from that date, though there is not yet complete agreement between scholars; dates given for the beginning of the 1st dynasty vary between *c* 3200 B.C. and *c* 2900 B.C. In Mesopotamia, dating is not so close, and there is still uncertainty as late as the beginning of the 2nd millennium.

In non-literate countries, such as Palestine in the 3rd and 2nd millennia, an exact chronology can only be established by relating events, or points in an archaeologically fixed sequence, to one of the countries, usually Egypt, with a calendar which can be related to our own. For instance, major political events such as the end of the Old Empire in Egypt, can often be correlated with events in adjoining areas. Historically recorded campaigns of Egyptian rulers can sometimes be correlated with destructions of Palestinian towns. Alternatively, recognizable and datable Egyptian objects found in a Palestinian or Syrian context may suggest a date for that context, or Palestinian and Syrian objects found in a datable deposit in Egypt can suggest a date for the material with which these objects are ordinarily found in their native lands.

Very recently the radio-active carbon method of dating has been developed. This method is invaluable for the older archaeological sites, and all dates earlier than *c* 3000 B.C. (*e.g.* Jericho, q.v.) are dependent on it. It is less useful for later periods, since the dating cannot usually be exact within a margin of three hundred years and later sites can usually be dated more closely by other methods.

4. The archaeological sequence.—An archaeological sequence is established by the study of the types of common objects found in any settlement. The most useful material is pottery, or, for the pre-ceramic period, the flint industry. The building-up of a reliable corpus of information on these objects is a slow business, and, as far as Palestine is concerned is still in progress; a reliable sequence only began to be established in the period between the two wars. As far as flint industries are concerned, most of the basic work was done by M. René Neuville, and a reliable sequence was mainly the result of Professor Dorothy Garrod's work on the Mount Carmel caves between 1929 and 1934. The first beginnings of a pottery sequence were made by Sir Flinders Petrie in his excavations at Tell el-Ḥesī in 1890. He observed that recognizably different types of pottery appeared at successive levels in the mound. Some of these, and also scarabs, he recognized as associated with phases in Egyptian history. His classification was very broad, and his actual dating was wrong owing to his inflated Egyptian chronology, but a beginning was made.

It can now be said that for Palestine there is a reasonably accurate and complete sequence from the end of the 4th millennium onwards. For the earlier periods there are gaps. The material is still small and not very coherent for the 4th millennium and the early 3rd millennium. For periods earlier than that we are still dependent on a few sites, notably Jericho. But each year, new information is being secured, and the picture will soon be filled in.

5. Excavation methods.—The value of all finds is enormously increased if they are found on scientifically conducted excavations. The dawn of scientific excavation in Palestine came with Petrie's excavations at Tell el-Ḥesī, already mentioned. Petrie recognized that tells are built up by the construction of successive buildings on the same site, each rising on the ruins of its predecessor. The depth in the mound at which an object was found therefore gave a broad indication of its antiquity. Petrie accordingly recorded his finds in foot-levels with reference to some datum point. This was a beginning, but it represents a very elementary method of stratigraphy.

To obtain a true interpretation of stratification, it is necessary actually to observe and record all layers of soil. Floors of buildings, occupation levels, destruction or decay levels, pits, trenches sunk to dig out the stones of a wall, must all be observed while excavation is in progress, the finds correctly attributed to them, and the deposits correctly interpreted. In this way the relation of the structures to the finds can be established, and they can be dated by the finds, either relatively by the flint or pottery sequence, or absolutely by coins or epigraphic material.

Though Petrie first introduced stratigraphical methods to Palestine over sixty years ago, progress has been slow, largely owing to the temptation to dig with a far larger labour force than would allow of accurate observation by those in charge. The results of many of the earlier excavations are therefore unreliable, though in some cases the records are sufficiently detailed to enable revised conclusions to be drawn in the light of modern knowledge.

6. Archaeology and Biblical Studies.—The extent of the help which archaeology has given in tracing the history of Palestine is well illustrated by a comparison of the article on *Palestine* in this edition and that in the first. In the latter, Professor R. A. C. Macalister could write 'The earliest dawn of history in Palestine has left no trace in the country itself. . . . About 3000 B.C. we first reach a

period where excavation in Palestine has some information to give.' Actually, most of the information has to be corrected in the light of modern knowledge.

The greatest advance has of course come in knowledge of the earlier periods. An outline history can now be provided back to the beginnings of settled life soon after 8000 B.C., and something is known of the Palaeolithic hunters who inhabited Palestine for hundreds of thousands of years before that.

The information obtained by archaeology which can throw light on the Bible can be grouped under four headings: (1) the culture and organization of the country as found by the Israelites on their entry; (2) the problems of the chronology and character of the beginnings of Israelites settlement; (3) the culture and background of the Israelites in the historical period; (4) the culture and background of the inhabitants in NT times.

As regards the first heading, we can now give a fairly complete picture. Palestine of the Middle Bronze Age, the period within which the wanderings of the Patriarchs probably fell, is well known. The excavations at Jericho, Tell Beit Mirsim, and elsewhere have provided a picture of the towns. The culture was individually Palestinian, with a traceable combination of Amorite and Canaanite elements (see PALESTINE); there was some slight Egyptian influence, and some Egyptian political control. Through this country of little towns and agricultural communities the Patriarchs journeyed as pastoralists.

This was still essentially the picture of the country into which the Israelites penetrated as settlers. Archaeology has unfortunately not provided conclusive chronological evidence of the entry. The latest Bronze Age occupation of Jericho apparently came to an end in the second half of the 13th cent. B.C., a date which does not fit the views either of the proponents of a date for the entry into Palestine *c* 1400 B.C., or of those of a later date, *c* 1260 B.C. Archaeological evidence for Ai is even more unsatisfactory, for it was not apparently occupied after *c* 2300 B.C.; either the story of its capture is aetiological, or the site was confused with another, perhaps Bethel. Hazor seems to have been destroyed early in the 13th cent., but the excavations are still (1958) in progress, and all the evidence is not yet available. Archaeological evidence is, however, emphatic that there was no major cultural break until after 1200 B.C. Archaeology would therefore support the view that there was a gradual infiltration in comparatively small numbers, and only a gradual assertion of supremacy over the Canaanites. This would reflect the impression which can be derived from the Book of Judges, and the fact that it was not until *c* 1000 B.C. that the first Jewish kingdom emerged.

For the kaleidoscopic history of the Jewish kingdoms, archaeology produces comparatively little evidence. The towns suffer a series of destructions, but archaeological dating is not yet sufficiently refined to enable them to be related with known campaigns. Of the magnificence of the kingdom of Solomon, there is almost no evidence. The probability is that it was all concentrated at Jerusalem, too destroyed and too buried to provide evidence. The evidence of Phoenician masonry and Phoenician art at Samaria and Megiddo in the later kingdom of Israel does, however, give some indication of what Jerusalem may have been.

The inhabitants of OT Palestine were undoubtedly simple folk. Excavations at Beth Shemesh, Tell Beit Mirsim, Lachish, Tell Naṣbeh (Mizpah?), and other places, show small towns with unpretentious houses and simple equipment. The prevalence of fertility figurines and Canaanite cult objects, particularly in the 8th cent., are evidence of the heathen practices against which the prophets preached.

Of Jerusalem in the time of Christ, almost nothing is known, for it was almost completely destroyed, and obliterated by Aelia Capitolina. Prolonged research has failed to produce conclusive evidence as to the authenticity of the site of the Holy Sepulchre by establishing the line of the north wall of the city in the 1st cent. A.D. A number of excavations have, however, given a picture of what the appearance of other towns, notably of Samaria and of Gerasa (Jerash) in the Decapolis. Both these towns were dominated by buildings in a classical style which is a combination of Roman and Hellenistic traditions. Samaria was largely rebuilt in the time of Herod, with grandiose public buildings, and was renamed Sebaste.

7. Epigraphic material.—From time to time excavations produce material which is of the greatest importance culturally, linguistically, and epigraphically. The two most important finds bearing on the first aspect are those at Râs Shamra and Mari. The former provides evidence of the Canaanite pantheon and religion. The latter gives vivid evidence of the Hurrian social structure, and shows to what a large extent the customs and laws of the ancestors of the Israelites were influenced by their contacts with the Hurrians.

Archaeology is gradually building up evidence of the development of the Hebrew script. Finds such as the Samaria ostraca, the Lachish letters and stamped jar handles from known archaeological contexts have given much help to epigraphists in dating the development of the script. The most recent finds, the Dead Sea Scrolls, have not only helped in this, but also throw much light on the history of the books of the OT. K. M. K.

ARCHANGEL.—See ANGEL.

ARCHELAUS.—Mt 2^{22}. See HEROD, **2.**

ARCHER.—See ARMOUR, ARMY.

ARCHEVITES, Ezr 4^{9} (AV, RV).—See ERECH.

ARCHI, Jos 16^{2} (AV).—See ARCHITE.

ARCHIPPUS (Phn^{2}, Col 4^{17}) has usually been thought of as a member of the household of Philemon of Colossae, probably his son. He shared his spirit, since St. Paul, referring doubtless to his aid in missionary operations in those parts, styles him 'our fellow-soldier.' He had been entrusted with some important office, a 'service' or 'ministry,' in the Church, whether at Colossae, or, as Lightfoot, in view of the preceding context, more probably supposes, at the neighbouring town of Laodicea; and, considering the spiritual atmosphere of the place (Rev 3^{14-19}), one is not surprised that the Apostle should have thought it needful to exhort him to zeal in his ministry. In another more recent view, Archippus' 'service' was to secure the release for Paul's use of the slave Onesimus. See PHILEMON. D. S.—J. K.

ARCHITE.—A gentilic of unknown derivation, given to Hushai (2 S 15^{32}). See also ARBITE. In Jos 16^{2} the Archites (AV wrongly 'Archi') are located on the N. border of Benjamin.

ARCHITECTURE.—The Hebrews never developed a native style of architecture. The genius of the people lay elsewhere. Alike in civil, religious, and funerary architecture, they were content to follow alien models. In domestic architecture there was little symmetry, and houses were fitted into available space as best could be done. Large buildings from the period of the Judges have been found at Bethel and Beth-shemesh, consisting of two storeys of rooms round open courtyards. Houses of the period of the monarchy have walls of rubble, with stone pillars to support the ceiling or upper storey. David's palace in Jerusalem was a more ambitious building, and it is significant that workmen, plans, and decorative material were all Phoenician (2 S 5^{11}). The palace and Temple of Solomon were likewise the work of Phoenician architects, and the former doubtless supplied the model for the more ambitious private buildings erected under the monarchy. Late Egyptian influence has been traced in the tombs in the Valley of Jehoshaphat, but the prevailing influence from the beginning of the 3rd cent. was undoubtedly Greek (cf 1 Mac 1^{14}, 2 Mac 4^{12}). The many magnificent buildings of Herod, for example, including the colonnades and gates of the Temple, were entirely built in the prevailing Graeco-Roman style. See, further, FORTIFICATION, PALACE, TEMPLE, TOMB. A. R. S. K.—H. H. R.

ARCHIVES.—The 'house of the archives' is mentioned in Ezr 6[1] (AV 'house of the rolls'), and in Ezr 5[17] (where AV, RV have 'the king's treasure house' for 'the royal archives').

ARCTURUS.—See STARS.

ARD.—A son of Benjamin in Gn 46[21], but his grandson in Nu 26[40] and 1 Ch 8[3] (here called **Addar**); patronymic **Ardites**, Nu 26[40].

ARDAT.—A 'field' in an unknown situation, 2 Es 9[26] (AV **Ardath**).

ARDATH, 2 Es 9[26] (AV).—See ARDAT.

ARDITES.—See ARD.

ARDON.—A son of Caleb, 1 Ch 2[18].

ARELI.—A son of Gad, Gn 46[16], Nu 26[17]. Patronymic **Arelites**, Nu 26[17].

AREOPAGUS.—Really the *Areios pagos*, 'Hill of Ares,' or Mars Hill—Ares being the Greek god of war corresponding to Roman Mars. The hill is a rocky knoll 380 feet high, lying NW. of the Acropolis and separated from the latter by a connecting ridge or saddle. From early times this was the place where a court known as 'Council from the Areopagus' met to try cases of murder. By the time of St. Paul's visit to Athens this court had greatly extended its functions. Cicero already speaks of the state of the Athenians as led by the Areopagus, thus implying political activities. One of its new functions was the supervision of education. This would imply a right to control the introduction of new philosophical or religious teachings, and would require the propagandists of such to appear before the council. Some have held that the council would not have held sessions on Mars Hill itself. The latter was certainly not suitable for audibility to a surrounding crowd, as presupposed in Ac 17[19, 22]. According to a recent theory the council may have met on the ridge extending SE. to the Acropolis, where there would be enough room for the public to gather. One member of the Council was even persuaded of Paul's teaching—Dionysius the Areopagite (17[34]), whose name was used and made famous by a Neo-Platonic Christian mystic of A.D. 500.
E. G. K.

ARES, 1 Es 5[10] (AV, RV).—See ARAH.

ARETAS.—This is the Greek form of the name *Harithah*, borne by four known rulers of the Nabataean kingdom, whose capital in Biblical times was Petra, the ancient 'Sela,' to the S. of the Dead Sea. These **Nabataeans** were mainly of Arab stock though they used Aramaic as their language of cultural expression. The first Aretas must have been reigning *c* 169 B.C., for in 2 Mac 5[8] he is mentioned as the *tyrannus* of the Arabs with whom Jason attempted to find refuge, and was doubtless the ruler of those Nabataeans with whom Judas Maccabaeus had friendly relations (1 Mac 5[25], 9[35]). It was Aretas II. who sought to aid Gaza in 96 B.C. when it was menaced by Alexander Jannaeus (Jos. *Ant.* XIII. xii. 3 [358]). Aretas III., called Philhellene, the greatest of all known Nabataean rulers (87–62 B.C.), was the one who supported Hyrcanus II. against Aristobulus II., when Hyrcanus took refuge with him at Petra (Jos. *Ant.* XIV. i. 4 [14]; ii. 1–3 [19 ff]; *BJ* I. vi. 2–4 [123 ff]). Aretas IV., called Philodemos (9 B.C.–A.D. 40), aided the Roman legate Varus against Herod Antipas (Jos. *Ant.* XVII. x. 9 [287]; *BJ* II. v. 1 [68]), in revenge for Herod's having married and then repudiated his sister. He apparently regained some control in Damascus, which Aretas III. had held in 85 B.C. but had lost, for he is the Aretas whose ethnarch in Damascus sought to apprehend Paul (2 Co 11[32f]).
A. J.

ARGOB.—**1.** Argob and Arieh were guards of Pekahiah, 2 K 15[25], who fell by the hands of Pekah along with their master. RSV omits, as probably misplaced from the list of places in v.[29] (cf RSVm). **2.** A district in the kingdom of Og, abounding in strong cities and unwalled towns. It was subdued by 'Jair son of Manasseh,' and became the possession of his tribe (Dt 3[3, 13], 1 K 4[15], etc.). It is called 'the Argob (Dt 3[13]). This, together with the fact that *ḥebhel*, 'measured area,' always precedes the name, seems to indicate a definitely marked district. This would apply admirably to the great lava field of *el-Lejā*, NW. of *Jebel Ḥaurân*. Within this forbidding tract the names of more than seventy ruined sites are found. Had Gesenius rightly translated 'a heap of stones,' the identification would be almost certain. But the name seems to mean 'arable land' (*reghebh* = 'clod,' Job 21[33] 38[38]). Argob must therefore be sought elsewhere. The W. slopes of the mountain (now *Jebel ed-Drûz*) would always form a clearly defined district. They abound in ruins of antiquity; while the rich soil, now turned to good account by the Druzes, would amply justify the name of Argob.
W. E.

ARIARATHES (AV, Vulgate, Rahlfs following Sinaiticus) or **ARATHES** (RV and Swete, following Alexandrinus etc.) was king of Cappadocia 163–130 B.C. In 139 B.C. the Romans wrote letters to Ariarathes V. and other eastern sovereigns in favour of the Jews (1 Mac 15[22]). In 130 B.C. he joined the consul P. Licinius Crassus in the attack on Aristonicus the son of Eumenes II. of Pergamum, who claimed the kingdom despite Attalus III.'s bequest of it to Rome. They were totally defeated.
F. C. G.

ARIDAI.—Ninth son of Haman, put to death by the Jews, Est 9[9].

ARIDATHA.—Sixth son of Haman, put to death by the Jews, Est 9[8].

ARIEH ('lion').—Mentioned in 2 K 15[25]. See ARGOB, **1.**

ARIEL.—**1.** One of Ezra's chief men, Ezr 8[16]. **2.** The name of a Moabite, according to RV of 2 S 23[20], 1 Ch 11[22], whose two sons were slain by Benaiah. AV has 'two lion-like men,' and RSV 'two ariels,' adding in margin that the meaning is unknown. **3.** A name given to Jerusalem by Isaiah (29[1ff]). The word probably means 'altar-hearth,' and it is found on the Moabite Stone (see MESHA). It is perhaps used for Jerusalem here, since the altar of Y" was there; cf Is 31[9], Ezk 43[15ff]. It has been suggested that in Is 29[1] we should read *Uriel* ('city of God'), as a word-play on *Urusalim*, the ancient form of the name 'Jerusalem.' But this does not fit the other occurrences.

ARIMATHEA (Mt 27[57], Mk 15[43], Lk 23[51], Jn 19[38]).—A place known only in connexion with Joseph. It was probably near Lydda. See Map 15.

ARIOCH.—The name of one of the four kings who raided Canaan in the time of Abraham (Gn 14[1]). He is called king of Ellasar. The identification of Ellasar with Larsa, and of Arioch with Warad-Sin, who reigned in Larsa (1997–1986 B.C.), is now abandoned. The name Ariukki occurs as a Hurrian name in the Nuzi tablets. It seems most probable that the name is not that of some unidentified king of Larsa, contemporary with Hammurabi, but the name of a Hurrian prince whose city may possibly be identified with Telassar in 2 K 19[12].
S. H. He.

ARISAI.—Eighth son of Haman, put to death by the Jews, Est 9[9].

ARISTARCHUS.—One of St. Paul's companions in travel. He was 'a Macedonian of Thessalonica' (Ac 19[29] 27[2]), but according to Col 4[10f] a Jew. From 'Greece' (probably Corinth) he accompanied Paul on his last journey to Jerusalem (Ac 20[4]); he was one of the representatives of the Pauline communities which sent a collection to the poor of the community at Jerusalem. He also embarked with Paul on his voyage to Rome (27[2]). In Col 4[19] he is called St. Paul's 'fellow-prisoner' (cf Phn [23]). The expression may mean the voluntary sharing of Paul's captivity by Aristarchus. At Ephesus, Aristarchus and Gaius were seized by the crowd and brought to the theatre; but that would not justify the expression 'fellow-prisoner' (Ac 19[29]).
E. H.

ARISTOBULUS.—1. The name of a son and of a grandson of Herod the Great. The grandson lived as a private individual at Rome, and was a friend of the Emperor Claudius; those greeted by St. Paul in Ro 16[10] were probably some of his slaves. If he was then dead, they might have become members of the Imperial household, but would still retain Aristobulus' name. **2.** The teacher of Ptolemy (2 Mac 1[10]). It was also a Maccabaean name. See MACCABEES.

ARIUS (1 Mac 12[7, 20]).—A king of Sparta, grandson and successor of Cleomenes II. His reign lasted from 309 to 265 B.C., and he was contemporary with the high priest Onias I., the successor of Jaddua. Friendly letters were interchanged between Arius and Onias (probably about 300 B.C.); and Jonathan Maccabaeus refers to these communications in a letter which he sent by his ambassadors to Sparta (*c* 144 B.C.), 1 Mac 12[7ff, 19ff]. The AV reading, **Darius** (in v.[7]), is that of the Greek codices; Fritzsche corrected it from Jos. *Ant.* XII. iv. 10 [225].

ARK.—This word, from Latin *arca*, 'a chest,' is the rendering of two Hebrew words, of which one (*tēbhāh*, probably a loan-word) is applied both to the basket of bulrushes in which the infant Moses was exposed, and to the Ark built by Noah (see DELUGE). The other (*ʾārōn*, the native word for box or chest, 2 K 12[10f]), is used for a mummy-case or coffin (Gn 50[26]), and in particular for the sacred Ark of the Hebrews.

Ark of the Covenant.—1. *Names of the Ark.*—Apart from the simple designation 'the ark' found in all periods of Hebrew literature, the names of the Ark, more than twenty in number, fall into three groups, which are characteristic (*a*) of the oldest literary sources, viz. Samuel and the traditions of the Hexateuch designated by the symbols J and E; (*b*) of Deuteronomy and the writers influenced by Deuteronomy; and (*c*) of the priestly tradition of the Hexateuch (P) and subsequent writings. In (*a*) we find chiefly 'the ark of Y″,' doubtless the oldest name of all, and 'the ark of God'; in (*b*) the characteristic title is 'the ark of the covenant'—alone or with the additions 'of Y″,' 'of God,' etc.—a contraction for 'the ark or chest containing the tables of the covenant' (Dt 9[9ff]), and therefore practically 'the ark of the Decalogue'; in (*c*) the same conception of the Ark prevails (see below), but as the Decalogue is by P termed 'the testimony,' the Ark becomes 'the ark of the testimony.' All other designations are expansions or modifications of one or other of the above.

2. History of the Ark.—The oldest Pentateuch traditions (J, E) are now silent as to the origin of the Ark, but since the author of Dt 10[1-6] was doubtless acquainted with these traditions, it may be assumed that its construction was there also assigned to Moses in obedience to a Divine command. It certainly played an important part in the wanderings (Nu 10[33ff] 14[44]), and in the conquest of Canaan (Jos 3[3ff] 6[6f]), and finally found a resting-place in the temple of Shiloh under the care of a priestly family claiming descent from Moses (1 S 3[3]). After its capture by the Philistines and subsequent restoration, it remained at Kiriath-jearim (1 S 4[1]–7[1]), until removed by David, first to the house of Obed-edom, and thereafter to a specially erected tent in his new capital (2 S 6[10ff]). Strangely enough, there is no further mention of the Ark in the historical books. Whether it was among 'the treasures of the house of the Lord' (1 K 14[26]) carried off by Shishak (*c* 950 B.C.), or whether it was still in its place in the days of Jeremiah (3[16f]) and was ultimately destroyed by the soldiers of Nebuchadrezzar (586 B.C.), it is impossible to say. There was no ark in the Temples of Zerubbabel and Herod.

3. The significance of the Ark.—In attempting a solution of this difficult problem, we must, as in the foregoing section, leave out of account the late theoretical conception of the Ark to be found in the Priestly tradition (P; see TABERNACLE), and confine our attention to the oldest sources. In these the Ark—a chest of acacia wood, according to Dt 10[3]—is associated chiefly with the operations of war, in which it is the sign of the presence of Y″, the God of the armies of Israel, or His actual representative. Its presence on the field of battle is the warrant of victory (1 S 4[3ff], cf 2 S 11[11]), as its absence is the explanation of defeat (Nu 14[44]). Its issue to and return from battle are those of Y″ Himself (Nu 10[35f]). This virtual identification of the Ark with the personal presence of Y″ in the oldest narratives (see, besides the above 1 S 6[20], 2 S 6[7f, 14]) has been explained in numerous ways. It has been suggested that the original Ark was a box containing sacred stones in which the Deity was conceived to dwell. Attention has also been called to the use by certain bedouin tribes of Arabia of an elaborate saddle-structure, often in the form of a tent, sacred to the tribe, and of particular significance in time of battle as the sign of the active presence of the tribal deity.

Considerable archaeological evidence has been adduced to support yet another hypothesis. Since later tradition clearly depicts the Ark as a throne-seat upon which the invisible Deity was conceived to be enthroned, especially upon the great holy days (see 2 S 6[2]), it has been proposed that such an understanding of the Ark may be more nearly correct than that found in Dt 10[1ff]. Numerous representations of deities and kings, seated upon thrones supported by mythological beasts, have been unearthed. It is argued, therefore, that the Ark of the wilderness period may have been such a throne-seat borne in battle and during the wanderings of the Israelites, representing the seat of the invisible Y″, from which He guided His people and gave victory over His enemies. It has also been proposed that the Ark played a highly significant part in the ceremonies and processional acts associated with the celebration of the New Year and the renewal of the Israelite covenant (2 S 6[12-19], Ps 132; see also Jos 24. 8[30-35], Dt 11[26-32] 27). Thus the Ark, rather than representing a primitive stage in the development of the religious understandings of early Israel, may have been a cult object well suited to the expression of the religious understandings associated with the figure and work of Moses: Y″ was a God active in history; He accompanied his people on their wanderings; gave deliverance in battle. Yet He was not to be represented in any form, nor could He always be counted upon to save simply because His throne had been carried into battle (1 S 4[10-11]).

A. R. S. K.—W. J. Ha.

ARKITE is used (Gn 10[17], 1 Ch 1[15]) for the people of Arka, modern *Tell ʿArqa*, a town and district of Phoenicia about 12 miles north of Tripolis. It was taken by Tiglath-pileser III. in 738 B.C. As the birthplace of the Emperor Alexander Severus, it was later called Caesarea Libani. It is probably mentioned in the Amarna letters under the form *Irkata*, and in 15th cent. Egyptian under the form *ʿrqt*.

ARM.—The Hebrew word for arm occurs some ninety times in the OT; the corresponding Greek word occurs three times in the NT and in each instance in an allusion to an OT passage. The verb 'to take into one's arms' occurs at Mk 9[36] 10[16], Lk 2[28]. The Hebrew word is used of animals (Nu 6[19], Dt 18[3] 'shoulder'), of man (Jg 15[14] 16[12]) and of God (Ex 6[6] 15[16]). About one-fifth of the occurrences are quite literal, and mean the forearm or the whole arm. Predominantly, however, the term is used in a psycho-physical sense to mean 'strength' either of body or soul. The fact that the arm of the labourer or warrior obviously expresses the energy of his life, makes this usage natural (cf Is 17[5], 2 S 22[35]). Thus a man who displays vigour is 'a man of arm' (Job 22[8]); and the arm will be the vital energy of an individual or a society (1 S 2[31], Ps 10[15] 44[3] 83[8]); it is by the arm bared for action that the soul manifests itself. It may thus display tyranny or cruelty (Job 38[15], Ps 10[15], Ezk 30[21-25]); alternatively if the soul is weak, so the arm will be ineffective (Job 26[2], 2 Ch 32[8], Jer 48[25]). By a natural extension, the forces of a nation engaged in war, are the 'arms' of the nation (Dn 11[15, 22, 31]), not

in our English sense of 'weapons' for which a quite different word is used.

It is this psychical usage, rather than anthropomorphism, which enables the word to be used of God's activity on behalf of His people, and this usage accounts for some two-fifths of the occurrences of 'arm' in the OT. In the early ritual word of Ex 15^{1-18}, the thought of Yahweh as the mighty warrior subduing the foes of Israel with His great strength is presented (v.16), but normally the word is used in the sense of Yahweh's effective power to judge and save, cf Dt 4^{34}, Ps $89^{10, 13, 21}$, Is 40^{10}. It is this usage that appears in the NT (Lk 1^{51}, Ac 13^{17}). The word has become part of the salvation terminology (Is 59^{16} 63^{5}). Finally the word is used of God's creative activity (Job 40^{8}, Jer 27^{5}, Is 51^{9}). The last passage suggests that there is an allusion to an ancient Canaanite creation myth, although the ideas originally expressed have been assimilated into Yahweh worship. Thus the arm of the Lord is Yahweh Himself, active to effect His righteousness and salvation, and to create and maintain His world. A. S. H.

ARMAGEDDON (RV **Har-Magedon**).—The name of the place in which, according to Rev 16^{16}, the kings of the lower world are to be gathered together by the Dragon, the Beast and the false prophet, to make war upon God. The most generally accepted location makes this to be the mountains of **Megiddo**, that is to say, those surrounding the plain of Megiddo, in which so many great battles of the past were fought. The difficulty with this explanation is that one would expect the plain rather than the mountains to be chosen as a battle-field. Another explanation finds in the word a survival of the name of the place in which the gods of Babylonia were believed to have defeated the dragon Tiāmat and the other evil spirits. Such a view, however, compels a series of highly speculative corrections of the text, as well as various critical suppositions regarding the structure of the Book of Revelation. While the reference is apocalyptic, it seems probable on the whole that the word perpetuates Megiddo as the synonym of the battle-field—whether above the earth or in the under world—on which the final victory over evil was to be won. S. M.—F. C. G.

ARMENIA.—See Ararat.

ARMENIAN VERSION OF OT.—See Greek Versions of OT, **11.**

ARMLET.—See Ornaments, **4**, Tablet, **2.**

ARMONI.—Son of Saul by Rizpah; he was hanged by the Gibeonites, 2 S 21^{8}.

ARMOUR, ARMS.—The soldier's arms, offensive and defensive, are never so termed in our EV; '**armour**,' 'whole armour' (Eph 6^{11} [Gr. *panoplia*], the 'harness' of 2 Mac 15^{28}, RV and RSV 'full armour'), and more frequently '**weapons of war**' are the terms employed. In RV and RSV '**harness**' in this sense has in most cases given place to 'armour.'

1. *Offensive arms.*—In a familiar representation from an Egyptian tomb of date *c* 1895 B.C., a band of Semitic nomads are depicted with the primitive arms of their race—the short spear, the bow, and the throw-stick—the last perhaps the **handstaves** (RSV **handpikes**) of Ezk 39^{9}. In OT the principal arms of attack are the sword, the spear, the javelin, the bow, and the sling. (*a*) The **spear** claims precedence as an older weapon than the sword. The normal Hebrew form, the *ḥªnîth*, had a stout wooden shaft with a flint, bronze, or iron (1 S 13^{19}) head, according to the period. Like the spear of the modern Bedouin sheikh, it figures as a symbol of leadership in the case of Saul (1 S 22^{6} 26^{7}, cf 18^{10ff} RV and RSV). The *rōmaḥ* appears to have been a lighter form of spear, a **lance**, and to have largely supplanted the heavier spear or pike in later times (Neh $4^{13, 16}$, Jl 3^{10}). Both are rendered 'spear' in EV. (*b*) The *kîdhôn* was shorter and lighter than either of the above, and was used as a missile, and may be rendered **javelin** (Jos $8^{18, 26}$ RV and RSV, Job 41^{29} RV and RSV 'the rushing of the javelin') or **dart.** The latter term is used as the rendering of several missile weapons, of which the precise nature is uncertain. For a new interpretation of *kîdhôn* see below, **3.**

(*c*) The **sword** had a comparatively short, straight blade of iron (1 S 13^{21}, Is 2^{4}), and was occasionally two-edged (Ps 149^{6}, He 4^{12}). Ehud's weapon, only 18 inches long, was rather a **dagger** (Jg 3^{16} AV; RV and RSV 'sword'). The sword was worn on the left side in a leather or metal **sheath** (1 S 17^{51}), attached to a waist-belt or girdle (1 S 17^{51} 25^{13}, 2 S 20^{8} RV). It occurs frequently in symbol and metaphor in both OT and NT. It is appropriately the symbol of war, as the ploughshare is of peace (Is 2^{4}, Mic 4^{3}, Jl 3^{10}). In NT the word of God is described as a two-edged sword (He 4^{12}), and by St. Paul as the 'sword of the Spirit' (Eph 6^{17}).

(*d*) The **bow** is common to civil (Gn 21^{20}) and military life, and vies in antiquity with the spear. It was made of tough, elastic wood, sometimes mounted with bronze (Ps 18^{34} [RV, RSV] Job 20^{24}). Horn also was used for **bows** in ancient times, and those with the double curve seem to have been modelled on the horns of oxen. The bow-string was usually of ox-gut, the **arrows** of reed or light wood tipped with flint, bronze, or iron. The **battle bows** (Zec 9^{10} 10^{4}), at least, must have been of considerable size—the Egyptian bow measured about 5 feet—since they were strung by pressing the foot on the lower end, while the upper end was bent down to receive the string into a notch. Hence the Hebrew expressions 'to tread (=string) the bow,' and 'bow-treaders' for **archers** (Jer $50^{14, 29}$). The arrows, 'the sons of the quiver' (La 3^{13} AV; RV **shafts**, RSV 'arrows'), were carried in the **quiver,** which was either placed on the back or slung on the left side by a belt over the right shoulder. Another type of bow, the composite bow, was well known in antiquity. The earliest representations come from the era of the Dynasty of Akkad (24th cent. B.C.); from there the bow moved west, and was apparently brought to Egypt in the time of the Hyksos, though the first examples come from New Kingdom. The best of these were found in the tomb of Tut-ankh-amun (cf Howard Carter, *The Tomb of Tut-ankh-amen*, iii. [1933], 138 ff). The bow was made of strips of horn and wood glued together and then bound with bark, thus producing an extremely tough and powerful weapon. For discussion of the composite bow, see W. F. Albright and G. E. Mendenhall, *JNES* i. (1942), 227–29; also Y. Sukenik (Yadin), *BASOR*, No. 107 (1947), 11–15.

(*e*) The **sling** was the shepherd's defence against wild beasts (1 S 17^{40}), as well as a military weapon (2 K 3^{25} and often). The Hebrew sling, like those of the Egyptians and Assyrians, doubtless consisted of a long narrow strip of leather, widening in the middle to receive the stone, and tapering to both ends. At one end was a loop by which the sling was held as the slinger swung it round his head, while the other end was released as the stone was thrown. The Benjamites were specially noted for the accuracy of their aim (Jg 20^{16}).

(*f*) The **battle axe** (Jer 51^{20} AV; RV **maul,** RSV 'hammer'; cf Pr 25^{18} where RSV has **war club**), literally 'shatterer' (no doubt identical with the 'weapon of his shattering,' Ezk 9^{2} [RVm 'battle axe']), was probably, as the etymology suggests, a club or mace of hard wood, studded with iron spikes, such as was carried by the Assyrians in the army of Xerxes (Herod. vii. 63). See Rich, *Dict. of Ant., s.v.* 'Clava.'

2. *Defensive arms.*—(*a*) First among the arms of defence must be placed the **shield,** of which two main varieties are common to all periods, the small shield or **buckler** (*māghēn*), and the large shield (*ṣinnāh*), the **target** of 1 K 10^{16ff} (AV, RV; RSV 'large shields'). The distinction between these is rarely preserved in our EV (*e.g.* Jer 46^{3}—in Ps 35^{2}, Ezk 23^{24} they are reversed), but the relative sizes of the two kinds may be seen in the passage of 1 Kings just cited, where the targets or large shields each required four times as much gold as the smaller buckler. These, however, were only for state processions and the like (14^{28}, but cf 1 Mac 6^{39}). The *māghēn* was the ordinary light round shield of the ancient

world, the Roman *clypeus*; the *ṣinnāh* was the *scutum* or large oblong shield which more effectively protected its bearer against the risks of battle. The normal type of both was most probably made of layers of leather stretched on a frame of wood or wickerwork, since 'both the shields and the bucklers' might be burned (Ezk 39[9]). The shield, as a figure of God's protecting care, is a favourite with the religious poets of Israel (Psalms, *passim*). St. Paul also in his great military allegory introduces the large Graeco-Roman shield (Eph 6[16]).

(*b*) Of the shapes of the Hebrew **helmets** we have no information. Kings and other notables wore helmets of bronze (1 S 17[5, 38]), but those prepared by Uzziah for 'all the host' (2 Ch 26[14] RV) were more probably of leather, such as the monuments show to have been worn by the rank and file of other armies until supplanted in the Greek age by bronze, for the *élite* of the infantry at least (1 Mac 6[35]).

(*c*) The same difference of material—bronze for the leaders, leather for the common soldier—holds good for the cuirass or **coat of mail** (1 S 17[5, 38]). The latter term takes the place in RV and RSV of the antiquated **habergeon** (2 Ch 26[14], Neh 4[16]), and **brigandine** (Jer 46[4] 51[3]). The cuirass, which protected both back and front, is also intended by the **breastplate** of Is 59[17] (RVm 'coat of mail'), 1 Mac 3[3], 1 Th 5[8], Eph 6[14]. Goliath's coat of mail was composed of scales of bronze, and probably resembled the Egyptian style of cuirass described and illustrated by Wilkinson (*Anc. Egyp.* [1878] i. 219 ff). This detail is not given for Saul's cuirass (1 S 17[38]). Ahab's '**harness**' (AV, RV) consisted of a cuirass which ended in 'tassels' or flaps, the 'lower armour' (cf RVm, RSV) of 1 K 22[34]. The Syrian war-elephants were protected by breastplates (1 Mac 6[43]), and probably also the horses of the Egyptian cavalry (Jer 46[4]).

(*d*) **Greaves** of bronze to protect the legs are mentioned only in connexion with Goliath (1 S 17[6]). The military **boot** is perhaps referred to in Is 9[5] (RVm, RSV).

The **armourbearer** is met with as early as the time of Abimelech (Jg 9[54]), and later in connexion with Jonathan, Saul, and Goliath, and with Joab, who had several (2 S 18[15]). This office was held by a young man, like the squire of mediaeval knighthood, who carried the shield (1 S 17[7]), cuirass, the reserve of darts (2 S 18[14]), and other weapons of his chief, and gave the *coup de grâce* to those whom the latter had struck down (1 S 14[13]).

An **armoury** for the storage of material of war is mentioned by Nehemiah (3[19]), but that this was built by David can scarcely be inferred from the difficult text of Ca 4[4]. Solomon's armoury was 'the house of the forest of Lebanon' (1 K 10[17], Is 22[8]). The Temple also seems to have been used for this purpose (2 K 11[10]). See further the articles ARMY, FORTIFICATION AND SIEGECRAFT, WAR.

3. In the War Scroll from Qumrân there is a detailed description of the different weapons used by the army of the Sons of Light in its eschatological struggle with the Sons of Darkness. In spite of the theological and apocalyptic tone of the document, the discussion of arms is entirely practical. As Y. Yadin has shown conclusively (cf *The Scroll of the War of the Sons of Light against the Sons of Darkness* [Hebrew 1955], ch. vi, pp. 106–30), the weapons (along with military organization and tactics) correspond closely to those of the Roman army, specifically during the latter part of the 1st cent. B.C. (but not earlier or later periods, or to those of the Hellenistic kingdoms of the Near East). Yadin argues that the Scroll reflects the contemporary pattern of the Jewish army, which in turn was based upon that of the Roman legions and their auxiliaries. Since the weapons described bear the same names as those of the OT, and undoubtedly reflect some continuity in usage, the Scroll in effect serves as a 1st cent. B.C. commentary on the military terminology of the Bible. While great caution must be exercised in applying the new information to earlier periods, we may reasonably expect help in interpreting difficult passages, and describing the different weapons. In at least one case (the *kîdhôn*), the traditional interpretation, 'javelin,' appears to be wrong, since in the Scroll the weapon is plainly a sword. Passages like Jos 8[18, 26], Job 41[29], etc., need to be revised accordingly. A sampling of the weapons listed in the Scroll follows: The *mgn* or shield was rectangular and convex in shape, 115 × 69 cm. It was used by the heavy infantry and corresponded to the Roman *scutum*. The cavalry used a round shield (*mgny ʿglh*), corresponding to the Roman *parma* or *clypeus*. In addition, the horsemen wore body armour, including helmet, breastplate, and greaves (also in accord with Roman practice). The *kîdhôn* was a straight sword, 69 cm. long, 6 cm. wide, corresponding to the Roman *gladius*. (G. Molin, however, has argued that it was really a **scimitar**; cf *JSS* i [1956], 334–335; so also Dupont-Sommer, *RHR* cxlviii [1955], 143 n.) There were a variety of spears, including the following: the *zrḳ* (plural *zrḳwt*), also called *šlṭ*, were used by specified units of light infantry, with seven of these javelins being assigned to each soldier; this may be equivalent to the Roman *iaculum*. The *ḥ*^{a}*nîth* corresponds to the Roman *pilum* (about 2 m. in length). There were two types of *rmḥ* 'spear'; the one used by the heavy infantry was 3.21 m. in length, while the cavalry spear was somewhat longer (3.60 m.). Slings and bows are also included in the catalogue of weapons. A. R. S.K.—D. N. F.

ARMOURBEARER, ARMOURY.—See ARMOUR.

ARMY.—1. In default of a strong central authority, an army in the sense of a permanently organized and disciplined body of troops was an impossibility among the Hebrews before the establishment of the monarchy. During the period of the Judges, the army of the Confederation consisted of military units supplied by the several tribes. From various traditions in the Book of Judges, and the census lists in Numbers 1 and 26 (specifically described as military roll calls), it is possible to recover the general pattern and some of the details of early Israelite military organization. Each tribe was responsible to the amphictyony for its levy of men, who were chosen from among the eligible population, and served under the tribal chieftain or *nāśî'*. The twelve chieftains, referred to repeatedly in Numbers, constituted the council of war, while the charismatic judge (*shōphēṭ*) acted as commander-in-chief of a particular expedition. The levies presumably served for the duration of a campaign and then returned to civilian life. For a detailed discussion of the early Israelite army, see G. E. Mendenhall, *JBL* lxxvii (1958), 52–66. In his judgment the *ʾ*^{a}*lāphîm* were not originally, 'thousands,' but population units from which the levies were drawn. The result is an army of approximately 6000 men for the period of the amphictyony, though in practice the number of troops available was probably smaller. Steps toward a more permanent arrangement were taken by Saul in his operations against the Philistines (1 S 13[2], cf 14[52]). David, however, was the first to establish the nucleus of a standing army, by retaining as a permanent **bodyguard** 600 'mighty men' (their official title) who had gathered round him in his exile (1 S 23[13] 30[9], 2 S 10[7] 16[6]). To these were added the mercenary corps of the Cherethites and Pelethites (q.v.), and a company of 600 Gittites (2 S 15[18]). Apart from these, David attempted to create a truly national army, based upon a regular federal census or military enrolment of all eligible citizens (2 S 24). The resentment of the people, and theological condemnation of this procedure (following the outbreak of a plague), show that David had undertaken a drastic shift from traditional methods. Solomon's organization of his kingdom into administrative districts (1 K 4[7ff]) doubtless included matters of army administration (cf v.[28] 9[19] 10[26]).

2. The organization of the Hebrew army was by units of thousands, originally associated with the civil divisions of the same name, with subdivisions of hundreds, fifties, and tens (1 S 8[12] 17[18] 22[7], 2 K 19[ff, 11]4), an arrangement

which continued into the Maccabaean period (1 Mac 3[55]). Each of these divisions had its special '**captain.**' The whole was under the supreme command of the 'captain of the host.' The relative positions and duties of the *shōṭᵉrîm* (EV 'officers') and other military officials are quite uncertain. The former appear to have been charged with keeping and checking the lists of the quotas to be furnished by the various districts (Dt 20[5ff]).

3. The army was composed in early times entirely, and at all times chiefly, of infantry, the bulk of whom were armed with the spear or pike and the large shield or target (see ARMOUR). The **archers** carried a sword and buckler (1 Ch 5[18]), and with the **slingers** (2 Ch 26[14]) made up the light infantry. Chariots, although long before a vital part of the forces of the surrounding nations, were first introduced into the Hebrew army by Solomon (1 K 4[26] 9[22] 10[26ff]; see CHARIOT, HORSE).

4. The period during which a citizen was liable for military service extended from his twentieth (Nu 1[3], 2 Ch 25[5]) to his fiftieth year (Jos. *Ant.* III. xii. 4 [288]). Exemption was granted in the cases specified in Dt 20[5ff], at least under the Maccabees (1 Mac 3[56]), and to the members of the priestly caste (Nu 2[33]).

5. As regards maintenance, each city and district had doubtless to supply its own quota with provisions, in so far as these were not drawn from the enemy's country. The soldier's recompense consisted in his share of the loot, the division of which was regulated by the precedent of 1 S 30[24]. The first mention of regular pay is in connexion with the army of Simon Maccabaeus (1 Mac 14[32]). Foreign mercenaries figure largely in the armies of the later Maccabaean princes and of Herod. No reference has been made to the numbers of the Hebrew armies, since these have in so many cases been greatly corrupted in transmission.

6. Extensive information about army organization and practice in the intertestamental period is provided by the Dead Sea scrolls, especially the War Scroll (1QM). The regulations are based upon the relevant passages in Numbers and Deuteronomy, but the details reflect in large measure the recent and current practice of the Jewish commonwealth. Even though the War Scroll is apocalyptically oriented, and focuses attention on the final war between the children of light and the children of darkness, nevertheless it shows considerable knowledge of the practical details of military order. Thus the army consists of infantry (28,000) and cavalry (6000), each group being divided into principal (heavy) and auxiliary (light) units. The older, more experienced men (ages 40–50) serve in the main units, the younger men (30–45) in the light forces; and the apprentices (25 up) are organized into service units. The heavy infantry, which constitutes the backbone of the army, is equipped with shield, spear, and sword; while different units of the light infantry are supplied with slings-and-stones, lances, shields, etc. Various tactical formations are described, including the 'tower,' a self-protecting rectangle of heavy infantry. More attention is allotted, however, to the trumpets and banners, all of which bear religious inscriptions of different kinds, and which serve a bewildering variety of functions. In addition the banners bear the names of the unit commanders, in descending order until the banner of the smallest unit carries the names of all the men enrolled. Of prime importance is the role of the chief priest and his aides; sample prayers for all possible occasions are given. For a comprehensive treatment of the scroll and its military features see Y. Yadin, *The War of the Children of Light and the Children of Darkness* (Hebrew: Jerusalem, 1955; English: Oxford, 1962).

For methods of mobilization, tactics, etc., see WAR, also FORTIFICATION AND SIEGECRAFT; and for the Roman army in NT times see LEGION. A. R. S. K.—**D. N. F.**

ARNA.—An ancestor of Ezra, 2 Es 1[2], corresponding apparently to **Zerahiah,** Ezr 7[4], and **Zaraias,** 1 Es 8[2] (AV, RV; RSV omits).

ARNAN.—A descendant of David, 1 Ch 3[21].

ARNI.—An ancestor of Jesus, Lk 3[33] (RV, RSV; AV **Aram**); called **Ram** in Mt 1[3f] (RV, RSV; AV **Aram**); cf Ru 4[19], 1 Ch 2[9f].

ARNON.—A valley with a swiftly flowing stream in its bed, now called *Wâdī el-Môjib,* which gathers the waters from many tributary vales—the wadis (AV 'brooks'; RV, RSV 'valleys') of Arnon (Nu 21[14])—as it flows westward to the Dead Sea. It was the N. border of Moab, cutting it off from the land of the Amorites in ancient times (Nu 21[13]), and later, from that of the Eastern tribes (Jos 12[1]). Near its entry into the Dead Sea it flows between high, perpendicular rocks. Is 16[2] refers to the 'fords of Arnon.' On the Moabite Stone (see MOAB) Mesha records that he fortified Aroer (modern *ʿArâʿir*) and built a road by the Arnon. This road probably followed the line of the Roman road, traces of which still remain, with indications of a bridge, some distance W. of Aroer, which stands on the N. bank. W. E.—**H. H. R.**

AROD.—A son of Gad, Nu 26[17]; called **Arodi** in Gn 46[16]. Patronymic **Arodites,** Nu 26[17].

AROER (? juniper).—**1.** A city on the N. bank of the Arnon (q.v.), modern *ʿArâʿir,* Dt 2[36]. In such a position it necessarily became a frontier town (cf Dt 2[36], 2 K 10[33]). It was captured by Sihon, king of the Amorites (Dt 2[36] 4[48], Jos 12[2]); when captured by Israel it was assigned to Reuben (Dt 3[12]) but is said to have been rebuilt by the Gadites (Nu 32[34]); it was the starting point of David's census (2 S 24[5]); later it was taken by Hazael, king of Syria (2 K 10[33]). Mesha, the king of Moab, tells on the Moabite Stone (see MOAB) that he fortified it, and in a later age it apparently still belonged to Moab (Jer 48[19]). **2.** A city of Judah, 1 S 30[28]; probably the same as **Adadah,** Jos 15[22] (where we should probably read **Ararah**; see ADADAH); modern *ʿArʿarah,* 12 miles E. of Beersheba. **3.** A city of Gad near Rabbah (modern *ʿAmmân*), Jos 13[25], Jg 11[33]; its site is unknown. **4.** In Is 17[2] AV and RV mention an Aroer, which apparently belongs to Damascus, but RSV follows LXX in reading 'her cities will be deserted for ever' instead of 'the cities of Aroer shall be forsaken.'

AROM.—Father of some of the exiles who returned with Zerubbabel, 1 Es 5[16]. The name has no parallel in the lists in Ezra and Nehemiah.

ARPACHSHAD.—According to Gn 10[22] the third son of Shem, and according to Gn 11[10] the second in the line of descent from Shem to Abraham. Gn 10[22ff] is an enumeration of peoples descended from Shem; or countries inhabited by them, from which Babylonia is absent. It has been suggested that Arpachshad is a combination of two once separate words: *Arpach,* a region SW. of Assyria, and *Kasdim* (Chaldeès), and that the mistaken reading was then the basis of Gn 11[10ff]. This does not seem very probable. Alternative suggestions are that Arpachshad is the *Arrapachitis* of the Greek geographer Ptolemy (VI. i. 2), between Urmia and Lake Van, or the Assyrian city of *Arrapkha* (modern *Kirkûk*); cf Unger, *RLA* i (1932), 154. But these also are doubtful.

ARPAD.—A city of Syria NW. of Aleppo, 2 K 18[34] 19[13], Is 10[9] 36[19] 37[13], Jer 49[23]; modern *Tell Erfâd.*

ARPHAXAD.—**1.** A King of the Medes who figures in the story of Judith, and who is said to have reigned in Ecbatana, Jth 1[1ff]; he was defeated and slain by Nebuchadnezzar, King of Nineveh—an Assyrian king unknown to history. **2.** The AV spelling of **Arpachshad** (q.v.) in Gn 10[22, 24] 11[10], 1 Ch 1[17], and in AV, RV, and RSV in Lk 3[36].

ARROW.—See ARMOUR, and MAGIC, DIVINATION, AND SORCERY.

ARROWSNAKE.—Is 34[15] (RV), probably rightly; AV 'great owl,' RSV '**owl**' (q.v.).

ARSACES.—A king of Parthia (known also as Mithridates I.). When opposed by Demetrius Nicator, who thought the people would rise in his favour and afterwards assist him against Tryphon, he deceived Demetrius

by a pretence of negotiations, and in 138 B.C. took him prisoner (1 Mac 14^{1-3}; Justin, xxxvi. 1). In 1 Mac 15^{22} Arsaces is mentioned among the kings to whom was sent an edict from Rome forbidding the persecution of the Jews.

ARSIPHURITH, 1 Es 5^{16} (RV).—See JORAH.

ART.—The Hebrews were not distinguished in the ancient world for their contributions in art; both the Bible and archaeological discovery support the view that they had little native genius in this area. The products of their artisans seem to have had utility rather than artistic excellence as their goal (see ARTS and CRAFTS). There was little, if any, pursuit of art for art's sake.

In **architecture,** the most famous building was the Temple of Solomon in Jerusalem (see TEMPLE). This was erected, however, by Phoenician architects and skilled artisans, with Hebrews furnishing largely the unskilled labour. Biblical statements to this effect (1 K 5^{1-18}) are borne out by study of archaeological parallels; *e.g.* the closest parallels to the floor-plan have been found at *Tell Tainat* (Syria) and Late Bronze Age Hazor. That the Hebrews were able to erect public buildings that were both sturdy and attractive is shown by the palaces of Omri and Ahab at Samaria. The city walls and gates built in the era of Solomon at Megiddo, Hazor, Ezion-geber and elsewhere show excellent workmanship.

In **sculpture** there are no large objects to which we may refer. Numerous figurines of clay or bronze, either whole or fragmentary, have been discovered. Some of these are of human form, others animal. These may in some instances represent deities, but it is seldom possible to determine what specific deity is intended. Nearly every excavation in Palestine has yielded 'Astarte figurines,' little clay representations of the mother-goddess. These are sometimes ugly and crude, and few show artistic sense. They were probably mass-produced in moulds, for the most part, and the use to which they were put did not demand artistic excellence.

Perhaps the finest works of art produced in Palestine are the carved ivories that have been found at Megiddo, Samaria, Hazor, and several other sites. Those at Megiddo are from the pre-Israelite Canaanite period, but those at Samaria and Hazor are from the 9th and 8th cent. B.C. These ivories exhibit several different techniques: some were carved in the round, some are in pierced relief, and some are in low relief. Many were decorated with insets of lapis lazuli, or coloured pastes or glass. These ivories were apparently used as inlays for furniture, boxes, wood-panelling, and the like; some cosmetic items were made entirely of ivory. They illustrate the 'houses of ivory' of 1 K 22^{39} and Am 3^{15}—houses filled with ivories such as these. The themes they employed are borrowed mainly from Egypt and Syria. It is not certain whether they were of native Hebrew workmanship or not. Many scholars believe they were made by Syrian artisans, because of the similarity to ivories found at *Arslân Ṭâsh* (Syria), *Nimrûd* (Assyria), and elsewhere. The presence in the Samaria excavation of unworked tusks speaks for native workmanship, or at least for the importation of Syrian workmen into the city.

Almost as artistic as the carved ivories, and more likely to be of native workmanship, are the examples of **glyptic art** found on personal seals. While some of these bear only names, many have carved figures of animals, plants, and the like (see SEALS).

No examples of **painting** have come down to us from OT times. It is possible that the representations referred to in Ezk 23^{14f} 8^{10} were wall frescoes. From the Chalcolithic Age come the polychrome frescoes of *Teleilât el-Ghassûl,* and from the 3rd cent. A.D. the synagogue paintings of *Dura Europos.*

In **music** there can be no doubt that the Hebrews had much talent. The OT contains many references to music, both sacred and secular. It is possible for us to study the musical instruments from their representation on various types of monuments; but, since no musical scores have survived, we can say virtually nothing about the nature of Hebrew tunes, except as they may have survived in the music of the synagogue and early Christian church (see MUSIC).

Many conjectures have been made as to the reasons why the Hebrews were not distinguished as artists. Reference is often made to the prohibition in the Second Commandment (Ex 20^{4}). Yet it is difficult to determine just how this was interpreted. If it was interpreted to mean that no representation of deity was to be made, we can say that no discovery has ever been made of a representation of Yahweh (the inscription on a coin which was formerly thought to be YHW should be read YHD—*i.e.* 'Judah'). Yet representations have been found of various male and female deities, especially of the mother-goddess, referred to above. Strictly interpreted, the Second Commandment seems to prohibit any kind of representational art; yet the Hebrews did represent plants, animals, and even human beings in various ways. It is probable that the commandment was interpreted in different ways at various times. For example, coins of the Maccabaean period never represent human portraits, but those of the Herodian period do. Also, it has been observed that the personal seals of Judah more often contain only the name, without any representation. Judah was generally more orthodox and less open to foreign influence than North Israel.

Another possible type of explanation involves the nature of Palestine, and the Hebrew form of society. Palestine is a land which is relatively poor in natural resources. Hebrew society put emphasis—at least ideally—upon brotherhood and democracy. The arts flourish best in an economy where there is leisure, and where a wealthy class exists that can patronize and encourage the arts. Such conditions did not often exist in ancient Israel.

Perhaps it is best simply to say that the Hebrews lacked artistic 'genius.' Their special talents lay in other directions. Yet, they did not lack artistic sensitivity, as is shown by their importation of foreign artisans and *objets d'art,* and in some cases their adaptation of foreign techniques and themes for their own purposes. J. P. H.

ARTAXERXES is the Greek form of the Old Persian *Artakhshatra,* Hebrew *'Artaḥshast(ā).* The identification of the Artaxerxes of the Bible is not completely certain. Neh 2^{1} 5^{14} 13^{6} refer to Artaxerxes I. Longimanus (465–424 B.C.), son of Xerxes (Bibl. Ahasuerus). Ezr $7^{1ff.}$, 8^{1} imply that the same ruler is intended, but the overlapping of the activities of Ezra and Nehemiah raises historical difficulties, some of which are resolved if Ezra's mission is placed in the reign of Artaxerxes II. Mnemon (404–358 B.C.). The events narrated in Ezr 4^{7-23} are also assigned to the reign of Artaxerxes. The section is clearly misplaced (note its different position in 1 Es 2^{16-30}). Artaxerxes might be an error for some other name; but more probably, the passage refers to events early in the reign of Artaxerxes I., before the mission of Nehemiah (cf Neh 13^{6}). P. R. A.

ARTEMAS.—A trusted companion of St. Paul, in the later part of his life (as represented in Ti 3^{12}). There is no evidence for the statements of Dorotheus (*Bibl. Maxima,* Lugd. 1677, iii. p. 429) that he had been one of the 70 disciples, and was afterwards bishop of Lystra.

ARTEMIS, the Greek goddess of the wild, the hunt, and also of fertility and childbearing. The name 'Diana' is entirely erroneous, due to late Roman identification of Greek and Roman gods, though it has now become popularized (in English) almost beyond the possibility of correction. The true name of the goddess, as in the NT, was Artemis. There were two conceptions of Artemis in ancient times: (1) the Greek, perhaps originally Minoan, maiden huntress, sister of Apollo: to this conception corresponds the Italian Diana; (2) the mother goddess, the emblem of fertility, the fountain of nourishment, an Anatolian divinity, Hellenized under the name of Artemis: this is the goddess referred to in Acts

and she has nothing to do with Diana, representing in fact a contrary idea. While the Greek maiden Artemis was represented in art attired as a huntress, with bow and arrows, the Anatolian maternal Artemis was represented with many breasts (*multimammia*), though sometimes still accompanied by two stags. In this form she was worshipped over the whole of Lydia, before Greeks ever settled there, and the same divine power of reproduction was worshipped under other names over most of the peninsula of Asia Minor. The rude idol or fetish (' secret stone,' RSV) preserved in her great temple at Ephesus was said to have fallen from heaven (this is the real meaning of *diopetēs*, Ac 19[35]), a not uncommon idea in ancient times, which suggests that such images were sometimes meteoric stones. The chief priest, who bore a Persian title (*Essēn*), had under him a large company of priestesses. There was also a large body of priests (*megabyzoi*, also a Persian word), each appointed for a year, who seem also to have been city officials ; and there were other bodies of ministers.

The epithet ' great ' (Ac 19[34f]) is proved by inscriptions to have been characteristically applied to the goddess, and the exclamation in Acts may have been really an invocation. The ' silver shrines ' (Ac 19[24]), were small representations of the goddess within her shrine, were purchased by the rich ; the poor bought replicas in terra cotta or marble. Both classes dedicated them as offerings to the goddess, in whose temple they would be hung up. When the accumulation became too great, the priests cleared them away, throwing the terra cotta or marble ones on the rubbish heap, or into a hole, but reserving the others for the melting pot. Those which survive are naturally the terra cotta or marble. The goddess had so many worshippers that the manufacture of silver shrines must have been very profitable (Ac 19[27]).

A. So.—H. R. W.

ARTIFICER.—See ARTS AND CRAFTS.

ARTILLERY.—Used in 1 S 20[40] in AV in obsolete sense, of Jonathan's bow and arrows (RV, RSV have ' weapons ') ; also in AV of 1 Mac 6[51] of Antiochus's siege works (RV ' mounds,' RSV ' siege towers ').

ARTS AND CRAFTS.—One of the most characteristic distinctions between the Hebraic and the Hellenic views of life is found in the attitude of the two races to manual labour. By the Greek it was regarded as unworthy of a free citizen ; by the Jew it was held in the highest esteem, as many Talmudic aphorisms bear witness. The general term in OT for **craftsman** (2 K 24[14], Jer 24[1], 1 Ch 29[5] [AV, RV **artificer**]), or skilled artisan, is *hārāsh* from a root meaning ' to cut.' Most frequently, however, it is qualified by the name of the material. This suggests the following divisions :

1. *Workers in wood.*—Palestine was relatively poor in trees, and the best wood, cedar, was imported from Lebanon. The productions of the **carpenter** (1 Ch 22[15], Mt 13[55], Mk 6[3]) probably surpassed in variety those of any other craftsman, for they comprised not only those of the modern carpenter and cabinetmaker, but also of the ploughwright, woodcarver, and other specialized arts and crafts of to-day. Examples of tools which have been discovered in excavations may be seen in Wright, *Biblical Archaeology*, p. 92, Fig. 57 (cf p. 195), and in the respective articles in Galling, *Biblisches Reallexikon*. Egyptian carpenters at work are depicted on the wall of the tomb of Ti at Sakkarah (*ANEP*, No. 123). Various **axes** are named in OT. For one variety the text distinguishes between the iron head and the wooden handle (Dt 19[5]). Another is from the context probably an adze (Jer 10[3]), while a third appears as a **hatchet** in Ps 74[6] RSV. The carpenter's **hammer** (Jer 10[4]) was made with a head of stone or metal (iron or bronze) ; it may have been on occasion a wooden mallet (Jg 4[21] 5[26]). The **saw** (Is 10[15]) was single-handed ; saws of flint and of metal have been discovered by archaeologists (the former even from the Iron Age). Holes were bored with a drill worked by a bow and string, as in the present day and as represented on Egyptian monuments (Galling, *op. cit.*, cols. 283–5). In Is 44[13], which describes the work of a Babylonian idol-maker, are further named the **measuring line** (AV ' rule '), the **pencil** or *stylus* for outlining the work, the **planes** (which may rather have been chisels), and the **compass.** A few nails of bronze have been excavated.

2. *Workers in metal.*—The principal metals of OT times are enumerated in Nu 31[22]. The ' brass ' of some English versions of OT is probably always bronze, *i.e.* copper with an alloy of tin, except where pure copper is intended, as Dt 8[9]. Iron was introduced into Palestine for the making of weapons and jewellery in the 12th cent. B.C., but was not used for agricultural implements until about 1000 B.C. The Philistines introduced the metal and for a time had a monopoly of its manufacture (1 S 13[19–21]) ; the Hebrews learned to work iron by the 10th cent. However, bronze continued in use for a long time. Exploration and excavation have shown that extensive mines of both iron and copper were exploited in the Arabah, south of the Dead Sea, and that Ezion-geber was devoted largely to the smelting of ore and the manufacture of metal objects, particularly in the reign of Solomon. Mining operations are described in Job 28[1–11], and the processes of smelting and refining are referred to in Ezk 22[17–22] and Jer 6[27–30]. For the more artistic handling of copper the Hebrews were at first dependent on Phoenician craftsmen (1 K 7[13ff]), but in time the Israelites became expert metalworkers. The tools of the smith were the **hammer** (Is 44[12]), the **anvil** (Is 41[7], Sir 38[28]), the **tongs** (Is 6[6]), and the **bellows** (Jer 6[29]). The last-named object is depicted as being carried on the back of an ass in the famous tomb painting of Beni-Hasan, of about 1900 B.C. (*ANEP*, No. 3) ; in fact, it has been conjectured that the Semites depicted there were travelling smiths or tinkers. Some metal objects were cast in moulds (*ibid.*, No. 135) ; smelting furnaces have been found at some sites in Palestine, most notably at Tell Qasîle, near Tell Aviv (*ibid.*, No. 134). For the goldsmith and silversmith see MINING AND METALS, *s.vv.* ' Gold ' and ' Silver.' The **smiths** carried away by Nebuchadnezzar (2 K 24[14], Jer 24[1]) were probably those specially skilled in the manufacture of weapons of war.

3. *Workers in stone.*—From the far-off palaeolithic days man has been a ' worker in stone,' a term used in the OT mostly for those who cut and dressed stone for building purposes (1 Ch 22[15]). The usual rendering is **masons** (2 S 5[11], 1 Ch 14[1]). In Palestine there is an abundance of soft limestone which could easily be worked, and provided an excellent building material. The finest buildings were those in Jerusalem and Megiddo of Solomonic times, and the palaces of Omri and Ahab in Samaria ; these, however, may have all been built by Phoenician workmen. There are references in OT to various processes, such as the quarrying out of the stones in the **quarry** (1 K 5[17] 6[7]), the hewing of wine-vats (Is 5[2]) and of tombs (22[16]) in the solid rock, and the cutting and dressing of ' hewn stones ' for various constructions (Ex 20[25], 1 K 5[17], Am 5[11]). The **builders** (Ps 118[22]) worked from a prepared **pattern** or plan (Ex 25[9], 1 Ch 28[11]), using the **measuring-reed** (Ezk 40[3]) and the **plumb line** (Am 7[7]) or **plummet** (2 K 21[13], Zec 4[10]). The large **hammer** used in quarrying (Jer 23[29]) was different from the smaller hammer of the stone-cutter (1 K 6[7]). The **axe** of the last passage is rather the pick-axe or adze for stone cutting and dressing, and was the tool used in cutting the Siloam tunnel, as the workmen tell us in their famous inscription. On a bronze relief from the time of Shalmaneser III., Assyrian stonemasons are depicted carving a royal image with chisel and hammer (*ANEP*, No. 364). For the ' engraver in stone,' or jeweller, of Ex 28[11], see SEALS.

4. *Workers in clay.*—Clay, not stone, was the ordinary building material among the Hebrews (see HOUSE). **Brickmaking,** however, was apparently too simple an operation to attain the dignity of a special craft in OT times, as was also **' plastering '** with clay or lime (Lv 14[42], Dn 5[5] ; cf Ezk 13[10–16], Mt 23[27], Ac 23[3]). There are excellent illustrations of brickmaking in Egypt (*e.g.*

(*ANEP*, No. 115; see Heaton, *Everyday Life in Old Testament Times*, pp. 131–34). In Egypt at least some of the brickmaking was done by captives; we may note that David compelled Ammonite captives to 'toil at the brick-kilns' (2 S 12[31]). For the **potter** and his work, perhaps the oldest of all crafts, see POTTERY.

5. *Workers in leather.*—First among these is the **tanner** (Ac 9[43]), who prepared the leather from the skins of domestic and other animals (Ex 25[5] 26[14], 2 K 1[8]). Little is known of the actual method by which leather was made; presumably the hair was removed by means of lime, or the acrid juices of plants, applied to the skins after they had been soaked in water, and then they were dried and tanned. Owing to their uncleanly accompaniments, the tanner and his trade were regarded by the Jews with much disfavour. Like the fuller, he was forbidden to carry on his work within the city; this partly explains the situation of Simon's tannery 'by the sea side' (Ac 10[32]). In early times the tanner not only supplied the material but probably actually manufactured the leather shields, helmets, quivers, etc., required by soldiers, while the making of sandals, girdles, and other articles of leather (Lv 13[48]), and the preparation of skins for water, wine, and milk (see BOTTLE) were long matters of purely domestic economy. In late OT times skins, prepared as leather or parchment, began to be used as writing material; *e.g.* most of the scrolls and fragments found at Qumrân were of animal skins.

6. *Trades connected with dress.*—The ordinary dress of the Hebrews was made in the home (cf 1 S 2[19]). The **tailor** first appears in the Mishnah. Certain of the processes, however, gradually developed into separate crafts, such as that of the **weaver** (Ex 35[35], 1 S 17[7]; see SPINNING AND WEAVING), the **embroiderer** (Ex 35[35]), whose designs were sewed upon the finished fabric, the **dyer** and the **fuller**. The wool was usually dyed before or after being spun (Ex 35[25]). Both animal and vegetable dyes were employed (see COLOURS). The work of the fuller (Is 7[3], Mal 3[2], Mk 9[3]) was of two kinds, according as he dealt with the web fresh from the loom, or with soiled garments that had already been worn. The latter he cleaned by steeping and treading in water mixed with an alkaline substance (rendered **soap** in Mal 3[2]) and fuller's earth. The new web—the 'unshrunk cloth' of Mt 9[16], Mk 2[21] RSV—on the other hand, after being thoroughly steeped in a similar mixture, was stamped and felted, then bleached with fumes of sulphur, and finally pressed in the fuller's press. Fulling, like tanning, was carried on outside the town, but the situation of the 'fuller's field' of Isaiah's day (7[3]) is uncertain. Here may be mentioned the **barber** (Ezk 5[1]) and the **perfumer**, for whom see HAIR and PERFUMER respectively.

7. *Employments connected with food.*—**Cooks**, as a special class, were to be found only in the houses of the wealthy (see FOOD). The Hebrew name shows that they killed as well as cooked the animals. The **shambles** of 1 Co 10[25], however, are not, as in modern English, the slaughter-house, but the provision-market of Corinth, where meat and other provisions were sold (RSV 'meat market'). The **bakers** were numerous enough to give their name to a street of the capital in Jeremiah's day (37[21]); for their work see BREAD. Public mills employing **millers** appear late, but are implied in the rendering 'great millstone' of Mt 18[6] RSV (see MILL). The well-known Tyropoeon or **Cheesemakers'** valley in Jerusalem received its name from the industry carried on there (Jos. *BJ* v. iv. 1 [140]).

8. *Employments connected with the land.*—Most of these are noticed in other connexions; see AGRICULTURE, SHEEP, VINE, etc. The prophet Amos describes himself as 'a dresser of sycamore trees' (Am 7[14]), for which see AMOS.

9. *Miscellaneous employments.*—If to the above there be added the **tentmaker**, representing the craft (RSV 'trade') of St. Paul and his friends Aquila and Priscilla (Ac 18[3], see TENT), and the **fisherman** (see NETS), no trade or manual employment of importance will, it is hoped, have been overlooked. Most of the remaining employments will be found under their own (*e.g.* RECORDER, SCRIBE) or kindred titles, as 'merchant' under TRADE, 'physician' under MEDICINE, etc.

10. *Two general characteristics.*—This article may fitly close with a brief reference to two characteristics of all the more important handicrafts and employments. The first is that certain towns were largely given over to specific crafts, or the members of a single craft were grouped in one street or quarter of a town, to which they gave their name. Examples of the former are pre-exilic Debir, where the discovery of numerous loom weights and dye-vats proved that the principal industry of the town was dyeing and weaving; and Solomonic Ezion-geber, which was an important centre for the refining of metals and manufacture of metal objects. As for the latter, we find in Jerusalem, as has been noted, 'the bakers' street,' 'the fullers' field,' and 'the cheesemakers' valley,' to which should perhaps be added 'the valley of craftsmen' (Neh 11[35]). Josephus mentions a smiths' bazaar, a wool-market, and a clothes-market in the Jerusalem of his day (*BJ* v. viii. 1 [331]).

The second point to be noted is the evidence that the members of the various crafts had already formed themselves into associations or guilds. Thus we read in Nehemiah of a 'son of the perfumers,' *i.e.* a member of the guild of perfumers (3[8]), and of 'a son of the goldsmiths' (3[31]). Cf Ezr 2[42] 'the sons of the gatekeepers' and the familiar 'sons of the prophets.' In 1 Ch 4[21ff] there is mention of similar associations of linenweavers and potters. The expression 'sons of' to denote membership of an association may go back to the days when trades were hereditary in particular families. A guild of silversmiths is attested for Ephesus (Ac 19[25]). For the probable earnings of artisans among the Jews see WAGES.

A. R. S. K.—J. P. H.

ARUBBOTH.—A place in Solomon's third district, 1 K 4[10] (AV **Aruboth**); its site is unknown, but it was near Hepher and Soco (q.v.), the former being in Manasseh, and the latter probably being modern *Tell er-Rās*, WNW. of Samaria.

ARUBOTH, 1 K 4[10] (AV).—See ARUBBOTH.

ARUMAH.—Abimelech's place of refuge, Jg 9[41]; possibly modern *Khirbet el-ʿOrmah*, 6 miles SE. of *Nâblus* (Shechem).

ARVAD.—The most important of the northern cites of Phoenicia. It was built on an island 70 miles N. of *Beirût*—a sort of second Tyre, with another town on the mainland opposite. In Ezk 27[8, 11] it is named as furnishing oarsmen for the galleys of Tyre and warriors for its defence. In the ethnological list of Gn 10[18], 1 Ch 1[16], the **Arvadites** are mentioned amongst the Canaanites or Phoenicians. Throughout antiquity it was a place of renown for trade and general enterprise, ranking next to Tyre and Sidon. Sennacherib records its submission to him in his prism inscription. In 1 Mac 15[23] it is called **Aradus**. J. F. McC.—H. H. R.

ARZA.—Prefect of the palace at Tirzah, in whose house King Elah was assassinated during a carouse by Zimri, who seized the throne, 1 K 16[9].

ARZARETH (2 Es 13[45]).—A region beyond the river from which the ten tribes are to return. It became the subject of many later Jewish legends concerning the Sabbatic River beyond which the lost tribes were to be found—variously identified with the Oxus and the Ganges. Arzareth is not a true geographical name, but is probably Hebrew *'ereṣ 'aḥereth*, 'another land' (RSVm; cf Dt 29[28] [Heb 27]). E. G. K.

ASA.—1. The third king of Judah after the disruption, succeeding Abijah. Since his mother's name is given as the same as that of Abijah's mother, some have supposed the two kings to have been brothers. But there may be some mistake in the text. Asa is praised by the Biblical writer for his religious zeal, which led him to reform the worship, and even to depose his mother from her place of influence at court because of her idolatrous practices. Politically he took a mistaken

course when he submitted to Benhadad of Damascus to secure his aid against Baasha of Israel, who had captured Ramah. The Temple treasures were sent to Benhadad, who thereupon invaded Israel, and Baasha was compelled to evacuate the threatening fortress (1 K 15^{17ff}). Asa was, however, able to extend his territory northwards at the expense of the Northern Kingdom and to use Baasha's materials to fortify Geba and Mizpah. The Chronicler (2 Ch 14^{9ff}) credits Asa with a victory over an enormous force of Ethiopians. **2.** A Levite (1 Ch 9^{16}).

H. P. S.—A. S. H.

ASADIAS, Bar 1^{1} (AV, RV).—See HASADIAH.

ASAEL, To 1^{1} (AV).—See ASIEL, **3.**

ASAHEL.—1. The youngest son of Zeruiah, David's sister, and the brother of Joab and Abishai. He was famous for his swiftness of foot, a much valued gift in ancient times. He was one of David's thirty heroes, probably the third of the second three (2 S 23^{24}). He was also commander of a division in David's army (1 Ch 27^{7}). He was slain by Abner (2 S 2^{18-23}), and this gave rise to a blood feud which ended in the killing of Abner by Joab (2 S 3^{27}). **2.** A Levite, who taught the people in the reign of Jehoshaphat (2 Ch 17^{8}). **3.** A subordinate collector of offerings and tithes in the reign of Hezekiah (2 Ch 31^{13}). **4.** Father of Jonathan, who opposed Ezra's action in connexion with the divorce of foreign wives (Ezr 10^{15}) ; cf 1 Es 9^{14} (AV, RV **Azael**).

ASAHIAH, 2 K $22^{12f\ 14}$ (AV).—See ASAIAH, **1.**

ASAIAH (' Y" made ').—**1.** One of the deputation sent by Josiah to consult Huldah the prophetess, 2 K $22^{12,\ 14}$ (AV **Asahiah**), 2 Ch 34^{20}. **2.** One of the Simeonite princes who attacked the shepherds of Gedor, 1 Ch 4^{36}. **3.** A **Merarite** who took part in bringing the Ark to Jerusalem, 1 Ch 6^{30} $15^{6,\ 11}$. **4.** The firstborn of the Shilonites, 1 Ch 9^{5} ; probably called **Maaseiah** in Neh 11^{5}. See MAASEIAH, **9.**

ASAIAS.—One of the sons of Annan (AV, RV Annas) who agreed to put away his foreign wife, 1 Es 9^{32} (AV, RV **Aseas**) ; perhaps the **Isshijah** of Ezr 10^{31}.

ASANA, 1 Es 5^{31} (AV, RV).—See ASNAH.

ASAPH (' gatherer ').—**1.** The father of Joah, the ' recorder ' or chronicler (*mazkîr*, literally ' one who reminds,' possibly according to Egyptian analogies one of three very high-ranking officials—cf 2 K $18^{18,\ 37}$, the others being the one over the household and the secretary—who had *inter alia* the ordering of palace ceremonial and the arranging of audiences, and the making of royal or state proclamations, *i.e.* the herald royal in the fullest possible sense) at the court of Hezekiah. **2.** The ' keeper of the king's forest,' to whom king Artaxerxes addressed a letter directing him to supply Nehemiah with timber, Neh 2^{8}. **3.** A Korahite (1 Ch 26^{1}), same as **Abiasaph** (q.v.). **4.** The eponym of one of the three guilds (the others being Heman and Ethan=Jeduthun) which conducted the musical services of the Temple in the time of the Chronicler, 1 Ch 15^{16f}, etc. The Chronicler traces this arrangement to the appointment of David, in whose reign Asaph, who is called ' the seer ' (2 Ch 29^{30}), is supposed to have lived. At first the Asaphites alone seem to have formed the Temple choir, and in the time of Ezra and Nehemiah (wherever we have the memoirs of the latter in their original form) they are not yet reckoned among the *Levites* ; cf, *e.g.* Ezr 2^{41} 7^{7}, Neh 12^{47}. At a later period they share the musical service with the ' sons of Korah ' (see KORAHITES). Pss 50 and 73–83 have the superscription *le-* '*Asaph*, which means in all probability that they once belonged to the hymn-book of the Asaphite choir (see PSALMS).

ASARA, 1 Es 5^{31} (RV).—See HASRAH, **2.**

ASARAMEL (AV **Saramel**).—An expression ' in Asaramel,' in 1 Mac 14^{28} in the inscription upon the memorial pillar of Simon Maccabaeus. A place-name is indicated by the Greek text. This reading, however, is unsuitable, and it is best to assume, as has been proposed, that there was originally written a Hebrew title of Simon, additional to ' the high-priest,' meaning ' prince of the people of God ' (*Sar-'am-'ēl*). So RSVm. For other explanations see *Exp T* Aug. 1900, pp. 523 ff.

J. F. McC.

ASAREEL, 1 Ch 4^{16} (AV).—See ASAREL.

ASAREL.—A son of Jehallelel, 1 Ch 4^{16} (AV **Asareel**).

ASARELAH, 1 Ch 25^{2} (AV).—See ASHARELAH.

ASBASARETH, 1 Es 5^{69} (RV).— A corrupt form of **Esarhaddon** (q.v. ; so RSV).

ASCALON.—The Greek form of the name **Ashkelon,** Jth 2^{28} (AV, RV, RSV), 1 Mac 10^{86} 11^{60} 12^{33} (AV, RV ; RSV **Askalon**).

ASCENSION.—The Ascension of our Lord is not related as an event in the Synoptic Gospels. There is no reference to it in Matthew. In the appendix to Mark (16^{9-20}, RSVm) the words in which it is stated are rather the formula of a creed than the narrative of an event. Lk 24^{50-53} specifies only that ' he parted from them ' (though many ancient authorities add, ' and was carried up into heaven,' RSVm) after having ' led them out as far as Bethany ' (v.^{50}). The context dates the parting on the Resurrection day ($24^{13,\ 33,\ 36}$). However, if the additional words referred to are ignored, vv.$^{50-53}$ refer to an appearance of the risen Lord, and the words ' he parted from them ' need not refer to the Ascension (cf 24^{13}).

The only narrative of the Ascension as a separate event is found in Ac 1^{6-11}, where we find the words, ' he was lifted up, and a cloud took him out of their sight,' ' they were gazing into heaven as he went,' and ' who was taken up from you into heaven ' (cf 1^{22}). The preceding paragraph dates the event forty days after the passion (v.^{3}) ; the following one locates it on the mount called Olivet (v.^{12}).

The Gospels contain statements compatible with this conception of the Ascension. In Lk 9^{31} Moses and Elijah speak of ' his departure (*exodos*) which he was to accomplish at Jerusalem,' and Lk 9^{51} reads, ' When the days drew near for him to be received up, he set his face to go to Jerusalem.' It is probable that the Ascension is here delicately blended with the crucifixion, as in Jn 12^{32}. In Jn 6^{62} the question is asked, ' Then what if you were to see the Son of man ascending where he was before ? ' ; and in Jn 20^{17} Mary is told, ' Do not hold me, for I have not yet ascended to the Father ; but go to my brethren and say to them, I am ascending to my Father and your Father, to my God and your God.' The latter reference stands in the narrative between the account of the resurrection and that of the appearances of the risen Lord and the gift of the Spirit.

References to the exaltation of Christ occur in three types of passages. First, there are a number in which the exaltation or heavenly session is directly connected with the resurrection (Ro 8^{34}, Eph 1^{20}, Ac 2^{32-33} 5^{30-31}, 1 P 1^{21} 3^{21-22}), and four others where such a connexion is implied (1 Co 15^{4-5}, 2 Co 4^{14}, Col 3^{1-4}, Ph 2^{8-9}). Resurrection and exaltation are theologically distinct, however : the former asserts that Jesus was raised from the dead, the latter that he shares in the sovereignty of God. Both affirmations are made in the earliest preaching as reported in Acts and in the NT generally ; and each has its own imagery linked to OT proof-texts (*e.g.* Ps 16^{8-10} for the former, Ps 110^{1} for the latter).

Second, there are the more numerous passages which refer to the exaltation of Christ without alluding either to the Resurrection or to the Ascension : he is exalted (Ac 5^{31}) ; he is highly exalted (Ph 2^{9}) ; he entered heaven (He 6^{20} 9^{12} 9^{24}) ; he sat down at the right hand of the Father (Eph 1^{20}, 1 P 3^{22}, He 1^{3} 4^{14} 8^{1} 10^{12} 12^{2}) ; he goes to the Father (1 P 3^{22}). The last expression (using the verbs *aperchomai*, *metabainō*, *poreuomai*, and *hypagō*) is characteristic of the Fourth Gospel, where it occurs fourteen times in chs. 7–16.

As noted above, the Fourth Gospel also contains two passages using the language of ascent and descent. This

is the third type of usage, to be found in 1 Th 4[16], in the quotations in Eph 4[8] and 1 Ti 3[16], and in passages referring to the coming of the Son of Man on the clouds (Mk 14[62], Mt 24[30] 26[64], Rev 1[7]). It should be observed, however, that there are fifteen references to the *parousia* using the words 'revealing,' 'appearing,' and 'coming' without reference to a descent.

The imagery of ascension suggests assumption-stories (*e.g.* 2 K 2[11ff], Enoch 39[3]), but the restraint of the Acts narrative, the lack of interest in the psychological effects, and the fact that no earthly element (cloud, wind) effects an elevation, mark it off from such. The connexion of such imagery with the expectation of the *parousia*, together with the words of the two angels, suggests that the original pericope was an assurance of the second coming but a refusal to date it. The narrative as it stands serves to mark the end of the Resurrection-appearances and provides a transition from the Jerusalem appearances to the invisible lordship of the exalted Christ. Further, the Ascension, in Acts, like the glorification of the Son in the Fourth Gospel (see especially chs. 14–16), is the precondition of the gift of the Spirit and the new mode of Jesus' presence with his own. What is precarious about the narrative in Acts is the suggestion that the Ascension is a distinct event separable from the Resurrection, and the placing of it in the sequence of events.

We observe that the actual recession of Jesus into the upper air is not described (as His Resurrection is not), and that the cloud is suggestive of a theophany as in the Transfiguration narrative. This suggests a vision of the (already) exalted Lord, in harmony with the appearance to the disciples in the Fourth Gospel. On the other hand, the language of ascent is used, but without the anti-docetic motivation of the Fourth Gospel to account for it. It appears, then, that the Acts narrative is a statement of the exaltation of Christ, the imagery of which is derived from the language used to affirm the *parousia*. H. H. G.

ASCENSION OF ISAIAH.—See PSEUDEPIGRAPHA, 6.

ASCENT OF BLOOD, Jos 15[7] (AV).—See ADUMMIM.

ASCENTS, SONGS OF.—See PSALMS, 2.

ASEAS, 1 Es 9[32] (AV, RV).—See ASAIAS.

ASEBEBIA, 1 Es 8[47] (AV).—See SHEREBIAH.

ASEBIAS, 1 Es 8[48] (RV).—See HASHABIAH, 7.

ASENATH.—Daughter of Potiphera, priest of On (q.v.), wife of Joseph and mother of Ephraim and Manasseh (Gn 41[45, 50] 46[20]). The name, like the other Egyptian names in the story of Joseph, is of a well-known type, prevalent during the Late Period (*c* 1075–663 B.C.). To be vocalized *Esneit*, it represents Egyptian *ns-Nit* (the initial *n* had disappeared by 670 B.C.) or *iw.s-n-Nit*, meaning 'belonging to Neith' or 'she belongs to Neith' respectively. Neith was the goddess of Saïs, and her name was especially popular in names from the 26th (Saïte) dynasty (*c* 663–525 B.C.).

Asenath is the heroine of a remarkable Jewish and Christian romance, in which she renounces her false gods before her marriage with Joseph; it can be traced back to the 5th cent. A.D., and is probably a good deal earlier. F. Ll. G.—R. J. W.

ASER, Lk 2[36], Rev 7[6] (AV) = the tribe of **Asher** (q.v.).

ASERER, 1 Es 5[32] (AV).—See SISERA, 2.

ASH.—This tree is mentioned only in AV and RVm in Is 44[14], where it renders Hebrew *'ōren*. This is probably some species of **laurel.** It is rendered **fir** in RV, while RSV follows an alternative reading *'erez* and renders **cedar.**

ASHAN.—A town of Judah, Jos 15[42]. It is uncertain whether it is to be identified with the Ashan of Simeon in Jos 19[7], 1 Ch 4[32] 6[59], which is called **Ain** (q.v.) in Jos 31[16], and is to be identified with **Bor-ashan,** 1 S 30[30] (AV Chor-ashan, RV Cor-ashan); probably modern *Khirbet 'Asan*.

ASHARELAH.—An Asaphite, 1 Ch 25[2] (AV **Asarelah**); called **Jesharelah** in v.[14].

ASHBEA.—See BETH-ASHBEA.

ASHBEL (? 'having a long upper lip').—The second son of Benjamin, 1 Ch 8[1], Nu 26[38]; but cf Gn 46[21]. The patronymic **Ashbelite** occurs in Nu 26[38].

ASHDOD.—Modern *Esdûd*, called in Apocrypha and NT by its Greek name **Azotus,** a city of the Anakim not captured by Joshua; although it was allotted along with its villages to the tribe of Judah, it was never occupied by Judah, for it soon became one of the five cities of the Philistines (Jos 11[22] 13[3] 15[47]). It was to the temple of Dagon in Ashdod that the Philistines first brought the Ark of Yahweh after they captured it from the Israelites (1 S 5[1f]). Uzziah attacked Ashdod, dismantled its walls and established Jewish settlements in its neighbourhood (2 Ch 26[6]). It probably became tributary to Assyria under Tiglath-pileser III. In 711 B.C. it revolted against Sargon II. at the instigation of a Greek whom the Ashdodites chose in preference to the Assyrian nominee; the crushing of this revolt is mentioned in Is 20[1]. Mitinti, king of Ashdod, remained loyal to Sennacherib when Hezekiah and others revolted, and was rewarded by receiving portions of Hezekiah's territory. Judgment is pronounced on Ashdod by Hebrew prophets both before and after the exile (cf Am 1[8], Zeph 2[4], Jer 25[20], Zec 9[6]). (In Am 3[9] read 'Assyria' with LXX; so RSV.)

Ashdod was the capital of a district under the Persian Empire; Nehemiah was indignant at hearing its dialect spoken by Jewish children whose fathers had married women from there (Neh 13[23f]). It was captured by Judas Maccabaeus (1 Mac 5[68]) and his brother Jonathan (1 Mac 10[84]), and burned by John Hyrcanus (1 Mac 16[10]). It was given the status of a free city by Pompey in 63 B.C. Herod the Great bequeathed it to his sister Salome, who bequeathed it in turn to the Empress Livia (A.D. 10).

In NT Philip visits it after his meeting with the Ethiopian eunuch (Ac 8[40]). R. A. S. M.—F. F. B.

ASHDOTH-PISGAH.—AV for RV and RSV 'slopes of Pisgah' in Dt 3[17], Jos 12[3] 13[20]. In Dt 4[49] AV has 'springs of Pisgah'; cf AVm at 3[17], Jos 12[3] 13[20] and RVm at Dt 3[17] 4[49], Jos 13[20].

ASHER.—1. A town in Manasseh, apparently in the N. of the tribal territory (Jos 17[7]). This is located by the early pilgrims and the *Onomasticon* on the Roman road from *Nâblus* to Scythopolis (*Beisân*), 15 Roman miles from the former, a location which would suggest the modern village of *Teyasir*, some 9 miles NE. of *Nâblus*. **2.** To 1[2]; see HAZOR, **1.** J. Gr.

ASHER.—The eighth son of Jacob by Leah's maid Zilpah, and named by Leah 'Happy' (Gn 30[13]). This 'popular etymology' dominates J's thought in the 'Blessing of Jacob' (Gn 49[20]) and in the 'Blessing of Moses' (Dt 33[24]). Asher's territory was especially fertile, and the well-watered western escarpment of Galilee is still renowned for its olives. The district of Asher is said to have reached from the Carmel range E. of *Haifa* to the confines of Tyre and included the coastal plain of *'Akkâ* (Jos 19[24–30]), but this claim is drastically modified in Jg 1[31ff], from which it is obvious that the Hebrew settlement in western Galilee was achieved rather by infiltration than by conquest, the Canaanite element predominating. Thus Asher played no part in the conflict against Sisera (Jg 5[17ff]), though they are assigned a part in Gideon's campaign against the Midianites (Jg 6[35] 7[23]). The tribe is said to have gone 40,000 strong to support David in Hebron (1 Ch 12[36]) and to have numbered 41,500 males at Sinai and 53,400 in the Plains of Moab (Nu 1[41] 26[47]). Though this is obvious exaggeration, not uncommon in P, it reflects the large population in the district of Asher. The political insignificance of Asher, however, is indicated by the fact that in 1 Ch 27[16ff], where the tribes are enumerated under their respective leaders under David, Asher is not

mentioned. The mention of *Asaru* as a place-name in Palestine in Egyptian records of the 14th cent. may indicate either that the settlement of the tribe of Asher was earlier than the decisive phase of the Israelite settlement at the end of the 13th cent., a view which may be supported by the tradition that Asher was one of the older, or Leah, tribes, or it may indicate that the Hebrews who settled here took the name of Asher from the district. It may even be that Asher signifies the name of a Canaanite deity, the male counterpart of Ashera, the Canaanite mother-goddess, well known from the OT, the Amarna Tablets, and now the Râs Shamra texts. The tradition of Asher's birth from the concubine Zilpah indicates a certain doubt about the purity of the stock of Asher. In the publication of one of the legends from Râs Shamra (*Keret*) it was claimed that Asher was mentioned as a folk-element in Galilee. A more critical appraisal of the text has exploded this theory.

J. A. C.—**J. Gr.**

ASHERAH (plur. usually *Asherim*, masc. and once *Asheroth*, fem.).—The AV following Vulg. (and LXX) mistakenly rendered the Hebrew word as **grove**. The word is the Hebrew equivalent for the Canaanite goddess Ashirtu or Ashratu as she is known in the Amarna tablets. In Ugaritic literature Lady Athirat is the mother of the gods, the female counterpart to El, and she is thus given the title 'Mistress Athirat of the Sea, the Creatress of the Gods' (*knyt êlm*).

1. In the OT the term is sometimes used to designate this Canaanite goddess. She as well as Baal had her prophets (four hundred) in Israel during the time of Ahab (1 K 18[19]). Sacred vessels for her cult were removed from the Jerusalem Temple at Josiah's command and then destroyed (2 K 23[4]). 'Hangings' were woven for her in the houses of the sacred prostitutes within the Temple (v.[7]), and an 'abominable image' of Asherah was reverenced by king Asa's mother (1 K 15[13], 2 Ch 15[16]). The goddess is once referred to in the plural (Jg 3[7]) along with Baalim as illegitimate objects of worship for the Israelites, but this word is commonly emended (for insufficient reasons?) to Ashtaroth in view of 2[13].

2. The word is sometimes used for the image of the goddess. The 'graven image of Asherah' which Manasseh erected in the Temple (2 K 21[7]) is simply referred to as an Asherah in 2 K 23[6]. Apparently the Asherah set up by Ahab in the Baal temple at Samaria (1 K 16[33]; cf 2 K 10[26]) was such an image. Though destroyed, it reappeared in Samaria during the reign of Jehoahaz, Jehu's son (13[6]).

3. Sacred trees or poles erected as symbols of the goddess. Since these symbols were 'planted' (Dt 16[21]), and were to be cut down (Ex 34[13], etc.), and burnt (Dt 12[3], etc.), they were obviously wooden, and therefore archaeological remains do not exist. In the Early Bronze sanctuary at Ai, however, there was found a four-foot piece of carbonized wood lying between two incense burners. It was probably originally a tree trunk with its branches lopped off. This has been suggested as possibly having been an Asherah.

The worship of Asherah and the erection of such sacred symbols of the goddess of fertility were strictly forbidden to the Israelites. The popularity of the Asherah particularly in the Northern Kingdom under the Omrids and afterwards was 'evil in the sight of Yahweh,' incurring his wrath and according to the prophetic historian contributed to the eventual destruction of the Kingdom (cf 2 K 17[7ff]).

A. R. S. K.—**J. W. W.**

ASHES.—Ashes on the head formed one of the ordinary tokens of mourning for the dead (see MOURNING CUSTOMS) as of private (2 S 13[19]) and national humiliation (Neh 9[1], 1 Mac 3[47]). The penitent and the afflicted might also sit (Job 2[8], Jon 3[6]) or even wallow in ashes (Jer 6[26], Ezk 27[30]). In 1 K 20[38, 41] we must, with RV, read 'headband' (q.v.; RSV 'bandage') for 'ashes.'

In a figurative sense the term 'ashes' is often used to signify evanescence, worthlessness, insignificance (Gn 18[27], Job 30[19]). 'Proverbs of ashes' (13[12]) is Job's equivalent for the modern 'rot.' For the use of ashes in the priestly ritual see RED HEIFER.

ASHHUR.—The 'father' of Tekoa, 1 Ch 2[24] 4[5] (AV **Ashur**).

ASHIMA(H).—Deity worshipped by the men of Hamath who were settled in Samaria (2 K 17[30]). The name is probably to be equated with the deity mentioned in Am 8[14] (RSV), and related to the first element in Ishumbethel found in an Aramaic papyrus from Elephantine of 419 or 400 B.C. J. B. P.

ASHKELON.—Modern *Khirbet 'Asqalân*, Greek *Askalon*; a city on the Mediterranean seaboard of Palestine, mentioned in Egyptian texts of the 11th dynasty and in the Amarna correspondence. Rameses II. reduced it *c* 1280 B.C. According to Jg 1[18] it was taken by the tribe of Judah, but this occupation can have been temporary at best, for it is listed in Jos 13[3] with the other cities of the Philistine pentapolis as unconquered by Israel. It figures in the Samson story as the place where he procured the thirty festal garments to pay his wager when his riddle was discovered (Jg 14[19]); it is mentioned in the account of the returning of the Ark (1 S 6[17]) and in David's dirge over Saul and Jonathan (2 S 1[20]). It became tributary to Assyria under Tiglath-pileser III. (738 B.C.); an attempt at revolt in Sennacherib's reign was quickly put down, and the rebel king Sidqia carried captive to Assyria (701 B.C.). It was taken and destroyed by the Babylonians under Nebuchadrezzar in December, 604 B.C., having presumably held out against him in hope of aid from Egypt. An Aramaic letter in which a Palestinian king named Adon urgently begs Neco for help against the Babylonians may have come from Ashkelon (although E. Vogt [*VT* Supplements iv, 1957, 87] argues to the contrary). Doom is pronounced on Ashkelon by pre-exilic and post-exilic prophets (Am 1[8], Zeph 2[7], Jer 25[20] 47[5, 7], Zec 9[5]). Here Jonathan Maccabaeus was honourably received (1 Mac 10[86] 11[60]). In 104 B.C. it became a free city with authority to strike its own coins and reckon by its own era. It was the birthplace of Herod the Great (74 B.C.) and was greatly embellished by him. It was captured by the Crusaders in 1153, but retaken by the Muslims after the battle of Hattin (1187).

Considerable quantities of 'Philistine' pottery (Early Iron imitations of Mycenaean and Aegean ware) have been found on the site. Sample soundings have revealed a thick layer of ashes from the Late Bronze or Early Iron Age. R. A. S. M.—**F. F. B.**

ASHKENAZ.—A son of Gomer (q.v.) in the table of the nations, Gn 10[3], 1 Ch 1[6]. This means apparently that the name represents a people akin to the Cimmerians, an Indo-European people who made trouble for the Assyrians in and about Armenia in the 7th cent. B.C. In Jer 51[27] Ashkenaz is coupled with Ararat and Minni. Some connect the name with Akkadian *Ishkuzai*, Old Persian **Skûča*, a tribe akin to the Cimmerians, and with Greek *Skythoi*=Scythians (cf E. Herzfeld, *A New Inscription of Darius from Hamadan*, 1928, p. 4). Others, with less probability, connect it with the Greek *Ascanioi*, or Phrygians. Mediaeval Jews groundlessly connected the name with Germany, and German Jews are known as Ashkenazim. J. F. McC.—**H. H. R.**

ASHNAH.—Two cities of Judah. **1.** Jos 15[43], possibly modern *Idhna*. **2.** Jos 15[33], near Zorah; site unknown.

ASHPENAZ.—The chief of Nebuchadnezzar's eunuchs, Dn 1[3]. The name is perhaps of Persian derivation; it is found on an incantation text from Nippur.

ASHRIEL, 1 Ch 7[14] (AV).—See ASRIEL.

ASHTAROTH.—This city (plural of *Ashtoreth*, q.v.), originally held by Og, king of Bashan (Dt 1[4], Jos 9[10] 12[4] 13[12, 31]), later captured by the Israelites and by them awarded to the Gershonites (Jos 21[27] **Be-eshterah**, 'dwelling [or temple] of Ashtoreth'; cf || 1 Ch 6[56], which reads *Ashtaroth*), might, without contradicting

Biblical records, be identified with Ashteroth-karnaim (q.v.). However, a statement found in Eusebius' *Onomasticon* favours the view that the names designate two localities. Eusebius relates that there were at his time two villages of the same name, separated by a distance of 9 miles lying between Adara (Edrei) and Abila; viz., (1) Ashtaroth, the ancient city of Og, 6 miles from Abila, and (2) Karnaim Ashtaroth, a village in the corner of Bashan, where Job's village is shown (cf Book of Jubilees, 29^{10}). Eusebius' Karnaim Ashtaroth evidently lay in the corner or angle formed by the rivers *Nahr er-Ruqqâd* and *Sharî'at el-Manâdireh*, in which vicinity tradition places Uz, Job's fatherland. At long. 36° E., lat. 32° 50′ N., on the Bashan plateau, stands *Tell 'Ashtarah*, whose strategical value, as shown by the ruins, was recognized in the Middle Ages. Its base is watered by the *Moyet en-Nebî Ayyûb* ('stream of the prophet Job'). Following this rivulet's course for 2½ miles NNE., passing through the *Ḥammam Ayyûb* ('Job's bath'), is found its source, a spring said to have welled forth when Job in his impatience stamped upon the ground. In the immediate vicinity towards the S., Job's grave is shown. Furthermore, upon the hill, at whose base these two places are situated, lies the village of *Sa'dîyeh* or *Sheikh Sa'd*, whose mosque contains the *Sakhret Ayyûb*, a large basalt boulder against which Job is said to have leaned while receiving his friends. Indeed, ¾ of a mile S. of *Sa'dîyeh*, at *el-Merkez*, another grave (modern) of Job is shown, and a *Deir* ('monastery') *Ayyûb*, according to tradition built by the Ghassanide Amr I., is known to have existed. Eusebius' Ashtaroth must then have been in the proximity of *Muzeirîb*, 9½ miles S. of *Sa'dîyeh*, and 8 miles NW. of Adara, almost the distance of the *Onomasticon*. Even *Tell Ash'ari*, 4½ miles S. of *Tell 'Ashtarah*, protected on the one side by the Yarmuk, on the second by a chasm, and showing evidence of having been fortified by a triple wall on the third, is admirably situated for a royal stronghold.

None of these modern place-names, with the exception of *Tell 'Ashtarah*, is linguistically related to the 'Ashtaroth and 'Ashteroth-karnaim of the Bible and the *Onomasticon*. The description of 'Ashteroth-karnaim (2 Mac 12^{21f}, cf 1 Mac 5^{43}) as a place hard to besiege and difficult of access because of numerous passes leading to it, in whose territory a temple was situated, is applicable to *Sa'dîyeh* or to *Tell 'Ashtarah* or even to *Tell Ash'ari*, whose double peak at the S. summit is partly responsible for the translation of the name 'Ashtaroth of (near) the double peak.' The similarity of name between *Tell 'Ashtarah* and *'Ashteroth-karnaim*, even though *Tell 'Ashtaroh* does not lie directly between Adara and Abila, and lacks, with the other places, narrow passes, would favour the identification of 'Ashteroth-karnaim with *Tell 'Ashtarah*, and hence, according to the distances of Eusebius, the location of 'Ashtaroth near *Muzeirîb*. However, until the ancient name of *Mazeirîb* is known, and the various sites excavated, a definite determination of the location of these cities, and even of the difference between them, must remain impossible. N. K.

ASHTERATHITE (1 Ch 11^{44}).—An inhabitant of **Ashtaroth** (q.v.).

ASHTEROTH-KARNAIM.—The scene of Chedorlaomer's defeat of the Rephaim, Gn 14^{5}. It is perhaps mentioned in Am 6^{13} (RSV **Karnaim**; AV, RV 'horns'). It is identical with **Carnaim** (q.v.) or **Carnion**, after whose capture in 164 B.C., Judas Maccabaeus destroyed the temple of Atargatis (q.v.), whither the inhabitants had fled for refuge (2 Mac 12^{21f}, cf 1 Mac 5^{43f}). For interpretation of name see ASHTORETH, and for location, ASHTAROTH.

ASHTORETH.—The Hebrew form of the name of a Canaanite goddess Ashtart (Astarte), or Ashtereth. The name is vocalized with the vowels of the word *bōsheth*, 'shame,' after the analogy of Mephi-bosheth (1 S 9^{6}), for Merib-baal (1 Ch 8^{33}). The name first occurs in the plural Ashtaroth in Jg 10^{6}, where it is coupled with Baalim, 'the baals.' In Jg 37 we have in a similar context the form Asheroth, although two MSS and Vulg. have Ashtaroth. In 1 K 11^{5} Ashtoreth is named as the goddess of the Sidonians, worshipped by Solomon. In 1 S 31^{10} we are told that the Philistines put Saul's armour and weapons as spoils of war in the temple of Ashtaroth (probably read Ashtoreth) in Ashkelon, from which it would appear that the non-Semitic Philistines had adopted the cult of the Semitic and Canaanite goddess. The OT gives us no particulars about any special characteristics of this goddess, and it is clear that the plural of the name had become a generic term for all the local Canaanite female deities associated with Canaanite fertility cults. In Jer 7^{18} $44^{17, 18}$ we are told that the women of Jerusalem, with the connivance of their husbands, had been in the habit of worshipping an unnamed goddess, whom they call 'the queen of heaven'; it is possible that this goddess may have been Astarte, or Ashtoreth.

The Ugaritic texts have now thrown fresh light on the nature of the Canaanite Ashtoreth, and have provided a possible explanation of the confusion in the OT between Ashtoreth and **Asherah** (q.v.). In these texts there is frequent mention of a goddess Athirat (*'aṯrt*), who is the consort of the high god El. She has many titles, among which are 'mistress of the gods' (*rbt ĕlm*), and 'Athirat, mistress of the sea' (*rbt 'aṯrt ym*). She evidently occupied a place in the Ugaritic pantheon corresponding to that of 'the queen of heaven' mentioned in Jeremiah. There is also another female deity mentioned in the Keret text whose name is Ashtoreth (*'aṯtrt*), and who appears to be the consort of Baal; she is characterized by the epithet Ashtoreth-name-of-Baal (*'aṯtrt-šm-b'l*), 'a title designed to describe her as a manifestation of Baal whose consort she has become' (G. R. Driver, *Canaanite Myths and Legends*, p. 5, n. 2). It seems clear that in the Ugaritic texts the two names designate two different female deities. There is the same philological difference between the names in Ugaritic as there is in Hebrew, but in the latter the names have become confused.

In the Tell el-Amarna Letters we have the name Abd-ashirta, giving further evidence for the existence of the cult of Ashtoreth in Canaan in the 14th cent. B.C. The OT place-names Ashteroth-karnaim (Gn 14^{5}), and Ashtaroth (Dt 1^{4}) in Bashan, have the same significance. In the Mesha Stele it is recorded that the king of Moab dedicated his prisoners to Ashtar-Chemosh, suggesting that in Moab Ashtart was worshipped as the consort of Chemosh. In a Phoenician inscription we have also the title *'štrt-šm-b'l* (Cooke, NSI 5 : 8), corresponding to the title already mentioned as occurring in the Ugaritic texts.

Behind these various forms of the Semitic female deity lies the archetypal figure of the Babylonian and Assyrian goddess Ishtar who occupies so large a place in Sumerian and Babylonian mythology. Her Sumerian name was Innina, and at an early date she ousted Anu's legitimate consort, the colourless figure Antu, from her place, and became herself the consort of the high god Anu. She gradually absorbed into herself the attributes of most of the other female deities, and was known as 'the goddess' *par excellence*, so much so that the plural *ishtarâti* came to be a generic term for all the goddesses, just as in the OT 'the ashtoreths' became a generic term for foreign goddesses. The influence of the Ishtar cult made itself felt indirectly on the religion of Israel through that aspect of the cult in which Ishtar was worshipped as the goddess of love and procreation. As such the Canaanite *ḳᵉdēshôth*, or hierodules, were the priestesses of Ashtoreth, and the Pentateuchal legislation directed against this institution shows that it existed among the early Israelite settlers in Canaan. The other aspect of Ishtar, prominent in Assyria, as goddess of war, does not seem to have influenced Canaanite religion.

Asherah is mentioned as a goddess in 1 K 18^{19} and

elsewhere, and as we have already seen, occurs in Jg 3[7] in the plural as a generic term; but it is unlikely that in the OT she is to be regarded as a different goddess from Ashtoreth. S. H. He.

ASHUR, 1 Ch 2[24] 4[5] (AV).—See ASHHUR.

ASHURBANIPAL.—Son and successor of Esarhaddon on the throne of Assyria, 668–626 B.C. He is usually identified with Osnappar, Ezr 4[10] (AV 'Asnapper'). He included Manasseh of Judah among his tributaries, and kept an Assyrian garrison at Gezer. See ASSYRIA, OSNAPPAR.

ASHURITES.—One of the tribes over whom Ishbosheth ruled, 2 S 2[9]. Neither the Assyrians (*Asshur*) nor the Arabian tribe of *Asshurim* (Gn 25[3]) can be intended. The Pesh. and Vulg. read 'the Geshurites' (see GESHUR), whose territory bordered on Gilead; but against this is the fact that Geshur was an independent kingdom at this time (cf 2 S 3[3] 13[27]). Many editors therefore read *hā-'Ashērî*='the Asherites,' *i.e.* the tribe of Asher (cf Jg 1[32]).

ASHVATH.—An Asherite, 1 Ch 7[33].

ASIA.—A geographical term of uncertain origin, used quite broadly by early Greek writers, and later usually synonymous with the Persian or Seleucid empires. In the Books of the Maccabees we still find this usage. The Romans formed a province called Asia, when they took over the Kingdom of Pergamum in 133 B.C. The regions of Mysia, Lydia, and Caria were included in it, and western Phrygia was subsequently added. In Ac 2[9–10] Phrygia receives separate mention, and so it seems probable that in this book Asia has the narrower meaning (Ac 16[6t] 19[10, 22, 26t] 20[4, 16, 18] 21[27] 24[18] 27[2]). Paul refers to the Roman province of his day when he uses the term (Ro 16[5], 1 Co 16[19], 2 Co 1[8]). See also 2 Ti 1[15], 1 P 1[1], Rev 1[4]. Asia was one of the richest provinces of the empire and was governed by the Senate's appointees—a proconsul with three legati. It was much exploited until a new and better era of peaceful development began in the time of Augustus (31 B.C.). In 24 B.C. earthquakes destroyed Laodicea and Thyatira, Chios, and Tralles; in A.D. 17 twelve cities were similarly destroyed, including Sardis and Philadelphia. A provincial assembly was founded to nurture the new cult of emperor-worship (q.v.). Domitian, demanding worship of himself while yet alive, created a perilous situation for the Christians of Asia. The letters to the seven churches in Rev 1–3 mention leading cities, of which Ephesus, Smyrna and Pergamum were the largest. E. G. K.

ASIARCH.—The form of the word is parallel with *Lyciarch, Bithyniarch*, etc., but the signification is by no means certain. The title of Asiarch could be held in conjunction with any civil office, and with the high priesthood of a particular city, but the high priest of Asia and the Asiarch were probably not identical; for there was only one high priest of Asia at a time, but there were a number of Asiarchs, as Ac 19[31] shows, even in one city. The honour lasted one year, but re-election was possible. The Asiarchs constituted the *Koinon* of the province which was patterned after the Greek amphictyonies. It was a religious organization with certain political tasks, especially the regulation of the cult of 'Roma' and the Emperor in the form of a yearly festival and public games. A. So.—J. C. B.

ASIBIAS (1 Es 9[26]).—One of the sons of Phoros or Parosh who agreed to put away his 'strange' wife; answering to **Malchijah** (2°) in Ezr 10[25]. See MALCHIJAH, 5.

ASIEL.—**1.** Great-grandfather of Jehu, a Simeonite 'prince,' 1 Ch 4[35]. **2.** One of five scribes employed by Ezra to transcribe the Law, 2 Es 14[24]. **3.** An ancestor of Tobit, To 1[1] (AV **Asael**).

ASIPHA, 1 Es 5[29] (AV, RV).—See HASUPHA.

ASKALON.—The form of the name **Ashkelon** found in RSV in 1 Mac 10[86] 11[60] 12[33] (AV, RV **Ascalon**).

ASKELON.—The form of the name **Ashkelon** found in AV in Jg 1[18], 1 S 6[17], 2 S 1[20] (RV, RSV **Ashkelon**).

ASMODAEUS is the evil demon who afflicts Sarah, in the book of Tobit (3[17]), and has to be bound by an angel. The Tobit story has Median connexions and it is hardly possible to explain *Ashmedai* otherwise than as a reflection of the Iranian demon of wrath *Aēshmā daēva*, who in the Avesta is the foe of the righteous and must be stayed, while in the Pahlavi texts he is the sower of discord among men. In later Jewish legend he became the king of all *shēdhîm*, was the demon who took Solomon's place upon his throne, and who daily mounts to the heavens to listen for anything he may use to deceive men. A. J.

ASNAH.—The head of a family of Nethinim (q.v.), which returned with Zerubbabel, Ezr 2[50], 1 Es 5[31] (AV, RV **Asana**).

ASNAPPER, Ezr 4[10] (AV).—See OSNAPPAR.

ASOM, 1 Es 9[33] (AV, RV).—See HASHUM, **1.**

ASP.—See SERPENT.

ASPALATHUS (Sir 24[15]).—The name of an aromatic plant associated with cinnamon in the passage cited, but impossible to identify. It is probable that there were two or more plants, and more than one vegetable product, known by this name. RSV reads 'camel's thorn.'

ASPATHA.—Third son of Haman, put to death by the Jews, Est 9[7].

ASPHALT.—See BITUMEN.

ASPHAR (1 Mac 9[33]).—A pool in the desert of Tekoa, or Jeshimon, where Jonathan and Simon the Maccabees encamped. The site is not known with certainty, although it may plausibly be identified with the modern *Bîr Selhûb*, a reservoir 6 miles WSW. of Engedi.

ASPHARASUS, 1 Es 5[8] (AV, RV).—See MISPAR.

ASRIEL.—A Manassite, Jos 17[2], Nu 26[31], 1 Ch 7[14] (AV **Ashriel**). The patronymic **Asrielite** occurs in Nu 26[31].

ASS (*ḥᵃmôr*); 'she-ass,' *'āthôn* (Gr. *onos* of both sexes); 'young ass' or 'colt,' *'ayir* (Gr. *pōlos*); 'wild ass,' *pere'* and *'ārôdh*).—The ass (Arabic *ḥimâr*) is the general utility animal in the Bible's domestic scene, as it was until, in modern times, some of its tasks have been taken over by mechanized forms of transport and of agricultural implements. The ass is used for riding (Nu 22[22], Jg 1[14], 2 S 17[23] 19[26], etc.) by both men and women (Jos 15[18]); it was also the beast of burden for carrying corn (Gn 42[26]), firewood (Gn 22[3]), provisions (1 S 16[20] 25[18]), and harvest produce (Neh 13[15]). Riding a tawny ass (RV 'white') is a mark of wealth (Jg 5[10]). The she-ass (Arabic *'atân*) was preferred (Nu 22[21–33], 1 S 9[3], 2 K 4[22–24], 1 Ch 27[30]) because quieter and more easily left tied up. The common ass (*ḥᵃmôr*) is brown, sometimes almost black or grey. The male ass, uncontrollable at times, is noted for its bray on sight of the female ass. The idea of the stupidity of the ass is skilfully used in the Balaam story (Nu 22[21ff]; cf Job 11[12]). Skeletons of asses were a not uncommon sight by the side of the highroad and the jawbone, so easily found (Jg 15[15]), proved a good weapon (Jg 15[16], where there is a play on the word 'ass' [*ḥᵃmôr*] and 'heap' [*ḥᵃmôr*]). Although the ass was forbidden food to the Jews, we read (2 K 6[25]) 'an ass's head was sold for eighty shekels of silver' in the severe famine in beseiged Samaria. Dt 22[10] forbade ploughing 'with an ox and an ass together,' a custom practised by modern *fellahin*.

The young ass (Is 30[6, 24] RV) or colt (Job 11[12], Zec 9[9], Lk 19[33], etc.), the Arabic *jaḥsh*, is referred to several times. Little colts of very tender age trot beside their mothers, and soon have small burdens put on them. They should not be regularly ridden for three years. The young asses in the Bible are all apparently old enough for riding or burden-bearing.

Wild asses are not to-day found in Palestine, though, it is said, plentiful in the deserts to the East (Job 24[5]), where they roam in herds and run with extraordinary fleetness (Job 39[5]). The tame ass likewise can cover ground rapidly at a pace more comfortable than that of

an ordinary horse; it is also very sure-footed. Ishmael is compared in his wildness and freedom to a wild ass (Gn 16[12]), while Issachar is a wild ass subdued (49[14, 15]).

The importance of the ass is noted in the Decalogue (Ex 20[17]); a neighbour's ass is not to be coveted. An interesting phrase has been noted in the Mari tablets, where 'to kill an ass' seems to mean to make a peace treaty. E. W. G. M.—R. A. B.

ASSABIAS, 1 Es 1[9] (AV).—See HASHABIAH, 6.

ASSALIMOTH, 1 Es 8[36] (AV).—See SHELOMITH, 5.

ASSAMIAS, 1 Es 8[54] (RV).—See HASHABIAH, 8.

ASSANIAS, 1 Es 8[54] (AV).—See HASHABIAH, 8.

ASSAPHIOTH, 1 Es 5[33] (RV).—See HASSOPHERETH.

ASSASSINS, THE.—In the time of Felix a band of robbers so named disturbed Judaea. They are mentioned in Ac 21[38] (*sicarii,* AV 'murderers'). Josephus says that at Felix's suggestion they murdered Jonathan son of Ananus, the high priest (*Ant.* XX. viii. 5 [163 f]). They took a leading part in the Jewish War. See article EGYPTIAN [THE]. A. J. M.

ASSEMBLY.—See CONGREGATION.

ASSHUR.—See ASSYRIA.

ASSHURIM.—The Asshurim, Letushim, and Leummim were Arabian tribes, supposed to be descended from Abraham and Keturah through Dedan, Gn 25[3] (also in Vulg. in 1 Ch 1[32]); possibly the *A'shur* mentioned on Minaean inscriptions.

ASSIDEANS, 1 Mac 2[42] (AV).—See HASIDAEANS.

ASSIR.—**1.** A son of Korah, Ex 6[24], 1 Ch 6[22]. **2.** A son of Ebiasaph, 1 Ch 6[23, 37]. **3.** A son of Jeconiah, 1 Ch 3[17] (AV, RVm; RV, RSV 'the captive').

ASSOS.—A town over half a mile from the Gulf of Adramyttium (in Mysia, province of Asia), in a splendid position on a hill about 770 feet high at its highest point. The fortifications are amongst the most excellent and best preserved of their kind, the greater part of them dating from the 4th cent. B.C. It passed through various hands before it was from 334–241 B.C. under Alexander the Great and his successors, and from 241–133 B.C. under the Pergamene dynasty. At the last date it became Roman (see ASIA). It was the birth-place of the Stoic Cleanthes. St. Paul went from Troas to Assos by the land-route on his last visit to Asia (Ac 20[13f]).

A. So.—E. G. K.

ASSUMPTION OF MOSES.—See PSEUDEPIGRAPHA, 4.

ASSUR, 1 Es 5[31] (AV).—See ASUR.

ASSURANCE.—The assurance which the NT writers affirm in their declaration of the Gospel refers to the possibility of man's absolute trust in God's forgiveness, which is the ground of his salvation. Thus assurance refers both to the signs which God himself gives of His power and mercy and to the knowledge and trust with which the believer receives the offer of salvation. When Paul declares at Athens (Ac 17[31]) that God has appointed Christ to judge the world, and has 'given assurance' (*pistin*) of this to all men by raising Him from the dead, he points to God's act as the ground for confidence in the Gospel. The assurance which the believer experiences is his personal reception of this offer of salvation and his discovery of a released and joyful confidence in the Divine mercy and power. In 2 Ti 3[14], Timothy's assurance ('confident belief'—cf RSV) in the things he has learned of the Gospel is connected with the authority of the person from whom he has learned them; but the confidence is his own personal response to the Gospel. Thus assurance is given by God but it implies a new state of the believer, as in the OT, Is 32[17], where assurance (AV and RSV) is portrayed as the effect of the righteousness which the Spirit will pour out upon the world. In the NT assurance (*plērophoria*) is an accompaniment and result of confrontation with the Gospel. There is a full assurance of understanding (Col 2[2]), a full assurance of faith (He 10[22]; cf 2 Ti 1[12]) and a full assurance of hope (He 6[11]). In He 11[1] faith is itself spoken of as the ground or assurance (*hypostasis*) of hope (AV 'substance,' RSV 'assurance'). The Johannine letters speak of deeds of love as constituting a way to the reassurance of the heart in the midst of its self-condemnation (1 Jn 3[19]).

It is this relationship between the grace of God which comes to man and his act of laying hold upon grace which has given rise to the far-reaching discussion of 'assurance' in the history of the church. Different views have been taken on the question of whether the assurance to which faith testifies can be directly confirmed in the experience of the believer. Many theologians have asserted that while there is an objective and unshakeable ground of assurance in the message of salvation, this must not be made dependent upon the moral, intellectual, and emotional state of the person, for experience can never of itself provide a complete and unthreatened security. Yet the discovery that God is gracious and merciful does create within the person a release from self-centredness and an outgoing confidence in God which does not require subjective proofs of worthiness. Thus what the NT speaks of as assurance is a reality in Christian experience; but it involves the profound mystery of man's dependence upon God even for the perfecting of his faith in Him. D. D. W.

ASSYRIA AND BABYLONIA.—I. ASSYRIA.—**1. Natural features and Civilization.**—Geographically speaking, Assyria was a small district bounded by the Tigris valley on the W., the mountains of Armenia and Kurdistan on the N. and E., and the Lower Zab on the S., but historically its dominion gradually extended to include the whole of the Fertile Crescent from the Persian Gulf to the Egyptian border, with parts of Asia Minor and Egypt. The land took its name from Asshur, its capital from the earliest times to the 7th cent. B.C., a city on the W. bank of the Tigris, about midway between the Upper and the Lower Zab. For the most part hilly, with well watered valleys and a wide plain along the Tigris, Assyria was fertile and populous. Of the chief cities, Calah, near the mouth of the Upper Zab, and Nineveh, further N., lay in the Tigris valley. Dur-Sharrukin (modern *Khorsabad*) was NE. of Nineveh. In the E. of the country lay Arbela.

The climate was temperate. The slopes of the hills were well wooded with oak, plane, and pine; the plains and valleys produced figs, olives, and vines. Wheat, barley, and millet were cultivated. In the days of the Empire the orchards were stocked with trees, among which have been recognized date palms, orange, lemon, pomegranate, apricot, mulberry, and other fruits. A great variety of vegetables were grown in the gardens, including beans, peas, cucumbers, onions, lentils. The hills furnished plenty of excellent building stone, the soft alabaster specially lent itself to the decoration of halls with sculptures in low relief, while fine marbles, hard limestone, conglomerate and basalt were worked into stone vessels, pillars, altars, etc. Iron, lead, and copper were obtainable in the mountains near. The lion and wild ox, the boar, deer, gazelle, goat, and hare were hunted. The wild ass, mountain sheep, bear, fox, jackal, and many other less easily recognized animals are named. The eagle, bustard, crane, stork, wild goose, various ducks, partridge, plover, the dove, raven, swallow, are named, besides many other birds. Fish were plentiful. The Assyrians had domesticated oxen, asses, sheep, goats, and dogs. Camels and horses were introduced from abroad.

The Assyrians belonged largely to the North Semitic group, being closely akin to the Aramaeans, Phoenicians, and Hebrews, but contained a large non-Semitic and non-Indo-European element akin to modern Caucasian peoples. Assyria early came under the predominating influence of Babylonia. The Assyrians of historic times were more robust, warlike, 'fierce' (Is 33[19]), than the mild, industrial Babylonians. This may have been due partly to the influence of climate and incessant warfare; but it also indicates the difference in race. The culture

and religion of Assyria were essentially Babylonian, save for the predominance of the national god Ashur. The king was a despot at home, general of the army abroad, and he rarely missed an annual expedition to exact tribute or plunder some State. The whole organization of the State was essentially military. The literature was largely borrowed from Babylonia, and to the library of the last great king, Ashurbanipal, we owe most of the Babylonian classics. The Assyrians were historians more than the Babylonians, and they invented a chronology which is the basis of all dating for Western Asia. They were a predatory race, and amassed the spoils of all Mesopotamia in their treasure-houses, but they at least learned to value what they had stolen. The enormous influx of manufactured articles from abroad and the military demands prevented a genuinely native industrial development, but the Assyrians made splendid use of foreign talent. In later times, the land became peopled by captives, while the drain upon the Assyrian army to conquer, garrison, colonize, and hold down the vast Empire probably robbed the country of resisting power.

2. Chronology.—(*a*) *Eponym lists.*—The Assyrians named each year after a particular official, calling it his *limmu* or eponymy. Originally he was selected by lot but later a fixed order was followed, namely, the king, the Tartan (generalissimo), the chief of the levy, various other officials, then the governors of the provincial cities. As the empire extended, the governors of such distant places as Carchemish, Razappa, Kummuh, and even Samaria became eponyms. Surviving lists of these officials in their actual order of succession, known as the Eponym lists, are complete from 892–668 B.C. and they can be restored for some earlier periods and down to 648 B.C.

(*b*) *King lists.*—Assyrian king lists give the names of the rulers of Assyria, with in most cases their father's name and the length of their reign, from about 1900 B.C. to the fall of Assyria. There are however, small errors and mutual divergencies in the lists. Babylonian dynastic lists classify under their city names the rulers of Babylonian cities back to prehistoric times, stating the number of kings in each dynasty, its duration in years, the names of the kings in chronological order and the length of each reign. Large sections of the lists, however, are defective. Errors and inconsistencies also occur and for the earliest dynasties the reigns are impossibly long. No indication, moreover, is given that some dynasties overlap. Some of the early names appear in Babylonian mythology as gods and some kings are omitted whose actual contemporary records have survived. The general reliability of the lists to the middle of the 3rd millennium is, however, confirmed by extant historical inscriptions in which a king mentions his father, grandfather and other ancestors.

(*c*) *Synchronistic lists.*—Synchronisms can sometimes be established between Assyrian and Babylonian kings through the mention by one of another in his inscriptions. There are also a fragmentary synchronistic history and some synchronistic king lists and chronicles from both countries which are particularly useful between the 11th and 9th cent. In some cases, Babylonian dynasties can be synchronized as far back as the middle of the 3rd millennium by royal and other inscriptions.

(*d*) *Chronological statements.*—Royal inscriptions sometimes cite the number of years since an earlier king's reign and although some of these figures are unreliable others accord with information from other sources. Thus Shalmaneser I. states that Erishum built the temple of Ashur in Asshur which Shamshi-Adad rebuilt 159 years later but which was destroyed 580 years later by a fire and built afresh by him. Esarhaddon also states that the temple was built by Erishum, restored by Shamshi-Adad and again by Shalmaneser 434 years later and again by himself. Sennacherib's Bavian inscription states that he recovered the gods of Ekallate which had been carried away by Marduk-nādin-ahhē, king of Akkad, in the days of Tiglath-pileser 418 years before. This dates both Marduk-nādin-ahhē and Tiglath-pileser I. at about 1107. Tiglath-pileser tells us that he rebuilt the temple of Ashur and Adad which had been pulled down by his great-grandfather, Ashur-dān, sixty years before and had then stood 641 years since its foundation by Shamshi-Adad, son of Ishme-Dagān. This puts Shamshi-Adad about 1810 (rather early ?) and Ashur-dān about 1170. Nabonidus states that he restored a temple in Sippar which had not been restored since Shagarakti-Shuriash; this puts that king about 1350 (a little too early). It is evident that all such dates are vague.

(*e*) *Year-names.*—From as early as the dynasty of Akkad in the middle of the 3rd millennium various cities of Babylonia gave each year an individual designation which usually included the king's name. Thus the names of the first four years of Hammurabi are (1) 'the year in which Hammurabi became king'; (2) 'the year in which Hammurabi the king established justice in the land'; (3) 'the year in which Hammurabi the king established the throne for the main dais of Nanna in Babylon'; (4) 'the year in which the wall of the holy precinct was built.' The date-formula was fixed early in the year and was circulated to the principal districts. Until a new formula was fixed, the year was dated in terms of the preceding year as 'the year after.' Thus the third year of Hammurabi would be called 'the year after that in which Hammurabi the king established justice in the land.' A record of these dates was kept and long lists of year-names has been preserved, each recording some event, usually domestic, religious or military. Other year-names have been recovered from legal documents. The kings of Larsa developed an era in which the years were called the first, second, etc., up to the thirtieth, 'after the capture of Isin.' The Kassite dynasty introduced the method of dating according to the regnal year of the reigning king. If a king died in the twentieth year of his reign he was said to have reigned twenty years, the remainder of the year being described as the 'accession year' of his successor, and his own 'first year' began on the 1st Nisan after his accession. Thus over a long series of years the sum of the regnal years is accurately the duration in years except for a margin at the beginning and end; it is exact to a year.

(*f*) *Astronomical data.*—A series of astrological tablets gives the dates of the rising and setting of the planet Venus for the twenty-one years of the reign of Ammi-zaduga of Babylon, so that this king's reign can be definitely located in one of a few definite periods, although there are unfortunately some slight divergences between different copies of the tablets.

(*g*) *The Canon of Ptolemy*, an Egyptian document of the second Christian century, begins with Nabonassar, king of Babylonia, and gives the names and regnal years of all the Babylonian kings down to Nabonidus, then the Achaemenids to Alexander the Great, the Ptolemies and Romans, so connecting with well-known dates; it also mentions three Assyrian kings and can thus be co-ordinated with Assyrian history. Its accuracy is corroborated by the mention in the Assyrian eponym canon of a total solar eclipse in the ninth year of Ashur-dān which can be proved to be 763 B.C. The use of the Assyrian *limmu* lists enables Assyrian dates to be fixed back to 912 B.C. and before that date the Assyrian king lists, in so far as they are reliable, give a chronological framework back to about 1750 B.C. A possible margin of error of about fifty years must be allowed, however, throughout the 2nd millennium. The fragmentary nature of the Babylonian king lists renders it impossible at the present time to date Babylonian kings exactly before 747 B.C., since the exact duration of many of the reigns is unknown and established synchronisms with Assyrian kings are few. The contemporaneous deaths of Adad-shum-nazir of Babylonia and Enlil-kudurra-uzur of Assyria (*c* 1206 B.C.) enable, however, exact provisional dates to be assigned to a number of Babylonian kings before and after that date since the Babylonian king lists for that period are intact. Since, however, they are not

ASSYRIA AND BABYLONIA

entirely in accord at this point with the evidence of the Assyrian lists, some adjustment has to be made. For the earlier part of the 2nd millennium, the known synchronism of Hammurabi with Shamsi-adad I. is very important, but there is divergence among scholars about the date of Hammurabi. The dates usually suggested for his accession are 1792, or 1728, or 1704 B.C., but some scholars would date it as early as 1848 B.C., and various intermediate datings have also been proposed. For earlier dates back to the dynasty of Akkad (*c* 2300 B.C.) the margin of error is scarcely larger.

The following list of dates is based largely on the views of Cornelius who adopts 1728 B.C. as the date for Hammurabi's accession and accepts the tradition of the Assyrian king lists as substantially trustworthy. He assigns, however, sixteen years to the reign of Mutakkil-Nusku of Assyria, thus raising his dates for Assyrian kings before 1131 B.C. about twenty years higher than some would favour. The first Elamite dynasty, 1163–1156 B.C., is not included in any Babylonian king list but there seem to be sound reasons for assuming it. In order to harmonize the Babylonian with the Assyrian king lists, Adad-shum-iddin is here placed after Adad-shum-nazir although there is perhaps stronger evidence for putting him immediately before him. Regnal years of Babylonian kings prior to 747 B.C. are, when known, entered in brackets after the royal name; where such evidence is lacking no attempt at exact dating has been made but the names are arranged in chronological order. Synchronisms (prior to 747 B.C.) validated by historical inscriptions which mention two kings as contemporaries are indicated by = with the addition, where appropriate, of square brackets. 'S' and 'B' represent respectively 'son of' and 'brother of' the preceding king.

3. History. (*a*) *Sources.*—Excavations have recovered a great mass of cuneiform documents from Assyria and Babylonia which can be used for the reconstruction of the history. Besides this primary source of information, chiefly contemporaneous with the events it records, there are scattered incidental notices in the historical and prophetical books of the OT giving an important external view and some records in the Greek and Latin classics mostly too late and uncritical to be of direct value.

The bulk of the history is derived from the inscriptions of the kings themselves. Here there is an often remarked difference between Assyrian and Babylonian usage. The former are usually very full concerning the wars of conquest, the latter almost entirely concerned with temple buildings or domestic affairs, such as palaces, walls, canals, etc. Many Assyrian kings arrange their campaigns in chronological order, forming what are called Annals. Others are content to sum up their conquests in a list of lands subdued. We rarely have anything like Annals from Babylonia.

The value to be attached to these inscriptions is very various. They are contemporary, and for geography invaluable. A king would hardly boast of conquering a country which did not exist. The historical value is more open to question. A 'conquest' meant little more than a raid successful in exacting tribute. The Assyrians, however, gradually learnt to consolidate their conquests. They planted colonies of Assyrian people, endowing them with conquered lands. They transplanted the people of a conquered State to some other part of the Empire, allotting them lands and houses, vineyards and gardens, even cattle, and so endeavoured to destroy national spirit and produce a blended population of one language and one civilization. The weakness of the plan lay in the heavy taxation which prevented loyal attachment. The population of the Empire had no objection to the substitution of one master for another. The demands on the subject States for men and supplies for the incessant wars weakened all without attaching any. The population of Assyria proper was insufficient to officer and garrison so large an empire, and every change of monarch was the signal for rebellion in all outlying parts. A new dynasty usually had to reconquer most of the Empire. Civil war occurred several times, and always led to great weakness, finally rendering the Empire an easy prey to the invader.

(*b*) *Earliest period.*—Neolithic settlements from the 5th or 4th millennium have been excavated at Nineveh and elsewhere in Assyria. Later cultures, using copper, had affinities, sometimes close, with those of Iran and Babylonia. Probably as early as the beginning of the 3rd millennium, Asshur was the most important town in the area and it continued to be so, with few interruptions, to the end of Assyrian history. Late king lists preserve the names of its early rulers, who probably owed allegiance to successive Babylonian city-states, from at least as early as the dynasty of Akkad (*c* 2300 B.C.) and its buildings and associated objects show from that time onwards Sumerian cultural influence. Most of the early rulers have Semitic, though not Akkadian, names but some are non-Semitic and the population probably already included the large Subaraean element characteristic of later periods. The first seventeen kings are described in the lists as 'dwelling in tents' but the sixteenth, Ushpia, who dates probably from the time of the 3rd dynasty of Ur (*c* 2000 B.C.), built a temple to Ashur, the city-god, and is reputed to have founded a dynasty that lasted until displaced by Kik(k)ia, the twenty-eighth ruler and builder of the city-wall. From Puzur-Ashur I., founder of another long dynasty extending to the death of Erishum II. (*c* 1830 B.C.), all but a few of the Assyrian rulers bore Akkadian names. With Shallim-ahhē, his son, royal inscriptions begin. From the time of Erishum I. until the reign of Shamshi-Adad I. a wealthy Assyrian trading colony flourished at Kanesh in Cappadocia. Under Erishum and his successors, Ikunum and Sharru-kīn I., the prosperity and influence of Asshur increased, but the dynasty ended when Erishum II. was displaced from the throne (*c* 1750 B.C.) by Shamshi-Adad I., an Amorite usurper from the West, many of whose letters have been excavated at Mari. During Shamshi-Adad's long reign Assyrian influence extended far to the N. and W. and although in his closing years both Asshur and Nineveh seem to have owed allegiance to Hammurabi of Babylon, Ishme-Dagān I., owing perhaps to the Kassite invasion of Babylonia, restored Assyrian independence. After a succession of usurpers had occupied the throne for brief periods, a dynasty founded in 1671 B.C. by Adasi or his son Bēlu-bani continued in power for half a century. A new dynasty was established by Kidin-Ninua, 1585 B.C., but during its régime there is little to record except the buildings of such kings as Ishme-Dagān II., Shamshi-Adad III., and Ashurnirāri I. which attest the city's growing prosperity. The dynasty was displaced by Ashur-rabi I. in 1452.

(*c*) *Relations with Egypt, Babylonia, and the Hittites.*—During the 17th and 16th cent. there were large racial movements in Western Asia from E. to W. and from N. to S. By 1530 the Kassites, infiltrating westward across the Tigris, had gained control of Babylonia, and by about the same time the Hurrians, expanding SW. from the region of Lake Van in Armenia, had established the powerful military state of Mitanni (later called Hanigalbat) in upper Mesopotamia between the Assyrians and the Hittites, becoming a thorn in the flesh to both people and sitting astride the trade-routes into Asia Minor. Assyria suffered a severe defeat from them about the time of Ashur-rabi I. Egypt was also interesting itself in Western Asia; Thothmes I. (*c* 1525 B.C.) had advanced as far as upper Mesopotamia and Thothmes III. (1504–1450 B.C.) made a punitive expedition across the Euphrates into Mitanni and received gifts from Babylonia and the Hittites as well as from

Enlil-nāzir I. of Assyria. At this time there were chronic petty wars between Assyria and its nearest neighbours. Puzur-Ashur III. (1491–1478 B.C.) made a boundary-treaty with Burna-Buriash I. of Babylonia. Mitanni was now however becoming a more dangerous foe. The international situation is illustrated by the El-Amarna letters which show that while Egypt had control of Palestine under Amenophis III. (1416–1379 B.C.) a precarious balance of power farther N. was maintained by a succession of temporary alliances between Egypt and one or more of the kingdoms of Assyria, Babylonia, Mitanni, and the Hittites, with the object of keeping both Mitanni and the Hittites in check. Diplomatic marriages were also sometimes arranged between the royal families, and gifts were exchanged. Ashur-bēl-nishēshu of Assyria, after being obliged to pay tribute to Mitanni, took part in a defensive alliance with Kara-Indash II. of Babylonia and Amenophis III., although this did not interrupt the friendly relationship between Egypt and Mitanni. After the death of Amenophis III. Egypt began to move out of Asia and a throne-dispute in Mitanni enabled Ashur-uballit I., in alliance with the Hittites, to assert his independence of Mitanni. A daughter of Ashur-uballit was married to the son of Burna-Buriash II. of Babylonia after whose death the Assyrian king helped Kadashman-Harbe II., his own grandson, to ascend the Babylonian throne. When Kadashman-Harbe was murdered, Ashur-uballit assisted Kurigalzu II. to secure the kingship but subsequently a frontier war was waged between Kurigalzu and Ashur-uballit's son and successor, Enlil-nirari.

Toward the end of the 14th cent. movements of Mediterranean peoples (the same factor as that which brought the Philistines into Palestine) weakened the power of Mitanni and the Hittites. At the same time, bedouin Aramaean groups, especially Ahlamē and Sutē, began to move in large numbers into both Babylonia and Hanigalbat (Mitanni). Ark-dēn-ili, the earliest Assyrian monarch to record systematically his campaigns, had to overcome their pressure on his W. frontier. His successor, Adad-nirāri I., subdued the W. regions as far as Carchemish and extracted tribute from them, with the Hittites powerless to prevent it. He also led conquering expeditions eastward into the Zagros mountains and, after a war with Nazi-Maruttash of Babylonia, adjusted his southern frontier in Assyria's favour. In Asshur he rebuilt the royal palace, some temples, and the city walls. His son, Shalmaneser I., had to repel an attack from the Hurrian peoples of Urartu (Ararat), or Nairi, in Armenia, and to suppress serious revolts, fomented by the Hittites, in Hanigalbat, but he considerably extended the eastern border among the Zagros foothills. He also built the fortress-city of Calah, about midway between Asshur and Nineveh.

Tukulti-Ninurta I. (1257–1220 B.C.) firmly consolidated Assyrian power in the N. and W. and his renewed eastward expansion led to a war with Babylonia in which he captured its king, Kashtiliash III., and plundered his capital, thus becoming ruler of an empire from Carchemish to the Persian Gulf. He built a new residence-city, Kar-tukulti-Ninurta, but was killed seven years later in a revolt by his son. Babylon then regained its independence and Assyria entered upon a long period of weakness and decline. Ashur-nirāri III. and Enlil-kudurra-uzur owed allegiance to the Babylonian king, Adad-shum-nāzir, and although Assyria partly revived under Ninurta-apil-ēkur and Ashur-dān I., their successors, Ninurta-tukulti-Asshur and Mutakkil-Nusku, became vassals of Babylonia, where the Kassites had just been replaced by the dynasty of Isin. Assyrian fortunes began to rise again under Ashur-rēsha-īshi I. (1131–1113 B.C.) who repelled a Babylonian incursion by Nebuchadrezzar I. and fought victorious campaigns against the Aramaeans to the W.

(*d*) *Tiglath-pileser I. and his successors.*—Tiglath-pileser I. (1113–1074 B.C.) has left very full accounts of his long reign and his abundant conquests. His successes were gained chiefly in upper Mesopotamia along the base of the Caucasus, in Armenia (the Nairi lands), and W. through Syria to the NE. corner of the Mediterranean where he received tribute from Arvad, Gebal (Byblos), and Sidon. Invading bedouin Ahlamē were driven back across the Euphrates. The Babylonian king, Marduk-nādin-ahhē, attacked Assyria but after two years North Babylonia was ravaged and his capital was taken and sacked. Tiglath-pileser carried out extensive building operations in his own country and acclimatized useful trees and garden plants. After his death, however, Assyrian power relapsed. Ashur-bēl-kāla had to subdue a rebellion in Nairi. He entered into a treaty of friendship with Marduk-shāpik-zēri of Babylonia, probably in face of the common Aramaean threat, but after the Aramaeans, infiltrating into S. Babylonia, dethroned the Babylonian king he married the daughter of the new Aramaean ruler, Adad-apla-iddin. During the following century the Aramaeans gradually increased their pressure on N. Mesopotamia and eventually established there a series of independent kingdoms, even penetrating into the Assyrian homeland. Both Assyria and Babylonia entered on a long period of decline about which little is known, but Assyrian revival began under Ashur-dān II. (933–910 B.C.). Adad-nirāri II. warred with Shamash-mudammik and Nabu-shum-ukīn I. of Babylonia; Tukulti-Ninurta II. continued the subjugation of the mountaineers N. of Assyria, gradually winning back the Empire of Tiglath-pileser I.

With Ashur-nāzir-apli II. began a fresh tide of Assyrian conquest, 883 B.C. He rebuilt Calah, and made it his capital. The small Aramaean State of Bīt-Adīni, between the Balih and Euphrates, held out against him, but he conquered, in the N., Kutmuh and Kirruri and, in the E., Zamua. Carchemish and Unki (ʿAmk) or Hattina on the Orontes were raided, and the army reached the Lebanon. Tyre, Sidon, Gebal, Arvad, etc., were fain to buy off the conqueror. Ashur-nāzir-apli had invaded the Babylonian sphere of influence, and Nabū-apla-iddina sent his brother Zabdānu to support his allies. Ashur-nāzir-apli took Zabdānu and 3000 troops prisoners.

(*e*) *Shalmaneser III., etc.*—The reign of Shalmaneser III., his son and successor, was one long campaign. He began to annex his conquests by placing governors over the conquered districts. The Armenian Empire now began to bar Assyria's progress north. Assyria now first appeared on Israel's horizon as a threatening danger. Shalmaneser's celebrated bronze doors at Balâwat and the Black Obelisk give us pictures of scenes in his reign. They represent ambassadors from Gilzān near Lake Urmia, from Ja'ua (Jehu) of Israel, from Musri, from Suhi, and from Hattina. This Musri is NE. of Cilicia (1 K 10^{28}), whence Solomon brought his horses. Shalmaneser invaded Kuē in Cilicia, and Tabal (Tubal), where he annexed the silver, salt, and alabaster works. He reached Tarzi (Tarsus, the birthplace of St. Paul). To the NE. he penetrated Parsūa, the original Persia. In Babylonia, Nabū-apla-iddina was followed by his son, Marduk-zākir-shumi I., against whom arose his brother Marduk-bēl-usāte, who held the southern States of the Sealand, already peopled by the Chaldaeans. Shalmaneser invaded Babylonia, and, passing to the E., besieged Marduk-bēl-usāte, drove him from one stronghold to another, and finally killed him and all his partisans. In the role of a friend of Babylon, Shalmaneser visited the chief cities and sacrificed to the gods, captured most of the southern States, and laid them under tribute.

Shalmaneser's campaign against Hamath on the Orontes took place in 853 B.C. The fall of Bīt-Adini had roused all N. Syria to make a stand. At Ḳarḳar the Assyrian army had against them a truly wonderful combination.

	Chariots.	Horsemen.	Foot.

Ba'sa of Ammon	..	..	1,000
Gindibu the Arab	1000 Camels.		

The presence of Ahab in this battle in which Shalmaneser claims to have won the victory is most interesting. The battle was not productive of any settled results, as Shalmaneser had to fight the same foes in 849 B.C. and again in 846 B.C. In 842 B.C. Shalmaneser defeated Hazael, besieged him in Damascus, and carried off the spoils of his residence. At this time he received tribute from Tyre, Sidon, and Jehu, 'of the house of Omri.' Jehu's tribute includes silver, gold, a golden bowl, a golden vase, golden goblets and buckets, and tin.

Shalmaneser's last years were clouded by the rebellion of his son Ashur-dānin-apli, who alienated more than half the Empire, and was not subdued by the successor to the throne, his brother Shamshi-Adad V., until the second year of his reign. Shamshi-Adad had to fight the Babylonian kings Marduk-balatsu-ikbi and Bau-aha-iddin. Adad-nirāri III, fought in Media and in the W. From the upper part of the Euphrates to Tyre, Sidon, the land of Omri (Israel), Udumu (Edom), and Palastu (Philistia), to the Mediterranean, he exacted tribute. He besieged Mari, king of Damascus, in his capital, captured it and carried off rich spoil.

(*f*) *Tiglath-pileser III.*—Armenia was steadily rising in power, and under Shalmaneser IV. Assyria lost all its northern conquests in Upper Mesopotamia; Tiglath-pileser III., who was perhaps a usurper, came to the throne in 744 B.C. The world of small States had given way to a few strong kingdoms; the Chaldaeans were strongly forcing their way into lower Babylonia; in the N., Armenia was powerful and ready to threaten W. Syria; Egypt was soon to awaken and interfere in Palestine. Assyria and Babylonia bade fair to fall a prey to stronger nations, when Tiglath-pileser III. roused the old energy. The Aramaeans were pouring into Babylonia, filled the Tigris basin from the lower Zab to the Uknu, and held some of the most celebrated cities of Akkad. Tiglath-pileser scourged them into subjection, and deported multitudes to the NE. hills. The Medes were set in order, and then Tiglath-pileser turned to the W. The new kingdom of Arpad was strongly supported by Armenia, and Tiglath-pileser swept into Kummuh, and took the Armenians in the rear. He crushed them, and for the time was left to deal with the W. Arpad took three years to reduce: then gradually all N. Syria came into Assyrian hands, 740 B.C. Hamath allied itself with Azrija'u of Ja'udi (not to be confused with Azariah of Judah) and Panammu of Sam'al. Tiglath-pileser broke up the coalition, devastated Hamath, and made the district an Assyrian province. The Southern States hastened to avoid invasion by paying tribute. Menahem of Israel, Zabibi of Arabia, Rahianu (Rezon) of Damascus, Hiram of Tyre are noteworthy; but Gebal, Carchemish, Hamath, Milidia, Tabal, Kullāni (Calno, Is 10^{9}) also submitted, 734 B.C. Hanno of Gaza was defeated. In 732 B.C. Damascus was besieged and taken, Israel was invaded, the whole of Naphtali taken, and Pekah had to pay heavy toll. In 732 B.C. he was murdered, and Tiglath-pileser acknowledged Hoshea as successor. Ammon, Moab, Ashkelon, Edom, and Ahaz of Judah paid tribute. Samsi, queen of the Arabians, was defeated and the Sabaeans sent presents. This Tiglath-pileser is the **Pul** of 2 K 15^{19f}, who, after defeating the Chaldaean Ukīn-zēr, who had ascended the Babylonian throne, was crowned king of Babylon, as Pulu.

(*g*) *Sargon.*—Shalmaneser V. seems to have been the son of Tiglath-pileser. He was king of Babylonia as Ululai, and succeeded to Tiglath-pileser's empire. In 724 B.C. he began the siege of Samaria, but we have no annals of his reign. Sargon II., his successor, may have founded a new dynasty or was perhaps a brother of Shalmaneser V. Samaria fell almost immediately (721 B.C.), and the flower of the nation, to the number of 27,290 persons, was deported and settled about Halah on the Habur, in the province of Gozan, and in Media (2 K 17^{6}), being replaced by Babylonians and Syrians. **Merodach-baladan II.**, a king of Bīt Iakin, a Chaldaean state in S. Babylonia, who had been tributary to Tiglath-pileser III., had made himself master of Babylon, and was supported there by Elam. Sargon met the Elamites in a battle which he claimed as a victory, but he had to leave Merodach-baladan alone as king in Babylon for twelve years. This failure roused the West under Iaubidi of Hamath, who secured Arpad, Simirra, Damascus, and Samaria as allies, supported by Hanno of Gaza. Sargon in 720 B.C. set out to recover his power here. At Karkar, Iaubidi was defeated and captured, and the southern branch of the confederacy was crushed at Raphia. Hanno was carried to Assyria, 9000 people deported, Sibu (Sewe, So), the Tartan of Egypt, fled, the Arabians submitted and paid tribute. Azuri of Ashdod, who began to intrigue with Egypt, was deposed and replaced by his brother, Ahimiti. A rebellion in Ashdod led to a pretender being installed, but Sargon sent his Tartan to Ashdod (Is 20^{1}), the pretender fled, and Ashdod and Gath were reduced to Assyrian provinces. Judah, Edom, and Moab staved off vengeance by heavy toll. Sargon's heaviest task was the reduction of Armenia. Rusa I. was able to enlist all Upper Mesopotamia, including Mita of Mushki, and it took ten years to subdue the foe. Sargon's efforts were clearly aided by the incursions of the Gimirrai (Gomer, Cimmerians) into N. Armenia. Having triumphed everywhere else, Sargon turned his veterans against Babylonia. The change of kings in Elam was a favourable opportunity for attacking Merodach-baladan, who was merely holding down the country by Chaldaean troops. Sargon marched down the Tigris, seized the chief posts on the east, screened off the Elamites and threatened Merodach-baladan's rear. He therefore abandoned Babylon and fell on Sargon's rear, but, meeting no support, retreated S. to his old kingdom and fortified it strongly. Sargon entered Babylon, welcomed as a deliverer, and in 709 B.C. became king of Babylon. The army stormed Bīt Iakin, but Merodach-baladan escaped over sea. Sargon then restored the ancient cities of Babylonia. Dilmun, an island far down the Persian Gulf, did homage. Sargon founded a magnificient city, Dur-Sharrukin, modern Khorsabad, to the NE. of Nineveh. He died a violent death, but how or where is now uncertain.

(*h*) *Sennacherib.*—Sennacherib soon had to put down rebellion in the SE. and NW., but his Empire was very well held together, and his chief wars were to meet the intrigues of his neighbours, Elam and Egypt. Babylonia was split up into semi-independent States, peopled by Aramaeans, Chaldaeans, and kindred folk, all restless and ambitious. Merodach-baladan seized the throne of Babylon from Marduk-zākir-shumi, Sargon's viceroy, 704 B.C. The Aramaeans and Elam supported him. Sennacherib defeated him at Kish, 703 B.C., and drove him out of Babylon after nine months' reign. Sennacherib entered Babylon, spoiled the palace, swept out the Chaldaeans from the land, and carried off 208,000 people as captives. On the throne of Babylon he set Bēl-ibni, of the Babylonian seed royal, but educated at his court. Merodach-baladan had succeeded in stirring the W., where Tyre had widely extended its power, and Hezekiah of Judah had grown wealthy and ambitious, to revolt. Ammon, Moab, Edom, the Arabians joined the confederacy, and Egypt encouraged. Padi, king of Ekron, a faithful vassal of Assyria, was overthrown by a rebellion in his city and sent in chains to Hezekiah. Sennacherib, early in 701 B.C., appeared on the Mediterranean coast, received the submission of the Phoenician cities, isolated Tyre, and had tribute from Ammon, Moab, and Edom. Tyre he could not capture, so he made Ethbaal of Sidon overlord of Phoenicia, and assailed Tyre with the allied fleet. Its king escaped to Cyprus, but the city held out. Sennacherib meanwhile passed down the coast, reduced

Ashkelon, but was met at Eltekeh by the Arabians and Egyptians. He gained an easy victory, and captured Eltekeh, Timnath, and Ekron. Then he concentrated his attention upon Judah, captured forty-six fortified cities, deported 200,150 people, and shut up Hezekiah, 'like a bird in a cage,' in Jerusalem. He assigned the Judaean cities to the kings of Ashdod, Ekron, and Gaza, imposed fresh tribute, and received of Hezekiah thirty talents of gold, eight hundred talents of silver, precious stones, antimony, precious woods, his daughters, his palace women, male and female singers, etc., an enormous spoil, which was carried to Nineveh. His siege of Lachish is depicted on his monuments. Sennacherib continued South but suddenly changed his plans and returned to Babylonia, probably because the Egyptian army was advancing to meet him or because he had heard that Merodach-baladan had again appeared in Babylon. Biblical and Greek evidence also suggest that his army suffered a disaster, probably an outbreak of bubonic plague. If the year was 700 B.C. an eclipse of the sun may have led him to abandon his campaign.

In Babylonia, Bēl-ibni proved unfaithful and was recalled. Ashur-nādin-shumi, Sennacherib's son, was installed as king, and reigned six years. Sennacherib devastated Bīt Iakin. He then employed Phoenician shipbuilders and sailors to build ships at Til-barsip, on the Euphrates, and at Nineveh, on the Tigris. He floated his fleets down to the mouth of the rivers, shipped his army, and landed at the mouth of the Karūn, where the Chaldaeans had taken refuge, 695 B.C. He sent the captives by ship to Assyria, and marched his army into S. Elam. The king of Elam, however, swooped down on Babylon and carried off Ashur-nādin-shumi to Elam. Nergal-ushēzib was raised to the throne, and, aided by Elamite troops, proceeded to capture the Assyrian garrisons and cut off the southern army. Sennacherib moved to Erech and awaited Nergal-ushēzib, who had occupied Nippur. He was defeated, captured, and taken to Assyria, 693 B.C. A revolution in Elam tempted Sennacherib to invade that country, perhaps in hope of rescuing his son. He swept all before him, the Elamite king retreating to the mountains, but the severe winter forced Sennacherib to retreat, 692 B.C. Mushēzib-Marduk and the Babylonians opened the treasury of Marduk to bribe the Elamites for support. A great army of Elamites, Aramaeans, Chaldaeans, and Babylonians barred Sennacherib's return at Halūle, on the E. of the Tigris, 691 B.C. Sennacherib claimed the victory, but had no power to do more, and left Mushēzib-Marduk alone for the time. He came back to Babylonia in 690 B.C., and the new Elamite king being unable to assist, Babylon was taken. Mushēzib-Marduk was deposed and sent to Nineveh. Babylon was then sacked, fortifications and walls, temples and palaces razed to the ground, the inhabitants massacred, the canals turned over the ruins, 689 B.C. Sennacherib made Babylonia an Assyrian province, and was king himself till his death (681 B.C.).

Sennacherib chose Nineveh, which had become a second-rate city, as his capital, and, by his magnificent buildings and great fortifications, made it a formidable rival to Calah, Asshur, and even Babylon before its destruction. His last few years are in obscurity, but he was murdered by his son or sons. See ADRAMMELECH.

(*i*) *Esarhaddon* came to the throne (680 B.C.), after a short struggle with the murderers of his father and their party, and he rebuilt Babylon. He had to repel an incursion of the Cimmerians in the beginning of his reign, and then defeated the Medes. In 677 B.C. Sidon was in revolt, but was taken and destroyed, a new city called Kar-Esarhaddon being built to replace it and colonized with captives from Elam and Babylonia (Ezr 4^2). In 676 B.C., Esarhaddon marched into Arabia and conquered the eight kings of Bazu and Hazu (Buz and Huz of Gn 22^{21}). In 674 B.C. he invaded Egypt and again in 673. In 670 B.C. he made his great effort to conquer Egypt, drove back the Egyptian army from the frontier to Memphis, winning three severe battles. Memphis surrendered, Tirhakah fled to Thebes, and Egypt was made an Assyrian province. In 668 B.C. it revolted, and on the march to reduce it Esarhaddon died. He divided the Empire between his two sons, Ashurbanipal being king of Assyria and the Empire, while Shamash-shum-ukīn was king of Babylon as a vassal of his brother.

(*j*) *Ashurbanipal* at once prosecuted his father's reduction of Egypt to submission. Tirhakah had drawn the Assyrian governors, some of them native Egyptians, as Neco, into a coalition against Assyria. Some remained faithful, and the rising was suppressed; Tirhakah was driven back to Ethiopia, where he died (664 B.C.). Tanutamon, the son of Tirhakah, invaded Egypt and Ashurbanipal in 662 B.C. again suppressed a rising, drove the Ethiopian out, and captured Thebes. Ashurbanipal besieged Ba'al, king of Tyre, and although unable to capture the city, obtained its submission and that of Arvad, Tabal, and Cilicia. Gyges, king of Lydia, exchanged embassies, and sent Ashurbanipal two captive Cimmerians, but he afterwards allied himself with Psammetichus, son of Neco, and assisted him to throw off the Assyrian yoke. The Mannai had been restless, and Ashurbanipal next reduced them. Elam was a more formidable foe. Allying himself with the Aramaeans and Chaldaeans, Urtaku, king of Elam, invaded Babylonia, but died and his throne was seized by Teumman. Ashurbanipal took advantage of the accession dispute to invade Elam and capture Susa; and after killing Teumman put Ummanigash and Tammaritu, two sons of Urtaku, on the thrones of two districts of Elam. He then took vengeance on the Aramaeans, E. of the Tigris. His brother, Shamash-shum-ukīn, now began to plot for independence. He enlisted the Chaldaeans, Aramaeans, and Ummanigash of Elam, Arabia, and Egypt. A simultaneous rising took place, and Ashurbanipal seemed likely to lose his Empire. He invaded Babylonia. In Elam, Tammaritu put to death Ummanigash and all his family, but was defeated by Indabigash, and had to flee to Assyria. Ashurbanipal defeated his opponents and laid siege to Babylon, Borsippa, Sippar, and Cutha, capturing one after the other. Shamash-shum-ukīn burnt his palace over his head, and Babylon surrendered (648 B.C.). The conquest of S. Babylonia and Chaldaea was followed by campaigns against Elam, culminating in the capture of Susa and its destruction in 639 B.C. The last years of his reign are in obscurity.

(*k*) *Fall of Assyria.*—Ashurbanipal was succeeded by Ashur-etil-ilāni, his son. Another son, Sīn-sharra-ishkun, and a general, Sīn-shum-līshir, seem to have disputed the succession and perhaps both held the throne for a time. Sin-sharra-ishkun may have become king after Ashur-ētil-ilāni's death. Under these kings, the western provinces were occupied by the Scythians, and Nabopolassar, an Aramaean, achieved the independence of Babylonia with the help of Cyaxares the Mede. The Medes, after being kept at bay for a time by the Assyrians, with the aid of the Scythians and of Psammetichus I. of Egypt, destroyed Asshur in 614 B.C. and Nineveh in 612 B.C. Ashur-uballit II., a general of perhaps royal lineage, retreated westwards with the army to Harran but the Medes captured it in 608 B.C. and in 606 B.C. the Assyrian kingdom came to an end.

II. BABYLONIA.—**1. Natural features.**—Babylonia is the name given to the great alluvial plain between the Tigris and the Euphrates S. of the point where the rivers come closest together, about the latitude of modern Baghdad. There were also extensions NW. up the Euphrates and NE. in the Diyâlā valley. In ancient times the Persian Gulf penetrated much farther inland, and as the sea receded vast marshy tracts with islands were left which gradually came to be cultivated as the land dried. An elaborate system of irrigation was necessary and the need to control it led early to a strong government by city-states and to frequent wars between them. The smaller, northern part of the country came to be called Akkad and was mainly populated by Semites; the larger, southern part was named Sumer and its population was chiefly Sumerian. The central cities of

Akkad were Kish, Kuta, Sippar (Sepharvaim), and Akkad; to the NE. lay Akshak and Eshnunna and to the NW., on the Euphrates, Mari. In the SE. were Babylon, the city of the god Marduk, and its sister city, Borsippa where Nebo was worshipped. The oldest city in Sumer was Eridu, on the Persian Gulf, the seat of the cult of Ea; a little to the N. lay Ur, whose patron was Sin, the moon-god. To the N. lay Larsa with its temple of Shamash, the sun-god, Uruk (Erech), whose chief god was Anu, and Lagash, with its shrine of Ningirsu. Farther N. were Umma, Adab and Shuruppak and beyond that the cities of Nippur, the abode of Enlil, the earth-god, and Isin. Great commercial rivalry existed between the states, and at one time or another several exercised in turn lordship over the greater part of Babylonia.

2. History.—(*a*) *Prehistoric period.*—Three successive chalcolithic cultures have been distinguished in Babylonia in the 4th and 3rd millennia, centred respectively at 'Ubaid (near Ur), Uruk (in Sumer), and at modern *Jemdet Nasr* (in Akkad). The first and third are related to the painted pottery cultures of Iran (Susa, etc.) and N. Mesopotamia (*Tell Halâf*, etc.) and the second may also be. Building (with mud bricks), agriculture, cattle-breeding, fishing, weaving, brewing, metal-working, and decorative arts were practised. As early as the Uruk period, when writing first appears, the Sumerians entered the country, settling among Subaraeans, Semites, and perhaps others.

(*b*) *The city-states.*—What is called the early dynastic period began soon after 3000 B.C. when many city-states existed under their several kings. Babylonian king-lists classify these in dynasties named after the cities but of most of the earliest kings nothing more is known. A few, however, such as Ziusudra of Shuruppak, Dumuzi (Tammuz) of Bad-tibira, Etanà of Kish, and Gilgamish of Uruk occur also in legend or mythology; some of these were later worshipped as gods. The earliest are described as ruling 'before the flood' but of this event nothing is known; floods were common in early Babylonia. Some notable names and some powerful dynasties known from early cuneiform sources are not included in the king-lists. The earliest royal inscriptions are perhaps those of Mesilim of Kish (*c* 2600 B.C.?), who included in his dominions Lagash and Umma, and of his contemporary, Iku-Shamash of Mari. History virtually begins with the 1st dynasty of Ur (*c* 2450–2300 B.C.) founded by Mesannipadda and noted for its 'royal cemetery' with its evidences of human sacrifice and its wealth of gold jewellery. During this dynasty, Lagash, though apparently subject to Ur, was ruled by notable kings such as Ur-Nanshe, Eannatum, and Enannatum I. and II. Supremacy passed for brief periods to various cities until Lugalzaggisi of Uruk, after defeating Urukagina of Lagash and Ur-Zababa of Kish, was overcome by Sargon of Akkad (*c* 2300 B.C.) who founded the Semitic dynasty of Akkad, uniting all Babylonia under his rule and conducting campaigns as far as Asia Minor. Akkad flourished under his successors, Rimush, Manishtusu, and Narâm-Sîn, but in the reign of Sharkalisharri (*c* 2150 B.C.) its power declined. Soon after his death Babylonia passed under the rule of barbarian invaders from Gutium, a district E. of the Tigris, but in spite of this domination Sumerian culture reached a lofty height at Lagash under its ruler Gudea. Deliverance from Gutium came through Utuhegal of Uruk but dominion then almost immediately passed (*c* 2050 B.C.) to Ur-Nammu, founder of the brilliant 3rd dynasty of Ur during which the Sumerian civilization reached its zenith. His son, Shulgi (or Dungi?), and the succeeding kings, Bur-Sîn and Shu-Sîn (or Gimil-Sîn?) exacted tribute from Elam and Assyria, but the fifth king, Ibbi-Sîn, was defeated and captured by the Elamites (*c* 1960 B.C.) and supreme power in Babylonia was then shared between Isin and Larsa under dynasties recently founded by Ishbi-Erra and Naplânum respectively, Amorite leaders who had infiltrated with their troops from the Euphrates region to the NW. In NE. Babylonia Eshnunna maintained its independence under an Akkadian dynasty. Isin at first dominated the scene and its earliest kings, like the latter kings of the preceding Ur dynasty, received divine worship. The fifth king was Lipit-Ishtar whose law-code has been recovered from the excavations. He was displaced, however, by a usurper, Ur-Ninurta, and from that time Larsa began to contest with some measure of success for the leading place, under Gungunum, its fifth king, and his successors, Abisare and Sumuilum.

(*c*) *The Hammurabi dynasty.*—Meanwhile, another Amorite dynasty, the 1st dynasty of Babylon, led by Sumu-abum, took possession (*c* 1830 B.C.) of the hitherto unimportant town of Babylon, and under his successors, Sumu-la-ilum, Zabum, Apil-Sîn, and Sîn-muballit, its power rapidly grew. In the reign of Zabum of Babylon, Kudur-Mabug, an Elamite, conquered Larsa, appointing as king his elder son, Warad-Sîn, and after the latter's death, his second son, Rîm-Sîn. Rîm-Sîn dethroned Damik-ilishu of Isin and assumed for a time rule over most of Babylonia but in the sixtieth year of his reign (*c* 1698 B.C.) he was himself defeated by Hammurabi of Babylon who united all Babylonia under his dominion. The Amorites adopted the Akkadian language and accepted into their pantheon the chief gods of Babylonia, but the Sumerian language and much of the Sumerian culture were soon extinguished and Babylonia became a Semitic country, with Marduk, the god of Babylon, as its principal deity. Under Hammurabi's wise and firm administration, the land grew very wealthy. Great attention was paid to irrigation and commerce, and science and letters flourished. Hammurabi's code of laws was based partly on earlier codes. Much light has been thrown on Amorite history and culture (and perhaps on the origins of the Hebrews) by the great hoard of documents, especially letters, found at Mari, an important city-state on the Euphrates, N. of Babylon, whose king, Zimri-lim, was subdued by Hammurabi. Even Asshur and Nineveh acknowledged Hammurabi as overlord, but after his death the power of Babylon declined. In the ninth year (*c* 1677 B.C.) of his successor, Samsu-ilûna, great parts of Babylonia fell under the rule of invading Kassites (perhaps the Cush of Gn 10^8), coming from Iran under their leader Gandash.

(*d*) *Kassite supremacy and the rise of Assyria.*—During Samsu-ilûna's reign a rival, but effete, 'Maritime' dynasty was inaugurated (*c* 1658 B.C.) by Iluma-ilum in the S. of Babylonia, but the Hammurabi dynasty continued to rule most of the country until the sack of Babylon by the Hittite king, Mursilis I. (*c* 1531 B.C.), which ended the reign of its last king, Samsu-ditâna. Agum II., the Kassite king, took advantage of this event to assume control of the whole of Babylonia. The Kassites gave to Babylonia the name Kar-duniash, and although they adopted the Babylonian language and the Babylonian gods their earliest kings bore Kassite names. Burna-Buriash I. (*c* 1485) was a contemporary of Puzur-Ashur III. of Assyria, with whom he had a boundary dispute. The Maritime dynasty was brought to an end by Ulam-Buriash (*c* 1453 B.C.). Kara-Indash II. concluded a frontier agreement with Ashur-bêl-nishêshu of Assyria, and his daughter was married to Amenophis III. of Egypt. Three letters of his son, Kadashman-Harbe I., to Amenophis and two replies are found among the El-Amarna correspondence, and the Egyptian king appears to have married his sister. Kurigalzu I., the next king, declined to join a Canaanite coalition against Amenophis. In an expedition into Elam, he captured Susa, its capital, and on his N. frontier he built a fortified city, Dur-Kurigalzu (modern *Aqarqûf*), as a defence against Assyria. Burna-Buriash II. (*c* 1360) was allied with Amenophis IV. of Egypt against Suppiluliuma the Hittite king, Mitanni, Egypt's former ally, being now in decline. His son married a daughter of Ashur-uballit I. of Assyria, and after Kadashman-Harbe II., the offspring of this union, was killed in a revolt led by a pretender, Nazibugash, the Assyrian king helped Kurigalzu II., a son of Burna-buriash II., to gain the throne. Later, however, frontier wars developed between Kurigalzu and Enlil-nirâri of Assyria and afterwards between his son,

Nazi-Maruttash, and the Assyrian king Adad-nirāri I. Kadashman-Turgu and Kadashman-Enlil II. were allied with the Hittite king Hattusilis III. against Assyria, but in the next reign Kashtiliash III. was taken captive by Tukulti-Ninurta I. and his capital was plundered. The next kings of Babylonia owed allegiance to Assyria and the land was raided by the Elamites, but after the murder of Tukulti-Ninurta Adad-shum-nāzir gained the upper hand over his northern neighbour. Ashur-nirāri III. of Assyria and his son Enlil-kudurra-uzur became in turn his vassals until, in an Assyrian rising, Enlil-kudurra-uzur and he both lost their lives in the same battle. The reigns of Melishipak and Merodach-baladan I. were comparatively peaceful, but Zabāba-shum-iddin (1169–1167 B.C.) was besieged in his capital by Ashur-dān I. of Assyria. The dynasty was brought to an end, however, through the defeat of Enlil-nādin-ahhē by Shutruk-nahhunte I. of Elam, who seems to have appointed his son, Kutur-nahhunte, to rule in his place as king of Babylonia.

(*e*) *The dynasty of Isin and its successors.*—Independence for Babylonia was shortly afterwards regained under Marduk-kābit-ahhēshu, an Aramaean prince of Isin, who founded a new dynasty. His reign and those of his two successors seem to have been prosperous and the next king, Nebuchadrezzar I., although fighting indecisively with Ashur-rēsha-ishi I. of Assyria, had a signal victory over the Elamites. Marduk-nādin-ahhē, however, after routing an Assyrian army was decisively defeated and lost his life when Tiglath-pileser I. of Assyria retaliated by ravaging Babylonia. Marduk-shāpik-zēri had amicable relations with Ashur-bēl-kāla of Assyria, to whom his successor, Adad-apla-iddin, married his daughter after a preliminary conflict. Of the remainder of this dynasty and the next four dynasties practically nothing is known. The Aramaean migration swallowed up Mesopotamia and drove back both Assyria and Babylonia. The Chaldaeans followed the old route from Arabia by Ur, and established themselves firmly in the S. of Babylonia. Akkad was plundered by the Sūtē. Thus cut off from the West, the absence of Babylonian power allowed the rise of Philistia ; Israel consolidated, Phoenicia grew into power. Hamath, Aleppo, Sam'al became independent States. Damascus became an Aramaean power. Egypt also was split up, and could influence Palestine but little. When Assyria revived under Adad-nirāri III., the whole West was a new country and had to be reconquered. Babylonia had no hand in it. She was occupied in suppressing the Chaldaeans and Aramaeans on her borders ; and had to call for Assyrian assistance in the time of Shalmaneser IV. Finally, Tiglath-pileser III. became master of Babylonia, and after him it fell into the hands of the Chaldaean Merodach-baladan, till Sargon drove him out. Under Sennacherib it was a mere dependency of Assyria, till he destroyed Babylon. Under Esarhaddon and Ashurbanipal Babylonia revived somewhat, and under Nabopolassar, a Chaldaean, found in the weakness of Assyria and the fall of Nineveh a chance to recover.

Nabopolassar reckoned his reign from 625 B.C., but during the early years of his rule some Southern Babylonian cities such as Erech continued to acknowledge Sīn-sharra-ishkun, but he allied himself with the Medes who devastated Mesopotamia and captured Nineveh. The Medes made no attempt to hold Mesopotamia, and Pharaoh Neco, who was advancing from Egypt to take Syria, was defeated at Carchemish (605 B.C.) by Nebuchadrezzar II. So Babylonia succeeded to the W. part of the Assyrian Empire. Nebuchadrezzar attacked Egypt itself in 601 B.C. but retired after a battle in which both sides suffered severely. In 597 B.C., however, he occupied Jerusalem and in 586 B.C., after a further siege, he destroyed it. After a thirteen years' siege he captured Tyre in 573 B.C., but various conflicts with Egypt ended indecisively.

Nebuchadrezzar's inscriptions hardly mention anything but his buildings. He fortified Babylon, enriched it with temples and palaces ; restored temples at Sippara, Larsa, Ur, Dilbat, Erech, Kutha, Marad, and other cities ; cleaned out and walled with quays the Arahtu canal which ran through Babylon, and dug a canal N. of Sippar.

Amēl-Marduk (Evil-Merodach), his son, was not acceptable to the priests, and was murdered by his brother-in-law Neriglissar, who had married a daughter of Nebuchadrezzar. He, too, was occupied chiefly with the temples of his land. Neriglissar was succeeded by his son Labāshi-Marduk, a ' bad character,' whom the priests deposed, setting up Nabonidus, a Babylonian. He rebuilt many of the oldest Babylonian temples, and in exploring their ruins found records which have helped to date early kings. Partly owing to his unpopularity with the Babylonian priesthood and partly in order to strengthen his western defences he spent the later years of his reign at Harran in N. Mesopotamia and eventually at Teima (Tema) in N. Arabia, leaving the command of the army in Babylonia to his son Belshazzar. Meanwhile, Cyrus, king of Anshan in Persia, by his overthrow of Astyages the Mede, became king of Persia and then conquered Croesus of Lydia. He began to threaten Babylonia and in 539 B.C. Nabonidus returned to Babylon, but when Cyrus marched against it, it opened its gates and in October 539 B.C. Cyrus entered without resistance. Nabonidus was spared and sent to Karmania ; Belshazzar was probably killed. Cyrus was acceptable to the Babylonians, worshipped at the ancient shrines, glorified the gods who had given him leadership over their land and people, made Babylon a royal city, and took the old native titles, but the sceptre had departed from the Semitic world.

3. Literature.—Babylonia was very early in possession of a form of writing. The earliest specimens of which we know are little removed from pictorial writing ; but the use of flat pieces of soft clay, afterwards dried in the sun or baked hard in a furnace, as writing material, and strokes of a triangular reed, soon led to conventional forms of characters in which the curved lines of a picture were replaced by one or more short marks on the line. These were gradually reduced in number until the resultant group of strokes bore little resemblance to the original. The short pointed wedge-shaped ' dabs ' of the reed have given rise to the name ' cuneiform.' The necessities of the engraver on stone led him to reproduce these wedges with an emphasized head that gives the appearance of nails, but all such graphic varieties make no essential difference. The signs denoted primarily concrete objects, such as a man's head, but from the Sumerian and the Semitic words for ' head ' (*sag*, *reshu*) were derived syllabic values, *shak*, *rish*, etc., which were used in spelling out words syllabically. From the concrete objects were also developed ideas ; the picture of a bull's head symbolized power, courage, and greatness. The picture of a star denoted the sky, the supreme god (Anu) and the ideas of divinity and loftiness ; and from the Sumerian word *an*, ' sky,' and the Semitic word *ilu*, ' god,' were derived the phonetic values *an* and *il*. Thus many signs have several ideographic and phonetic values. The script, containing over six hundred signs and first used by the Sumerians, was adopted by the Assyrians and Babylonians to write their own language (Akkadian), which superseded Sumerian early in the 2nd millennium except for some liturgical and literary purposes. The earliest inscriptions date back to the late 4th or early 3rd millennium and come from temple archives, and relate to offerings to the gods or gifts to the temples. From very early times, however, contracts such as deeds of sale, dispositions of property, marriage settlements, etc., were preserved in the archives, together with large quantities of deeds, letters, business accounts, etc., and we have enormous collections in our museums of material relating to the private life and customs of the people at almost all periods of the history.

The Babylonians early drew up codes of laws, hymns, ritual texts, and mythology. The supposed influence of the heavenly bodies led to works associating celestial phenomena with terrestrial events—the so-called astro-

logical texts which recorded astronomical observations from very early dates. A wonderful collection of extraordinary events, as births of monsters or abnormal beings, were regarded as ominous, and an attempt was made to connect them with events in national or private history. These 'omen tablets' also deal with morals, attaching to human acts consequences evincing royal or Divine displeasure. Evil conduct was thus placed under a ban, and the punishment of it was assigned to the 'hand of God or the king.' It was a very high morality that was so inculcated: to say yea with the lips and nay in the heart, to use false weights, to betray a friend, to estrange relations, to slander or backbite, are all forbidden. The conduct of a good king, of a good man, of a faithful son of his god, are set out with great care, and culminate in the precept, 'To him that does thee wrong do no evil; recompense thine adversary with good.' Medicine was extensively written upon, and the number of cases prescribed for is very great. We are not able, as a rule, to recognize either the ailment or the prescription; but magical spells were often used to drive out the demon supposed to be the cause of the disease.

The Babylonians had some acquaintance with mathematics, so far as necessary for the calculation of areas, and they early drew up tables of squares and cubes, as well as of their measures of surface and capacity. To them we owe the division of time into hours, minutes, and seconds. See WEIGHTS AND MEASURES.

The Babylonian Literature was extensive, and much of it has striking similarities to portions of the Bible (see CREATION, DELUGE, etc.). It also seems to have had influence upon classical mythology.

4. Religion.—The religion of Babylonia was a syncretic result of the union of a number of city and local cults. Consequently Shamash the sun-god; Sin the Moon-god; Ishtar, Venus; Marduk the god of Babylon, Nabû of Borsippa, Enlil of Nippur, Nergal the god of pestilence, Nusku the new-moon crescent, and a host of others, were worshipped with equal reverence by both kings and people. Most men, however, were specially devoted to one god, determined for them by hereditary cult, or possibly personal choice: a man was 'son of his god' and the god was his 'father.' In the course of time almost every god absorbed much of the attributes of every other god, so that, with the exception of such epithets as were peculiarly appropriate to him, Shamash could be addressed or hymned in much the same words as Marduk or Sin. By some teachers all the gods were said to be Marduk in one or other manifestation of his Divine activity. The whole pantheon became organized and simplified by the identification of deities originally distinct, as a result of political unification or theological system. The ideal of Divinity was high and pure, often very poetic and beautiful, but the Babylonian was tolerant of other gods, and indisposed to deny the right of others to call a god by another name than that which best summed up for him his own conception.

Magic entered largely into the beliefs and practices of life, invading religion in spite of spiritual authority. The universe was peopled with spirits, good and bad, who had to be appeased or propitiated. Conjurations, magic spells, forecasts, omens were resorted to in order to bind or check the malign influences of demons. The augurs, conjurers, magicians, soothsayers were a numerous class, and were usually called in whenever disease or fear suggested occult influence. The priest was devoted to the service of his god, and originally every head of a family was priest of the local god, the right to minister in the temple descending in certain families to the latest times. The office was later much subdivided, and as the temple became an overwhelming factor in the city life, its officials and employees formed a large part of the population. A temple corresponded to a monastery in the Middle Ages, having lands, houses, tenants, and a host of dependants, as well as enormous wealth, which it employed on the whole in good deeds, and certainly

threw its influence on the side of peace and security. Although distinct classes, the judges, scribes, physicians, and even skilled manufacturers were usually attached to the temple, and priests often exercised these functions. Originally the god, and soon his temple, were the visible embodiment of the city life. The king grew out of the high priest. He was the vicegerent of the god on earth, and retained his priestly power to the last, but he especially represented its external aspect. He was ruler, leader of the army, chief judge, supreme builder of palaces and temples, guardian of right, defender of the weak and oppressed, accessible to the meanest subject. The expansion of city territory by force of arms, the growth of kingdoms and rise of empires, led to a military caste, rapacious for foreign spoils, and domestic politics became a struggle for power between the war party of expansion and conquest and the party of peace and consolidation. C. H. W. J.—C. J. M. W.

ASTAD, 1 Es 5^{13} (RV).—See AZGAD.

ASTATH, 1 Es 8^{38} (AV, RV).—See AZGAD.

ASTROLOGY, ASTRONOMY.—See MAGIC, etc.

ASTYAGES (Bel 1) was the last king of Media. He was defeated and dethroned by Cyrus the Great in 550 B.C.

ASUPPIM.—Asuppim is mentioned in 1 Ch $26^{15, 17}$ (AV); RV, RSV 'the storehouse' is to be preferred.

ASUR (AV **Assur**), 1 Es 5^{31}.—His sons returned among the Temple servants under Zerubbabel; called **Harhur,** Ezr 2^{51}, Neh 7^{53}.

ASYLUM.—See ALTAR, KIN [NEXT OF], REFUGE [CITIES OF].

ASYNCRITUS (Ro 16^{14}).—A Christian greeted by St. Paul with four others 'and the brethren who are with them,' perhaps members of the same small community. The name occurs in Roman inscription *CIL* vi. 12,565, of a freedman of Augustus.

ATAD.—A threshing-floor in Transjordan on the road to Hebron, Gn 50^{10f}; the site is unknown. See ABEL-MIZRAIM.

ATAR, 1 Es 5^{28} (RV).—See ATER, **1.**

ATARAH ('crown').—Wife of Jerahmeel and mother of Onam, 1 Ch 2^{26}.

ATARGATIS (RV less correctly **Atergatis**).—In addition to the sanctuary of this goddess (also known in Gr. as Derceto) at Carnion (2 Mac 12^{26}; see ASHTAROTH, ASHTEROTH-KARNAIM), other shrines were situated at Hierapolis and Askalon (=Ashkelon, q.v.). Here sacred fish were kept, and at the latter place the goddess was represented as a mermaid, resembling the supposed form of the Philistine Dagon (q.v.). Some expositors, because of the ancient name of Carnion, *i.e.*, Ashteroth-Karnaim, have identified the goddess with Astarte. The name, however, a compound of *ʿAthar* (=Phoen. ʿAshtart, Heb. ʿAshtoreth [q.v.]) and of *ʿAtti* or *ʿAttah*, which latter term appears as a god's name upon inscriptions, shows her to be Astarte who has assimilated the functions of ʿAtti. This etymology, together with her mermaid form and the fact that fish were sacred to her, apparently makes her a personification of the fertilizing powers of water.

Atargatis was so prominently a Syrian goddess that Greek and Latin authors habitually referred to her as *Dea Syria* or, in one word, *Deasura*. Nevertheless the Atargatis cult was extensively disseminated all over the Mediterranean world and even as far to the west and north as the island of Britain. As a rule, her cults were located in seaport towns. Far-travelling Syrian merchants were her highly effective missionaries.

At present her best known sanctuary is the inland Nabataean temple that crowns *Khirbet et-Tannûr* in *Wâdî Ḥesā*, east of the southern end of the Dead Seat It has been fully excavated and the results published in very dependable fashion. N. K.—H. R. W.

ATAROTH.—1. A town not far from Dibon, rebuilt by the Gadites, Nu $32^{3, 34}$; modern *Khirbet ʿAṭṭārûs*,

NW. of *Dhîbân*. On the Moabite stone (see MOAB) Mesha says the Gadites had long dwelt there. **2.** A town on the S. border of the territory of the children of Joseph, Jos 16^2; it is called **Ataroth-addar** in Jos 16^5 18^{13}; probably modern *Khirbet ʿAṭṭâra*, near *Tell en-Naṣbeh* (? Mizpah). **3.** Another town on the same border, Jos 16^7; possibly modern *Tell Sheik edh-Dhiâb*. **4.** 1 Ch 2^{54} (AV 'Ataroth, the house of Joab'); see ATROTH-BETH-JOAB.

ATAROTH-ADDAR.—See ATAROTH, 2.

ATER.—1. Eponym of a guild of porters who returned with Zerubbabel, Ezr $2^{16, 42}$, Neh $7^{21, 45}$, 1 Es 5^{28} (AV **Jatal**, RV **Atar**). **2.** Another whose sons returned with Zerubbabel, Ezr 2^{16}, 1 Es 5^{15} (AV **Aterezias**). The numbers are variously given as 98 (Ezr) and 92 (1 Es).

ATEREZIAS, 1 Es 5^{15} (AV).—See ATER, 2.

ATERGATIS.—See ATARGATIS.

ATETA, 1 Es 5^{28} (RV).—See HATITA.

ATHACH.—Town in S. of Judah, 1 S 30^{30}; the site is unknown, but possibly to be identified with **Ether, 2** (q.v.).

ATHAIAH.—A Judahite who lived in Jerusalem in the time of Nehemiah, Neh 11^4.

ATHALIAH.—1. The only queen who occupied the throne of Judah. She was the daughter of Ahab and Jezebel, and was married to Jehoram, son of Jehoshaphat. On the accession of her son Ahaziah she became queen-mother, second only to the king in power and influence. When Ahaziah was slain by Jehu, she could not bring herself to take an inferior position, and seized the throne for herself, making it secure, as she supposed, by slaying all the male members of the house of David so far as they were within her reach. One infant was preserved, and was successfully concealed in the Temple six years. The persons active in this were Jehosheba, sister of Ahaziah, and her husband Jehoiada, the chief priest. The story of the young prince's coronation by the body-guard is one of the most dramatic in Hebrew history. The death of Athaliah at the hands of the guard forms the logical conclusion of the incident. The destruction of the temple of Baal, which is spoken of in the same connexion, indicates that Athaliah was addicted to the worship of the Phoenician Baal, introduced by her mother into Israel (2 K 11). **2.** See GOTHOLIAH. **3.** A Benjamite (1 Ch 8^{26}). H. P. S.

ATHARIAS, 1 Es 5^{40} (AV).—See ATTHARIAS.

ATHARIM.—A place mentioned in Nu 21^1 'the way of Atharim.' The place is unknown, unless with some editors we assume a corruption of the text and identify with **Tamar**=**Hazazon-tamar** (qq.v.), near the Dead Sea. The rendering of AV 'the way of the spies' follows Pesh., Targ., and Vulg., and is due to the resemblance between *tārîm* and *ʾathārîm*. The suggestion that we should render 'the way of tracks,' *i.e.* the caravan route, rests on an improbable connexion with an Arabic word.

ATHENOBIUS (1 Mac 15^{28-36}).—A friend of Antiochus VII. Sidetes. He was sent to Jerusalem to remonstrate with Simon Maccabaeus for the occupation of Joppa, Gazara, the citadel of Jerusalem, and certain places outside Judaea. Simon refused the terms proposed, and Athenobius was obliged to return in indignation to the king.

ATHENS.—In the earliest times, Athens, on the Gulf of Aegina, consisted of two settlements, the town on the plain and the citadel on the hill above, the Acropolis, where the population fled from invasion. Its name and the name of its patron-goddess Athene (Athenaia), to whom was dedicated the glorious Parthenon, are inextricably connected. She was the maiden goddess, the warlike defender of her people, the patroness of the arts. The city lies about three miles from the seacoast on a large plain. When Greece was free, Athens was the capital of the district Attica, and developed a unique history in Greece (q.v.). It first gained distinction by the repulse of the Persian invasions in 490 and 480 B.C. It was burned by the Persians in the latter year. Themistocles provided it with a new wall embracing a larger area. The city now had a brilliant career of political, commercial, literary, and artistic supremacy. It was in the 5th cent. B.C. the greatest of Greek democracies, and produced the greatest sculptures and literary works the world has ever seen. In the same century Socrates lived and taught there, as did later Plato (q.v.) and Aristotle. The conflict with Sparta, the effects of the Macedonian invasion, and ultimately the Roman conquest of Greece (146 B.C.) which became a Roman province under the name 'Achaia' (q.v.), lessened the political importance of Athens, but as a State it received from Rome a position of freedom and consideration worthy of its undying merits. Athens remained supreme in philosophy and the arts, and in St. Paul's time (Ac 17^{15-18^1}, 1 Th 3^1) was still the intellectual centre of the world. It was also noted for its piety (Ac 17^{22}, Jos. *c. Ap.* ii. 11 [130]). On the altar to the Unknown God, see UNKNOWN GOD. The market where Paul argued (Ac 17^{17}) lay north of the Areopagus (q.v.).

A. So.—E. G. K.

ATHLAI.—A Jew who had married a foreign wife, Ezr 10^{28}; called **Emathis** in 1 Es 9^{29} (AV **Amatheis**, RV **Ematheis**).

ATHLETE.—This word stands in RSV in 1 Co 9^{25} (AV, RV 'every man that striveth'), 2 Ti 2^5 (AV 'if a man strive for masteries'; RV 'if a man contend in the games'). See GAMES II.

ATIPHA, 1 Es 5^{32} (AV, RV).—See HATIPHA.

ATONEMENT.—1. General. The word 'atone' etymologically is 'to make at one,' and the nearest equivalent perhaps to 'atonement' taken in this sense is 'reconciliation.' In the translations of the Bible however 'atonement' appears predominantly for a Heb. root which means not reconciliation but expiation, not the bringing together of persons separated but the removal of sin and its accompanying uncleanness. In more general theological usage the 'Atonement' is the work of Christ both in removing sin and in bringing together or reconciling God and man. For the details of the Biblical term which is translated 'atonement' or 'expiation,' see EXPIATION; and likewise articles on related Biblical terms, *e.g.* PROPITIATION, RECONCILIATION. It is impossible however to keep these various terms completely apart, since especially in the NT they are interlocked to form a composite pattern. The purpose of this article is to bring together some of the aspects of reconciliation and removal of sin in a wider perspective, and to discuss their more general relations, leaving the details of the Biblical terms to the relevant articles.

2. In the Old Testament. The terms 'atonement' or 'expiation' in the OT have their setting predominantly in the sacrificial system. Their evaluation for Biblical theology however presents certain problems.

It is characteristic of the codes which frame the sacrificial system that for the most part they present a formal and external outline of procedure rather than a theological account of the way in which the sacrifices have their effect. It should not however be assumed because of the formal expression of the laws that Israel held a mechanical view of the efficacy of sacrifice. Sacrificial thinking should not be classified under 'magic,' nor did the Hebrews have the clear hard understanding of 'cause and effect' by which one would interpret the sacrifice as a cause which once set in motion could not fail to effect the good will of God. Even those abuses in sacrificial worship which the prophets criticized were not so much 'mechanical' as syncretistic, un-Yahwistic, and separated from the ethical traditions of the covenant. Along with the sacrificial laws we should take sections of the Psalter as the sung liturgy which accompanied the sacrificial service. Here we find the reception of sacrifice a matter of prayer (*e.g.* Ps 20^3); the need of inward worship is emphasized (4^5, etc.), and it is proclaimed that sacrifice

is not something needed by God (Pss 40, 50). Inward cleanliness is asked by God, and sacrifices are not a substitute for it (Ps 51[15-17]); the paradox of the ending of Ps 51 should not be too easily evaded by assigning the last two verses to a redactor. All this hardly amounted to a theology of sacrifice; but it indicated that expiation and cleansing depended on the mercy of God (Ps 65[4] 78[38] 79[9]—in all of which the Heb. *kippēr* 'expiate, remove sin' appears, RSV 'forgive').

It need not be doubted, then, that the sense of need for expiation was set deeply in the Israelite consciousness from early times, and that although it may have been increased by the Exile it was not, as was formerly suggested quite often, largely a product of that catastrophe. Expiation and propitiation are after all prominent parts of Babylonian religion in a much more developed civilization and yet at an earlier date.

On the other hand it is clear that the sacrificial concepts cover only a limited sector of the religious tradition in Israel. The great events of the so-called 'history of salvation' such as the Exodus are not called sacrifices or expiations. Their interpretation is more characteristically put in the terms of ransom or redemption. The characteristic situation is that of the first-born, whose life is forfeit to the Lord and must therefore be returned to Him by killing or alternatively be redeemed by a substitution or payment; or the man who has become enslaved (normally for debt) and has to be ransomed by his kin; or the piece of land which is in danger of alienation from the family and can be 'redeemed' for restoration to the family. For the interpretation of the Exodus in this way, see Ex 4[22-23].

The importance of this for the Atonement is firstly its place as background for certain central NT affirmations, *e.g.* Mk 10[45], 'to give his life as a ransom for many,' but secondly and no less important that it brings into prominence the history and life of the people of God and not only an external transaction between them and God. The choosing of Israel can itself be seen as a ransom (Is 43[3]); the other nations are the price which God pays for the choice and redemption of His people. The history of Israel from a theological standpoint is the living out by the people of this special position in interaction with the other nations.

The characteristics of God which are involved in the atonement conceptions are among the most fundamental of the God of Israel. In particular we may mention the holiness of God. This appears in the priestly-sacrificial line of thought as marking out a realm which must not be violated by men and for violations of which the necessary expiation is inexorably demanded. In the prophetic and historical tradition God's holiness is manifested in His acts of judgment and mercy (*e.g.* Is 5[16]). We should however not speak of God's holiness in the abstract, for in action it is the holiness of God in His covenant with His people. When sin appears within the covenant relationship atonement is the question of the preservation of the covenant in spite of what Israel has done. Of this the classic instance is immediately after the Sinai covenant, when Israel worships the golden calf (Ex 32–34, especially 32[30]). Ex 33 meditates mainly on the question of how God can go with this rebellious people.

In such situations a visitation of the Divine anger often follows, commonly in the form of plague (Ex 32[35], Nu 25[8], etc.). We may ask how far the anger of God is important for the understanding of atonement. The visitation can clearly be understood as punishment (Ex 32[35]). Though the technical terminology of expiation is not used of such punishment as a rule, we do have expiation by retribution for murder in Nu 35[33], and Is 40[2] implies the same for the sufferings of Israel, which in this case have exceeded their deserts. Against this Divine anger we may have in certain mainly early sources the idea of appeasing or propitiation (see PROPITIATION), but this seems to apply more to mysterious or arbitrary Divine visitations than to anger that reacts against plain disobedience; and the sacrificial technical terminology seems to refer to expiation of sin rather than appeasement of God. But since unexpiated sin brings the anger of God swiftly upon the people, it is difficult to make a clear distinction here, and the expiation of sin is done with an evident apotropaic intent in cases like Nu 16[41-50], 25[6-13].

Mention must also be made of the place of intercession in the removal of sin, although it is rather too much to describe intercession as itself expiatory. In 2 S 21[14], 24[25] (both ending passages of allied content) the expression 'heeded supplication' or 'let himself be supplicated' goes back to a form of intercession by sacrifice. In both these cases an apotropaic sense is involved; famine or plague is to be averted. This however is not simple intercession; such does appear however in the case of Moses, Ex 32[30] 34[9]. Jer 15[1-4] suggests that one might have expected the intercession of a Moses or a Samuel to avert disaster sent by God. The basis for all such intercession is the sense of the freedom of God, the knowledge that even in His wrath He is not tied legalistically to a precise penalty which He is forced by His own nature to exact, or a procedure which He cannot but follow. Something like this is expressed in Ex 33[19].

It is probably along this line of intercession that the OT comes to an idea of vicarious suffering. Ex 32[32] is not so much an idea that Moses by perishing might save his people, but rather an expression that though himself not implicated in their idolatry he would wish to perish with them if they cannot be forgiven. The figure of Moses may lie behind the Suffering Servant of Is 53; and in any case the Servant is intercessor (v.[12]) as well as bearing the sin of 'many.'

It may be reasonably said that, much as the OT contributes to the understanding of sin and atonement, it hardly makes known a final basis of atonement. The Servant of Is 53 is after all a rather isolated figure in the OT. The last resort in the OT is the faithfulness of God to His covenant with His people, His will to sustain it from His side even where Israel betrays it.

3. In the New Testament. Classical theological treatments of the atonement have correctly seen how atonement and incarnation, or atonement and Christology, must be handled together; for with Christ occupying the centre of atonement and drawing into Himself the lines and figures of OT thinking, so much comes to depend on the person of Christ, and the way in which He was one with God and one with His fellow-men. Along with this goes the problem of His self-presentation to men, the methods by which and the order in which He made Himself known. For He did not simply state the truths of Christology and the purpose of atonement and having stated them openly proceed to act them out. In the gospel story the Christological claim, the task of atonement, and the making known of these to men, are all unfolded together through the historical movement of the life and mission of Christ, with a climax in the Easter and Ascension narrative. The rather different presentation of these in the Epistles is because these take a post-resurrection position and are not trying to reconstruct the presentation of Jesus as it was in fact made before the fullest disclosures were given.

If we were right in saying that the ultimate ground of atonement in the OT was the faithful will of God to sustain His covenant with man (though the OT left it somewhat uncertain how sin was indeed destroyed or absorbed on such a basis), we may say that now Christ is a living embodiment of this covenant, as One who in His body holds together by His faithfulness God and man. If this is so, then it is worth pointing out that this bond of faithfulness is to be seen not only in the death of Christ but in all His life and work, although the times of greatest trial show forth most clearly the deep love and suffering involved.

It seems likely that the thought of sacrificial expiation came into the church through the mind of Christ Himself. Most scholars (with some important exceptions) have seen in this the influence of Is 53. For the theme

of sacrificial expiation in most forms the centre is the crucifixion. This is not, however, an arbitrarily imposed means of satisfying a divine command. Jesus here takes upon Himself the sins of the world, by His complete identification with men at the same time as they most completely reject Him, and in His death brings sin to death. We thus have an objective and final act of atonement where the OT for its final ground could only refer us to the covenant will of God. We must add that in the crucifixion we have a complete identification with the will of God at the same time as God leaves Him to His dereliction and suffering. Such a statement may help us to avoid a misuse of the propitiation idea which would suggest a changing of God's mind by the sacrifice of Jesus or a conflict between holiness and love in God. The identification of Christ with men follows in some respects the sacrificial rituals, *e.g.* Lv 16^{21-22}. More broadly however it can be understood by the NT term 'reconciliation,' 2 Co 5^{18-21}. In either case the place of the resurrection of Christ must not be neglected. By it God displays that Christ, in identifying Himself with sinful man and in suffering dereliction by His Father, was indeed doing the will of God; the Resurrection is thus His justification or vindication. It also makes clear that the atonement of the Cross is not only a willing expiation of sin but is a triumph over sin; sin brought Jesus to His death and grave, but it was sin that perished, and He rose again victorious.

A rather different development of sacrificial expiation is that given by the letter to the Hebrews, modelled on the Day of Atonement. Christ makes expiation, however, not in the earthly tabernacle but in the heavenly sanctuary which He enters with His own expiatory blood. This places an emphasis on the Ascension as the climactic moment of atonement.

The element of intercessory atonement appears in the NT as in the OT, He 7^{25}, Ro 8^{34}. It would be too harsh to separate this intercession from atonement proper and regard it as subsidiary; Jesus' identification with God and with man together means a continual service of intercession by Him for man, summed up at the crucifixion in the prayer 'Father, forgive them' (Lk 23^{34}). Cf also at length the Johannine 'high-priestly' prayer, Jn 17.

The thought of ransom or release is also prominent in the NT, and appears in one of the earliest statements about the atonement in the synoptic tradition, Mk 10^{45}. Ransom and redemption are interlaced with sacrificial expiatory terms in Ro 3^{24-25}, 1 P 1^{18-19}. We do not need to construe the ransom primarily as a money payment or a price of that kind, for the oldest practice of 'redemption' is that where the life of the first-born belongs to God and can be redeemed only by the giving of a life in its place as substitute.

One or two ways must be mentioned in which the atonement is related to the history of the divine economy of salvation. Firstly, the interaction of Jew and Gentile is one of the main themes of the Passion Narrative—their hostility to each other, yet their need of each other to take responsibility for the rejection of Christ. It is in the letter to the Ephesians in particular that the atonement is expounded as the overcoming of the opposition of Jew and Gentile, itself once founded in God's plan of salvation, and thus as the basis for a church of Jew and Gentile together (Eph 2). Secondly, the atonement is related in a similar way to the Law, its works, its domination, and its penalties—so Gal 3^{10-14}, Col 2^{13-15}, Eph 2^{15}.

Lastly we may mention the relation of the Church to the atonement; we saw how in the OT the ransom or redemption idea is not external to the history of the people of God but is worked out in their life. The NT is emphatic about the uniqueness and the finality of the atonement made by Christ. On the other hand passages like Col 1^{24} envisage the apostle filling up something lacking in the sufferings of Christ. It seems wiser not to say that the sufferings of the Church are themselves atoning, but that it is of the nature of the atoning suffering of Christ that it should be accompanied by the suffering of His people. This may include not only the suffering of the Church but the suffering of the Jews; cf the children of Bethlehem who suffered for their association with Jesus although they knew nothing of Him, Mt 2^{16-18}. J. Ba.

ATONEMENT, DAY OF.—The Day of Atonement, with its unique and impressive ritual, is the culmination and crown of the sacrificial worship of the OT. The principal details are given in Lv 16, supplemented by 23^{26-32}, Nu 29^{7-11}, Ex 30^{10}, all from the Priests' Code which, however, as we shall see, has combined various rituals, some of them of the greatest antiquity. The date was the 10th day of the seventh month (Tishri) reckoning from evening to evening (Lv 16^{29} 23^{27ff}). Not only was this day a 'sabbath of solemn rest,' on which no work of any sort was to be done, but its unique place among the religious festivals of the OT was emphasized by the strict observance of a fast. The rites peculiar to 'the Day' (*Yômā*), as it is termed in later literature, may be conveniently grouped in five stages.

(*a*) In the preparatory stage (Lv 16^{3-10}), after the special morning sacrifices had been offered (Nu 29^{7-11}), the high priest selected the appointed sin- and burnt-offerings for himself and 'his house,' *i.e.* the priestly caste, then laid aside his usual ornate vestments, bathed, and robed in a simple white linen tunic and girdle. He next selected two he-goats and a ram for the people's offerings, and proceeded to 'cast lots upon the two goats; one lot for Yahweh, and the other lot for Azazel' (AV 'scapegoat,' see AZAZEL). These preparations completed, the proper expiatory rites were begun, and were accomplished in three successive stages.

(*b*) In the first stage (vv.$^{11-14}$) the high priest made atonement for himself and the priesthood. After slaying the bullock of the sin-offering, he took a censer filled with live charcoal from the altar of burnt-offering and a handful of incense, and entered the Most Holy Place. Here he cast the incense on the coals, producing a cloud of smoke, by which the dwelling-place of the Most High between the Cherubim was hidden from mortal gaze (see Ex 33^{20}). This done, he returned to the court, to enter immediately, for the second time, the inner sanctuary, carrying a basin with the blood of the bullock, which he sprinkled on the front of the mercy-seat once, and seven times on ground before the Ark.

(*c*) In the second stage (vv.$^{15-19}$) atonement was made in succession for the Most Holy Place, the Holy Place, and the outer court. The goat on which the lot 'for Yahweh' had fallen was slain by the high priest who then once again entered the Most Holy Place with its blood, which he manipulated as before. On his return through the Holy Place a similar ceremony was performed (v.^{33}, cf Ex 30^{10}), after which he proceeded, as directed in vv.^{18f}, to 'cleanse and hallow' the altar of burnt-offering, which stood in the outer court (or the altar of incense, as others believe: cf Ex 30^{10}).

(*d*) These all led up to the culminating rite in the third stage (vv.$^{20-22}$). Here the high priest, placing both hands on the head of the goat allotted to Azazel, made solemn confession—the tenor of which may still be read in the Mishnic treatise *Yômā*—of all the nation's sins. By this ceremony these sins were conceived as not only symbolically but actually transferred to the head of the goat (vv.^{21f}, see below), which was solemnly conducted into the wilderness, the supposed abode of the mysterious Azazel. In NT times the goat was led to a lofty precipice in the wilderness about 12 miles E. of Jerusalem over which it was thrown backwards, to be dashed in pieces on the rocks below (*Yômā*, vi. 6 ff).

(*e*) We now reach the concluding stage of 'the Day's' ceremonial (vv.$^{23-28}$). The fact that the essential part was now accomplished was strikingly shown by the high priest's retiring into the Holy Place to put off 'the holy garments' (vv.$^{23, 32}$), bathe, and resume his ordinary high-priestly vestments. Returning to the court, he

offered the burnt-offerings for himself and the people, together with the fat of the sin-offering. The remaining verses (26-28) deal with details, the characteristic significance of which will be discussed presently.

Though we have no evidence for the practice of the ritual described above prior to the Exile (the first clear reference to it is probably Sir 50[5]—*i.e. c* 180 B.C.), and though all directives regarding it come from P, the latest of the Pentateuchal documents, it is inconceivable that rites such as these should be of late origin. It is probable that in Lv 16 various originally separate rites are combined, of which at least two—that of Azazel, and that of the purification of the Ark and the sanctuary—must go back to earliest times. The fact that these were originally purely priestly transactions, in which the community did not participate, may explain why older bodies of law do not mention them. P seems to have taken these ceremonies, plus one (vv.[12f]) involving incense, and drawn them together into a single ritual in which the people (vv.[29ff]) participated actively, if indirectly. In the post-Exilic period, when older features of the New Year celebration had lost relevance, and when a heightened sense of sin and need of purification had impressed itself on the Jewish spirit, the ritual of atonement became the most important event of the ecclesiastical year. In NT it is referred to as 'the Fast' (Ac 27[9]) and so occasionally by Josephus. To this day it remains the most solemn and most largely attended religious celebration of the Jewish year.

The dominating thought of Lv 16 is the awful reality and contagion of sin, which affects not only priest and people, but the sanctuary itself. Its correlate is the intense realization of the need of cleansing and propitiation, as the indispensable condition of right relations with a holy God. The details of the ritual by which these relations were periodically renewed are of surpassing interest, as showing how the loftiest religious thought may be associated with ritual elements belonging to the most primitive stages of religion. Thus, in the case before us, the efficacy of the blood, the universal medium of purification and atonement, is enhanced by cessation from labour and complete abstinence from food—the latter the outward accompaniment of inward penitence—and by the high priest's public and representative confession of the nation's sins. Yet alongside of these we find the antique conception of holiness and uncleanliness as something material, and of the fatal consequences of unguarded contact with the one or the other. It is only on this plane of thought that one understands the need of the cleansing of the sanctuary, infected by the 'uncleannesses' of the people among whom it dwelt (16[16] RV, RSV, cf Ezk 45[18ff]). The same primitive idea of the contagion of holiness underlies the prescribed change of garments on the part of the high priest. The 'holy garments' in which the essential parts of the rite were performed had to be deposited in the Holy Place; those who had been brought into contact with the sacrosanct animals (vv.[26ff]) must bathe and wash their clothes, lest, as Ezekiel says in another connexion, 'they communicate holiness to the people with their garments' (44[19] RSV), *i.e.* lest the mysterious contagion pass to the people with disastrous results. The most striking illustration of this transmissibility, however, is seen in the central rite by which the nation's sins are transferred to the head of 'the goat for Azazel,' the demonic spirit of the wilderness (cf the similar rite, Lv 14[6f]).

These survivals from the earlier stages of the common Semitic religion should not blind the modern student to the profound conviction of sin to which the institution bears witness, nor to the equally profound sense of the need of pardon and reconciliation, and of uninterrupted approach to God. By its emphasis on these perennial needs of the soul the Day of Atonement played no unimportant part in the preparation of Judaism for the perfect atonement through Jesus Christ. The author of the Epistle to the Hebrews in a familiar passage contrasts the propitiatory work of the Jewish high priest on this day with the great propitiation of Him who, by virtue of His own atoning blood, 'entered once for all into the holy place' (He 9[12] RSV), even 'into heaven itself,' where He remains, our great High Priest and Intercessor (7[25f]).

A. R. S. K.—J. Br.

ATROTH, Nu 32[35] (AV).—See ATROTH-SHOPHAN.

ATROTH-BETH-JOAB.—The name of a family descended from Salma, 1 Ch 2[54] (AV 'Ataroth, the house of Joab').

ATROTH-SHOPHAN.—A city of Gad, near Jogbehah, Nu 32[35] (AV 'Atroth, Shophan'); the site is unknown.

ATTAI.—**1.** A Jerahmeelite, 1 Ch 2[35f]. **2.** A Gadite who joined David at Ziklag, 1 Ch 12[11]. **3.** A son of Rehoboam, 2 Ch 11[20].

ATTAIN.—In Ac 27[12] 'attain' has the literal meaning of *reach* a place (so RV, RSV). Elsewhere it has the figurative sense still in use.

ATTALIA (modern *Adalia*).—A town on the coast of Pamphylia, not far from the mouth of the river Catarrhactes, founded and named by Attalus II. of Pergamum. It was besieged in 79 B.C. by P. Servilius Isauricus, when in possession of the pirates. In the Byzantine period it was of great importance. It has the best harbour on the coast. Paul and Barnabas came on there from Perga, and took ship for Antioch (Ac 14[25]). Remains of the old walls and towers still exist.

A. So.—E. G. K.

ATTALUS.—King of Pergamum (q.v.) (159-138 B.C.) and a prominent figure in Near Eastern politics. He was one of the kings to whom the Roman Senate is said to have written in support of the Jews in the time of Simon the Maccabee (1 Mac 15[22]). He was Attalus II.

ATTENDANCE.—In 1 Mac 15[32] (AV) 'attendance' is used for a king's *retinue* (RSV 'magnificence'); while in 1 Ti 4[13] it is used in the obsolete sense of *attention*: 'Till I come give attendance (RV 'heed,' RSV 'attend') to reading.'

ATTHARATES.—Apparently a proper name in 1 Es 9[49], but really a corruption of the Pers. title *tirshatha* (cf Neh 8[9] AV, RV; RSV 'governor'). See TIRSHATHA.

ATTHARIAS.—Apparently a proper name in 1 Es 5[40] (AV **Atharias**), but really a corruption of the title *tirshatha* (cf Ezr 2[63] AV, RV; RSV 'governor'). See TIRSHATHA.

ATTIRE.—See DRESS.

ATTUS, 1 Es 8[29] (RV).—See HATTUSH, **2.**

AUDIENCE.—From Lat. *audientia*; 'audience' means in AV the act of *hearing*, as Lk 20[45] 'in the audience of all the people.' Now it means the people gathered to hear. RSV 'in the hearing.'

AUGIA, 1 Es 5[38] (AV, RV).—See AGIA, **1.**

AUGURY.—See MAGIC, DIVINATION, AND SORCERY.

AUGUSTAN COHORT (RSV), **AUGUSTAN BAND** (RV), **AUGUSTUS' BAND** (AV).—See BAND.

AUGUSTUS.—This name is Latin, and was a new name conferred (16th Jan. 27 B.C.) by the Roman Senate on Gaius Octavius, who, after his adoption by the dictator Gaius Julius Caesar, bore the names Gaius Julius Caesar Octavianus. The word means 'worthy of reverence' (as a god), and was represented in Greek by *Sebastos*, which has the same signification. Doubtless to avoid this impiety, the title is transliterated instead of translated in Lk 2[1]; but the cognate adjective, *sebastē* for 'Augustan,' is used in Ac 27[1]. In official documents Augustus appears as 'Imperator Caesar Augustus.' He was born 63 B.C., was the first Roman emperor from 27 B.C., and died in A.D. 14. He was equally eminent as soldier and administrator, and the Empire was governed for centuries very much on the lines laid down by him. In Lk 2[1] he is mentioned as having issued a decree that all inhabitants of the Roman Empire should be enrolled (for purposes of taxation). There is evidence for a 14-year cycle of enrolment in the Roman province of Egypt.

A. So.—E. R. H.

AUL.—See Awl.

AURANUS.—A man 'advanced in years and no less advanced in folly,' who endeavoured to suppress a tumult in Jerusalem provoked by the sacrileges of Lysimachus, brother of the apostate high priest Menelaus, 2 Mac 4[40]; (RV **Hauran**).

AUTEAS, 1 Es 9[48] (AV, RV).—See Hodiah, **2.**

AUTHORITY.—The capability, liberty, and right to perform what one wills. The word implies also the physical and mental ability for accomplishing the end desired. Authority refers especially to the right one has, by virtue of his office, position, or relationship, to command obedience. The centurion was 'a man under authority,' who knew what it meant to be subject to others higher in authority than himself, and who also himself exercised authority over the soldiers placed under him (Mt 8[8f]). In like manner 'Herod's jurisdiction' (Lk 23[7]) was his authority over the province which he ruled. Hence the authority of any person accords with the nature of his office or position, so that we speak of the authority of a husband, a parent, an apostle, a judge, or of any civil ruler. The magistrates who are called in Ro 13[1] 'the higher powers,' are strictly the highly exalted and honoured authorities of the State (so RSV 'governing authorities'), who are to be obeyed in all that is right, and reverenced as the 'ministers of God for good.' God is Himself the highest authority in heaven and on earth, but He has also given to His Son 'authority on earth to forgive sins' (Mt 9[6]) and to execute judgment (Jn 5[27]). After His resurrection Jesus Himself declared: 'All authority in heaven and on earth has been given to me' (Mt 28[18]). In the plural the word is used in Eph 2[2] 3[10] 6[12], Col 1[16] 2[15], to denote good and evil angels, who are supposed to hold various degrees and ranks of authority. See Dominion, Power. M. S. T.—F. W. G.

AUTHORIZED VERSION.—See English Versions, **30.**

AVA, AVITES, 2 K 17[24, 31] (AV).—See Avva.

AVARAN ('pale'?).—Surname of Eleazar, a brother of Judas Maccabaeus (1 Mac 2[5] 6[43])

AVEN.—An insulting pointing in the Hebrew, followed by AV, RV, in Ezk 30[17], for **On** (q.v.; so RSV).

AVEN.—This stands for Beth-aven (q.v.) in Hos 10[8].

AVENGER OF BLOOD.—The practice of blood-revenge has been very widely spread among societies in a certain stage of civilization, where there has been no central authority to enforce law and order, and where the certainty of retaliation has been the only guarantee for security of life. Among the Semites the custom was in full force from the earliest times, and it is still the only basis of order in Arabia. It depends for its maintenance upon the solidarity of the clan or tribe. All the members of the tribe, whatever may be the immediate parental relationship, are counted as being of one blood; a wrong done to one is a wrong done to all, to be avenged if necessary by all the offended clan upon all the clan of the offender. The phrase used by the Arabs is, 'Our blood has been shed.'

Of the form of blood-revenge that involved the whole clan or tribe in the murder of a single individual there are still traces in the OT (Jos 7[24], 2 K 9[26]). Naturally, however, the duty of avenging the shedding of blood fell primarily upon him who was nearest of kin to the slaughtered man. This next of kin was called the *gō'ēl*. The word in Hebrew law was used in a wide sense for him whose duty it was to redeem the property or the person of an impoverished or enslaved relative (Lv 25[25, 47-49], Ru 4[1ff]), but it came to be used specially of the man who had to perform this most tragic duty of kinship. The steady effort of Hebrew law was to limit this ancient custom so as to ensure that a blood feud should not perpetuate itself to the ruin of a whole clan, and that deliberate murder and accidental homicide should not come under the same penalty. It is possible to trace with some definiteness the progress of this sentiment by which the *gō'ēl* was gradually transformed from being the irresponsible murderer of a possibly blameless manslayer to being practically the executioner of a carefully considered sentence passed by the community. See Kin [Next of].

R. B. T.

AVIM, AVIMS, AVITES.—The AV spellings of **Avvim** (q.v.), **Avvites** (see Avva).

AVITH.—An Edomite city, Gn 36[35]; the site is unknown.

AVOID.—This verb is used intransitively in 1 S 18[11] (AV, RV), 'David avoided out of his presence twice' (RSV 'evaded him'). So Coverdale translates Mt 16[23] 'Auoyde fro me, Sathan.'

AVOUCH.—This word, found in Dt 26[17f] (AV, RV), is now obsolete except in legal phrases; RSV 'declare.'

AVVA.—A city from which the Assyrian king brought settlers to the Samaritan cities, 2 K 17[24] (AV **Ava**); probably to be identified with **Ivvah** (q.v.). The people are called **Avvites** in 2 K 17[31] (AV **Avites**).

AVVIM.—**1.** The name of primitive inhabitants of SW. Palestine, near Gaza, who were absorbed by immigrants from Caphtor (q.v.), *i.e.* the Philistines, Dt 2[23] (AV **Avims**); cf Jos 13[3] (AV **Avites**). **2.** A Benjamite town, Jos 18[23] (AV **Avim**); possibly to be identified with **Ai, 1.**

AWAY WITH.—This phrase is used idiomatically with the force of a verb in Is 1[13] (AV, RV). 'I cannot away with' = RSV 'I cannot endure.'

AWE.—RSV uses 'awe' more frequently than AV or RV in passages where this word has a more appropriate nuance; cf 1 Ch 16[25] ('to be held in awe'; AV, RV 'to be feared'), Mt 17[6] 27[54], Mk 4[41] 5[26] ('were filled with awe'; AV, RV 'were sore afraid,' 'feared greatly or exceedingly,' 'were filled with fear'), Ro 11[20] ('stand in awe'; AV, RV 'fear'), He 12[28] ('awe,' so also RV; AV 'godly fear'). See Fear.

AWL.—A boring instrument, named only in connexion with the ceremony whereby a slave was bound to perpetual servitude, Ex 21[6], Dt 15[17] (AV 'aul').

AWNING.—Correctly given by RV, RSV in Ezk 27[7] as translation of Hebrew *mikhsēkh* ('your awning'), corrected from *m^{e}khassēkh* (AV 'that covereth thee').

AX, AXE.—See Arts and Crafts, **1, 3.**

AXLE (AV, RV **Axletree**).—See Wheel.

AYEPHIM.—Unknown place mentioned in 2 S 16[14], according to RVm; AV, RV, RSV render 'weary.'

AYYELETH HASH-SHARAR.—See Psalms, **2.**

AZAEL.—**1.** 1 Es 9[14] (AV, RV); see Asahel, **4. 2.** One of those who put away foreign wives, 1 Es 9[34] (AV, RV **Azaelus**).

AZAELUS, 1 Es 9[34] (AV, RV).—See Azael, **2.**

AZAL, Zec 14[5] (AV).—See Azel, **2.**

AZALIAH.—Father of Shaphan the scribe, 2 K 22[3], 2 Ch 34[8].

AZANIAH.—A Levite who signed the covenant, Neh 10[7].

AZAPHION, 1 Es 5[33] (AV).—See Hassophereth.

AZARA, 1 Es 5[31] (AV).—See Hasrah, **2.**

AZARAIAS.—**1.** 1 Es 8[1] (RV); see Seraiah, **2. 2.** 2 Es 4[1] (RV); see Azariah, **9.**

AZAREL.—**1.** A Korahite follower of David at Ziklag, 1 Ch 12[6]. **2.** A son of Heman, 1 Ch 25[18]; called **Uzziel** in v.[4]. **3.** A prince of the tribe of Dan, 1 Ch 27[22]. **4.** A son of Bani, who had married a foreign wife, Ezr 10[41], 1 Es 9[34] (AV **Esril**, RV **Ezril**). **5.** A priest, Neh 11[13]. **6.** A Levite, Neh 12[36].

AZARIAH.—**1.** King of Judah; see Uzziah. **2.** 2 Ch 22[6] (AV, RV), an error for **Ahaziah** (RSV); cf v.[1] (see Ahaziah, **2**). **3.** A prophet, son of Oded, who met Asa's victorious army at Mareshah, and urged them to undertake a religious reform, 2 Ch 15[1-8]. **4.** Son of

Zadok and high priest in the reign of Solomon, 1 K 4^{2}. **5.** A descendant of Aaron and father of Johanan, 1 Ch 6^{10}. **6.** Another descendant of Aaron, the son of Johanan and father of Amariah, 1 Ch 6^{10f}, Ezr 7^{3}, 2 Es 1^{2} (AV, RV **Aziel**). **7.** High priest in the reign of Uzziah, 2 Ch 26$^{16-20}$; he withstood the king when he attempted to usurp the priests' office. **8.** High priest in the reign of Hezekiah, 2 Ch 31$^{10, 13}$. **9.** A son of Hilkiah the high priest, 1 Ch 6^{13f}, Ezr 7^{1}, 1 Es 8^{1} (AV **Ezerias**, RV **Zechrias**), 2 Es 1^{1} (AV **Azarias**, RV **Azaraias**). **10.** A priest who had married a foreign wife, 1 Es 9^{21} (AV, RV **Azarias**); he is called **Uzziah** in Ezr 10^{21}. **11.** A son of Nathan who was 'over the officers,' 1 K 4^{5}. **12.** A son of the Ethan whose wisdom was surpassed by that of Solomon (1 K 4^{31}), mentioned in 1 Ch 2^{8}. **13.** A Judahite, 1 Ch 2^{38}; he had Egyptian blood in his veins, v.^{34}. **14.** A Korahite Levite, 1 Ch 6^{36}; called **Uzziah** in v.^{24}. **15, 16.** Two of the sons of Jehoshaphat, 2 Ch 21^{2}. **17, 18.** Two of the five 'commanders of hundreds' who assisted Jehoiada in the restoration of Joash, 2 Ch 23^{1}. **19.** An Ephraimite who supported the prophet Oded when he rebuked the army of Israel for purposing to enslave the captives of Judah, 2 Ch 28^{12}. **20, 21.** Two Levites, a Kohathite and a Merarite, 2 Ch 29^{12}. **22.** One of those who repaired the wall of Jerusalem, Neh 3^{23}. **23.** One of the twelve leaders of Israel who returned with Zerubbabel, Neh 7^{7}; called **Seraiah** in Ezr 2^{2}, 1 Es 5^{8} (AV **Zacharias**, RV **Zaraias**). **24.** One of those who helped to explain the law to the people, Neh 8^{7}, 1 Es 9^{48} (AV, RV **Azarias**), and who signed the covenant, Neh 10^{3}. **25.** One of those who stood on Ezra's right hand at the reading of the law 1 Es 9^{43} (AV, RV **Azarias**). **26.** A priest, the son of Hilkiah, 1 Ch 9^{11}; called **Seraiah** in Neh 11^{11}. **27.** Son of Hoshaiah (the Maacathite, Jer 40^{8}), Jer 42^{1} (AV, RV **Jezaniah**) 43^{2}; called **Jezaniah** in 40^{8}, and **Jaazaniah** in 2 K 25^{23}. He was one of the 'captains of the forces' who joined Gedaliah at Mizpah. **28.** A captain of Judas Maccabæus, 1 Mac 5$^{18, 56, 60}$ (AV, RV **Azarias**). **29.** The Hebrew name of Abednego, Dn 1$^{6f. 11, 19}$ 2^{17}.

AZARIAS.—1. 1 Es 9^{21} (AV, RV); see AZARIAH, **10.** **2.** 1 Es 9^{43} (AV, RV); see AZARIAH, **25.** **3.** 1 Es 9^{48} (AV, RV); see AZARIAH, **24.** **4.** 2 Es 1^{1} (AV); see AZARIAH, **9.** **5.** 1 Mac 5$^{18, 56, 60}$ (AV, RV); see AZARIAH, **28.** **6.** Name assumed by the angel Raphael, To 5^{12} 6$^{6, 13}$ 7^{8} 9^{2}.

AZARU.—Ancestor of a family which returned with Zerubbabel, 1 Es 5^{15}. His name is omitted from the parallel lists in Ezra and Nehemiah.

AZAZ.—A Reubenite, 1 Ch 5^{8}.

AZAZEL.—The name in Hebrew and in RV and RSV of the desert spirit to whom one of the two goats was sent, laden with the sins of the people, in the ritual of the Day of Atonement (Lv 16$^{8, 10, 26}$ RV, RSV, see ATONEMENT [DAY OF]). Etymology, origin and significance are still matters of conjecture. The AV designation **scapegoat** (*i.e.* the goat that is allowed to escape, which goes back to the *caper emissarius* of the Vulg.) obscures the fact that the word *Azazel* is a proper name in the original, and in particular the name of a powerful spirit or demon supposed to inhabit the wilderness or 'solitary land' (16^{22} RV, RSV). The most plausible explanation of this strange element in the rite is that which connects Azazel with the illicit worship of field-spirits or satyrs (lit. 'he-goats') of which mention is made in Lv 17^{7} (AV 'devils,' RV 'he-goats'), Is 13^{21} (AV, RV, RSV 'satyrs'). It may have been the intention of the authors of Lv 16 in its present form to strike at the roots of this popular belief and practice by giving Azazel, probably regarded as the prince of the satyrs, a place in the recognized ritual. Christianity itself can supply many analogies to such a proceeding. The belief that sin, disease and the like can be removed by being transferred to living creatures, beasts or birds, is not confined to the Semitic races, and has its analogy in Hebrew ritual, in the ceremony of the cleansing of the leper (Lv 14^{53}). In the Book of Enoch (see PSEUDEPIGRAPHA, **1**) Azazel appears as the prince of the fallen angels, the offspring of the unions described in Gn 6^{1ff}. A. R. S. K.

AZAZIAH.—1. A Levite who played on the lyre, 1 Ch 15^{21}. **2.** Father of Hoshea the Ephraimite leader, 1 Ch 27^{20}. **3.** A Temple overseer under Hezekiah, 2 Ch 31^{13}.

AZBAZARETH, 1 Es 5^{69} (AV).—A corrupt form of **Esarhaddon** (q.v.; so RSV), derived from Vulg.

AZBUK.—Father of Nehemiah, who took part in rebuilding the walls of Jerusalem, Neh 3^{16}.

AZEKAH.—A city in the 'lowland' (Shephelah) of Judah (Jos 15$^{33-35}$), identified with modern *Tell Zakariyeh*, overlooking the 'valley of Elah' (1 S 17^{1f}). It marked the limits of Joshua's pursuit of the five kings after his victory near Gibeon (Jos 10^{10f}). It was fortified by Rehoboam (2 Ch 11^{9}). With the exception of Lachish, it was the last Judaean stronghold to be captured by Nebuchadrezzar before the fall of Jerusalem in 586 B.C. (Jer 34^{7}). In Lachish Letter 4, reference is apparently made to the cessation of fire-signals from Azekah, presumably an indication of its fall while Lachish still held out. Azekah and its villages were reoccupied by Jews after the exile (Neh 11^{30}). F. F. B.

AZEL.—1. A descendant of Jonathan, 1 Ch 8^{37f} 9^{43f}. **2.** An unknown place in the neighbourhood of Jerusalem according to RV of Zec 14^{5} (AV **Azal**); but RSV renders 'the side of it.'

AZEM, Jos 15^{29} 19^{3} (AV).—See EZEM.

AZEPHURITH, 1 Es 5^{16} (AV).—See JORAH.

AZETAS.—Ancestor of a family which returned with Zerubbabel, 1 Es 5^{15}. His name is omitted from the parallel lists in Ezra and Nehemiah.

AZGAD.—One whose descendants returned with Zerubbabel. The numbers vary in the different lists: 1222 in Ezr 2^{12}, 2322 in Neh 7^{17}, 1322 (3222 in AV) in 1 Es 5^{13} (AV **Sadas**, RV **Astad**). A second detachment of 110 returned under Ezra, Ezr 8^{12}, 1 Es 8^{38} (AV, RV **Astath**). An Azgad appears among the leaders who sealed the covenant, Neh 10^{15}.

AZIA, 1 Es 5^{31} (AV).—See UZZA, **2.**

AZIEI, 2 Es 1^{2} (AV, RV).—See AZARIAH, **6.**

AZIEL.—A Levite, 1 Ch 15^{20}; called **Jaaziel** (q.v.) in v.^{18}.

AZIZA.—A Jew who had married a foreign wife, Ezr 10^{27}; called **Zerdaiah** in 1 Es 9^{28} (AV **Sardeus**, RV **Zardeus**).

AZMAVETH.—1. A descendant of Saul, 1 Ch 8^{36}. **2.** One of David's heroes, 2 S 23^{31}, 1 Ch 11^{33}; probably the same as the Azmaveth of 1 Ch 12^{3} 27^{25}, whose sons joined David at Ziklag, and who was 'over the treasuries.' **3.** A Benjamite town, Ezr 2^{24}, Neh 7^{28} (**Beth-azmaveth**) 12^{29}; called **Beth-asmoth** in 1 Es 5^{18}; probably modern *Ḥizmeh*, N. of Anathoth.

AZMON.—A place on the border of Judah, Nu 34^{4}, Jos 15^{4}; possibly modern *Qeṣeimah*.

AZNOTH-TABOR.—The lower slopes of Mt. Tabor, marking the SW. corner of the portion of Naphtali, Jos 19^{34}; possibly modern *Umm Jebeil*.

AZOR.—An ancestor of Jesus (Mt 1^{13f}).

AZOTUS.—See ASHDOD.

AZRIEL ('El is my help').—**1.** Head of a 'father's house' in the E. half of the tribe of Manasseh, 1 Ch 5^{24}. **2.** A Naphtalite, 1 Ch 27^{19}. **3.** Father of Seraiah, Jer 36^{26}.

AZRIKAM ('my help has arisen').—**1.** Son of Neariah, 1 Ch 3^{23}. **2.** A descendant of Jonathan, 1 Ch 8^{38} 9^{44}. **3.** A Levite, 1 Ch 9^{14}, Neh 11^{15}. **4.** The 'commander of the palace' under Ahaz, 2 Ch 28^{7}.

AZUBAH ('forsaken').—**1.** Wife of Caleb, 1 Ch 2^{18f}. **2.** Mother of Jehoshaphat, 1 K 22^{42}, 2 Ch 20^{31}.

AZZAN.—Father of Paltiel, Nu 34^{26}.

AZZUR.—1. One of those who sealed the covenant, Neh 10^{17}. **2.** Father of Hananiah the false prophet, Jer 28^{1}. **3.** Father of Jaazaniah, one of the princes of the people, Ezk 11^{1}.

B

BAAL (BAALI, BAALIM).—Used generally, the word *ba'al* means 'possessor,' 'inhabitant,' 'controller.' Thus, a married man is called 'possessor of a woman' (2 S 11[26]), a ram, 'possessor of horns,' and the citizens of a locality are denoted by this word (Jg 9[2] 20[5], 1 S 23[11f], 2 S 21[12]). With a similar meaning, it is applied to numerous Canaanite local deities (plural *be'ālim*, Jg 2[11] 3[7] 8[33] 10[10], 1 S 7[1] 12[10], 1 K 18[18], most of which may be local manifestations of the *Ba'al* par excellence, the fertility-god of Canaan); cf BAAL-GAD, BAALATH-BEER. These local gods were supposed to manifest themselves in the fertility, or in some startling natural formation, of the locality where they were worshipped. Such an animistic conception is evident from the fact that they were worshipped in high places and in groves, where such rites as prophetic ecstasy (Jer 22[13]), self-mutilation (1 K 18[28]), child-sacrifice (Jer 19[5]), and fornication (Jer 7[9]) were practised, the last as a rite of imitative magic.

Any local god could be so designated (*e.g.* Dagon is termed the *ba'al* of a devotee who set up a stele to him at Râs Shamra), and Baal-berith ('Lord of the Covenant'), the god worshipped at Shechem, may have been Yahweh. Jg 8[33] does not suggest this, but in view of the late revision of the Book of Judges, the significance of Baal-berith may be misunderstood, especially if the worship of Yahweh had been contaminated by the local fertility-cult. Baal, however, was specifically the title of the Amorite god of winter rain and storm, otherwise known from Mesopotamian texts as Adad and in Canaan as Hadad ('thunderer') see also HADAD, RIMMON, and HADADRIMMON. Hadad is known from Egyptian execration texts to have been worshipped in Palestine from at least as early as *c* 1800 B.C., and several centuries later the Râs Shamra texts comprise a large complex of myths pertaining to Baal as the champion of Cosmos against Chaos in Nature and as the dying and rising vegetation-deity in annual conflict with Drought and Sterility. He is known from sculpture and figurines from Syria and Palestine as a warrior-god, striding into action with thunderbolt-spear and mace uplifted. His power of fertility is expressed by his association with the bull, the horns of which he wears on his helmet. In Aramaean sculpture he is shown standing on a bull, and Albright suggests that the bulls of Bethel and Dan in Israelite times may have served similarly as pedestals for the invisible Yahweh. Baal's stock epithet in the Râs Shamra texts is 'he who mounteth the clouds' (*rkb b'rpt*) an epithet of Yahweh also in Dt 33[26] and Ps 68[5] 104[3].

The theme of the Canaanite myth of Baal's victory over the unruly waters and his assumption of kingship was adapted by the Hebrews as the expression of their faith in Providence, but that of the vicissitudes of Baal as a vegetation-deity, in spite of Israel's appropriation of seasonal rituals connected with it, did not seriously influence Hebrew thought, though the imagery of the Canaanite myth was freely used in Hebrew poetry. From the references in Judges to repeated lapses to the cult of *Baalim* and *Ashtaroth* we may infer that in the early days of the settlement the Hebrews tended to assimilate the Baal-cult without adapting it, and at various crises in Hebrew history, *e.g.* under Ahab and Jezebel (1 K 16[32]), there was a recrudescence of Baal-worship in its native form in Israel, and Yahweh was apparently given the title as well as the attributes of Baal. Thus Saul, a zealous worshipper of Yahweh, names one of his sons *Eshbaal* (1 Ch 8[33]); cf also *Meribbaal* (1 Ch 9[40]) and *Jerubbaal* (Jg 8[35]). Fiscal dockets from the time of Jeroboam II. from the palace of Samaria show many such theophoric names compounded with *Baal* as well as *Yahweh*. The prophets, especially Hosea, who demanded that (2[16]) that Yahweh be no more called *Ba'alî* ('my Baal'), but *'Îshî* ('my husband') inveigh against this materialistic nature-cult and the licentious rites by which it was practised, and, though Hezekiah and Josiah suppressed it (2 K 18[4] 23), it is mentioned as the cult of Tammuz, the dying and rising vegetation-deity, in the early days of the Exile and in Zec 12[11] in a passage probably from the 2nd cent. B.C.

The final triumph of orthodoxy is indicated in the OT by the substitution of *bōsheth* ('shame') for *Baal* in proper names, not only when it denoted the Canaanite deity (Hos 9[19], Jer 3[24] 11[13]), but also in some of the above names, where it had really referred to Yahweh.

J. Gr.

BAAL.—1. A Reubenite, 1 Ch 5[5]. **2.** A Gibeonite, related to Saul, 1 Ch 8[30] 9[36]. **3.** A place mentioned in 1 Ch 4[33]; see BAALATH-BEER.

BAALAH.—1. A city on the border of Judah, Jos 15[9f], 1 Ch 13[6]; identical with **Kiriath-jearim** (q.v.). **2.** A city in the Negeb, assigned to Judah, Jos 15[29]; identical with **Balah** (q.v.) and **Bilhah** (q.v.).

BAALAH, MOUNT.—A site between Ekron and Jabneel, Jos 15[11]; its location is unknown.

BAALATH.—1. A town of Dan, Jos 19[44]. **2.** An unknown town mentioned in 1 K 9[18], 2 Ch 8[6].

BAALATH-BEER.—A city of Simeon in the Negeb, Jos 19[8]; called **Baal** in 1 Ch 4[33].

BAAL-BERITH ('lord of the covenant').—The god of Shechem, where he had a temple, Jg 8[33] 9[4]; called also **El-berith**, 9[46] (AV 'the god Berith'). The 'covenant' may be that amongst the Canaanite peoples or that between Shechemites and Israelites (cf Gn 34); or the title may be parallel to **Zeus Horkios**, the god who presides over covenants.

BAALE, 2 S 6[2] (AV).—See BAALE-JUDAH.

BAALE-JUDAH.—A place mentioned in 2 S 6[2] (AV **Baale of Judah**); probably to be identified with **Baalah, 1** (q.v.) and **Kiriath-jearim** (q.v.).

BAAL-GAD (? 'lord of fortune').—A place under Hermon, in the valley of the Lebanon, referred to only as the northern limit of the country conquered by Joshua, Jos 11[17] 12[7] 13[5]. Its location is uncertain, possibly modern *Ḥāṣbeiyah*.

BAAL-HAMON.—The site of Solomon's vineyard, Ca 8[11]; its location is unknown.

BAAL-HANAN ('Baal is gracious').—**1.** A King of Edom, Gn 36[38f], 1 Ch 1[49f]. **2.** A Gederite of the time of David, 1 Ch 27[28].

BAAL-HAZOR ('lord of a court').—A place where Absalom's sheep shearers were when Amnon was killed, 2 S 13[23]; probably modern *Jebel el-'Aṣûr*, a mountain 4960 feet above the sea NE. of *Beitîn* (Bethel).

BAAL-HERMON.—A place on the slopes of Mount Hermon (q.v.), Jg 3[3]; it marked the border of the territory of Manasseh in Transjordan, 1 Ch 5[23]; its exact site is unknown.

BAALIS.—King of Ammon in the time of Gedaliah, Jer 40[14].

BAAL-MEON.—A city of Moab assigned to Reuben, Nu 32[38]; mentioned also 1 Ch 5[8], Ezk 25[9]; it is called **Beth-baal-meon** in Jos 13[17], and **Beth-meon** in Jer 48[23], while in Nu 32[3] it is called **Beon.** The names Baal-meon and Beth-baal-meon are found on the Moabite Stone

(see MOAB). It is identified with modern *Ma'în*, about 5 mile SW. of Medeba.

BAAL-PEOR ('Baal of Peor').—The local deity of Mount Peor, Dt 4[3], Nu 25[3, 5], Ps 106[28]. In Dt 4[3], Hos 9[10] it appears to be the name of a place, perhaps to be identified with **Beth-peor** (q.v.).

BAAL-PERAZIM.—A place near Jerusalem where David defeated the Philistines, 2 S 5[20], 1 Ch 14[11] (cf 'Mt. Perazim,' Is 28[21]); perhaps modern *Râs en-Nâdir* or *Sheikh Bedr*.

BAALSAMUS.—One of those who stood on the right hand of Ezra at the reading of the Law, 1 Es 9[43] (AV **Balasamus**); called **Maaseiah** in Neh 8[4]; see MAASEIAH, 6.

BAAL-SHALISHA, 2 K 4[42] (AV).—See BAAL-SHALISHAH.

BAAL-SHALISHAH.—A place mentioned in 2 K 4[42] (AV **Baal-shalisha**); probably modern *Kefr Thilth*.

BAAL-TAMAR.—An unidentified site near Bethel and Gibeah, Jg 20[33].

BAALZEBUB, BEELZEBUL.—Baalzebub appears as the name of a Philistine god worshipped at Ekron (2 K 1[2, 3, 6, 16]) while Beelzebul (so RSV; AV and RV Beelzebub) is the name applied to the prince of demons in Mt 10[25] 12[24], Mk 3[22], Lk 11[15, 18, 19]. The older commentators took the form Baalzebub, 'lord of flies,' as original, indicating a deity with the power to send or avert plagues of flies. This was supposed to have been changed by the Jews to the offensive form, Beelzebul, 'lord of filth.' But if such a view were correct it would be hard to understand why a minor local deity should become such an important figure in later demonology. The finding of the form 'Baalzebul' in the Râs Shamra tablets favours a different and more plausible explanation. According to this, Baalzebul, 'lord of the mansion' or 'lord of the lofty dwelling' was the original form (preserved in the NT) and would refer not to a local deity but to the great Baal of Syria who would have a local shrine at Ekron. The form Baalzebub is then to be explained as a perversion, made either to ridicule the god or because to a pious Jew the title 'lord of the lofty dwelling' would seem to be appropriate only to Yahweh. This line of explanation derives some support from the title 'master of the house' applied to Beelzebul in Mt 10[25]. Other explanations suggest that the name means 'the enemy' or have sought to represent Zebul as a place-name, but without much plausibility. If we accept the most plausible among these explanations, we can understand why Beelzebul came to be regarded as a major demonic power, and his name became interchangeable with that of Satan.

J. Macq.

BAAL-ZEPHON.—Apparently a shrine of 'Baal of the north,' near the spot where the Israelites crossed the Red Sea, Ex 14[2, 9], Nu 33[7]; its site is unknown. The corresponding goddess 'Baalit of the north' is named along with the god of Kesem (Goshen) in an Egyptian papyrus of the New Kingdom, as worshipped at Memphis. F. Ll. G.

BAANA.—1. 2. Two of Solomon's commissariat officers, 1 K 4[12, 16]. **3.** Father of Zadok, one of those who rebuilt the wall, Neh 3[4]. **4.** One of those who returned with Zerubbabel, 1 Es 5[8] (AV, RV), possibly identical with the preceding, and with **Baanah, 3.**

BAANAH.—1. One of the murderers of Ishbosheth, 2 S 4[2, 5, 6, 9]. **2.** A Netophathite, 2 S 23[29], 1 Ch 11[30]. **3.** One of those who returned with Zerubbabel, Ezr 2[2], Neh 7[7], 1 Es 5[8] (AV, RV **Baana**). **4.** One of those who sealed the covenant, Neh 10[27].

BAANI, 1 Es 9[34] (RV).—See BANI, **9.**

BAANIAS, 1 Es 9[26] (AV).—See BENAIAH, **3.**

BAARA.—Wife of a Benjamite, 1 Ch 8[8].

BAASEIAH.—A Kohathite, 1 Ch 6[40]; perhaps a textual error for **Maaseiah** (q.v.).

BAASHA.—An officer of the army under Nadab, son of Jeroboam I., who assassinated the king while the army was besieging Gibbethon, and became the third king of Israel. Thereafter he slew the whole house of Jeroboam (1 K 15[27–29]). He captured and fortified Ramah, and this led Asa to form an alliance with Benhadad, of Damascus, and this in turn led to Baasha's withdrawal to Tirzah (1 K 15[17–21]). Although Baasha died in his bed after a reign of twenty-four years, his dynasty was extinguished two years after his death, as foretold by the prophet Jehu (1 K 16[1–6]).

BABBLER.—Ac 17[18] 'What will (RSV 'would') this babbler say?' The Gr. word translated 'babbler' means literally 'seed-picker,'' applied first to such birds as the rook, and then, symbolically, to men who make their living by picking up scraps in the market-place (from Demosthenes to Eustathius). Goodspeed 'rag-picker'; Moffatt 'the fellow . . . with his scraps of learning.' F. W. G.

BABE.—See CHILD.

BABEL, TOWER OF.—See TONGUES, CONFUSION OF.

BABI, 1 Es 8[37] (AV, RV).—See BEBAI.

BABYLON.—*Bâbel* is the Hebrew form of the native name *Bâb-ilim*, 'Gate of God,' a popular etymology of a pre-Semitic name. It was also *Tin-tir*, 'Grove of life.' According to the Hebrew tradition (Gn 10[10]), it was as old as Erech, Akkad, and Calneh. Excavations show that there was a prehistoric settlement here. The first historical reference to Babylon occurs in a year formula of the Agade dynasty, *c* 2200 B.C. It lay on the E. bank of the Euphrates, part of its site being now occupied by Hillah, about 50 miles S. of Baghdad. The ruins extend for 5 miles N. to S. Bâbil, the N. ruin, covers 120,000 sq. ft. and is still 90 ft. high. It covers the remains of the celebrated Esagila temple. The shape and form of Babylon as revealed by fourteen years' excavation is that of Nabopolassar and Nebuchadrezzar. The description given by Herodotus and Ctesias is that of Persian times. The Kasr contains the ruins of Nebuchadrezzar's palace, along whose E. side ran the sacred procession street, decorated with enamelled tiles representing the dragon and the bull, to the Ishtar-gate at the SE. corner. The whole was enclosed within an irregular triangle, formed by two lines of ramparts and the river, an area of about 8 sq. miles. The city crossed the river to the W., where are remains of a palace of Neriglissar. In later times it became coterminous with many other large cities, and Herodotus ascribes to it a circuit of 55 miles.

From the very earliest times the kings and rulers of Babylonia worked at the building of its temples, palaces, walls, bridges, quays, etc. Hammurabi first raised it to be the capital of all Babylonia. It was sacked by Sennacherib in 689 B.C., the chief palaces, temples, and city walls levelled with the ground, and the waters of the Euphrates turned over it. Esarhaddon began to rebuild it, and it stood another long siege under his son, Ashurbanipal. Nabopolassar began its restoration; Nebuchadrezzar raised it to its height of glory. Cyrus took it without resistance, and held his court there. Darius Hystaspis besieged, took it, and destroyed its walls. Xerxes plundered it. Alexander the Great planned to restore it. Antiochus Soter actually began the restoration of its great temple. The foundation of Seleucia robbed it of its population, but the temple services continued to 29 B.C., at least. See, further, ASSYRIA AND BABYLONIA. C. H. W. J.—T. F.

BABYLON (in NT).—Babylon was apparently used by the early Church as a symbol for Rome. **1.** In Rev (14[8] 16[19] 17[5] 18[2, 10, 21]) its destruction is foretold, because of its sins, and particularly because of its persecution of the Christians. Such identification is, however, somewhat uncertain, and rests ultimately on the improbability that the word in the connexion in which it appears can refer to the city of Mesopotamia (the word is so used in Mt 1[11] 12[17], Ac 7[43]). This probability is supported by the fact that Babylon is called 'mystery' in Rev 17[5], is

said to be seated on seven mountains (v.9), and to be a centre of commerce and authority (18$^{3-19}$ 17. 14^{8}). Rome is apparently called Babylon in *Sib. Or.* v. 143, 158; 2 Es; Apoc. Baruch.

This identification of Babylon in Revelation with Rome dates at least from the time of Jerome. The attempt has been made to identify it with Jerusalem; but this conflicts with Rev 11^{8}. The fact that Revelation utilized Jewish apocalyptic material makes it imperative that the term symbolize a power which stood related both to Christians and Jews, in a way parallel with the relation of Babylon to the ancient Hebrew nation.

2. The reference to Babylon in 1 P 5^{13} has had three interpretations: (*a*) Babylon in Egypt, mentioned by Strabo and Epiphanius; (*b*) Babylon on the Euphrates; and (*c*) Rome. In view of the symbolic use of the word 'Babylon,' as mentioned above, the last seems the most probable. Eusebius (*HE* ii. 15) so interprets the reference, and, in view of the ancient and persistent tradition, partly literary, partly archaeological, there is nothing improbable in St. Peter's having been in Rome. This probability is strengthened by the reference to the persecution to which Christians were being subjected. Assyrian Babylon in the second half of the 1st cent. was in decay. Even if pseudonymous, the presumed authorship of 1 P would be most appropriate if the epistle was written from Rome, where persecution took place under Nero and Domitian. S. M.—F. C. G.

BABYLONISH GARMENT, Jos 7^{21} (AV).—See SHINAR, MANTLE FROM.

BABYLONISH MANTLE, Jos 7^{21} (RV).—See SHINAR, MANTLE FROM.

BACA, VALLEY OF.—An allegorical place-name, found only in Ps 84^{6} (AV, RSV), where RV renders 'Valley of Weeping.' Most probably it is no more an actual locality than is the 'Valley of the Shadow of Death' in Ps 23^{4}.

BACCHIDES.—Governor of Mesopotamia under Demetrius Soter; sent to establish Alcimus (q.v.) in the priesthood; defeated and killed Judas the Maccabee, and at a later period besieged Jonathan in the fortress of Bethbasi; was finally compelled to entertain proposals for peace (1 Mac 7$^{8-20}$ 9$^{1-72}$ 10^{12}; Jos. *Ant.* xii. x. 1 [389]–xiii. i. 6 [34]).

BACCHURUS, 1 Es 9^{24} (AV, RV).—See ZACCUR, **7.**

BACCHUS.—See DIONYSUS.

BACENOR.—An officer of Judas Maccabaeus (2 Mac 12^{35}).

BADGER or **ROCK BADGER** (*shāphān*).—The *Hydrax syriacus*, a small rabbit-like animal, with short ears and a mere stump of a tail. It has stiff greyish-brown hair, with softer, lighter-coloured hair on the belly; it is nocturnal in its habits, and lives in holes in the rocks. Rock badgers are very plentiful along the rocky shores of the Dead Sea, and also in the Lebanon, especially above Sidon; they can, however, be seen as a rule only between sunset and sunrise. They are gregarious in their habits, and disappear into their rocky fastnesses (Ps 104^{18}, Pr 30^{26} where RSV has 'badgers' and AV, RV 'conies') with the greatest rapidity on the slightest approach of danger. The Bedouin, when hunting them, lie hidden for many hours during the night close to their holes. They feed on grass and sweet-smelling herbs, and their flesh is esteemed for eating by the Bedouin; they do not actually 'chew the cud' (Lv 11^{5}, Dt 14^{7} where RSV has 'rock badger' and AV, RV '**coney**'), though they work their jaws in a way that resembles a ruminant. E. W. G. M.

BADGERS' SKINS.—This rendering of AV in Ex 25^{5} 26^{14} etc. (RV 'sealskins,' RVm 'porpoise-skins,' RSV 'goatskins') and Ezk 16^{10} (RV 'sealskin,' RVm 'porpoise-skin,' RSV 'leather') is a mistranslation. Badgers' skins are not suitable for the covering of the Tabernacle or for making sandals. See PORPOISE.

BAEAN.—The name of an unknown tribe destroyed by Judas Maccabaeus (1 Mac 5^{4}).

BAG, PURSE, WALLET.—Several kinds of bags, etc., may be distinguished. (*a*) The shepherd's and traveller's wallet for carrying one or more days' provisions. Like most of the other OT bags, it was made of skin, generally undressed, and was slung across the shoulder. This is the scrip of Mt 10^{10} and parallels (RV 'wallet'; RSV 'bag'). The former is retained by RV (but RSV 'wallet') to render a unique word, which had to be explained even to Hebrew readers by the gloss 'the shepherd's bag' (1 S 17^{40}). (*b*) A more finished article, the leather satchel which served as a **purse** (Lk 10^{4} 12^{33} AV here 'bag'). For illust. see Rich, *Dict. of Antiq.* 217. The purse of Mt 10^{9}, Mk 6^{8}, however, was merely the folds of the girdle (RSV 'belt'). (*c*) The merchant's bag, in which he kept his stone weights (Dt 25^{13}), also served as a purse (Pr 1^{14}). (*d*) The favourite bag of money and valuables—hence the beautiful figure 1 S 25^{29}, where 'the bundle of life'=life's jewel-case—was one which could be tied with a string (2 K 12^{10}, Pr 7^{20}, also Gn 42^{35} EV 'bundle'). If required, a seal could be put on the knot (Job 14^{17}). (*e*) Another word is used both for a large bag, capable of holding a talent of silver (2 K 5^{23}), and for the dainty lady's **satchel** (Is 3^{22} RV; RSV 'handbags'; AV **crisping pins**). (*f*) The 'bag' which Judas carried (Jn 12^{6} 13^{29}) was rather a small box (RSV 'money box'), originally used for holding the mouth-pieces of wind-instruments. See also VESSEL.

A. R. S. K.—F. W. G.

BAGO, 1 Es 8^{40} (AV, RV).—See BIGVAI, **1.**

BAGOAS.—A eunuch in the service of Holofernes (Jth 12$^{11, 13, 15}$ 13^{3} 14^{14}).

BAGOI, 1 Es 5^{14} (AV, RV).—See BIGVAI, **1.**

BAGPIPE.—See MUSIC and DULCIMER.

BAHARUM.—An unknown place found only in the gentilic *Baharumite* in 1 Ch 11^{33} (AV, RV; RSV 'of **Baharum**'); 2 S 23^{31} has **Barhumite** (AV, RV). In both places we should probably read '**of Bahurim**' (so RSV in 2 S 23^{31}). See BAHURIM.

BAHARUMITE, 1 Ch 11^{33} (AV, RV).—See BAHURIM.

BAHURIM.—The town where Paltiel, son of Laish, was ordered to relinquish Michal, 2 S 3^{16}; where Shimei lived, who cursed and stoned David in his flight, 2 S 16^{5}, 1 K 2^{8}; where Ahimaaz and Jonathan hid in the well from Absalom, 2 S 17^{18f}; and the home of Azmaveth, one of David's mighty men, 1 Ch 11^{33} (AV, RV **Baharumite**; RSV 'of Baharum'), 2 S 23^{31}, where **Barhumite** is incorrectly written (so AV, RV; RSV 'of Bahurim') for **Bahurimite.** It was in the tribe of Benjamin between Jerusalem and the Jordan River, according to the reports of David's flight and that of Ahimaaz and Jonathan. *Râs eṭ-Ṭmim,* NE. of the Mount of Olives, about one mile from Jerusalem and near the ancient road from Jerusalem to Jericho, best fits the topographical allusions in the references cited above; Israelite, Hellenistic, and Roman sherds have been found there (cf E. E. Voigt, 'Bahurim,' *AASOR,* v, 1925, 67–76). R. A. S. M.—W. L. R.

BAITERUS.—The head of a family which returned with Zerubbabel, 1 Es 5^{17} (AV **Meterus**).

BAJITH, Is 15^{2} (AV).—See BAYITH.

BAKBAKKAR.—A Levite, 1 Ch 9^{15}.

BAKBUK.—The ancestor of certain Nethinim (q.v.), who returned with Zerubbabel, Ezr 2^{51}, Neh 7^{53}, 1 Es 5^{31} (AV, RV, **Acub**).

BAKBUKIAH.—1. A Levite, Neh 11^{17}. **2.** A porter, Neh 12^{25}.

BAKEMEATS, BAKER.—See BREAD.

BAKING.—See BREAD.

BAKING-PAN.—Lv 2^{5} 6^{21} 7^{9} (RV); see HOUSE, **9.**

BALAAM is the subject of a remarkable and intricate narrative in Nu 22–24, connected with the arrival of Israel on the plains of Moab. He was a soothsayer of Pethor on the Euphrates, called by Balak king of Moab to curse the invaders. At first God refused him permission to go, but, when Balak sent a larger and more

honourable embassy, permission to go was granted to Balaam but only on condition that he spoke as God directed him. As Balaam journeyed to Moab on his ass, the angel of the Lord thrice stood in the way but was visible only to the ass which refused to proceed. Three times Balaam beat his animal, which at last spoke and reproached its master, and then Balaam's eyes were opened and he saw the angel. In the face of the Divine disapproval Balaam offered to go back, but he was allowed to proceed on condition that he spoke as God directed him. Balak met Balaam at the frontier and took him first to Bamoth-baal at Kiriath-huzoth, then to the field of Zophim, to the top of Pisgah, and finally to the top of Peor. Though the three successive sites are regarded by Balak as increasingly favourable for his purpose of obtaining a curse on Israel, Balaam each time pronounces a eulogy in the form of a poem expressing thoughts favourable to Israel. In anger Balak dismisses the soothsayer, who before he goes recites a poem or poems on the destruction of Moab and Edom at the hands of a future ruler of Israel :

> a star shall come forth out of Jacob,
> and a sceptre shall rise out of Israel ;
> it shall crush the forehead of Moab,
> and break down all the sons of Sheth.
> Edom shall be dispossessed. (24^{17f})

followed by three short pieces on the fate of Amalek, the Kenites, Asshur, and Eber.

Those chapters are usually regarded as compiled from the sources J and E. The composite nature of the narrative is deduced from the doublets (cf 22^{2a} and v.^{4b}, 22^{3a} and v.^{3b}) and the divergent traditions about Balaam's home (cf 22^{5} [MT] with v.^{5} [MSS, Sam., Pesh., Vulg.]), but especially from the inconsistency between 22$^{22-35}$ and the surrounding verses. In 22$^{22-34}$ (v.^{35} is an editorial link) Balaam seems to have set out without the Divine approval and he is accompanied by two servants ; in vv.^{20f} Balaam has God's permission for his journey and he is escorted by the embassy sent by Balak. J is thought to be the source of 22$^{22-34}$ (cf the episode of the speaking serpent in Gn 3, also from J ; for another example of an ass speaking, see M. R. James, *Apocryphal New Testament*, p. 383) and most of 24, with perhaps other odd verses ; the rest is from E.

But the poems have also been treated as separate compositions, distinct from the prose framework. Thus while von Gall argues for a post-Exilic date for the poems and regards them as Messianic, G. B. Gray favours a theory of their antiquity because of ' the feeling of national confidence, success, prosperity, and contentment which pervades them, and in virtue of which they are most closely connected with the ancient poems known as ' the blessing of Jacob ' (Gn 49) and ' the blessing of Moses ' (Dt 33). W. F. Albright has argued that the composition of the poems should be dated in the 13th or 12th cent. B.C. and their original writing down in or near the 10th cent. B.C. (*JBL*, lxiii. [1944], 207 ff).

The first poem 23$^{7-10}$ is independent of its context for it is an intelligible unit and it is inconsistent with its framework, which regards the poem as a blessing of Israel whereas it is not. The contents suggest that it is a poetic version of the Balaam story (cf Jg 5 with Jg 4), and probably it is an ancient song from an alternative tradition.

The second poem 23$^{18-24}$ may contain in vv. $^{22, 24}$ Balaam's blessing in an early form ; the remainder of the poem represents a theocratic viewpoint and so is later, though not necessarily post-Exilic.

Similarly, it can be argued that the third, 24$^{3-9}$, though the text has suffered, may be pre-Exilic and even as early as the time of the United Monarchy. The fourth, a composite piece, is outside the plan of the story and must be a later incorporation, less certainly early. If v.^{17} is Messianic as the later Jews, the early Church (cf Rev 22^{16}), and some recent scholars hold, then the poem may be Exilic or later ; but the argument is less strong if vv.^{17f} refer to David. It may be noted that Bar Koseba, the Jewish leader in the Second Revolt against Rome (A.D. 132–135) was called Bar Kochba ' Son of the star ' (24^{17}). The Qumrân Community makes use of this verse both in the *War of the Sons of Light and Sons of Darkness* and in the *Zadokite Document*.

In Nu 31$^{8, 16}$ (cf Jos 13^{22}), assigned to the Priestly document (P), there is recorded Balaam's death at the hands of the Israelites, because he led Israel into sin. Cf Rev 2^{14} : ' the teaching of Balaam, who taught Balak to put a stumbling block before the sons of Israel, that they might eat food sacrificed to idols and practice immorality.' Jd^{11} brackets Balaam with Cain and Korah as examples of evil men, and the epithet ' wicked ' is regularly applied to him (cf *Aboth* v. 19). Because Balaam, like Samuel and Ahijah, received a fee (Dt 23^{4}), he has been accused of avarice ; cf 2 P 2^{15} : ' they have followed the way of Balaam, the son of Beor, who loved gain from wrongdoing.' Cf also Philo, *De Vita Mosis*, i. 48 ; Jos. *Ant.* IV. vi. 5 f (118, 126). But there is nothing in the story in Numbers to support this view. That Balak sent a second embassy with the message : ' Whatever you say to me I will do ' (22^{17}) reveals not Balaam's greed but the king's need. And though the P source links Balaam's death (31^{16}) with the events of 25$^{1-5}$, the earlier traditions, properly understood, know nothing against Balaam's character. W. D. McH.

BALAC, Rev 2^{14} (AV) = **Balak** (q.v.).

BALADAN.—See MERODACH-BALADAN.

BALAH.—A city of Simeon in the Negeb, Jos 19^{3} ; called **Baalah** in Jos 15^{29}, where it is assigned to Judah (see BAALAH, 2) and **Bilhah** in 1 Ch 4^{29}.

BALAK.—The king of Moab who hired Balaam, Nu 22–24 ; mentioned also in Jos 24^{9}, Jg 11^{25}, Mic 6^{5}, Rev 2^{14}. See BALAAM.

BALAMON.—A town near Dothaim (Jth 8^{3}).

BALANCE.—The Hebrew balances probably differed but little from those in use in Egypt (see illustration in *BRL*, p. 178). The main parts were the **beam** with its support, and the **scales** which were hung by cords from the ends of the equal arms of the beam. The ' pair of scales ' is used in OT by a figure for the balance as a whole ; only once is the beam so used (Is 46^{6}). The **weights** were originally of stone and are always so termed. The moral necessity of a just balance and true weights and the iniquity of false ones are frequently emphasized by the prophets, moral teachers, and legislators of Israel ; see Am 8^{5}, Mic 6^{11}, Pr 11^{1} 16^{11} (' a just balance and scales are the LORD's ') 20^{23}, Lv 19^{36}, Dt 25^{13ff}. A. R. S. K.

BALASAMUS, 1 Es 9^{43} (AV).—See BAALSAMUS.

BALBAIM (Jth 7^{3}).—See BELMAIN.

BALD LOCUST (Lv 11^{22}).—See LOCUST.

BALDNESS.—See CUTTINGS IN THE FLESH, HAIR.

BALLAD.—See PARABLE.

BALM.—Nothing is known for certain about the nature of this substance (Heb. *ṣ^{o}rî*), but it is usually supposed to be some kind of aromatic gum or resin. It was a product of Gilead (Gn 37^{25}, Jer 8^{22} 46^{11}), an important article of commerce (Gn 37^{25}, Ezk 27^{17}), suitable for a gift (Gn 43^{11}), and celebrated for its healing properties (Jer 8^{22} 46^{11} 51^{8}). There is now no plant in Gilead which yields any characteristic product of this nature. The so-called ' balm of Gilead ' of commerce and the substance sold by the monks of Jericho to-day (the latter a product of the *zakkûm* tree) are neither of them serious claimants to be the article referred to in the Bible. Many consider that *ṣ^{o}rî* was mastic (so RVm in Gn 37^{25}), a gum which exudes from the bark of the *Pistacia lentiscus* and much used by the Arabs for flavouring coffee, sweets, etc., and as a chewing gum. This has been credited with medicinal properties. See also SPICE.

E. W. G. M.—H. H. R.

BALNUUS, 1 Es 9[31] (AV, RV).—See BELNUUS.

BALSAM.—See SPICE.

BALSAM TREES.—Heb. *b^{e}khā'îm*, 2 S 5[23f], 1 Ch 14[14f] (AV, RV **mulberry trees**). These trees have on philological grounds been supposed to be a variety of balsam (so RSV), and on grounds of appropriateness to the story (2 S 5[23f]) to be poplars, whose leaves readily quiver with the slightest breath of air. Their identity is, however, quite uncertain. Mulberries they cannot be; for though to-day plentiful in Palestine, and still more so in the Lebanon, these trees were introduced into the land later than OT times. See SYCAMINE.

E. W. G. M.

BALTASAR.—The Greek form of *Belteshazzar* and of *Belshazzar* (qq.v.). In Bar 1[11f] (RV; AV **Balthasar**) it stands for Belshazzar (RSV).

BALTHASAR.—See BALTASAR.

BAMAH.—The ordinary word for **high place** (q.v.), retained only in Ezk 20[29] in its Hebrew form (as the word *manna* in the parallel case in Ex 16[15]) on account of the word-play: 'What (*māh*) is the *bāmāh* to which you go (*bā*)?'

BAMOTH, BAMOTH-BAAL.—Bamoth is mentioned in Nu 21[19f] as a station in the journey of Israel from the Arnon to the Jordan. It is probably identical with Bamoth-baal of Nu 22[41] (RVm, RSV; AV, RV 'the high places of Baal'), to which Balaam was led by Balak. Bamoth-baal is listed as a Reubenite city in Jos 13[17], and is perhaps mentioned on the Moabite Stone (see MOAB) as Beth-bamoth. It is possibly to be identified with *Khirbet Quweiqiyeh*.

BAN.—The ban is an institution from remote antiquity, which still survives in the Jewish and Christian Churches. On its origin and early history cf C. H. W. Brekelmans, *De Herem in het OT*, 1959. The original idea, common to all the Semitic languages, is that of withdrawing something from common use and setting it apart for the exclusive use of a deity. In Hebrew the verbal root acquired the more specialized meaning of devoting to Y″ His enemies and their belongings by means of fire and sword, and is usually rendered 'utterly destroy' (RVm adds 'Heb. *devote*'), while the cognate noun (*ḥērem*, Gr. *anathema*) is '**accursed** (AV) *or* **devoted** (RV, RSV) **thing.**' In this brief treatment of a large subject we propose to distinguish between the war ban, the justice ban, and the private ban.

1. The *war ban*, clearly the oldest form of the institution, shows various degrees of severity. The war ban of the first degree, as it may be termed, involved the destruction not only of every man, woman, and child of the enemy, but also of their entire property of every description (see Dt 13[16]). The treatment of the Amalekites in 1 S 15 is a familiar example. The case of Achan, after the ban and capture of Jericho, affords a striking illustration of the early ideas associated with the ban. Every 'devoted thing,' as henceforth the inviolate property of Y″, and therefore taboo, became infected with the deadly contagion of holiness (note Lv 27[28] 'most holy,' literally 'holy of holies'). Hence by retaining part of the 'devoted thing' (*ḥērem*) in his tent Achan infected the whole 'camp of Israel,' with disastrous results (Jos 6[18] 7[11f], cf Dt 7[26]). More frequently we meet with a relaxed form of the war ban, which may be called the ban of the second degree. In this case only the men, women, and children of the doomed city were devoted, while the cattle and the rest of the spoil became the property of the victors (Dt 2[34f] 3[6f] 7[2], Jos 11[14]). A still further relaxation, a ban of the third degree, is contemplated by the law of Dt 20[10ff], by which only the males are put to the ban, the women and children being spared as the perquisites of the besiegers. On the other hand, only virgins were to be spared in Nu 31[17f] and Jg 21[11ff], for special reasons in the latter case.

2. The *justice ban* differs from the other in being applicable only to members of the theocratic community. It appears in the oldest legislation as the punishment of the apostate Israelite (Ex 22[20]), and is extended in the Deuteronomic code to the idolatrous city (Dt 13[12ff]). Here only the ban of the first degree was admissible. An important modification of the judicial ban is first met with in Ezr 10[8], where recalcitrant members of the community, instead of being put to death, are excommunicated, and only their 'substance forfeited' (RVm 'devoted') to the Temple treasury. This modified *ḥērem* became the starting-point of a long development. For these later Jewish and Christian bans see EXCOMMUNICATION.

3. The attenuated form of ban found in the late passage Lv 27[28] may be termed the *private ban*. The cases contemplated—'man or beast or field'—are evidently those of unusually solemn and inalienable dedications by private persons for religious purposes (cf Nu 18[14], Ezk 44[27], and the NT 'corban'), as opposed to the redeemable dedications of the preceding verses, the latter are holy while the former are 'most holy.' The following verse, on the contrary, must refer to the justice ban.

The ban was an institution of earlier date than the Hebrew conquest, and was practised by the Moabites in its most rigorous form (see Mesha's inscription, lines 11–17), perhaps also by the Ammonites (2 Ch 29[23]). Instances of similar practices among many half-civilized races are noted by the anthropologists. The original motive of the ban is probably reflected in Nu 21[2f], where it is represented as the return made to Y″ for help against the enemy vouchsafed in terms of a preceding vow (cf *devotio* from *devoveo*). This has to be interpreted in the light of the primitive solidarity between a god and his clan. Even in Israel the wars of the Hebrews were the 'wars of Y″' (Nu 21[14]). 'The religious element is found in the complete renunciation of any profit from the victory, and this renunciation is an expression of gratitude for the fact that the war-God has delivered the enemy, who is His enemy also, into the hands of the conqueror' (Kautzsch in Hastings' *DB* Ext. Vol. 619[b]). The ban was thus the outcome of religious zeal in an age when the moral sense was less advanced than the religious.

With regard to the wholesale application of the war ban in the Deuteronomic sections of Joshua, modern criticism has taught us to see in these the ideal generalizations of the exilic age. The Hebrews of the conquest were in truth the children of their age, but such a stupendous holocaust as is implied in such passages as Jos 11[11, 14] must not be placed to their credit. The legislation of Dt., it must further be remembered, is the outcome of several centuries' experience of Canaanite heathenism, the true character of which the soil of Palestine is only now revealing, and of its baneful influence on the religion of Y″. In this legislation the antique institution of the ban was retained as a means of protecting the community against a serious menace to its religious life. Nevertheless the enactment of Dt 13[12ff] remained a dead letter till the age of the Maccabees (1 Mac 5[5ff]).

BAN, 1 Es 5[37] (AV, RV).—See TOBIAH, **1.**

BANAIAS, 1 Es 9[35] (AV, RV).—See BENAIAH **3.**

BAND.—This spelling represents three distinct though ultimately related English words, used in AV and RSV for various Hebrew and Greek words: (1) that which binds, *e.g.* Lv 26[13] (RSV here 'bars,' elsewhere often 'bonds'), Dn 4[15, 23], Hos 11[4]; (2) a strip or ribbon, *e.g.* Ex 28[8] RSV, Ezk 13[18, 20] RSV, Ex 39[23] AV; (3) a group of men bound for a common purpose, more or less informally, as a band of prophets (1 S 10[5] RSV), raiders (2 K 24[2]), soldiers (Ezr 8[22]). In NT, AV uses 'band' for *speira*, the Greek equivalent of Roman *cohors* (for Roman Army in the NT period, see LEGION). Cohort is approximately 'regiment,' as a division of the legion or as an infantry unit of the auxiliary forces—which alone were regularly stationed in a minor province such as Judaea. The auxiliary cohorts were (nominally) 500 or 1000 strong, commanded by a prefect or military tribune, in Greek called *chiliarchos* ('commander of 1000'),

rendered in AV as 'captain' or 'chief captain,' in RSV as 'tribune' (Ac 21^{31}, etc.). RSV renders *speira* by 'band' when used informally, for the guards who accompanied Judas (Jn $18^{3,12}$), 'garrison' when it refers to the soldiers present at Jerusalem (Mt 27^{27}, Mk 15^{16}), 'cohort' when used strictly technically. The auxiliaries were normally recruited from provincials, but a few units of Roman citizens were raised in emergencies. The Italian Cohort of Ac 10^{1} would have been such, very likely the *cohors II Italica* known to have been in Syria in A.D. 88 (CIL xvi. 35). 'Augustan' ('Emperor's Own') was a title of honour, hence not distinctive. The Greek is *sebastē*, which has tempted scholars to connect the Augustan Cohort of Ac 27^{1} with Samaria (Gr. *Sebastē*, 'Augusta'), troops from which were stationed at Caesarea at this time. But this would call for a different Greek form, *sebastēnē* or *Sebastēnōn*. E. R. H.

BANI ('Y^{w} built').—**1.** A Gadite, one of David's heroes, 2 S 23^{36} (cf HAGRI). **2. 3. 4.** Levites, 1 Ch 6^{46}; Neh 3^{17}; Neh 8^{7} (in 1 Es 9^{48} called **Anniuth**; in AV Anus, RV Annus) 9^{4f} 10^{13} 11^{22} (called **Binnui** in Ezr 8^{33}, Neh 10^{9}). **5.** A Judahite, 1 Ch 9^{4}. **6.** Head of a family that returned with Zerubbabel, Ezr 2^{10}, 1 Es 5^{12}; called **Binnui** in Neh 7^{15}. **7.** One of those who sealed the covenant, Neh 10^{14}. **8.** One of those whose sons had married foreign wives, Ezr 10^{29}, 1 Es 9^{30} (AV, RV **Mani**). **9.** Another whose sons had married foreign wives, Ezr 10^{34}, 1 Es 9^{34} (AV **Maani**, RV **Baani**). See BINNUI. **10.** Ancestor of Shelomith, who returned with Ezra, 1 Es 8^{36} (AV **Banid**, RV **Banias**).

BANNAS.—A Levite who returned with Zerubbabel, 1 Es 5^{26} (AV **Banuas**).

BANNEAS, 1 Es 9^{26} (RV).—See BENAIAH, **3.**

BANNER, ENSIGN, STANDARD. — That the Hebrews, like the Egyptians, Assyrians, and other ancient nations, possessed military ensigns is a safe inference from Nu 2^{2}. Nothing certain, however, is known regarding them. In the above passage a distinction seems to be made between the 'ensigns' (literally 'signs'; cf Ps 74^{4} which, on the assumption of a Maccabaean date, may be alluded to in *DSH* (vi. 4 f) of the 'fathers' houses,' and the standards of the four great divisions of the Hebrew tribes in the wilderness, according to the artificial theory of the priestly writer.

Equally uncertain is the relation of these to the *nēs*, the wooden pole (Nu 21^{8f}, Is 30^{17}), set up on an eminence as a signal for the mustering of the troops. This word is of frequent occurrence both in the original sense and in the figurative sense of a rallying point, in the prophetic announcements of the future (Is 5^{26} 11^{10}, Jer 4^{21}, and often). A. R. S. K.—P. W.-M.

BANNUS, 1 Es 9^{34} (AV, RV).—See BINNUI.

BANQUET.—In OT the Hebrew or Aramaic expression rendered 'banquet' or 'banqueting house' means literally 'drinking' (*mishteh*) or 'house of drinking' (*bêth mishteh*), since wine was an important element of such feasts; so Ca 2^{4}, Dn 5^{10}. In the book of Esther the term is rendered by AV and RV 'feast' in Es $1^{3,5,9}$ 2^{18} 8^{17} and 'banquet' in $5^{4,5,6,8,12}$ 6^{14} $7^{1,2,7}$, while RSV reverses these save in 5^{12} 6^{14} 7^{1} 8^{17} where it agrees with them, $5^{4,5,8}$ where it has 'dinner,' and 4^{6} 7^{2} where it has 'drinking wine' for 'banquet of wine.' There are many passages where all EV render *mishteh* by 'feast.' In Job 41^{6} (Heb. 40^{30}) AV 'make a banquet' is a mistranslation of the verb *kārāh*, 'make trade of' (RV 'make traffic of,' RSV 'bargain over'). In Am 6^{7} *mirzah* is rendered 'banquet' in AV (but 'mourning' in Jer 16^{5}; so RV, RSV), where RV, RSV have 'revelry'; the word really indicates a cultic feast. In NT RSV has 'banquet' for Gr. *deipnon* in Mk 6^{21}, Lk $14^{16,17,24}$ where AV, RV have supper.' In 1 P 4^{3} AV 'banquetings' renders Gr. *potos*, literally 'drinkings' (RV, RSV 'carousing'), the normal LXX rendering of *mishteh*. See also MEALS. H. H. R.

BANUAS, 1 Es 5^{26} (AV).—See BANNAS.

BAPTISM.—This term, which designates a NT rite, is confined to the vocabulary of the NT. It does not occur in the LXX, neither is the verb with which it is connected ever used of an initiatory ceremony. This verb is derivative from one which means 'to dip' (Jn 13^{26}, Rev 19^{13}), but itself has a wider meaning, ='to wash' whether the whole or part of the body, whether by immersion or by the pouring of water (Mk 7^{4}, Lk 11^{38}). The substantive is used (*a*) of Jewish ceremonial washings (Mk 7^{4}, He 9^{10}); (*b*) in a metaphorical sense (Mk 10^{38}, Lk 12^{50}; cf 'plunged in calamity'); and (*c*) most commonly in the technical sense of a religious ceremony of initiation. Remarkable are also the synonyms for *baptisma*, viz. *sphragis*, *sēmeion*, *onoma*, *stigma*, *charagma*.

1. The earliest use of the word 'baptism' to describe a religious and not merely ceremonial observance is in connexion with the preaching of *John the Baptist*, and the title which is given to him is probably an indication of the novelty of his procedure (Mt 3^{1}, Mk 8^{28}, Lk 7^{20}; cf Mk $6^{14,24}$, where he is called 'the Baptizer'). He preached 'a baptism of repentance for the remission (RSV 'forgiveness') of sins' (Mk 1^{4}), *i.e.* the result of his preaching was to induce men to seek baptism as an outward sign and pledge of inward repentance on their part, and of their forgiveness on the part of God. Thus one may say: 'Baptism is related to repentance as the outward act in which the inward change finds expression.' And insofar as by immersion not only outward cleansing but also the purifying of man's heart is effected, we must define baptism with John as already a sacramental act, not merely as a symbol, although the effect is not an immediate one, but a promise for the future. The baptism of proselytes, practised by the Jewish community, must be viewed as mere ceremonial cleansing without sacramental meaning; it is found at the end of the 1st cent., but probably was older. The texts of Qumrân (the Dead Sea Scrolls) give further insight into ceremonial washings, also non-sacramental. As far as we know, John was the first to employ baptism as a means of religious purification promising forgiveness of sin and an initiation into the eschatological congregation of God. But, according to the gospel record, John himself recognized the incomplete and provisional character of the baptism administered by him: 'I have baptized you with water; but he will baptize you with the Holy Spirit' (Mk 1^{8}).

2. *Jesus* Himself accepted baptism at the hands of John (Mk 1^{9}). There is no reason to question this record; if non-historical it would have been omitted (*lectio difficilior*) because it involves difficulty with the early Christian belief that the divinity of Jesus was revealed already in his supernatural birth. That Jesus himself baptized is nowhere suggested in the Synoptic Gospels, and is expressly denied in the Fourth Gospel (Jn 4^{2}). Neither do we have reliable accounts of Jesus' disciples baptizing during his lifetime. On the other hand, one must acknowledge that immediately after the death and Resurrection of Jesus baptism was practised —appearing as if spontaneously—as the indispensable condition for membership in the Christian congregation. It seems to be the earliest Christian sacrament.

While the Lord's Supper was observed because it was traced back to the historical Jesus, whether as a Passover meal or not, and is explained by the account of Jesus' own words (Mk 14^{22-24} and parallels; 1 Co 11^{23-25}), baptism is never commanded in the NT as an institution ascribed to Jesus Himself. In order to prove Him its founder one generally refers to passages like Mk 16^{15f}, Jn 3^{5}, Mt 28^{19f}. Yet are these sayings

historically trustworthy? The Marcan verses belong to a section (Mk 16^{9-20}) regarded in textual and literary criticism as a later addition—it is not found in the manuscripts ℵ, B, or the Syriac and Armenian versions. The Johannine verse is a typical symbolic interpretation of an early Christian liturgical practice. The passage quoted as chief witness, Mt 28^{19f}, gives a word of the *risen* Lord, and combines the commandment of mission and of baptism, to be done 'in the name of the Father and of the Son and of the Holy Spirit.' It thus takes up an early Christian liturgical formula which was not used before the second half of the 1st cent. It is hardly possible to harmonize the universal aspect with the historical Jesus, and it is impossible to assume the trinitarian formula for the teaching in his life-time. One must conclude that Christian baptism has no anchorage in an institution by Jesus but presupposes His Crucifixion and Resurrection, *i.e.* the institution was by the risen Lord.

3. In order to rediscover *the earliest statements on Christian baptism* we must turn to *Paul* and concentrate on passages where the apostle cites common tradition: *e.g.* Ro 10^{9}, 1 Co 6^{11}; and also Ro 8^{29f}. In Ro 6^{3} and 1 Co 12^{13} Paul presupposes that all Christians, Jewish as well as Gentiles, are baptized. Over and again in his letters he refers to baptism as a constitutive act, and derives from this his ethical imperatives. Characteristic of this is Gal 5^{25}: 'If we live by the Spirit, let us also walk by the Spirit.' The deeper meaning is understood only when we recognize that 'the Spirit' here and elsewhere refers to baptism. One may paraphrase the words: Since we are baptized and have the Spirit, let us also walk as those who are moved and marked by the Spirit! Over against the teaching and practice of John the Baptist, this connexion of baptism with the gift of the Holy Spirit is a new feature. In 1 Co 6^{11} Paul, after picturing their sinful past, reminds the Christians of their newness of life: "But you were washed, you were sanctified, you were justified in the name of the Lord Jesus Christ and in the Spirit of our God.' The three verbs used here describe the sacramental purification, the remission of sins, and the new element in life: the eschatological seal given in the Spirit of God—for Paul the Spirit of God is identical with the Spirit of Christ (see the remarkable changes in Ro 8^{9-11}). Different from the post-apostolic and later Christian liturgical praxis, which is marked by the trinitarian formula of Mt 28^{19} (see *Did.* VII. i. 3; Just. *Apol.* LXI. 3, 11, 13) the primitive Church baptized 'in' or 'into the name of Jesus' (or 'Jesus Christ,' or 'the Lord Jesus; see 1 Co $1^{13, 15}$; Ac 8^{16} 19^{5}; *Did.* ix. 5). The calling of a name effected—according to primitive belief—the presence of the divine person (or demon). Thus the spoken formula, 'in the name of Jesus,' effected the presence of the risen Lord and gave the baptized into His possession and protection. In this context the verb 'to seal' or the noun 'the seal' is often used (2 Co 1^{22}; perhaps also Ro 4^{11}; cf Eph 1^{13} and Rev 7^{3ff}). In all these passages, which obviously set forth the earliest traditions, the connexion of baptism with Christ's person and work is inherent. On the ground of this practice Paul can say: 'For as many of you as were baptized into Christ have put on Christ' (Gal 3^{27}). Referring in these words to 'rebirth' with Christ's resurrection, Paul presupposes that 'all of us who have been baptized into Christ Jesus were baptized into his death' (Ro 6^{3}). The old 'Adam of our sinful past has died in baptism, and the 'new life' appeared when we 'put on Christ.' Thus baptism is no longer, as with John, only a cleansing from sins committed in the past, but is the act which sanctifies the present life and guarantees eschatological bliss.

4. The further development was not uniform, as we see in *Acts*. Here most of the Pauline elements are present but there is an inconsistency with regard to the liturgical performance. On the one hand baptism precedes the gift of the Holy Spirit, which is administered by a particular act, the laying on of hands (*e.g.* Ac 8^{14ff}); on the other hand baptism concludes God's work, the Spirit being already present with the believer in his very decision for faith in Christ (Ac 10^{44-48} 11^{15-18}). This inconsistency seems to reflect geographical as well as theological differences of the second half of the 1st century. It makes clear the danger that baptism might break up into two acts: (*a*) a sacramental rite of cleansing, effected by immersion and relating to the past, and (*b*) a sacramental imparting of the Holy Spirit, effected by the laying on of hands and relating to the present and the future life. If this took place, it would be possible to administer the two acts separately, at different times and by different persons.

5. *The external form of baptism* was *immersion* in flowing water, which is presupposed in Ac 8^{36}, He 10^{22} and expressly prescribed in *Did.* vii. 1–3. The passage in *Did.* permits—in emergency cases only—the head of the baptized to be sprinkled with water. It seems as if *a profession of faith in Christ* had to be made prior to baptism, at least at the end of 1st cent. The 'good confession in the presence of many witnesses' in 1 Ti 6^{12} obviously points to the baptismal profession of faith, and the phrase often occurring in the context with baptism, 'What prevents [namely the baptism]?' (Ac 8^{36} 10^{47} 11^{17}, Mt 3^{14}) still reminds us of the liturgical procedure (O. Cullmann).—As far as one can see, *the laying on of hands* is an early part of baptism, probably connected with the *acclamation of the name Jesus Christ*. It is probable that *a catechetical instruction* preceded baptism, where the ethical obligations, the demand of being and becoming 'holy' were taught, and special elements of the Holiness-code (Lv 17 ff) were included (Ph. Carrington). *The administration of baptism* was in general left to the local officers of the congregation and did not require a special charisma or quality; it was not a duty of the Apostle, and Paul could write 'for Christ did not send me to baptize but to preach the gospel' (1 Co 1^{17}). In the earliest stage of Christianity only *adults* were baptized. As to the controversial question of *infant-baptism* the NT gives no explicit answer; it must be inferred from the theological meaning of baptism (cf § 9).

6. *The theological meaning* of baptism is complex and contains various elements, sometimes separate, sometimes intermingling. One aspect is common in all NT writings, namely that baptism is neither a magic tool, nor a symbolic action, but *a sacrament*; *i.e.* divine forces work with man through a this-worldly action; certain presupposed special rites are performed in orderly fashion, and the requirements set before the participant are fulfilled (repentance, true faith, personal decision for Jesus as Lord). When Paul refers (1 Co 15^{29}) to the practice of Gnostic Christians in Corinth, allowing themselves to be baptised on behalf of the dead, it is clear that he himself acknowledges the sacramental meaning of baptism but rejects the magical misuse as found in the Greek mysteries.

The *various elements* may be summarized as follows: (*a*) *The remission of sins* (Ac 2^{38}, 1 Co 6^{11}; cf He 10^{22}, 1 P 3^{21}, 2 P 1^{9} and Hermas *Mand.* IV. iii. 1, Just. *Apol.* lxi. 10), referring of course to sins of the past. (*b*) *The calling of the name* of the Lord is an element concurrent with immersion. Its meaning is twofold, namely (1) to 'seal' the baptized in Christ's possession and protection (see § 7) and (2) apotropaic, to ban evil spirits (Co 1^{13}, cf Barn 16^{7}). (*c*) *The gift of the Holy Spirit* as an effect of baptism is presupposed by Paul (1 Co 12^{13}, 2 Co 1^{22}; also Eph 1^{13}, 4^{30}) and is an early feature of Christian baptism distinguishing it from pre-Christian rites and from the practice of John the Baptist (Ac 19^{1-8}; cf Mk 1^{8}). In Jn 3^{5} we read, 'Unless one is born of water and the Spirit, he cannot enter the kingdom of God'; the same is said in Barn 16^{9-11} (cf Hermas, *Simil.* ix. 13). (*d*) In connexion with the last two elements must be viewed *the participation in Christ's death and resurrection*, which is brought about through baptism (best stated in Ro 6^{2ff}). This aspect seems to be introduced by Paul, who received it from Gentile Christians; it does not

occur in Jewish-Christian writings of the NT. Yet while the participation in Christ's death is stated in the aorist tense, and thus interpreted as a reality of the Christian present, the participation in Christ's resurrection is given in the future tense and thus interpreted as a hope and an eschatological gift. Especially in this interpretation, Paul decisively corrects the view which would identify it with magical initiation of mystery-cults.

Yet one must recognize that with regard to the eschatological gift—the *arrabōn* ('down-payment') of the Spirit—the baptized knows that he is already a 'new creation' and rejoices with Paul: 'The old has passed away, behold the new has come' (2 Co 5^{17}). It is this awareness and self-understanding of the Christian which sets forth the characteristic interrelation of being and becoming, of baptism and ethics, linked together by a fundamental eschatological hope. This hope is no mere horizon of future events but is realized in the idea of the Church as the one body of Christ (1 Co 12^{13}), into which baptism has conferred incorporation.

7. Baptism in the NT, though a genuine Christian sacrament, has been nourished by pre-Christian concepts cf § **1**). We have not yet mentioned a particular OT feature, taken up and transformed into a Christian thought of great importance: the idea of the '*holy remnant*.' It is first found in the story of Elijah in the 9th cent. B.C. (1 K 19^{18}), then in Isaiah, Zephaniah, and Ezekiel (Ezk 9^4). The idea of an eschatological remnant is connected with *the rite of sealing or branding*. This eschatological concept played a great role in Judaism (Zadokite Fragments, B-text, 9^{10-12}, Odes Solom. 15^{6-9}; cf Rev 13^{16f} 14^9 16^2 20^4), and was taken up by the early Christians, for whom 'to seal' meant 'to baptize,' namely for the kingdom of God. This is the realization of the 'holy remnant' (cf Ro 9–11). When Hellenistic Christianity interpreted the 'holy remnant' or the 'true Israel' as the sacramental *sōma Christōu*, being the eschatological congregation of God and Christ, the sealing practice became a natural part of baptism as a sign of membership (1 Co 12^{12-27}; cf Hermas, *Simil.* VIII. vi. 3; IX. xvi. 2 ff; xvii. 4; and 2 Clem 7^6 8^6). Possibly even the saying of Jesus in Mk 8^{34} and || had this sealing idea in the background.

8. Form-critical analysis has shown that baptism—its preparation as well as administration, in the widest meaning—forms a primary source—perhaps the most significant one—for the *confessional formulas* in the NT writings (cf R. Bultmann). Ro 10^9 contains a baptismal confession, Eph 5^{14} gives a (fragmentary?) baptismal acclamation. 1 Co 10 and 11 bring sacramental formulas of the Eucharist ('cup of blessing,' 'Lord's Supper') but include also the typological passage concerning baptism (1 Co 10^{1-6}); 1 Co 6^{11} and He 6^4 take up baptismal formulas and Ro 8^{29f} contains a hymnic fragment rooted in baptism. The 'turn' or conversion to a new life rooted in baptism is set forth in sayings like Ac 26^{18}, Col 1^{13}, 1 P 2^9, 1 Jn 3^{14}, and seems to be in the background of Ro 6^{4f}. Further we must reckon with Christian adaptation of pre-Christian formulas, as *e.g.* in hymns like Col 1^{15-20} (E. Käsemann). The *Sitz im Leben* of all these quotations or allusions is early Christian liturgical praxis. Here baptism has a place as *primus inter pares* because of the theological neighbourhood or even correlation of baptism with Christ's crucifixion and resurrection as outlined in Ro 6 (cf § **6** (*d*)), a section of the greatest importance for the further development of Christian thought and for the iconography of early Christian art in the Roman catacombs as well as in the baptistry of Dura-Europos (3rd cent.).

9. Parallelism between *baptism and circumcision* cannot be assumed. In Col 2^{11} the word circumcision is used as a metaphor for baptism, but this single verse cannot be used as a basis for generalizations. The religious distinction of the father of a family is not taken up by the earliest Christianity, which emphasized instead the individual person before God and in Christ and thus opened the door for a new social and religious recognition of women. Male *and* female persons were baptized from the earliest time, and their equality in principle is stated in Gal 3^8. The question of children is mentioned in 1 Co 7^{14}: they are 'holy' because of their parents' faith. It is possible—at least it is not excluded—that Paul's remark concerns baptism. Yet neither here nor in sentences like 'Lydia was baptized with her household' is any explicit word said about the legitimacy of *infant baptism*. We may conclude that the question was not yet urgent, because of the expectation of the immediacy of Christ's parousia.

When the Church of the 2nd cent. began to carry out the practice of infant baptism, this was not felt to be an unauthorized innovation. One justification for this usage was found in the postponement of Christ's imminent return. Further, there was the general tendency towards sacramentalism, in which the eschatological future was anticipated. The salvation through baptism has already taken place, the 'riches of his glorious inheritance' (Eph 1^{18}) are present, the forgiveness of sins and the possession of righteousness have been assured to the believers as members of Christ's body (Ti 3^5, 1 P 3^{21}, Barn 11^{11} cf 2 Clem 1^4 2^7 3^3 9^{2-5}, etc.). And since natural death before Christ's parousia was now regarded as a law of nature, infant baptism became sanctioned. It was seen as the sacramental door opening in a way which had to be traversed in fulfilment of the credal and ethical demands of the Church. Thus baptism started a process—it was not the result of a development.

10. NT scholarship has reached the result that no longer can we present a uniform Biblical Theology. The NT canon contains a plurality of concepts which must be taken into account. Baptism greatly differs with John the Baptist, the Pre-pauline and Pauline usage, and the Synoptic writers. Though the evidences in Luke's Book of Acts may go back to earlier levels of tradition, they picture a later stage of liturgical development, as also do the Pastorals and the Book of Revelation. Divergences in these documents originating from different times and local traditions cannot be overlooked. What can be shown are the constant features, on the one side, and variant accents on the other. *Constant* is the sacramental meaning of baptism ever since the time of John the Baptist. From here baptism entered into the earliest Christianity after Christ's crucifixion and resurrection. The new situation after Easter Day is marked by the step from the work and word of Jesus to the faith in the crucified and risen Christ. In the following period, increasing missionary demands and the obvious delay of Christ's parousia brought out new features which may be evaluated as *variant* accents. The sacramental meaning is no longer exclusively dependent on the faith of the participant but attains a quality in itself as a magically operative rite. This development begins as early as the time of Luke's Acts and is influenced in general by Gnostic-Christian practice. It is openly stated in Hermas *Vis.* III. iii. 5. Faith in Christ is no longer the only *conditio sine qua non* but is seen as an outcome of baptism. As soon as this was acknowledged, infant baptism had its dogmatic justification. The possible magical misunderstanding of 'faith' was excluded, because the Christian in the course of his life had to confess his faith repeatedly in order to preserve the sacramental gift of baptism. E. D.

BAR.—Aramaic word for 'son'; used, especially in NT times, as the first component of personal names, such as Bar-abbas, Bar-jesus, Bar-jonah, etc. The word stands in Ps 2^{12}, where AV, RV have 'kiss the son,' where an Aramaic word is out of place (the normal Hebrew word stands in v.^{7}), and where the text should probably be emended to read 'kiss his feet' with RSV.

BARABBAS.—A revolutionist and a murderer according to the Synoptic Gospels; a robber according to John (Mt 27^{15-26}, Mk 15^{6-15}, Lk 23^{18-23}, Jn 18^{39-40}). The Evangelists relate that Pilate at the time of the Passover offered to release either Jesus or Barabbas and that the Jews chose Barabbas. The whole proceeding is explicitly

regarded as resting upon a Jewish custom. There is, however, no other evidence of such a practice. This fact, along with the obvious function which the story plays in the narrative, has rendered it suspect historically in the eyes of many critics. The name Barabbas is probably a patronymic meaning 'son of Abbas.' According to an ancient reading of Mt 27[17] supported by Origen, his surname was Jesus. Many textual critics believe that this was the original reading and that it disappeared from the majority of the manuscripts since some were offended that the name of the murderer should be the same as that of Christ.

BARACHEL.—Father of Elihu, Job 32[2, 6].

BARACHIAH.—See ZECHARIAH.

BARAK ('lightning').—The son of Abinoam; he lived at a time when the Canaanite kingdom of Hazor, having recovered from its overthrow by Joshua (Jos 11[10–15]), was taking vengeance by oppressing Israel. He is called from his home in Kedesh-naphtali by Deborah to deliver Israel. He gathers an army of 10,000 men from the tribes of Naphtali and Zebulun. With this force, accompanied by Deborah, without whom he refuses to go forward, he encamps on Mt. Tabor, while the enemy under Sisera lies in the plain on the banks of the Kishon. At the word of Deborah, Barak leads his men down to battle, and completely defeats Sisera. The latter flees; Barak pursues him, but on reaching his hiding-place finds that he has been already slain by Jael, the wife of Heber. The glory of the victory, therefore, does not lie with Barak, but with Deborah, who was his guiding spirit, and with Jael who slew the enemy's leader (Jg 4, 5). W. O. E. O.

BARBARIAN.—The English word is used in Ac 28[2, 4] (RSV 'native'), Ro 1[14], 1 Co 14[11] (RSV 'foreigner'), Col 3[11] to translate a Greek word which does not at all connote savagery, but means simply 'foreign,' 'speaking an unintelligible language.' The expression first arose among the Greeks in the days of their independence, and was applied by them to all who could not speak Greek. When Greece became subject to Rome, it was then extended to mean all except the Greeks and Romans. There may be a touch of contempt in St. Luke's use of it, but St. Paul uses it simply in the ordinary way; see especially 1 Co 14[11]. A. So.

BARBER.—See HAIR.

BARCHUS, 1 Es 5[32] (RV).—See BARKOS.

BARHUMITE, 2 S 23[31] (AV, RV).—See BAHURIM.

BARIAH.—A son of Shemaiah, 1 Ch 3[22].

BAR-JESUS.—The name of 'a certain magician, a Jewish false prophet' (Ac 13[6]), probably an astrologer, in the retinue of Sergius Paulus, the Roman proconsul of Cyprus. The title *Elymas* (v.[8]) seems to be derived from the Arabic word *'alîm*, signifying 'wise,' and to be equivalent to Magus. Because Bar-Jesus feared the loss of his influence on the proconsul, he opposed the preaching of St. Paul. According to Ac 13[11] he was punished by temporary blindness. Josephus mentions (*Ant.* xx. vii. 2 [142]) a Jew of Cyprus and magician named Atomos or Hetoimos who helped the procurator Felix to win Drusilla (Ac 24[24]), the wife of king Aziz of Emesa. Perhaps it was the same person (Zahn, *Apg.* 419). E. H.

BAR-JONA(H).—See BAR, and JOHN, 6.

BARKOS.—Ancestor of certain Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[53], Neh 7[55], 1 Es 5[32] (AV **Charcus,** RV **Barchus**).

BARLEY (*śe'ôrāh*).—As in ancient times, so to-day barley (Arab. *sha'îr*) is the most plentiful cereal of Palestine. It is the chief food of horses (1 K 4[28]), mules, and donkeys, oats being practically unknown. It is still used by the poor for making bread (Jg 7[13], Jn 6[9, 13] etc.) in the villages, but not in the cities. Barley was the special ritual offering for jealousy (Nu 5[15]). The barley harvest (Ru 1[22]) precedes that of wheat: it begins around Jericho as early as March, and in Jerusalem and the neighbourhood at the end of May. E. W. G. M.

BARN.—Several words are rendered 'barn' in AV. **1.** *'āsām* in Dt 28[8] (AV 'storehouses,' AVm, RV, RSV 'barns'), Pr 3[10] (AV, RV, RSV 'barns'), from verb meaning 'to store.' **2.** *gōren* in 2 K 6[27], Job 39[12] means 'threshing floor' (so RV, RSV). **3.** *m'ghûrāh* in Jl 1[17] (AV, RV 'barns,' RSV 'granaries'), Hag 2[19] (AV, RV, RSV 'barn'), probably from the verb *'āghar*, 'to gather food.' **4.** *apothēkē* in Mt 6[26] 13[30], Lk 12[18, 24] (AV, RV, RSV), meaning 'storehouse' or 'granary'; rendered 'garner' in Mt 3[12], Lk 3[17] (AV, RV; RSV 'granary').

BARNABAS was an important and widely known Christian missionary, who appears in Ac 4[36f] 9[27] 11[22–26, 30] 12[25] 13[1–15]39. A Levite, Joseph of Cyprus, sold his estate and gave the money to the community. He was given the surname Barnabas ('son of comfort') by the apostles, to whom he introduced the converted Saul. He was sent to inspect the new community at Antioch. From Tarsus he brought Saul there and worked together with him a whole year. Then both delivered a collection to the brethren at Jerusalem. From there they brought with them John Mark, a cousin of Barnabas (Col 4[10]). Barnabas, Paul, and John Mark made a missionary voyage to Cyprus; then John went home. Barnabas and Paul founded communities at Antioch of Pisidia, Lystra, Iconium, and Derbe. After their return to Antioch they were sent to the Jerusalem conference (see Gal 2[1–10]). Later on there arose between them 'a sharp contention' concerning John and 'they separated from each other.' Finally Barnabas and Mark 'sailed away to Cyprus' (Ac 15[36–39]).

Some critics have made out that Barnabas means 'son of Nebo,' and also that the scene in Ac 9[27] becomes meaningless if St. Paul came to Jerusalem three years after his conversion (Gal 1[18]). Possibly Barnabas was one of the 'men of Cyprus' (Ac 11[20]) who founded the community at Antioch. Later on Barnabas withdrew from fellowship with St. Paul and the Gentile Christians, when 'certain men came from James' (Gal 2[12f]). But the way in which Paul speaks of Barnabas in 1 Co 9[6] points to a reconciliation. E. H.

BARODIS.—A name occurring in 1 Es 5[34] (omitted in Ezra and Nehemiah).

BARRACKS.—This word stands in RSV in Ac 21[34, 37] 22[24] 23[10, 16, 32], where AV and RV have 'castle' in all cases. See PRAETORIUM; also CITADEL.

BARREL.—Hebrew *kadh* is rendered 'barrel' in AV, RV 1 K 17[12, 14, 16] 18[33], but 'jar' in ARV, RSV. It is a large earthenware jar used for fetching water from the well, storing grain, etc., and is elsewhere rendered **pitcher** (*e.g.* Ec 12[6]).

BARRENNESS.—See CHILD.

BARSABAS.—AV form of **Barsabbas** (q.v.).

BARSABBAS.—See JOSEPH (in NT), **5,** and JUDAS (in NT), **6.**

BARTACUS.—Father of Apame (1 Es 4[29]).

BARTHOLOMEW.—One of the Twelve, mentioned only in the lists of the Apostles (Mt 10[3] = Mk 3[18] = Lk 6[14]). Jerome says that he wrote a Gospel, preached to the Indians, and died at Albanopolis in Armenia. Bartholomew is really not a name, but a patronymic—*Bar Talmai* = 'son of Talmai' (cf 2 S 13[37]). See NATHANAEL. D. S.

BARTIMAEUS.—A blind man whom Jesus, on His way to the last Passover, healed at the gate of Jericho (Mk 10[46–52]). The order of events is somewhat different in Luke (18[35–43]) and the blind man's name is not given. In Matthew's account (20[29–34]) two unnamed blind men appear. Bartimaeus is probably a patronymic meaning 'son of Timaeus' (=Timai) as Mark suggests (10[46]). But the explanation is made in a manner contrary to Mark's usual practice and may be a scribal gloss. W. R. S.

BARUCH ('blessed').—**1.** Son of Neriah, the son of Mahseiah and brother of Seraiah (Jer 51[59]); known from Jer 36, 45, 32[12–16] 43[3, 6]; by Jeremiah's side in the conflict with Jehoiakim (604 B.C.), again during the last

siege of Jerusalem (587–586 B.C.), and again amongst the Judaeans left behind after the Second Captivity. 'Baruch' the scribe, named in Jer 36[26] along with 'Jeremiah the prophet,' is already the recognized attendant and amanuensis of the latter; he seems to have rendered the prophet over twenty years of devoted service. He belonged to the order of 'princes,' among whom Jeremiah had influential friends (26[16] 36[25]); Baruch's rank probably secured for Jeremiah's objectionable 'roll' (ch. 36) the hearing that was refused to his spoken words. When he cast in his lot with Jeremiah, Baruch made a heavy sacrifice; he might have 'sought great things' for himself, and is warned against his natural ambition (45[3–5]). The promise that Baruch's life shall be given him 'as a prize' wherever he goes, placed where it is (45[5]), suggests that he survived his master, to act as his literary executioner. The Book of Jeremiah (q.v.) owes much to this loyal secretary, though the final arrangement of the materials is far from satisfactory. Tradition adds nothing of any certainty to the references of Scripture; see, however, Jos. *Ant.* x. ix. 1, 6 (158, 179). For the Apocryphal writings attached to his name, see APOCRYPHA and PSEUDEPIGRAPHA. **2.** One of the wall-builders (Neh 3[20]). **3.** A signatory to the covenant (10[6]). **4.** A Judahite (11[5]). G. G. F.

BARZILLAI.—1. The name of a chieftain of Gilead who brought supplies to David and his army at Mahanaim (2 S 17[27ff]). After the death of Absalom, Barzillai went across Jordan with the king, but declined to go to court (19[31ff]). On his deathbed David charged Solomon to 'deal loyally with (AV, RV 'show kindness to') the sons of Barzillai' (1 K 2[7]). His descendants are mentioned in Ezr 2[61], Neh 7[63], 1 Es 5[38] (AV **Berzelus**, RV **Zorzelleus**). One of his daughters, named **Agia** (q.v.), married **Jaddus** (q.v.). **2.** The Meholathite whose son Adriel received Merab (1 S 18[19]), Saul's daughter in marriage. She bore five sons (2 S 21[8], where Hebrew reads *Michal*, so AV, RV). J. G. T.—R. A. B.

BASALOTH, 1 Es 5[31] (AV, RV).—See BAZLUTH.

BASCAMA, 1 Mac 13[23] (AV, RV).—See BASKAMA.

BASE.—To be base is in modern English to be morally bad, but in AV it sometimes means to be of humble birth or lowly position. In RV, RSV the word is normally used in the sense of morally low, mean.

BASEMATH.—1. Daughter of Elon the Hittite and wife of Esau, Gn 26[34]; called **Adah** in Gn 36[2]. **2.** Daughter of Ishmael and sister of Nebaioth, who became Esau's wife, Gn 36[3]; called **Mahalath** in Gn 28[9]. **3.** Daughter of Solomon and wife of Ahimaaz, one of the king's officers, 1 K 4[15] (AV **Basmath**).

BASHAN.—The name of the territory east of the Sea of Tiberias. It was the kingdom of Og, the Rephaite opponent of Israel, and with his name the country is almost invariably associated (Nu 21[33], Dt 29[7], Neh 9[22], etc.). The territory was given to the half-tribe of Manasseh, with a reservation of two cities, Golan and Be-eshterah (Ashtaroth in 1 Ch 6[71]), for the Gershonite Levites (Jos 21[27]). In the time of Jehu the country was smitten by Hazael (2 K 10[33]). It was noted for mountains (Ps 68[15]), lions (Dt 33[22]), oak trees (Is 2[13], Ezk 27[6], Zec 11[2]), and especially cattle, both rams (Dt 32[14]) and bullocks (Ezk 39[18]); the bulls and kine of Bashan are typical of cruelty and oppression (Ps 22[12], Am 4[1]). The extent of the territory denoted by this name cannot be exactly defined till some important identifications can be established, such as the exact meaning of the 'the region of Argob' (q.v.; included in the kingdom of Og, Dt 3[4], etc.), where were threescore great cities with walls and brazen bars, administered for Solomon by Ben-geber of Ramoth-gilead (1 K 4[13]). It included Salecah (*Salkhad*, on the borders of the desert), Edrei (*Der'ā*), Ashtaroth (*Tell 'Ashtarah*), and Golan, one of the cities of refuge, the name of which may be preserved in the *Sahem el-Jōlân*, the region immediately east of the Sea of Tiberias. R. A. S. M.

BASHEMATH.—AV form of **Basemath, 1, 2** (q.v.).

BASILISK.—See SERPENT.

BASIN (AV, RV 'bason').—Chiefly the large bowl (Heb. *mizrāḳ*) of bronze used by the priests to receive the blood of the sacrificial victims (Ex 27[3], 1 K 7[45], etc.). Similar bowls or basins of silver, filled with flour mingled with oil, were presented by the princes of the congregation (Nu 7[13ff]), while golden ones were prepared for use in Solomon's Temple (1 K 7[50]) or for the second Temple (Neh 7[70]). The same term is found only once for a vessel for secular use (Am 6[6], where EV render 'bowl'). A different term (Heb. *saph*) is used in Ex 12[22] for the basin containing the blood of the Passover lamb, and in 2 K 12[14] for Temple vessels and 1 K 7[50] (AV 'bowls'; RV, RSV 'cups') for vessels for ordinary use. Jesus used a basin (Gr. *niptēr*) for washing the disciples' feet (Jn 13[5]).

BASKAMA.—An unknown town of Gilead, 1 Mac 13[23] (AV, RV **Bascama**).

BASKET.—The names of a round score of baskets in use in NT times are known from the Mishnah (see Krengel, *Das Hausgerät in der Mishnah*, pp. 39–45). They were made of willow, rush, palm-leaf, and other materials, and used in an endless variety of ways, for purely domestic purposes, in agriculture, in gathering and serving fruit, and for collecting the alms in kind for the poor, etc. Some had handles, others lids, some had both, others had neither. In OT times the commonest basket was the *sal*, made, at least in later times, of peeled willows or palm-leaves. It was large and flat like the Roman *canistrum*, and like it, was used for carrying bread (Gn 40[16ff]) and other articles of food (Jg 6[19]), and for presenting the meal-offerings at the sanctuary (Ex 29[3]). Another (*dūdh*), also of wickerwork, probably resembled the *calathus*, which tapered towards the bottom, and was used in fruit-gathering (Jer 24[1]). In what respect it differed from Amos' 'basket of summer fruit' (Am 8[1]) (*ke·lûbh ḳayiṣ*) is unknown. A fourth and larger variety *ṭene'* was employed for carrying home the produce of the fields (Dt 28[5] 'blessed shall be your basket and your kneading-trough'), and for presenting the first-fruits (26[2]). The basket (*tēbhāh*) in which Moses was put (Ex 2[3, 5]; RV 'ark') was of papyrus reeds.

In NT interest centres in the two varieties of basket distinguished consistently by the Evangelists in their accounts of the feeding of the 5000 and the 4000 respectively, the *kophinos* and the *sphyris*. The *kophinos* (Mt 14[20]) is probably to be identified with the exceedingly popular *ḳuppāh* of the Mishnah, which 'was provided with a cord for a handle by means of which it was usually carried on the back' (Krengel), with provisions, etc., and which, therefore, the disciples would naturally have with them. The Jews of Juvenal's day carried such a provision basket (*cophinus*). The *sphyris* or *spyris* (Mt 15[37], Mk 8[8]), from its use in St. Paul's case (Ac 9[25]), must have been considerably larger than the other. The *sarganē* (2 Co 11[33]) in which St. Paul was let down was either of rope net-work or a matbasket, 'hamper.' A. R. S. K.—R. A. B.

BASMATH, 1 K 4[15] (AV).—See BASEMATH, **3.**

BASON.—See BASIN.

BASSA, 1 Es 5[16] (AV).—See BEZAI, **2.**

BASSAI, 1 Es 5[16] (RV).—See BEZAI, **2.**

BASTAI, 1 Es 5[31] (AV).—See BESAI.

BASTARD.—1. Hebrew *mamzēr*, Dt 23[2] (AV, RV, RSV), Zec 9[6] (AV, RV; RSV 'mongrel'). According to rabbinical tradition this does not mean, as with us, one born out of wedlock, but the offspring of an incestuous union, or of a marriage within the prohibited degrees of affinity, and this is probably right. Cf Driver, *Deuteronomy*, p. 260. In Zec 9[6] it appears to mean one of racially mixed origin.

2. Greek *nothos*, He 12[8] (AV, RV; RSV 'illegitimate children'). Here the meaning is 'born out of wedlock.'

BASTHAI, 1 Es 5[31] (RV).—See BESAI.

BAT (*ʿaṭallēph*, Lv 11[19], Dt 14[18]).—The ' bat ' (LXX, Vulg.) is added at the end of the list of birds (cf Bar 6[22], where it heads a list) because it was regarded as half-way between beasts and birds (cf Aristotle *de partibus animalium* iv. 13, 697b). It is mostly an insectivorous creature as are all the seventeen species found in Palestine except one (the *xantharpaeia*, which eats fruit), modified for flying and ranging from the size of a mouse to that of a rat. Bats flit about on noiseless wings on warm evenings in summer and haunt ruins, old tombs, and dark recesses of caves (cf Is 2[20]), in great numbers all over Palestine. They are considered unclean from their habit of bespattering walls with ordure as they fly, the overpowering mousy odour of their homes, and because their flesh is quite uneatable.

E. W. G. M.—G. R. D.

BATH.—A liquid measure; see WEIGHTS AND MEASURES.

BATH, BATHING.—The latter term is most frequently used in our EV in connexion with purification from ceremonial defilement—contact with holy things, with the dead, etc. (see CLEAN AND UNCLEAN)—and in this sense denotes the washing of the body *with* water, not necessarily the total immersion of the body *in* water. Bathing in the modern and non-religious sense is rarely mentioned (Ex 2[5] Pharaoh's daughter, 2 S 11[2] (RV, RSV) Bathsheba, and the curious case 1 K 22[38]). Egyptian-style bathrooms, assigned to the early half of the 2nd millennium B.C., have been discovered in the palaces of the rulers of *Tell el-ʿAjjûl* (Gaza), one such example (also with simple toilet facilities) measuring 2.50 metres × 2 metres and having a plastered, sloping floor with a waste-pipe—bathing having been done by pouring. Belonging to the latter half of the same millennium, a bathing place (possibly used also for washing clothes) has similarly come to light in a courtyard at Megiddo. W. F. Albright, *The Archaeology of Palestine*, 1949, 139 f., mentions ' a built-in basin for washing ' in what may have been the ' official guest-house ' of *Tell Beit Mirsim* (Debir, Kiriath-sepher) at the time of the late Divided Monarchy. The buildings in Gezer, thought by R. A. S. Macalister to have been a bathing establishment, are now considered to have been used for dyeing. Public baths are met with in the Greek period—they were included in the ' gymnasium ' (1 Mac 1[14])—and remains of such buildings from the Roman period are fairly numerous, with rooms for changing and chambers of different temperature. Especially celebrated at this time were the mineral and thermal springs of the Dead Sea, Tiberias, Gadara, and Callirrhoë. The therapeutic aspect of bathing receives mention at 2 K 5[10], Jn 5[2ff.]. Facilities for ceremonial ablution were provided at the synagogues in the form of pitchers and basins. The foot-bath placed before the warrior victoriously returned from battle, cf Ps 60[8] and note A. F. Kirkpatrick, *The Psalms*, 1902, 342, may be illustrated by the oval tub discovered in Samaria, having (besides an outlet pipe and four handles moulded near the rim, for ease of carrying) a low foot-shaped platform in the middle. Open cisterns entered by wide steps, which have been discovered at *Khirbet Qumrân*, may have been used for ritual or ordinary bathing; cf Millar Burrows, *More Light on the Dead Sea Scrolls*, 1958, 371 f.

The Hebrews were well acquainted with the use of mineral and vegetable alkalis for increasing the cleansing properties of water (Jer 2[22], RSV ' lye,' ' soap,' cf Job 9[30] ' lye '). In Sus v.[17] ' oil and ointments ' for bathing suggest a similarity to the practice in Hellenistic-Roman times of anointing the body at the baths. For further details relating to several of the foregoing items cf K. Galling, *BRL*, 1937. Art. ' Bad und Baden.'

A. R. S. K.—E. T. R.

BATH-RABBIM.—The name of a gate of Heshbon, near which were pools, to which the Shulammite's eyes are compared (Ca 7[4]).

BATHSHEBA (1 Ch 3[5] **Bathshua**: this may be a mere textual error).—Wife of Uriah the Hittite, seduced by David (2 S 11[2–4]), and afterwards married to him (v.[27]). The child died (12[18]), but another son, Solomon, was subsequently born (12[24]). Bathsheba, instigated and supported by Nathan, successfully combated Adonijah's attempt to secure the throne (1 K 1[11–53]). Acting as Adonijah's intercessor in the matter of Abishag, she was most respectfully received by Solomon, but her unwise request was refused (1 K 2[13–25]). J. T.

BATHSHUA.—**1.** See BATHSHEBA. **2.** See SHUA.

BATH-ZACHARIAS, 1 Mac 6[32f] (AV).—See BETH-ZECHARIAH.

BATTALION.—This word is found in RSV in Mt 27[27], Mk 15[16], here AV and RV have ' band.' See BAND and LEGION.

BATTERING-RAM.—See FORTIFICATION AND SIEGECRAFT.

BATTLE.—See WAR.

BATTLE AXE.—See ARMOUR, **1** (*f*).

BATTLE BOW.—See ARMOUR, **1** (*d*).

BATTLEMENT.—See HOUSE.

BAVVAI.—The son of Henadad (Neh 3[18]; AV **Bavai**); rebuilt a portion of the wall of Jerusalem; called in v.[24] **Binnui.**

BAY.—See COLOURS, **3.**

BAYITH (' house ').—Occurs as a proper name in Is 15[2] (RV; AV **Bajith**); but the sense is uncertain and RSV reads *bath* (' daughter ').

BAY-TREE.—This word, found in Ps 37[35] (AV) is probably a mistranslation. For ' green bay tree ' (Heb. *ʾezrāḥ raʿᵃnān*) RV has ' a green tree in its native soil.' RSV emends the Hebrew to read *ʾerez lᵉbhānôn* and renders ' a cedar of Lebanon.'

BAZAAR.—Found only in 1 K 20[34] (RSV; AV, RV ' street '), where it has its original, oriental meaning of a trading quarter.

BAZLITH.—See BAZLUTH.

BAZLUTH.—Founder of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[52], 1 Es 5[31] (AV, RV **Basaloth**); called **Bazlith** in Neh 7[54].

BDELLIUM.—The Assyrian *budulḫu*, *biderḫu* is given in a botanical list between storax and ladanum and is therefore a gum-resin; and the Heb. *bᵉdhōlah*, which is derived from it, is ' bdellium ' according to most ancient authorites (Aq., Symm., Theod., Vulg.) This, a fragrant yellow resinous gum of the tree known scientifically as *balsamodendron mukul*, was obtained from Arabia (Galen), Babylonia, Media, Bactria, and India (Pliny) and the word is perhaps derived from the Sanskrit *udūkhala* (cf Gr. *bdellion bolchon*; *madelkon* and Lat. *maldacon*, *bidellium*, *bidella*, *bdella*, *vidella*) ' bdellium.' It is described as one of the choicest products of the land of Havilah (Gn 2[12]), being much valued as a spice in antiquity (Josephus); and manna is aptly compared to it in colour, if this is rightly identified with the dirty-yellowish exudation with which the *tamarix gallica* or *mannifera* oozes by night during the season. G. R. D.

BE.—To be is to exist, as in ' To be, or not to be, that is the question.' This primary meaning is found in Gn 5[24] ' Enoch walked with God; and he was not '; He 11[6] ' he that cometh to God must believe that he is ' (AV, RV; RSV ' exists '). In 1611 ' be ' and ' are ' were interchangeable auxiliary forms in the present indicative plural, as Ps 107[30] ' Then are they glad because they be quiet ' (AV, RV; RSV ' were glad . . . had quiet ').

BEALIAH (' Y″ is lord ').—A Benjamite who joined David at Ziklag, 1 Ch 12[5].

BEALOTH.—**1.** A town in the Negeb, Jos 15[24]; perhaps the same as **Baalath-beer** (q.v.). **2.** A town in Solomon's 9th district, 1 K 4[16] (RV, RSV), in the north; AV reads ' in **Aloth.**'

BEAM.—**1.** A tree roughly trimmed serving as support of the flat roof of an Eastern house (2 K 6[2, 5]

(AV, RV; RSV 'log'), Ezr 6^{11} (RV RSV; AV 'timber'), Mt 7^{3ff}, Lk 6^{41f} (AV, RV; RSV 'log'). Sometimes it was elaborately decorated (2 Ch 3^7 34^{11} (AV 'floor'), Ca 1^{17}). See HOUSE, 5, MOTE. 2. The weaver's beam (Jg 16^{14} (AV, RV; RSV 'loom'), 1 S 17^7, 2 S 21^{19}, 1 Ch 11^{23} 20^5), (see SPINNING AND WEAVING). 3. Beam of a balance. See BALANCE.

BEANS (*pôl*, Arab. *fûl*).—A very common and popular vegetable in Palestine, used from ancient times; they are the seeds of the *vicia faba*. The bean plant, which is sown in October or November, is in blossom in early spring, when its sweet perfume fills the air. Beans are gathered young and eaten, pod and seed together, cooked with meat; or the fully mature beans are cooked with fat or oil. As the Israelites took little meat, such leguminous plants were a necessary ingredient of their diet. In Ezk 4^9 we read of beans as being mixed with barley, lentils, millet, and fitches to make bread.

E. W. G. M.

BEAR (*dōbh*).—The Syrian bear (*Ursus syriacus*, Arab. *dubb*) is still fairly common in Hermon and the Anti-Lebanon, and is occasionally found in the Lebanon and east of the Jordan; it is practically extinct in Palestine. It is smaller and of a lighter colour than the brown bear (*Ursus arctos*). It is a somewhat solitary animal, eating vegetables, fruit, and honey, but, when hungry, attacking sheep (1 S 17^{34-36}) and occasionally, but very rarely, to-day at any rate, human beings (2 K 2^{24}). The fierceness of a bear robbed of her whelps (2 S 17^8, Pr 17^{12}, Hos 13^8) is well known. Next to the lion, the bear was considered the most dangerous of animals to encounter (Pr 28^{15}), and that it should be subdued was to be one of the wonders of the Messiah's kingdom (Is 11^7).

E. W. G. M.

BEARD.—See HAIR.

BEAST.—1. In OT (1) *bᵉhēmāh*, used for a quadruped as distinguished from man, Gn 6^7, Ex 9^9, etc., also used specifically for domestic animals and translated 'animal' Gn 7^2, or 'cattle' Lv 1^2. (2) *ḥayyāh*, used of animals in general but specially 'wild beasts,' see Gn 7^{14} 8^1 9^2, etc. (3) *bᵉʿîr*, sometimes translated 'beasts' and sometimes 'cattle,' see Gn 45^{17}, Ex 22^5, etc. (4) *zîz*, 'wild beasts' (AV and RV), Ps 50^{11} 80^{13}; RSV, 'all that move.'

2. In NT (1) *thērion*: Mk 1^{13}, Ac 28^4 (a viper), Ti 1^{12}, He 12^{20}, Ja 3^7, and over thirty times in Revelation. (2) *zōon*, of the 'beasts' (AV), or 'living creatures' (RV and RSV), round about the throne (Rev $5^{6, 8, 11}$, etc.).

E. W. G. M.—L. H. B.

BEAST (in Apocalypse).—In Revelation, particularly ch. 13, are symbolic pictures of two beasts who are represented as the arch-opponents of the Christians. The first beast demands worship, and is said to have as his number 666—a numerical symbol most easily referred to the Emperor Nero, or the Roman Empire. In the former case the reference would be undoubtedly to the myth of Nero *redivivus*, and this is, on the whole, the most probable interpretation.

If instead of 666 we read with Zahn, O. Holtzmann, Spitta, and Erbes, 616 (a variant reading known to Irenaeus—see v. xxx. 1), the number would be the equivalent of Gaius Cæsar, who in A.D. 39 ordered the procurator Petronius to set up his statue in the Temple of Jerusalem. This view is, in a way, favoured not only by textual variations, but by the fact that Revelation has used so much Jewish apocalyptic material. However this may be, it seems more probable that the reference in Rev 17^{10-11}, as re-edited by the Christian writer, refers to Nero *redivivus*, the incarnation of the persecuting Roman Empire, the two together standing respectively as the Antichrist and his kingdom over against the Messiah and His kingdom. As in all apocalyptic writings, a definite historical ruler is a representative of an empire. Until the Messiah comes His subjects are at the mercy of His great enemy. E. Stauffer maintains that Rev 13 refers to actual historical circumstances surrounding the arrival and cultic worship of the imperial image in the harbour of Ephesus and identifies the name of the beast as concealed in the cipher 666 with Domitian's official name 'autokratcr KAIsar DOMETianos SEBastos GErmanikos.'

The present difficulty in making the identification is due not only to the process of redaction, but also to the highly complex and, for the modern mind, all but unintelligible fusion of the various elements of the Antichrist belief (see ANTICHRIST, DOMITIAN). S. M.—J. C. B.

BEATING.—See CRIMES AND PUNISHMENTS 9.

BEATITUDES.—This word comes from the Latin *beatitudo*, used in Vulg. of Ro 4^6, where David is said to pronounce the beatitude of the forgiven soul. Since the time of Ambrose the term has been used to describe the particular collection of sayings (cast in the form of which Ps 32^1 is an OT specimen) in which Christ depicts the qualities to be found in members of His kingdom—as an introduction to the discourse known as the Sermon on the Mount (Mt 5^{3-12}=Lk 6^{20-23}). The only thing is, that quite clearly the blessings which Jesus here promises are far superior to those of the OT psalms, and are more in line with those spoken of in the writings of the intertestamental period; they are qualities of the mind and heart, for the most part.

Each of these sayings follows the form 'Blessed are . . . for . . .' Matthew records eight of these general declarations, with a special application of the last of them; Luke has only four, to which are added four corresponding Woes. It is possible that in other parts of the NT we have quotations from sayings of the same kind. Thus 1 P 4^{14}, Ja 1^{12}, Rev 14^{13} might easily be supposed to rest on words of Christ. Moreover, even in Matthew apparently there are other beatitudes (13^{16} 24^{46}).

The Beatitudes are thought to belong to a common Greek source, 'Q,' used by both Matthew and Luke, and that in their original form they were in Aramaic. But Luke does not seem to follow the same version of the Beatitudes as Matthew, and there may have been two slightly different recensions of the common source. Putting aside Nos. 3, 5, 6, 7 in Matthew, which have no counterparts in Luke, we see the following main lines of difference—(1) Luke's are in the second person, Matthew's in the third, except in the verses which apply No. 8 ($5^{11, 12}$); (2) Luke's are apparently external: the poor, the hungry, those that weep, receive felicitation as such, instead of the commiseration ('Woe') which the world would give them. But since in Luke disciples are addressed, the divergence does not touch the real meaning. A theodicy is proclaimed in which the hardships of the present, sanctified to the disciple as precious discipline, will be transformed into abiding blessedness. Such a reversal of the order of this life involves here, as elsewhere, the casting down of those whom men count happy (cf Is $65^{13, 14}$, Lk $1^{52, 53}$ 16^{25}, Jn 16^{20}, Ja $1^{9, 10}$). The paradoxical form of the sayings in Luke produces a strong impression of originality, suggesting that here, as often elsewhere, Matthew has interpreted the words which Luke has transcribed unchanged. Matthew has arranged them according to the form of Heb. parallelism: observe how the first and last have the same refrain, the poem beginning and ending on the same note—cf Ps 8. His No. 8 sums up in the form of the other Beatitudes the principle of the appendix vv.^{11f}, which Lk 6^{22f} shows to be original: he then inserts this as a comment, much as he appends a sentence of comment to the Lord's Prayer (6^{14-15}). It may perhaps be doubted whether the Beatitudes peculiar to Matthew are in their original context. No. 3, proclaiming the triumph of those who do not 'struggle to survive,' is quoted from Ps 37^{11}; No. 5 is found as early as Clement of Rome, in the form 'Show mercy, that mercy be shown to you'; No. 6 reproduces the sense of Ps 24^4; No. 7, echoed in Ja 3^{18}, may have been altered in form to fit the appropriate context. We seem to be justified in conjecturing that Luke inserts all the Beatitudes he found in his source under the same context, and that he faithfully preserved the words as they stood; the Woes likewise belonged to the same discourse. (Note the support given to them

by Ja 5[1], and the use of the commercial technical term 'have received,' so characteristic of the Sermon; cf Mt 6[2, 5, 16]). The gloss with which Matthew interprets the blessing on the poor was not apparently known to St. James (2[5]), whose very clear allusion to the Beatitude in its Lukan form determines the exegesis. The rich man could bring himself within the range of the blessing by accepting the humiliation that Christian discipleship brought (Ja 1[10]); so that Matthew's interpretation is supported by the writer, who shows us most clearly that the exact words have not been preserved by him. In No. 2 Matthew seems to have slightly altered the original (Lk 6[21]), under the influence of Is 61[1]. It should be observed however that all attempts to ascertain the original form of sayings of Jesus have at best a large subjective element. Moreover, we must always allow for the probability that modifications introduced by Matthew or Luke may often rest on early traditions, so that elements not included in the principal Gospel sources may nevertheless be derived from first-hand authority.

N. T.

BEAUTIFUL GATE.—See TEMPLE.

BEBAI.—1. The eponym of a family of returning exiles (Ezr 2[11] 8[11] 10[28], Neh 7[16] 10[15], 1 Es 5[13] 8[37] (AV RV **Babi**) 9[29]. **2.** A place mentioned in Jth 15[4]; the site is unknown.

BECHER.—1. Son of Ephraim, Nu 26[35]=1 Ch 7[20] where the name appears as **Bered.** Patronymic in Nu 26[35] **Becherites** (AV Bachrites). **2.** Son of Benjamin, Gn 46[21], 1 Ch 7[6, 8].

BECORATH.—One of Saul's ancestors, 1 S 9[1].

BECTILETH (Jth 2[21]).—A plain between Nineveh and Cilicia. Perhaps the *Bactiali* of the Peutinger Tables, 21 miles from Antioch.

BED, BEDCHAMBER.—See HOUSE, **8.**

BEDAD.—An Edomite king, father of Hadad, Gn 36[35], 1 Ch 1[46].

BEDAN.—1. Mentioned with Jerubbaal (Gideon), Jephthah, and Samuel as one of the deliverers of Israel, 1 S 12[11] (AV, RV). The name does not occur in Judges, and it is probably a corruption for **Barak**, which RSV reads, following LXX and Pesh. Chronologically Barak should precede Gideon, but the order cannot be pressed. **2.** A Manassite, 1 Ch 7[17].

BEDEIAH.—One of those who had married foreign wives, Ezr 10[35], 1 Es 9[34] (AV **Pelias**, RV **Pedias**).

BEE (*dᵉbhōrāh*).—The species commonly found in Palestine (*Apis fasciata*) is beautifully striped but is smaller than that common in England (*Apis mellifica*). They are very active and are noted for their short temper and irritability. They are found wild, hiving in hollow trees and rock crevices, and their honey is collected by the Arabs for sale. Bee-keeping is also widely practised, with hives of varying shape. It is well known that in OT times there were bees in Palestine (Dt 1[44]) and that their honey was eaten (Jonathan in 1 S 14[27]) and regarded as a delicacy (Sir 11[3]), but it is not clear whether the honey with which the land flowed (Ex 3[8] etc.) was bees' honey or fruit juice (syrup) which bore the same name (see HONEY). The mention of hissing for bees in Is 7[8] suggests that bee-keeping was practised in Isaiah's day and that the bees could be induced to swarm in that way. They were clearly as aggressive in those days as they are to-day so that the way they chased a man became proverbial, Dt 1[44], cf Ps 118[12]. The story of the swarm of bees found in the carcase of the lion by Samson (Jg 14[8]) is familiar to all: the improbability of such a thing happening lends point to the story. In the LXX there is an addition to Pr 6[8] in which the bee is, like the ant, commended for her diligence and wisdom.

E. W. G. M.—L. H. B.

BEELIADA ('Baal knows'.—A son of David, 1 Ch 14[7]; called **Eliada** ('El knows') in 2 S 5[16].

BEELSARUS, 1 Es 5[8] (AV, RV).—See BILSHAN.

BEELTETHMUS, 1 Es 2[16, 25] (AV, RV).—See BELTETHMUS.

BEELZEBUB, BEELZEBUL.—See BAALZEBUB.

BEER ('a well').—**1.** A station in the journey from the Arnon to the Jordan, mentioned Nu 21[16], with a poetical extract commemorating the digging of a well at this spot. The context indicates the neighbourhood, but further identification is wanting; it was probably in the *Wâdī eth-Themed.* Perhaps the words translated 'and from the wilderness,' which immediately follow this extract (Nu 21[18]), should be translated (following the LXX) 'and from Beer,' or 'the well.' It is generally identified with **Beer-elim** ('well of mighty men'?), mentioned Is 15[8], but without strong reason. **2.** The place to which Jotham ran away after uttering his parable (Jg 9[21]). Its position is unknown; possibly *Kh. el-Bîreh.*

BEERA.—A man of Asher, son of Zophah, 1 Ch 7[37].

BEERAH.—A Reubenite who was carried captive by Tiglath-pileser, 1 Ch 5[6].

BEER-ELIM.—Mentioned only in Is 15[8]; commonly identified with **Beer, 1,** but with little reason.

BEERI.—1. A Hittite whose daughter became one of Esau's wives, Gn 26[34]. **2.** The father of the prophet Hosea, Hos 1[1].

BEER-LAHAI-ROI ('Well of the Living One who sees me').—A well between Kadesh and Bered, where the fleeing Hagar was turned back (Gn 16[14]), where Isaac met his bride (24[62]), and where he dwelt after Abraham's death (25[11]). Its site is unknown.

BEEROTH ('wells').—A Gibeonite city, usually coupled in enumeration with Chephirah and Kiriath-jearim (Jos 9[17], Ezr 2[25], Neh 7[29], 1 Es 5[19] (AV, RV **Beroth**)); assigned to the tribe of Benjamin (Jos 18[25], 2 S 4[2]); the home of Rechab, murderer of Ish-bosheth (2 S 4[2]), and of Naharai, armour-bearer of Joab (2 S 23[37]). *El-Bîreh,* about 10 miles from Jerusalem on the main road to the north, is the usual identification, and there seems no special reason for objecting thereto. The circumstances and date of the flight of the **Beerothites** to Gittaim (2 S 4[3]) are not recorded.

R. A. S. M.

BEEROTH-BENE-JAAKAN.—A halting-place in the Israelite wanderings, between Moseroth and Hor-haggidgad, Nu 33[31f] (where it is called simply **Bene-jaakan**), Dt 10[6]; probably wells in the territory of some nomad Horite tribe (cf Gn 36[27], 1 Ch 1[42]), the *Bᵉnê Jaʿaḳān.* It is perhaps modern *Birein.*

BEERSHEBA.—A halting-place of Abraham (Gn 21[31]), where Hagar was sent away (Gn 21[14]), and where he made a covenant with Abimelech, from which the place is alleged to take its name ('well of the covenant,' according to one interpretation). Isaac after his disputes with the 'Philistines' settled here (26[23]), and discovered the well **Shibah,** another etymological speculation (v.[33]). Hence Jacob was sent away (28[10]), and returned and sacrificed on his way to Egypt (46[1]). It was assigned to the tribe of Judah (Jos 15[28]), but set apart for the Simeonites (19[2]). Here Samuel's sons were judges (1 S 8[2]), and hither Elijah fled before Jezebel (1 K 19[3]). Zibiah, the mother of Joash, belonged to Beersheba (2 K 12[1]). It was an important holy place: here Abraham planted a sacred tree (Gn 21[33]), and theophanies were vouchsafed to Hagar (v.[17]), to Isaac (26[24]), to Jacob (46[2]), and to Elijah (1 K 19[5]). Amos couples it with the shrines of Bethel and Gilgal (Am 5[5]), and oaths by its *numen* are denounced (8[14]). The fact that this shrine was a centre of pilgrimage for North Israel suggests that it was the religious centre of the tribe of Simeon, once located at Shechem (Gn 34[25–31]). It is recognized as the southern boundary of the settled land in the frequent phrase 'from Dan to Beersheba' (Jg 20[1] etc.). The place was resettled by Jews after the Exile (Neh 11[30]), though it was not in the Persian administrative district of Yehud, but Arabia. Seven ancient wells exist here, and it has been suggested that these gave its name to the locality. The name persists. Several Chalcolithic sites

have been recently discovered in the vicinity, and the modern site was occupied by a Byzantine town, the Biblical Beersheba being probably at *Tell es-Seba'*, about two miles to the E. In recent times a poor market village for Bedouin, it was rebuilt in Turkish times, served as an administrative centre then and during the British Mandate, when it was the seat of a tribal court, and has now expanded as the capital of the Negeb in the state of Israel. R. A. S. M.—**J. Gr.**

BE-ESHTERAH.—A Levitical city, Jos 21^{27}; the same as **Ashtaroth** (q.v.).

BEETLE, Lv 11^{22} (AV).—See CRICKET.

BEHEADING.—See CRIMES AND PUNISHMENTS. **10.**

BEHEMOTH.—Commonly identified with the hippopotamus (Job 40^{15}), as leviathan (41^{1}) as the crocodile; but cf G. R. Driver, *Studi orientalistici in onore di G. Levi della Vida*, i, 1956, 234, where textual corruption is found in 40^{15} and the first creature is identified with the crocodile and the second with the whale. It has been suggested that the ancient Babylonian Creation-myth underlies the poet's description of the two animals (Gunkel, *Schöpf. u. Chaos*, 61ff). This is doubtful, but the myth undoubtedly reappears in later Jewish literature: 'And in that day will two monsters be separated, a female named Leviathan to dwell in the abyss over the fountains of waters. But the male is called Behemoth, which occupies with its breast [?] an immeasurable desert named Dendain' (1 En 60$^{7, 8}$; cf 2 Es 6$^{49-51}$, Apoc. Bar 29^{4}, *Baba bathra* 74*b*). *Behemoth* is rendered by 'beasts' in Is 30^{6}. This may be correct, but the oracle which follows says nothing about the 'beasts of the south'; either the text is corrupt or the title may have been prefixed because Rahab, another name for the chaos-monster, occurs in v.^{7}. The psalmist confesses, '*Behemoth* was I with thee' (Ps 73^{22}). The LXX understood this to be an abstract noun, 'Beast-like was I with thee'; others substitute the singular, and render 'a beast,' etc.
J. T.—**A. S. H.**

BEKA (AV **Bekah**).—See WEIGHTS AND MEASURES.

BEL.—Originally used of the Sumerian deity Enlil, the god of Nippur, the name Bel was later identified with the Babylonian god Marduk (Merodach), whose temple was called E-sagila. The Biblical occurrences of the name (Jer 50^{2} 51^{44}, Is 46^{1}, Ep. Jer 6^{4f}, Bel 1^{3}+) all refer to the Babylonian god. See also ASSYRIA AND BABYLONIA, APOCRYPHA, **12** (Bel and the Dragon).

BELA.—**1.** A king of Edom, Gn 36^{32f}, 1 Ch 1^{43f}. The close resemblance of this name to that of 'Balaam the son of Beor,' the seer (Nu 21^{5}), is noteworthy, and it gave rise to the Targ. of Pseudo-Jonathan reading 'Balaam the son of Beor' in Gn 36^{32}. **2.** The eldest of the sons of Benjamin, Gn 46^{21} (AV **Belah**), Nu 26^{38}, 1 Ch 7^{6} 8$^{1, 3}$; the patronymic **Belaites** occurs in Nu 26^{38}. **3.** A Reubenite who was a dweller in Moabite territory. It is noteworthy that this Bela, like Balaam (Nu 21^{5}), seems to have been traditionally connected with the Euphrates (1 Ch 5^{9}). **4.** A name of the city Zoar, Gn 14$^{2, 8}$. See PLAIN, CITIES OF THE.

BELAH, Gn 46^{21} (AV).—See BELA, **3.**

BELEMUS, 1 Es 2^{16} (AV, RV).—See BISHLAM.

BELIAL (BELIAR).—The etymology of the word is uncertain. The most probable view is that it originates from the Hebrew *b^{e}lî*=without and *'ālāh*=to go up, to return, and means 'land without return,' like Sheol. In the OT it takes on the sense of 'worthlessness' or 'wickedness' and is generally found in combination with a noun: 1 S 1^{16} 'daughter of wickedness' (RSV a 'base woman'; cf Dt 13^{13} 15^{9}, Jg 20^{13}). RSV translates 'evil' (Jg 9^{22}), 'worthless' (1 S 2^{12} 10^{27}), 'ill-natured' (1 S 25$^{17, 25}$). As 'perdition' it is found in Ps 18^{4} (cf 2 S 22^{5}); see also Ps 41^{8} and Nah 1^{11} (villainy). Nah 1^{15}—an exception in the OT—gives an independent use: 'the wicked one' (RSV). The intertestamental literature uses it often as a proper noun (cf Test. XII Patr., Reuben 4^{7} 6^{3}; *Sib. Or.* iii. 63; 1*QS* ii. 5, 19) and thus prepares for its usage by Paul in 2 Co 6^{15}, 'Beliar'; the change from *l* to *r* is due to dissimilation.
J. C. B.

BELIEF.—It is usual in modern English to take faith in God to mean something more than belief in God, faith meaning a personal trust and commitment, belief only an intellectual or impersonal acceptance or credence, or a traditional dogmatic statement. The verb corresponding to 'faith' is, however, 'believe,' unless one wishes to emphasize the personal relation by using 'trust.' 'Belief' occurs in English translations sporadically, *e.g.* 2 Th 2^{13}, and probably indicates the translators to have supposed a kind of credal assent to be intended. Only one Greek word, however, is used, and all usages are therefore to be found under FAITH. J. Ba.

BELL.—Bells are rarely mentioned in the Bible. **1.** The word *pa'^{a}mōn* (from the *beat*) is used of the bells of gold (Ex 28^{34} 39^{25}), which alternated with pomegranates on the skirt of the high priest's robe (28$^{33f.}$ 39^{25f}). Their purpose is stated in 28^{35}. Small bronze bells, both of the ordinary shape with clapper and of the 'ball and slit' form, have been found by archaeologists, and the high priest's bells were doubtless of one or other of these forms. **2.** The word *m^{e}ṣillāh* (from the *tinkling* sound) is used of the bells of the horses in Zec 14^{20}. This word is from the same root as the word for 'cymbals.' Whether these ornaments were really bells, or as is sometimes supposed, small metal discs (cf the 'crescents' of Jg 8^{21} [RV, RSV; cf AVm]) is uncertain. A. R. S. K.—**H. H. R.**

BELLOWS.—See ARTS AND CRAFTS, **2.**

BELMAIN, Jth 4^{4} (AV **Belmen,** RV **Belmaim**); cf BALBAIM, Jth 7^{3} (AV, RV **Belmaim**).—It seems to have lain south of Dothan, but the topography of Judith is very difficult. Bileam in Manasseh lay farther N. than Dothan.

BELMEN, Jth 4^{4} (AV).—See BELMAIN.

BELNUUS.—One of the returning exiles, 1 Es 9^{31} (AV, RV **Balnuus**); called **Binnui** (q.v.) in Ezr 10^{30}.

BELOVED.—(*a*) *In the OT.* Solomon is said to have been beloved of his God (Neh 13^{26}), in the sense of *loved by*; the word occurs in the erotic sense in the Song of Solomon (1$^{13, 14, 16}$, 2$^{3, 8}$, etc.) and in Hosea (3^{1}): all these are from the Hebrew root *'hb, to love.* Rendering the Hebrew adjective *yādhîdh* (*beloved*) are Dt 33^{12} (Benjamin stands in this relationship with God), Ps 60^{5}, 108^{6} (Israel to God), 127^{2} (the Israelite to God), Jer 11^{15} (Judah to God). From the Hebrew noun *maḥmādh* (*desirable thing*) is Hos 9^{16} (of children). From the Hebrew *y^{e}dhîdhûth* (*beloved*) is Jer 12^{7} (Judah to God). From the Hebrew *ḥ^{a}mûdhôth* is Dan 9^{23}, 10$^{11, 19}$ (Daniel to God). Very important, because of its connexion with the NT, is the occurrence of 'beloved' in Is 5^{1} (*dôdh*): 'Let me sing for my beloved a love song concerning his vineyard: My beloved had a vineyard on a very fertile hill.' Cf under (*b*).

(*b*) *In the NT.* The Greek word is *agapētos*, the weakened verbal adjective of *agapaō* (for the meaning of which in Jewish and Christian Greek circles, cf the article on LOVE). There is not general agreement as to the fundamental or earliest meaning of *agapētos*. The idea of *uniqueness* is certainly implied in at least the contexts in which the word is used, if not in the word itself. Not everyone would agree that an adequate translation is *only* or even *unique* in any of the contexts. Certainly, in the language of the Pauline and later Christian epistles the word is parallel in meaning with *agapē*, Christian *love*, and the contexts make it clear that *beloved* is the only possible meaning. The question is, was this alleged Christianization of the word already present in the minds of the writers of the Gospels? In other words, is the voice at the Baptism saying 'This is my beloved Son,' or 'This is my unique son'? (Mk 1^{11}, Mt 3^{17}, Lk 3^{22}, 2 P 1^{17}). The same problem arises with the voice at the Transfiguration (Mk 9^{7}, Mt 17^{5}), and in the parable of the Vineyard (Mk 12^{6}, Lk 20^{13}). But

this parable must stand in close relationship with the parable in Is 5, where *agapētos* clearly renders the Hebrew *beloved*; and the evangelists must have viewed the passage messianically. It was this that they had in mind, rather than the passage concerning Abraham's *only* son (Gn 22[2]), and there is no reason why they should have understood *agapētos* differently in the Baptism voice. The message of that voice appears to be based on the following OT passages in the LXX: Ps 2[7] ('You are my son'), Is 5[1] ('my beloved'), 42[1] ('my servant . . . my chosen, in whom my soul delights'), 44[2] ('my servant, Jeshurun, whom I have chosen'; RSV; *ēgapēmenos* in LXX), Jer 38(31)[20] ('my dear son'; *agapētos* in LXX), as well as Gn 22[2] ('only son'). John the Baptist's mission is to prepare the way for the Messiah and the purpose of the voice is to show that the messianic prophecies are fulfilled; one would therefore suppose that *agapētos* here was understood as in the Messianic passage Is 51[13]. Moreover, the author of 2 P 1[17] is able to quote the baptismal voice in an epistle in which he also uses *agapētos* in the undoubted sense of *beloved* (2 P 3[15]).

The use of the word in the LXX was with a two-fold meaning. (1) *Only*, of an only child, in Gn 22[2, 12, 16], Jer 6[26], Am 8[10], Zec 12[10], rendering *yāḥîdh*. (2) *Beloved*, in Is 5[1] (*dôdhî*), Jer 38 (31)[20] (*yaḳḳîr*), Ps 44(45)[title] 59(60)[5] 83(84)[1] 107(108)[6] 126(127)[2], rendering *yādhîdh*; and Sir 15[13], Is 26[17], To 3[10]S 10[13]B, Bar 4[16], Sus [63] (*sine Heb. aequ.*). The later versions confine themselves to the meaning *beloved*, correcting the LXX where necessary. The close similarity of the Hebrew words *yādhîdh* and *yāḥîdh* may have caused confusion in the minds of the translators of Genesis, Jeremiah, and Minor Prophets; or perhaps the requirement of the particular contexts suggested the need of a word more affectionate in content than *monogenēs*, and the LXX equivalent of *yādhîdh* came readily to hand. It is significant that when Paul alludes to Gn 22[2] he avoids the LXX word *agapētos* (Ro 8[31]), although the LXX version of Genesis was known to him.

To argue that in the Gospels *agapētos* must be a synonym of *monogenēs* (*only*), because John uses the latter in his Prologue, is weak. Jn 1[18] is in no sense a parallel to the voice at the Baptism; we are more likely to find this in 1[34], where in fact he uses neither word according to the best reading, but where according to a 'noteworthy rejected reading' of WH he has *eklektos* (*electus*, Old Latin), and if that is correct the evangelist did not regard *only* as the true interpretation of *agapētos*.

Apart, then, from this doubt in the case of the Gospels, the NT use is always *beloved*—of children, Christian brethren, with proper names (*e.g.* Ro 16[12]), and alone (*e.g.* 3 Jn[2]). Even so, it is not used of Christ; when He is described as Beloved (Eph 1[6]) it is the participle *ēgapēmenos* which is used. N. T.

BELSHAZZAR.—Son of Nebuchadnezzar, last king of Babylon before its capture by Cyrus (Dn 5[1]). The name is given as **Baltasar** in LXX and Theodotion in Daniel (so RV in Bar 1[11f]; AV **Balthasar**, RSV Belshazzar). There is no doubt that Bēl-shar-uṣur, son of Nabonidus, is meant. He was regent in Babylon during most of his father's reign. It is probable that he was in command of Babylon on its surrender.

C. H. W. J.

BELTESHAZZAR.—The name conferred on the youthful Daniel by Nebuchadnezzar, Dn 1[7]. The Babylonian form would be *balâṭsu-uṣur* ('protect his life'). Since in 4[8] this name is said to be in accordance with the name of Nebuchadnezzar's god, its full form should be *Bêl-bâlâṭsu-uṣur*. The LXX and Theodotion employ **Baltasar** both for it and for Belshazzar (ch. 5); and pseudo-Epiphanius repeats a legend that Nebuchadnezzar wished to make the two men co-heirs.

BELTETHMUS.—An officer of Artaxerxes in Palestine; 1 Es 2[16, 25] (AV, RV **Beeltethmus**). It is not a proper name, but a title of Rehum, the name immediately preceding it in 2[16] (cf Ezr 4[9]). It is a corruption of *bᵉʿēl ṭᵉʿēm*='lord of command,' and is rendered 'commander' (AV, RV 'chancellor') in Ezr 4[9]; in 1 Es 2[17] it is translated 'recorder' (AV, RV 'storywriter'), while in 1 Es 2[25] it is doubly represented as 'the recorder (AV, RV 'storywriter') Beltethmus.'

BEN ('son').—A Levite, 1 Ch 15[18] (AV, RV). The name is omitted in LXX, and by both MT and LXX in v.[20]. RSV accordingly omits it in v.[18].

BEN TREE.—In Is 44[4] RV has 'They shall spring up among the grass' (cf AV), where RSV emends the text to yield 'They shall spring up like grass amid waters.' It is probable that the word *bên* is here not 'among,' but the name of a species of *moringa*, and should be rendered 'the ben tree' (Arab. *bân*). The verse should then be rendered 'They shall spring up as the green ben tree' (cf J. M. Allegro, *ZAW* lxiii, 1951, 154ff). The ben tree is tall and erect, and noted for the intense greenness of its leaves.

BEN-ABINADAB.—One of Solomon's commissariat officers, 1 K 4[11]; AV has 'the son of Abinadab.'

BENAIAH (Y[w] hath built).—**1.** A brave soldier from Kabzeel in Judah (2 S 23[20ff]), captain of David's bodyguard (8[18] 20[23]). He became a partisan of Solomon's and carried 'the mighty men,' 'the Cherethites and Pelethites,' with him (1 K 1[8, 38]). He played an important rôle in the young king's coronation (vv.[38, 44]), and was subsequently ordered to dispatch Joab, whose place as commander-in-chief he then filled (2[28–35]). **2.** One of the thirty who formed the second class of David's heroes (2 S 23[22]). He came from Pirathon in Mount Ephraim (2 S 23[30], cf Jg 12[15]). 1 Ch 27[14] assigns to him the command of the course for the eleventh month, with twenty-four thousand Ephraimites under him. **3.** Some ten obscure persons of this name appear in 1 Ch 4[36] 15[18, 20, 24] 16[5f], 2 Ch 20[14] 31[13], Ezr 10[25] (=1 Es 9[26] [AV **Baanias**, RV **Banneas**]), [30, 35] (=**Mamdai**, 1 Es 9[34] [AV **Mabdai**]), [43] (=1 Es 9[35] [AV, RV **Banaias**]), Ezk 11[1, 13]. J. T.

BEN-AMMI ('son of my father's kinsman').—The son of Lot's younger daughter as the fruit of her incestuous union with her father, Gn 19[38]. The story is intended to explain the name Ammon. Incestuous unions were held in abhorrence in Israel, but by some peoples have been accepted without shame. Here the story is intended to express the contempt of the writer for the Ammonites (and Moabites).

BEN-DEKER.—One of Solomon's twelve commissariat officers, 1 K 4[9] (AV 'son of Dekar').

BENE-BERAK.—A town in the territory of Dan, Jos 19[45]; mentioned by Sennacherib in his account of the campaign of 701 B.C. (*Banai-barḳa*). It is identified with modern *Ibn Ibrâq* about 5 miles E. of Jaffa.

BENEFACTOR.—Lk 22[25] only, 'those in authority over them (the Gentiles) are called benefactors.' The word is an exact translation of the Greek *Euergetēs*, a title of honour borne by two of the Greek kings of Egypt before Christ's day, Ptolemy III. (246–221 B.C.) and Ptolemy VII. (IX.) (145–116 B.C.). Hence RV spells with a capital, 'Benefactors'; but an explicit reference to the Ptolemies is questionable, and RSV uses lower case.

BENE-JAAKAN.—A station in the journeyings, Nu 33[31f]; called **Beeroth-bene-jaakan** (q.v.) in Dt 10[6].

BEN-GEBER.—One of Solomon's twelve commissariat officers, 1 K 4[13] (AV 'son of Geber').

BEN-HADAD.—The name of three kings of Syria in the 9th cent. B.C.

1. Benhadad I., the son of Tab-rimmon of Damascus. At the instance of Asa, king of Judah, he intervened against Baasha of Israel and took from him valuable territory on his northern border. For this service Benhadad received from Asa costly treasures from the Temple and the royal palace (1 K 15[17–20]).

2. Ben-hadad II. In the days of this Ben-hadad war with Israel was common, he being usually successful. But Ahab was more fortunate in the campaigns of 856

and 855 B.C., which were followed by a treaty of peace with concessions to Israel (1 K 20). Ben-hadad was the leader of a confederacy of western princes who successfully opposed the attempts of Shalmaneser II. of Assyria to conquer southern Syria; at the battle of Karkar in 854 B.C. he had Ahab as one of his chief allies. On the resumption of hostilities between Syria and Israel soon thereafter, Ben-hadad was victorious (1 K 22). He was assassinated by the usurper Hazael about 843 B.C. (2 K 8[15]). 1 K 20[34] states that this Ben-hadad was a son of the preceding one and should, therefore, be designated Ben-hadad II.; but some scholars believe that Ben-hadad I. was still alive at the time of the events just mentioned and that the second Ben-hadad came to the throne of Syria some years later.

3. Ben-hadad III., son of Hazael, probably the same as the Mari' of the Assyrian inscriptions. Under him Damascus lost his father's conquests in Palestine (2 K 13[24f]), and he also suffered heavily from the Assyrians.

J. F. McC.—J. Ma.

BEN-HAIL ('son of might').—A prince sent by Jehoshaphat to teach in the cities of Judah, 2 Ch 17[7].

BEN-HANAN ('son of a gracious one').—A Judahite, 1 Ch 4[20].

BEN-HESED ('son of kindness').—One of Solomon's twelve commissariat officers, who had charge of a district in Judah, 1 K 4[10] (AV 'son of Hesed').

BEN-HINNOM.—Found only in RSV in Jer 19[2, 6], where AV and RV have 'the son of Hinnom.' See HINNOM.

BEN-HUR.—One of Solomon's twelve commissariat officers, who had charge of a district of Ephraim, 1 K 4[8] (AV 'son of Hur').

BENINU.—One of those who sealed the covenant, Neh 10[13].

BENJAMIN.—1. The youngest son of Jacob by Rachel, and the only full brother of Joseph (Gn 30[22ff] [JE] 35[17] [J] 35[24] [P]). He alone of Jacob's sons was held to have been born in Palestine. J (Gn 35[16]) puts his birth near Ephrath in Benjamin. A later interpolation identifies Ephrath with Bethlehem, but cf 1 S 10[2]. P, however (Gn 35[22-26]), gives Paddan-Aram as the birth-place of all Jacob's children. His mother, dying soon after he was born, named him **Ben-oni** ('son of my sorrow'). Jacob changed this ill-omened name to the more auspicious one **Benjamin**, which is usually interpreted 'son of my right hand,' the right hand being the place of honour (cf Gn 48[14]). He was eventually taken down with Jacob's sons to Egypt for famine relief on the insistence of Joseph. Throughout the earlier documents Benjamin is a tender youth, the idol of his father and brothers. A late editor of P (Gn 46[21]) makes him, when he entered Egypt, the father of ten sons, that is more than twice as many as any of Jacob's other sons except Dan, who had seven.

What is the historical significance of these various traditions? It seems scarcely a coincidence that Benjamin ('son(s) of the right hand,' *i.e.* South) was the southernmost of the northern tribes in Palestine, and this would suggest that the name really originated after the settlement. The narrow wedge of stony hill-land between Judah and Ephraim suggests that Benjamin came last to Palestine, a fact which may be reflected in the tradition that he was the youngest son of Jacob, *i.e.* the last folk-element to be incorporated in the Israelite confederacy and that too in Palestine; hence the tradition that Benjamin was born in the land. Apart from the tradition that Benjamin was the brother of Joseph, there are certain facts which indicate that Benjamin was an offshoot of Joseph, *e.g.* Bethel, which was later reckoned in the territory of Benjamin (Jos 18[22]) is stated to have been taken by Joseph (Jg 1[22]), and the Benjamite Shimei claims to be 'of the house of Joseph' (1 S 19[20]). It has been suggested that Ben-oni may be connected with On or Ono, a locality near Lydda named in the account of the restoration of the Jews in Ezr 2[33], Neh 7[37], 1 Ch 8[12]. This locality, however, was beyond the district of Benjamin in pre-Exilic times, but it is not so far beyond it as to preclude the possibility that it may have been so named by some element related to the tribe of Benjamin.

The limits of the tribal territory are given in the late source in Jos 18[11-28]. Within it lay Bethel (elsewhere assigned to Ephraim), Ophrah, Geba, Gibeon, Ramah, Mizpah, Gibeah, of which Bethel and Gibeon were certainly primitive seats of Canaanite worship and important centres in the cultus of Israel (*e.g.* Bethel, Ai 7[10ff], Gibeon, 1 K 3[4]). Jericho, where in early times there may have been a cult of the moon-god (*yārēaḥ*), and Jerusalem are also assigned to Benjamin. Jerusalem, however, was neutral territory until taken under David and retained as a crown possession and capital of Judah. Dt 33[12] ('he will dwell between his (Benjamin's) shoulders') apparently refers to Yahweh's dwelling at Jerusalem, which is overlooked from the NE. and NW. by the heights of Benjamin, like the neck between the shoulders. Anathoth, the home of Jeremiah, also lay in Benjamin (Jos 21[18]). In the Blessing of Jacob (Gn 49[27]), which has the appearance of *vaticinium post eventum*, a fierce and warlike character is ascribed to Benjamin. The rugged and poor nature of the tribal territory doubtless conditioned the character of the Benjamites, so that Saul and his tribesmen, in a new military order, became a fitting striking-force against the Philistines. The tribe participated in the campaign against Sisera (Jg 5[14]). A late and composite story is found in Jg 19–21 of an almost complete annihilation of Benjamin by the rest of the tribes. It had in Asa's army, according to the exaggerated statement of 2 Ch 14[8], 280,000 picked warriors. This statement is significant confirmation of the martial character of Benjamin and is important as suggesting that the affinities of Benjamin soon after the disruption of the kingdom were with Judah. Benjamin, under Sheba, a kinsman of Saul, led in the revolt against David when the quarrel provoked by David's partisanship broke out between Judah and the northern tribes (2 S 20[1ff]). The tribe was naturally loyal to the house of Saul and violently opposed to David (cf 2 S 16[5] 20[2]). In the revolt against Rehoboam it joined with the northern tribes (1 K 12[20]). A variant account joins it with Judah (12[21ff]), but this is only a reflexion of later times. Jerusalem lay in the extreme north of the proper territory of Judah, it was imperative for the kings of Judah to extend their territory northwards, and so most of Benjamin was eventually incorporated in the southern Kingdom. The history of the tribe is unimportant after David. Besides Saul and Jeremiah, St. Paul also traced descent to this tribe (Ph 3[5]). See also TRIBES.

2. A great-grandson of Benjamin (1 Ch 7[10]). **3.** One of those who had married a foreign wife (Ezr 10[32]; probably also Neh 3[23] 12[34]).

J. A. C.—J. Gr.

BENJAMIN GATE.—See TEMPLE, **6** (*a*), and JERUSALEM (GATES OF).

BENO ('his son').—Apparently a proper name in 1 Ch 24[26f]; but the text reads strangely since Beno is said to be the 'sons' of Jaaziah. Hence it has been suggested that the passage should be rendered 'of Jaaziah *his son*, even the sons of Merari by Jaaziah *his son*' (*Oxf. Heb. Lex. s.v.*).

BENONI.—See BENJAMIN, **1.**

BEN-ZOHETH.—A Judahite, 1 Ch 4[20].

BEON.—A city mentioned in Nu 32[3]; see BAAL-MEON.

BEOR.—1. Father of Balaam, Nu 22[5] 24[3, 15]; mentioned also Nu 31[8], Dt 23[4], Jos 13[22] 24[9], Mic 6[5], 2 P 2[15] (AV, RVm **Bosor**). **2.** Father of Bela, king of Edom, Gn 36[32], 1 Ch 1[43].

BERA.—King of Sodom at the time of Chedorlaomer's invasion, Gn 14[2].

BERACAH ('blessing').—**1.** One of Saul's kinsmen who joined David at Ziklag, 1 Ch 12[3] (AV **Berachah**). **2.** A valley where Jehoshaphat gave thanks (2 Ch 20[26];

AV **Berachah**) for victory over the Ammonites, Moabites, and Edomites, who had marched from Engedi to Tekoa (vv.$^{2, 20}$); probably modern *Bereikût*, between Tekoa and Engedi.

BERACHAH.—The AV spelling of **Beracah** (q.v.).

BERACHIAH, 1 Ch 6^{39} (AV).—See BERECHIAH.

BERAIAH.—A Benjamite, 1 Ch 8^{21}.

BEREA (1 Mac 9^{4}).—See BEROEA, **3.**

BERECHIAH.—1. Father of Asaph (1 Ch 6^{39}, AV **Berachiah**). **2.** Son of Zerubbabel (1 Ch 3^{20}). **3.** Father of Meshullam, one of Nehemiah's chiefs (Neh 3$^{4, 30}$ 6^{13}). **4.** A Levite gatekeeper for the Ark in David's reign (1 Ch 15^{23}), probably the same as the Levite descended from Elkanah of the Netophathites (1 Ch 9^{16}). **5.** Father of the prophet Zechariah (Zec 1^{1}). **6.** An Ephraimite chief (2 Ch 28^{12}).

BERED.—1. An unknown place, mentioned only in Gn 16^{14} as an indication fixing the site of Beer-lahai-roi. **2.** Son of Ephraim, 1 Ch 7^{20}; called **Becher** (q.v.) in Nu 26^{35}.

BERENICE.—See BERNICE.

BERI.—An Asherite, son of Zophah, 1 Ch 7^{36}.

BERIAH.—1. Son of Asher, Gn 46^{17}, Nu 26$^{44f.}$, 1 Ch 7$^{30f.}$ The patronymic **Beriites** occurs in Nu 26^{44}. **2.** Son of Ephraim, begotten in the days of mourning occasioned by the death of Ephraim's four sons, who were killed by the men of Gath whilst cattle-raiding; hence the false etymology, *bᵉrāʿâh*, 'in affliction,' 1 Ch 7^{23}. **3.** A Benjamite of Aijalon, who with Shema put the Gittites to flight (cf **2**), 1 Ch 8$^{13, 16}$. **4.** A Levite, son of Shimei, 1 Ch 23$^{10f.}$

BERITES, 2 S 20^{14} (AV, RV).—See BICHRI.

BERNICE or **BERENICE.**—Sister of Agrippa II. (Ac 25$^{13, 23}$ 26^{30}), married to her uncle Herod, king of Chalcis.

BERODACH-BALADAN.—See MERODACH-BALADAN.

BEROEA.—1. A town in the district of Macedonia called Emathia. The earliest certain reference to it occurs in an inscription of the end of the 4th cent. B.C. After the battle of Pydna (168 B.C.) in which the Romans destroyed the Macedonian kingdom, it was the first city which surrendered to the Romans. In winter 49–48 B.C. it was the headquarters of Pompey's infantry. In St. Paul's time there was a Jewish community there to which he preached the gospel with success (Ac 17$^{10, 13}$ [Sopater, a native] 20^{4}). It was a populous city, and is in modern times called *Verria* by Greeks, *Karaferia* by Turks, and *Ber* by Slavs.

2. The place where Antiochus Eupator caused Menelaus, the ex-high priest, to be put to death (2 Mac 13^{4}). It is now the well-known *Ḥaleb* or *Aleppo*, with about 450,000 inhabitants.

3. Mentioned 1 Mac 9^{4} (**Berea**). Some MSS have Beērzath (cf Jos. *Ant.* XII. xi. 1 [422]), which suggests Birzaith. See BIRZAITH, **2.** A. So.—**E. G. K.**

BEROTH, 1 Es 5^{19} (AV, RV).—See BEEROTH. **Berothite** in 1 Ch 11^{39} (AV, RV) is for **Beerothite** (RSV 'of Beeroth'); cf 2 S 23^{37}.

BEROTHAH.—City named by Ezekiel as a limiting point in his ideal restoration of the Kingdom, Ezk 47^{16}. Ezekiel places it between Hamath and Damascus; possibly modern *Bereitân*.

BEROTHAI.—A city of Syria, despoiled by David, 2 S 8^{8}. In the parallel 1 Ch 18^{8} it is replaced by **Cun** (AV **Chun**). Possibly Berothai is identical with Berothah.

BERYL.—See JEWELS AND PRECIOUS STONES.

BERZELUS, 1 Es 5^{38} (AV).—See BARZILLAI, **1.**

BESAI.—Father of some Nethinim (q.v.) who returned with Zerubbabel, Ezr 2^{49}, Neh 7^{52}, 1 Es 5^{31} (AV **Bastai**, RV **Basthai**).

BESCASPASMYS, 1 Es 9^{31}.—See MATTANIAH, **6.**

BESODEIAH.—Father of Meshullam who took part in repairing the Old Gate, Neh 3^{6}.

BESOM.—Occurs only in Is 14^{23} (AV, RV) in figurative use, 'I will sweep it with the besom (RSV 'broom') of destruction.'

BESOR.—A torrent-valley, S. or SW. of Ziklag, 1 S 30$^{9f., 21}$; possibly modern *Wâdī Ghazzeh*.

BESTIALITY.—See CRIMES AND PUNISHMENTS, **3.**

BETAH.—Place mentioned only in 2 S 8^{8}. The parallel 1 Ch 18^{8} has **Tibhath** (q.v.).

BETANE, Jth 1^{9} (AV, RV).—A place apparently south of Jerusalem (RSV **Bethany**). It may be the same as **Beth-anoth.**

BETEN.—A town of Asher, near Achshaph, Jos 19^{25}. In the 4th cent. it was shown eight Roman miles E. of Ptolemais. It is possibly modern *Abṭûn*.

BETH.—The second letter of Hebrew alphabet, and so used to introduce the second part of Ps 119, every verse of which begins with this letter.

BETHABARA.—Mentioned once only, Jn 1^{28}, as the scene of John's baptism; the principal codices, followed by the RV and RSV, here read Bethany (q.v.). Perhaps Bethabara is to be connected with the Beth-barah of Jg 7^{24} (q.v.). Others would seek it at a ford named *ʿAbārah*, about twelve miles south of the outlet of the Sea of Galilee. R. A. S. M.—**E. G. K.**

BETH-ANATH.—A town of Naphtali, Jos 19^{38}, Jg 1^{33}; perhaps modern *el-Baʿneh*.

BETH-ANOTH.—A town in the hill country of Judah, near Gedor, Jos 15^{59}; possibly modern *Beit ʿAinûn*, N. of Hebron. See also BETANE.

BETHANY (Greek *Bethania*, probably Hebrew *Beth-aniah*, the second element a contracted form of the personal name Ananiah).—A village about 15 *stadia* (2910 yards or about 1⅝ mile) from Jerusalem (Jn 11^{18}) on the road from Jericho, close to Bethphage and on the Mount of Olives (Mk 11^{1}, Lk 19^{29}). It was the lodging-place of Jesus when in Jerusalem (Mk 11^{11}). Here lived Lazarus and Martha and Mary (Jn 11^{1}), and here He raised Lazarus from the dead (Jn 11). Here also He was entertained by Simon the leper, at the feast where the woman made her offering of ointment (Mt 26^{6}, Mk 14^{3}). From Bethany also took place the Ascension (Lk 24^{50}). In this case the topographical indications agree exceptionally with the constant tradition which fixes Bethany at the village of *el-ʿAzarîyeh*, on the SE. of the Mount of Olives beside the Jericho road. The tomb of Lazarus and the house of Martha and Mary are pointed out in the village, but of course without any historical authority. Traces of ancient occupation have been found at the village.

The Bethany that replaces Bethabara (q.v.) in the best manuscripts of Jn 1^{28} is only seemingly the same name. It may be from Aramaic *Beth-ʿenayyā* 'house of springs,' though no such town-name is reported from this area. See also BETANE. R. A. S. M.—E. G. K.

BETH-ARABAH.—A place in the Jericho plain, on the boundary between Judah and Benjamin, Jos 15$^{6, 61}$ 18^{18} (RSV; AV, RV 'against the Arabah)^{22}; possibly modern *ʿAin el-Gharabeh*, in the *Wâdī Qelt*.

BETH-ARAM, Jos 13^{17} (AV).—See BETH-HARAM.

BETH-ARBEL.—A place mentioned only in Hos 10^{14}, where it is said to have been destroyed 'in the day of battle' by Shalman (q.v.). It is probably modern *Irbid*, E. of the Jordan, in Gilead.

BETH-ASHBEA.—Found in 1 Ch 4^{21}; if a place name it is unknown, or if Ashbea is the name of a man (AV, RV 'house of Ashbea'), he is otherwise unknown.

BETH-ASMOTH.—A Benjamite town, 1 Es 5^{18}; called **Beth-azmaveth** in Neh 7^{28} and **Azmaveth** (q.v.) in Ezr 2^{24}, Neh 12^{29}.

BETH-AVEN ('house of iniquity').—A place close to Ai (Jos 7^{2}), by the wilderness (18^{12}), NW. of Michmash (1 S 13^{5}), and on the way to Aijalon (14^{23}), still inhabited in the 8th cent. B.C. (Hos 5^{8}). The 'calf of Beth-aven' (Hos 10^{5}) was probably that at **Bethel**, but Bethel is

distinguished from Beth-aven in Jos 7[2]. Bethel is probably meant by Beth-aven in Hos 4[15] 5[8] (cf Am 5[5]), and by **Aven** in Hos 10[8].

BETH-AZMAVETH.—A Benjamite town, Neh 7[28]; also called **Azmaveth** (q.v.).

BETH-BAAL-MEON.—A city mentioned in Jos 13[17]; see BAAL-MEON.

BETH-BARAH.—A place in the Jordan valley near the valley of Jezreel, Jg 7[24]. Its location is unknown.

BETHBASI (1 Mac 9[62, 64]).—Josephus reads Bethhoglah. The name has not been recovered.

BETH-BIREI, 1 Ch 4[31] (AV).—See BETH-BIRI.

BETH-BIRI.—A town of Simeon, 1 Ch 4[31] (AV **Beth-birei**). In the parallel list in Jos 19[6] it is replaced by **Beth-lebaoth.** Its site is unknown.

BETH-CAR ('house of a lamb').—A place mentioned as the terminus of the pursuit of the Philistines under Samuel's guidance, 1 S 7[11]. Its site is unknown, save that it must have been near Jerusalem, on the west.

BETH-DAGON ('house of Dagon').—**1.** A city of Judah, in the Shephelah, Jos 15[41]. It is possibly *Kh. Dajûn.* **2.** A border city of Asher, Jos 19[27]. It is mentioned by Sennacherib in the account of his campaign of 701 B.C. The site is unknown.

BETH-DIBLATHAIM ('house of two fig-cakes').—Moabite city, Jer 48[22]; probably identical with **Almon-diblathaim** (q.v.), a station in the journeyings, Nu 33[46f]; mentioned on the Moabite Stone.

BETH-EDEN.—A place or district connected politically with Damascus, Am 1[5] (AV, RV 'house of Eden'). Its situation is unknown. There is a *Bît Adini* mentioned in Assyrian inscriptions, but it is too far from Damascus to be suitable. See EDEN.

BETH-EKED.—A place at which Jehu, on his way from Jezreel to Samaria, met and slew the brethren of Ahaziah, king of Judah, 2 K 10[12, 14] (AV, RV **the shearing house**). It is perhaps modern *Beit Qâd,* near to *Jenîn.*

BETHEL.—1. Modern *Beitîn,* just E. of the Great North Road of Palestine (Jordan) about 12 miles from Jerusalem, a village of some 600 inhabitants. Four springs furnish good water, and in ancient times they were supplemented by a reservoir hewn in the rock, S. of the town. Originally named Luz, it was later known as Bethel, tradition referring this name specifically to the stone which Jacob set up and anointed as the symbol of God's presence after his theophany (Gn 28[22]). In Christian times this spot was located about a mile E. of *Beitîn,* and was the site of a church and monastery, remains of which are possibly those to be seen at *Burj Beitîn.* There were earlier religious associations. Abraham, according to Hebrew tradition, sacrificed here (Gn 12[8]). From an eminence to the E. almost the whole of the plains of Jericho is visible, and this may have been the scene of Lot's selfish choice (13).

Excavations at Bethel by Albright and Kelso established continuous occupation from *c* 2000 B.C. till Christian times. Bethel, a royal Canaanite city (Jos 12[16]), fell to Benjamin in the division of the land (18[22]), but he did not immediately succeed in making good his possession. It was finally taken by the men of Joseph (Jg 1[22], 1 Ch 7[28]). The above-mentioned excavations demonstrate that Bethel was destroyed at the end of the 14th or the beginning of the 13th cent. B.C., which is before the final phase of the Hebrew settlement, so older elements from the hill-country of Ephraim may have been responsible rather than the mass of the invaders. Hither the Ark was brought from Gilgal (Jg 20[18] LXX), and Bethel was a place of sacrifice in the time of Saul (1 S 10[3]). The prophetess Deborah lived in the vicinity of Bethel (Jg 4[5]). In judging Israel Samuel is said to have gone forth from year to year in circuit to Bethel (1 S 7[10]). No doubt the ancient sanctity of the place, as well as its location on the road southwards at the border of Israel and Judah led Jeroboam I. to choose Bethel as the site of a rival shrine to the Temple in Jerusalem (1 K 12[26f]), and it became the great sanctuary of the Northern Kingdom. The 'calf' of Jeroboam, though probably serving only as a pedestal for the presence of Yahweh, indicates an adaptation of the fertility-cult of the local Canaanite Baal, whose cult-animal was the bull. Elements of this local cult which retained undue prominence were apparently the reason for the violent denunciations of Amos (3[14] 4[4] 5[5] etc.) and Hosea (4[15] 5[8]). At Bethel Jeroboam was denounced by the man of God out of Judah (13[1ff]) and it was the scene of Amos' famous encounter with the priest Amaziah in his denunciation of the house of Jeroboam II. A guild of dervishes ('sons of the prophets') in sympathy with Elijah flourished there (2 K 2[2f]). After the fall of Samaria it was the seat of the priest who was sent by the king of Assyria to teach the mixed population of military colonists the worship of the God of the land (2 K 17[29f]). Bethel was reoccupied by the returning exiles (Ezr 2[28], 1 Es 5[21] [AV **Betolius,** RV **Betolion**]). In 161 B.C. it was taken by the Seleucid general Bacchides (1 Mac 9[50]) in his strategy of sealing off and keeping watch on Jerusalem, and in pursuance of the same policy it was taken by Vespasian before the fall of Jerusalem (Jos. *BJ* iv. ix. 9 [551]).

2. A town in the SE. of Judah, not identified, called in different places **Bethul** (Jos 19[4]), Bethel (1 S 30[27]), and **Bethuel** (1 Ch 4[30]). See also CHESIL.

W. E.—J. Gr.

BETH-EMEK ('house of the valley').—A town of Asher, apparently not far from Cabul, Jos 19[27]. It is possibly the modern *Tell Mîmâs.*

BETHER.—A city belonging to Judah, mentioned in Jos 15[59] in LXX, but not in the Hebrew. It is the modern *Bittîr,* SW. of Jerusalem. This place was celebrated for the resistance to the Romans during the revolt of Bar Cochba in A.D. 135. In Ca 2[17] there is a reference to the 'mountains of Bether' in AV, RV; but the meaning is doubtful. RVm suggests that the spice **malobathron** (q.v.) is meant (cf Ca 4[6]) or else 'mountains of separation,' while RSV renders 'rugged mountains.' The word *bether* means 'cleaving.'

BETHESDA (RSV Bethzatha).—A pool mentioned in Jn 5[2]. The latter name is no doubt derived from that of the new suburb north of the city, which Josephus calls Bezatha. The meaning of the name is not certain. It could be Aramaic *Bē-zaitā* 'Olive place' or *beza'tā* 'section.' The reading Bethesda probably is from Aramaic *Beth-ḥisdā* 'house of mercy,' and may be a name given the pool by Christians owing to the incident of Jn 5. Some MSS contain information about the periodic disturbance of the water referred to in v.[7] and the popular explanation of this phenomenon. The RSV has relegated this material to the margin. The Virgin's Fountain (ancient Gihon), which sent its water to the pool of Siloam, is still intermittent, but whether the same thing was true of a reservoir in the north is doubtful. That item could suggest transfer of the story. The localization of Bethesda by the Sheep-gate necessitates seeking it north of the city. Two pools between and around which ran porticoes have been located and painstakingly explored by Schick, Vincent, and Van der Vliet. As they are in the proper area they probably represent ancient Bethesda. E. G. K.

BETH-EZEL.—A place mentioned only in Mic 1[11] along with Shaphir and Zaanan. It is perhaps modern *Deir el-'Aṣal,* SW. of Hebron. Some have supposed it was identical with **Azel** (q.v.).

BETH-GADER.—A place mentioned with Bethlehem and Kiriath-jearim in 1 Ch 2[51]. Its site is unknown. Some have thought it to be identical with **Geder** or **Gedor, 1** (qq.v.).

BETH-GAMUL.—A place in Moab, mentioned with Dibon, Nebo, and Kiriathaim, Jer 48[23]. It is modern *Kh. Jumeil,* E. of Dibon.

BETH-GILGAL.—A place mentioned in Neh 12[29] (AV 'house of Gilgal'); perhaps identical with **Gilgal, 1.**

BETH-HACCEREM.—The AV spelling of **Beth-haccherem** (q.v.).

BETH-HACCHEREM (' place of the vineyard ').—A city of Judah, mentioned with Tekoa, Jer 6[1]. It was the chief town of a district, Neh 3[14]. It appears to have had a commanding position for a beacon or ensign (Jer 6[1]). It is perhaps identical with **Karem** (q.v.).

BETH-HAGGAN (' place of the garden ').—A place mentioned only in 2 K 9[27] (AV, RV ' the garden house '). It is possibly the same as **En-gannim, 2** (q.v.).

BETH-HARAM.—A city of Gad, in the Jordan valley, Jos 13[27] (AV **Beth-aram**) ; called **Beth-haran** in Nu 32[36]. It was rebuilt and fortified by Herod Antipas when he became tetrarch, and in honour of the Roman empress was called Livias or Libias. Merrill (*East of the Jordan*, p. 383) gives reasons for believing that it was in the palace here that Herod celebrated his birthday by the feast recorded (Mt 14[6-12], Mk 6[21-28]), and that the Baptist's head was brought hither from Machaerus, some 20 miles south. It is identified with *Tell Iktanû*, E. of *Tell er-Râmeh*.

BETH-HARAN.—See Beth-Haram.

BETH-HOGLA, Jos 15[6] (AV).—See Beth-hoglah.

BETH-HOGLAH (' place of the partridge ').—A city of Benjamin, Jos 18[21], on the border between Judah and Benjamin (15[6] (AV **Beth-hogla**) 18[19]). It is the modern *ʿAin Ḥajlah*, SE. of Jericho.

BETH-HORON.—The upper and nether, two towns represented by the villages *Beit ʿÛr el-fôqā* and *Beit ʿÛr et-taḥta*. The nether Beth-horon is the larger and more important site, with remains going back to the Late Bronze Age. Their position, as commanding the ancient high-road from the maritime plain into the heart of the mountains of Benjamin, made these places of great importance, and several celebrated battles occurred in their neighbourhood. Here Joshua defeated the Canaanites (Jos 10[10-14]). Solomon fortified both these cities (2 Ch 8[5], 1 K 9[17]). Here Judas Maccabaeus defeated the Syrian general Seron (1 Mac 3[13-24]) and five years afterwards Nicanor (7[39-50]) ; more than 200 years later the Jews at the same place beat back a Roman force under Cestius Gallus. In few places in Palestine can we with greater precision set history in its geographical setting ; the whole ancient road, with abundant traces of Roman work, can be followed throughout, and the two *Beit ʿÛrs*, less than two miles apart, stand sentinel above the road as the two Beth-horons did in ancient times. The Beth-horons were on the frontier between Benjamin and Ephraim (Jos 16[3-5] and 18[13f]). They belonged to the latter (Jos 21[22]), and followed the Northern Kingdom. Post-exilic resettlement of the place is reflected in 1 Ch 7[24]. Possibly Sanballat the Horonite (Neh 2[10]) was from here.

E. W. G. M.—E. G. K.

BETH-JESHIMOTH (' place of the desert ').—The S. limit of the encampment on ' the plains of Moab ' at the close of the journeyings, Nu 33[49] (AV **Beth-jesimoth**). In Jos 12[3] it is said to be in the S. of the Arabah, towards the Dead Sea. In 13[20] it is assigned to Reuben, but later, in Ezk 25[9] it is mentioned as belonging to Moab. Eusebius places it 10 miles S. of Jericho. It is probably modern *Tell el-ʿAzeimeh*.

BETH-JESIMOTH, Nu 33[49] (AV).—See Beth-Jeshimoth.

BETH-LE-APHRAH.—A town apparently in Philistine territory, whose site is unknown, Mic 1[10] (AV ' house of Aphrah '). In the words ' in Beth-le-aphrah roll yourselves in the dust ' there is a double play upon words, *ʿaphrāh* containing a punning allusion to *ʿāphār* (dust), and *hithpallāshî* (roll yourself) to *Pᵉlishtî* (Philistine).

BETH-LEBAOTH (' house of lionesses ').—A town of Simeon, near Sharuhen, Jos 19[6]. In the parallel list in 1 Ch 4[31] its place is taken by **Beth-biri** (AV **Beth-birei**). It is probably identical with **Lebaoth,** Jos 15[32]. Its site is unknown.

BETHLEHEM.—The name of two places in Palestine.

1. Bethlehem of Judah, now represented by the town of *Beit Laḥm*, 5 miles S. of Jerusalem. On the way thither Rachel was buried according to post-exilic Jewish belief, as expressed in the glosses in Gn 35[19] 48[7]. However the Ephrath referred to there originally meant a place N. of Jerusalem. But Ephrath(ah) was also the name of the district in which Bethlehem lay. From Bethlehem came the Levite whose adventures are related in Jg 17. It was the home of Elimelech, the father-in-law of Ruth (Ru 1[1]), and here Ruth settled and became the ancestress of the family of David, whose connexion with Bethlehem is emphasized throughout his history (1 S 16[1-18] 17[12] 20[6] etc). The Philistines had here a garrison during David's outlawry (2 S 23[14], 1 Ch 11[16]). Here Asahel was buried (2 S 2[32]), and hence came Elhanan, one of the mighty men (2 S 23[24], cf 21[19]). Rehoboam fortified it (2 Ch 11[6]), and here (Jer 41[17]) the Egypt-bound fugitives who took Jeremiah along with them tarried. Its area (Ephrath) was potentially one where the Ark might have been kept (Ps 132[6]). The birth of the Messiah there is prophesied in Mic 5[2] (quoted Mt 2[6], Jn 7[42]), a prophecy fulfilled by the birth of Christ (Mt 2[1, 5], Lk 2[4, 15]). Here Herod sent to seek the new-born Christ, and not finding Him ordered the massacre of the infants of the city (Mt 2[8, 16]). The modern town, containing about 20,000 inhabitants, is Christian and comparatively prosperous. Within it stands the basilica of the Nativity, founded by Constantine (about 330), and restored by Justinian (about 550) and many later emperors. Within it is shown the grotto of the Nativity. The antiquity of the tradition makes this a venerable place, though there is no way of knowing what information led Constantine's advisers to seek the birth-place of Jesus there.

2. Bethlehem of Zebulun, a place named but once (Jos 19[15]), in enumerating the towns of that tribe. It is identified with *Beit Laḥm*, 7 miles NW. of Nazareth. It was the home of Ibzan, the judge (Jg 12[8-10]).

R. A. S. M.—E. G. K.

BETH-LOMON, 1 Es 5[17] (AV, RV).—For **Bethlehem, 1** (so RSV).

BETH-MAACAH.—A descriptive epithet of Abel (2 S 20[14]), where we should read with RSV ' Abel of Beth-maacah ' instead of AV ' Abel *and* B,' which the Hebrew has (cf v.[15]). In 1 K 15[20], 2 K 15[29] AV, RV, and RSV have Abel-beth-m. See Abel (of) Beth-Maacah.

BETH-MAACHAH.—The AV spelling of **Beth Maacah** (q.v.).

BETH-MARCABOTH (' place of chariots ').—A city of Simeon in the southern plains, near Ziklag, Jos 19[5], 1 Ch 4[31]. Its site is unknown. See Madmannah.

BETH-MEON.—A city mentioned in Jer 48[23] ; see Baal-Meon.

BETH-MERHAK.—A place mentioned only in RV in 2 S 15[17]. It is improbable that it is a place-name at all. AV translates ' a place that was afar off ' and RSV ' the last house.'

BETH-MILLO.—1. A place near Shechem, mentioned only in Jg 9[6, 20] (AV, RV ' the house of Millo '). The site is unknown. See Millo. **2.** An unknown place, apparently in Judah, mentioned only in 2 K 12[20] (so AVm ; AV, RV, RSV ' the house of Millo '). See Millo.

BETH-NIMRAH (' place of the leopard ').—A town E. of the Jordan in the territory of Gad, Jos 13[27], Nu 32[36]. It is called **Nimrah** in Nu 32[3], and some think it is identical with **Nimrim** (q.v.) in Is 15[6]. It is the modern *Tell el-Bileibil*, near *Tell Nimrîn*.

BETH-PALET, Jos 15[27] (AV).—See Beth-Pelet.

BETH-PAZZEZ.—A town of Issachar near En-gannim and En-haddah, Jos 19[21] The site is unknown.

BETH-PELET.—A town of Judah, S. of Beersheba, Jos 15[27] (AV **Beth-palet**), Neh 11[26] (AV **Beth-phelet**). The gentilic **Paltite** is found in 2 S 23[26] (cf 1 Ch 11[27], where the same person is called a **Pelonite**). The site is unknown.

BETH-PEOR.—A city belonging to Reuben, Jos 13[20]; the Israelites encamped opposite to it (Dt 3[29] 4[46]), and Moses was buried there (Dt 34[6]). It is perhaps to be identified with **Baal-peor** (q.v.), and with modern *Khirbet esh-Sheikh-Jâyil*.

BETHPHAGE (Heb. *Bêth-pâghê*).—Hardly 'house of figs,' but rather 'house of the country districts' (Lat. *pagi*). Here Jesus, coming from Jericho, sent His disciples to fetch the ass (Mt 21[1], Mk 11[1], Lk 19[29]). It is mentioned in the Rabbinic sources as the easternmost point in Jerusalem's territory. It must have lain E. of the summit of the Mount of Olives proper (*eṭ-Ṭur*) and N. of Bethany. Jesus coming from the latter place would have crossed the summit via Bethphage. To-day *Abū Dīs*. R. A. S. M.—E. G. K.

BETH-PHELET, Neh 11[26] (AV).—See BETH-PELET.

BETH-RAPHA ('house of the giant'?).—A Judahite, or an else unknown place belonging to the tribe, 1 Ch 4[12].

BETH-REHOB.—An Aramaean district near Laish (Jg 18[28]), whose inhabitants joined the Ammonites against David (2 S 10[6]); called **Rehob** in 10[8]. Probably Rehob in Nu 13[21], which marked the limit of the journey of the spies, is the same place. Its site is unknown.

BETHSAIDA.—A place on the shore of the Sea of Galilee, whither Jesus went after feeding the five thousand (Mk 6[45], cf Lk 9[10]), and where He healed a blind man (Mk 8[22]); the home of Philip, Andrew, and Peter (Jn 1[44] 12[21]). Along with Chorazin (q.v.) it was denounced for its failure to respond to the gospel (Mt 11[21], Lk 10[13]). The town was advanced by Philip the tetrarch to the dignity of a city, and named Julias, in honour of Caesar's daughter. The situation is disputed, and, indeed, authorities differ as to whether or not there were two places of the same name, one E., one W. of the Jordan. However, it seems probable that the old fishing village lay on the shore at *Khirbet al-'Araj*, E. of the mouth of the Jordan, and that Julias was built further inland. The mound of *et-Tell*, also E. of the Jordan, must mark the site. R. A. S. M.—E. G. K.

BETH-SHEAN, BETH-SHAN.—The site of this ancient stronghold, allotted to Manasseh, although in the territory of Issachar (Jos 17[11ff], Jg 1[27]), is marked by the great mound of *Tell el-Ḥuṣn* ('Mound of the Fortress') by the former Arab village of *Beisân* (Israeli *Bethshan*) where the Valley of Jezreel narrows and dips to the Jordan Valley. Bethshan never seems to have been integrated into the life of Israel. Here the Philistines hung the bodies of Saul and his sons on the wall after the battle of Gilboa (1 S 31[7ff]). Excavations have shown that the site was occupied from long before 3000 B.C. to the Arab period. In the period of Egyptian domination from the 15th to the 13th cent. there were several temples under Egyptian patronage to local deities, including Mekal ('Consumer'), or Reshef the god of pestilence, Anat, the sister of the fertility-god Baal, and doubtless Baal himself. There is evidence that the place was occupied by the 'Sea-peoples,' including the Philistines, probably as mercenaries of Egypt, though in the time of Saul they may have been occupying Bethshan on their own account. It was incorporated with other Canaanite towns into the realm of Solomon in the fiscal district of Baanah (1 K 4[12]), but plays no part in the history of Israel. During the Greek period it was known as Scythopolis and also as Nyssa, but the ancient name reappeared in the Arab period as *Beisân*, the name of the adjacent Arab village. After changes of fortune in the struggles of the Hasmonaeans and in the succeeding period, it attained considerable prosperity as a member of the Decapolis (1 Mac 12[40], Jos. *Ant.* XIV. v. 3 [88], *BJ* III. ix. 7 [446], etc), a federation of free cities interested in trade, of which Bethshan was the only member W. of the Jordan. There must always have been a strong admixture of heathen inhabitants (Jos. *Vita* 6 [26]; *Abodah Zarah* i. 4). W. E.—J. Gr.

BETH-SHEMESH ('house' or 'temple of the sun').—**1.** A town in Judah (Jos 15[10] etc., called **Ir-Shemesh** in Jos 19[41]) allotted to the children of Aaron (Jos 21[16]). Hither the Ark was brought when sent back by the Philistines, and the inhabitants were smitten for their profane curiosity (1 S 6). Here Amaziah was defeated and captured by Jehoash, king of Israel (2 K 14[11, 13]). It was one of the cities of Judah taken by the Philistines in time of Ahaz (2 Ch 28[18]). The name is preserved in *'Ain Shems*, a Byzantine site on the S. slope of the *Wâdī eṣ-Ṣarâr* (Vale of Sorek), 15 miles W. of Jerusalem, the Hebrew site being *Tell er-Rumeileh*, slightly further W. Excavations by Mackenzie and later by Fisher and Grant show occupation from before 3000 till its destruction by Nebuchadrezzar. Casemate walls of the early Iron Age probably indicate David's fortification of the place as a frontier post against the Philistines. **2.** A city in Issachar (Jos 19[22]) not certainly identified, but possibly at *'Ain esh-Shemsîyeh*, 7 miles S. of Bethshan. **3.** A city in Naphtali (Jos 19[38], Jg 1[33]), mentioned with certain localities in Upper Galilee. The site has so far not been identified, but Abel suggests that it may be located at *Ḥāris* in this locality, SW. of *Tibnîn*. *Ḥeres* in Hebrew is a synonym of *shemesh* ('sun'). **4.** A city in Egypt, a seat of heathen idolatry (Jer 43[13]), identified with the ancient Heliopolis, locally called once *'Ain Shems*. E. W.—J. Gr.

BETH-SHITTAH ('place of the acacia').—A place mentioned in Jg 7[22]. It was in the neighbourhood of Abel-meholah; possibly *Shaṭṭah*, N. of Beth-shan.

BETHSURA.—See BETH-ZUR.

BETHSURON, 2 Mac 11[5] (RV).—See BETH-ZUR.

BETH-TAPPUAH ('place of apples').—A town of Judah in the Hebron mountains, Jos 15[53] (see TAPPUAH, 1); modern *Taffûḥ*, W. of Hebron.

BETH-TOGARMAH.—A place which traded with Tyre in horses and mules, Ezk 27[14] 38[6] (AV, RV 'house of **Togarmah**'). See TOGARMAH.

BETHUEL.—1. The son of Nahor and Milcah, nephew of Abraham, and father of Laban and Rebekah (Gn 22[23] 24[15, 24, 47, 50] 25[20] 28[2, 5]). In Gn 28[5] (P) he is called 'Bethuel the Aramaean.' **2.** A place in Judah, mentioned in 1 Ch 4[30]; called **Bethul** in Jos 19[4]. See BETHEL, **2.**

BETHUL.—See BETHEL, **2.**

BETHULIA.—The place besieged by Holofernes in the Book of Judith (Jth 4[6f] etc.). The form of the name follows the Vulg.; LXX has *Betuloua* or *Baitouloua*. The name suggests Bethel, but this does not fit the topography. The old notion that it was a cryptic name for Jerusalem is impossible (that city being named in the story), and Shechem does not fit either. The topographical indications would best suit some point in the vicinity of the villages of *Jeba'*, *Fendaqūmiyeh*, and *Sīlet eḍ-Ḍahr*, between the city of Samaria and the plain of Esdraelon. The corruption of the names by Greek copyists and the fictitious nature of the book as such make the search for Bethulia and Betomastaim (q.v.) rather useless. E. G. K.

BETH-ZACHARIAS, 1 Mac 6[32f] (RV).—See BETH-ZECHARIAH.

BETH-ZAITH.—An unknown site, apparently near Jerusalem, 1 Mac 7[19] (AV, RV **Bezeth**).

BETH-ZATHA.—See BETHESDA.

BETH-ZECHARIAH (1 Mac 6[32, 33]).—A village on the mountain pass, S. of Jerusalem and W. of Bethlehem (AV **Bathzacharias,** RV **Bethzacharias**), now the ruin *Beit Sakaria*. It was the scene of the defeat of Judas Maccabaeus by Lysias.

BETH-ZUR ('house of rock').—A town of Judah in the Hebron mountains, Jos 15[58] (cf 1 Ch 2[45]). It was fortified by Rehoboam (2 Ch 11[7]), and still important

after the Captivity (Neh 3[16]). (According to LXX[B] David sent spoils from Ziklag to Beth-zur, 1 S 30[27], but the Hebrew followed by EV, has Bethel.) In the Maccabaean period it was an important strategic position, and it is frequently mentioned in 1 and 2 Mac (AV, RV **Bethsura**; in 2 Mac 11[5] RV has **Bethsuron**). Here Judas Maccabaeus defeated the Greeks under Lysias in 165 B.C., 1 Mac 4[29]. It is the modern *Kh. eṭ-Ṭubeiqah.*

BETOLION, 1 Es 5[21] (RV).—See BETHEL, **1.**

BETOLIUS, 1 Es 5[21] (AV).—See BETHEL, **1.**

BETOMASTHAIM (Jth 15[4], AV **Betomasthem**); **Betomesthaim** (4[6], AV **Betomestham**).—Apparently N. of Bethulia (q.v.), and facing Dothan.

BETONIM.—A town of Gad, mentioned Jos 13[26]; modern *Kh. Baṭneh.*

BETROTHING.—See MARRIAGE.

BEULAH ('married' [of a wife]).—An allegorical name applied to Israel in Trito-Isaiah, Is 62[4]. She was no longer to be a wife deserted by God, as she had been during the Captivity, but married (1) to God, (2) by a strange application of the figure, to her own sons (v.[5]).

BEWITCH.—See MAGIC.

BEWRAY.—To bewray (from Anglo-Saxon prefix *be* and *wregan,* to accuse) is not the same as to betray (from *be* and Latin *tradere* to deliver). To bewray, now obsolete, means in AV and RV to make known, reveal, as Mt 26[73] 'thy speech bewrayeth thee.' Adams (*Works,* ii. 328) distinguishes the two words thus: 'he . . . will not bewray his disease, lest he betray his credit.' Sometimes, however, bewray is used in an evil sense, and is scarcely distinguishable from betray. RSV uses 'betray' and 'betrays.' Cf **bewrayer** in 2 Mac 4[1] AV 'a bewrayer of the money, and of his country'; RSV 'who had informed about the money against his own country.'

BEZAANANNIM, Jos 19[33] (RVm).—See ZAANANNIM.

BEZAI.—1. One of those who sealed the covenant, Neh 10[18]. **2.** The eponym of a family that returned with Zerubbabel, Ezr 2[17], Neh 7[23], 1 Es 5[16] (AV **Bassa,** RV **Bassai**).

BEZALEL.—1. The chief architect of the Tabernacle. The name occurs only in P and in the Book of Chronicles (1 Ch 2[20], 2 Ch 1[5]). It signifies 'in the shadow (*i.e.* under the protection) of El.' According to P's representation, Bezalel was expressly called by Y" (Ex 31[2]) to superintend the erection of the 'tent of meeting' and the Ark of the testimony (v.[7]), and endowed with the special gifts required for the proper execution of his task (vv.[3, 5]). He was also charged with the construction of the furniture for court and Tabernacle, as well as with the preparation of the priestly garments, and of the necessary oil and incense. Among the gifts thus bestowed upon him, not the least was the gift of teaching the arts of which he was himself a master, to his subordinates (Ex 35[34]), the chief of whom was Oholiab (Ex 31[6] 35[34] etc.). **2.** One of the sons of Pahath-moab who had married foreign wives (Ezr 10[30]); called **Besthel** in 1 Est 9[31].

A. R. S. K.

BEZEK.—Two places of this name are to be distinguished in the OT. **1.** Jg 1[5], a place attacked by Judah after Joshua's death, possibly *Bezqā,* 4 miles NE. of Gezer, though this was in the foothills of Ephraim. **12.** S 11[8], where Saul gathered Israel before advancing on Jabesh-Gilead. The most probable location is the ruined site of *Ibzîq,* 12 miles NE. of *Nâblus,* opposite Jabesh-Gilead. This is the site identified in the *Onostmaicon* 17 Roman miles from Neapolis (*Nâblus*) on the hill-road to Bethshan (Scythopolis). J. Gr.

BEZER ('fortress').—**1.** An Asherite (1 Ch 7[37]). **2.** A city of Reuben, allotted as a city of refuge, situated 'in the wilderness on the tableland' (Dt 4[43], Jos 20[8]). It was a Levitical city assigned to the Merarites (Jos 21[36], whence 1 Ch 6[78]). Mesha mentions it on the Moabite Stone (see MOAB) as being in ruins in his day, and as having been rebuilt by him, after his revolt from Israel and the expulsion of the Israelites from the territory N. of the Arnon. From its being described as 'in the wilderness' it may be inferred that it lay towards the E. border of the Moabite tableland. Its site is unknown. It is possible that it is identical with **Bozrah, 2** (q.v.).

BEZETH, 1 Mac 7[19] (AV, RV).—See BETH-ZAITH.

BIATAS, 1 Es 9[48] (AV).—See PELAIAH, **2.**

BIBLE.—1. The Name.—The word 'Bible' strictly employed is the title of the Jewish and Christian Scriptures, though occasionally by a loose usage of the term it is applied to the sacred writings of pagan religions. It is derived from a Greek word *Biblia*—originating in *biblos* (*byblos*), the inner bark of the papyrus plant (whence our word paper)—literally meaning 'Little Books'; but since the diminutive had come into common use in late popular Greek apart from its specific signification, the term really means simply 'books.' It is the Greek translation of the Hebrew word for 'books,' which is the oldest designation for the Jewish Scriptures as a collection (see Dn 9[2]). The title 'Holy Books'—equivalent to our 'Holy Scripture'—came later among the Jews (1 Mac 12[9], Ro 1[2], 2 Ti 3[15]). The Greek word *Biblia* is first met with in this connexion in the introduction to Sirach, written in 132 B.C. by the grandson of Sirach, the phrase 'the rest of the books' implying that the Law and the Prophets previously named, as well as those books subsequently known specially as 'the Writings,' are included. It is used in the Hebrew sense, for the OT, by the unknown author of the Christian homily in the 2nd cent. designated *The Second Epistle of Clement* (xiv. 2). It does not appear as a title of the whole Christian Scriptures before the 5th cent., when it was thus employed by Greek Church writers in lists of the canonical books. Thence it passed over into the West, and then the Greek word *Biblia,* really a neuter plural, came to be treated as a Latin singular noun, a significant grammatical change that pointed to the growing sense of the unity of Scripture. The word cannot be traced in Anglo-Saxon literature, and we first have the English form of it in the 14th cent. It occurs in *Piers Plowman* and Chaucer. Its adoption by Wycliffe secured it as the permanent English name for the Scriptures, as Luther's use of the corresponding German word fixed that for Continental Protestants.

2. Contents and Divisions.—The Jewish Bible is the OT; the Protestant Christian Bible consists of the OT and the NT, but with the Apocrypha included in some editions; the Roman Catholic Bible contains the OT and NT, and also the Apocrypha, the latter authoritatively treated as Scripture since the Council of Trent in 1546. The main division is between the Jewish Scriptures and those which are exclusively Christian. These are known respectively as the OT and the NT. The title 'Testament' is unfortunate, since it really means a will. It is derived from the Latin word *testamentum,* 'a will,' which is the translation of the Greek word *diathēkē,* itself in the classics also meaning 'a will.' But the LXX employs this Greek word as the translation of the Hebrew *berîth,* a word meaning 'covenant.' Therefore 'testament' in the Biblical sense really means 'covenant,' and the two parts of our Bible are the 'Old Covenant' and the 'New Covenant.' When we ask why the Greek translators used the word meaning 'will' while they had ready to hand another word meaning 'covenant' (viz. *synthēkē*), the answer has been proposed that they perceived the essential difference between God's covenants with men and men's covenants one with another. The latter are arranged on equal terms. But God's covenants are made and offered by God and accepted by men only on God's terms. A Divine covenant is like a will in which a man disposes of his property on whatever terms he thinks fit. On the other hand, however, it may be observed that the word *diathēkē* is also used for a covenant between man and man (*e.g.* Dt 7[2]). The origin of this term as applied by Christians to the two main divisions of Scripture is Jeremiah's promise of a New Covenant (Jer 31[31]), endorsed by Christ (Mk 14[24], 1 Co 11[25]), and enlarged upon in NT teaching (*e.g.* Gal 4[24], He 8[6]).

Here, however, the reference is to the Divine arrangements and pledges, not to the books of Scripture, and it is by a secondary usage that the books containing the two covenants have come to be themselves designated Testaments, or Covenants.

The Jewish division of the OT is into three parts known as (1) the Law, (2) the Prophets, and (3) the Writings, or the Sacred Writings (*Hagiographa*). The 'Law' consisted of the first five books of our Bible (Genesis, Exodus, Leviticus, Numbers, Deuteronomy), ascribed to Moses; and it was treated as peculiarly sacred, the most holy and authoritative portion of Scripture. It was the only part of the Hebrew Scriptures accepted by the Samaritans, who worshipped the very document containing it almost as a fetish. But the name 'Law' (Heb. *Tôrāh*, Gr. *Nomos*) is sometimes given to the whole Jewish Bible (*e.g.* Jn 10^{34}). The 'Prophets' (*Nᵉbhî'îm*) included not only the utterances ascribed to inspired teachers of Israel, but also the chief historical books later than the Pentateuch. There were reckoned to be 8 books of the Prophets (*Nᵉbhî'îm*), divided into the 'Former' or earlier (Joshua, Judges, Samuel, Kings) and the 'Latter' or later (Isaiah, Jeremiah, Ezekiel, the Twelve Minor Prophets). Usage by the Chronicler (*c* 250 B.C.) and the reference in Sirach (132 B.C.) would indicate the acceptance of this collection as Scripture sometime within that period. The Hagiographa (*Kᵉthûbhîm*) were the poetical books (Psalms, Proverbs, Job), the 5 *Mᵉghillôth* ('rolls') which came to be associated with various festivals (Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther), and 3 late, narrative books (Daniel, Ezra-Nehemiah, Chronicles). This total group of 11 writings did not find complete acceptance until near the end of the 1st cent. A.D. Thus there were in all 24 books by Jewish reckoning. Josephus, however, counted 22 (the number of letters in the Hebrew alphabet), probably joining Ruth to Judges and Lamentations to Jeremiah, and in this he was followed by a few Christian fathers, *e.g.* Origen and Jerome. Our total of 39 books comes from counting the Minor Prophets individually and following a division of Samuel, Kings, Ezra-Nehemiah, and Chronicles into two books each in accordance with the usage of the Greek OT or Septuagint (LXX) and the Latin Vulgate.

The books now known as the Apocrypha were not in the Hebrew Bible, and were not used in the Palestinian synagogues. They were found in the LXX, which represents the enlarged Greek Canon of Alexandria. From this they passed into the Latin versions, and so into Jerome's revision, the Vulgate, which in time became the authorized Bible of the Roman Catholic Church. They were not accepted by the Protestants as Divinely inspired, but were printed in some Protestant Bibles between the OT and the NT, not in their old places in the Septuagint and Vulgate versions, where they were interspersed with the OT books as though forming part of the OT itself. The Apocrypha consists of 15 books or writings (1 and 2 Esdras, Tobit, Judith, Additions to Esther, The Wisdom of Solomon, Ecclesiasticus or the Wisdom of Jesus the Son of Sirach, Baruch, The Letter of Jeremiah, The Prayer of Azariah and the Song of the Three Young Men, Susanna, Bel and the Dragon, The Prayer of Manasseh, 1 and 2 Maccabees. But certain books, notably 2 Esdras (not found in Greek) and The Prayer of Manasseh, are sometimes excluded; and in early MSS other books like 3 and 4 Maccabees are sometimes added. See APOCRYPHA; ENGLISH VERSIONS.

The NT like the OT was a collection of collections and was also gradually formed, although over a much briefer period of time. The Four Gospels, originally of local origin and use, were collected early in the 2nd cent. and were being used as Scripture by the middle of the century, as is witnessed by Justin Martyr (who called them 'The Memoirs of the Apostles') and by Tatian's use of them interwoven into a continuous narrative, the *Diatessaron*. Towards the end of the century a collection of St. Paul's letters was also being so used. This apparently consisted of an original gathering of 10 letters made a century earlier, augmented by the 3 'Pastoral' epistles and by Hebrews, which, though anonymous and only slowly admitted in the West, had come to circulate with the Pauline corpus. The Acts of the Apostles, separated from its companion volume, Luke, was attached to the epistles, and to this group the seven so-called 'general' or 'catholic' epistles were added as time went on, local variation continuing here well into the 4th and 5th cents. Thus there came to be two volumes known as 'The Gospel' and 'The Apostle,' corresponding respectively in primacy of honour to the Law and the Prophets among the Jews. The Apocalypse of John, early accepted only in the West, usually stood by itself in the manuscript period, or even circulated with non-canonical books. Thus the collection was formed which we know, consisting of 27 books, viz. Four Gospels, Acts, 13 Epistles of Paul, Hebrews, James, 2 Epistles of St. Peter, 3 of St. John, Jude, Revelation. See CANON.

Within the books of the Bible there were originally no divisions, except in the case of the Psalms, which were always indicated as separate poems, and elsewhere in the case of definite statements of differences of contents, such as the Song of Miriam, the Song of Deborah, 'the words of Agur,' and 'the words of King Lemuel' (in Proverbs). A division of the Pentateuch into sense units (each a *pārāshāh*) was probably made soon after its canonization, and was later introduced into the Prophets. It is found in the Qumrân scroll of Isaiah. A somewhat different division into sections was devised for convenience of reading in the synagogue. These in Palestine were known as the *sēdher* in the Torah (Babylonian, *pārāshāh*), and in both schools as the *haphtārāh* in the Prophets. The present chapter division, however, was taken over eventually from Christian usage (see below). Verse division marks appeared somewhat later, but are presupposed in the Talmudic prescriptions regarding liturgical use of the Scriptures. Babylonian and Palestinian systems differed, a standardization being first achieved by ben Asher in the 10th cent. Our modern usage, however, was devised by Rabbi Nathan in the 15th cent., first being printed in 1524, and coming into Christian usage also through Pagninus' Latin Bible of 1528. The first indications of divisions in the NT are marginal insertions ascribed to Tatian in the 2nd cent. A system of paragraphs was early developed for the Gospels and known as 'Titles' (*Titloi*), after the descriptive headings to each section, or as 'Chapters' (*Kephalaia*). Eusebius devised a large number of sections as the basis for a 'harmony' of the Gospels, which he presented in the form of tables and marginal numbers. Because this was supposedly based on an earlier division by Ammonius of Alexandria in the early 3rd cent., they were known as the 'Ammonian sections.' In Matthew there were 68 'titles' and 355 'sections,' in Mark, 48 and 233 (later 241), in Luke, 83 and 342, and in John, 18 and 232 respectively. A system of divisions found only in codices Vaticanus and Zacynthius is carried through Acts and the Epistles in Vaticanus to where this breaks off in Hebrews. Otherwise in the Apostolos there came into general use a division into chapters (*kephalaia*) ascribed to Euthalius of Alexandria (5th cent.), which correspond in length to the Gospel 'titles.' Thus there were 40 in Acts, 19 in Romans, 10 in 1 Corinthians, etc. In Acts and Paul another system, called 'lessons' (*anagnōseis* or *anagnōsmata*), also came into use and is ascribed to Euthalius. In the late 5th cent. Archbishop Andreas of Cappadocian Caesarea divided the Apocalypse into 72 *kephalaia*.

A still smaller division of the books of Scripture was that of the *stichoi*, or lines, a word used for a line of poetry, and then for a similar length of prose, marked off for the payment of copyists. Subsequently it was employed for the piece of writing which a reader was supposed to render without taking breath, and the marks of the *stichoi* would be helps for the reader, indicating where he might pause. In Matthew there were 2560 *stichoi*; the same Gospel has 1071 modern

verses. Scrivener calculates 19,241 *stichoi* for the 7959 modern verses of the whole NT—giving an average of nearly 2½ *stichoi* per verse. Cardinal Hugo de Sancto Caro is credited with having made our present chapter divisions about A.D. 1248 when preparing a Bible index. But it may be that he borrowed these divisions from an earlier scholar, possibly Lanfranc or Stephen Langton, archbishops of Canterbury in the early 11th and early 12th cent. respectively. Henry Stephens states that his father Robert Stephens made verse divisions in the NT during the intervals of a journey on horseback from Paris to Lyons. Whether he actually invented these arrangements or copied them from some predecessor, they were first published in Stephens' Greek Testament of 1551.

3. Historical Origin.—The Bible is not only a library, the books of which come from various writers in different periods of time; many of these books may be said to be composed of successive literary strata, so that the authors of the most ancient parts of them belong to much earlier times than their final redactors. All the OT writers, and also all those of the NT with one exception (St. Luke), were Jews. The OT was nearly all written in the Holy Land; the only exceptions being in the case of books composed in the valley of the Euphrates during the Exile (Ezekiel, possibly Lamentations, Deutero-Isaiah, or part of it, perhaps some of the Psalms, a revision of the Law). The NT books were written in many places; most of the Epistles of St. Paul can be located; the Gospel and Epistles of St. John probably come from Ephesus or its neighbourhood, St. Mark from Rome, and St. Matthew from Antioch or its vicinity; but the place of origin of the other books is doubtful.

Probably the oldest book of the Bible is Amos, written about 750 B.C. A little later in the great 8th cent. we come to Hosea, Isaiah, and Micah. The 7th cent. gives us Nahum, Zephaniah, Jeremiah, and Habakkuk among the prophets, also Deuteronomy, and at the beginning of this century we have the earliest complete historical books, Samuel and Judges. The end of this century or beginning of the 6th cent. gives us Kings. In the 6th cent. also we have Obadiah (?), Ezekiel, part, if not all, of Deutero-Isaiah (40–55). Haggai, Zechariah (1–8), and most of Lamentations. The 5th cent. gives us the completed Pentateuch—or rather the Hexateuch, Joshua going with the five books of the Law—perhaps part of Deutero-Isaiah (56–66), Malachi, Books 1 and 2 of the Psalter, and Ruth. The 4th cent. has Proverbs, Job, Book 3 of the Psalter, and the prophets Joel and Jonah. From the 3rd cent. we have Chronicles, Ezra and Nehemiah, Zechariah (9–14), Ecclesiastes, and the Song of Songs. Lastly, the 2nd cent. is credited with Esther, Daniel, and Books 4 and 5 of the Psalter. Several of these dates are conjectural and refer, unless otherwise noted, to the substantial completion of the works. But since many are composite in nature they may contain elements which are much earlier or much later than the periods indicated. When we look to the analysis of the books, and inquire as to the dates of their constituent parts, we are carried back to pre-literary ages.

A long period of oral transmission of traditions and narratives which assumed relatively fixed forms preceded written documents. The earliest writings probably consisted of ballads, such as the Song of Deborah (*c* 1200 B.C.), law codes such as are reflected in parts of the Book of the Covenant in Ex 20–23, and epic narratives such as the Joseph saga in Genesis. The law code of the Babylonian king Hammurabi, a thousand years earlier than Moses, shows points of striking similarity to the Mosaic code. As time went on other kinds of tradition (oracular, proverbial, prophetic, liturgical, annalistic, historical, etc.) were no doubt at least in part reduced to writing. But, with few exceptions, there is no general agreement regarding documentary sources immediately related to our OT books until we come to the so-called Graf-Wellhausen theory concerning the Hexateuch. This posits four basic sources or strands of writing known as J (the Yahwistic prophetic narrative, *c* 850 B.C.), E (the Elohistic prophetic narrative, *c* 750 B.C.), D (Deuteronomy and Deuteronomic notes elsewhere (*c* 600 B.C.), and P (the Priestly Code, represented especially in Leviticus and in reformulations elsewhere, *c* 400 B.C.). J and E, often difficult to distinguish, were supposedly combined *c* 700 B.C., and the Deuteronomic and Priestly addition and revision followed. In this theory, still widely held, there have been various proposed modifications in terms of subdivision of the proposed sources, additional written and oral traditions, and further revision. See PENTATEUCH.

Aside from the more primitive sources of the Hexateuch, the earliest of the prophetic writings (8th cent. B.C.) were the first complete books actually to exist essentially as we have them. But even here there is evidence of a process of combination of various sources, oral and written, and of editorial work carried on over a number of years and sometimes centuries. Similar developments are clear among the Hagiographa, notably in the Psalter and Proverbs. See OLD TESTAMENT and articles on the books of the Bible.

There is much less range of question for the dates of the NT books. The earliest date possible for any of them is A.D. 44 for James, but its canonical history and other factors make a 2nd-cent. origin more likely. Our earliest books are then the Pauline letters, beginnning probably with 1 Thessalonians (*c* A.D. 50) and ending with the imprisonment epistles (*c* A.D. 62). The latest Book is 2 Peter, which must be assigned to the middle of the 2nd cent. With the probable exception of the Pastorals as we have them, which with Jude appear to belong to the 2nd cent., all of the remaining books were possibly written before the end of the first. As in the case of certain OT books, a process of development is discernible in several of the compositions, especially in the Gospels and the early chapters of Acts. Oral tradition in the form of brief recollections of the acts and teachings of Jesus preceded written documents (see FORM CRITICISM). Then appeared such written accounts as the Passion narrative and those more extensive compilations of materials which served as the immediate sources of our Gospels (q.v.). The oral Gospel coloured all of this, and itself received documentary representation in the speeches of Acts. Thus we have a period of about 100 years for the composition of the NT writings, most of them coming in the second half of the 1st cent. A.D. See articles on the individual books.

4. Original Languages.—The bulk of the OT was written in Hebrew, and without vowel points. Hebrew is the Israelite dialect of the Canaanite language, which belongs to the Semitic family, and is closely allied to Aramaic. Some portions of the OT (viz. documents in Ezr 4^{7}–6^{18} and 7^{12}–^{26}, Dn 2^{4}–7^{28} and a few scattered words and phrases elsewhere) are in Aramaic, the language of Syria, which was widely known, being found in Babylonia, Egypt, and Arabia. After the Exile, since Aramaic then became the everyday language of the Jews, Hebrew was relegated to a position of honourable neglect as the language of literature and the Law, and Aramaic came into general use. Certain of the sources, oral and written, used by our Gospels were doubtless in this language. When Papias says that Matthew wrote 'the oracles of the Lord in the Hebrew dialect,' he would seem to mean Aramaic. Since Jesus taught in Aramaic, it is likely that His discourses were preserved in oral and perhaps written collections in their original form before being translated into Greek. But, however far we may go in detecting Aramaic writings beneath and behind our Gospels, it cannot be held that any of these Gospels, or any other NT books, are translations from that language. Matthew, the most Jewish of the Gospels, contains quotations from the LXX as well as direct translations from the Hebrew OT, which shows that while its author—or at all events the author of one of its sources—knew Hebrew, the Gospel itself was a

Greek composition. The NT documents, as we have them, appear to have been written originally in Greek for a Greek-reading public. It was long held that this Greek was a peculiar dialect, but the discovery of contemporary inscriptions and papyri shows that the colloquial Greek, used in commerce and popular intercourse all round the Mediterranean during the 1st cent., has the same peculiar forms that we meet with in the NT, many of which had been attributed to Semitic influences. It must still be admitted that a certain amount of Hebrew influence is felt in the NT style. This is most apparent in the Gospels, especially Matthew and above all the earlier chapters of Luke (except the Preface), and also in the Apocalypse. An overuse of possible but uncommon Greek locutions corresponding to Semitic idiom explains much of what we find. The influence of LXX phraseology, especially in Luke, was also important. A style of Greek more like the classical is found in the Preface to Luke, Hebrews, James, 1 Peter, and the latter half of Acts. St. Paul's writings and the other books occupy an intermediate position. The Fourth Gospel is written in good Greek; but the structure of the sentences indicates a mind accustomed to think in Hebrew or Aramaic. Nevertheless, in spite of these differences, it remains true that the grammar and style of the NT are in the main those of contemporary Greek throughout the Roman Empire, *i.e.* the *Koine* or common dialect.

5. Translations.—The OT was first translated into Greek, for the benefit of Jews residing in Egypt, in the version known as the Septuagint (LXX), which was begun under Ptolemy II. (285–247 B.C.), and almost, if not quite, completed before the commencement of the Christian era. Another Greek version is ascribed to Aquila, who is said to have been a disciple of the famous Rabbi Akiba. This version, commonly dated about A.D. 130, was remarkable for its pedantic literalness, and was popular for a long time among Jews. On the other hand, about the end of the 2nd cent. A.D., Symmachus, who, according to Epiphanius, was a Samaritan turned Jew, although Eusebius calls him an Ebionite, produced a version the aim of which was to render the original text into idiomatic Greek of good style, with the result, however, that in some places it became a paraphrase rather than a translation. Lastly may be mentioned the version of Theodotion, variously identified as a Jewish proselyte or as an Ebionite. This is really a revision of the LXX to bring it closer to the Hebrew text, and was made about A.D. 185. It was popular with the Christians, and in Daniel replaced the LXX version. While only fragments of Aquila and Symmachus remain, Theodotion's Daniel has survived to this day. Other versions, known from Origen and others as *Quinta*, *Sexta*, and *Septima*, are little more than names to us, especially the last.

Oral paraphrases, the Targums ('interpretations,' 'translations'), were made in Aramaic for the benefit of Palestinian Jews when Hebrew was no longer understood. Tradition carries this back to the time of Ezra (Neh 8^8). Our earliest written Targums are associated with the rabbinic schools of Jerusalem and Babylonia and date from the 2nd to 7th cent. A.D. While the official Babylonian Targum to the Pentateuch (Babli) attributed to Onkelos (Aquila?) is generally regarded as the earliest of these, a Palestinian form, extant in recensions known as Pseudo-Jonathan or the Jerusalem Targum, and the Old Palestinian Targum, contains a large element of earlier interpretative materials, some of which have been traced back as far as the 2nd cent. B.C. These were largely purged from the official version to bring it close to the Hebrew text. The Prophetic Targum survives mainly in the official form, ascribed also to Jonathan, a pupil of Hillel, and representing as we have it a Babylonian revision of the 4th or 5th cent. A.D. A fragmentary Palestinian form of later date is also extant. The Targums to the Hagiographa are likewise mostly later in date in their present forms. See TARGUMS.

Of the other early translations of the OT, the Syriac and Latin were made apparently from the Hebrew. The former, which may be as early as the 1st cent. A.D., was subject to various revisions, in some of which the influence of the LXX is clear, until the text was more or less standardized in the 5th-cent. Peshitta revision attributed to Rabbula, bishop of Edessa. A Latin translation appeared first in North Africa in the 2nd cent., where Latin was commonly used at a time when Greek was still the language of Christian literature at Rome. This version, in both OT and NT, is reflected in Tertullian, Cyprian, and others of the period. Soon new translations were made also in Italy, the end result being a confusion of texts which induced Damasus, bishop of Rome, to commit to Jerome (A.D. 382) the task of preparing a reliable Latin version of the Bible. This came to be known as the Vulgate, *i.e.* common version. For it served as the Bible of the western church for 1000 years, and, since the Council of Trent it has been honoured as an officially correct rendering of the Scriptures. The other versions, Gothic, Armenian, Georgian, Coptic, Ethiopic, Slavonic, Arabic, which range in date from the 4th to the 10th cent., generally depend in their earliest forms upon the Greek text. See TEXT CRITICISM and TEXT, VERSIONS, AND LANGUAGES OF THE OT.

The oldest Versions of the NT are the Syriac and the Latin, both of which may be traced back in some form to the 2nd cent. A.D. Representing the Syriac of this period we have two fragmentary versions of the Gospels discovered in the 19th cent., viz. the Curetonian, edited by Cureton in 1858, and the Sinaitic, found in the monastery of St. Catherine on Mount Sinai in 1892. The MSS themselves, however, are probably both from the 5th cent. A distinct though somewhat related text made in the 2nd cent. is Tatian's *Diatessaron*, which was used in eastern churches down to the 5th cent. but now survives only in translation. Revision and standardization of text resulted in the definitive form known as the Peshitta ('simple') version, which became dominant in the 5th cent. Finally we may mention the literalistic Harclean version of the early 7th cent., representing a revision by Thomas of Harkel (Heraclea) of a 6th cent. Jacobite translation, and the so-called Palestinian Syriac of the 6th cent., found mainly in lectionaries and extant in the Gospels and in parts of other books. The story of the Latin NT is like that of the OT recounted above. However, we know more about the various types of Old Latin texts and can reconstruct a complete version, whereas in the OT, including the Apocrypha, fewer than a dozen books are completely extant. In Egypt the NT was early translated into Coptic, and it appeared in several dialects of that language. Chief of these were the Sahidic of upper Egypt, originating in the 3rd cent. or earlier, and the Bohairic of lower Egypt, somewhat later in date. The latter, in which alone the NT is completely extant, became the dominant form and has been used ecclesiastically by the Copts down to modern times. Several books and a large number of fragments are also found in three or four dialects of the areas about Akhmim and the Fayyum. A Gothic version was made by Ulfilas in the 4th cent. This survives mainly in fragmentary Gospels, and is also the earliest extant literary product in a Teutonic language. The 5th cent. saw the production of Armenian, Georgian, and Ethiopic translations; and subsequently there appeared Slavonic (9th cent.), Arabic (10th cent.), and, fragmentarily at first, the early vernacular versions of modern Europe. The Reformation period, from Wycliffe onwards saw complete editions of the last; and the 19th and 20th cents., under the stimulus of biblical scholarship, the missionary enterprise and the work of Bible societies, have made the Scriptures available, in whole or in part, in well over a thousand languages and dialects. See also TEXT OF THE NT; ENGLISH VERSIONS.

W. F. A.—A. P. W.

BIBLICAL THEOLOGY.—Biblical Theology arose among German Protestant theologians after 1650 in

opposition against the *Theologia Dogmatica* which used biblical utterances merely as *dicta probantia* (proving sayings) for the Lutheran or the Reformed system. It has three main presuppositions:

1. Biblical Theology describes the *history* of the religious ideas and institutions in both Testaments by reconstructing the individual forms of faith and piety set forth by the various speakers and writers. The 'theology' of Amos or Jeremiah is not the same as that of the eschatological Book of Daniel nor as that of Jesus or Paul. Consequently Biblical Theology demonstrates the differences between the OT and the NT; within the OT, *e.g.* those existing between the older sagas in the Pentateuch and the 'ethical monotheism' of the prophets; within the NT those between Jesus Himself and the gospels (especially John) or between the Judaistic and the Hellenistic tendencies. These individual forms were arranged according to the generally assumed line of human development from the simpler to the more complicated. The rich and strictly regulated Israelite cult in the work of the Priestly Code in Exodus, Leviticus, and Numbers, or the Christology of Ephesians and Colossians had to be the latest stages in their respective fields.

2. This development of the biblical ideas and institutions is an indissoluble part of the *history of religion* in the old oriental and the Hellenistic world. The first chapters of Genesis cannot be separated from the Babylonian epics of the creation and the flood (*Enuma Elish*, *Gilgamesh*). Behind the faith of the NT lies the Judaism of the intertestamental period, which differs from the OT especially in the most important field of apocalyptic eschatology. The Christology was influenced not only by the messianic hopes of the OT but also by the expectation of a *Sōter* ('saviour') in Hellenism, and the term 'Son of Man' not only by Dn 7. Perhaps there were Persian influences at work upon the dualistic tendencies in Judaism and in the NT (as also in the Qumrân texts), or upon the belief in a personal immortality. Myth being one of the forms most often used to express religious ideas and facts in antiquity, the problem arose of 'demythologizing' the faith of the NT, *e.g.* the eschatology, or the belief in the Resurrection of Christ, in order to make it easier for the 'modern' man to grasp the meaning of the main contents of the Bible.

3. But side by side with the differences between the Biblical writers and the similarities with foreign religions, there is an *inner unity* in the faith of both Testaments which is independent of their religious environment: the belief in words and actions of the One living God in history, fulfilling the promises he gave to Abraham and to David by liberating Israel from Egypt, by giving to the people of his election and covenant the land of Canaan as their homeland, and by sending Christ as His 'Servant' and Messiah. Both Testaments confess the holiness of this God who punishes evildoers and transgressors of His commandments, from the expulsion of the first couple from the Garden of God until the Last Judgment, but also forgiving sins where He finds repentance and sacrifice—in the NT the sacrifice of Christ for the salvation of mankind according to the will of His Father. In both Testaments the main content of God's commandments is the right attitude towards one's brother, including servants and foreigners, in accordance with His 'Love' for His people—a view inherited by the Christian community.

4. At present Biblical Theology manifests a strong effort (sometimes at the expense of sound historical interpretation) to demonstrate that this inner unity is not only the result of human development but is also the truth about God as revealed in the words of the prophets, in Jesus' sayings and deeds, and in the apostolic preaching under the guiding influence of the Holy Spirit. J. H.

BICHRI.—Father of Sheba, a Benjamite, 2 S $20^{1ff.}$ In 2 S 20^{14} where MT has **Berites** (so AV, RV), we should probably read the patronymic **Bichrites** (so RSV), which the sense demands. Some support for this reading is offered by LXX.

BIDKAR.—An officer of Ahab and afterwards of Jehu, who cast the body of King Joram on the plot of ground that belonged to Naboth, 2 K 9^{25}.

BIER.—See Mourning Customs.

BIGTHA.—One of the seven eunuch chamberlains of Ahasuerus, Est 1^{10}.

BIGTHAN (Est 2^{21}) or **BIGTHANA** (Est 6^{2}).—One of the eunuchs of Ahasuerus who plotted with Teresh against the king's life. The plot was exposed by Mordecai.

BIGVAI.—1. A companion of Zerubbabel, Ezr 2^{2}, Neh 7^{7}; cf Ezr 2^{14} 8^{14}, Neh 7^{19}, 1 Es 5^{14} (AV, RV **Bagoi**) 8^{40} (AV, RV **Bago**). **2.** A signatory to the covenant, Neh 10^{16}. **3.** See Nahamani. **4.** See Eneneus.

BILDAD.—See Job.

BILEAM.—A Levitical city of Manasseh, 1 Ch 6^{70}. In the parallel Jos 21^{25} **Gath-rimmon** stands instead of Bileam, perhaps by a scribal error (cf v.^{24}). Bileam is called **Ibleam** (q.v.) in Jos 17^{11}, Jg 1^{27}, 2 K 9^{27}.

BILGAH ('cheerfulness').—Head of the 15th course of priests in the time of David, 1 Ch 24^{11}. **2.** A priest who returned with Zerubbabel, Neh $12^{5, 18}$.

BILGAI.—A priest who sealed the covenant, Neh 10^{8}.

BILHAH.—1. A slave-girl given to Rachel by Laban (Gn 29^{29}), and by her to Jacob as a concubine (Gn $30^{3f.}$); mother of Dan and Naphtali (Gn 30^{5-8} 35^{25} $46^{24f.}$, 1 Ch 7^{13}). She was guilty of incest with Reuben (Gn 35^{22}). These narratives and genealogies probably embody early traditions as to the origin and mutual relations of the tribes. Tribes are traced to a concubine ancestress, because they were a late accession to Israel. It should be noted, however, that the custom for a childless wife to provide her husband with a slave concubine is reflected in marriage contracts from Nuzi in the 2nd millennium B.C. **2.** A city of Simeon, 1 Ch 4^{29}; called **Balah** in Jos 19^{3}, and **Baalah** in Jos 15^{29}, where it is assigned to Judah (see Baalah, 2).

BILHAN.—1. A Horite chief, the son of Ezer, Gn 36^{27}, 1 Ch 1^{42}. **2.** A Benjamite, son of Jediael, and father of seven sons who were heads of houses in their tribe, 1 Ch 7^{10}.

BILL.—1. In the parable of the Unjust Steward (Lk $16^{6f.}$ AV, RSV) 'bill' (RV **bond**) renders the Greek *grammata*, the equivalent of the contemporary Hebrew legal term *shᵉṭār* (literally 'writing'), an acknowledgment of goods or money received written and signed by the debtor himself (*Baba bathra* x. 8). Edersheim's statement (*Life and Times of Jesus*, ii. 272) that the Greek word was adopted into Hebrew is based on a false reading. See, further, Debt. **2.** Bill of divorce; see Marriage.

BILSHAN.—A companion of Zerubbabel, Ezr 2^{2}, Neh 7^{7}, 1 Es 5^{8} (AV, RV **Beelsarus**).

BIMHAL ('son of circumcision').—An Asherite, 1 Ch 7^{33}.

BINDING AND LOOSING.—See Keys, Power of the.

BINEA.—A descendant of Jonathan, 1 Ch 8^{37} 9^{43}.

BINNUI ('buildings').—**1.** Head of a family that returned with Zerubbabel, Neh 7^{15}; called **Bani** (q.v.) in Ezr 2^{10}. **2.** A Levite, Ezr 8^{33}, 1 Es 8^{63} (AV **Saban**, RV **Sabannus**), Neh 10^{9} (called **Bani**, q.v., in Neh 8^{7}; **Anniuth**, q.v., in 1 Es 9^{48}; **Bunni**, q.v., in Neh 9^{4}) 12^{8}. **3.** A son of Pahath-moab, Ezr 10^{30} (called **Belnuus**, q.v., in 1 Es 9^{31}). **4.** One whose sons had married foreign wives, Ezr 10^{38}, 1 Es 9^{34} (AV, RV **Bannus**). **5.** The son of Henadad, who repaired part of the wall, Neh 3^{24} (called **Bavvai** in v.^{18}). There appears to be much confusion amongst these names.

BIRD.—1. In OT: (1) *'ôph*, translated 'birds' or 'fowl,' usually joined with 'of heaven' or 'of the air': see Gn $1^{21, 30}$, Lv 17^{13}, 2 S 21^{10}, Jer 4^{25}, Ezk $31^{6, 13}$;

(2) *'ayit*, usually translated 'fowls' (AV) and 'birds of prey' (RV, RSV): Gn 15^{11}, Job 28^{7}, Is 18^{6}, Ezk 39^{4}; (3) *sippôr* (Arab. *'uṣfûr*), small birds like sparrows which twitter: Gn 7^{14}, Lv 14^{6}, Ps 84^{3} etc.; (4) *ba'al kānāph*, 'possessor of a wing,' Pr 1^{17}. **2.** In NT: (1) *peteina*, Mt 13^{4}, Lk 13^{19} etc. (2) *ornea*, 'birds of prey,' Rev 18^{2} $19^{17, 21}$.

Birds abound in Palestine, and evidently did so in ancient times. They were sympathetically watched and studied; we read, for example, of their migrations (Jer 8^{7} etc.), their care of their young (Dt 32^{11}, Mt 23^{37} etc.), the helplessness of their young (Pr 27^{8}, Is 16^{2} etc.), their nesting (Ps $104^{12, 17}$); indeed, every phase of bird life is touched upon. There are many references to the snares of the fowler (see SNARES). Birds are divided into clean and unclean. In some cases they were allowed as sacrificial offerings (Lv 1^{14-17} 14^{4-53}). It is a curious thing that the duck is not apparently (unless, as some think, in 1 K 4^{23}, under the 'fatted fowl'—*barbūrîm 'abhûsîm*; KB, however, identifies here with a species of cuckoo) mentioned in the OT, although a beautifully modelled clay duck of an early period, certainly earlier than the OT records, was found during excavations in Gezer. All birds mentioned by name in the Bible are dealt with in separate articles. E. W. G. M.

BIRSHA ('ugly').—King of Gomorrah at the time of Chedorlaomer's invasion, Gn 14^{2}.

BIRTH.—See CHILD, CLEAN AND UNCLEAN, **1.**

BIRTHDAY.—Birthday celebrations are mentioned only in connexion with royalty, viz. Pharaoh's birthday (Gn 40^{20}), the monthly celebration of that of Antiochus Epiphanes (2 Mac 6^{7}), and the birthday feast given by Herod Antipas (Mt 14^{6}, Mk 6^{21}). The 'day of our king,' to which Hosea refers (7^{5}), may have been the anniversary either of the King's birth or of his accession. In Job 1^{4} the feasts in the houses of Job's sons 'each on his day' probably means every seventh day, and not once a year in each house. Some authorities (*e.g.* Edersheim, *Life and Times of Jesus*, i. 672) regard Herod's feast as celebrating the anniversary of his accession—a view based on a mistaken exegesis of the Talmudic passage *Abodah zarah* 1^{3} (see the full discussion in Schürer, *GJV*^{3} i. 438–441). A. R. S. K.

BIRTHRIGHT.—See FIRSTBORN.

BIRZAITH.—**1.** A 'son' of Asher, 1 Ch 7^{31} (AV **Birzavith**). Possibly a town of Asher is indicated. **2.** According to Josephus the village where Judas Maccabaeus pitched his last camp (*Ant.* XII. xi. 1 [422]); modern *Bîr ez-Zeit*, about 15 miles N. of Jerusalem.

BIRZAVITH, 1 Ch 7^{31} (AV).—See BIRZAITH, **1.**

BISHLAM.—An officer of Artaxerxes in Palestine at the time of the return from captivity under Zerubbabel, Ezr 4^{7}, 1 Est 2^{16} (AV, RV **Belemus**). The word '*bishlām*' could be rendered 'in peace' and is so rendered by LXX in Ezr 4^{7}, and since Bishlam is not mentioned later in the chapter, it has been held that instead of 'Bishlam, Mithredath,' we should read 'with the approval of Mithredath.'

BISHOP (Gr. *episkopos*, Lat. *episcopus*, Ital. *vescovo*, Fr. *évêque*, Germ. *Bischof*), **ELDER** (Gr. *presbyteros*, Lat. *presbyterus*, Fr. *prêtre*, Eng. *priest*).—The two words are so closely connected in the NT that they must be taken together here.

1. The terms.—The Greek word for 'bishop' is common in the general sense of an *overseer*, and in particular of sundry municipal officers. In LXX it is used in Is 60^{17} of taskmasters, in Neh 11^{19} of minor officials, and in 1 Mac 1^{51} of the commissioners of Antiochus who enforced idolatry. But, so far as we can see, it was not the common name for the treasurers of private associations.

In the NT the word is found five times. In Ac 20^{28} St. Paul reminds the elders of Ephesus that the Holy Spirit has made them bishops over the flock; in Ph 1^{1} he sends a greeting to the saints at Philippi 'with the bishops and deacons'; in 1 Ti 3^{2} he tells Timothy that 'a bishop must be above reproach,' etc.; in Tit 1^{7} he gives a similar charge to Titus. (1 P 2^{25} 'the shepherd and bishop of your souls' is in RSV 'the Shepherd and Guardian,' Gr. *episkopon*.)

In the OT the word 'elder' is used from early times of an official class having jurisdiction both civil and religious, so that when synagogues were built, the elders of the city would naturally be the elders of the synagogue, with the right of regulating the services and excluding offenders.

In NT times the idea would be carried over to the churches. The first clear trace of Christian elders is at Jerusalem. In Ac 11^{30} (A.D. 44) they receive the offerings from Barnabas and Saul; in 15^{6} (A.D. 50) they take part in the Conference; in 21^{18} (A.D. 58) they join in the welcome to St. Paul. To the post-apostolic period belong Ja 5^{14}, where the word seems to denote officials, the Pastoral Epistles and 1 Peter.

It has been often maintained that bishops and elders in the NT and for some time later were substantially identical. For (1) bishops and elders are never joined like bishops and deacons, as distinct classes of officials. (2) Ph 1^{1} is addressed 'to bishops and deacons.' So 1 Ti 3 ignores the elders, though (5^{17}) there were elders at Ephesus, and had been (Ac 20^{17}) for some time. Conversely, Tit 1^{5-7} describes elders instead, and nearly in the same words. (3) The bishop described to Timothy, the elders of Ac 20, those of 1 Ti 5^{17}, those described to Titus, and those of 1 P 5^{2}, all seem to hold a subordinate position, and to have pastoral duties rather than what we should call episcopal. (4) The same persons are called elders and bishops (Ac $20^{17, 28}$). The words may be also synonymous in Clement of Rome. Ignatius is the first writer who makes a single bishop ruler of a Church. But he pleads no Apostolic command for this position.

It may be, however, that bishops (and possibly deacons) were elders who exercised specific functions of oversight and service with respect to the churches' worship and charity. Thus not every elder would be a bishop, *i.e.* an appointed overseer, but every bishop would be counted among the number of elders and be associated with them in the general government of the local churches. In communities with more than one congregation, there might have been a bishop acting as overseer in each congregation. How the monarchical episcopate developed, as represented in Ignatius, is nowhere discussed in extant sources. But it is generally believed to have come about through the need of centralizing authority to meet the crises of heresy within and persecution without the Church.

2. Appointment.—At first popular election and Apostolic institution seem to have gone together. The Seven (Ac $6^{5, 6}$) are chosen by the people and instituted by the Apostles with prayer and laying-on of hands. In the case of the Lycaonian elders (Ac 14^{23}) the Apostles 'appointed' them with prayer and fastings. Similarly the elders in Crete (Tit 1^{5}) are 'appointed' by Titus, and apparently the bishops at Ephesus by Timothy. In these cases popular election and laying-on of hands are not mentioned; but neither are they excluded. 1 Ti 5^{22} does not refer to ordination at all, nor He 6^{2} to ordination only. The one is of the laying-on of hands in restoring offenders, while the other takes in all occasions of laying-on hands. But in any case Timothy and Titus would have to approve the candidate before instituting him, so that the description of his qualifications is no proof that they had to select him in the first instance. Conversely, popular election is very prominent (Clement, and *Didache*) in the next age; but neither does this exclude formal approval and institution. The elders are already attached (1 Ti 4^{14}) to the Apostles in the conveyance of special gifts; and when the Apostles died out, they might act alone in the institution to local office. The development of an episcopate is a further question, and very much a question of words if the bishop (in the later sense) was gradually developed upward from the elders. But the next stage after this was that, while the bishop

instituted his own elders, he was himself instituted by the neighbouring bishops, or in still later times by the bishops of the civil province or by a metropolitan. The outline of the process is always the same. First popular election, then formal approval by authority and institution by prayer, with (at least commonly) its symbolic accompaniments of laying-on of hands and fasting.

3. **Duties.**—(1) *General superintendence*: Elders in Ac 20[28], 1 Ti 5[17], 1 P 5[2, 3] (ruling badly); bishops in 1 Ti 3[5]. Indicated *possibly* in 1 Co 12[28] 'helpers, administrators': more distinctly in Eph 4[11] 'pastors and teachers,' in pointed contrast to 'apostles, prophets, and evangelists,' whose office was not local. So 1 Th 5[12] 'those who are over you,' Ro 12[8] 'he who gives aid,' and He 13[7, 17, 24] 'your leaders,' remind us of the bishops and elders who rule (1 Ti 3[4] 5[17]). So, too, the 'rulers' in Clement must be bishops or elders, for these bishops plainly have no earthly superior, so that they must be themselves the rulers.

Under this head we may place the share taken by the elders: (*a*) at Jerusalem (Ac 15[6]) in the deliberations of the Apostolic Conference, and (Ac 21[18]) in the reception held by James; (*b*) elsewhere (1 Ti 4[14]) in the laying-on of hands on Timothy, whether that corresponds to ordination or to something else.

(2) *Teaching*: 1 Th 5[12] rulers admonishing in the Lord; 1 Ti 3[2] the bishop apt to teach; 5[17] double honour to the elders who rule well, especially those who toil in word and teaching; Tit 1[9] the elder or bishop must be able to teach, and to convince the gainsayers. Yet 1 Ti 5[17] seems to imply that elders might rule well who toiled in other duties than word and teaching; and if so, these were not the sole work of all elders.

Preaching is rather connected with the non-local ministry of apostles, prophets, and evangelists; but in their absence the whole function of public worship would devolve on the local ministry of bishops and deacons. This becomes quite plain in the *Didache* and in Clement.

(3) *Pastoral care*: This is conspicuous everywhere. To it we may also refer: (*a*) visiting of the sick (Ja 5[14]) with a view to anointing and cure—not as a *viaticum* at the approach of death; (*b*) care of strangers and *a fortiori* of the poor (1 Ti 3[2], Tit 1[8], the bishop to be a lover of strangers). H. M. G.—M. H. S.

BISHOP'S BIBLE.—See ENGLISH VERSIONS, 28.

BIT, BRIDLE.—The Hebrews were doubtless well acquainted with the *bit*, but there is no clear mention of it as distinct from the *bridle*, the words for which in Greek and Latin include bit, headstall, and reins. (*a*) Heb. *methegh* is rendered *bit* in RSV in 2 K 19[28], Is 37[29] (AV, RV 'bridle' in both cases), Ps 32[9] (so AV, RV); and *bridle* in Pr 26[3] (so AV, RV). (*b*) Heb. *resen* is rendered *bridle* in RSV in Ps 32[9], Is 30[28] (so AV, RV in both cases), and *restraint* in Job 30[11] (AV, RV 'bridle'). In Job 41[13] 'double bridle' (AV, RV) is sometimes taken to refer to the double jaws of Leviathan; but this is doubtful and RSV renders 'who can penetrate his double coat of mail' (reading *siryōnô* for *risnô*). (*c*) Heb. *maḥsôm* (literally 'muzzle'; cf Dt 25[4] where the same root is used) is rendered *bridle* in AV, RV, and RSV in Ps 39[1]. (*d*) Gr. *chalinos* is rendered *bit* in AV and RSV in Ja 3[3] (RV 'bridle'), and *bridle* in AV, RV, and RSV in Rev 14[20], while the verb *chalinagōgeō* is rendered *bridle* in AV, RV, RSV in Ja 1[26] 3[2]. A. R. S. K.—H. H. R.

BITHIAH ('daughter of Y" ').—The daughter of a Pharaoh, who became the wife of Mered, a descendant of Judah, 1 Ch 4[18] (RSV v.[17]). Whether Pharaoh is to be taken here as the Egyptian royal title or as a Hebrew proper name, it is difficult to determine.

BITHRON ('cleaving').—This word is taken as the name of a place in 2 S. 2[29] (AV, RV). Some have understood it to mean 'the gorge' that led to Mahanaim. RSV renders 'the forenoon' (*i.e.* the symmetrical half [of the day]), following W. F. Arnold (*AJSL* xxviii, 1911–12, 274 ff).

BITHYNIA.—A district in the NW. of Asia Minor, which had been a Roman province since 74 B.C. For administrative purposes it was generally united with the province of Pontus, which bounded it on the E., under one governor. The province was senatorial till about A.D. 165, and was governed by a proconsul. The younger Pliny governed it from A.D. 111–113 by a special commission from the emperor Trajan. Paul and Silas were prevented by the Spirit from preaching in Bithynia (Ac 16[7]), and the beginnings of Christianity there are unknown. That there were churches there after St. Paul's time is certain from the address of the First Epistle of Peter (q.v.). A. So.

BITTER HERBS (*mᵉrôrîm*, Ex 12[8], Nu 9[11]).—These were commanded to be eaten with the Passover meal, perhaps as a symbol of the bitterness of the Egyptian bondage (so Rashi). Various herbs have been used by Jews for this purpose. The Mishnah (Pesaḥim 2[6]) mentions five kinds of herbs which might be used: lettuce, chicory, pepperwort, snakeroot, and dandelion (H. Danby, *The Mishnah*, p. 138).

BITTERN.—The Hebrew *ḳippōdh* has been thought to be the 'porcupine' (Arab. *qunfuḏ* 'porcupine') or the 'bittern' (*botaurus stellaris*). RV renders 'porcupine,' RSV once 'porcupine' and twice 'hedgehog,' AV 'bittern.' The porcupine (*hystrix cristata*), though common enough in Palestine, cannot be meant; for the statement that 'the porcupine shall lodge in the chapiters thereof,' *sc.* of the ruins of Nineveh (Zeph 2[14] RV), is absurd, since it cannot live on the tops of pillars or columns, even if they are lying on the ground. The bittern haunts watery places and is possible in reference to Babylon (Is 14[23]), improbable in the case of Edom (Is 34[11]) and impossible in Nineveh, if it is parched and wasted (Zeph 2[14]); nor is the interpretation philologically suitable. The root of the noun is connected with the Hebrew *ḳippōdh* 'rolled up,' the Syriac *'eṭpqaḏ* 'was bunched up' and the Arabic *qafida* 'had a big flaccid neck'; these suggest a creature with a bunched-up neck, such as the 'bustard,' of which 'the neck, especially of the male in the breeding season, is thick.' It is a shy bird, found almost always on waste ground, open plains or the desert edge: and three varieties occur in Palestine. The *ḳippōdh* is perhaps the 'ruffed bustard,' while *ḥarabh* (as the MT's *ḥōrebh* 'drought' in the same passage ought perhaps to be read) will be the 'great' and 'little bustard' (Arab. *ḥarbu* 'male bustard'), which frequent the plains. G. R. D.

BITTERNESS, WATER OF.—Nu 5[18] (RV, RSV; AV 'bitter water'); see JEALOUSY.

BITTER WATER, Nu 5[18] (AV).—See BITTERNESS, WATER OF.

BITUMEN, asphalt, or mineral pitch is an inflammable viscous substance, composed of hydrocarbons of the same series as those which constitute mineral oil or petroleum. It is formed by the distillation or evaporation of petroleum and may vary in consistency from a solid to a semi-liquid condition. It occurs both in Mesopotamia and Palestine. The springs at Hit, on the Euphrates, 150 miles above Babylon, are mentioned by Herodotus (i. 179). In Palestine it is found at Ḥâṣbeyah, near Mount Hermon, and in the neighbourhood of the Dead Sea (hence called *Asphaltitis Limnē* by Josephus [*BJ* IV. viii. 4 (476)] and *Lacus Asphaltites* by Pliny [*HN* v. xv. 15]). Some of the limestone strata in the last-named locality are highly bituminous, and masses of bitumen are known to float on the Dead Sea itself after earthquakes. In the OT there are three Hebrew words which denote some form of this substance.

In the Flood-story *kōpher* (LXX *asphaltos*, bitumen, EV 'pitch') is used in the construction of the ark (Gn 6[14]). *Ḥēmār* (bitumen; AV and RV 'slime') was the mortar employed by the early Babylonian builders (Gn 11[3], LXX *asphaltos*). Bitumen pits or wells, into which the pitchy liquid (LXX *asphaltos*) oozed from the earth, are mentioned as occurring in the Valley of Siddim, *i.e.* the Dead Sea basin (Gn 14[10]). This is quite

in keeping with the nature of the region, though such wells are not now found in it. In Ex 2^3 *ḥēmār* is one of the substances with which the ark of bulrushes was made watertight, the other being *zepheth* (EV ' pitch '). LXX includes both in the general rendering *asphaltopissa*, and they probably denote the more solid and the more liquid varieties of bitumen respectively. *Zepheth* also occurs twice in Is 34^9 (LXX *pissa*, EV ' pitch '). The context makes it probable that the reference is again to bitumen.

J. Pk.—C. J. M. W.

BIZIOTHIAH.—Apparently a town near Beersheba according to the Hebrew text, Jos 15^{28} (AV **Bizjothjah**); but we should probably follow LXX and read *bᵉnôthêhā*, ' and her villages ' (cf Neh 11^{27}).

BIZTHA.—One of the seven eunuch chamberlains of Ahasuerus, Est 1^{10}.

BLACK.—See Colours, 2.

BLAIN.—An inflammatory swelling on the body, Ex 9^{9f} (AV, RV; RSV **sores**). See Botch, Medicine.

BLASPHEMY.—The modern use of this word is more restricted in its range than that of either the OT or the NT. **1.** In the former it is narrower in its scope than in the latter, being almost universally confined to language or deeds (1 Mac 2^6) derogating from the honour of God and His claims to the over-lordship of men (Lv 24^{10-16}, cf 1 K $21^{10, 13}$, 2 K 19^6, etc.). Contemptuous scorn for sacred places was regarded as blasphemy (see 1 Mac 2^6 7^{28}, cf Ac 6^{13}), as was also the light and irresponsible utterance of the sacred Name (Is 52^5, Ezk 36^{20}, Dt 5^{11}), the degradation of the worship of Yahweh by conformity to pagan rites (Ezk 20^{27}), and the continued wilful transgression of Divine commands and despising of ' the word of the Lord ' (Nu 15^{30f}). The incident of the man gathering sticks on the Sabbath seems to be a concrete example of blasphemy (Nu 15^{32f}). The legal punishment for blasphemy was death.

2. When we come to the NT, the word is found more frequently, and is employed in a manner more nearly allied to the usage of classical writings. The EV have accordingly translated it often as ' railing ' or slanderous talk generally (Mt 15^{19} = Mk 7^{22}, Eph 4^{31}, Col 3^8, 1 Ti 6^4, Jd ^{9}), looked at, however, on its ethical and religious side. The cognate verb, too, is treated in the same way (Mk 15^{29} = Mt 27^{39}, Lk 22^{65} 23^{39}, Ro 3^8 14^{16}, 1 Co 4^{13} 10^{30}, Tit 3^2, 1 P $4^{4, 14}$, 2 P $2^{2, 10, 12}$, Jd $^{8, 10}$), as is also the derived adjective (2 Ti 3^2, 2 P 2^{11}).

According to the Synoptic Gospels, the principal charge brought by the Jews against Jesus was that of blasphemy, and when we inquire into the meaning of the accusation, we find that it was His claim to Divine authority or prerogatives (Mk 2^7 = Mt 9^3, Mk 14^{64} = Mt 26^{65}, cf also Jn $10^{33, 36}$). On the other hand, the NT writers regarded the unreasoning attitude of the Jews to the claims and teaching of Jesus as blasphemous (Mk 15^{29} = Mt 27^{39}, Lk 22^{65} 23^{39}, Ac 13^{45} 18^6). As is the case also in wider considerations, the data on blasphemy in Rabbinic literature are in conflict with those of the NT. It is interesting also to notice that this is the word put by the author of the Acts into the mouth of the town-clerk of Ephesus when he was appeasing the riotous mob who were persuaded that St. Paul and his companions had insulted the local deity (Ac 19^{37}). Evidently the term had a wider use than as it is technically defined (cf Mk 4^{28-30}). In the Passion narrative, the accusation of blasphemy is the basis on which the Jewish opponents of Jesus base their demand for his death. The proto-martyr Stephen lost his life too on a charge of blasphemy (Ac 6^{13}, 7^{58}). In both cases it is difficult, even impossible, to reach a level of sound historical reliability. On the ' blasphemy against the Holy Spirit,' see article Sin, iii. **1.**

J. R. W.—S. S.

BLASTING.—See Mildew.

BLASTUS.—A chamberlain of Agrippa I., through whose intervention the people of Tyre and Sidon secured a hearing at Caesarea (Ac 12^{20}). The name is common in the inscriptions and papyri.

BLEMISH.—See Medicine.

BLESSEDNESS.—With its customary dislike for more abstract words the Bible does not use the noun ' blessedness.' The nearest approach to it is in the noun meaning ' a declaration of blessing ' (Ro $4^{6, 9}$, Gal 4^{15}). ' Blessed ' and ' happy ' are found in both OT and NT as translations for the same Hebrew or Greek word, with ' blessed ' being used more frequently.

The blessedness described in the Bible is limited to the religious situation of the person who is blessed. In the OT there is an emphasis on the material blessings of long life, wealth, many children, outward peace and prosperity. Too often these are seen as the direct result of trust in God (Ps 1) without a recognition that the righteous do not always prosper. Some Psalms (*e.g.* 22, 73) and Job face the problem of innocent suffering in its relation to blessedness.

In the NT the emphasis is on the *spiritual content* of blessedness, which may flourish even in the face of adverse earthly conditions (Mt $5^{10, 11}$, Lk 6^{22}, Ja 1^{12}). The thought of future reward occurs here and there (Lk 6^{20-26}), but this reward is clearly only the consummation of a blessedness already attained by the poor in spirit, the meek, etc. In the teaching of Jesus the *summum bonum* is related to the Kingdom of God (Mt 25^{34}, Mk $10^{17, 23}$) or to eternal life (Jn 3^{3-5} 4^{14}), and these are present possessions (Lk 17^{20f}, Jn 3^{36}).

In the Johannine writings, eternal life is described as personal union with Christ, the Son of God, by trust and fellowship (Jn 17^3, 1 Jn 5^{11-20}). Thus man through Christ becomes a sharer of the life of Him who is Himself the ' blessed God ' (1 Ti 1^{11} 6^{15}). S. W. G.—L. O. B.

BLESSING AND CURSE.—Blessing in the experience of ancient Israel might be subjective or objective, the ultimate subject being God and the object the individual, community, race, or animals, plants, or land. A general term expressing this experience of God's blessing would be ' gift ' or ' endowment.' The virtue of the grape, for instance, is said to be its ' blessing ' (Is 65^8) and the ascendancy over the creatures is the peculiar ' blessing ' of man (Gn 1^{28}). Success in life or what we should term good fortune is regarded as the manifestation of the possession of the blessing as in the cases of David and his house or Joseph in Egypt.

This blessing conditions a man's whole life, giving him a moral assurance which predisposes the successful issue of his undertakings. It also affects favourably all associated with him. This is often regarded as happening automatically, as in the case of Jacob's blessing in which Laban shared (Gn 30^{27ff}), or the prosperity of Joseph's Egyptian master Potiphar (Gn 39^{2-5}). When the King enjoys God's blessing this is reflected in the material prosperity and in the spiritual state of his land and subjects (Ps 72). The curse, on the other hand, signifies in one Hebrew root (*ḳll*, literally ' to lighten ') the deprivation of the capacity to enjoy fulness of life, and the person conscious of being thus affected labours under a moral burden which impairs all his efforts and frustrates his enterprises, *e.g.* Saul, who is not actually said to be cursed, but who opposes David, who manifestly has the blessing. This principle is applied in the curse in ancient Hebrew law in oaths of purgation in cases of adultery, for instance (Nu 5^{11ff}). The curse, like the blessing, was ' infectious,' extending even to the land, which would be polluted if the corpse of a criminal were not immediately removed (Dt 21^{22f}). So after Cain is cursed he is banished to the desert lest his curse infect the sown land (Gn 4^{11}). The breach of a taboo imposed with the sanction of a curse, involved the whole community and impaired their efficiency, *e.g.* the cases of Achan (Jos 6^{17ff}) and Jonathan (1 S 14^{24ff}). For this reason the associates of a man whose misfortunes were anciently held to be the result of a curse held aloof from him, a theme often expressed in Psalms of Lamentation

(*e.g.* Ps 31[11]† 69[8] 88[8, 18] 142[4], etc.; cf Jer 30[14], Job 19[13–19]). The curse, so potent in its effect, was an effective sanction of ancient law and is so employed in the public declaration and homologation of Hebrew law (Dt 28[15–68]) and in the Babylonian Code of Hammurabi.

The blessing, manifested in obvious, if often materialistic, tokens of Divine favour, as well as automatically affecting others, may be consciously transmitted, the oral blessing being occasionally accompanied by a simple ritual, *e.g.* lifting up or laying on of hands (Gn 48[14]), a kiss (Gn 27[27]), which is still used in the blessing of greeting in the East, or by contact with the staff of the person who blesses (*e.g.* that of Elisha, 2 K 4[29]). The moral advantage of the blessing thus communicated may be materialized by palpable gifts, such as the land and springs which Caleb gave to his daughter (Jos 15[19], Jg 1[15]) or the flocks given by Jacob to Esau (Gn 33[11]). Thus the Hebrew word for blessing may often mean 'present,' *e.g.* the provisions which Abigail, the wife of Nabal, gave David (1 S 25[18]†) though in all such cases the present symbolizes the fellowship which it is desired to communicate or to enjoy.

The undoubted moral effect of the blessing and the curse in ancient Israel derived from the firm belief in the efficacy of imitative magic. That which was brought to the notice of the deity in graphic ritual or striking utterance was held *ipso facto* to have substance. Blessings, therefore, and usually curses, were thought to operate automatically, hence Isaac's distress that his blessing of Jacob could not be revoked in Esau's favour (Gn 27[25]†). Apparently a curse could be revoked, however (*e.g.* the case of Jonathan, 1 S 14[24]†). This was most effectively done when countermanded by the blessing of the imprecator (*e.g.* the mother of Micah the Ephraimite, Jg 17[2]).

An application of the blessing and the curse as the creative word was the prophetic oracle, given as a reassurance, *e.g.* 'Go up to Ramoth-gilead and triumph' (1 K 22[12]) and in similar oracles in royal psalms, *e.g.* Ps 2, 110, or as oracles designed to cripple the power of the enemy, as Balaam was expected to do to Israel (Nu 22 ff). The so-called 'burdens' of the canonical prophets on the foreign nations are by their title and content fundamentally of this nature. Such curses or invocations could also be used against private individuals, and many Mesopotamian incantations are of this nature, the detailed and circumstantial list of desired calamities indicating ritual practices of witchcraft. Counter-incantations consist in a careful unravelling of the spell with the repetition of the same details. The ancient Israelite had not quite divested himself of the belief that misfortune was the result of the curse of malicious persons, and the details of sufferings are a regular feature of the Hebrew Plaint of the Sufferer. Certain psalms and portions of psalms of this type are devoted to detailed cursing of those held to have caused the suffering of the psalmist or those who used his text, *e.g.* Ps 109[1–20] 129[5]† 35[26] 40[15] 55[15–23] 83[10] 137.

Blessings or auspicious words were given in prospect at crises of individual or communal life, such as departure or a journey (Gn 24[60]), marriage (Gn 24[60], Ru 3[11–12]), birth (Ru 3[14–15]), death, when the blessing of the dying man is transmitted with his status and estate to his heir (Gn 27[27] 48[15]†, 20†), and, of course, when one man meets another and by his greeting indicates his fellowship, as his silence indicates his enmity. At the conclusion of a cultic occasion, *e.g.* the installation of the Ark in Jerusalem, David materializes his blessing in the distribution of cakes to the community (2 S 6[18]), and at the selection of Saul as King at Mizpah the fellowship of King and community is symbolized by material presents (literally 'blessings') to the King (1 S 10[27]). J. Gr.

BLINDNESS.—See Medicine.

BLOOD.—The blood was regarded by the Israelites with sanctity and awe, because they understood it to be the life or soul (*nephesh*) of flesh (Lv 17[14]). 'Flesh and blood' accordingly is mankind, a designation used in late Judaism and the NT. Because it is the life, the blood belongs specially to God. Therefore though animals may be slaughtered for human food by the Noachic covenant (Gn 9[1–7]) the blood is not to be consumed; where the slaughter is at the altar, the blood goes to God at the altar; otherwise it is poured out. The application of blood as life to the altar is a powerful expiatory measure; it is part of all animal sacrifices, but the blood ritual is especially elaborate in the expiatory sacrifice called the sin offering, and most of all in the Day of Atonement. Most (though not absolutely all) rituals to which the term *kipper* 'expiate' is attached include the use of blood (He 9[22]). The blood does not expiate as representing death as a penalty paid on behalf of the offerer, but as life liberated and returned to God. The killing of the victim may be done by a layman, but the blood manipulation requires a priest.

The shedding of human blood, however, is not permitted by the Noachic law, which prescribes rather a divine search and retribution; the slayer will also have his blood shed, and only thus can expiation be made (Gn 9[6], Nu 35[33]). Unexpiated blood cries to God for revenge (Gn 4[10]) and where the slayer is unknown special rituals are used in order to 'burn away the innocent blood,' *e.g.* Dt 21[1–9]. The retribution for blood is normally taken by the kinsman, the 'redeemer of blood.' 'Blood' in the plural is a normal Hebrew expression for punishment or compensation, and for the bloodguilt which is thus repaid; *e.g.* Ex 22[2] discusses whether there is bloodguilt, and therefore revenge or compensation for the family, when a thief is killed. The phrase can also be used of purely monetary compensation, or price.

In the NT references to the blood of Christ are interpretations of His work as sacrificial and expiatory; the wine of the last Supper is related especially to the blood of the covenant, Ex 24. Bloodguilt appears in cases like the killing of the prophets, Mt 23[34–36]; 27[1–10, 24–26] relate to guilt for the slaying of Jesus. J. Ba.

BLOOD, AVENGER OF.—See Avenger of Blood, and Kin [Next of].

BLOOD, FIELD OF.—See Akeldama.

BLOOD, ISSUE OF.—See Medicine.

BLOODY FLUX, BLOODY SWEAT.—See Medicine.

BLUE.—See Colours, 5.

BOANERGES (Mk 3[17]), 'Sons of Thunder.'—The Master's appellation of James and John. The etymology (Hebrew or Aramaic) is uncertain. Jerome takes it as a reference to their fiery eloquence. Others derive it rather from their fiery disposition in early days (cf Lk 9[52–56]). It would thus be a playful yet serious sobriquet, constantly reminding them of their besetting sin and warning them to overcome it. D. S.—J. C. B.

BOAR.—The wild boar (Heb. *ḥazîr*, Arab. *khinzîr*) is quite common in the Jordan Valley, especially in the reed thickets near the Dead Sea. It is also found on Mt. Tabor. It is noted for its destructiveness, Ps 80[13]. The same Hebrew word is elsewhere rendered **swine** (q.v.).

BOAT.—See Ships and Boats.

BOAZ.—A wealthy Bethlehemite, who became the second husband of Ruth, when the nearer kinsman refused to marry her (Ru 4[1–10]). This marriage was clearly not strictly a levirate marriage (see Marriage, 4), but indicates that in the absence of a brother-in-law a more distant kinsman might undertake the duty. By this marriage Boaz became the ancestor of David and thus of our Lord (Ru 4[21]†, 1 Ch 2[12], Mt 1[5]†, Lk 3[32]). See Ruth.

BOAZ.—See Jachin and Boaz, Temple.

BOCCAS, 1 Es 8[2] (AV, RV).—See Bukki, 2.

BOCHERU.—A descendant of Jonathan, 1 Ch 8[38] 9[44].

BOCHIM ('weepers').—The place where the angel rebuked Israel, Jg 2[1, 5]. The LXX reads **Bethel.** Some think it may be the same as **Allon-bacuth** (q.v.), which was near Bethel.

BODY in OT represents various Hebrew words, especially that for ' flesh ' (q.v.). In Ex 24[10] AV, there is no personification; prefer RSV, ' the very heaven.' In the OT, RSV often substitutes ' body ' for AV ' flesh,' when required by modern idiom. In NT, though the body may be the seat of sin and death (Ro 6[6] 7[24]), it is never treated with contempt (Ro 12[1], 1 Co 6[13, 19]); Ph 3[21] is a well-known mistranslation; prefer RSV, ' our lowly body.' Accordingly the body could be used metaphorically of the Church, Christ being sometimes the Head, sometimes the Body itself. No trace of the ancient Orphic, Neo-Pythagorean, or Manichaean view of the body is to be found in the Bible. See FLESH.

C. W. E.—F. C. G.

BODY-GUARD.—See ARMY, 1, GUARD.

BOHAIRIC VERSIONS.—See GREEK VERSIONS OF OT, 11, and TEXT (OT and NT).

BOHAN.—The son of Reuben, Jos 15[6] 18[17]. The stone of Bohan, mentioned in these passages, marked the division between Judah and Benjamin. It is possibly modern *Ḥajar el-Aṣbaḥ*.

BOILS.—See MEDICINE.

BOLLED.—The boll of a plant is its seed-vessel or pod. Cf Fitzherbert, ' The bolles of flaxe . . . made drye with the son to get out the sedes.' Thus Ex 9[31] ' the flax was bolled ' (AV, RV), means that it had reached the seed stage. But the Hebrew means only that it was in flower. RSV reads ' the flax was in bud.'

BOLSTER.—This word, which appears six times in AV (1 S 19[13, 16] 26[7, 11, 12, 16]) as the rendering of a Hebrew word signifying ' the place at the head,' ' head-place,' has rightly disappeared from RV and RSV, which gives ' head ' throughout.

BOLT.—See HOUSE, 6.

BOND.—**1.** See BAND. **2.** See BILL. **3.** See CHAIN.

BONDAGE, BONDMAID, BONDMAN, etc.—See SLAVE, SLAVERY.

BONES is used widely in OT as a synonym for the body, living or dead, or the person (Ps 42[10] 51[8]). As the solid framework of the body, the bones are the seat of health and strength, so that breaking, rottenness, dryness of the bones are frequent figures for sickness or moral disorder (Pr 14[30] 17[22], Ps 6[2] 22[14]). ' Bone of my bone ' answers to the English phrase ' of the same blood '; but the concluding words of Eph 5[30] (AV), ' of his flesh and of his bones,' should be omitted (with RV, RSV). In Lk 24[39] the unique expression seems to emphasize the nature of the Resurrection body, as different from the ordinary ' flesh and blood.' See Gibson, *Thirty-Nine Articles*, p. 188.

C. W. E.

BONNET.—**1.** This is the AV designation of the special headdress of the rank and file of the priesthood (*mighbā'āh*: Ex 28[40] 29[9] 39[28], Lv 8[13], and *p'ēr*: Ezk 44[18]), as distinct from the high priest's mitre (Ex 28[4]). RV translates by **head-tire** and RSV by **cap.** It was of fine white linen wound round the head (Ex 29[9]) to form a conical-shaped tall headdress. Josephus (*Ant.* III. vii. 3 [157]) confuses the tall cap of the ordinary priests and the **turban** (AV mitre) of the high priest. A late-Roman fresco from Syria shows a picture of a conical-shaped priest's headdress (Galling, *BRL*, 1937, s.v. Priesterkleidung, p. 430).

2. The headdress (RSV) of a lady in Isaiah's time, Is 3[20] (AV bonnet).

L. H. B.

BOOK.—**1.** A roll of papyrus or parchment; see WRITING. **2.** A sacred or canonical document (Dn 9[2]); see CANON OF OT. **3.** ' Book of life,' etc.; see next article and ESCHATOLOGY.

BOOK OF LIFE is the Divine record in which the righteous and their deeds are inscribed. It grows out of the Hebrew custom of registering the citizens, especially the priests (Jer 22[30], Neh 7[5, 64] 12[23] and see *DSD* vii. 3). God has such a book in which he inscribes the citizens of Zion Ps 87[6], their life-span Ps 139[16], their sorrows Ps 56[8]. The term referred to the members of the theocratic community, present or imminent (Ex 32[32f], Is 4[3], Ezr 9[4] 13[9] and for the reverse idea of those blotted out of the book, see also Ps 69[28]). In Dn 12[2], Mal 3[16] the phrase has a more definite eschatological reference to future blessedness. This is true in the later apocalyptic and pseudepigraphic literature, *e.g.* 1 En 47[3] and *passim*. The thought of a second book for death and punishment is also introduced, see 1 En 81[4] and *passim*. Jub 30[20ff], 36[10], Apoc. Bar 24[1], but also Is 65[6], Dn 7[10], and Rev 20[12]. The other NT citations are to the book of life Ph 4[3], Rev 3[5] and *passim*, also variously referred to as ' names written in heaven,' He 12[23], ' book of life of the Lamb,' Rev 13[8] 21[27], ' his share in the tree of life,' Rev 22[19].

C. C. Ro.

BOOT.—See ARMOUR, 2 (*d*), DRESS, 6.

BOOTH.—The Hebrew *sukkāh* (note Gn 33[17] RVm) was a simple structure made of the branches of trees, which the peasant erected for rest and shelter in his field or vineyard (Is 1[8] RV, RSV; AV ' lodge '). In EV it is variously rendered **booth, cottage, hut, pavilion, tabernacle, tent.** The booth was also a convenient shelter for cattle (Gn 33[17]) and for the army in the field (2 S 11[11] RV, RSV; AV ' tents ').

BOOTHS, FEAST OF.—See TABERNACLES, FEAST OF.

BOOTY.—See WAR. Cf BAN.

BOOZ, Mt 1[5], Lk 3[32] (AV) = **Boaz** (q.v.).

BOR-ASHAN.—A place mentioned in 1 S 30[30] (AV **Chor-ashan,** RV **Cor-ashan**), to be identified with **Ashan** (q.v.).

BORDER (OF GARMENT).—See FRINGES.

BORITH.—An ancestor of Ezra, 2 Es 1[2]; called **Bukki** in 1 Ch 6[5, 51], Ezr 7[4], 1 Es 8[2] (AV, RV **Boccas**).

BORROWING.—See DEBT.

BOSCATH, 2 K 22[1] (AV).—See BOZKATH.

BOSOR.—**1.** A town in Gilead, 1 Mac 5[26, 36]; modern *Buṣr el-Ḥarîrî*. **2.** 2 P 2[15] (AV, RVm); see BEOR, 1.

BOSORA, 1 Mac 5[26, 28] (AV, RV).—See BOZRAH, 3.

BOSS.—Only Job 15[26] (AV, RV; RSV ' bossed '). The word properly means ' back,' and it here refers to the curved projection of the shield. The same word occurs in 13[12] (AV ' bodies '; RV, RSV ' defences ') where *ICC* (p. 123) takes it to have the same meaning, and to indicate that the friends' bosses are useless, since made of clay instead of iron. Dhorme (*Job*, 1926, p. 169) derives it from a different root and finds the meaning to be ' answers.'

BOTCH.—A swelling or eruption of the skin, Dt 28[27] (AV; RV, RSV **boil**). Cf Milton *PL* xii. 180, ' Botches and blaines must all his flesh imboss.'

BOTTLE.—Although glass was not unknown in Palestine in Bible times, most of the words rendered by ' bottle ' in the Bible denote receptacles of skin. (*a*) Hebrew *nō'dh* is the *skin* of a domestic animal, especially the goat, used for wine or milk (Jg 4[19]). It is always rendered by ' bottle ' in AV (Jos 9[4, 13], Jg 4[19], 1 S 16[20], Ps 56[8] 119[83]), and so in RV, save in Jos 9[4, 13] where ' wineskins ' is used. RSV has ' skin ' or ' wineskin ' in all cases except Ps 56[8], where ' bottle ' is retained. In Ps 33[7], where the Hebrew has *nēdh* (AV, RV ' heap '), RSV finds the same Hebrew word and renders ' bottle.' (*b*) Hebrew *ḥēmath* means *waterskin*. In Gn 21[14, 15, 19] it is rendered ' bottle ' in AV, RV, and ' skin ' in RSV. The same word is rendered ' bottle ' in AV in Hab 2[15], but here another word of the same spelling should be read (RV ' venom,' RSV ' wrath '). (*c*) Hebrew *nēbhel* may mean a *skin* or a *jar*. It is rendered ' bottle ' in AV and RV in 1 S 1[24] 10[3] 25[18], 2 S 16[1], Jer 13[12], but ' skin ' in RSV in all of these save Jer 13[12], where ' jar ' is used. In other passages the context indicates that an earthenware vessel is intended. AVm has ' bottle ' in Is 30[14] (RV, RSV ' vessel '), and AV, RV have ' bottles ' in Jer 48[12] (RSV ' jars '). In Is 22[24] AV, RV, RSV have ' flagons,' and in La 4[2] AV, RV ' pitchers ' and RSV ' pots.' (*d*) Hebrew *baḳbūḳ* is an onomatopoeic word meaning *flask*. In Jer 19[1, 10] it is said to be of earthenware, but is rendered

'bottle' by AV, RV, and 'flask' by RSV. In 1 K 14^{3} AVm has 'bottle,' AV and RV have 'cruse' and RSV 'jar.' (*e*) Greek *askos*, rendered 'bottle' in AV in Mt 9^{17} ||, is a *skin* as RV, RSV recognize.

A. R. S. K.—H. H. R.

BOTTOMLESS PIT.—See Abyss.

BOUGAEAN.—A descriptive epithet applied to Haman in Ad. Est 12^{6} (RV **Bugean**; AV has 'Agagite'). *Bougaios* occurs in Homer (*Il.* xiii. 824, *Od.* xviii. 79) as a term of reproach='bully' or 'braggart.' Whether the LXX intended it in this sense, or as a gentilic adjective, is wholly uncertain.

BOW, BATTLE BOW.—See Armour, 1 (*d*).

BOWELS.—The bowels are in Biblical language the seat of emotions. Hence Ps 40^{8} 'Thy law is in the midst of my bowels' (see AVm), *i.e.* the object of my deepest affection (EV 'within my heart'); Jer 4^{19} 'My bowels, my bowels!' (AV, RV), where RSV has 'My anguish, my anguish!'; Ph 2^{1} 'if any bowels and compassions' (AV), where RV has 'tender mercies' and RSV 'affection.'

BOWL.—It is impossible to distinguish with certainty between the numerous words rendered, somewhat indiscriminately, 'cup,' 'basin,' and 'bowl.' The wandering Bedouin of to-day make little use, for obvious reasons, of the fragile products of the potter's art, preferring vessels of skin, wood, and copper. The 'lordly bowl' with which Sisera was served (Jg 5^{25}) was doubtless of wood; so too, perhaps, Gideon's bowl (6^{38}) which bears the same name. For ordinary domestic purposes bowls of glazed or unglazed earthenware were preferred, of which specimens in endless variety have been unearthed (see Pottery). Among the wealthier classes silver and even gold (1 K 10^{21}) were employed. Of one or other of these were doubtless the large bowls—the word elsewhere used for the sacrificial basins (q.v.)—from which the nobles of Samaria quaffed their wine (Am 6^{6}). Similar, probably, were the large wine-bowls, distinguished from the smaller cups, to which Jeremiah refers (Jer 35^{5} RV; RSV 'pitchers'; AV 'pots').

From the above are to be distinguished the bowl or reservoir for the oil of the 'candlestick' (Zec 4^{2f}), the golden cup-like ornaments of the Tabernacle lampstand (Ex 25^{31} AV 'bowls'; RV, RSV 'cups'), and the 'bowls of the chapiters' (2 Ch 4^{12f} RV and RSV; AV '**pommels**'). See, further, Cup, Basin, Vial.

For an important ritual use of bowls and lamps, see House, 3.

A. R. S. K.

BOX.—**1.** Hebrew *pakh*, 'flask' or 'vial,' is rendered 'box' in AV in 2 K $9^{1,3}$ (RV 'vial', RSV 'flask'), but 'vial' in AV, RV, RSV in 1 S 10^{1}. This appears to have corresponded to the 'horn' elsewhere referred to in connexion with anointing oil. **2.** Hebrew *'argaz*, 'box' or 'chest' is rendered 'box' in RSV in 1 S $6^{8,11,15}$ (AV, RV 'coffer'). Here it was the chest in which the Philistine gifts to appease Y" were placed. **3.** Hebrew *bâttê hannephesh*, literally 'houses of soul,' is rendered 'perfume boxes' in RV, RSV in Is 3^{20} (AV 'tablets'). There is nothing to indicate their nature, or the material from which they were made. **4.** Greek *alabastron* is clearly a container made of alabaster. It is rendered 'alabaster box' in AV of Mt 26^{7}, Mk 14^{3} (RV 'alabaster cruse,' RSV 'alabaster jar'), Lk 7^{37} (RV 'alabaster cruse,' RSV 'alabaster flask'). See Jewels and Precious Stones. **5.** Greek *glōssokomon* is rendered 'bag' in AV, RV in Jn 12^{6} 13^{29} (RVm, RSV 'box'). It is uncertain whether this was a bag or a box. See Bag.

A. R. S. K.—H. H. R.

BOX-TREE.—Whether the Hebrew *t^e'ashshûr* was the box-tree (*Buxus longifolia*) or the *sherbin*, modern Arabic for the cypress (*Cupressus sempervirens*), or, as others propose, a kind of juniper, is quite unsettled. AV has the first in Is 41^{19} 60^{13} and so RV, with RVm 'cypress' in 41^{19}, while RSV has 'pine' in both. So good an authority as Post rejects 'box' as improbable. In Ezk 27^{6}, where AV has 'company of Ashurites,' we should probably read *bith^e'ashshūrîm* for *bath'^ashshūrîm* (RV 'boxwood,' RSV 'pines').

E. W. G. M.—H. H. R.

BOY.—See Child, Family.

BOZEZ.—A rocky crag on one side of the Michmash gorge, opposite Seneh, 1 S 14^{4}.

BOZKATH.—A town of Judah, in the plain near Lachish, Jos 15^{39}; home of Josiah's mother, 2 K 22^{1} (AV **Boscath**). The site is unknown.

BOZRAH ('fortress').—**1.** An Edomite city known only as the place of origin of Jobab, son of Zerah, one of the Edomite kings (Gn 36^{33}, 1 Ch 1^{44}). It was, however, of such importance in the Kingdom of Edom that it is coupled with the name of the latter in poetic parallelisms (*e.g.* the denunciation in Is 34^{6}; cf Jer $49^{13,22}$, Am 1^{12}). The reference to 'crimsoned garments' from Bozrah in Is 63^{1} may indicate an industry for which it was noted. In Mic 2^{12} read 'like sheep in a fold' (so RSV) for 'as the sheep of Bozrah' (AV, RV). The site is probably to be identified with *Buṣeirah*, SE. of the Dead Sea. **2.** A Moabite city denounced by Jeremiah (48^{24}); possibly identical with **Bezer, 2** (q.v.). **3.** A city E. of the Sea of Galilee, 1 Mac $5^{26,28}$ (AV, RV **Bosora**); modern *Buṣrā Eski-Shâm*.

BRACELETS.—See Ornaments, 4.

BRAMBLE.—See Thorns.

BRAN.—The burning of bran for incense is mentioned in Bar 6^{43} (=Letter of Jeremiah) as an accompaniment of the idolatrous worship of the women of Babylon.

BRANCH.—**1.** The great variety of Hebrew words rendered by the English 'branch' may be gathered from the following list of passages, in each of which a different term is used: Gn 40^{10}, Ex 25^{33}, Nu 13^{23}, Is 16^{8} 27^{10}, Jer 11^{16}, Zec 4^{12}, Ps 104^{12}, Job 15^{32} 18^{16}. In the following verses RV (or RVm) and RSV add or substitute another word: Is 18^{5} ('spreading branches') 25^{5} ('song'), Ezk $17^{3,22}$ ('top,' 'lofty top'), Ps 80^{15} ('Heb. *son*': RVm of Gn 49^{22} in like manner has 'Heb. *daughters*'), Pr 11^{28} ('leaf,' RSV 'green leaf'), Job 8^{16} ('shoot,' so RSV). In the NT four Greek words are translated 'branch,' but RVm points out that 'layers of leaves' are meant at Mk 11^{8} (RSV 'leafy branches'), and at Jn 12^{13} *palm*-branches are in question. **2.** 'Branch' is used figuratively for human offspring (Job 15^{32}), especially for the scion of a royal house (Dn 11^{7}); also for persons in lofty station (Is 9^{14}). The Hebrew *nēṣer*, properly signifying 'sprout' or 'shoot,' but rendered 'branch' (Is 11^{1}), is a designation of the Messianic king; not improbably this was in the Evangelist's mind when he wrote Mt 2^{23}. We have the same English term at Jer 23^{5} 33^{15}, where another word *ṣemaḥ*, is a title for the Messianic king, intimating that this 'shoot' should arise of 'the low estate' of the restored remnant. Zec 3^{8} 6^{12}, following Jeremiah, actually makes *Ṣemaḥ* a proper name, and seems to identify with Zerubbabel. The Targ. of Jeremiah and Zechariah unhesitatingly substitutes for it 'the Messiah.'

J. T.—E. R. R.

BRASIER.—See Coal and Firepan.

BRASS.—The Hebrew *nāḥāsh* means 'copper' rather than 'brass,' since it is mined and smelted (Dt 8^{2}, Job 28^{2}) and also is used for primitive tools and weapons (Gn 4^{22}); and weapons of copper have been found at Tell el-Ḥesī (*c* 1500 B.C.). Palestine itself has no copper, but several neighbouring places are known to have produced it in varying quantities (Cyprus, the *māt Nuḥašše* 'land of copper' near Aleppo, Antilebanon, Feinân and Ezion-geber, Serâbîṭ el-Khâdim in Sinai, where traces of ancient workings are still visible, and Madiama off the SE. end of the Gulf of 'Aqaba). Copper was commonly alloyed with tin to harden it, thus yielding bronze, which is commonly meant when *nāḥāsh* denotes worked metal, *e.g.* weapons (1 S 17^{5}; cf Homer *Il.* xviii. 474). Copper or perhaps bronze, commonly

mistranslated 'brass' in the English Bible, is often mentioned for its value (Is 60[7]) or as money (Mt 10[9]) and as a symbol of dazzling heat or brilliance (Dt 28[23], Dn 10[6]), hardness or strength (Is 45[2], Ps 107[16], Job 6[12] 40[18] 41[27], 1 Co 13[1]). The Hebrew *n*ᵉ*ḥōsheth muṣhābh* 'bright brass' (Ezr 8[27], RV) of some of the vessels from the Temple means literally 'copper of ruddy ore,' perhaps 'orichalc,' an alloy of copper held by some to have been a form of brass. Lastly, the Hebrew *ḥashmal* 'amber' (Ezk 1[4, 28], AV and RV) could not have been that, since it would have perished in the fire; it was probably the Assyrian *elmēšu* 'brass' (Thompson), rather than 'electrum' (Forbes), and perhaps also the Egyptian *ḥsmn* 'bronze.' Brass has been found in excavations of the third Semitic period (*c* 1400–1100) in Palestine and in Rhodes of the 6th cent. B.C., and several classical writers speak of smelting it (Aristotle, Strabo, Pliny). Ezekiel, therefore, in describing 'the sparkle of brass like the appearance of fire, having a covering about it' seems to be referring to the Assyrian brass-founder's furnace with a dome over it, such as he may actually have seen. G. R. D.

BRAVERY.—In Is 3[18] (AV) 'the bravery of their tinkling ornaments' (RV 'the bravery of their anklets') bravery means splendour, ostentation (RSV 'the finery of the anklets').

BRAY.—In AV and RV of Pr 27[22] 'bray' has the obsolete sense of 'crush' (so RSV).

BRAZEN SEA.—See Temple.

BRAZEN SERPENT.—See Serpent [Brazen].

BRAZIER.—See Coal and Firepan.

BREACH.—'Breach' is a literal translation of the Hebrew in AV of 2 S 6[8], 1 Ch 13[11] 'the Lord had made a breach upon Uzzah' (RV, RSV 'had broken forth'); and Job 16[14] 'He breaketh me with breach upon breach' (so RV, RSV). The word is used in these passages figuratively of an outburst of wrath.

BREAD.—The pre-eminence of bread in Hebrew diet is shown by the frequent use in OT from Gn 3[19] onwards, of 'bread' for food in general. It was made chiefly from wheat, barley, and, according to Ezk 4[9], beans, lentils, millet, and spelt—probably any millable grain which could be baked in time of scarcity. Whether or not there was a class distinction between eaters of barley and wheaten bread is not certain.

Bread was made from the sifted grain, rubbed, pounded or ground (Nu 11[8]) into flour, and the great number of millstones found on most archaeological sites in Palestine show that the custom was universal, and suffered but little change over the centuries. Two qualities of flour are distinguished, a coarse sort obtained by the usual crushing methods (*ḳemaḥ*), and a fine meal for honoured guests (Gn 18[6]) or the king's table (1 K 4[22]) (*sōleth*). The flour was mixed with water and kneaded in a wooden basin or **kneading bowl** (Ex 8[3] 12[34]), and in the emergency of the Exodus from Egypt was at once made into **cakes** and baked, and consequently became the prototype of the *maṣṣôth*, the unleavened bread, which was alone permitted for the altar celebration, during Passover and the immediately following Feast of Unleavened Bread (Ex 13). The Râs Shamra tablets, however, show that this feast was an ancient Canaanite agricultural rite. On ordinary occasions, a small lump of the previous day's baking, which had been kept for the purpose, was broken down and mixed with dough. The whole was then set aside for a few hours till thoroughly leavened (see Leaven).

Three modes of firing bread are found in OT, as in the East at the present day. (*a*) The first is represented by Elijah's 'cake baked on the hot stones' (1 K 19[6]). A few flat stones are gathered together, and a fire lighted upon them. When the stones are sufficiently heated, the embers are raked aside, the cakes are laid on the stones and covered with the embers. After a little the ashes are again removed. the cake is turned (Hos 7[8]) and once more covered. Presently the cake is ready. (*b*) In Syria and Arabia to-day a convex iron plate is much used, especially among the Bedouin. It is placed over a small fire-pit with the convex side uppermost, on which the cakes of dough are laid and fired. The Hebrew '**baking-pan**' (Lv 2[5] 7[9] or griddle) must have resembled this species of iron 'griddle.' (*c*) The settled population, however, chiefly made use of one or other of the various kinds of **oven,** then as now called *tannûr*. In one form, which may be termed the bowl-oven, since it consists of a large clay bowl inverted, with a movable lid, the heat is applied by heaping cattle dung, etc., on the *outside*. The cakes are baked on the heated stones covered by the oven. In other parts of the country the jar-oven is used. This is really a large earthenware jar which is heated by fuel, consisting of stubble (Mal 4[1]), grass (Mt 6[30]), dry twigs (1 K 17[12]) and the like, placed in the bottom of the jar. When the latter is thoroughly heated, the cakes are applied to the inside walls. From this type was developed the pit-oven, which was formed partly in the ground, partly built up of clay and plastered throughout, narrowing from the bottom upwards. Many of these pit-ovens have been discovered in recent excavations. It is to the smoke issuing from one of these, while being heated, that the smoke of the ruined cities of the plain is compared in Gn 19[28] (EV **furnace,** an often unnecessary rendering for 'oven'). Such no doubt were the ovens of the professional bakers in the street named after them in Jerusalem (Jer 37[21]).

Bread-making was at all times the special charge of the women of the household. Even when, as we have just seen, baking became a recognized industry, a large part of the baker's work had been, as now in the East, merely to fire the bread baked by the women at home.

A considerable variety of **bakemeats** (Gn 40[17], literally 'food, the work of the baker') is met with in OT, but only in a few cases is it possible to identify their nature or form. The ordinary cake—the **loaf** of OT and NT—was round and fairly thick; such at least was the rolling 'cake of barley bread' of Jg 7[13]. These cakes were always broken by the hand, never cut. A cake frequently used for ritual purposes (Ex 29[2] and often) seems, from its name, to have been pierced with holes like the modern Passover-cakes. The precise nature of the **cracknels** of 1 K 14[3] (ARV 'cakes') is unknown. The **wafer,** often named in ritual passages (cf also Ex 16[31]), was evidently a very thin species of cake.

A. R. S. K.—B. J. R.

BREAD OF THE PRESENCE.—See Showbread.

BREAKFAST.—See Meals.

BREASTPLATE.—See Armour, 2 (*c*), Breastpiece.

BREASTPIECE (of the High Priest).—In the directions for the official dress of the high priest, as laid down by the Priestly writer, a prominent place is occupied by the breastpiece (AV, RV **breastplate**) or pectoral. The fuller designation 'the breastpiece of judgment' (Ex 28[15], Sir 45[10]) is significant of its purpose; it had pouches in which were kept the sacred lots, Urim and Thummim (q.v.) by means of which judgment was given. The special directions for the making of the breastpiece are given in Ex 28[13–30] (cf 39[8–21]). It was made of an oblong piece of richly wrought linen, which, folded in two, formed a square of half a cubit, or nine inches, in the side. Attached to the outer side were four rows of precious stones in gold settings, twelve in all, each stone having engraved upon it the name of a tribe 'to bring them to continual remembrance before the Lord' 28[29]). The breastpiece was kept in position by means of 'twisted chains like cords, of pure gold,' by which it was attached to 'two settings of filigree' on the shoulder pieces of the ephod, while the lower part was fastened to the ephod by a 'face of blue' at each corner (28[22, 25, 28]). A. R. S. K.—J. Ma.

BREECHES.—Rather short drawers of white linen ordered to be worn by the priests on the grounds of modesty (Ex 28[42] 39[28], Lv 6[10] 16[4], Ezk 44[18], Sir 45[8]). Josephus describes those worn in his time in *Ant.* III.

vii. 1 (152). The modern trousers are represented in AV and RV by **hosen** (q.v.).

BRETHREN OF THE LORD.—Jesus was Mary's first-born (Lk 2[7]), and she subsequently bore to Joseph four sons, James, Joseph (Mt 13[55] reads *Joses* [so AV], which in Rabbinic literature stands for the same name), Judas and Simon, and several daughters (Mt 13[55-56] = Mk 6[3]. The first two were perhaps sons of another Mary). During His ministry the Lord's brethren did not believe in Him. They sneered at Him (Jn 7[3-5]), and once they concluded that He was mad, and wished to arrest Him and convey Him away from Capernaum (Mk 3[21, 31]). After the Resurrection, however, convinced by so tremendous a demonstration, they joined the company of the believers (Ac 1[14]). Paul says of them that they took their wives along on their missionary journeys as the other apostles had done (1 Co 9[5]). James became one of the 'pillars' of the church of Jerusalem (Gal 2[9], Ac 15[13]) after he had received a revelation of the risen Christ (1 Co 15[7]); Paul went to visit him on his last visit (Ac 21[18]) and his church was later on named the 'seat of James' (*Cathedra Jacobi*). Josephus refers to him as 'brother of the one who is called Christ.'

In the early days, partly at least in the interests of the notion of Mary's perpetual virginity, two theories were promulgated in regard to the 'Brethren of the Lord.' (*a*) They were supposed to be *sons of Joseph by a former marriage*, having thus no blood-relationship with Jesus. So Origen, Clement of Alexandria, Epiphanius. (*b*) They were held to be His *cousins, sons of Mary, the wife of Alphaeus* (Mt 27[56] = Mk 15[40]); 'brother' here implying merely kinship, as Abraham calls himself and his nephew Lot 'brethren' (Gn 13[8]), and Laban calls Jacob, his sister's son, his 'brother' (29[15]). So Jerome and Augustine. That Mary, the wife of Alphaeus and mother of James the Little, was a sister of Mary the mother of Jesus, is an inference from Jn 19[25], where it is supposed that only three women are mentioned: (1) His mother, (2) His mother's sister, viz., Mary, the wife of Clopas (=Alphaeus), and (3) Mary Magdalene. But there are probably four: (1) His mother, (2) her sister Salome, the mother of the sons of Zebedee (cf Matthew = Mark), (3) Mary, the wife of Clopas, and (4) Mary Magdalene. It is very unlikely that two sisters should have been named Mary; and moreover, James, the son of Alphaeus, was an Apostle (Mt 10[3] = Mk 3[18] = Lk 6[15]), and none of the Lord's brethren was an Apostle in His life-time (cf Ac 1[13-14]). D. S.—S. L.

BRIBERY.—See CRIMES AND PUNISHMENTS, 5.

BRICK.—The use of sun-dried bricks in the period of the OT, beside lime-stone, is attested both by Scripture and by excavations (see HOUSE, 1); their use was due partly to cheapness, especially in districts where stone was scarce, and partly to the lack of adequate tools, at any rate in the early period, for working stone. The process of making bricks is more or less the same everywhere. Suitable mud or clay is thoroughly moistened and reduced to uniform consistency by treading and kneading (Nah 3[14] and 2 S 12[31], where these tasks and handling the brick-mould are imposed on captives); this is then carried in baskets to the brick-moulder, who puts the right quantity in his mould, an open woven frame with one of its four sides prolonged as a handle, and wipes off the superfluous clay with his hand; the mould is removed and the brick left on the ground to be dried by the sun. In Egypt, where bricks were used also for paving (Jer 43[9]), the consistency of the clay was increased by mixing chopped straw and refuse with it; indeed, bricks made without this, as found at Pithom, are rare in Egypt (Ex 5[7-19]). An expert moulder in Egypt to-day is said to be able to turn out some 3000 bricks a day. Egyptian bricks resembled our own in shape, while Babylonian bricks were generally as broad as they were long; the earliest Palestinian bricks are said to have followed the Babylonian model, but bricks of very varying shapes have been found. The burning of bricks in a kiln was a foreign practice to the Hebrews (Gn 11[3]); for fire-burnt bricks have very rarely been found in Palestine, being used only for plinths and paving, and glazed bricks are practically unknown. In low-lying districts the houses were structures of mud-brick, faced with jambs and lintels of stone, and the rain-fall was absorbed by grass growing on the roof (Ps 129[6]); consequently, they would have to be regularly repaired every autumn against the coming rains. The ritual use of bricks as incense-altars may also be noted (Is 65[3]). Clay-bricks were used also for writing, as the letters found at Tell el-Amarna (*c* 1400 B.C.) and the library found at Ugarit or Râs Shamra (*c* 1400–1350 B.C.) prove; the practice was Babylonian and did not long survive in the west, since it required a specially fine clay which was not readily available there. Thousands of Babylonian and Assyrian, Hittite and Hurrian (Horite), documents written on clay-bricks have been recovered by archaeologists; and these include maps and plans, which illustrate the command to the prophet to draw a plan of Jerusalem on a 'tile' or rather a 'brick' (Ezk 4[1], where the Hebrew word is the same as the Babylonian word for a building brick).

A. R. S. K.—G. R. D.

BRIDE, BRIDEGROOM.—See MARRIAGE.

BRIDGE.—Only 2 Mac 12[13] AV, where RV reads the proper name *Gephyrun* (RSV appears to render by 'earthworks'). The Greek text may be corrupt. See RVm and RSVm. For the extreme antiquity of the arch see ARCH.

BRIDLE.—See BIT.

BRIER.—See THORNS.

BRIGANDINE.—The 'brigand' was originally simply a light-armed irregular foot soldier, and the coat of mail which he wore was called a 'brigandine.' The word is used in AV in Jer 46[4] 51[3] (RV, RSV 'coat of mail').

BRIMSTONE.—Hebrew *gophrîth*, probably connected with Hebrew *kōpher*, 'pitch.' It is the same as sulphur, one of the chemical elements. It is found in volcanic regions, in solid and in gaseous form. Its first occurrence in the Bible is in the story of the destruction of Sodom and Gomorrah (Gn 19[24f]). We are there told that the Lord 'rained upon Sodom and Gomorrah brimstone and fire'; the words which follow, 'from the Lord out of heaven,' are usually regarded as a gloss. What happened has been explained as an eruption of petroleum caused by an earthquake, an explanation which attempts to combine the Genesis account with the word 'overthrow' (Heb. *mahpēkhāh*), which is frequently used in the OT to describe the catastrophe, and which implies an earthquake. But this ignores the difficulties which are raised by the story if it is taken as historical. In the first place, it is clear that the story is one form of the myth of the destruction of mankind, as is shown by Gn 19[31], where it is implied that Lot and his daughters are the only survivors of the catastrophe. In the second place, we are told in Gn 13[10] that the whole 'circle' of the Jordan where Lot settled, was a well-watered plain, like 'the garden of the Lord,' before the act of divine judgment turned it into a salt and desolate waste. But geological evidence shows that the Jordan has flowed into the Dead Sea as it is now from long before historical times. Hence it is probable that the Sodom-legend may have arisen, as Gunkel suggests, in a region where the volcanic features of the description would be more applicable, and may have been transferred to the Dead Sea valley to serve as an aetiological myth explaining the origin of the Dead Sea. It has been pointed out that there is no mention of the Dead Sea in the legend, and it is clear from Gn 13–14 that in the Hebrew tradition the Dead Sea did not exist before the catastrophe. The story is frequently referred to in later Hebrew literature, and is mentioned in the NT (cf Dt 29[23], Is 1[9] 13[19], Jer 20[16] 50[40], Am 4[11], Lk 17[29]). The element of fire and brimstone has passed into the

imagery of the Apocalypse in the picture of 'the lake that burneth with fire and brimstone (Rev 20[10])

S. H. He.

BROAD PLACE.—See CITY.

BROID.—To broid or to braid is to plait. Both spellings are used in AV, 1 Ti 2[9] 'with broided hair' (Gr. 'in plaits'; RV, RSV 'braided'), and Jth 10[3] 'braided the hair of her head' (so RV; RSV 'combed').

BROIDER.—This English word has no connexion with *broid*. It means to adorn cloth with needlework. The modern form is *embroider*. 'Broider' occurs in AV in Ex 28[4] (RV, RSV 'of chequer work') and in AV and RV in Ezk 16[10, 13, 18] 26[16] 27[7, 16, 24] (RSV 'embroider'). See EMBROIDERY.

BRONZE.—See BRASS.

BROOCH.—Ex 35[22] RV and RSV, for AV 'bracelets.' See ORNAMENTS, 5.

BROOK.—The Hebrew words thus rendered are: **1.** *'āphîḳ*, meaning the actual bed of the stream, Ps 42[1] (AV, RV; RSV 'stream'); translated also by 'stream' and 'river.' RSV renders by 'brook' only in Jl 1[20]. **2.** *y^e'ôr*—almost always used of the Nile and water-trenches of Egypt. It is rendered by 'brook' in AV only in Is 19[6-8] (RV, RSV 'Nile'). In AV of Job 28[10] it is rendered 'rivers' (RV, RSV 'channels'); in Is 33[21] it is rendered 'stream' (AV, RV, RSV); in Dn 12[5f] (AV, RV 'river'; RSV 'stream') it stands for the Tigris. **3.** *mîkhāl*, a word of uncertain meaning, found only in 2 S 17[20] (AV, RV, RSV 'brook'). **4.** *naḥal* is the most usual word for 'brook' in EV. It is the exact equivalent of the Arabic *wâdî*, which means a valley containing a stream of water. It may be applied to the valley (Nu 21[12], etc.), or to the water-course alone (Dt 9[21], etc.), which is still 'the wady,' even after it has escaped from the valley. **4.** In Jer 15[18] (RV, RSV) 'as a deceitful brook' follows LXX in reading *k^emê*, 'as waters of' for MT *k^emô*, 'as' (AV 'as a liar').

The slopes of the mountain range of Western Palestine are deeply furrowed by a succession of great wadys. The sides of the mountains that dip into the Jordan Valley are far steeper than those to the W., and the streams flowing eastward plunge down through awful chasms, worn deep with the lapse of ages. In the longer descent westward the valleys frequently open into beautiful and fertile glades. For the most part the brooks, fed only by the rain, dry up in the summertime, and the mills along their banks fall silent, waking to fresh activity again only with the music of the rushing storm. There are, however, streams fed by perennial springs, such as *el-'Aujā* and the Kishon, W. of Jordan, and the Yarmuk and the Jabbok on the E. W. E.—H. H. R.

BROOM.—A tree (Heb. *rōthem*) mentioned in 1 K 19[5f], Job 30[4], Ps 120[4] (always **juniper** in AV, and **broom** in RSV; 'broom' in RV in Job 30[4] and in RVm in the other passages). It is undoubtedly the Arabic *ratam*, a species of broom very common in desert places in Palestine and Sinai. This broom (*Retama retem*) is in many such places the only possible shade; it sometimes attains a height of 7 to 8 feet (1 K 19[5]). The root is still burned to furnish charcoal (Ps 120[4]). In Job 30[4] mention is made of the roots being cut up for food. As they are bitter and nauseous and contain very little nourishment, this vividly pictures the severity of the famine in the wilderness. E. W. G. M.

BROTHER.—See FAMILY, and BRETHREN OF THE LORD.

BROTHERLY LOVE.—*Philadelphia* is 'brotherlove,' the love one has for brothers and sisters; in the NT it is used in the larger sense of 'love of the brethren' (so 1 Th 4[9], 1 P 1[22]; and Ro 12[10], He 13[1], and 2 P 1[7] might well have been so translated for the sake of consistency). The adjective in 1 P 3[8] is also correctly rendered, 'have love of the brethren.' This adjective appears in classical Greek in its primary (family) sense, as the designation, *e.g.* of the Graeco-Egyptian king Ptolemy *Philadelphus*, and of Attalus II. of Pergamum, founder of Philadelphia (Rev 1[11], etc.) which was named after this king. Jews called each other 'brethren' as being 'sons of the family of Abraham' (Ac 13[26]). First occurring in its Christian sense in 1 Th 4[9], its elements lie in the teaching of Jesus. 'Call no man your father on earth, for you have one Father, who is in heaven,' for 'you are all brethren' (Mt 23[8f]; cf 6[9]); the love of the natural household is transferred, with a deepened sense, to 'the household of faith' (see Gal 6[10]; cf Eph 2[19]). This sentiment is formed in the community gathered around Christ its 'first-born,' the family of the 'sons' and 'heirs of God and fellow heirs with Christ' (Ro 8[14-17, 29]). 'Go to my brethren,' the Risen Christ had said, 'and say to them, "I am ascending to my Father and your Father"' (Jn 20[17]; cf Mt 12[49f] 28[10]); He required them to cherish toward each other the love He showed toward them, making this the mark of discipleship (Jn 13[34f] 15[12f], 1 Jn 2[7f] 3[11] 4[20f], 2 Jn [5], 1 Co 8[11], etc.). The body to which this love belongs is called 'the brotherhood' in 1 P 2[17] (cf 5[9]), where love is associated with respect for humanity and fear of God as a fundamental Christian instinct (cf 1 Th 4[9], Col 3[14], 1 Co 13, etc.). St. Paul describes this affection as the mutual 'care' of 'members' of 'one body' (1 Co 12[12-27]); it forbids envy, unkindness, schism; it animates, and virtually includes, all services and duties of Christians toward each other (1 Co 13, Gal 5[13-15]); it is the first 'fruit of the Spirit' (Gal 5[22], cf 4[6f] 5[6]), the fruit of God's love to us and the test of our love to God (1 Jn 4[11-21]), 'the fulfilling of the law' (Ro 13[8-10]), and the crown of Christian purity (1 P 1[22]); the Cross supplies its model and its inspiration Eph (4[31-5]2, 1 Jn 3[16]). When St Paul speaks of 'love,' he means 'brother-love' in the first place, but not exclusively (Gal 6[10], 1 Th 5[15], Ro 12[18-21]; cf Mt 5[43-48], etc.). Among the manifestations of *philadelphia*, hospitality (*philoxenia*) is conspicuous (He 13[1f], 1 P 4[8-10], 3 Jn [5-8]); also sharing and contributing to the needs of the saints (Ro 12[13] 15[25], He 6[10] 13[16], 1 Jn 3[17f]). The prominence and strangeness to the world of this feature of primitive Christianity are strikingly attested by the *Epistle to Diognetus*, §1; Tertullian's *Apol.*, §39; and (from outside) Lucian's *de Morte Peregrini*, §§12 and 16 (Loeb Classical Library); and Julian's *Epist.*, xxii (Loeb). G. G. F.—J. H. Sc.

BROWN.—See COLOURS, 2.

BRUIT.—A bruit (pronounced as *brute*) is a rumour or report (Fr. *bruit*, from *bruire* 'to roar.' The word stands in AV in Jer 10[22] (RV, RSV 'rumour'), in AV and RV in Nah 3[19] (RSV 'news'), and in AV and RV in 2 Mac 4[39] (RSV 'report').

BUCKET.—See HOUSE, 9.

BUCKLE.—See ORNAMENTS, 5.

BUCKLER.—See ARMOUR, 2(*a*).

BUGEAN, Ad. Est 12[6] (RV).—See BOUGAEAN.

BUGLE.—In 1 Co 14[8] RSV renders *salpinx* by 'bugle' (AV, RV **trumpet**). Elsewhere (*e.g.* Mt 24[31], 1 Co 15[52], 1 Th 4[16], He 12[19]) RSV renders the same word by 'trumpet,' as AV and RV (save 1 Th 4[16], where they have 'trump'). See MUSIC AND MUSICAL INSTRUMENTS.

BUILDER.—See ARTS AND CRAFTS, 3.

BUKKI.—**1.** Son of Jogli, a prince of the tribe of Dan, and one of the ten men entrusted with the task of dividing the land of Canaan among the tribes of Israel, Nu 34[22]. **2.** Son of Abishua and father of Uzzi, fifth in descent from Aaron in the line of the high priests through Phinehas, 1 Ch 6[5, 51], Ezr 7[4], 1 Es 8[2] (AV, RV **Boccas**); called **Borith** in 2 Es 1[2].

BUKKIAH.—A Levite of the sons of Heman, and leader of the sixth band or course in the Temple service, 1 Ch 25[4, 13].

BUL.—1 K 6[38], the Canaanite name for the month which the Babylonians termed **Marcheshvan.** See TIME.

BULL, BULLOCK.—See OX.

BULRUSH.—See Reed.

BULWARK.—This is a defensive structure built to reinforce the walls of a city. One of the words so translated is *ḥêl*, Is 26[1] (AV, RV, RSV), Ps 48[13] (AV, RV; RSV '**ramparts**'). The same word is elsewhere rendered 'rampart' in RV and RSV; so 2 S 20[15] (AV 'trench'), La 2[8], Nah 3[8] (AV 'rampart'). In 1 K 21[23] RSV has '**bounds**' (AV 'wall,' RV 'rampart'). It denotes an outer wall, of less height than the main wall. At Tell Sandaḥannah—probably Mareshah—there were found two walls of the same period, the outer being in some places fifteen feet in advance of the inner. Jerusalem was latterly fenced on the N. and NW. by three walls. A different word is rendered 'rampart' in Nah 2[1] (AV, RV '**munition**').

In Dt 20[20], Ec 9[14] AV and RV have 'bulwarks' for what is clearly an offensive construction, and RSV better renders by '**siegeworks**'.

In 1 Ti 3[15] RSV uses 'bulwark' as a metaphor for the Church (AV, RV 'ground').

BUNAH ('intelligence').—A man of Judah, a Jerahmeelite, 1 Ch 2[25].

BUNCH.—Besides meaning *bundle* (of hyssop, Ex 12[22], Hebrew something *tied* together) and *cluster* (of raisins, 2 S 16[1] [AV, RSV; RV 'cluster'], 1 Ch 12[40] [AV; RV, RSV 'cluster'], Hebrew 'something *dried*'), bunch is also used in AV and RV in Is 30[6] for the hump of a camel (RSV 'hump'). Cf Shakespeare's *Richard III.* I. iii. 248—'This pois'nous bunch-back'd toad.'

BUNDLE.—A bundle of money is spoken of in Gn 42[35], of myrrh in Ca 1[13] (AV, RV; RVm, RSV 'bag'), of barley in Ru 2[16] (RV, RSV; AV 'handfuls'), of brushwood in RSV in Jg 9[48f] (AV, RV 'bough'), of life in 1 S 25[29] (RSV 'bundle of the living'); also in RVm and RSV in Jer 10[17] of a bundle for a journey (AV, RV 'wares'); and in NT of tares, Mt 13[30], and of sticks, Ac 28[3].

BUNNI.—**1.** A Levite, Neh 9[4]; see Binnui. **2.** Another Levite, Neh 11[15]; but 1 Ch 9[14] has 'of the sons of Merari' for 'son of Bunni.' **3.** One who sealed the covenant, Neh 10[15] (but perhaps a repetition of Bani).

BURDEN.—The word so rendered in the OT is derived from a root which means to 'lift' or 'carry.' It has the two senses of an actual burden and a prophetic utterance. Instances of the former are 2 K 5[17], Neh 13[19]. Related usages are frequent; in Is 22[25] the word suggests the pressure of something hanging on a peg, in Nu 11[11] the responsibility and in Hos 8[10] (AV, RV) the privilege of government (RSV follows LXX), in Ps 38[4] the responsibility for sin. The second sense is that of a solemn utterance, and RVm and RSV 'oracle' (Is 14[28] *et al.*) is to be preferred. It was customary to explain this use of the word as due to the threatening character of the utterance; but many of the utterances are not threatening (cf Zec 12 9[1, 9–17]), and the word-play in Jer 23[33ff] involves a reproof of the men who were disposed to regard the oracle of God as literally a burden. Most utterances of the prophets, moreover, were of necessity from their occasion minatory. 'Burden' in this second usage denotes simply something taken up solemnly upon the lips, both weighty in itself and weighty in its communication. It is not used of merely human utterances, but always carries with it the suggestion of Divine inspiration, actual or falsely assumed (La 2[14]). In Pr 30[1] 31[1], where AV has 'prophecy' and RV 'oracle' (with RVm 'burden'), RSV takes the word as a place name 'Massa' (cf RVm).

In the NT, Ac 21[3] (RSV 'cargo') is an instance of the literal use. The figures are easy. The word is used for the ordinances of the Law as interpreted by the Pharisees (Mt 23[4], Lk 11[46]), for the prohibitions of the Apostolic decree (Ac 15[28]; cf Rev 2[24]), for the pressure and load of life (Mt 20[12]), for an exacting or even legitimate charge upon others (2 Co 11[9] 12[13f]), for the imagined difficulties of following Christ (Mt 11[30]). Two other kind of burdens with their right treatment are contrasted. Other men's errors and sorrows must be shared in sympathy (Gal 6[2]); though in the service of Christ there can be no transfer of obligations, but each man must carry his own kit and do his own duty (Gal 6[5]; RSV 'load'). R. W. M.—**H. H. R.**

BURGLARY.—See Crimes and Punishments, **6.**

BURIAL.—See Mourning Customs, Tomb.

BURLAP.—A coarse canvas made of hemp. It is found only in Sir 40[4] 'clothed in burlap' (AV 'a linen frock,' RV 'a hempen frock'). See Frock.

BURNING.—See Crimes and Punishments, **11.**

BURNING BUSH.—See Bush.

BURNT-OFFERING.—See Sacrifice.

BUSH (*seneh*), Ex 3[2–4], Dt 33[16].—The 'burning bush' has traditionally been supposed to be a kind of bramble (*Rubus*), of which Palestine has several varieties, but one of the thorny shrubs of Sinai of the acacia family would seem more probable. The article 'the' is used five times with *seneh* in Ex 3[2–4], and *seneh* is used only of this bush. Some scholars suggest *seneh* (Dt 33[16]) echoes the name 'Sinai.' Mk 12[26], Lk 20[37] 'in the passage about the bush' (AV 'in (or at) the bush'; RV 'in *the place concerning* the bush').

E. W. G. M.—**R. A. B.**

BUSHEL.—See Weights and Measures.

BUSTARD.—See Bittern.

BUTLER.—See Cupbearer.

BUTTER.—See Food, **5,** Milk.

BUZ.—**1.** The second son of Nahor and Milcah, and nephew of Abraham, Gn 22[21]. Elihu, one of the friends of Job, Job 32[2], is called a **Buzite,** and may have belonged to a tribe of that name against which judgments are denounced by Jeremiah, Jer 25[23]. **2.** A man of the tribe of Gad, 1 Ch 5[14].

BUZI.—The father of the prophet Ezekiel (1[3]) and consequently a member of the priestly house of Zadok. Of the man himself nothing is known. Jewish writers were led to identify him with Jeremiah, partly by a supposed connexion of the name with a verb meaning 'despise,' and partly by a theory that when the father of a prophet is named it is to be understood that he also was a prophet.

BUZITE.—See Buz.

BUZZARD.—In Dt 14[13] RSV has 'buzzard' (AV, RV **glede**) for Hebrew *rā'āh*, for which *dā'āh* should be read with Sam. and LXX. Probably a species of **kite** was indicated.

BY.—In the AV *of* is generally used for the agent and *by* for the instrument. Thus Mt 1[22] 'that it might be fulfilled which was spoken of (RV 'by') the Lord by (RV 'through') the prophet' (RSV 'what the Lord had spoken by the prophet').

In 1 Co 4[4] 'I know nothing by myself,' *by* means *contrary to, against* (so RV), as in Hamilton's *Catechism,* 1559 (the Tabil), 'Jugis quhilk fur lufe of rewardis dois ony thing by the ordour of justice'; also fol. vii, 'cursit ar thai quhilk gangis by ye commondis of God.' RSV reads 'I am not aware of anything against myself.'

BY AND BY.—In AV 'by and by' means *immediately,* not as now *after some time.* Thus Lk 21[9] 'the end is not by and by' (RV 'immediately'; RSV 'will not be at once').

BYWAY.—See Roads.

C

CAB.—See Weights and Measures.

CABBON.—A town of Judah near Eglon, Jos 15[40]; perhaps the same as **Machbenah** (q.v.); possibly modern *Kh. Hebrah.*

CABIN.—The English word 'cabin' is now chiefly confined to an apartment in a ship, but was formerly used of any small room. It occurs in AV for the cell (which is the word in AVm, RV, and RSV) in which Jeremiah was confined (Jer 37[16]). Cf Spenser, *FQ* I. vi. 23:

> 'So long in secret cabin there he held
> Her captive to his sensual desire.'

CABUL.—A town of Asher on the border of Zebulun, Jos 19[27] (RSV **Kabul**). The district was ceded by Solomon to Tyre, 1 K 9[13]. Probably modern *Kâbûl*, E. of Acco.

CADDIS, 1 Mac 2[2] (AV).—See Gaddi, **2.**

CADMIEL, 1 Es 5[26, 58] (AV).—See Kadmiel.

CAESAR.—This is the *cognomen* or surname of the *gens Julia*, which was borne, for example, by its most illustrious representative, Gaius Julius Caesar. The emperor Augustus (q.v. 27 B.C. to A.D. 14) had it by adoption, and was officially named 'Imperator Caesar Augustus.' His stepson, the emperor Tiberius (q.v.), officially 'Tiberius Caesar Augustus' (A.D. 14–37), had it through his adoption by Augustus. It was borne also, amongst other less important persons, by the emperor Gaius (q.v.) Caesar Germanicus (A.D. 37–41), who was a son of Germanicus, the adopted son of the emperor Tiberius. These alone among the Roman emperors had it as a family name, but regularly the emperors bore it as a title, and hence we find it continued in the titles *Kaiser* and *Czar*. The beginning of this use is seen in the NT. There the name is found always, except twice (Lk 2[1] 3[1]), by itself, simply equal to 'the Emperor.' The remaining emperors of the 1st cent. are Claudius (q.v.) (41–54), Nero (q.v.) (54–68), Galba (June 9, 68–Jan. 15, 69), Otho (Jan. 15–Apr. 69), Vitellius (Jan. 2–Dec. 20 [?], 69), Vespasian (q.v.) (69–79), Titus (q.v.) (79–81), Domitian (q.v.) (81–96), Nerva (96–98), Trajan (q.v.) (98–117).

A. So.—E. R. H.

CAESAR'S HOUSEHOLD.—In Ph 4[22] 'those of Caesar's household' send special greetings to the Philippians. St. Paul wrote from Rome, where he was in semi-captivity, and some of the Christians in Rome belonged to the efficient and talented body of slaves and freedmen who worked in the Imperial palace and performed varied service for the emperor Nero. The number of these servants was very large, and amongst them were accountants, administrators, secretaries, stewards, etc., as well as a great many officials concerned with humbler duties. They were persons of influence and often of considerable wealth, drawn from all nations within the Empire. The testimony of inscriptions shows that among 'those of Caesar's household' were many names such as those that occur in Ro 16.

A. So.—E. R. H.

CAESAREA (modern *Qaiṣāriyeh*).—A city rebuilt by Herod the Great on the site of Straton's Tower, on the coast of Palestine, between Joppa and Dora. Its special features were—a large harbour protected by a huge mole and by a wall with ten lofty towers and colossi; a promenade round the port, with arches where sailors could lodge; a temple of Augustus raised on a platform, and visible far out at sea, containing two colossal statues of Rome and the Emperor; a system of drainage whereby the tides were utilized to flush the streets; walls embracing a semicircular area stretching for a mile along the sea-coast; two aqueducts, one of them 8 miles in length; a hippodrome; an amphitheatre capable of seating 20,000 persons; a theatre; a court of justice, and many other noble structures. The city took 12 years to build, and Herod celebrated its completion (10–9 B.C.) with sumptuous games and entertainments. Herod used the port for his frequent voyages. Here he condemned to death his two sons Alexander and Aristobulus. After the banishment of Herod's successor Archelaus, Caesarea became the official residence of the Roman procurators of Palestine (broken only by the brief interval during which it was under the independent rule of Herod Agrippa I., who died here in A.D. 44 [Ac 12[20–23]]). The fifth of these, Pontius Pilate, ordered a massacre in the hippodrome of Caesarea of those Jews who had flocked to implore the removal from Jerusalem of the profane eagle standards and images of the Emperor recently introduced. Only on their baring their necks for death and thus refusing to submit, did Pilate revoke the order, and direct the ensigns to be removed. Christianity early found its way here, Philip probably being the founder of the Church (Ac 8[40]), while Paul passed through after his first visit to Jerusalem (Ac 9[30]). Caesarea was the scene of the baptism of Cornelius (Ac 10). Here also the Holy Spirit for the first time fell on heathen, thus inaugurating the Gentile Pentecost (v.[44]). Paul may have passed through Caesarea (Ac 18[22]) at the time when numbers of Jewish patriots, captured by Cumanus, had here been crucified by Quadratus, legate of Syria. It was at Caesarea that Paul's arrest in Jerusalem was foretold by Agabus (Ac 21[8–14]). Here he was imprisoned for two years under Felix (Ac 23[23–35]). During that time a riot broke out between Greeks and Jews as to their respective rights, and Felix ordered a general massacre of the Jews to be carried out in the city. On the recall of Felix, Nero sent Porcius Festus, who tried Paul (Ac 25[6]) and also allowed him to state his case before Herod Agrippa II. and Bernice (Ac 25[23–26[32]]). Under the last procurator, Gessius Florus, the Jews revolted, and began the Jewish war of A.D. 66–70. A riot in Caesarea led to a massacre in Jerusalem, and simultaneously 20,000 of the Jewish population of Caesarea were slaughtered. During the war, Caesarea was used as the base for operations, first by Vespasian, who was here proclaimed Emperor by his soldiers (A.D. 69), and later by his son Titus, who completed the destruction of Jerusalem. Titus celebrated the birthday of his brother Domitian by forcing 2500 Jews to fight with beasts in the arena at Caesarea. The city was made into a Roman colony, renamed *Colonia Prima Flavia Augusta Caesariensis*, released from taxation, and recognized as the capital of Palestine.

Several Church Councils were held at Caesarea. It was from A.D. 200 to 451 the residence of the Metropolitan bishop of Palestine. Origen taught here, and Eusebius was its bishop from A.D. 313 to 340. It was the birthplace of Procopius, the historian. In A.D. 548 the Christians were massacred by the Jews and Samaritans. In 638 it surrendered to the Muslims under Abu 'Obeida. It was recovered in 1102 by Baldwin I., who massacred the Saracens in the mosque, once the Christian cathedral. The loot contained the so-called 'Holy Grail' of mediaeval legend. Saladin recaptured Caesarea in 1187, but it was retaken by Richard I. in 1192. The city, however, was so ruined that when restored it covered only one-tenth of the original ground. In 1251 Louis IX. fortified it strongly. In 1265 it was stormed by Sultan Bibars, who utterly demolished it. Sand dunes gradually covered it and the district became malarial. Excavations

are being carried on there by the Department of Antiquities of the state of Israel.

G. A. F. K.—E. G. K.

CAESAREA PHILIPPI.—A place near the scene of Jesus' charge to Peter (Mk 8^{27}, Mt 16^{13-20}). Here was a sanctuary of Pan and the city of Paneas (to-day still *Bāniyās*), first mentioned in connexion with the victory of Antiochus III. over the Egyptians in 198 B.C. When Herod the Great received the territory from Augustus in 20 B.C., he erected a temple here. His son Philip refounded the city, and changed its name from Paneas to *Caesarea* in honour of Augustus—adding his own name to distinguish the town from the similarly named city founded by his father on the sea-coast. (The common assumption that it was named in honour of Tiberius is based on a vague remark of Josephus; but the *era* of the city began 3–2 B.C., under Augustus.) It was rebuilt by Herod Agrippa II. and named Neronias in honour of Nero, but ultimately the old name came once more to the surface and ousted the others. Here Titus celebrated with gladiatorial shows the capture of Jerusalem. It was captured by the Crusaders in 1130, and finally lost by them to the Muslims in 1165. It lies 1150 ft. above the sea in a recess of the Hermon mountains, and is well watered. Under the ancient castle of the Crusaders a copious stream formerly issued from a cave, where was the shrine of Pan. The cave has collapsed in modern times. The modern village is small, and the remains of the Roman city meagre. R. A. S. M.—E. G. K.

CAGE.—Birds were taken to market in a cage or coop of wicker work (Jer 5^{27}; RSV 'basket'); a similar cage might hold a decoy-bird in fowling (Sir 11^{30}). One of Ashurbanipal's hunting scenes shows a cage of strong wooden bars from which a lion is being let loose (cf Ezk 19^{9} RV, RSV). In Rev 18^{2} render, with RSV, 'haunt' (RV 'hold,' RVm 'prison') for AV 'cage.'

CAIAPHAS.—Joseph Caiaphas, the son-in-law of Annas (Jn 18^{13}), was high priest between A.D. 18 and 36. He was a Sadducee and co-operated successfully with Pontius Pilate. He figures thrice in the NT; (1) In Jn 11^{49ff} he is said to have advised the chief and priests the Pharisees to let Jesus die for the people. (2) When Jesus was tried before the Sanhedrin (Mt 26^{57-68} || Mk 14^{53-65} || Lk 22^{66-71}), the high priest Caiaphas put the decisive question to Jesus: 'Are you the Christ, the Son of the Blessed?' (Jn $18^{13f, 19}$ makes the high priest Annas question Jesus, and only mentions briefly in $18^{24, 28}$ the trial before Caiaphas). (3) Caiaphas took part in the trial of Peter and John, Ac 4^{6}, and (though not mentioned by name) in the trial of the apostles in Ac $5^{17, 27ff}$. E. H.

CAIN.—In Gn 4^{1} the name (*Ḳayin*) is connected with *ḳānāh*, 'procure.' This is linguistically impossible. Actually it is derived from a root signifying to 'forge' in metal and means 'smith' (cf Arab. *ḳain*). Kenan (Gn 5^{9ff}) is another form of the same name.

Gn 4^{1f}, introducing the story of Cain and Abel, represents them as the first two sons of Adam and Eve; it is clear however that the story was originally told in quite another context. The intent of vv.$^{3-12, 16}$ is to account for the wretched mode of life of some sub-nomad group, which it represents as being due to their ancestor having offered an unacceptable sacrifice and then in jealousy having murdered his brother. For this he was condemned to be 'a fugitive and a wanderer on the earth,' that is to a life without culture and without security. The name Cain (=smith) suggests that the reference may be to a group like the low-caste tribes described by Doughty in *Arabia Deserta* who, forbidden by the precept of their patriarch to own cattle, live by hunting and by doing smith work for the cattle-owning bedouin, who treat them with contempt. Thus the story may well have originated in the desert. It is however impossible that such a depressed group could have maintained the custom of seven-fold blood revenge reflected in vv.$^{13-15}$, even under the protection of the taboo alluded to as 'a mark on Cain.' These verses therefore would seem to come from another tradition, possibly that of the Kenites, who claimed Cain as their (eponymous) ancestor. If so, it may be inferred that the story had in course of time come to be interpreted as the story of the origin of the Kenite tribes, and that vv.$^{13-15}$ were added to it in an attempt to modify the impression of cultural degradation conveyed by the tale in its primary form. The present context of the story suggests an explanation for its inclusion in the primeval history of mankind: the story of the garden of Eden leaves the first man as a tiller of the ground (Gn 3^{23}). But there was another tradition, preserved in 4^{20ff}, which represented nomadism, not agriculture, as the first step in man's economic development. The author of the J document, wishing to include both these traditions in his narrative, reconciled them by means of the story in $4^{3-12, 16}$, which in this context told how the human race was reduced from tilling the ground to a cultureless existence, from which it began to rise with Jubal and his brothers, the 'fathers' of nomadism (vv.$^{20-22}$). While the intrusion of the Kenite tradition, vv.$^{13-15}$, somewhat obscured the significance J had attached to the story, it did not affect the deeper meaning its new context had given it: that of the terrible effects of the Fall; Cain is more hardened than Adam, and his guilt is greater but he feels no shame. The story teaches also the sacredness of human life, the moral holiness of God, and the truth that a result of sin is a liability to succumb to further sin (v.^{7b}).

Once it is recognized that the story in its origin had no connexion with the story of Adam and Eve, the casual reference to Cain's wife in v.^{17} is explained. It is, however, unlikely that so skilled a writer as J would have left unanswered the question as to her identity to which the representation of Cain as the son of the first man inevitably gave rise. Here the fact that in the tradition preserved in Gn 5^{1ff} (P) Kenan (=Cain) appears not as the son but as the great-grandson of Adam may be relevant. It is not impossible that J in his ordering of the traditional material with which he was working also represented Cain as the son of Enosh (cf 4^{26}), and that the representation of him as the son of Adam is due to the redactor who conflated the J narrative with that of P.

The reference to Cain as the (first) builder of a city (v.^{17b}) is from a tradition other than that which treats him as a fugitive and wanderer on the earth. Vv.$^{18-24}$ continue v.^{17a}. It may be noted that although the poem quoted in vv.^{23f} implicitly refers back to v.^{15}, it does so in terms which suggest that the Cain who 'is avenged seven-fold' is not the ancestor of Lamech but his enemy.

In the NT Cain is referred to in He 11^{4}, Jd ^{11}, 1 Jn 3^{12}. The meaning of the last passage is (cf vv.^{9f}) that Cain was a child of the devil and murdered his brother because he was a child of God.

A. H. McN.—C. A. Si.

CAIN, Jos 15^{57} (AV).—See KAIN.

CAINAN.—**1.** The son of Enos and father of Mahalaleel (Lk 3^{37}). See KENAN. **2.** The son of Arphaxad (Lk 3^{36}, which follows LXX of Gn 10^{24} 11^{12}). The name is wanting in the Hebrew text of the last two passages.

CAKE.—See BREAD.

CALAH.—The *Kalaḥ* of the inscriptions, one of the great fortresses which after the fall of Nineveh (cf Jon 4^{11} and the Greek writers) were supposed to make up that city. Both Nineveh and Calah were, however, always separate in structure and in administration. Calah lay on the site of the great modern mounds of *Nimrûd*, as was first proved by the explorer Layard. In Gn 10^{11f} it is said to have been founded by Nimrod, and, along with Nineveh and other cities, to have formed part of 'the great city.' It was the capital, or at least the chief royal residence, under several of the greatest Assyrian kings, whose palaces have been excavated by modern explorers. Here also was found the famous black obelisk of Shalmaneser III.

J. F. McC.—C. J. M. W.

CALAMOLALUS, 1 Es 5^{22} (AV, RV).—A corrupt place-name, probably due to a conglomeration of the

two names Lod and Hadid in Ezr 2[33] (cf Neh 7[37]); RSV reads Elam.

CALAMUS.—See Reed.

CALCOL.—A Judahite, a descendant of Zerah (1 Ch 2[6]), otherwise described in 1 K 4[31] (where AV has **Chalcol**) as a son of Mahol, famous for wisdom, but surpassed by Solomon.

CALDRON.—See House, **9.**

CALEB.—According to Nu 13[6] he was one of the twelve sent by Moses to spy out the land of Canaan. He is there said to be the son of Jephunneh, of the tribe of Judah. In Nu 32[12] he is described as a Kenizzite. In Jos 14[6-15] Joshua gives him Hebron as his possession in Canaan as a reward for his faithfulness at the time of the spying out of the land. He is the eponymous ancestor of the Calebites (the 'house of Caleb') who occupied part of the Negeb south of Hebron (cf 1 S 25[1-3] 30[14]). The Calebites, Kenizzites, and Kenites, were a group of clans or tribes, originally semi-nomadic inhabitants of the indeterminate region of steppe-land south of the 'hill-country' of Judah, and were ultimately absorbed into the tribe of Judah. The name Caleb in Hebrew means 'dog,' and this has been interpreted as evidence of the existence of totemism as an element in the early religion of the Hebrews, but this view is now generally rejected. S. H. He.

CALEB-EPHRATHAH.—Named in 1 Ch 2[24] (RV; AV **Caleb-ephratah**) as the place where Hezron died. We should probably read, however, with RSV: 'after the death of Hezron, Caleb went in to Ephrathah, the wife of Hezron his father.'

CALENDAR.—See Time.

CALF, GOLDEN.—The incident of 'the golden calf' is related in detail in Ex 32 (cf Dt 9[7-21]), a chapter which belongs to the composite Prophetic source of the Pentateuch (JE). At the request of the people, who had begun to despair of Moses' return from the mount, Aaron consented to make a god who should go before them on the journey to Canaan. From the golden ear-rings of their wives and children he fashioned an image of a young bull; this, rather than 'calf,' is the rendering of the Hebrew word in the present connexion. The view that 'calf is diminutive and sarcastic for bull' is precluded by the use of the word elsewhere to denote the young but mature animal. A 'feast to Y″' was proclaimed for the following day, and an altar erected on which sacrifice was offered. The sequel tells of Moses' return, of the destruction of the image, and finally of Moses' call to his tribesmen, the sons of Levi, to prove their zeal for the pure worship of Y″ by taking summary vengeance on the backsliders, 3000 of whom fell by their swords.

Two to three centuries later, **bull images** again emerge in the history of Israel. Among the measures taken by Jeroboam I. for the consolidation of his new kingdom was one which was primarily designed to secure its independence of the rival kingdom of the South in the all-important matter of public worship. With this end in view, perhaps also with the subsidiary purpose of reconciling the priesthood of the local sanctuaries to the new order of things, Jeroboam set up two golden 'calves,' one at Bethel and the other at Dan, the two most important sanctuaries, geographically and historically, in his realm (1 K 12[26-33], 2 Ch 11[14f]). Of the workmanship of Jeroboam's 'calves,' as of that of Aaron, it is impossible to speak with certainty. The former probably, the latter possibly (cf Ex 32[20]), consisted of a wooden core overlaid with gold. The view that the Hebrew term necessarily implies that the images were small, has been shown above to be groundless.

With regard to the religious significance of this action on the part of Jeroboam, it is now admitted on all hands that the bulls are to be recognized as symbols of Y″. He, and He alone, was worshipped both in the wilderness (see Ex 32[5] 'a feast to Y″') and at Bethel and Dan under the symbol of the golden bull. It is possible, however, that the bull was not itself regarded as an image of Y″, but as the pedestal on which His image stood. That it became popularly treated as an image can scarcely be doubted. For the source of this symbolism we must not look to Egypt, as did the scholars of former days, but to the primitive religious conceptions of the Semitic stock to which the Hebrews belonged. Evidence, both literary and monumental, has accumulated in recent years, showing that among their Semitic kin the bull was associated with various deities as the symbol of vital energy and strength. In particular, the Râs Shamra (Ugarit) tablets make it clear that El, the High God of Canaan, was worshipped in the form of a bull. He is regularly called Shor-El (Bull-El). Jeroboam, therefore, may be regarded as having merely given official sanction to a symbolism with which the Hebrews had been familiar, if not from time immemorial, at least since their association with the Canaanites.

A comparison of Ex 32[8] with 1 K 12[28] shows that the two narratives have a literary connexion, of which more than one explanation is possible. In the opinion of most recent scholars, the author or editor of Ex 32 has adapted the traditional material on which he worked so as to provide a polemic, in the spirit of Hosea, against the established worship of the Northern Kingdom, which is here represented as condemned in advance by Y″ Himself (Ex 32[7f]). The attitude of Amos to this feature of the established worship at Bethel is not so evident as might have been expected, but of the attitude of Hosea there can be no doubt. It is one of profound scorn and bitter hostility (see 8[5f] 10[5] 13[2]—the last passage gives the interesting detail that the bulls were kissed like the black stone in the Kaaba at Mecca). In the same spirit, and in harmony with the true character of the religion of Y″, as revealed through the prophets who succeeded Hosea, the Deuteronomic editor of the Books of Kings repeatedly characterizes the introduction of the bull images into the cult of Y″ as the sin wherewith Jeroboam made Israel to sin (1 K 14[16] 15[26] etc.). A. R. S. K.—N. H. S.

CALITAS, 1 Es 9[23, 48] (AV, RV).—See Kelaiah.

CALLISTHENES (2 Mac 8[33]).—A Syrian, captured by the Jews in a small house, where he had taken refuge after the great victory over Nicanor and Gorgias, in 165 B.C. (cf 1 Mac 4[1-35]). At a festival in celebration of the victory, the Jews burnt Callisthenes to death, because he had set fire to the portals of the Temple (cf 1 Mac 4[38]).

CALNEH.—1. Calneh is associated in Gn 10[10] (AV, RV) with Babylon, Erech, and Accad as the earliest cities of Shinar. All attempts to identify the city, from the Talmudic assertion that 'Calneh means Nippur,' to the present have failed; but a convincing solution to the problem has been proposed by W. F. Albright (*JNES*, iii [1944], 254–55). He reads the word *klnh* as *kullānāh* 'all of them,' and so RSV. **2.** Calneh, linked with Hamath and Gath in Am 6[2], is probably the *Kullania* (*Kullanī*) associated with Arpad and Hadrach, Syrian cities, in the Assyrian 'tribute' lists. It is perhaps to be identified with modern *Kullan Köy* some 10 miles SE. of Arpad, but Abel (*Géographie*, ii [1933], 101) rejects this view. C. H. W. J.—D. N. F.

CALNO.—A city of N. Syria compared with Carchemish in Is 10[9], probably to be identified with **Calneh, 2** (q.v.).

CALPHI, 1 Mac 11[70] (AV).—See Chalphi.

CALVARY (Lk 23[33] AV).—See Golgotha.

CALVES OF THE LIPS.—Hos 14[2] (AV 'so will we render the calves of our lips'; RV '. . . [as] bullocks [the offering of] our lips'), an obscure passage. A very slight change of the MT yields the LXX and Pesh. rendering 'the *fruit* of our lips' (so RSV).

CAMEL.—The bones of camels are found among the remains of the earliest Semitic civilization at Gezer, 3000 B.C. or earlier, and to-day camels are among the most common and important of domesticated animals in Palestine. The date of the effective domestication of

the camel in the Arabian peninsula is much debated, however. It may best be fixed in the last centuries of the 2nd millennium B.C., since widespread camel-nomadism is not attested in the Near East until the end of the 2nd and the beginning of the 1st millennium. The first camel raid reported in our sources is the Midianite attack on Israel, which was repelled by Gideon and his band (Jg 6–8). Thus in spite of occasional references to camels in Genesis, it is certain that the Patriarchs were not camel-nomads, but semi-nomads, using asses for travel and transport, keeping flocks and herds, and living on the edge of the desert within easy reach of water and pasture. This picture is confirmed by the evidence for ass-nomadism in the Mari archives, cf J.-R. Kupper, *Les nomades en Mésopotamie au temps des rois de Mari* (1957); camels are not mentioned at all. With regard to the famous Tell Ḥalâf orthostate representing a man riding on a camel, the dates assigned by scholars range from the 3rd millennium to the 1st millennium B.C.; the most probable view is that of Albright and O'Callaghan, placing it in the 10th cent. (cf Albright, *Archaeology of Palestine* [rev. ed., 1956], pp. 206 f; R. T. O'Callaghan, *Aram Naharaim* [1948], pp. 114–16, with plate; for an excellent photograph see J. B. Pritchard, *ANEP*, Pl. 188). For a detailed discussion of the problem, see R. Walz, *ZDMG*, ci (1951), 29–51, and *Akten des* 4. *Int. Kong. für Anthropologie und Ethnologie*, iii (1956), 190–204; also W. G. Lambert, *BASOR*, 160 (Dec. 1960), 42 f.

Two species of camel are known: the one-humped *Camelus dromedarius*, by far the more common in Bible lands; and the Bactrian, two-humped *Camelus bactrianus*, which comes from the plateau of Central Asia. This latter is to-day kept in considerable numbers by Turkomans settled in the *Jaulân*, and long caravans of these magnificent beasts may sometimes be encountered coming across the Jordan into Galilee or on the Jericho-Jerusalem road. The *C. dromedarius* is kept chiefly for burden-bearing, and enormous are the loads of corn, wood, charcoal, stone, furniture, etc., which these patient animals carry: 600 to 800 lbs. are quite average loads. Their owners often ride on the top of the load, or on the empty baggage-saddle when returning; Moslem women and children are carried in a kind of palanquin—the camel's 'furniture' of Gn 31[34] (AV, RV). For swift travelling a different breed of camel known as *hajîn* is employed. Such a camel will get over the ground at eight to ten miles an hour, and keep going eighteen hours in the twenty-four. These animals are employed near Beersheba, and also regularly to carry the mails across the desert from Damascus to Baghdad. They may be the 'dromedaries' of Est 8[10] (AV; but cf RV, RSV).

Camels are bred by countless thousands in the lands to the E. of the Jordan, where they form the most valuable possessions of the Bedouin, as they did of the Midianites and Amalekites of old (Jg 7[12]). The Bedouin live largely upon the milk of camels (Gn 32[15]) and also occasionally eat their flesh, which was forbidden to the Israelites (Dt 14[7], Lv 11[4]). They also ride them on their raids, and endeavour to capture the camels of hostile clans. The *fellâḥîn* use camels for ploughing and harrowing.

The camel is a stupid and long-enduring animal, but at times, especially in certain months, he occasionally 'runs amok,' and then he is very dangerous. His bite is almost always fatal. The camel's hair which is used for weaving (Mk 1[6], Mt 3[4]) is specially taken from the back, neck, and neighbourhood of the hump: over the rest of the body the ordinary camel has his hair worn short. His skin is kept anointed with a peculiar smelling composition to keep off parasites. The special adaptation of the camel to its surroundings lies in its compound stomach, two compartments of which, the *rumen* and the *reticulum*, are specially constructed for the storage of a reserve supply of water; its hump, which though useful to man for attachment of burdens and saddles, is primarily a reserve store of fat; and its wonderful fibrous padded feet adapted to the softest sandy soil. The camel is thus able to go longer without food and drink than any other burden-bearing animal, and is able to traverse deserts quite unadapted to the slender foot of the horse and the ass. On slippery soil, rock or mud, the camel is, however, a helpless flounderer. The camel's food is chiefly *tibn* (chopped straw), *kursenneh*, beans, oil-cake, and occasionally some grain. There seems, however, to be no thorn too sharp for its relish.

In the NT references to the camel it is more satisfactory to take the expressions 'swallow a camel' (Mt 23[24]) and 'It is easier for a camel to go through the eye of a needle,' etc. (Mt 19[24]||), as types of ordinary Oriental proverbs (cf the Talmudic expression 'an elephant through a needle's eye') than to weave fancied and laboured explanations. The present writers agree with Post that the gate called the 'needle's eye' is a fabrication.

CAMEL'S HAIR.—See CAMEL, DRESS, 1.

CAMON, Jg 10[5] (AV).—See KAMON.

CAMP.—See WAR.

CAMPHIRE, Ca 1[14] 4[13] (AV).—See HENNA.

CANA,—A Galilaean village mentioned only in John; here Jesus turned water into wine (Jn 2[1]) and healed with a word a nobleman's son who lay sick at Capernaum (4[46]). Nathanael was a native of this place (21[2]). Late tradition identified it with *Kufr Kenna*, NE. of Nazareth. But Cana is mentioned by Josephus and from his account it is clear that it lay at *Khirbet Qāna* on the north side of the *el-Baṭṭōf* plain. It was evidently called Cana of Galilee to differentiate it from the Cana (Kanah) near Tyre (Jos 19[28]).

CANAAN.—See next article; HAM, PALESTINE.

CANAANITES.—The early inhabitants of Canaan (later Palestine and Syria). Their settlement goes back to at least 3000 B.C., as evidenced by the excavations of important sites such as Jericho, Ai, Gezer, Megiddo, Beth-shan, Byblos, and Hamath. They settled where water was available, and hence largely on the plains and in the valleys. During the subsequent 2000 years Canaan was the bridge between Egypt and the nations to the east. At first the country was rather thinly populated, and even by the time of the Berlin Execration Texts in the 20th cent. there were comparatively few towns, and none evidently of great size. In contrast, the Brussels Execration Texts of the following century list a great many towns, showing a decided increase in the population. It was about this time that the Canaanites as far north as Byblos and Ugarit came under the suzerainty of Egypt's vigorous 12th Dynasty (*c* 1992–1779 B.C.), but there was little interference with the political organization of the Canaanites, which consisted of city-states, each with its own king. With the fall of the 12th Dynasty the power of Egypt sank to a low ebb, and the whole of the west was overrun by the Hyksos (*c* 1720–1550 B.C.). With the wane of Hyksos power Egypt regained her suzerainty over the Canaanites and remained more or less in control until *c* 1225 B.C. During this time the population became increasingly mixed, as we learn from Jos 9[1] and other references. Among the intruders mentioned are Hittites from Asia Minor, Horites (also apparently known as Hivites) from northern Mesopotamia, and Amorites, who had begun infiltrating into the country as early as 2000 B.C. From the 16th cent. onwards the Canaanites were becoming weaker, as indicated by the fact that the excavations show a gradual deterioration in the arts and crafts. The feudal system was breaking down, and by 1150 B.C. the nation had become the prey of many invaders, the Sea Peoples invading the south and the north from the sea, the Aramaeans from the north-east, and the Hebrews from the south and east. Ugarit was destroyed by the Sea Peoples, never again to be rebuilt. Sidon seems to have fallen *c* 1194 B.C., and Tyre somewhat earlier, but it was rebuilt a few years later, apparently by Sidonians. Tiglath-pileser I. of Assyria (1116–1078 B.C.) held the land for a brief period, but it was lost shortly after his death. By these several invasions the Canaanites were

sent reeling back into the Lebanon mountains and the narrow coastal strip which these protected. Confined to this restricted area, they cut down trees with their newly-invented iron axes, built ships, and took to the sea, and in time they became the great traders of the world, indicated among other things by the fact that one of the words in Hebrew for 'trader' is 'Canaanite.' They established trading colonies in Cyprus, Sardinia, and North Africa, and as far west as Spain. This brought them in contact with the Greeks, by whom they were known as Phoenicians. In the later period their chief city was Tyre, and it was the assistance of Hiram I. of Tyre (969–936 B.C.) in the form of materials and craftsmen that made possible the building of Solomon's Temple. Some indication of the impact that the Canaanites made upon the world is to be found in the fact that Canaanite loan-words appear in every important language of the ancient Near East.

The Canaanites were one of the great nations of the ancient world. It is with Canaanites working for the Egyptians in the mines of the Sinaitic peninsula that we have our first alphabetic writing, *c* 1500 B.C. Once the alphabet was invented it spread rapidly into South Arabia and throughout Palestine and Syria (ancient Canaan). In the far north of Canaan writing was affected by the cuneiform of Mesopotamia, and at Ugarit a cuneiform alphabet was used in the 14th cent. to produce the so-called Râs Shamra texts. From the Phoenicians the alphabet passed to the Greeks some time in the 8th cent., and then presently throughout the whole world.

In general culture the Canaanites are no less remarkable, and not a little of that culture was taken over by the Hebrews. That the latter had much to learn from the Canaanites is shown by the excavation of Israelite sites; there is a marked inferiority on the Hebrew levels in contrast with those on the preceding Canaanite levels. The Hebrews were not great builders, nor very apt in the arts and crafts. As a result they had to rely heavily on the Canaanites in this field, and in others as well.

Whatever language the Hebrews spoke before settling in Palestine, it was a dialect of Canaanite that became their language after the settlement. As a result their literature was much affected in style and diction. In fact, it is now generally thought that Ps 29 was originally a hymn to the Canaanite storm-god Baal, and the Song of Songs in its original form may have been a fertility cult liturgy of the Canaanites. The Canaanites described creation as a battle between Baal, king of the gods, and the primordial dragon of chaos, to which there are a number of allusions in the OT (cf Ps 74^{13f} 89^{10}, Job 3^{8} 41, Is 27^{1} 51^{9}, Am 9^{3}). A number of the titles of Canaanite gods, such as *'el, ba'al, 'adon, 'elyon*, and 'rider of the clouds' have been appropriated by the Hebrews for their own God, and the more enlightened of the population had a difficult time to win their people away from the worship of Canaanite deities such as Baal, Astarte, Asherah, and Anath. Some parts of Hebrew ritual came from the Canaanites, and much of Hebrew music. Hence it is not surprising that the musical guilds of later Israel traced their origin back to families with Canaanite names. All in all it was no small contribution that the Canaanites made to the Hebrews, but what the Hebrews borrowed they sublimated and ethicized in the end, forever improving what they borrowed. T. J. M.

CANAL.—Found only in RVm and RSV in Ex 7^{19} 8^{5} (AV 'rivers'; RV 'streams'), Is 19^{6} (AV 'brooks'; RV 'streams'); cf Is 7^{18}, where RSV has 'streams' in a similar phrase. The word is used in the singular of the river Nile, and here it refers to the watercourses or canals through which its waters flowed.

CANANAEAN or CANAANITE (AV).—See ZEALOT.

CANDACE.—A dynastic name, like Pharaoh or Caesar, borne by the queens, or queen-mothers of Meroe, a small kingdom in southern Nubia, in the land known to the ancients as Ethiopia. A eunuch, treasure-guard for one of these rulers, as he returned from a visit to Jerusalem, was met by Philip, who converted and baptized him (Ac 8^{26-39}). A. J.

CANDLE.—See LAMP.

CANDLESTICK.—See HOUSE, 8.

CANE.—See REED.

CANKERWORM.—RSV uses a variety of terms for this AV, RV name; 'hopping locust' Jl 14, 'hopper' 2^{25}, 'locust' Nah 3^{15f}, Jer 51^{14} (AV 'caterpillers'), 'young locusts' Ps 105^{34} (AV 'caterpillers'). See LOCUST.

CANNEH.—A town named with Haran and Eden having trade relations with Tyre, Ezk 27^{23}. Many scholars have supposed **Calneh** (see CALNEH, 2) to be meant, but it is more probable that the unidentified Akkadian *Kannu* is intended. It has been suggested that we should read *b^{e}nê* for Canneh, when the passage would refer to the 'sons of Eden,' as in 2 K 19^{12}. See EDEN.

CANON OF THE OLD TESTAMENT.—1. The term 'Canon.' 'Canon' is the English equivalent of the Greek *kanōn*, which in turn corresponds to the Hebrew *ḳāneh*='reed.' Because a reed was employed in measuring the word came to be used in the sense of 'measuring-rod' or 'ruler'; and this use was gradually extended to cover all kinds of 'rules' or 'standards,' such as a 'model' of proportion in plastic art, a 'general rule' or 'paradigm' in grammar, and a 'table' of dates or 'system' of chronology in astronomy. As a technical term applied to a 'list' or 'catalogue' of scriptural books the word seems to have been first used by Origen († *c* A.D. 250), but this use did not become general till more than a century after his death. 'Canon' is thus a Christian, not a Jewish, term. By the Jews the idea of canonicity was expressed by the phrase 'defile the hands' (probably to be understood in the sense that the books so described were so sacred that touching them necessitated a ceremonial washing of the hands afterwards).

2. Circulation, Collection, and Canonization.—These three concepts should be clearly distinguished. Failure to distinguish can only result in confusion and misinterpretation of the evidence. By 'circulation' is meant the introduction of a book of the OT to such reading public as there was, its general acceptance as a book worth reading, and the consequent multiplication of copies of it. By 'collection' is meant the grouping together of individual books, usually similar in character, to form a corpus (*e.g.* the Prophets). By 'canonization' is meant the official designation of an individual book, or a group of books, as 'canonical'—*i.e.* as religiously authoritative through inclusion in a 'canon' or list of sacred books. The three concepts are, of course, interrelated; but they are by no means identical. Nor, indeed, are they so closely related as is sometimes thought. For example, it is inconceivable that a book could ever have been canonized without being previously in circulation, and to that extent we may say that 'circulation' was the first step along the road to 'canonization.' But it does not follow from this (as we know very well) that all books that were at any time in circulation were eventually canonized. To put the point thus bluntly may seem unnecessary. Yet there are many students who approach the evidence under the illusion that any book, or group of books, that is mentioned with respect by a later writer (much less accorded authority of any kind) was *ipso facto* regarded by that writer as 'scripture' and universally accepted by his contemporaries as 'canonical.' It cannot be too strongly emphasized that, so far as the OT is concerned, 'canonization' in the strict sense is a very late development. Varying degrees of authority were certainly accorded to various books at quite an early stage in Israel's history, and constantly thereafter. But that is not 'canonization' as properly understood. It may be argued, and sometimes is, that bit by bit an unofficial

CANON OF THE OLD TESTAMENT

'canon' was formed, and that all that officialdom ultimately did was to give official sanction to what was already unofficially agreed. Even if this were true, it would still also be true that it was the official sanction that crystallized the unofficial agreement by the promulgation of the official canon. In point of fact, however, there is far less evidence of agreement than is often supposed. Neither mention with respect of a book in circulation, nor appreciative reference to a collection however ancient, is in itself evidence of 'canonization.'

3. The Palestinian Jewish Canon, I (*The Evidence of the OT itself*).—From time to time the OT itself gives us a glimpse into the earliest stages in the development of the Canon by referring to the authority accorded certain books in certain concrete situations. Thus, after the giving of the Law on Mount Sinai, it is recorded that 'Moses came and told the people all the words of the Lord and all the ordinances. . . . And Moses wrote all the words of the Lord. . . . Then he took the book of the covenant, and read it in the hearing of the people, and they said, "All that the Lord has spoken we will do, and we will be obedient"' (Ex 24^{3-7}). Again, Josiah's religious reformation is said to have been inspired by 'the book of the law' found in the Temple by Hilkiah: this book was read first by the Temple authorities, then to Josiah, and then finally to 'all the men of Judah and all the inhabitants of Jerusalem, and the priests and the prophets, all the people, both small and great,' who thereupon entered into a solemn covenant 'to perform the words . . . that were written in this book' (2 K 22^{8}–23^{3}). And, after the Exile, Ezra's public reading of 'the book of the law of Moses which the Lord had given to Israel' is said to have been the occasion of the first popular observance of the Feast of Tabernacles since the days of Joshua—'they kept the feast seven days; and on the eighth day there was a solemn assembly, according to the ordinance' (Neh 8^{1-18}). We cannot, of course, be certain that in any one of these cases we are in possession of an exact historical record of what actually took place—the later historians may very well have 'written up' the records in the light of their own presuppositions and attributed a part in the proceedings to the discovery and reading of law books which they did not in fact play. Nor, if law books did play a part in the proceedings, can we do more than conjecture what was the relation of these books to the Pentateuch as we know it. Yet, taken as a whole, the evidence of the OT itself suggests that, in post-exilic times at least, collections of laws of Moses were known and circulated as books, and that such books were recognized as religiously authoritative, even though they may have been very far from identical with the Five Books of Moses as finally canonized.

4. The Palestinian Jewish Canon, II (*The Evidence from outside the OT*).—The first clear evidence for the existence of the Pentateuch as we know it comes from the Samaritans. This heterodox group established a rival sanctuary on Mount Gerizim in opposition to the Jerusalem Temple, with a separate ritual and organization. Disagreement between Samaritans and the more orthodox Jews of Jerusalem is apparent in the days of Nehemiah (*c* 440 B.C.; cf especially Neh 13^{28f}); but it is probable that the separation was not complete until more than a century later. At all events, the Samaritans were at one with the Jerusalem Jews in knowing, and accepting, the Pentateuch, which they still preserve and reverence as 'scripture'—they would hardly have accepted it from their hated opponents *after* the final schism. We may infer, therefore, that by 300 B.C., at the very latest, the Pentateuch was in circulation in Palestinian Judaism, that it was generally accepted as the permanent embodiment of 'the Law,' and that for this reason it was accorded something very like the same authority that was certainly accorded it after it was subsequently canonized. Concurrently with the acceptance of the Pentateuch collections of other books were being made, and the time was to come when they too were accorded authority. Ben-Sira's well-known catalogue of Famous Men (Sir 44–49), written about 200 B.C., shows that he knew and respected, not merely the Pentateuch, but also the historical and prophetical books in approximately (if not exactly) their present form (cf especially his reference to 'the Twelve Prophets'—treated apparently as one book—at Sir 49^{10}), and probably some of the other books as well (*e.g.* Psalms and Proverbs, Sir 44^{5}); and even if the terms of the assertion of his grandson, who translated his work into Greek, that Ben-Sira had 'much given himself to the reading of the Law, and the prophets, and the other books of our fathers' belong, strictly speaking, to the history of the Canon of the Dispersion, there is no reason to doubt that they reflect Palestinian usage, and that the threefold division into Law, Prophets, and 'the rest,' was customary in Palestine also, and may well have been so for some time. The Maccabaean revolt (167 B.C.) undoubtedly gave an impetus to the collection and preservation of traditional Jewish literature (cf 2 Mac 2^{14}), and the circumstances which occasioned the revolt necessarily tended to increase the reverence felt for it (cf 1 Mac 1^{41-64}). It is about this time that we first come across 'quotation-formulae'—*i.e.* such phrases as 'even as it is written' used to introduce a quotation or a reference. This is a sure sign that anyone using these phrases regarded his quotations or references as coming from what we should call 'scripture.' An example may probably be found at Sir 48^{10} (quoting Mal $4^{5, 6}$): others are at 1 Es 1^{11} and To 1^{6}; and, although all three of these passages are in Greek books, the Greek texts are in each case translations of Palestinian Hebrew or Aramaic originals, and there are no grounds for supposing that the translators have tampered seriously with the sense of the originals. The same situation is reflected in the Qumrân documents. Members of 'the Community' were under obligation to study 'the Law' without ceasing (*DSD* vi. 7); whole sections of the non-biblical documents are little more than centos of biblical quotations and allusions (*e.g. CD* i. 1–12); and explicit quotations are not infrequently introduced by 'quotation-formulae' (*e.g. DSD* viii. 14). All the books in our present OT (except, apparently, Esther) were to be found in the Qumrân library. Furthermore, the many fragments of commentaries that have survived prove that the community accorded authority, not only to 'the Law,' but also to 'the Prophets,' and (of 'the rest') at least to the Psalms. If, then, those acholars who regard the Qumrân documents as pre-Christian are right, we can gain from them a very clear indication of the extent of 'scripture,' and of the attitude towards it, which obtained in a particular (even if heterodox) section of Palestinian Judaism at the close of the pre-Christian period.

5. The Palestinian Jewish Canon, III (*The Fixing of the Canon*).—If we may neglect the evidence of the NT here, since it may legitimately be held that this evidence very largely reflects the ideas of the Dispersion and may be coloured by Christian presuppositions, the earliest explicit Jewish statement about the extent and authority of 'scripture' comes from Josephus (*c. Ap.* i. 8 [38–42]). Although written in Rome, *c* A.D. 100, when the author was an old man, the statement obviously embodies the Palestinian tradition in which he had been brought up. It runs as follows:

'We do not possess myriads of inconsistent books, conflicting with each other,' he says, contrasting the Jewish books with those of other peoples, 'Our books, those which are justly accredited, are but two and twenty, and contain the record of all time. Of these, five are the books of Moses. . . . From the death of Moses until Artaxerxes . . . the prophets subsequent to Moses wrote the history of the events of their own time in thirteen books. The remaining four books contain hymns to God and precepts for the conduct of human life. . . . We have given practical proof of our reverence for our scriptures. For, although such long ages have now passed, no one has ventured either to add, or to remove, or to alter a syllable; and it is an instinct with every Jew, from the day of his birth, to regard them as

the decrees of God, to abide by them, and, if need be, cheerfully to die for them.'

This statement gives clear expression to the authority attached to the books, as also to their threefold division. What is not clear is the identity of the twenty-two books mentioned. From the Mishnah (2nd cent. A.D.) it appears that in the 1st cent. A.D. there was vigorous debate about the acceptance of certain books (particularly about those in the third division) and that in some quarters doubts persisted even into the 2nd cent. But the language used by such men as Rabbi Akiba († *c* A.D. 135) implies that an official decision had by then been made—in other words, that a 'canon' had been fixed, and that it was the same Canon as that attested by our Hebrew Bibles to-day, consisting of three divisions ('Law,' 'Prophets,' 'Writings'). This fixing of the Canon is usually (and most reasonably) attributed to a council of Rabbis held at Jamnia, near Joppa, about A.D. 90, at which we know the 'canonicity' of both the Song of Songs and Ecclesiastes was discussed and agreed upon—'All Holy Scriptures defile the hands: the Song and Ecclesiastes defile the hands.' At all events, after A.D. 100 there was no serious dispute.

6. The Canon of the Jewish Dispersion.—Whether we have any right properly to speak of a 'Canon' of the Dispersion at all is doubtful. The evidence shows that the books circulating in Palestine circulated also in the Dispersion (usually in Greek translation), that they were increasingly recognized as 'scripture,' and that the division of them into three separate sections was also known. There is, however, no hint anywhere of an official canon having been either discussed or accepted, either before or after Jamnia. So far as we can tell, the situation in the Dispersion after A.D. 100 remained essentially what it was before. We may say, then, that the Judaism of the Dispersion differed from Palestinian Judaism in never having an official canon. There was also a further difference—namely, that more books circulated in the Dispersion than in Palestine, and some of them sometimes in some places seem to have been accorded almost as much respect as those in the third division of the Palestinian Canon. Yet these differences can easily be exaggerated. It is probable that the majority of the Jews in the Dispersion accepted the decision of Jamnia, even if there is no evidence that they did; while the respect accorded the additional 'fringe' books may not have been so great as is sometimes made to appear. The true situation is best illustrated by Philo of Alexandria († *c* A.D. 50). For Philo the Law is manifestly in the highest degree inspired and authoritative. He quotes also from other books which eventually became part of the Palestinian Canon, often introducing quotations with quotation-formulae: but there are books in this Canon from which he does not quote (Ezk, Dn, Ec, Ca, Est, Ru, La), whether by accident or by design. On the other hand, he shows knowledge of, and respect for, books which did not get into the Canon, though he never associates quotation-formulae with them. Summing up, the situation in the Dispersion seems to have been much more fluid than it was in Palestine.

7. The Christian Canon.—The NT has its roots partly in the Palestinian tradition and partly in that of the Dispersion, and it is impossible to separate the two. In the NT quotation-formulae are frequent: the inspiration of 'scripture' is asserted (2 Ti 3[16]); the threefold division of the books is recognized (Lk 24[44]); and all the books of the Palestinian Canon are quoted, or referred to, except the Song, Ecclesiastes, and Esther. Other books were certainly known, and no doubt reverenced, but the only direct quotation from these books is the quotation of 1 Enoch 1[9] at Jd [14, 15]. Where Jude led the way, others soon followed; and it became customary in the Church, not only to quote some of these books (*e.g.* Baruch, Ecclesiasticus, Wisdom) alongside the 'canonical' books as of equal authority, but also to copy them, intermingled with the 'canonical' books, in manuscripts of the complete OT. From time to time voices were raised in protest—in particular,

Jerome, in the 4th cent., showed himself a doughty champion of the Palestinian Jewish Canon on the ground that only those books with an extant Hebrew original had any claim to recognition. But such protests went unheeded. Athanasius's Easter Letter, written in A.D. 367, gives a list of OT books and draws special attention to those additional books which Christians were accustomed to recognize outside the Jewish Canon; and a similar list was ratified by a synod at Carthage in A.D. 397. Thus, from A.D. 400 onwards the Church accepted officially a longer Canon than the Jews. At the Reformation the wisdom of this acceptance was questioned and the objections raised by Jerome were revived. The Protestant bodies rejected the so-called 'Apocryphal books' outright and reverted to the shorter Jewish Canon: at the Council of Trent (1546) the Church of Rome reasserted the validity of the traditional Christian longer Canon (a reassertion repeated at the Vatican Council in 1870); while the Church of England, in her *Articles of Religion*, listed the books of the shorter Canon as those 'of whose authority there was never any doubt in the Church' and added a list of 'the other books' from the longer Canon, which 'the Church doth read for example of life and instruction of manners, but yet doth it not apply them to establish any doctrine.'

H. F. D. S.

CANON OF THE NEW TESTAMENT.—1. Title.—The Greek word 'canon,' meaning originally a 'rod' and so a 'rule for measuring,' is used in a variety of senses by Patristic writers, among the most familiar instances being the expressions 'rule of truth' and 'rule of faith' for the doctrinal teaching officially recognized by the bishops. Hence, since we meet with the phrase 'canonical books' in Origen, as rendered by Rufinus' translation, before we see the substantive 'canon' applied to the list of NT books, it has been argued that the adjective was first used in the sense of 'regulative,' so that the phrase means 'the books that regulate faith or morals.' But the substantive must mean the 'list' of books, and in Athanasius we have a passive participle in the phrase '*canonized* books,' *i.e.* books belonging to the Canon; soon after which the actual word 'canon' is applied to the books of the NT by Amphilochius, the bishop of Iconium (end of 4th cent. A.D.). The NT Canon, then, is the list of NT books, and this simple meaning, rather than 'the regulative books,' is the more likely interpretation of the expression to have occurred to people who were in the habit of using the term for lists of officials, lists of festivals, etc. The question of the Canon differs from questions of the authenticity, genuineness, historicity, inspiration, value, and authority of the several NT books in concerning itself simply with their acceptance in the Church. Primarily the question was as to what books were read in the churches at public worship. Those so used became in course of time the Christian Scriptures. Then, having the value of Scripture gradually associated with them, they came to be treated as authoritative. The first stage is that of use in the form of Church lessons; the second that of a standard of authority to be employed as the basis of instruction, and to be appealed to in disputed cases of doctrines or discipline.

2. The Formation of the Canon in the 2nd Century.—The very earliest reading of NT books in the churches must have occurred in the case of epistles addressed to particular churches, which of course were read in those churches; next come the circular letters (*e.g.* Ephesians, 1 Peter), which were passed round a group of churches (see also Col 4[16]).

During the sub-Apostolic age, such writers as Clement of Rome, Ignatius, Polycarp, and 'Barnabas' quote from or allude to several of the Pauline Epistles. The first explicit reference to a collection of NT books involves the heretic Marcion, who about A.D. 140 issued a canon of Scripture consisting of a mutilated Gospel of St. Luke and ten Epistles of Paul (the three Pastoral Epistles being omitted). There has been much

debate among scholars as to whether this was the first collection of NT books. The fact that the Fathers consistently represent Marcion as having *rejected* certain books makes it probable that the church's canon preceded Marcion's rival canon. Support for this opinion is afforded by the recently discovered *Evangelium Veritatis*, a work thought to be by Valentinus (the Gnostic teacher from Egypt who taught at Rome about A.D. 135–160), which, though not quoting any NT book explicitly, shows acquaintance with the Synoptic Tradition, John, many of the Pauline Epistles, Hebrews, and Revelation. This information confirms Tertullian's contrast between Marcion and Valentinus in their treatment of Scripture: while Marcion had eliminated what did not suit his purpose, Valentinus 'seems to use the entire Testament (*integro instrumento*),' though he actually distorts the Scriptures by imposing on them his own fantastic system (*de Praescrip. Haer.* xxxviii, 7 ff). What is important here is that apparently Tertullian regarded Valentinus's NT to be the same in extent as his own.

The earliest reference to a liturgical use of NT books dates from the middle of the 2nd cent., when Justin Martyr, describing a Sunday service of worship at Rome (I *Apol.* lxvii), indicates that 'the memoirs of the Apostles [*i.e.* the Gospels] or the writings of the prophets are read.' A little later Justin's disciple Tatian prepared his *Diatessaron*, or Harmony of the four Gospels, for use in the church at Edessa.

When we come to Irenaeus, bishop of Lyons and Vienne in Gaul (*c* A.D. 180), we seem to be in another world. Irenaeus freely cites as authoritative most of the books of the NT (though not Philemon, James, 2 Peter, 3 John, or Jude; whether he knew Hebrews has been disputed). In discussing the grounds of determining the canonicity of a document, Irenaeus lays stress on apostolicity and ecclesiastical tradition. Though the designation *New* Testament for the whole complex of these writings does not appear until the following century, Irenaeus calls them 'Scripture' because they have the same character of inspiration as the writings of the OT.

The growth and recognition of the canon of the NT is one of the most important developments in the thought and practice of the Church; yet history is absolutely silent as to how, when, and by whom it was brought about. In the absence of all extant contemporary references to so great a movement, not a few conjectures have been proposed. Thus, Harnack supposed that bishops of Asia Minor in agreement with the Church at Rome deliberately drew up and settled the Canon, although we have no historical record of so significant an event. It is more likely, however, that the formation of the Canon was an instinctive act of the Christian society, resting upon the general confession of the Churches (Westcott). That is, the canonical books, by their intrinsic merit, came to be separated from the others by the intuitive insight of devout believers, and were later approved by synodical bodies as the authoritative standard of appeal in controversies.

The most ancient extant list of NT books in the Old Catholic Church is the 'Muratorian Fragment,' which is named after its discoverer Muratori, who found it in a 7th or 8th cent. monk's common-place book in the Ambrosian Library at Milan, and published it in 1740. The fragment is a mutilated extract of a list of NT books made at Rome probably before the end of the 2nd cent., since the author refers to the episcopate of Pius as recent (*nuperrime temporibus nostris*), and Pius I., who died in A.D. 157, is the only bishop of Rome of that name in the early age to which unquestionably, as internal evidence indicates, the original composition must be assigned. The fragment begins in the middle of a sentence which appears to allude to St. Peter's connexion with our Second Gospel, and goes on to mention Luke as the Third Gospel and John as the Fourth. Therefore it evidently acknowledged the Four Gospels. Then it has Acts, which it ascribes to Luke, and it acknowledges Thirteen Epistles of Paul—admitting the Pastorals, but excluding Hebrews, though it subsequently refers to 'an Epistle to the Laodiceans,' and another 'to the Alexandrians forged under the name of Paul,' as well as 'many others' which are not received in the Catholic Church 'because gall ought not to be mixed with honey.' Further, this Canon includes Jude, 2 Epistles of John, and the Apocalypse, which it ascribes to John. It also has the Book of Wisdom, which it says was 'written by the friends of Solomon in his honour,' and the Apocalypse of Peter, although acknowledging that there is a minority which rejects the latter work, for we read 'we receive moreover the Apocalypses of John and Peter only, which [latter] some of our body will not have read in the church.' This indicates that the author's church as a whole acknowledges the Apocalypse of Peter, and that he associates himself with the majority of his brethren in so doing, while he candidly admits that there are some dissentients. Lastly, the Canon admits Hermas for private reading, but not for use in the church services. We have here, then, most of our NT books; but, on the one hand, Hebrews, 1 and 2 Peter, James, and one of the Three Epistles of John are not mentioned. They are not named to be excluded, like the forged works referred to above; possibly the author did not know of their existence. At all events he did not find them used in his church. On the other hand, Wisdom, without question, and the Apocalypse of Peter, though rejected by some, are included in this canon, and Hermas is added for private reading.

Passing on to the 3rd cent. we come upon another anonymous writing, an anti-gambling tract called 'Concerning Dice-players' (*de Aleatoribus*), which Harnack attributed to Victor of Rome (A.D. 189–198), but which Koch attributed to a bishop of North Africa after Cyprian's time, perhaps toward A.D. 300. In this tract the *Shepherd of Hermas* and the *Didache* are both quoted as 'Scripture.' The author refers to three divisions of Scripture: (1) Prophetic writings—the OT Prophets, the Apocalypse, Hermas; (2) the Gospels; (3) the Apostolic Writings—Paul, 1 John, Hebrews.

Neither of these Canons can be regarded as authoritative either ecclesiastically or scientifically, since we are ignorant of their sources. But they both indicate a crystallizing process that was tending towards our NT, though with some curious variations. The writings of the Fathers of this period agree in the main with Irenaeus in their citations from most of the NT books as authoritative—a condition very different from that in Justin's writings half a century earlier. Two influences may be recognized as bringing this result about: (1) use in churches at public worship, (2) authoritative appeals against heresy—especially Gnosticism. It was necessary to settle what books should be read in church and what books should be appealed to in discussion. The former was the primary question. The books used at their services by the churches, and therefore admitted by them as having a right to be so employed, were the books to be appealed to in controversy.

Turning to the East, we find Clement of Alexandria (*c* A.D. 150–215) acknowledging the Four Gospels and Acts, and Fourteen Epistles of Paul (Hebrews being included), and quoting 1 and 2 John, 1 Peter, Jude, and the Apocalypse. He makes no reference to James, 2 Peter, or 3 John, any of which he may perhaps have known, as we have no list of NT books from his hand, for he does not name these books to reject them. Still, the probability as regards some, if not all, of them is that he did not know them. In the true Alexandrian spirit, Clement has a wide and comprehensive idea of inspiration, and therefore no very definite conception of Scriptural exclusiveness or fixed boundaries to the Canon. Thus he quotes Barnabas, Clement of Rome, Hermas, the Preaching of Peter, the Apocalypse of Peter, and the Sibylline Writings as in some way authoritative. He was a literary eclectic who delighted to welcome Christian truth in unexpected places. Origen (A.D. 184–253), who was a more critical scholar, treated questions of canonicity

CANON OF THE NEW TESTAMENT

more scientifically. Having travelled extensively he had opportunity of acquiring information as to what works were held to be canonical in many parts of the Church. According to a list quoted by Eusebius (*HE* vi. 25) he acknowledged as canonical the Four Gospels, Acts, Fourteen Epistles of Paul (including Hebrews; his statement, 'Who wrote this Epistle, in truth, [only] God knows,' probably refers to the unknown amanuensis employed by Paul), 1 Peter, 1 John, and Revelation. He mentions that 2 Peter and 2 and 3 John are of doubtful authorship. Elsewhere Origen quotes not infrequently from James and Jude as Holy Scripture, but occasionally alludes to their lack of general recognition. Furthermore, he refers to the Epistle of Barnabas, the Shepherd of Hermas, and the Teaching of the Twelve Apostles (the *Didache*) as canonical. It is a significant fact, however, that though an indefatigable commentator he apparently wrote no commentaries on any of those books which are not included in our NT.

3. The Settlement of the Canon in the Fourth and Fifth Centuries.—An important step towards the settlement of the Canon on historical and scientific lines was taken by Eusebius, who, with his wide reading and the great library of Pamphilus to resort to, also brought a fair and judicious mind to face the problems involved. Eusebius saw clearly that it is not always possible to give a definite affirmative or negative answer to the question whether a certain book should be in the Canon. Therefore he drew up three lists of books—(1) The books that are admitted by all, (2) the books which he is disposed to admit although there are some who reject them, (3) the books that he regards as spurious. A fourth class, which really does not come into the competition for a place in the Canon, consists of heretical works which 'are to be rejected as altogether absurd and impious' (*HE* iii. 25). The *first* class, consisting of the books universally acknowledged, contains the Four Gospels; Acts; the Epistles of Paul—which he reckons (iii. 3) to be fourteen, and therefore to include Hebrews; 1 Peter; 1 John; and Revelation (doubtfully). The *second* class, consisting of books widely accepted, though disputed by some (but apparently all admitted by Eusebius himself), contains James; Jude; 2 Peter (regarded in iii. 3 as spurious); 2 and 3 John. The *third* class, consisting of spurious works, contains the Acts of Paul; the Shepherd of Hermas; the Apocalypse of Peter; the Didache; and perhaps, according to some, the Revelation. Under the orders of Constantine, Eusebius had fifty copies of the Scriptures sumptuously produced on vellum for use in the churches of Constantinople. Of course these would correspond to his own Canon and so help to fix it and spread its influence. After this the fluctuations that we meet with are very slight. Athanasius in one of his *Festal Letters* (A.D. 367) undertakes to set forth in order the books that are canonical and handed down and believed to be Divine. His NT exactly agrees with our Canon, as does the NT of Epiphanius († A.D. 403). Cyril of Jerusalem († A.D. 386) gives a list of 'Divine Scriptures' which contains all the NT except the Revelation; and Amphilochius, Bishop of Iconium († after A.D. 394) has a versified catalogue of the Biblical books, in which also all our NT books appear except the Revelation, which he regards as spurious; Amphilochius refers to doubts concerning Hebrews and to a question as to whether the number of Catholic Epistles is seven or three. Even Chrysostom († A.D. 407) never alludes to the Revelation or the last four Catholic Epistles. But then he gives no list of the Canon. One of the *Apostolical Canons* (No. 85), which stand as an appendix to the eighth book of the *Apostolical Constitutions* (ch. 47), and cannot be dated earlier than the 4th cent. in their present form, gives a list of the books of Scripture. Sirach is here placed between the OT and the NT with a special recommendation to 'take care that your young persons learn the wisdom of the very learned Sirach.' Then follow the NT books—the Four Gospels, Fourteen Epistles of Paul (Hebrews therefore included in this category), two Epistles of Peter, three of John, James, Jude, two Epistles of Clement, the eight books of the *Constitutions*, Acts. Thus, while Clement and even the *Apostolical Constitutions* are included, the Revelation is left out, after a common custom in the East. Manifestly this is an erratic Canon.

Returning to the West, at this later period we have an elaborate discussion on the Canon by Augustine († A.D. 430), who lays down rules by which the canonicity of the several books claimed for the NT may be determined. (1) There are the books received and acknowledged by all the churches, which should therefore be treated as canonical. (2) There are some books not yet universally accepted. With regard to these, two tests are to be applied: (*a*) such as are received by the majority of the churches are to be acknowledged, and (*b*) such as are received by the Apostolic churches are to be preferred to those received only by a smaller number of churches and these of less authority, *i.e.* not having been founded by Apostles. In case (*a*) and (*b*) conflict, Augustine considers that 'the authority on the two sides is to be looked upon as equal' (*Christian Doctrine*, II. viii. 12). Thus the tests are simply Church reception, though with discrimination as to the respective authority of the several churches. The application of these tests gives Augustine just our NT.

Jerome († *c* A.D. 420) also accepts our NT, saying concerning Hebrews and the Revelation that he adopts both on the authority of ancient writers, not on that of present custom. He is aware that James has been questioned; but he states that little by little in course of time it has obtained authority. Jude was even rejected by most people because it contained quotations from Apocryphal writings. Nevertheless he himself accepts it. He notes that 2 and 3 John have been attributed to a presbyter whose tomb at Ephesus is still pointed out. The immense personal influence of Augustine and the acceptance of Jerome's Vulgate as the standard Bible of the Christian Church gave fixity to the Canon, which was not disturbed for a thousand years. No General Council had pronounced on the subject. The first Council claiming to be Ecumenical which committed itself to a decision on the subject was as late as the 16th cent. (the Council of Trent). We may be thankful that the delicate and yet vital question of determining the Canon was not flung into the arena of ecclesiastical debate to be settled by the triumph of partisan churchmanship, but was allowed to mature slowly and come to its final settlement under the twofold influences of Christian experience and honest scholarship. There were indeed local councils that dealt with the question; but their decisions were binding only on the provinces they represented, although, in so far as they were not disputed, they would be regarded as more or less normative by those other churches to which they were sent. As representing the East we have a Canon attributed to the Council of Laodicea (A.D. 363). There is a dispute as to whether this is genuine. It is given in the MSS variously as a 60th canon and as part of the 59th appended in red ink. Half the Latin versions are without it; so are the Syriac versions, which are much older than our oldest MSS of the canons. It closely resembles the Canon of Cyril of Jerusalem, from which Westcott supposed that it was inserted into the canons of Laodicea by a Latin hand. Its genuineness was defended by Hefele and Davidson. Jülicher regards it as probably genuine. This Canon contains the OT with Baruch and the Epistle of Jeremy, and all our NT *except* the Revelation. Then in the West we have the 3rd Council of Carthage (A.D. 397), which orders that 'besides the Canonical Scriptures nothing be read in the Church under the title of Divine Scriptures,' and appends a list of the books thus authorized in which we have the OT, the Apocrypha, and just our NT books. Here we have a whole province speaking for those books; when we add the great authority of Augustine, who belongs to this very province, and the influence of the Vulgate, we can well understand how the Canon should now be considered fixed and inviolable. Thus the matter rested for ten centuries in the West.

Among the Eastern churches, however, several diversities in the Canon have existed. During the first six centuries the Syrian churches were content with a NT Canon of twenty-two books (our NT except for 2 Peter, 2 and 3 John, Jude, and Revelation). It was not until the last quarter of the 10th cent. that the Book of Revelation was translated into Georgian. In fact, this book has never been included in the lectionary system of the Greek Orthodox Church. On the other hand, the Ethiopic Church had thirty-five books in the NT—our twenty-seven plus the eight books of canon law (the so-called Apostolic Constitutions). Furthermore, St. Ephraem the Syrian († *c* A.D. 378) wrote a commentary on the Third Epistle of Paul to the Corinthians, an Epistle which is also preserved in several mediaeval Armenian manuscripts.

4. Treatment of the Canon at the Renaissance and the Reformation.—The question of the Canon was revived by the Renaissance and the Reformation, the one movement directing critical, scholarly attention to what was essentially a literary question, the other facing it in the interest of religious controversy. Erasmus writes: 'The arguments of criticism estimated by the rules of logic, lead me to disbelieve that the Epistle to the Hebrews is by Paul or Luke, or that the Second of Peter is the work of that Apostle, or that the Apocalypse was written by the Evangelist John. All the same, I have nothing to say against the contents of these books, which seem to me to be in perfect conformity with the truth. If, however, the Church were to declare the titles they bear to be canonical, then I would condemn my doubt, for the opinion formulated by the Church has more value in my eyes than human reasons, whatever they may be'—a most characteristic statement, revealing the scholar, the critic, the timid soul—and the satirist (?). Within the Church of Rome even Cardinal Cajetan—Luther's opponent at Augsburg—freely discusses the Canon, doubting whether Hebrews is St. Paul's work, and whether, if it is not, it can be canonical. He also mentions doubts concerning the five General Epistles, and gives less authority to 2 and 3 John and Jude than to those books which he regards as certainly in the Holy Scriptures.

The Reformation forced the question of the authority of the Bible to the front, because it set that authority in the place of the old authority of the Church. While this chiefly concerned the book as a whole, it could not preclude inquiries as to its contents and the rights of the several parts to hold their places there. The general answer as to the authority of Scripture is an appeal to 'the testimony of the Holy Spirit.' Calvin especially works out this conception very distinctly. The difficulty was to apply it to particular books of the Bible so as to determine in each case whether they should be allowed in the Canon. Clearly a further test was requisite here. This was found in the 'analogy of faith' (*Analogia fidei*), which was more especially Luther's principle, while the testimony of the Holy Spirit was Calvin's. With Luther the Reformation was based on justification by faith. This truth Luther held to be confirmed (*a*) by its necessity, nothing else availing, and (*b*) by its effects, since in practice it brought peace, assurance, and the new life. Then those Scriptures which manifestly supported the fundamental principle were held to be *ipso facto* inspired, and the measure of their support of it determined the degree of their authority. Thus the doctrine of justification by faith is not accepted because it is found in the Bible; but the Bible is accepted because it contains this doctrine. Moreover, the Bible is sorted and arranged in grades according as it does so more or less clearly, and to Luther there is 'a NT within the NT,' a kernel of all Scripture, consisting of those books which he sees most clearly set forth the gospel. Thus he wrote: 'John's Gospel and his First Epistle, the Epistles of Paul, especially Romans, Galatians, Ephesians, and 1 Peter—these are the books which show thee Christ, and teach all that it is needful and blessed for thee to know even if you never see or hear any other book. . . . Therefore is the Epistle of James a mere epistle of straw (*eine rechte stroherne Epistel*) compared with them, since it has no character of the gospel in it' (Preface to NT[1], 1522; the passage was omitted from later editions). Luther places Hebrews, James, Jude, and the Apocalypse at the end of his translation, after the other NT books, which he designates 'the true and certain capital books of the NT, for these have been regarded in former times in a different light.' He regards Jude as 'indisputably an extract or copy from 2 Peter.' Nevertheless, while thus discriminating between the values of the several books of the NT, he includes them all in his translation. In fact, Luther concluded his Preface to the Epistle of James with the statement, 'I cannot place it among the right canonical works, but I do not wish thereby to prevent any one from so placing it and extolling it as seems good to him, for there are many good sayings in it.' Luther's friend Carlstadt has a curious arrangement of Scripture in three classes, viz. (1) The Pentateuch and the Four Gospels, as being 'the clearest luminaries of the whole Divine truth; (2) The Prophets 'of Hebrew reckoning' and the acknowledged Epistles of the NT, viz. Thirteen of Paul, 1 Peter, 1 John; (3) the Hagiographa of the Hebrew Canon, and the seven disputed books of the NT. Westcott suggested that the omission of Acts was owing to its being included with Luke.

Calvin is more conservative with regard to Scripture than the Lutherans. Still in his Commentaries he passes over 2 and 3 John and the Revelation without notice, and he refers to 1 John as 'the Epistle of John,' and expresses doubts as to 2 Peter; but he adds, with regard to the latter, 'Since the majesty of the Spirit of Christ exhibits itself in every part of the Epistle, I feel a scruple in rejecting it wholly, however much I fail to recognize in it the genuine language of Peter' (*Comm.* on *II Peter*, Argument). Further, Calvin acknowledges the existence of doubts with respect both to James and to Jude; but he accepts them both. He allows full liberty of opinion concerning the authorship of Hebrews; but he states that he has no hesitation in classing it among Apostolical writings. In spite of these varieties of opinion, the NT Canon remained unaltered. At the Council of Trent (1546) for the first time the Roman Catholic Church made an authoritative statement on the Canon, uttering an anathema ('*anathema sit*') on anyone who did not accept in their integrity all the books contained in the Vulgate. Thus the Apocrypha is treated as equally canonical with the OT books; but the NT Canon is the same in Roman Catholic and Protestant Canons. Translations of the Bible into the vernacular of various languages laid the question of the Canon to rest again, by familiarizing readers with the same series of books in all versions and editions.

5. The Canon in Modern Criticism.—In the 18th cent. the very idea of a Canon was attacked by the Deists and Rationalists (Toland, Diderot, etc.); but the critical study of the subject began with Semler (1771–1775), who pointed out the early variations in the Canon and attacked the very idea of a Canon as an authoritative standard, while he criticised the usefulness and theological value of the several books of the NT. Subsequent controversy has dealt less with the Canon as such than with the authenticity and genuineness of the books that it contains. In the view of extreme negative criticism canonicity as such has no meaning except as a historical record of Church opinion. On the other hand, those who accept a doctrine of inspiration in relation to the NT do not connect this very closely with critical questions in such a way as to affect the Canon. Thus doubts as to the authorship of the Pastoral Epistles, 2 Peter, James, etc., have not given rise to any serious proposal to remove these books from the NT. The Canon rests mainly on tradition and usage. But the justification for it when this is sought is usually found (1) in the Apostolic authorship of most of the NT books; (2) in the Apostolic atmosphere and association of the remaining books; (3) in the general acceptance and continuous

use of them in the churches for centuries as a test of their value ; (4) in their inherent worth to-day as realized in Christian experience. It cannot be said that these four tests would give an indefeasible right to every book to claim a place in the Canon if it were not already there—*e.g.* the small Epistle of Jude ; but they throw the burden of proof on those who would disturb the Canon by a serious proposal to eject any of its contents ; and in fact no such proposal—as distinct from critical questions of the dates, authorship, historicity, etc., of the several books—is now engaging the attention of scholars or churches. See INSPIRATION, REVELATION.

W. F. A.—B. M. M.

CANOPY.—A loan-word from the Greek *kōnōpeion*, a mosquito-net. It is used to render this word in the description of the bed of Holofernes with its mosquito-curtain (Jth 10^{21}, etc.) ; also in Is 4^5 (RV, RSV ; AV ' defence ') for Hebrew *ḥuppāh* in the sense of a protective covering. This Hebrew word is becoming naturalized in English to denote the canopy under which a Jewish bridegroom and bride stand while the wedding ceremony is being performed. A. R. S. K.

CANTICLES.—See SONG OF SONGS.

CAP.—See DRESS, 5 (*a*).

CAPER-BERRY (Heb. *'abhiyyônāh*).—Ec 12^5 RV ; AV, RSV ' desire.' The RV translation is supported by the LXX, Pesh., and the Mishnah. The caper-berry is the fruit of *Capparis sicula*, a common Palestine plant, which, largely on account of its habit of growing out of crevices in walls, has been identified with the **hyssop** (q.v.). Various parts of the caper plant are extensively used as medicine by the *fellāḥîn*. The familiar capers of commerce are the flower buds. The ' failure ' of the caper-berry in old age may have been its ceasing to act as a stimulant, either as an aphrodisiac or a stomachic. E. W. G. M.

CAPERNAUM.—The headquarters of Jesus in His Galilaean ministry (Mt 4^{13}, Jn 2^{12}). Here He healed the centurion's servant (Mt 8^{5-13}, Lk 7^{2-10}, Jn 4^{46-54}), provided the half-shekel for the Temple tribute (Mt 17^{24}), taught in the synagogue (Mk 1^{21}, Lk 4^{31}, Jn 6^{59}), performed many miracles (Mk $1^{23-2^{12}}$, Lk 4^{33-41}), taught His disciples (Mk 9^{33}). For its unbelief He denounced the city (Mt 11^{23}, Lk 10^{15}). Capernaum undoubtedly lay at *Tell Ḥûm*, where there are extensive ruins, including those of a fine 3rd cent. synagogue, which may stand on the very site of the one that Jesus attended. The town is mentioned in an inscription found at *el-Ḥammeh* near the mouth of the Yarmuk river as *Kephar Naḥum*.

R. A. S. M.—E. G. K.

CAPH or **KAPH.**—Eleventh letter of Hebrew alphabet, and so used in Ps 119 to introduce the 11th part, every verse of which begins with this letter.

CAPHARSALAMA.—Here Nicanor fought an engagement with Judas Maccabaeus (1 Mac 7^{31}). The story gives no clue as to his line of march, so it is uncertain where it should be sought. E. G. K.

CAPHENATHA, 1 Mac 12^{37} (AV).—See CHAPHENATHA.

CAPHIRA, 1 Es 5^{19} (AV, RV).—See CHEPHIRAH.

CAPHTHORIM, 1 Ch 1^{12} (AV)=people of **Caphtor** (q.v.).

CAPHTOR.—The region whence the Philistines came to Palestine (Am 9^7, Jer 47^4). Hence in Dt 2^{23} Caphtorim means Philistines (cf Gn 10^{14}). It is generally accepted that Caphtor signifies Crete (cf CHERETHITES), a view which is confirmed by the mention of *Kptr* in the cuneiform tablets from *Râs Shamra* (ancient Ugarit) as a place overseas, regarded, with Egypt, as the home of the arts, with which Ugaritic merchants had sea-borne intercourse. The Biblical tradition deriving the Philistines from Crete is correct only in so far as the Philistines were not natives of Crete, but, with kindred peoples from the N. and W., destroyed the local Minoan civilization (*c* 1400 B.C.) before settling on the Asiatic mainland in the early 12th cent.

J. F. McC.—J. Gr.

CAPITAL.—See KNOP.

CAPPADOCIA.—A large district in the mid-eastern part of Asia Minor, formed into a Roman province in A.D. 17. It was administered by a *procurator* sent out by the reigning emperor, being regarded as an unimportant district. In A.D. 70 Vespasian united it with Armenia Minor, and made the two together a large and important frontier province, to be governed by an ex-consul, under the title of *legatus Augusti pro praetore*, on the emperor's behalf. The territory to the N. and W. of Cilicia, the kingdom of the client-king Antiochus of Commagene, was incorporated in it at the time, and it afterwards received various accessions of territory. Jews from Cappadocia are mentioned in Ac 2^9. That such were already settled there (*c* 139 B.C.) is implied in 1 Mac 15^{22} where a letter in their favour is addressed by the Roman Senate to king Ariarathes (q.v.). Cappadocia was not visited by St. Paul, probably as insufficiently Hellenized, but it was one of the provinces to which 1 Peter was addressed. A. So.—E. G. K.

CAPTAIN.—In the AV this word translates thirteen different Hebrew terms that denote a wide variety of leadership. *Śar* is the most frequent : in AV more often translated ' prince ' and frequently ' chief ' or ' ruler ' ; rendered ' captain,' it designates in the era of the Judges the head of a tribe or clan and thereafter usually a military officer who may be in command of from 50 to 1000 men or even of an entire army. The RSV usually substitutes ' commander.' Saul created a standing army of 3000 (1 S 13^2 ; cf 24^2), many of whom like the ' worthless fellows ' of Jg 11^3 may already have looked to fighting as a vocation. David as brigand chief (1 S 22^{2ff}) commanded a disciplined corps that later may have provided the officers for his expanded army. Among his high court functionaries was the commander (AV ' captain ') of the royal bodyguard (2 S 8^{18}, 20^{23}). The so-called captains (AV) of Ex 14^7 15^4 were élite troops ; elsewhere this term *shālîsh* designates the third in rank or battalion commander. As used in Lk $22^{4, 52}$, Ac 4^1 $5^{24, 26}$, a ' captain ' commanded the gendarmerie which policed the Judaean Temple (see POLICE). In Jn 18^{12}, Rev 19^{18} the Greek term means ' commander of a thousand ' ; in RSV elsewhere it is rendered ' tribune ' in Ac 21^{31f} and ' generals ' in Rev 6^{15}. J. S. K.

CAPTIVITY.—See ISRAEL, I. 22.

CARABASION (1 Es 9^{34}).—A corrupt name of one of those who put away their ' strange ' wives. It seems to correspond to **Meremoth** in Ezr 10^{36}.

CARAVAN.—See TRADE AND COMMERCE.

CARBUNCLE.—See JEWELS AND PRECIOUS STONES.

CARCAS, Est 1^{10} (AV, RV).—See CARKAS.

CARCHEMISH was an important city as it commanded the principal ford of the Euphrates on the right bank, and was therefore indispensable to travel and commerce in Northern Syria. Mentioned from the beginning of the 2nd millennium B.C. it came under Hittite influence in the 14th cent. B.C. After the fall of the Hittite empire (*c* 1200 B.C.) Carchemish became the most important of the Hittite city-states, so that the Assyrians regarded it as the Hittite capital. It paid tribute to Ashurnasirpal II. and to Shalmaneser III. in the 9th cent. B.C., and was frequently involved in wars with the Assyrians, until Sargon II. conquered it in 717 B.C. (cf Is 10^9), after which it became the capital of an Assyrian province. Here Nebuchadnezzar defeated Pharaoh-neco in 605 B.C., and thus ended the latest native Egyptian *régime* in Asia (Jer 46^2, 2 Ch 35^{20}). The site is marked by a mound called *Jerablus*. Successful excavations were carried out there for the British Museum from 1876–1879 and from 1912–1914. Many Hittite hieroglyphic inscriptions came to light.

J. F. McC.—S. H. Hn.

CAREFULNESS.—*Careful* and *carefulness* do not express approbation in the English of the AV as they do now. To be careful is to be too anxious, to worry. 'Be careful for nothing,' says St. Paul (Ph 4[6]), and 'I would have you without carefulness' (1 Co 7[32]). Latimer says: 'Consider the remedy against carefulness, which is to trust in God.' Again, to be *careless* is not blameworthy, meaning simply to be without apprehension, to feel safe, as Jg 18[7] 'they dwelt careless, after the manner of the Zidonians, quiet and secure.'

CARIA (a region in SW. Asia Minor) is mentioned only in 1 Mac 15[23] as one of the districts to which the Roman Senate sent a letter in favour of the Jews in 139–138 B.C. It was free at that date, with its inland States federated. The more important states, Rhodes, etc., are separately named. A. So.

CARITES occurs in the *Kᵉthîbh* of the Hebrew text and in RVm in 2 S 20[23], where the *Ḳᵉrê* has *Cherethites* (so EV), and in 2 K 11[4], where RV, RSV have Carites and AV 'captains' (RVm 'executioners'). The Carites were possibly Philistine mercenaries from Caria, as the Cherethites may have been from Crete.

CARKAS.—One of the seven eunuchs or chamberlains of King Ahasuerus Est 1[10] (AV, RV **Carcas**).

CARMANIANS, 2 Es 15[30] (AV).—See CARMONIANS.

CARME, 1 Es 5[25] (AV).—See HARIM, **2.**

CARMEL.—1. An inhabited place in Judah (Jos 15[55], 1 S 30[29] LXX), identified with *el-Kirmil*, 7 miles S. of Hebron. Here Saul set up a memorial of his conquest of the Amalekites (1 S 15[12]), and here Nabal had his estate (1 S 25[2]). It was the home of Hezrai (Hezro), one of David's thirty heroes (2 S 23[25], 1 Ch 11[37]). In 2 Ch 26[10], where AV (following LXX) says that Uzziah had farmers and vinedressers here, the word is treated as a common noun by RV ('fruitful fields') and RSV ('fertile lands').

2. A hilly promontory, rising to over 1800 feet, by which the sea-coast of Palestine is broken, forming the south side of the Bay of Acre (modern *Jebel Kurmul, Jebel Mâr Elyâs*). It continues as a ridge running in a SE. direction, bordering the plain of Jezreel on the south. On this ridge was Jokneam, reduced by Joshua (Jos 12[22]). The promontory was included in the territory assigned to Asher (Jos 19[26]). Elijah chose Carmel as the scene of the trial of strength between Yahweh and Baal, possibly because it was so near Phoenicia, Jezebel's homeland. His sacrifice (1 K 18) is located by tradition at the SE. extremity of the ridge. Elisha had his headquarters at Carmel for a time, and it was a place of festal resort for Israelites (2 K 2[25], 4[25]). Its beauty and fruitfulness were proverbial (Is 33[9] 35[2], Am 1[2]); it was well-wooded (Mic 7[14]) and was therefore a good hiding-place (Am 9[3]). A maiden's head is compared to Carmel (Ca 7[5]).

Caves at the foot of Mount Carmel have yielded human remains representing apparently an intermediate or hybrid stage between palaeanthropic man (*Homo neanderthalensis*) and neanthropic man (*Homo sapiens*). From early times it was a holy place. In lists of Palestinian place-names in the records of Thothmes III. and later Egyptian kings it is probably Carmel that is meant by Rôsh Qādesh ('holy headland'). There was a sanctuary of Yahweh there before Elijah's time, for he repaired Yahweh's ruined altar (1 K 18[30]); there was probably an ancient Baal-sanctuary there too (whether of Baal-Shamem or the Tyrian Melkart is disputed; perhaps they were identified at Carmel), and this, in addition to its geographical situation, made it an eminently suitable place for the ordeal. Its pagan sanctity persisted for long. In Greek times it was sacred to Zeus; a stone foot was discovered in the vicinity a few years ago dedicated to 'Zeus Heliopoleitēs Karmēlos.' Strabo (*c* A.D. 20) knew it as a place of asylum; Vespasian (A.D. 69) sacrificed here on the altar of the god 'Carmel' and obtained favourable auspices for his imperial ambitions; Iamblichus (*c* A.D. 330) describes the mountain as 'sacred above all mountains and not to be trodden (*abaton*) by the vulgar.' In later times the mountain gave its name to the order of Carmelite friars (founded 1156). R. A. S. M.—**F. F. B.**

CARMI.—1. A Judahite, the father of Achan (Jos 7[1, 18], 1 Ch 2[7]). **2.** The Carmi of 1 Ch 4[1] should probably be corrected to **Chelubai,** *i.e.* Caleb (cf 1 Ch 2[9, 18]). **3.** The eponym of a Reubenite family (Gn 46[9], Ex 6[14], 1 Ch 5[3]), the **Carmites** of Nu 26[6].

CARMONIANS (2 Es 15[30], AV **Carmanians**).—A people occupying an extensive district (Kermān) N. of the Persian Gulf, W. of Gedrosia. They are said to have resembled the Medes and Persians in customs and language. The name survives in the present town and district of *Kirman*. In the above verse the reference is probably to Sapor I. (A.D. 240–273), the founder of the Sassanid dynasty, who, after defeating Valerian, overran Syria, and destroyed Antioch.

CARNAIM.—A city mentioned in 1 Mac 5[26, 43f], 2 Mac 12[21, 26] (AV, RV **Carnion**); probably the same as **Ashteroth-Karnaim** (q.v.).

CARNELIAN.—See JEWELS AND PRECIOUS STONES.

CARNION, 2 Mac 12[21, 26] (AV, RV).—See CARNAIM.

CAROB (Lk 15[16] RVm; RSV 'pods').—See PODS.

CARPENTER.—See ARTS AND CRAFTS, **1.**

CARPUS.—An inhabitant of Troas, with whom St. Paul stayed, perhaps on his last journey to Rome (2 Ti 4[13]). The name is Greek, but we have no means of proving his nationality.

CARRIAGE.—This word is always used in the AV in the literal sense of 'something carried,' never in the modern sense of a vehicle used for carrying. Thus Ac 21[15] 'we took up our carriages' (RV 'baggage'; RSV 'we made ready').

CARSHENA.—One of the wise men or counsellors of king Ahasuerus (Est 1[14]).

CART, WAGON.—The cart, like the chariot, is an Asiatic invention. The earliest wheeled carts show a light framework set upon an axle with solid wheels (illustrated in Wilkinson, *Anc. Egyp.* [1878] i. 249). The type of cart in use under the Hebrew monarchy may be seen in the Assyrian representation of the siege of Lachish (Layard, *Monuments of Nineveh*, ii, pl. 23), where women captives and their children are shown in wagons with a low wooden body (cf 1 S 6[14]), furnished with wheels of six and eight spokes. They were drawn by a pair of oxen (Nu 7[3, 7f])—exceptionally by two cows (1 S 6[7, 10])—yoked to a pole which passed between them, and were used for the transport of persons (Gn 45[19ff]) and goods (Nu *l.c.*), including sheaves of grain to the threshing-floor (Am 2[13]). The rendering 'covered wagons' (Nu 7[3]) is doubtful. For the threshing-wagon, see AGRICULTURE, **3.** A. R. S. K.

CASEMENT.—Only Pr 7[6] (AV; RV, RSV 'lattice,' as AV, RV, RSV in Jg 5[28], where the same Hebrew word is used). Cf also the Hebrew text of Sir 42[11] (omitted in Greek and in EV); 'In the room where she (*i.e.* thy daughter) dwells let there be no lattice.' See, further, HOUSE, **7.**

CASIPHIA.—A settlement in the neighbourhood of Ahava (q.v.) in North Babylonia (Ezr 8[17]), whose site has not been identified.

CASLEU, 1 Mac 1[54] 4[59], 2 Mac 1[9, 18] 10[5] (AV).—See CHISLEV.

CASLUHIM.—A name occurring in Gn 10[14], 1 Ch 1[12] in connexion with the names of other peoples there spoken of as descended from Mizraim, especially the Caphtorim and Philistines. The name is not otherwise known.

CASPHOR, 1 Mac 5[26, 36] (AV, RV).—See CHASPHO.

CASPIN.—See CHASPHO.

CASPIS, 2 Mac 12[13] (AV).—See CHASPHO.

CASSIA.—1. *Ḳiddāh*, Ex 30[24], Ezk 27[19]. **2.** *Ḳᵉṣî'ôth*,

Ps 45[8]. 3. *Kinnamōmon*, Sir 24[15] (RSV; AV, RV **cinnamon**, q.v., as RSV in Rev 18[13]). All these words apparently refer to some kind of cassia wood. The cassia bark from the *Cinnamomum cassia* is very similar in smell and properties to cinnamon (q.v.).

CASTANET.—See MUSIC AND MUSICAL INSTRUMENTS, 4 (3) (*b*).

CASTLE.—1. In Gn 25[16], Nu 31[10], 1 Ch 6[54], an obsolete, if not erroneous, rendering in AV of a word denoting a nomad 'encampment' (so RV, RSV, save 1 Ch 6[54] where RSV has 'settlements').

2. In 1 Ch 11[5, 7] AV speaks of the 'castle' of Zion, the citadel or acropolis of the Jebusite city, but RV and RSV render as in 2 S 5[7, 9] 'stronghold' (AV 'fort' in v.[9]). A different word (*bîrāh*) is used of the castle or fortress (AV 'palace') which in Nehemiah's day defended the Temple (Neh 2[8] 7[2]), and of the fortified royal residence of the Persian kings at Susa (Neh 1[1], Est 1[2] etc.; AV, RV '**palace**,' RVm 'castle'; RSV '**capital**'). The fortress in Jerusalem to which the authors of the books of Maccabees and Josephus give the name of Acra, is termed 'the castle' in 2 Mac 4[27] (RSV 4[28]) 5[5] 10[20] AV, where RV throughout has '**citadel**' (so RSV, save 10[20] where it has 'towers'), as also in 1 Mac 1[33] (so RSV; AV 'strong hold') and elsewhere. See further, CITADEL.

3. See BARRACKS. A. R. S. K.—H. H. R.

CASTOR AND POLLUX.—See DIOSCURI.

CAT.—This animal is mentioned only in the Apocr. (Ep. Jer v.[22] [Gr. [21]].) Perhaps sacred (temple) cats; but the text has been questioned: Syr. reads 'weasels.'

F. C. G.

CATARACTS.—See WATERSPOUTS.

CATERPILLAR.—See LOCUST.

CATHOLIC EPISTLES.—The title of 'Catholic' was given by the early Church to the seven Epistles which bear the names of James, Peter, John, and Jude. There is much uncertainty as to the meaning of the title. Perhaps the most probable explanation is that this group of Epistles was looked upon as addressed to the Church generally, while the Pauline Epistles were written to particular churches and were called forth by local circumstances.

CATHUA (1 Es 5[30]).—One of the heads of families of Temple servants who returned with Zerubbabel from captivity. It appears to correspond to **Giddel** in Ezr 2[47]; cf Neh 7[49].

CATTLE.—The word commonly used in OT is *miḳneh*, meaning primarily possessions or wealth—oxen, camels, sheep, and goats being the only wealth of peoples in a nomadic stage of civilization. It includes sometimes horses and asses, *e.g.* Ex 9[3], Job 1[3] (AVm, RVm; RSV leaves untranslated). The word is also sometimes rendered 'possessions' (*e.g.* Ec 2[7]), 'flocks' (Ps 78[48]), and 'herds' (Gn 47[18]). For other words rendered in EV 'cattle,' see BEAST. See also OX, SHEEP, SHEPHERD, etc. E. W. G. M.

CAUDA (AV wrongly **Clauda**; now *Gaudho*) is an island off the S. coast of Crete. St. Paul's ship, sailing from Myra to Rome, shortly after rounding Cape Matala was making in a WNW. direction, when a sudden strong wind coming from ENE. (see EURAQUILO) drove it along at a rapid rate for about 23 miles, till it got under the lee of Cauda (Ac 27[16]). Such a change of wind is frequent there at the present day. A. So.

CAUL.—The English word 'caul' is not used in RSV. It stands in AV and RV (1) in Is 3[18] (*shābhîs*) for a gold or silver headband (RSV 'headband'); (2) in Ex 29[13], Lv 3[4, 10, 15] 4[9] 7[4] 8[16, 25] 9[10, 19] (*yōthereth*) for the fatty mass (RSV 'appendage') at the opening of the liver (q.v.); (3) in Hos 13[8] (*s*ᵉ*ghôr*) for the pericardium, literally 'the enclosure of the heart' (RSV renders freely 'breast').

CAULDRON.—See HOUSE, 9.

CAUSEY.—This English word was used in the original edition of AV in 1 Ch 26[16, 18] (RV 'causeway,' RSV 'road'), and in the margin of Pr 15[19], Is 7[3] (RV, RSV 'highway'). It is now found only in Pr 15[19]m, being changed in modern editions in the other places into **causeway**. The Hebrew word is literally 'a raised way,' and is used of a public road, but never of a street in a city. The word 'causey' is still used in Scotland for the raised footpath by the side of a road or street.

CAVE.—The soft limestone hills of Palestine abound in caves, natural and artificial; and these attracted attention from the earliest antiquity. A remarkable series of stone age cultures has been found in caves near the NW. shore of the Sea of Galilee, in a ravine of Mt. Carmel, and elsewhere (cf C. C. McCown, *The Ladder of Progress in Palestine*). Lot (Gn 19[30]) and David (1 S 22[1] etc.) dwelt for a time in caves; and their use as places of hiding and refuge is illustrated by many passages, *e.g.* Jos 10[16], Jg 6[2], 1 K 18[4] etc. The Judaean Wilderness W. of the **Dead Sea** was especially famous for its caves (1 S 23[14, 24] 24, 2 S 17[9], 1 Mac 2[29–36]). In the 2nd cent. B.C. the **Essenes** found a haven there and at the time of the first Jewish revolt against **Rome** (A.D. 68–70) abandoned their scrolls in the caves near Khirbet Qumrân. At the time of the second Jewish revolt (A.D. 132–135) the warriors of Simon ben Kosibah (alias Bar Cochba) used several large caves of *Wâdī Murabbaʿât* as an outpost, where they likewise abandoned important documents, including letters from ben Kosibah himself. An even larger collection of such documents (together with well preserved artifacts) has been found in caves near En-gedi (P. Benoit, J. T. Milik, R. de Vaux, *Discoveries in the Judaean Desert*, ii; and Y. Yadin, *BA* xxiv, 1961). See also DEAD SEA SCROLLS.

Caves were also used at all periods in the history of Palestine for sepulture, as in the case of **Machpelah** (Gn 23). A remarkable series of caves are the great labyrinths tunnelled in the hills around *Beit Jibrîn*; one of these, in *Tell Sandaḥannah*, contains sixty chambers, united by doors and passages, and groups containing fourteen or fifteen chambers are quite common in the same hill. Another artificial cave near *Beit Jibrîn* contains a hall 80 ft. high and 400 ft. long; it has now fallen in. Other groups of caves, only less extensive, occur in various parts of Palestine on both sides of the Jordan. Little or nothing is known about the history of these great excavations. R. A. S. M.—W. H. Br.

CEDAR (*'erez*).—The finest of the trees of Lebanon, the principal constituent of its 'glory' (Is 35[2] 60[13]); it was noted for its strength (Ps 29[5]), its height (2 K 19[23]), and its majesty (1 K 4[33], 2 K 14[9], Zec 11[1f]). Its wood was full of resin (Ps 104[16]), and, largely on that account, was one of the most valuable kinds of timber for building, especially for internal fittings. It was exceedingly durable, being not readily infected with worms, and took a high polish (cf 1 K 10[27], Ca 1[17], Jer 22[14]). It was suitable, too, for carved work (Is 44[14f]). In all these respects the 'cedar of Lebanon' (*Cedrus Libani*) answers the requirements (but Koehler [*ZAW* lv (1937), 163–65] maintains that *Abies Cilicia* better fits some of the references). Though but a dwarf in comparison with the Indian cedar, *Cedrus Libani* is the most magnificent tree in Syria; it attains a height of from 80 to 100 feet, and spreads out its branches horizontally so as to give a beautiful shade (Ezk 31[3]); it is evergreen, and has characteristic egg-shaped cones. The great region of this cedar is now the Cilician Taurus Mountains beyond Mersina, but small groves survive in places in the Lebanon. The most famous of these is that at *Kadisha*, where there are upwards of 400 trees, some of great age. In a few references *'erez* does not mean the *Cedrus Libani*, but some other conifer. This is specially the case where 'cedarwood' is used in the ritual of cleansing after defilement by contact with a leper (Lv 14[4]) or a dead body (Nu 19[6]). Probably *'erez* here is a species of juniper, *Juniperus Sabina*, which grows in the wilderness. The reference in Nu 24[6] to

'cedar trees beside the waters' can hardly apply to the Lebanon cedar, which flourishes best on bare mountain slopes. E. W. G. M.—H. H. R.

CEDRON.—1. 1 Mac 15[39, 41] (AV); see KEDRON. **2.** Jn 18[1] (AV); see KIDRON, THE BROOK.

CEILAN, 1 Es 5[15] (AV).—See KILAN.

CEILED, CEILING.—The latter occurs only 1 K 6[9] (AV, RV 'covered') [15] (AV, RV 'ceiling'), where it has its modern signification. The verb, on the other hand, which is found only in AV, RV, should everywhere be rendered '**panelled**' (2 Ch 3[5] RSV 'lined'; Jer 22[14] RSV 'panelling'; Ezk 41[16], Hag 1[4] RSV 'panelled'), the reference being to the panels of cedar or other costly wood with which the inner walls were lined. See HOUSE, **4.**

CELLAR.—See HOUSE, **4.**

CENCHREAE (AV **Cenchrea** is wrong) was the southern harbour of Corinth, on the Saronic Gulf about 7 miles E. of Corinth. It was a mere village, and existed solely for the transit of goods to and from Corinth. Thence St. Paul set sail for Syria (Ac 18[18]). Phoebe, the woman commended for her service to the church here (Ro 16[1]), probably carried St. Paul's Epistle to Rome. A. So.—E. G. K.

CENDEBEUS (RV **Cendebaeus**).—A general of Antiochus VII. Sidetes, who was given the command of the sea-coast, and sent with an army into Palestine in order to enforce the claims of Antiochus against Simon Maccabaeus. In a battle which took place in a plain not far from Modin the Jews gained a complete victory over Cendebeus, and pursued the Syrians as far as Kedron and the neighbourhood of Azotus (1 Mac 15[38]–16[9]; cf Jos. *Ant.* XIII. vii. 3 [225–227]).

CENSER.—See FIREPAN, INCENSE.

CENSUS.—See QUIRINIUS.

CENTURION.—A Roman military officer, corresponding in number of infantry commanded by him (100) to the modern 'captain,' but in his status like our non-commissioned officers. The Capernaum centurion (Mt 8[5–13], Lk 7[2–10]) perhaps belonged to the army of Herod, and he may have been a Jew. Some of the captains mentioned in the NT were on special service in command of their units, and separated from the cohorts or legions of which they formed a part. See CAPTAIN.
A. So.—J. S. K.

CEPHAS.—See PETER.

CERAS, 1 Es 5[29] (AV).—See KEROS.

CETAB, 1 Es 5[30] (AV).—See KETAB.

CHABRIS.—One of the three rulers of Bethulia (Jth 6[14] 8[10] 10[6]).

CHADIAS, 1 Es 5[20] (AV).—See CHADIASANS.

CHADIASAI, 1 Es 5[20] (RV).—See CHADIASANS.

CHADIASANS (AV 'they of **Chadias**'; RV **Chadiasai**), 1 Es 5[20].—They and the Ammidians are mentioned as returning to the number of 422, with Zerubbabel. There are no corresponding names in the lists of Ezra and Nehemiah.

CHAEREAS (AV **Chereas**) held command at the fortress of Gazara, *i.e.* probably Jazer (OT Gezer) in the trans-Jordanic territory (see 1 Mac 5[6–8]). He was slain upon the capture of Gazara by Judas Maccabaeus (2 Mac 10[32–38]).

CHAFF.—See AGRICULTURE, **3.**

CHAIN is used in two different senses. **1.** Chains for securing prisoners are denoted by a variety of words in OT and NT, which are also rendered by '**bonds**' or '**fetters,**' although the monuments show that ropes were more generally used for this purpose. **2.** A chain of precious metal was worn as a sign of rank, as by Joseph and Daniel, or purely as an ornament. See ORNAMENTS, **2.** A. R. S. K.

CHALCEDONY.—See JEWELS AND PRECIOUS STONES.

CHALCOL, 1 K 4[31] (AV).—See CALCOL.

CHALDAEA, CHALDAEANS.—The Hebrew *Kaśdîm* is generally rendered 'Chaldees' (Gn 11[28]), and in Jer 50[10] 51[24] 24[5] 25[12], and often, is used for 'Babylonian.' The word is derived from the Babylonian *mât Kaldî*, the district in the SE. of Babylonia, and eventually limited to the sea-coast. From 1100 B.C. onwards, Aramaean nomadic tribes pushed into the country. Ukîn-zēr, a Chaldaean, became the first king of the 9th Babylonian dynasty which included Merodach-baladan II. (721–700 B.C.): cf Is 39, 2 K 20[12ff.]. Nabopolassar, a Chaldaean, founded the Chaldaean kingdom (625 B.C.).

The name as applied since Jerome to the Aramaic portions of Daniel and Ezra is incorrect. The use of the term 'Chaldaean' (Dn 1[4] and often) to denote a class of astrologers is not found in native sources, but arose from a transfer of a national name to the Babylonians in general, and occurs in Strabo, Diodorus, etc. It can hardly be older than Persian times.
C. H. W. J.—T. F.

CHALK-STONES (Is 27[9] only).—The expression is of much interest, as showing that the practice of burning limestone and slaking with water was followed in Palestine in OT times.

CHALLENGE.—To 'challenge' in the language of AV is to *claim*, as in Golding's translation of Calvin's *Job*, p. 578; 'Iob neuer went about to challenge such perfection, as to haue no sinne in him.' The word occurs in Ex 22[9] (RV, RSV 'one says, This is it'), in the heading of Is 45 'By his omnipotency he challengeth obedience,' and in Job 3[5] AVm (AV 'stain'; RV, RSV 'claim').

CHALPHI (AV **Calphi**).—The father of Judas, one of the two captains of Jonathan Maccabaeus who stood firm in a battle fought against the Syrians at Hazor in N. Galilee (1 Mac 11[70]).

CHAMBER.—Now obsolescent, is used by EV in a variety of connexions where modern usage employs 'room,' as *e.g.* 'bed-chamber,' 'upper chamber,' etc. See, generally, HOUSE. For the Temple chambers, see TEMPLE.

CHAMBERLAIN.—In OT the word occurs in 2 K 23[11] and repeatedly in AV and RV in Esther, where the original is *sārîs*, 'eunuch' (so RSV); but it is generally believed that this name is not to be taken always in a literal sense, and hence it is often rendered by the word 'officer.' In Esther, however, the chamberlain evidently belongs to that class of persons who are entrusted with the watchful care of the harems of Oriental monarchs. In NT at Ac 12[20] it is said that the people of Tyre and Sidon sought the favour of Herod Agrippa through the mediation of Blastus 'the king's chamberlain,' showing that the office was one of considerable influence. The word occurs again in AV in Ro 16[23], but is rendered in RV and RSV more accurately 'city treasurer.'

CHAMBERS OF THE SOUTH.—See STARS.

CHAMELEON.—The chameleon (*Chamoeleon vulgaris*) is a very common Palestine lizard. It may be found on hot days clinging with its bird-like feet and prehensile tail to the trees, or passing with slow and deliberate walk over the ground. It is remarkable for its marvellous protective gift of changing the colour of its skin to resemble its surroundings, and for its eyes which, moving independently, one looking backwards while the other looks to the front, give it an unusual range of vision. Even to-day it is supposed by the ignorant, as in olden times, to live upon air. In reality it lives on small insects, catching them by means of its long sticky tongue, which it can protrude and withdraw with extraordinary quickness. Two words in Lv 11[30] are rendered 'chameleon' in EV. In the AV *kōah* is so translated, but RV and RSV have '**land crocodile**' (see LIZARD); while in RV and RSV *tinshemeth* is rendered 'chameleon' (AV 'mole'). See MOLE. E. W. G. M.

CHAMOIS (*zemer*).—The translation of *zemer* in AV and RV in Dt 14[5] as 'chamois' and in LXX as 'camelopard,' *i.e.* giraffe, is certainly incorrect, as

neither of these animals occurs in Palestine. Tristram suggests the wild sheep, *Ovis tragelaphus*, an animal about 3 feet high with long curved horns, well known to the Bedouin. RSV renders ' *mountain-sheep*.'

E. W. G. M.

CHAMPAIGN.—This spelling in modern editions of AV has replaced *champion* (Dt 11[30] [RV, RSV ' Arabah '], Jth 5[1] [RV, RSV ' plains ']) and *champian* (Ezk 37[2]) of the 1611 edition of AVm. The word means an open plain.

CHANAAN, Ac 7[11] 13[9] (AV)=**Canaan** (q.v.).

CHANCELLOR.—See BELTETHMUS and REHUM.

CHANGES OF RAIMENT.—Gn 45[22], Jg 14[12f], 2 K 5[5] (AV, RV). A literal translation of a Hebrew expression which not merely denotes a change of garments in the modern sense, but implies that the ' changes ' are superior, in material or texture or both, to those ordinarily worn. Hence ' gala dresses,' ' festal robes,' or the like, may be taken as a fair equivalent. RSV renders ' **festal garments.**' Gifts of such gala robes have always been common in the East as special marks of favour or distinction. Cf DRESS, **7.**

A. R. S. K.

CHANNUNEUS, 1 Es 8[48] (AV).—See HANANIAH, **11.**

CHANUNEUS, 1 Est 8[48] (RV).—See HANANIAH, **11.**

CHAPHENATHA (AV **Caphenatha**), 1 Mac 12[37].—Close to Jerusalem on the east. Unknown.

CHAPITER.—An architectural term for the capital of a column, found a number of times in AV and RV (Ex 36[38] 38[17, 19, 28], 1 K 7[16], 2 K 25[17], 2 Ch 4[12f], Jer 52[22], Am 9[1], Zeph 2[14]); RSV in all these cases has ' **capital.**'

CHAPMAN.—A chapman is a trader, the word being still used in some places for a travelling merchant. It occurs in AV and RV in 2 Ch 9[14], and in RV in 1 K 10[15] (AV ' merchantmen '); RSV has ' trader ' in both places.

CHARAATHALAN (AV **Charaathalar**), 1 Es 5[36].—A name given to a leader of certain families who returned under Zerubbabel. But ' Charaathalan leading them and Allar ' is due to some perversion of the original, which has ' Cherub, Addan, Immer ' (so RSV), three names of *places* in Babylonia, *from which* the return was made (Ezr 2[59]; cf Neh 7[61]).

CHARACA, 2 Mac 12[17] (AV).—See CHARAX.

CHARASHIM, 1 Ch 4[14] (AV).—See GE-HARASHIM.

CHARAX (2 Mac 12[17], AV ' to Characa ').—East of Jordan, and apparently in the land of Tob. Unknown.

CHARCOAL.—Found only in RSV in Pr 26[21], Jn 18[18] 21[9], in all of which AV and RV have ' coals.' See COAL.

CHARCUS, 1 Es 5[32] (AV).—See BARKOS.

CHAREA, 1 Es 5[32]=**Harsha,** Ezr 2[52], Neh 7[54].

CHARGER.—An obsolete word for a large flat dish on which meat was served, Nu 7[13, 19, 25] etc. (AV, RV; RSV ' plate '), Mt 14[8], Mk 6[25] (AV, RV; RSV ' platter ').

CHARIOT.—The original home of the chariot was Western Asia, from which it passed to Egypt and other countries. The earliest models and representations come from pre-dynastic and early dynastic Ur (cf Sir Leonard Woolley, *Ur Excavations, IV. The Early Periods* [1955]). In OT chariots are associated mainly with war-like operations, although they also appear not infrequently as the ' carriages,' so to say, of kings, princes, and high dignitaries (Gn 50[9], 2 K 5[9], Jer 17[25]; cf Ac 8[28ff] the case of the Ethiopian eunuch) in times of peace. When royal personages drove in state, they were preceded by a body of ' runners ' (2 S 15[1], 1K 1[5]).

The war chariot appears to have been introduced among the Hebrews by David (2 S 8[4] LXX), but it did not become part of the organized military equipment of the State till the reign of Solomon. This monarch is said to have organized a force of 1400 chariots (1 K 10[26], 2 Ch 1[14]), which he distributed among the principal cities of his realm (1 K 9[19] 10[26]). At this time, also, a considerable trade sprang up in connexion with the importation of chariots and horses. The nature of this trade has been clarified by W. F. Albright, who renders the crucial passage, 1 K 10[28f], as follows: ' And Solomon's horses were exported from Cilicia: the merchants of the king procured them from Cilicia at the current price; and a chariot was exported from Egypt at the rate of 600 shekels of silver, and a horse from Cilicia at 150; and thus (at this rate) they delivered them by their agency to all the kings of the Hittites and the kings of Aram ' (*ARI*, p. 135). Solomon apparently controlled the trade in horses and chariots between Egypt and the north, delivering the famed Cilician horses to Egypt, and the equally famous Egyptian chariots to the Hittites and Aramaeans, while reaping a middleman's profit for himself and his merchants. Chariot-making had been brought to a peak of craftsmanship in Egypt; the best examples, from an earlier period, are the elaborate state chariots found in the tomb of Tut-ankh-amun (cf Howard Carter, *The Tomb of Tut-ankh-amen*, Vol. II. [1927], ch. iv. and plates).

Until the Macedonian period, when we first hear of chariots armed with scythes (2 Mac 13[2]), the war chariot of antiquity followed one general type, alike among the Assyrians and the Egyptians, the Hittites and the Syrians. It consisted of a light wooden body, which was always open behind. The axle, fitted with stout wheels with six or eight spokes (for the Hebrew terms see 1 K 7[33]), was set as far back as possible for the sake of greater steadiness, and consequently a surer aim. The pole was fixed into the axle, and after passing beneath the floor of the chariot was bent upwards and connected by a band of leather to the front of the chariot. The horses, two in number, were yoked to the pole. Traces were not used. In Assyrian representations a third horse sometimes appears, evidently as a reserve. The body of the chariot naturally received considerable decoration, for which, and for other details, reference may be made to J. B. Pritchard, *ANEP*, *s.v.* ' chariot,' where numerous illustrations are given. The ' chariots of iron ' of the ancient Canaanites (Jos 17[16], Jg 1[19] 4[3]) were chariots of which the woodwork was strengthened by metal plates.

In Egypt and Assyria the normal number of the occupants of a war chariot was two—the driver, who was often armed with a whip, and the combatant, an archer whose bow-case and quiver were usually attached to the right-hand side of the car. Egyptian representations of Hittite chariots, however, show three occupants, of whom the third carries a shield to protect his comrades. This was almost certainly the practice among the Hebrews also, since a frequently recurring military term, *shālîsh*, signifies ' the third man,' presumably in such a chariot.

Mention may be made, finally, of the chariots set up at the entrance to the Temple at Jerusalem, which were destroyed by Josiah. They were doubtless dedicated originally to Y", although they are termed by the Hebrew historian ' chariots of the sun ' (2 K 23[11]), their installation having been copied from the Babylonian custom of representing Shamash, the sun-god, riding in a chariot.

A. R. S. K.—D. N. F.

CHARITY.—The word ' charity ' never occurs in AV in the sense of *almsgiving*, but always with the meaning of *love*. It comes from the Vulg. *caritas*, which was frequently used to translate the Greek *agapē*, probably because *amor* had impure associations, and because *dilectio* (which is sometimes so used) was scarcely strong enough. Wycliffe followed the Vulg., as did afterwards the Rhemish translators. Tyndale and the Genevan Version preferred ' love '; but in the Bishops' Bible ' charity ' was again often used, and the AV followed the Bishops in this. In the RV, however, ' charity ' never occurs, the Greek *agapē* being everywhere rendered ' love.' RSV has one occurrence (Ac 9[36]).

For **Feast of Charity** (Jd [12] AV) see LOVE FEAST.

CHARM.—See AMULETS AND CHARMS; and MAGIC, DIVINATION, AND SORCERY.

CHARME, 1 Es 5[25] (RV).—See HARIM, **2.**

CHARMIS.—Son of Melchiel, one of three rulers or elders of Bethulia (Jth 6[15] 8[10] 10[6]).

CHASE.—See HUNTING.

CHASEBA, 1 Es 5[31] (AV, RV).—See CHEZIB.

CHASM.—See GULF.

CHASPHO.—Unknown site near a large lake in Gilead, 1 Mac 5[26, 36] (AV, RV **Casphor**); called **Caspin** in 2 Mac 12[13] (AV **Caspis**).

CHASTITY.—See CRIMES AND PUNISHMENTS, **3,** and MARRIAGE.

CHEBAR.—A canal in Babylonia (Ezk 1[1ff]) beside which the principal colony of the first Exile of Judah was planted. It has been identified by the Pennsylvania expedition with the canal *Kabaru,* named in cuneiform documents of the time of Artaxerxes I. It apparently lay to the E. of Nippur. The name means 'great.' Hence for 'the river Chebar' we may read 'the Grand Canal.' J. F. McC.

CHECKER WORK.—A designation applied in 1 K 7[17] to the net-ornament on the pillars before the Temple, and in Ex 28[4, 39] (RV 'chequer work'; AV 'broidered,' 'embroider') of the embroidery of the priestly garments.

CHEDORLAOMER.—King of Elam (Gn 14[1]), and one of the four kings who raided Canaan in the time of Abraham. It is generally accepted that the name represents the Elamite form Kudur-lagamar. Similar forms, *e.g.* Kudur-mabug, are known from the Elamite king-lists, but the name Kudur-lagamar is not found there. The Elamite kingdom, lying in the mountains to the E. of the Tigris-Euphrates valley, had been an important factor in the politics of Babylonia from very early times, and it is not impossible that in the time of Abraham the Elamites played a part in the struggles of the Amorite princes which may have involved all the states from the valley of the Orontes to the E. of the Tigris. S. H. He.

CHEEK.—The seat of health and beauty (Ca 1[10] 5[13]). To be smitten on the cheek was the climax of insult and violence (1 K 22[24], Job 16[10], Ps 3[7]). That the command in Mt 5[39] is not to be interpreted literally is shown by Christ's own protest in Jn 18[23]. C. W. E.

CHEESE.—See MILK.

CHELAL.—One who had married a foreign wife, Ezr 10[30].

CHELCIAS.—AV for Hilkiah in Bar 1[1, 7], Sus [2, 29]; see HILKIAH, **3, 9, 10.**

CHELLIANS.—Probably the inhabitants of the town Chelous (q.v.). Cf Jth 1[9] 2[23].

CHELLUS, Jth 1[9] (AV, RV).—See CHELOUS.

CHELOUS.—From the text of Jth 1[9] (AV, RV **Chellus**), this place is supposed to have been situated SW. of Jerusalem near Betane and N. of Kadesh and the 'river of Egypt,' *i.e.* the *Wâdī-el-'Arîsh*; but any certain identification is impossible.

CHELOD.—Jth 1[6b] RSV reads, not as AV and RV 'many nations of the sons of Chelod assembled themselves to battle,' but 'many nations joined the forces of the Chaldeans.' It is not quite certain whether the 'many nations' are allies of Nebuchadrezzar or of Arphaxad, or whether they come to help or to fight the 'sons of Cheleoud.' Probably v.[6b] summarizes v.[6a]; hence 'sons of Cheleoud' should be Nebuchadrezzar's army. But he is, in Judith, king of Assyrians, not Chaldaeans. No probable conjecture as to an Aramaic original has been made. F. C. G.

CHELUB.—1. A descendant of Judah, 1 Ch 4[11]. **2.** The father of Ezri, one of David's superintendents, 1 Ch 27[26].

CHELUBAI (1 Ch 2[9]).—Another form of **Caleb.** Cf 1 Ch 2[18, 42], and see CALEB, and CARMI, **2.**

CHELUHI.—One of the sons of Bani who had married a foreign wife, Ezr 10[35].

CHEMARIM.—This word is found only in Zeph 1[4] (RV; AV 'Chemarims'; RSV 'idolatrous priests'); but the original of which it is the transliteration is used also at 2 K 23[5] and Hos 10[5], and in both instances *Chemarim* is placed in the margin of AV and RV. *Kōmer,* of which *kᵉmārîm* is the plural, is of Aramaic origin, and when used in Syriac carries no unfavourable connotation. In the Hebrew of the OT, however, *kᵉmārîm* always has a bad sense; it is applied to the priests who conducted the worship of the calves (2 K 23[5], Hos 10[5]), and to those who served the Baalim (Zeph 1[4]). Kimḥi believed the original significance of the verbal form was 'to be black,' and explained the use of the noun by the assertion that the idolatrous priests wore black garments. Others take the root to mean, 'to be sad,' the *kōmer* being a sad, ascetic person; or 'be excited,' the *kōmer* being 'the excited one.'

CHEMOSH.—The national god of the Moabites, Nu 21[29]. On the Moabite Stone (see MOAB) Mesha attributes his victory over Israel to the help of Chemosh. It was for this 'abomination of Moab' that Solomon erected a temple (1 K 11[7]), later destroyed by Josiah (2 K 23[13]). We read of a king of Moab sacrificing his heir to Chemosh in a national emergency (2 K 3[27]). In Jg 11[24] 'Chemosh' is probably a scribal error for 'Milcom' (q.v.), who was the national god of the Ammonites.

CHENAANAH.—1. A Benjamite, 1 Ch 7[10]. **2.** The father of Zedekiah the false prophet in the reign of Ahab, 1 K 22[11, 24], 2 Ch 18[10, 23].

CHENANI.—A Levite, Neh 9[4].

CHENANIAH.—Leader of the Levites in music at the removal of the Ark from the house of Obed-edom, 1 Ch 15[22, 27]; named among the officers and judges over Israel, 26[29].

CHEPHAR-AMMONI ('village of the Ammonites').—A town of Benjamin, Jos 18[24] (AV **Chephar-haammonai**); situation unknown.

CHEPHAR-HAAMMONAI, Jos 18[24] (AV).—See CHEPHAR-AMMONI.

CHEPHIRAH ('village').—One of four Hivite cities which made peace with the Hebrews (Jos 9[17]), incorporated in the tribe of Benjamin (18[26]); repeopled after the Captivity, Ezr 2[25], Neh 7[29], 1 Es 5[19] (AV, RV **Caphira**); modern *Tell Kephireh,* SW. of Gibeon.

CHEQUER WORK.—See CHECKER WORK.

CHERAN.—One of the children of Dishon, the son of Seir, the Horite, Gn 36[26], 1 Ch 1[41].

CHERETHITES AND PELETHITES.—These were mercenary soldiers, who probably began to attach themselves to David whilst he was an outlaw (2 S 22[2], etc.), and subsequently became the king's bodyguard and the nucleus of his army (2 S 8[18] 15[18] 20[7, 23], 1 K 1[38, 44], 1 Ch 18[17]). Benaiah, whom Josephus calls 'captain of the guard' (*Ant.* VII. xi. 8 [293]), was their commander. They accompanied David in his retreat from Jerusalem (2 S 15[18]), fought against Absalom (2 S 20[7, 23]), and acted as Solomon's bodyguard at his coronation (1 K 1[38, 44]). The Cherethites apparently lived in Philistine territory (1 S 30[14]), dwelling with the Philistines on the coast (Ezk 25[16], Zeph 2[5]); and the name *Pelethites* may have been a corrupt form of *Philistines.* Unwillingness to believe that foreigners stood so near the national hero led certain Jewish scholars to assert that the two clans were Israelites. The appellation 'Cherethite' seems to be connected with Crete, and there is good ground (but see CAPHTOR) for the belief that Caphtor, from which Am 9[7] says the Philistines came, is to be identified with Crete. The LXX of Ezk 25[16], Zeph 2[5] used *Cretans* as the equivalent of *Cherethites.* The *Kᵉthîbh* of 2 S 20[23] reads Carites in the Massoretic text (see CARITES). J. T.—S. H. Hn.

CHERITH.—The 'brook' by which Elijah lived (1 K 17[3, 5]) was on the E. of Jordan; possibly *Wâdī Yâbis.*

CHERUB.—One of the places in Babylonia, from which certain families who returned with Zerubbabel failed to prove their register as genuine branches of the Israelite people (Ezr 2[59], Neh 7[61]; also 1 Es 5[36] RSV,

where AV has **Charaathalar** and RV **Charaathalan**, q.v.).

CHERUBIM.—These creatures were connected with the Holy of Holies and are therefore closely associated with the presence of God in OT religion and worship. By inheritance from the OT they also figure in the background of Christian worship as giving constant utterance to the praises of God. In fulfilment of their functions as guardians of the approach to Yahweh or as bearers of His throne or chariot, they serve as a barrier or screen between God and man and help to enhance His aloofness, His holiness, and His majesty.

They were creatures of the imagination, an imagination probably fed by representations of winged creatures in ancient art. Being such, there is no clear and constant description of them in the OT. Each writer who mentioned them might conceive them in the way that best suited his idea of their purpose and duties. They are spoken of as winged creatures with faces, but beyond that agreement almost ceases. In one place (Ezk 41^{18}) they are said to have two faces, one of a man and one of a lion, but in another place (Ezk 10^{14}) they have four, those of a cherub, a man, a lion, and an eagle. They stood on their feet, presumably upright, as men do (2 Ch 3^{13}). According to Ezekiel (10^{8}) they had hands under their wings. They were identified by Ezekiel (10^{15}) with the living creatures that he saw by the river Chebar (ch. 1). These creatures had four wings and four faces, man, lion, ox, and eagle, and under their wings on their four sides they had human hands. In Ezekiel's vision there were four of these creatures, matching the four points of the compass and signifying ability to move in all directions, but in Exodus (25^{18}) there were two, one on either side of the Ark. There is no indication of their size in Ezekiel's description, but in Exodus they are commensurate with the Ark and its cover (mercy-seat) and of one piece with it (Ex 25^{10ff}). The Ark was $2\frac{1}{2}$-cubits long and $1\frac{1}{2}$ broad and high. In Solomon's Temple, on the other hand, the two cherubim were colossal figures of olive wood, 10-cubits high (1 K 6^{23}).

They seem to have been Assyrian in origin, both in conception and in name. The Akkadian word *karibu* means 'one who prays,' 'an intercessor.' This is the function of secondary gods called *lamassu* or *šedu* who are represented as winged creatures with human faces. They guarded the entrance to temples and palaces and were commissioned to intercede for men. Two of these may be seen in the British Museum. One of them once guarded the doorway to the palace of Ashurnasirpal at Nimrud; the other also came from Nimrud. One has the body of a bull, the other that of a lion, but otherwise they are very similar, having the wings and breast feathers of an eagle and the head of a man. They stand about 12 feet high. Assyrian sculptures offer several examples of winged creatures of one kind or another. These, or similar representations, may well have fired the imagination of the Hebrew writers.

If it was these Assyrian temple guardians and intercessors upon which the Hebrews were dependent for their idea of the cherubim it is not without interest that they already, as intercessors, had some spiritual significance which the Hebrews, true to their genius, greatly enriched when they enthroned Yahweh upon them. There were three more or less distinct functions of the cherubim as they appear in the Bible. **1.** They were guardians to the Garden of Eden (Gn 3^{24}, Ezk $28^{14, 16}$). The cherubim in 1 K 6^{23-28} 8^{7} may be regarded as guardians of the Ark and of the inner shrine.

2. They are bearers of Yahweh, or of the throne of Yahweh. Ps 18^{10} (=2 S 22^{11}) speaks of Yahweh 'riding upon a cherub' (where the singular may be collective in force). This may be simply a conventional representation of the storm clouds, for in Ps 104^{3} the clouds are his chariot, but it may be intended to represent the chariot itself as a kind of movable throne borne upon these creatures. Chariot and cherubim are closely linked in 1 Ch 28^{18}. In Ezekiel the cherubim clearly act as the bearers of Yahweh who is seated in person above them (10^{1ff}). This conception of the throne of Yahweh carried by the (two) winged creatures became conventionalized in the representation of the Ark in the inner sanctuary surmounted by its covering (mercy-seat) and guarded by the cherubim, at the very heart of the sanctuary, the abode of Yahweh (Ex 25^{18ff}, cf He 9^{5}). It was here that Yahweh would meet with Moses (Ex 25^{22}) and speak to him (Nu 7^{89}). The Ark itself was almost certainly at one time thought of as the earthly throne of Yahweh and we may imagine Him as invisibly enthroned there. At some point in the development of the idea of the cherubim as bearers of Yahweh to that of guardians of His throne the phrase was probably coined 'The Lord of Hosts who is enthroned on the cherubim'; it occurs seven times, viz.: 1 S 4^{4}, 2 S 6^{2}, 2 K 19^{15}, 1 Ch 13^{6}, Ps 80^{1} 99^{1}, Is 37^{16}. The throne and the Ark were almost certainly associated with one another at some time and it is possible that the cover (AV and RV 'mercy-seat') may have taken the place of the throne. **3.** The third function of the cherubim was as decoration motifs on the walls and doors of the Temple (1 K $6^{29, 32, 35}$), on the panels of the bases (1 K $7^{29, 36}$), on the curtains (Ex 26^{1} 36^{8}), and on the veil (Ex 26^{31} 36^{35}). They occur in association with lions and oxen, palm trees and open flowers, but the significance of the connexion is not certain. The palm trees occur again in association with cherubim in Ezk 41^{18}, a representation which 'recalls the winged genii who fertilize the palm trees on the walls of Ashurnasirpal's palace at Nimrud' (G. A. Cooke, *Ezekiel* (ICC), p. 451).

In later literature cherubim rank among the higher orders of angels (cf 1 En 20^{7}) and appear in Rev 4^{6ff} as the living creatures who give perpetual praise to God. (For a discussion of their nature and function see the article, 'Les Chérubin,' by P. Dhorme and L. H. Vincent, in *Revue Biblique* 1926, pp. 328–358 and 481–495, and for pictures of winged creatures see *ANEP*, 1954.)

L. H. B.

CHESALON.—A town of Judah, near Kiriath-jearim, Jos 15^{10}; modern *Keslā*.

CHESED.—One of the sons of Nahor and Milcah, Gn 22^{22}. The form of the name might suggest that he is the eponymous ancestor of the Kasdim, or Chaldaeans. But it is doubtful whether these are the Chaldaeans of S. Babylonia (Gn 11^{31}). It is more probable that the nomadic tribe mentioned in 2 K 24^{2}, Job 1^{17} is meant.

CHESIL.—A town of Judah, Jos 15^{30} (LXX *Bethel*). In the parallel passage, Jos 19^{4}, the name *Bethul* stands, and in 1 Ch 4^{30} *Bethuel*. Possible modern *Kh. er-Râs*.

CHESNUT TREE, Gn 30^{37}, Ezk 31^{8} (AV).—See PLANE TREE.

CHESULLOTH.—A town of Issachar, Jos 19^{18}; probably to be identified with **Chisloth-tabor,** 19^{12}, and so on the border of Zebulun; modern *Iksâl* at the foot of the Nazareth hills.

CHETH.—See ḤETH.

CHETTIIM, 1 Mac 1^{1} (AV).—See KITTIM.

CHEZIB.—**1.** A place mentioned Gn 38^{5}; possibly the same as **Achzib, 2** (q.v.). **2.** Head of a family of Temple servants, 1 Es 5^{31} (AV, RV **Chaseba**). There is no corresponding name in the parallel Ezr 2^{47}, Neh 7^{50}.

CHIDON.—The name of the threshing floor where Uzzah died, 1 Ch 13^{9}; called **Nacon** in 2 S 6^{6} (AV **Nachon**).

CHIEF OF ASIA.—Ac 19^{31}; RV 'chief officers of Asia'; RSV 'Asiarchs.' See ASIARCH.

CHIEF MUSICIAN.—See PSALMS, **2.**

CHILD, CHILDREN.—**1. Value set on the possession of children.**—Throughout the Bible a noteworthy characteristic is the importance and happiness assigned to the possession of children, and, correspondingly, the

intense sorrow and disappointment of childless parents. Children were regarded as Divine gifts (Gn 4[1] 33[5]), pledges of God's favour, the heritage of the Lord (Ps 127[3]). It followed naturally that **barrenness** was looked upon as a reproach, *i.e.* a punishment inflicted by God, and involving, for the woman, disgrace in the eyes of the world. Thus Sarah was despised by her more fortunate maid Hagar (Gn 16[4]); Rachel in envy of Leah cried, 'Give me children or I shall die!' (Gn 30[1]); Hannah's rival taunted her to make her irritated, because the Lord had closed her womb (1 S 1[6]); Elizabeth rejoiced when the Lord took away her 'reproach among men' (Lk 1[25]). 'He gives the barren woman a home, making her the joyous mother of children' (Ps 113[9]) cries the Psalmist as the climax of his praise. The reward of a man who fears the Lord shall be a wife like a fruitful vine, and children like olive shoots around his table (Ps 128[3]). Jesus refers to a woman's 'joy that a child (Gr. 'human being') is born into the world' (Jn 16[21]). An apostle, reflecting on the effect of Eve's transgression, writes, 'Yet woman will be saved through bearing children' (1 Ti 2[15]). Not only is natural parental affection set forth in these and similar passages, but also a strong sense of the worldly advantages which accompanied the condition of parentage. A man who was a father, especially of sons, was a rich man; his position was dignified and influential; his possessions were secured to his family, and his name perpetuated. 'Be fruitful and multiply, and fill the earth and subdue it' (Gn 1[28]) was the blessing desired by every married couple, for fatherhood involved expansion of property and increase in importance and wealth.

2. The parent-child relationship.—The position of children was one of complete subordination to their parents. That the father had powers of life and death over his children is indicated by many references to child sacrifice (Gn 22[1-14], Lv 18[21] 20[2-5], Dt 12[31] 18[10], Jg 11[30-40], 1 K 16[34], 2 K 3[27] 21[6] 23[10], Jer 7[31] 19[5] 32[35], Ezk 16[20-21] 20[26, 31] 23[37, 39], Mic 6[7]). However, these powers over children were limited (Dt 21[18-21]). Several passages urge care, even to severity, in the rearing of children (Pr 3[12] 13[24] 22[6, 15] 23[13] 29[15]) including constant religious nurture and parental justice (Dt 6[6f.] 11[19] 21[15-17] 24[16], Pr 22[6]). Children must be reverent and obedient to their parents (Ex 20[12], Lv 19[3], Pr 1[8], Eph 6[1], Col 3[20]). Any one striking or cursing his father or mother was to be put to death (Ex 21[15, 17]). Any one who was disrespectful to his parents was accursed (Dt 27[16]). Irreverence on the part of children towards the prophet Elisha was the occasion for a striking instance of Divine judgment (2 K 2[23f]). The outcome of this dependence of children upon their parents, and of their subordination to them, was an intensely strong sense of the closeness of the filial bond, and a horror of any violation of it. A son who could bring himself to defy his father and break away from his home life was indeed no longer worthy to be called a son (Lk 15[19]). The disobedience of Israel was bewailed in penitence by the prophet because it appeared to him like the most heinous crime, the rebellion of children against a loving father: 'Sons have I reared and brought up, but they have rebelled against me' (Is 1[2]). 'In his love and in his pity he redeemed them; . . . But they rebelled and grieved his holy spirit' (Is 63[9f]; cf Is 30[1], Ezk 20[21]). Children were expected to follow in the footsteps of their parents and to resemble them (Mal 4[6]). Hence such expressions as 'Abraham's children' (Jn 8[39]), which carried the notion of resemblance in character. Hence also the figurative use of the word 'children': 'children of transgression' (Is 57[4]), 'sons of disobedience' (Eph 2[2] 5[6]). Phrases like these are closely connected with others in which the words 'children' or 'sons' are used in a spiritual sense conveying the ideas of love and trust and obedience: 'my son Mark' (1 P 5[13]); 'my little children,' used by the apostle Paul in touching anxiety for the spiritual welfare of the Galatians (Gal 4[19]), and the frequent intimate form of address in the First Letter of John (1 Jn 2[1, 12, 28] 3[7, 18] 4[4] 5[21]).

3. The feeling for childhood.—Tenderness towards child life, appreciation of the simplicity, the helplessness, of children, affection of parents for their children, and children for their parents: all these are features of the Bible which the most superficial reader cannot fail to observe. There are many touching and vivid examples of and references to parental love. All the sons and daughters of Jacob rose up to comfort him for the loss of Joseph, but he refused to be comforted (Gn 37[35]). 'If I am bereaved of my children, I am bereaved' (43[14]) is his despairing cry when Benjamin also is taken from him—Benjamin, 'the child of his old age, . . . and his father loves him' (44[20]). Hannah dedicated her little son to the service of the Lord in gratitude for his birth; and then 'used to make for him a little robe and take it to him each year' (1 S 2[19]). David fasted and lay all night upon the ground praying for the life of his sick child (2 S 12[16]). The brief account of the death of the Shunammite's boy is a passage of restrained and pathetic beauty (2 K 4[18ff]). Isaiah's feeling for the weakness and helplessness of children is displayed in the mention of the words first articulated by his own son (Is 8[4]). The description of the time when the earth shall be full of the knowledge of the Lord pictures little children, still dependent for life and protection upon their mother's care, without fear of harm on her part, being allowed to play among wild beasts and handle the asp and the adder (11[6-9]). Zechariah envisioned the happy time when Jerusalem shall be full of boys and girls playing in the streets (Zec 8[5]). The beauty of a child's humble simplicity was acknowledged by the Psalmist who likened his own soul to 'a child quieted at its mother's breast (Ps 131[2]). Thus was anticipated the spirit of One, greater than he, who said that only those who become like children will ever enter the kingdom of heaven (Mt 18[3]), who gave thanks to His Father for revealing the things of God to 'babes' (Mt 11[25]), and who, despite the disciples' objections to His bothering with children, 'took them in his arms and blessed them, laying his hands upon them' (Mk 10[16]).

For customs on child-bearing, inheritance, and training see articles on CLEAN AND UNCLEAN, **1**, FAMILY, FIRSTBORN, and INHERITANCE. E. G. R.—C. F. K.

CHILDREN [SONS] OF GOD.—In a few passages in the OT the term 'sons of God' is applied to divine beings, demigods or angels, members of the heavenly council (Gn 6[1-4], Job 1[6] 2[1] 38[7], Ps 29[1] 89[6] RVm, Heb. 'sons of gods,' RSV 'heavenly beings'; Dn 3[25] 'son of the gods'). According to one tradition (Dt 32[8] LXX) certain 'sons of God' were delegated authority by God to rule over the respective nations, while He reserved Israel for Himself. According to another (Ps 82[6]) some of these immortal 'gods, children (AV; RSV 'sons') of the Most High,' were divine judges (interpreted in Jn 10[34] as human rulers) held responsible for abetting human wickedness. Thus in these cases the 'children of God,' usually called 'sons of God,' were the family of divine beings of whom God was apparently the physical father.

With these exceptions the terms 'children of God' or 'sons of God,' with the correlative term 'Father,' designate the relation of men to God and of God to men, with varying fulness of meaning. It is obvious that the use of such a figure has wide possibilities. To call God 'Father' may imply little more than that He is creator and ruler of men (cf 'Zeus, father of gods and men'); or it may connote some phase of His providence towards a favoured individual or nation; or, again, it may assert that a father's love at its highest is the truest symbol we can frame of God's essential nature and God's disposition towards all men. Similarly, men may conceivably be styled 'children of God' from mere dependence, from special privilege, from moral likeness, or finally from a full and willing response to the Divine Fatherhood in filial love, trust, and obedience.

It is, therefore, not surprising that the Bible presents a varying and changing conception of God as Father and of men as His children.

I. In the OT.—The most characteristic use of the figure is in connexion with God's election of and providential dealings with His people Israel. That favoured nation as a whole is His 'son,' He their 'Father': it is because *this* tie is violated by Israel's ingratitude and apostasy that the prophets rebuke and appeal; it is when after Israel's repentance the tie is renewed that the prophets promise restoration. Thus Hosea declared that God loved Israel and called His 'son' out of Egypt (Hos 11^1; cf Ex 4^{22} 'Israel is my first-born son,' Sir 36^{12}, Ad. Est 16^{16}). Thus the divine rejection of Israel (Hos 1^9 *Lo-ammi* 'Not my people'), and thus further the prophecy that it shall be said to them, 'Sons of the living God' (Hos 1^{10}). So too Isaiah: 'Sons have I reared and brought up, but they have rebelled against me. . . . Israel does not know, my people does not understand' (1^{2f}). In Deuteronomy the same figure is used of God's care for His people (1^{31}), His discipline (8^5), and His rejection of pagan mourning rites as violation of the body which is God's creation (14^1). In the Song of Moses (Dt 32) God is the 'Father' of Israel whom He 'created' (v.^{6}), 'begat,' 'gave birth' (v.^{18}) by delivering them from Egypt; when in the wilderness 'His sons and daughters' (v.^{19}) whom He has nourished and established 'are a perverse generation, children in whom is no faithfulness' (v.^{20}), 'they are no longer His children' (v.^{5}); therefore He 'will stir them to jealousy with those who are no people' (v.^{21}), *i.e.* use enemy nations as instruments of judgment on His faithless chosen children (but cf Ro 10^{19} 11^{11}).

The relation between God the Father and Israel the son, then, is one of mutual intimacy and responsibility. As God is His people's Redeemer, the Divine Fatherhood is manifested in protecting and redeeming love. It involves the Divine faithfulness, to which His truly repentant people may make appeal in their extremity in the confident expectation of being gathered to their inheritance (Jer $31^{9, 18-20}$, cf $3^{4, 19}$, Is 43^6). Thus the Lord, who has been His people's Saviour in all their affliction (Is 63^{8f}) is their Father for all time (Is 63^{16}; cf To 13^4). However, the Father's offer of redemption carries with it the son's obligation of loyal filial response (Is 63^8). 'A son honours his father . . . If then I am a father, where is my honour?' (Mal 1^6). But such response is, of necessity, not only national, but also, and first, individual. Malachi's famous query, 'Have we not all one father? Has not one God created us?' (2^{10}) refers not only to the nation, but also to faithful individuals (cf Mal 3^{17}, Wis 2^{16} 5^5, Sir $23^{1, 4}$). This requirement of individual faithfulness to the Father opens the way for a conception of God as Father of every man, and of all men as at least potentially 'children of God.'

One might expect that a clear conception of such universal Fatherhood of God would naturally find utterance in the Psalms, in which we have at once the devoutest expression of the personal religious consciousness and the chosen vehicle of the worship of the congregation. But the dominating conception is of God as King and of man as His servant. In several passages the term '[illegible] on of God' is used of the Israelite king as the Divine King's adopted son (Ps 2^7 89^{26-29}; cf Ps 110^{1-3}, Sir 51^{10}), for the Lord was the Father of the Davidic dynasty (2 S 7^{14}, cf He 1^5), and the rule was a theocracy, whether the ruler be a reigning son of David in Jerusalem or a coming Messiah to be born of his line. In the Psalms the Divine care for man and the Divine help are set forth under a wealth of imagery: God is shield, rock, fortress, refuge, shepherd, light, salvation, but seldom Father (cf Wis 14^3). But one Psalmist especially sensitive to the closeness of his relationship to God speaks to Him of 'the generation of Thy children' (Ps 73^{15}). Two other psalms speak of the Divine Father in similes describing His tender mercies: He is 'Father of the fatherless' (Ps 68^5); 'As a father pities his children, so the Lord pities those who fear him' (103^{13}; with the allusion to the womb in the Hebrew verb translated 'pities,' cf the mother love of God in Is 66^{13}).

Thus in the OT the doctrine of men as 'children of God' refers primarily to Israel as chosen and adopted sons of the redeemer God. However, the sense, on the one hand, of the filial responsibility of the faithful Israelite son as an individual and, on the other, of the tender mercy of the Father to the fatherless individual, together with the evangelistic zeal of a Second Isaiah for Israel's role in bringing 'light to the nations' (Is 49^6) may have provided occasion for expansion of the concept. Central in such expansion was the realization of the common creaturehood of man as God's creation. Mal 2^{10}, easily the springboard for the ideal of a common brotherhood of all mankind under a common Fatherhood of God, and Is 45^{11}, which clearly refers to Gentiles as 'my children,' both are concerned with the creativs work of God (cf Is 64^8). True, the concept of man ae created 'in the image of God' (Gn 1^{27}), while seemingly implying man's universal sonship, is not explicitly interpreted as such in the OT. Nevertheless, God's Fatherhood, especially seen in His acts of grace to faithful Israel and to be made available through Israel to mankind beyond, is clearly affirmed in the OT. Thus the groundwork is laid for what is sometimes erroneously regarded as a uniquely NT doctrine of the 'children of God.'

S. W. G.—C. F. K.

II. In the NT.—The outstanding fact is that in the self-revelation of Jesus Christ, as well as in His teaching, the *characteristic* name for God is 'Father.' He enters into full inheritance of the OT conception of the Divine power and transcendence, proclaims a Kingdom of God, and develops its meaning for His disciples; but the King is also Father, and the stress of Christ's teaching on this side is not on the Kingship but on the Fatherhood of God. In what *unique* sense He knew God as 'His own Father,' Himself as 'Son of God,' we do not here inquire (see Christology), noting only how simply, in the deepest experiences of joy or trouble, His faith uttered itself in the name 'Father' (Mt 11^{25} 26^{39}, Lk 23^{46}). But there was that in His religious consciousness which He could freely share with His disciples as 'children of God': the faint and halting analogy of the OT became through Him a clear and steadfast revelation of the Divine Fatherhood, and of sonship, in its fullest sense, as the possible and indeed normal relation of human to Divine.

1. The Synoptic Gospels.—The essential and universal Fatherhood of God appears in such sayings as that of Mt 5^{43-48}, and, supremely, in the parable of the Prodigal Son. Even when, as generally, it is in discourse to the disciples that the term 'your Father' is used, it still connotes what is in God, awaiting in man that obedient recognition which is sonship. It is the appeal of Christ to His disciples against hypocrisy, unforgivingness, lack of faith (Mt $6^{1, 15, 26}$); it stands as symbol of the Divine providence, forgiveness, redemption—in a word, of the Divine love (Lk 6^{36} 11^{13}, Mk 11^{25}), and hence it gives the ground and manner of all access to God,—'When you pray, say, Father' (Lk 11^2).

If with Jesus the Fatherhood of God lies in His disposition towards men, not in the mere fact that He created them, so the filial relationship is ethical. God *is* Father, men must *become* children. In the Synoptic Gospels the term implying generation—'child (children) of God'— is not used, and the references to 'sons of God' are few, though sufficient to emphasize the moral conditions of sonship. Thus, the peacemakers 'shall be called sons of God' (Mt 5^9): love to one's enemies has for its motive 'that you may be sons of your Father who is in heaven' (Mt 5^{45}; cf Lk 6^{35}). But since sonship is virtually identical with membership of the Kingdom of God, these direct references must be supplemented by the many sayings in which the conditions of entrance into the Kingdom are laid down: it is the *righteous* (and what the term means is set forth in the

Sermon on the Mount) who 'will shine like the sun in the kingdom of their Father' (Mt 13[43]).

2. The Gospel (and 1 Ep.) of St. John.—In the Fourth Gospel (considered here rather than in its chronological sequence, for the sake of comparison with the Synoptics) certain elements in our Lord's revelation of the Father receive new emphasis.

(*a*) The *unique* Sonship of Jesus is the prevailing theme (Jn 1[14, 18] 20[31]). Hence the Synoptic phrase 'your Father' all but disappears. What it implies is not absent, but is to be reached through a rich unfolding of, and fellowship with, the personal religious consciousness of Jesus Himself, under the terms 'my Father' and, especially, 'the Father.' Only once does He speak to the disciples of 'your Father,' when, after His resurrection, He links them with Himself as 'brethren' in the message, 'I am ascending to my Father and your Father, to my God and your God' (Jn 20[17], cf 14[20]).

(*b*) The sonship of the disciples is to be attained *through Jesus Christ*: 'No one comes to the Father, but by me' (Jn 14[6]). What is exceptional in the Synoptics (Mt 11[25], Lk 10[22]) becomes the normal teaching of the Fourth Gospel: to see, know, believe, love, confess the Son, is the one way of access to the Father (Jn 14–17, 1 Jn 2[23]). Moreover, the impulse of attraction to Christ is itself from the Father (Jn 6[44, 65]), and the Divine initiative, as well as the completeness of the break required with 'the world' and 'the flesh' (1 Jn 2[16], Jn 3[6]), is described as being 'born anew,' 'born of the Spirit,' 'born of God' (Jn 3[3–8] 1[13], 1 Jn 3[9]). In 1 John the moral fruits of this new birth are set forth—righteousness, incapability to sin, love, faith in the Son of God, victory over the world (1 Jn 2[29] 3[9] 4[7] 5[1, 4]).

These are the elements which combine in the conception of sonship in the Johannine writings: the actual phrase 'children (not 'sons') of God' occurs Jn 1[12] 11[52], 1 Jn 3[1f, 10] 5[2].

3. The Epistles of St. Paul.—St. Paul speaks both of 'children of God' and of 'sons of God.' His doctrine comprises the mystical and the ethical elements already noted, while it is enriched and developed by additional features. In his speech at Athens (Ac 17[28]) he for a moment adopts the Greek point of view, and regards all men as the 'offspring' of God. Apart from this, he—like the Fourth Gospel, but in his own way—connects sonship with faith in Christ: it is part of his doctrine of redemption, a status and privilege conferred by God upon men through faith in Christ, attested by the indwelling Spirit and His fruits. 'For in Christ Jesus you are all sons of God, through faith' (Gal 3[26]); 'It is the Spirit himself bearing witness with our spirit, that we are children of God' (Ro 8[16]); 'For all who are led by the Spirit of God are sons of God' (Ro 8[14]). It is as 'children of God' that his converts have a moral mission to the world (Ph 2[15]).

The idea of sonship as a Divinely conferred status is expressed by St. Paul under the figure (derived from Roman custom) of 'adoption' (q.v.), by which a stranger could be legally adopted as 'son' and endowed with all the privileges of the 'child' by birth (Eph 1[5–14], cf Ro 8[29]). The figure suggests fresh points of analogy. To the Romans, St. Paul makes moral appeal on the grounds that in exchange for the 'spirit of slavery' they had received the 'spirit of sonship' so that they could cry, 'Abba! Father!' (Ro 8[15]). In the passage Gal 3[23]–4[7] he likens the state of the faithful under the Law to that of 'children' needing a 'custodian'; 'heirs,' yet, because under guardians, differing nothing from 'slaves.' The Law as 'custodian' has led them to Christ, in whom they are now 'sons of God'; Christ has 'redeemed' them from the bondage of Law that they might 'receive adoption as sons,' and, because they are sons, 'God has sent the Spirit of his Son into [our] hearts, crying, "Abba! Father!"' This spiritual sonship, open to all believers, should be no stumbling-block to Israel, though to them specially belonged 'the sonship' (Ro 9[4]). It fulfils the typical distinction within Israel itself of 'children of the flesh' and 'children of the promise': by Divine election alone men become 'children of God,' 'sons of the living God' (Gal 4[28], Ro 9[8, 26]).

St. Paul further conceives of sonship as looking forward for its full realization. We are waiting 'for adoption as sons, the redemption of our bodies' (Ro 8[23]). As Christ was Son of God, yet was by His resurrection 'designated Son of God in power' (Ro 1[4]), so will deliverance from the 'bondage to decay' reveal the 'sons of God,' and all creation shall share in 'the glorious liberty of the children of God' (Ro 8[18–25]). This ultimate realization of sonship is 'to be conformed to the image of his Son, in order that he might be the first-born among many brethren' (Ro 8[29], cf 1 Jn 3[2]). Finally, the greatness and the certainty of the future glory are set forth under the thought of the son as 'heir' (Ro 8[17], Gal 4[1–7]; cf Eph 1[14–18]).

4. Other NT writers.—The opening chapters of the *Epistle to the Hebrews* emphasize the greatness and finality of a revelation through the Son, who in stooping to redeem men is not ashamed to call them 'brethren'; they are 'children' whose nature He shares, 'sons' who through Him are brought to glory (He 2[9–18]). And at the close of the Epistle the readers are exhorted to regard suffering as the Divine chastening, which marks them out as 'sons' and comes from 'the Father of spirits' (12[4–13]).

If the *Epistle of St. James* suggests a universal view of the Fatherhood of God in the phrases 'God and *the* Father,' '*the* Lord and Father,' '*the* Father of lights' (Ja 1[27] 3[9] 1[17]), it also endorses the deeper spiritual sonship under the figure, 'Of his own will he brought us forth by the word of truth' (1[18]). The same metaphor of spiritual birth is used by *St. Peter*. In 1 P 1[23] this birth, as in James, is through the 'word' of God; in 1[3] it is attributed to the resurrection of Jesus Christ, and is joined with the Pauline thought of an inheritance yet to be fully revealed. The name 'Father' appears as the distinctively Christian name for God—'if you invoke as Father him who judges . . .' (1[17]). But the idea of sonship is not developed: the thought does not occur in the enumeration of Christian privileges in 2[1–10], where the phrase 'sons of the living God' is absent from the reference to Hosea, though found in the corresponding reference by St. Paul (cf 1 P 2[10] with Ro 9[25f]).

Finally, in *Revelation* we meet with this figure of sonship, with emphasis on its ethical side, in the vision of the new heaven and the new earth: 'He who conquers shall have this heritage, and I will be his God and he shall be my son' (Rev 21[7], cf v.[8]). S. W. G.—**W. D. S.**

CHILDREN, SONG OF THE THREE.—See APOCRYPHA, **10.**

CHILEAB.—David's second son by Abigail, 2 S 3[3]; called **Daniel** in 1 Ch 3[1].

CHILIARCH (Rev 19[18] RVm; RSV 'captains').—See BAND.

CHILIASM.—Otherwise known as Millenarianism, this is an extremist eschatological doctrine which was popular in the early Church and has been revived from time to time since the 16th cent. Based on a literalist exegesis of Scripture, it teaches that at the end of the world Christ will be visibly manifested and will reign among His saints for a thousand years (hence the name: Gr. *chilia* and Lat. *mille*=1000). According to the primitive form of the doctrine, this earthly reign of Christ will fall between the first resurrection, which is reserved for the righteous, and the second, in which the wicked will be raised and which will be followed by the general judgment. In Christ's kingdom the elect will enjoy every kind of material and spiritual blessing.

The roots of Chiliasm can be traced to the late Jewish expectation, discernible also in the prophets, of an earthly reign of the Messiah prior to the final consummation. 2 Es 7[28] envisaged it as lasting 400 years, but some rabbis preferred 1000 years; they taught that human history down to the coming of the Messiah would last 6000 years, corresponding to the six days of creation, and the Messiah's 1000-year reign would correspond to the Sabbath. These ideas passed from

Judaism to Christianity by way of the Book of Revelation (cf especially Rev 20). They enjoyed a great vogue in the 2nd cent., being reproduced in vivid detail, for example, by 'Barnabas' (cf 15$^{4-9}$). If the heretic Cerinthus dwelt on the sensual satisfactions which the saints would enjoy, orthodox teachers like Papias were not much behind him. The Montanists were extreme chiliasts, but both Justin and Irenaeus were positive that the millenarian doctrine was an essential item in the Church's faith. In the 3rd cent., however, it began to come under heavy fire, Origen with his allegorical method of exegesis being its deadliest critic. In the 4th cent. the Cappadocians in the East and Jerome in the West condemned it, and Augustine dealt it a fatal blow by identifying the visible Church with the earthly kingdom spoken of by the Apocalyptist.

Augustine's views remained to the fore throughout the Middle Ages, but a revival of chiliastic conceptions came with the Reformation, when attention was again focused on the NT. The more enthusiastic reforming sects looked for the speedy establishment of Christ's reign on earth, and in 1534 the Anabaptists at Münster-i-W. actually began to set up a Kingdom of Zion, involving the sharing of women and property, as a prelude to Christ's kingdom. Both the Augsburg and the Helvetic Confessions, however, condemned Chiliasm, and the leading Reformers, while believing in the Lord's speedy return, did not attempt to literalize it.

In the 17th and 18th cents. the Pietist Movement encouraged the revival of millenarian ideas in Germany, while in the 19th cent. they found support both in the U.S.A. and in Great Britain amongst the Irvingites, the Mormons, and the Adventists. About the same time certain Roman Catholic theologians advanced a moderate form of the doctrine, especially in connexion with their interpretation of Revelation, but even this greatly 'mitigated Millenarianism' came under the condemnation of the Holy Office in 1944. At the present day chiliastic ideas are out of favour, being confined to a few unrepresentative sects and a number of individual revivalist evangelists; but they are always liable to come into their own again where a simple, fundamentalist piety holds sway. J. N. D. K.

CHILION ('wasting away').—Son of Elimelech and Naomi (Ru 1^{2}), who married Orpah (1^{4} 4^{10}), a Moabitess, and after a sojourn of ten years in Moabite territory died there.

CHILMAD.—Named in Ezk 27^{23} in a list of nations that traded with Tyre. Its location is unknown. Amongst the suggestions made is the identification with *Charmandē*, on the Euphrates, mentioned by Xenophon (*Anab.* I. v. 10). George Smith identified it with *Kalwâdha*, near Baghdad. Neither of these is probable.

CHIMHAM.—Probably the son (cf 1 K 2^{7}) of Barzillai the Gileadite, who returned with David from beyond Jordan to Jerusalem after the death of Absalom (2 S 19^{31f}). See, further, GERUTH-CHIMHAM.

CHIMNEY.—See HOUSE, 7.

CHINNERETH.—A city of Naphtali (Dt 3^{17}, Jos 11^{2} [in latter **Chinneroth**] 19^{35}, 1 K 15^{20} [in latter **Chinneroth**; AV **Cinneroth**], which gave its name to the **Sea of Chinnereth** (Nu 34^{11}, Jos 12^{3} [in latter **Chinneroth**] 13^{27}), the OT designation of the Sea of Galilee; modern *Tell el-ʿOreimeh*.

CHIOS.—An island in the Aegean Sea opposite the Ionian peninsula in Asia Minor. In the 5th cent. B.C. the inhabitants were the richest of all the Greeks. The city was distinguished in literature also, and claimed to be the birth-place of Homer. Up to the time of Vespasian it was, under the Roman Empire, a free State. The chief city was also named Chios. St. Paul passed it on his last voyage in the Aegean Sea (Ac 20^{15}). A. So.

CHISLEU, Neh 1^{1}, Zec 7^{1} (AV).—See CHISLEV.

CHISLEV.—Neh 1^{1}, Zec 7^{1} (AV **Chisleu**), 1 Mac 1^{54} 4^{59}, 2 Mac 1$^{9, 18}$ 10^{5} (AV **Casleu**); see TIME.

CHISLON ('confidence'?).—Father of Elidad, Benjamin's representative for dividing the land, Nu 34^{21}.

CHISLOTH-TABOR.—See CHESULLOTH.

CHITHLISH, Jos 15^{40} (RV).—See CHITLISH.

CHITLISH.—A town of Judah, in the Shephelah, Jos 15^{40} (AV **Kithlish**, RV **Chithlish**); possibly modern *Kh. el-Makhaz*.

CHITTIM, Dn 11^{30}, Nu 24^{24}, Ezk 27^{6} (AV), 1 Mac 1^{1} 8^{5} (RV).—See KITTIM.

CHIUN, Am 5^{26} (AV, RV).—See KAIWAN.

CHLOE (mentioned only in 1 Co 1^{11}).—St. Paul had been informed of the dissensions at Corinth probably by some of her Christian slaves. Chloe herself may have been either a Christian or a heathen, and may have lived either at Corinth or at Ephesus. In favour of the latter is St. Paul's usual tact, which would not suggest the invidious mention of his informants' names, if they were members of the Corinthian Church.

CHOBA, Jth 4^{4} 15^{4f} (AV, RV **Chobai** in the latter), noticed with Damascus.—Perhaps the land of Hobah (q.v.).

CHOIR (Neh 12^{8} RVm).—See PRAISE.

CHOIRMASTER.—See PSALMS, 2.

CHOLA, Jth 15^{4} (RV).—See KOLA.

CHOLER is used in Sir 31^{20} 37^{30} in the sense of a disease, 'perhaps cholera, diarrhoea'—*Oxf. Eng. Dict.* (RV 'colic'; RSV 'colic,' 'nausea'); and in Dn 8^{7} 11^{11} in the sense of bitter anger. Both meanings are old, and belonged indeed to the Latin *cholera* as early as the 3rd and 4th cents.

CHOR-ASHAN, 1 S 30^{30} (AV).—See BOR-ASHAN.

CHORAZIN.—Mentioned only in the woe pronounced by Jesus (Mt 11^{21}, Lk 10^{13}). The name survives at the ruins of *Kerāzeh*, N. of Capernaum. Here there are remains of a synagogue of the 3rd cent. A.D., probably standing on the site of the one which Jesus may have visited. Of particular interest is a *cathedra Mosis* (Mt 23^{2}) bearing an inscription in Aramaic honouring the man who had paid for the portico and stairway. E. G. K.

CHORBE (AV **Corbe**), 1 Es 5^{12}=**Zaccai,** Ezr 2^{9}, Neh 7^{14}.

CHOSAMAEUS (1 Es 9^{32}).—It is not improbable that the Greek reading is due to a copyist's error, especially seeing that the three proper names that follow Shimeon in the text of Ezr 10^{31} are omitted in 1 Esdras.

CHOZEBA, 1 Ch 4^{22} (AV).—See COZEBA.

CHRIST.—See CHRISTOLOGY, JESUS CHRIST, and MESSIAH.

CHRISTIAN.—1. Usage.—In the NT, this name is found only thrice (Ac 11^{26} 26^{28}, 1 P 4^{16}). In the Apostolic Fathers, too, it seldom occurs. It is found only in the letters of Ignatius (Eph 11^{2}, Mag 4^{1}, Trall 6^{1}, Ro 3^{2}, Pol 7^{3}), the Martyrdom of Polycarp (3^{2} 10^{1} 12^{1f}) and the Didache (12^{4}). This usage contrasts strongly with the many other self-designations used by the early Christians such as 'disciples,' 'brethren,' 'saints,' 'righteous,' 'poor,' 'believers,' 'those being saved,' 'elect,' 'those of the Way,' etc.

2. Origin of the Name.—According to Luke (Ac 11^{26}), who in that context probably follows an Antiochian source, the name 'Christian' originated in Antioch, probably early in the forties. Until recently it was held that the designation was given to the followers of Jesus by the mob of that city, who only superficially understood the public teaching of Paul and Barnabas and thus thought that the Christ or Chrestos whom they proclaimed was the founder of the new religion. Other scholars surmised that the designation was a taunt-name (the 'oily ones'). But the early history of the name demands a different explanation.

It has been pointed out by several scholars (*e.g.* Parabeni, Bikermann, E. Peterson) that the ending *-anoi* of the Greek designation *christianoi* does not

agree with Hellenistic usage but rather points to Latin origin. In the Greek language of that time, the followers or supporters of a man would designate themselves by adding to his name the ending *-eioi* or *-esioi*. In connexion with a proper name, the Latin ending *-anus* indicates the followers of a party head, or the clients of an influential person. The most plausible explanation of the anomalous formation of the word *christianos* in the Greek-speaking world would be that Roman people of great influence had given it, and that swayed by their authority the Hellenistic population adopted the strangely coined word. Its non-Greek character furnishes the strongest argument against the view that the Greek-speaking populace of Antioch had invented it. Furthermore the verb *chrēmatizein* used by Luke in Ac 11[26] is a legal term, and the correct rendering would not be 'the disciples were called Christians' (RSV) but rather 'the disciples received the legal designation "Christians".' Similarly the temporal adverb *prōtōs* belongs to legal language and indicates a legal precedent. Thus the statement in Luke-Acts points to a contact which followers of Jesus had with the Roman authorities, probably on account of a litigation, in the course of which it was established that these people had an identity of their own and did not belong to the Jewish commonwealth, and that therefore while no longer subject to Jewish jurisdiction they had no share in the Jewish religious privileges, either. The lack of an extensive bureaucracy in the Roman Empire would explain the fact that the proconsul Gallio dismissed the charges which the Jews had brought against Paul on the ground that this was an intra-Jewish matter (Ac 18[14f]). The proper name which is used in the first half of the title is best explained as being adopted from the Christian self-designation 'those of Christ' (1 Co 1[12] 3[23], 2 Cor 10[7]; cf Mk 9[41], 1 Cor 11[3]). Thus the designation Christian would characterize these people as the household or the clientèle of Christ. It is doubtful, however, whether the term goes back to the persecution of the Jewish Christians by Herod Agrippa, who claimed jurisdiction over them, so that the name would have been formed in analogy to that of the Herodians. More likely the latter title, too, was given to the supporters of the Herodian family by Romans. The legal character of the designation is reflected in the way in which reference is made to 'the name'; so probably Ac 5[41], unless the reference is here, as in Ph 2[9] and 3 Jn 7, to the title 'Lord' pertaining to Jesus; and certainly in 2 Clem 13[1, 4], Ignatius, Eph 3[1] 7[1]; Hermas, Vis III. ii. 1; Sim. VIII. x. 3, IX. xiii. 2, xxviii. 3 and 5.

Anyone who confessed that this designation applied to him would automatically be subject to the rules and laws dealing with this group. Hence the frequent expression 'suffering for the name.'

3. The Spread of the Name.—Since 'Christian' was not originally a self-designation of the followers of Jesus, it is not surprising that it is so rarely found in the NT. The usage in 1 P 4[16] points clearly to the hostile environment by which the term was used. In Ac 26[28] King Agrippa employs the title in an ironical way in the presence of a Roman magistrate. The correct rendering of his statement is probably: 'You almost persuade me to play the Christian.' Outside of the Church, however, the designation must have been commonly accepted, for Tacitus reports that in A.D. 64 the mob in Rome understood clearly who was meant when the blame for the burning of Rome was put upon 'the Christians' (*Ann.* XV. 44). He witnesses also to an equally important fact, viz. that in the popular view the name 'Christian' was associated with all kinds of detestable crimes. This, too, is a common feature of political propaganda, and the author of 1 Peter obviously refers to it, when he admonishes his readers (4[15]) not to suffer for the things which for the populace were implied in the name 'Christian,' *e.g.* as 'a murderer, thief, wrongdoer [better 'malicious magician'], or mischief-maker [probably 'unfaithful treasurer,' or, according to W. Ramsay, 'people who stir up strife between servants and master']. While in Nero's time these alleged crimes had served as a pretext for occasional persecution, conditions changed radically in the days of Trajan (*c* A.D. 111–113), as is evidenced by Pliny the Younger's inquiry (Pliny, *Epist.* X. 27 f). For lack of administrative experience he requests the Emperor to send him instructions for dealing with the great many Christians living in his province. He wants to know, whether the 'name' by itself is punishable. The Emperor's reply is positive in principle, though he insists on strictly legal procedure. The 'name' itself, *i.e.* admitted or obvious membership in the Church, is considered a crime by the Roman authorities, apart from any other transgression of the laws.

The documents of the ancient Church show that the new designation was originally not popular with the people to whom it was given. Luke's own statement (Ac 11[26]) simply records the fact that the name originated in Antioch. Obviously he presupposes readers who have already come across the designation. But it is hardly by accident that he refrains from using the name in narrative as a self-designation of the believers. The situation has changed, however, when we come to Ignatius. In his letters (*c* A.D. 110–115) he accepts the charge brought against him by the authorities and proudly calls himself a Christian (Eph 11[2], Mag 4[1], Ro 3[2], Pol 7[3]), and so does Polycarp (Mart. Pol. 3[2] 10[1] 12[1f]). As so often in the history of the Church, a nickname or taunting epithet was transformed by the people concerned into a title of honour. The adjectival use of the name ('Christian food,' Trall 6[1]) points to a familiarity with this self-designation. Thus its adoption was not occasioned by the trial of Ignatius but must have preceded it. The fact that in the Didache, too, 'Christian' is employed as a self-designation (12[4]) without any special reference to persecution bears witness to the general adoption of the name, at least by the Christians in Syria, at the outset of the 2nd cent.; for Asia Minor the Christian usage is corroborated by the Mart. Pol., probably A.D. 156. The Apologists used the term, but perhaps only because they realized that they were known under this name to the people whom they addressed (cf Justin, Ap. i. 4: 'we are accused of being Christians'). It is absent from 1 and 2 Clem, Barnabas, Hermas, the Pseudo-Clementine Homilies and Tatian. By the end of the 2nd cent. it seems to have been accepted generally as a self-designation by the members of the Church.

4. The Meaning of the Name.—The Roman authorities, who first designated the disciples of Jesus as Christians, attempted thereby to characterize them as a political group or party, held together by their loyalty to the party head, *Christos*. While originally the title was given for juridical convenience without implying a derogatory sense, the pagan mob must at a very early time have associated it with heinous crimes and vices, as Tacitus' reports and the reference in 1 P 4[15] show. However, the way in which the crowd of heathen and Jews in the arena of Smyrna reacted to Polycarp's confession, would be an indication that by that time the designation had acquired a specifically religious character. For the mob shouts: 'This is the teacher of Asia, the father of the Christians, who has made it his business to destroy our gods, and who instructs multitudes not to offer sacrifices or to take part in the official worship' (Mart. Pol. 12[2]). In other words, the designation 'Christian' already implies the charge of 'atheism.'

The Christian interpretation of the title is expressed very clearly in Ignatius' letter to Polycarp, when he writes: 'A Christian has no power over himself, but rather owes all his time to God' (Ignatius, Pol 7[3]). The first half of the statement is obviously an allusion to the phrase 'belonging to Christ,' and the second half indicates the kind of action resulting from the lordship of Christ. In the Didache (12[4–5]) the somewhat obscure contrast between a genuine Christian and a *Christemporos* (probably a person who seeks to derive profit from his being a Christian) is best interpreted in the light of the fact that everyone who comes in the name of the Lord,

is to be granted hospitality (12[1]). The expression 'in the name' indicates allegiance, and thus the semi-political character of the self-designation is implied. As others consider an earthly ruler as their head, so the Christians consider Christ. It is therefore not surprising, when Polycarp, enjoined 'to swear by the genius of Caesar,' replied to the Roman proconsul that he was unable to do so because he was a Christian (Mart. Pol. 10[1]). Ignatius is also anxious to underscore the fact that the designation 'Christian' implies a special honour. Unlike other people who call themselves after another person, the Christians as clients of Christ or members of His household are by His name designated as people living in communion with a God (Mag 10[2]; cf Ro 3[3]).

It should be kept in mind, however, that this development took place on Hellenistic soil. Not too much emphasis should be placed, therefore, upon the etymology of *christos*. Though literally meaning the 'Anointed One,' *i.e.* the Messiah, the title soon lost its original denotation and became a personal name in the Greek-speaking church. Thus when used as a self-designation, the name 'Christian' does not imply that its bearers considered themselves as anointed ones. Rather by means of it those who called themselves Christians wanted to emphasize the fact that they were not only different from the rest of the Jews as well as the Gentiles, but also that their differentia was rooted in their personal allegiance to Christ, and that as His clients or partisans they claimed a privileged position in the political set-up of the Roman state. This element of defiance, about which Pliny complains and which is so conspicuous in Polycarp's martyrdom, must have dominated the adoption of the title as a self-designation. By calling themselves after the originator of their religion, the members of the ancient Church established it as a public corporation, which had received its charter from its master and which therefore cared little whether or not the worldly authorities recognized them.

While it is true that down to the 4th cent., *e.g.* in Codex Sinaiticus, the spelling *chrestianos* occurs, not too much weight should be put on this orthographic peculiarity. In Hellenistic Greek, *ē* and *i* were both pronounced *ee*, and wrong spelling is a very frequent phenomenon. Since *Chrestos* was a common name, meaning the 'gracious one,' whereas *Christos* as a proper name made sense to Christians only, it is not unlikely that the Roman authorities were of the opinion that behind the movement was a certain Chrestos. The Roman historian Suetonius (*Claudius*, ch. 25) reports, *e.g.*, that the Emperor Claudius (*c* A.D. 50) expelled the Jews from Rome 'who under the instigation of Chrestus were in a continuous uproar.' Many scholars believe that Suetonius—who had not much knowledge of the facts—is here referring to dissensions between orthodox and Christian Jews in Rome. But when Ignatius and Tertullian, playing upon this orthographic blunder, find in the name an allusion to the graciousness (*chrēstotēs*) of the Christians, just as Peter was thereby reminded of the graciousness of Jesus (1 P 2[3]; cf Ignatius, Mag 10[1]), the rhetorical device should not be mistaken for historical information. O. A. P.

CHRISTIANITY.—What we call Christianity, was in the ancient Church usually designated as the 'Way' (*e.g.* Ac 9[2] 19[2f] etc.), and qualified as the 'Way of the Lord' (Ac 18[25]), the 'Way of Truth' (2 P 2[2]), the 'Way of Salvation' (Ac 6[17]), and the 'Way of Righteousness' (2 P 2[21]). Ignatius, who probably was the first Christian to accept that name as a self-designation (see preceding article), was probably the author of the term *christianismos*, too (Mag 10[1, 3], Philad 6[1]; cf also Mart. Pol. 10[1]). The ending *-ismos* is used to place the Christian faith on a parallel with the philosophical schools of Hellenism and thus to proclaim it as having its own organizing principle. Incidentally that feature is used in order to state that Christianity is independent of Judaism. Ignatius emphasizes the fact that Christ is the Teacher, whom all Christians follow. Christianity is a way of life, however (Mag 10[1], Philad 6[1]), not an abstract philosophy; but, as Polycarp points out to the proconsul who tries him, it has a rational or reasonable foundation (Mart. Pol 10[1]). Christians live 'according to the *Christianismos*,' not, as the Stoics taught, 'according to nature.' The Christian system goes back to Jesus, who is the Teacher, and to live as a Christian makes one a member of God's people.

The term does not occur in any other of the Apostolic writers or in the Apologists, but became popular again in the 4th cent. A.D., then still denoting the practice of the Christian life or the profession of the right doctrine. Our term 'Christianity' goes back to Latin *Christianitas*, which is the latinized form of *Christianismos*. But unlike the latter expression, *Christianitas* denoted both the Christian way of life and the community practising this life. O. A. P.

CHRISTOLOGY.—Christology has been called the despairing attempt of theologians to interpret the Person of Christ. From the earliest times it has been the preoccupation of the Church. It has given rise to long and bitter controversies, and some of the divisions to which it has led have never been healed. It is not the purpose of the present article to examine and compare later christologies, but to make some study of the NT Scriptures in order to discover how Christians of the 1st cent. regarded their Lord. It has been the claim of all later theologies to be founded upon the most certain warranty of Holy Scripture, and although it can no longer be assumed that all the writers of the NT reflect precisely the same point of view, together they provide invaluable testimony to the faith of the earliest Christian Church.

1. The Synoptic Gospels.—The first three gospels are not the earliest Christian documents, for all the genuine epistles of St. Paul were almost certainly written before the Gospel of St. Mark, which in turn provided the foundation for St. Matthew and St. Luke. But the first three gospels together reveal what was believed in the 1st cent. about the life and ministry of Jesus, and it is therefore necessary to examine them in order to discover how the Person of Jesus was regarded during His lifetime on earth, what claims He made, and how those claims were received by the disciples, by the populace, and by the Jewish authorities.

But here we meet a challenge from some who do not allow that the gospels have any great historical value. Early in the 20th cent. scholars of the school of Adolf Harnack, which was then dominant in Germany and influential throughout the world, believed that the critical study of the gospels yielded a portrait of Jesus of Nazareth who, though not indeed the supernatural figure of later Christian devotion, yet stood forth as the Jesus of History, Captain of the souls of men. There has been a widespread reaction against this 'Liberal Protestant' view. On the one hand, it has been urged that the 'liberal' conception of the Person of Christ was inadequate to provide a basis for the Christian faith or to account for the rise of the Christian Church; on the other hand, the criticism of the gospels has entered into a more radical and sceptical phase, leading some scholars to the conclusion that practically nothing can be known about the life and teaching of Jesus. If a christology is possible to-day it must be founded upon the inspired witness of St. Paul and other NT writers, and it must be accepted by faith, for the Jesus of History is for ever hidden from our sight.

This is not the place to enter into a discussion of the method of Form-Criticism (see CRITICISM, BIBLICAL, 4) which has led scholars like Rudolf Bultmann to adopt this sceptical attitude towards the gospels as historical documents; it is enough to say that many critics, while admitting the value of the new methods, do not admit that so negative a conclusion is necessary. Even if it be allowed that most of the material of which the gospels were composed took shape in churches which had never heard or seen the original witnesses, yet it remains improbable that the corporate memory of the earliest

Church had ceased to exercise any control over the development of tradition by the middle of the 1st cent. Stories may have grown with the telling, legends and misinterpreted allegories may have found their way into the stream of tradition; but to suppose that the evangelists had no reliable information to use in the composition of the gospels is to make an assumption which does less than justice to the impression made by Jesus upon the minds of His followers, and which credits the early Christians with a faculty of invention that we have no reason to think they possessed. It may be granted that the purpose of the evangelists was theological, rather than historical in the modern sense; but it does not follow that they had no genuine historical material on which to work. The beliefs of Christians in the second half of the 1st cent. are ascertainable from other sources, and they are by no means identical with those reflected in the gospel narratives. There is little or no 'Paulinism' in the gospels, none of the distinctive theology of Hebrews, and the theology of the Fourth Gospel is hardly anticipated in the other three. The synoptic gospels may still be examined to discover what were the actual facts of the life of Jesus and what was the teaching He gave to His disciples and to the crowds.

Before proceeding to particulars we may learn something from the form of the gospel narratives. All give an account of the ministry of Jesus in Galilee and Judaea; but all allow a disproportionate amount of space to the narrative of the Passion at Jerusalem, leading up to the climax of the Resurrection. Only two of the four gospels have anything to tell of the birth of Jesus, and in both cases the nativity stories are loosely integrated with the rest of the gospel. This can only mean that in the regard of the Church and of the evangelists the death and resurrection of Jesus possessed a significance greater than his other actions and greater than his birth, concerning which little seems to have been known. It is to the final chapters that the gospels are obviously intended to lead, and the fact has christological significance. Jesus wrought many 'signs' as the Fourth Evangelist says, but His death and resurrection lay at the centre of the Church's message to the world. His death was no ordinary death because Jesus was no ordinary man. How then is His Person presented by the synoptic writers.

(*a*) The Messiahship of Jesus.—In the first place they assume His humanity. As depicted in the first three gospels the life of Jesus was a real human life, and His death a real human death. He could hunger and thirst. He could feel joy, sorrow, love, pity, and even anger. He prayed to God like any other man, specially in the crises of His life. He was tempted. He shrank from the prospect of death. He asked questions, not rhetorically, but to elicit information. He confessed ignorance, and He shared the popular beliefs of his age. This is not the picture of the docetic Christ imagined by the heretics the 2nd cent., nor indeed is it the picture on which some later Christian devotion has dwelt. It is the picture of a man.

But of no ordinary man. Jesus was the Christ. Central to St. Mark's gospel is the confession of Peter, 'You are the Christ' (8^{29}). Others might speculate as to His identity, moved as they were by His mighty works and prophetic power; but for Peter He was more than John the Baptist or one of the prophets; He was the Messiah, and Matthew adds 'the Son of the living God' (16^{16}). Mark does not add, as Matthew does, the commendation of Peter, 'Blessed are you, Simon Bar-Jona! For flesh and blood has not revealed this to you, but my Father who is in heaven'; but Mark implies that Jesus accepted the title, for he writes, 'And he charged them to tell no one about him.'

Here then we encounter the second element in the Church's christology as reflected in the synoptic gospels. Jesus was the Messiah, and from the rapidity with which the title passed into general use, so that by the time of the Pauline epistles 'Christ' had become virtually a proper name, it may be inferred that the Messiahship of Jesus was never questioned in the early Church.

But at this point difficult questions arise. What conceptions of the Messiah existed among the Jews in the 1st cent.? How did the early Christians interpret the title? Did Jesus quite certainly claim to be the Christ? and if so, in what sense?

It is only possible here to glance at the history of the Jewish hope in the coming of 'the Anointed One.' Amid the disasters that preceded the exile, the prophets of Israel, while admitting the inevitability of the overthrow of the national life, never lost hope of its eventual restoration. The dynasty of David, to which Judah had been faithful so long, would in God's own time be restored (Is 11^{1}, Jer 33^{15} etc.). This expectation of the restoration of the kingdom with its anointed king supported the Jews through many dark days; and although the post-exilic prophets conceived of the coming kingdom more as a theocracy, and laid little stress on the hope of a Messiah, the hope of a personal deliverer never died. In the later apocalyptic literature the Messiah is conceived as a supernatural figure, the agent of God in a wholly miraculous restoration of Israel. The assumption is sometimes made that all Jews in the 1st cent. accepted the apocalyptic picture of a Messiah coming with clouds of glory, smiting the nations with a rod of iron, and establishing in Jerusalem the eternal kingdom of the saints. But there is no evidence for this. Conceptions seem to have differed, and while some may have luxuriated in such fanciful pictures as are found in Enoch and the Apocalypse of Baruch, there were others who, while treasuring the age-long hope of Israel, held a quieter, saner faith. It is only necessary to remember the Psalms of Solomon (*c* 40 B.C.) and the outburst of the aged Simeon recorded in Lk 2^{29-32}. It may be dangerous to quote the *Nunc Dimittis* as the *ipsissima verba* of Simeon, but the whole chapter is intensely Jewish in tone and undoubtedly reflects a type of contemporary Jewish piety.

The more primitive conception of the Messiah has left its mark in certain passages of the gospels. Matthew's story of the alarm of Herod the Great at the arrival of the Wise Men presupposes a conception of the Messiah as a Jewish monarch destined to supplant the dynasty of the Herods. In Luke the first part of the Angel's message to Mary at the Annunciation rests upon similar hopes: 'You will conceive in your womb and bear a son, and you shall call his name Jesus. He will be great and will be called the Son of the Most High; and the Lord God will give to him the throne of his father David, and he will reign over the house of Jacob for ever; and of his kingdom there will be no end.' The rest of the Angel's message may embody other ideas, but vv.$^{30-33}$ of Lk 1 give expression to the old messianic hope of the restoration of the Davidic line which dates back to the 8th cent. B.C. There is no trace of apocalyptism here, nor even of later Christian ideas of the Christ. That this political conception of the Messiah persisted even among the followers of Jesus is evident from Lk 24^{21ff}: 'We had hoped that he was the one to redeem Israel.'

(*b*) The Witness of John.—The witness of John the Baptist to current messianic hopes is difficult to interpret because the gospels do not give a clear and consistent picture of the nature of his mission. The Christian Church regarded him mainly as the herald of Christ, and in the Fourth Gospel little stress is laid on any other aspect of his ministry: 'He . . . came to bear witness to the light' (Jn 1^{7}). But other evidence makes it clear that he was more than a conscious forerunner. Mark has 'John the Baptist appeared in the wilderness preaching a baptism of repentance for the forgiveness [remission, AV] of sins' (1^{4}), and Luke records his advice to various classes among his hearers. Thus John appears primarily as a moral reformer, and this agrees with the testimony of Josephus. But all the evangelists mention an eschatological element in his preaching. According to Mt 3^{2}, he cried 'Repent, for the kingdom of heaven is at hand,' and Luke records

the words, 'Even now the axe is laid to the root of the trees; every tree therefore that does not bear fruit is cut down and thrown into the fire' (Lk 3[9]). Such words imply the imminence of the messianic judgment, and it is in that connexion that the coming of 'one mightier than I' must be interpreted. The 'mightier one' can hardly be other than the Messiah, shortly to appear in judgment. John says no more of him except 'I have baptized you with water, but he will baptize you with Holy Spirit' (Mk 1[8]); but both Matthew and Luke add 'and with fire,' and it may be that the mention of 'fire' is more original than the reference to Spirit. Holy Spirit expresses the difference between John's baptism and that of the Christian Church, a subject of controversy in the early days; but John's concern was with the fire of judgment.

It seems probable therefore that John's message concerned the coming of the Messiah in judgment to inaugurate the Kingdom, but whether he identified Jesus as the Christ is much more doubtful. Two events recorded in the gospels are relevant, the baptism of Jesus by John, and the message sent by John to Jesus recorded in Mt 11[2ff] and Lk 7[18ff]. All the synoptists describe the baptism of Jesus, although it seems to have caused the church some embarrassment. Why should the mightier one, the Messiah, seek baptism from his humbler predecessor? Matthew introduces a protest on the part of John (Mt 3[14]), Luke hurries past the incident with an aorist participle (Lk 3[21]), and John omits it altogether. But it held its place in the synoptic tradition because it was the occasion of the descent of the Spirit upon Jesus (Mk 1[10f]). No event is more certainly historical, for the early Church, engaged as it seems to have been in controversy with the followers of John, would never have invented it. If Mark's were the only account it might be inferred that immediately after His baptism Jesus became conscious of the descent of the Spirit upon Himself, and of a divine assurance that He was God's beloved Son. It is possible, however, to take 'John' as the subject of the verb 'saw' in Mk 1[10], and to understand that the voice from heaven was audible to the bystanders. This is the interpretation of Matthew (3[16f]), who changes the words 'Thou art my beloved Son' into 'This is my beloved Son'—a declaration to all present. Luke merely states that 'the Holy Spirit descended upon him,' but by adding 'in bodily form, as a dove' he implies that this was more than a subjective experience on the part of Jesus. This is a good example of the way in which a story may be unconsciously modified, but if the Marcan account be accepted, there was nothing in the incident to impress the Baptist or convince him that Jesus was 'the mightier one.'

The action of the Baptist in sending messengers at a later time to enquire 'Are you he who is to come, or shall we look for another?' (Mt 11[3], Lk 7[19]) has generally been understood to betoken a failure of faith; but if the evidence is inconclusive that John had previously recognized Jesus as 'the mightier one' his inquiry may with more reason be taken to signify a growing understanding. Jesus betrays no resentment, but commends John in the highest terms.

It may therefore be necessary to discount the belief of the evangelists that John had recognized Jesus as the Christ, and to reserve that discovery for Peter.

(*c*) The Confession of Peter.—Whatever different ideas the Jews may have had concerning the coming Messiah, they certainly did not conceive of him as a wandering prophet, and therefore Peter's declaration (Mk 8[29]) was in every way remarkable. His conception of messiahship may still have needed correction, but that he should have thought of Jesus as in any sense the Anointed One of prophecy reveals a depth of insight that can only be explained as the result of months of close intercourse with Jesus. The evidence of the synoptists does not suggest that the common people had any such idea, and perhaps Mark introduced his theory of 'the messianic secret' to explain what seemed to him a perplexing fact. Jesus was not recognized because He did not wish to be. He silenced the demons who knew Him (1[25] 3[12]); He charged those who had profited by His messianic power to 'tell no man' (1[44] 5[43]); He enjoined silence on the witnesses of the Transfiguration (9[9]); and He spoke in parables to avoid the premature disclosure of the secret of the Kingdom (4[11f]). Whatever else may be said about this theory, it acknowledges the fact that Jesus did not publicly assume the role of Messiah in the days of the ministry. Unexpected confirmation of this conclusion is found in Matthew's account of the triumphal entry into Jerusalem. The evangelist evidently regarded this as a fulfilment of messianic prophecy and remembered Zec 9[9]. But it is not certain that the multitudes so regarded the scene, and Matthew adds to his account 'and when he entered Jerusalem, all the city was stirred, saying, "Who is this?" And the crowds said, "This is the prophet Jesus from Nazareth of Galilee"' (Mt 21[10]). Nor do the glad Hosannas as reported in Mk 11[9f] imply that Jesus was regarded as the Messiah: 'Hosanna! Blessed be he who comes in the name of the Lord! Blessed be the kingdom of our father David that is coming! Hosanna in the highest!' A messianic movement was afoot, but that does not necessarily imply that Jesus was the Messiah.

Yet there were rumours of such a claim. Mark's account of the trial of Jesus before the High Priest makes it clear that the authorities suspected that Jesus regarded Himself as the Messiah. The High Priest's question is direct, and so is Jesus' answer: 'Are you the Christ, the Son of the Blessed?' And Jesus said, 'I am,' a declaration which the High Priest, according to Mark, considered blasphemous (14[61ff]). Although it may be doubted whether any follower of Jesus was present in court to report the exact words used, we have no reason to question the firm tradition that as a result of the High Priest's examination the Jewish authorities were convinced that Jesus claimed to be the Messiah and were thus able to present a case to Pilate. To Pilate's first question 'Are you the King of the Jews?' Jesus answered evasively, but He did not deny it (Mk 15[2]).

We conclude that from an early date in the ministry Jesus accepted the role of Messiah, but He made little use of the title and discouraged its employment, probably because of its nationalistic associations. The conviction that He was the Christ grew among His disciples, and in the end the claim reached the ears of the Sanhedrin, thence to be imparted to Pilate and broadcast to the multitude.

(*d*) 'The Son of Man.'—The gospels bear abundant testimony to the frequent use by Jesus of the term 'Son of Man.' In Mark alone it occurs some fourteen times, and it is most remarkable that whereas Jesus is called 'Christ' in the rest of the NT and never 'Son of Man' (Ac 7[56] is the only exception, apart from Rev 1[13] and 14[14] where the reference is to Dn 7[13]), in the gospels the position is reversed. The conclusion follows that 'Son of Man' was a term used by Jesus, but that after the resurrection the early believers, perhaps at a loss to understand it, substituted 'Christ,' which was more easily understood—or misunderstood. Why did Jesus choose this title? In the OT the phrase 'Son of Man' occurs in the Psalms, where it means 'man,' as it should in Semitic usage, and it is frequent in Ezekiel, where it signifies the prophet. Both these uses may have influenced Jesus. But many critics suppose that its use in the gospels goes back to Dn 7[13], 'Behold, with the clouds of heaven there came one like a son of man.' There the phrase stands for a personification of the saints of the Most High (*i.e.* the Jews) who are to receive 'dominion and glory and a kingdom' after the destruction of the world powers signified by the various 'beasts' (7[18]). But in the *Similitudes of Enoch* (Enoch 37–71) and in other apocalyptic literature (*e.g.* 4 Ezr 13) 'the Son of Man' has become a superhuman being, the Elect One, destined to appear in judgment as the messianic

ruler of the Kingdom of God. The evidence is not altogether satisfactory (cf C. H. Dodd, *Interpretation of the Fourth Gospel*, pp. 241 f), but many critics, particularly since the publication of Schweitzer's *Quest of the Historical Jesus*, have supposed that Jesus was much influenced by such apocalyptic ideas, and that by using the title 'Son of Man' He wished to imply that He was indeed the Messiah, not yet revealed, but destined before long to appear with clouds of heaven. That such beliefs were treasured by the early Church is undeniable, for they find expression in the Epistles to the Thessalonians, the Revelation of St. John, and elsewhere; but that they represent the mind of Jesus is much less certain. They seem to be implied in some sayings recorded in the synoptic gospels, but other passages reveal quite different ideas, and it is at least possible that the apocalyptism of the early Church, though actually derived from other sources, was read back into the teaching of Jesus.

The literature on this subject is extensive, and within the limits of this article no adequate discussion can be attempted; but certain considerations may be advanced to serve as a warning against any hasty conclusion. In the first place, it may be argued that the recorded teaching of Jesus is predominantly religious and ethical, and although it has a strong eschatological element, eschatology is not the same thing as apocalyptic. Futurist expectations which might be called 'apocalyptic' are mostly concentrated in a few chapters of the synoptic gospels, notably in Mark 13 and the parallels in Matthew and Luke. Moreover, the contention that all the ethical teaching in the gospels may be described as *Interimsethik*, intended to serve only during a brief period before the final consummation, is a theory that does little justice to its roots in the OT or to its relevance to human life in all ages. Experience shows that apocalyptic convictions, once admitted, generally become an obsession; but when the teaching of Jesus is regarded as a whole, those parts which might naturally be related to such expectations are few and far between. The works of C. H. Dodd and J. Jeremias on the parables of Jesus do not support the theory that most of them have an apocalyptic undertone; and Mark 13, 'the Little Apocalypse,' has long been recognized as an artificial composition, perhaps incorporated by the evangelist from an earlier source. Even so, the first eight verses of this chapter have reference to political upheavals culminating in the destruction of Jerusalem, vv.$^{9-13}$ refer to persecution, vv.$^{14-23}$ again refer to political tribulation, and only in vv.$^{24-27}$ is a genuinely apocalyptic element introduced. Vv.^{26f}, 'Then they will see the Son of Man coming in clouds with great power and glory; and then he will send out the angels, and gather his elect from the four winds, from the ends of the earth to the ends of heaven,' have been described as 'a pastiche of Old Testament allusions' (J. A. T. Robinson). It is significant that the last sentence is a quotation from the LXX, not the Hebrew, of Zec 2^{6}, which suggests that it was a discovery of the early Church. It is highly doubtful whether the saying is authentic. 'The whole impression of these verses is of a secondary composition on which it is impossible to rely for any fresh light on how Jesus himself thought' (J. A. T. Robinson, *Jesus and His Coming*, p. 57).

That the early Church was capable of reading into the tradition of the sayings of Jesus its own apocalyptic ideas is made clear by a comparison of Mark with the later synoptists. For example, in Mk 13^{3}, after the prophecy of the destruction of the Temple, Peter, James, John, and Andrew asked him privately, 'Tell us, when will this be, and what will be the sign when these things are all to be accomplished?' But Mt 24^{3} reads, 'Tell us, when will this be, and what will be the sign of your coming and of the close of the age?'—a clear indication that it was the later evangelist, not Jesus, who connected the fall of Jerusalem with the Parousia. Again, the Marcan saying (Mk 9^{1}) reads in Lk 9^{27}, 'I tell you truly, there are some standing here who will not taste of death before they see the kingdom of God,' whereas in Mt 16^{28} it reads, 'Truly, I say to you, there are some standing here who will not taste death before they see the Son of Man coming in his kingdom.' If such changes could be made by one evangelist in order to introduce unmistakable references to a future Parousia, it is very probable that the process of editing the sayings of Jesus in accordance with current ideas had begun long before the gospels were written.

In the second place, a careful examination of all the passages in which Jesus uses the phrase 'Son of Man' establishes the fact that in most cases He did not mean by it the Messiah, present or to come, and when He did use it in that sense (as in Mk 8^{31}) He was deliberately substituting for 'the Christ' a term free from political implications. But if He did wish to avoid nationalism, it does not seem likely that He would encourage apocalyptism, which was nationalism writ large.

An exhaustive examination of passages in which the phrase occurs has been made by various scholars (Vincent Taylor, T. W. Manson, C. J. Cadoux, G. S. Duncan, J. A. T. Robinson, and many more), from which it appears that one interpretation of the title 'Son of Man' is not appropriate in every case. Sometimes there may have been a mistranslation of the Aramaic, and the true sense is 'man' (*e.g.* 'Man is lord even of the sabbath'). In other and more numerous passages the meaning seems to be simply 'I.' In others again there are undertones, 'I, the Christ,' or 'I, the Son of God.' Only a minority of recorded sayings appear to reflect apocalyptic expectations, and the authenticity of some of these may fairly be doubted. The variety of use is in any case perplexing, and it suggests either that Jesus deliberately chose a term the vagueness of which left room for speculation, or that at some stage in the transmission of His teaching the use of phraseology was very loose, and the title was introduced into sayings to which it did not properly belong.

Unanimity among scholars is not to be expected, for the precise meaning of the phrase 'Son of Man' is admittedly difficult to determine; but the most probable view is that Jesus chose the title as an alternative to 'Christ' partly to avoid exciting false hopes of a nationalist character, and partly because, though it had some messianic associations, it allowed the introduction of ideas foreign to current conceptions of the Messiah. In His words 'the Son of Man' means 'the Christ,' but a suffering Christ, such as Jewish messianism could not conceive.

Some scholars think that the true origin of the term 'Son of Man' as used by Jesus is to be found in Ezekiel rather than in Daniel, concluding that Jesus thought of Himself primarily as a prophet, the vehicle of the Spirit of God. If that were so, apocalyptism would be remote from His teaching and the presence of apocalyptic sayings in the gospels could only be explained as the product of the enthusiastic faith of the early Church which, misled by the use of the term 'Son of Man' in some late Jewish literature, introduced into the traditions of the teaching of Jesus an element foreign to his authentic utterances. The objection that the large place of apocalyptism in the theology of the early Church is inexplicable unless it had some basis in the teaching of Jesus Himself is serious but not conclusive. It must be remembered that the Fourth Gospel, now increasingly regarded as resting upon a tradition independent of the synoptists, has hardly a trace of apocalyptism. There was more than one interpretation of the teaching and Person of Jesus current in the 1st cent. It is not difficult to imagine why such ideas as find expression most strongly in St. Matthew's Gospel, in the Epistles to the Thessalonians, and in the Revelation of St. John, spread rapidly among primitive believers; but it does not follow that they dominated the minds of all Christians, or that they represented the mind of Jesus Himself.

(*e*) 'THE SON OF GOD.'—The title 'Son of God' has influenced later Christian thought more deeply than 'Son of Man,' or even 'Christ.' It is not of frequent occurrence in the synoptic gospels, but in Mark it appears in the cries

of demoniacs (3[11] 5[7]), in the question of the High Priest (14[61]), and in the centurion's confession—but without the definite article (15[39]). In 1[11] the Divine voice speaks to 'My Son, the beloved' (RSVm), and the same words in the third person occur in the account of the Transfiguration (9[7]). In Q passages 'Son of God' (with no article) is used in the story of the Temptation, and in Mt 11[27] and Lk 10[22] 'the Son' is contrasted with 'the Father.' In matter peculiar to Matthew or Luke 'Son of God' occurs in Mt 14[33], 16[16], 27[40, 43] 28[19] and Lk1[35], from which it may be inferred that the title is rooted in very early tradition. Whether Jesus used it of Himself is doubtful, depending in no small measure on the authenticity of the saying recorded in Mt 11[27]=Lu 10[22], 'All things have been delivered to me by my Father; and no one knows the Son except the Father, and no one knows the Father except the Son and any one to whom the Son chooses to reveal him.' If this 'bolt from the Johannine blue' be accepted as an utterance of Jesus, similar sayings from the Fourth Gospel cannot be ruled out. But there is no agreement among scholars. On the one hand it is urged that the words, if derived from Q, come to us with the authority of what is probably our earliest source; while on the other hand it is objected that a saying so unlike other synoptic utterances cannot be ascribed to Jesus with any probability. However that may be, the presence of the saying in Q is at least evidence of a 'Sonship' christology at a very early date, and the fact must not be overlooked that the passage does not stand quite alone. Mk 13[32], 'Of that day or that hour no one knows, not even the angels in heaven, nor the Son, but only the Father' is not easily explained as a Christian invention; and the Marcan parable of the Vineyard (12[1–11]) rests on a description of the last messenger as 'still one other, a beloved son.' The purpose of this parable was not to teach christology, but to lay stress on the responsibility of Israel and its leaders; nevertheless, the unique status of the final messenger is implicit in the story.

If it be allowed as probable that Jesus did refer to Himself as 'Son of God,' Semitic idiom must be borne in mind. In the OT 'son of God' is used in several senses. In Gn 6[2] we read of 'the sons of God' who took wives of the daughters of men, and presumably it is mythical angelic beings which are referred to. In Job 38[7] 'all the sons of God' are said to have shouted for joy at the creation, and here some court of heaven is conceived (cf Job 1[6]). In various passages Israel is referred to as 'God's son,' and in others the righteous are thus described (Ex 4[22], Hos 11[1], Sir 4[10] etc.). In Semitic usage 'sonship' is a conception somewhat loosely employed to denote moral rather than physical or metaphysical relationship. Thus 'sons of Belial (Jg 19[22] etc.) are wicked men, not descendants of Belial; and in the NT the 'children of the bridechamber' are wedding guests. So a 'son of God' is a man, or even a people, who reflect the character of God. There is little evidence that the title was used in Jewish circles of the Messiah, and a sonship which implied more than a moral relationship would be contrary to Jewish monotheism.

In the Hellenistic world the idea of Divine sonship was much more familiar and more literally interpreted, for the line between the human and the Divine was less clearly drawn. Kings and emperors liked to think of themselves as descended from the gods, and temples were erected to their honour. It is not surprising, therefore, that some critics, while denying that Jesus ever called Himself the Son of God, suppose that the title was borrowed by the Church from pagan usage. This is an easy explanation, but further consideration makes it improbable. It is partly a question of date. The NT as a whole provides evidence that Sonship titles were in use at a very early period (*e.g.* 1 Th 1[10]), and it is highly improbable that the Church in the first twenty years of its history, when it was still largely Jewish, would have borrowed either its ideas or its terminology from the heathen world.

For the same reason the attempt of Bultmann to find the origin of the idea of Sonship in Gnosticism must be no less decisively rejected. It is incredible that the primitive Christians at Jerusalem knew anything about Gnostic 'redeemers' who descended from the spiritual world of light to release the prisoners of matter; and it is no less incredible that if they had heard of such fancies they would have applied them to Jesus. It is far more probable that the term 'Son of God' was of Hebraic origin, that it was used of Jesus by the first generation of believers, and that it must be interpreted in relation to Hebraic thought. If Jesus did refer to Himself as 'Son of God' the term implies His consciousness of standing in a relationship to God unique in its intimacy. More than that we cannot say.

(*f*) 'LORD.'—In recent years much discussion has centred round the title 'Lord' as applied to Jesus. It does not occur frequently in the synoptic gospels, and in most cases it is no more than a polite form of address, probably translating 'Rabbi'; but in the rest of the NT 'Lord' has become the regular title of Jesus, either in the phrase 'the Lord Jesus Christ,' or simply 'the Lord.' The inference is that 'Lord' is a post-resurrection title, hardly used, if at all, in the days of the ministry. It is a testimony to the historical reliability of the synoptists that, despite the undoubted usage of the early Church, 'the Lord' is not found in any Q passage and there is only one doubtful example in Mark and Matthew (Mk 1[3], Mt 21[3]). But Mk 12[36f] records that Jesus, with reference to the Messiah, quoted Ps 110[1] 'The Lord said unto my Lord, Sit at my right hand,' adding, 'David himself calls him Lord; so how is he his son?', a saying which seems to mean that the Christ is Lord and therefore more than a scion of the house of David.

Unlike Matthew and Mark, Luke introduces the title of Lord with some frequency, using it fifteen times in the body of the gospel and twice in the nativity stories. In most cases it is clearly editorial (*e.g.* 'the Lord said'), and only once does it appear in a saying—'the Lord has risen indeed' (24[34]). There can be no doubt that Luke is using the terminology of the early Church, and Vincent Taylor is right in his conclusion 'It is highly improbable that this title was in use in the lifetime of Jesus. It is as the risen and ascended "Lord" that he is *ho kyrios*' (*The Names of Jesus*, p. 43).

This conclusion is supported by a study of the Acts and Epistles, where the title occurs with great frequency, indicating that it was from a very early time the most common way of referring to Jesus in both Jewish and Gentile communities. It was not the invention of St. Paul, who in such passages as Ro 10[9] and 1 Cor 12[3] implies that the confession 'Jesus is Lord' was a kind of primitive creed, the watchword of the Christians. St. Paul refers to the Eucharist as 'the Lord's Supper,' and the phrase *Marana tha* (Our Lord come!) in 1 Co 16[22] (cf *Didache* 10) proves that the title was in use in the original Aramaic-speaking communities.

Since Bousset published his well-known work *Kyrios Christos* the suggestion has often been made that the title 'Lord' was borrowed from the world of Hellenistic religion, where it was freely employed. This contention must be dismissed as offending against every canon of probability. The first Christians were Jews, and as we have seen with reference to the title 'Son of God,' it is quite incredible that they turned to heathenism, which they despised and detested, to find expression for their reverence for the risen Christ. As Bishop Rawlinson has said, 'The phrase *Marana tha* is the Achilles Heel of the theory of Bousset' (*N.T. Doctrine of Christ*, p. 235). One or two generations later Hellenistic ideas and expressions may have influenced the development of Christian terminology, but the recognition of Jesus as 'Lord' occurred long before Christian theology was subjected to pagan influences, when the Church hardly extended beyond the boundaries of Judaea.

How then is it to be explained? The main factor was the tremendous impact of the belief in the resurrection.

During the ministry the disciples, conscious of a numinous element in His Person, groped their way towards faith in Jesus as the Messiah; but their faith was insecure, and ideas as to the meaning of messiahship were ill-defined (Lk 24^{21}). After the resurrection their whole attitude was changed. The Jesus whom they had known was unmistakably revealed as a supernatural Being; in the words of St. Paul, he was 'declared to be Son of God in power' (Ro 1^{4}), worthy not only of love and reverence, but of worship too. In prayer, in fellowship, in eucharist, and in daily life, believers knew that the exalted Jesus was with them, and how else could they think of Him but as 'Lord'? In the LXX the word is constantly used to render the name of God, and that fact cannot have been without influence among Greek-speaking Christians; but the Lordship of Jesus was recognized earlier than the spread of Christianity to Greek world.

Connected with the impact of the resurrection faith, and springing from it, was the rapidly developing Christian cultus. That Jesus should have been offered worship by Jewish Christians is indeed surprising, for the attribution of Divine honours to a man was contrary to Jewish monotheism. But the fact remains; as Rawlinson has said, 'The cult of the Lord Jesus was inherent in Christianity from the beginning.' Such worship is a measure of the impression made by His Person, life, death, and resurrection upon the earliest Church. Yet this stage had not been reached in the days of the ministry, and the synoptic gospels are true to history in their reticence in presenting Jesus as an object of worship before the resurrection. In the words of C. V. Jones (*Christology and Myth in the New Testament*, p. 90) 'Of the later belief that Jesus was God Himself in the flesh there is no trace in the synoptic gospels'; but that very shortly after the resurrection He was regarded as a divine being, and the proper object of worship, is apparent from the rest of the NT, and this faith is summarized in the title 'Lord.'

(*g*) SUMMARY.—To sum up the evidence of the synoptic gospels: they make it clear that in the Church of the 1st cent. Jesus was believed to be the promised Messiah, and the evidence is strong that this belief was current among His followers during the ministry; the claim was suspected by the Jewish authorities and reported to the Roman Governor; Jesus Himself did not refuse the title, but He gave it a meaning that only partly corresponded with Jewish expectations, and during the ministry He did not proclaim His messiahship; He preferred the title 'Son of Man,' enriching it with a content not altogether understood by the disciples, but certainly including ideas derived from the picture of the Suffering Servant in Is 53. As to how far Jesus drew on the expectations of contemporary apocalyptism the opinions of scholars differ, but there can be no doubt that the early Church treasured such hopes. For the early believers, after the resurrection, Jesus was 'the Lord,' and they found in the symbolism of the apocalypses a way of expressing their faith in the certain triumph of their crucified and risen Master. The Kingdom preached and inaugurated in Galilee would be consummated at the Parousia of the Son of God.

2. Acts.—The date of Acts is still a matter of controversy, but if, as can hardly be denied, it is by the same author as the Third Gospel and a sequel to the earlier work, it must belong to the last quarter of the 1st cent. It therefore reflects the theology of the same period as saw the appearance of Matthew and Luke; but the author clearly made use of much earlier sources, and, as compared with the Epistles of St. Paul and the Johannine writings, the book is remarkably primitive in its theology. B. H. Streeter wrote of its 'pre-Pauline Gentile Christianity' (*The Four Gospels*, p. 556).

The Christology of Acts, which Harnack described as 'absolutely primitive,' is largely expressed in the speeches of St. Peter in the earlier chapters, and in the missionary addresses of St. Paul. Here the foundation is an unquestioning belief in the humanity of Jesus. In 2^{22} Peter speaks of 'Jesus of Nazareth, a man attested to you by God with mighty works and wonders and signs which God did through him in your midst'; and in 10^{38} Peter describes Jesus as one who 'went about doing good, and healing all that were oppressed by the devil, for God was with him.' Such language seems to date from a time when it was still considered proper to think of Jesus as 'the prophet of Nazareth' whatever other designations were in use, and in two passages (3^{22} 7^{37}) He is identified with 'the prophet' of Dt 18^{18}. Yet that this was not the only way in which the earliest Church thought of Jesus is manifest from other passages in Peter's sermons: thus 2^{24}, 'But God raised him up, having loosed the pangs of death, because it was not possible for him to be held by it'; and 2^{33} 'Being therefore exalted at the right hand of God, and having received from the Father the promise of the Holy Spirit, he has poured out this which you see and hear.' This is not language that could be used of a mere prophet.

The Messiahship of Jesus receives more emphasis in Acts than in the gospels, but it is not taken for granted as it is in St. Paul's Epistles. It is reckoned that the title 'the Christ,' in the strict sense of 'the Messiah,' occurs at least twelve times in Acts, although it has no political implications. As we have seen, the evidence of the gospels points to a certain reserve on the part of Jesus in claiming to be the Messiah, and He preferred the title 'Son of Man'; but after the Resurrection the Church had no doubt as to the messiahship, and, abandoning the designation 'Son of Man,' referred to Jesus constantly as 'the Christ,' so constantly, indeed, that the title soon became a proper name. It is a remarkable testimony to the primitive character of many passages in Acts that this latter stage has not been reached, and the emphasis still falls on the fulfilment of messianic prophecy in the Person of Jesus. 'Every day the Apostles in the temple and at home did not cease teaching and preaching Jesus as the Christ' (5^{42}); 'Saul increased all the more in strength, and confounded the Jews who lived in Damascus by proving that Jesus was the Christ' (9^{22}); and there are other passages.

That Jesus was 'the Servant of the Lord' of prophecy is a conviction which appears in Acts, if not for the first time, at least with new emphasis. The word used in $3^{13, 26}$ $4^{27, 30}$ is not *doulos* (slave) but *pais* (servant, or son) which is the word used in the LXX of Second Isaiah. Several passages affirm that 'it was necessary for the Christ to suffer' (*e.g.* 17^{3}), so that even apart from the incident of Philip and the eunuch (8^{26-40}), in which Is 53 is quoted at length, Acts leaves no doubt that the Servant prophecies were already in the mind of the Church. It is surprising that this element in the early christology seems to have largely dropped out at the stage represented by the later books of the NT.

Taking Acts as a whole we find that the title 'Lord' is applied to Jesus more frequently than any other, and here the contrast with the synoptic gospels is most marked. The Jesus of the synoptic gospels, the man who went about doing good, is not forgotten, but He is recognized unmistakably as a heavenly Being, the object of worship, the Lord. We see the impact of the resurrection faith, for the resurrection had shown Him to be 'both Lord and Christ' (2^{36}). So Stephen could pray, 'Lord Jesus, receive my spirit' (7^{59}), and Saul could meet Him on the road to Damascus. He is 'the Author of life' (3^{15}), and 'there is no other name under heaven, given among men, by which we must be saved' (4^{12}). Such language does not suggest an adoptianist christology, although the title 'Son of God' is not found in Acts. The vocabulary of the Church took time to develop, but the convictions it came to express were primitive.

3. St. Paul.—The Pauline Epistles are the earliest Christian writings that have survived. Thirteen epistles of St. Paul appear in the Canon of the NT, apart from the Epistle to the Hebrews, and although many modern scholars have serious doubts as to the authenticity of some of these, notably 2 Thessalonians, Ephesians, and

the Pastoral Epistles, the genuineness of the rest is seldom questioned.

(*a*) St. Paul and the Primitive Church.—Although it cannot be supposed that St. Paul's theology, taken as a whole, was typical of the doctrine of the Christian Church in the first thirty years of its life, it reveals much of the common stock of the early Church. He himself, while claiming at times direct inspiration, could yet refer to 'that which I also received' (1 Co 15[3]). Thus, for instance, he accepted the belief of all Christians at the time of his conversion that Jesus was the Messiah and was bringing in the messianic kingdom. But the Apostle's chief interest was in soteriology, and he had no concern with Jewish nationalistic aims. Yet he accepted the apocalyptic hopes which soon gained currency in the early Church, evidently regarding them as part of the faith he now professed. In some of his epistles apocalyptism is more prominent than in the gospels, and it is a legitimate matter for speculation how this type of thought had so quickly come to the front. Perhaps it is not difficult to reconstruct the current of thought. Jesus was the Christ, vindicated by the resurrection; but from a Jewish point of view a suffering Messiah was almost a contradiction in terms; however conceived, the Messiah was a glorious and triumphant figure, and, since Jesus had submitted to a shameful death, the glory must be manifested in the future. So the Church accepted a transmuted Jewish apocalyptism. Angels, the clouds of heaven, the judgment seat, the sound of the trumpet—these things were indeed appropriate to the manifestation of the Anointed One; but since His earthly life had been marked by humility and suffering, the true revelation of His glory must be still to come. Thus the apocalyptism of later Judaism became attached to Christianity, and the harassed believers found consolation in their trials by living in daily expectation of a miraculous deliverance.

St. Paul's general outlook is characterized by what has been aptly called 'sanctified common sense,' and it is perhaps surprising that he accepted so readily the fantastic imaginings of apocalyptism. Yet that he did so is obvious from almost all his epistles. He never became obsessed by such hopes, as do weaker minds, but the confident expectation of the *Parousia* is an undertone in all he writes. In 1 Thessalonians 'the Day of the Lord' is expected at any moment, 'like a thief in the night'; and although in his later epistles St. Paul realizes that his own death is probable before the end, he can still tell the Philippians that 'the Lord is at hand,' and he takes comfort in the hope that his converts may be 'pure and blameless for the day of Christ' (Ph 1[10]).

Whatever may be said of St. Paul's eschatology, it throws much light upon his christology. The Lord who is to descend from heaven 'with a cry of command, with the archangel's call, and with the sound of the trumpet of God' (1 Th 4[16]) is evidently a heavenly being, and it is not surprising that his majesty overshadows the memory of Jesus of Nazareth. St. Paul must have known something of the traditions of the ministry, and he was evidently acquainted with the ethical teaching of Jesus; but his mind was too full of the thought of Christ, risen and exalted, for him to dwell much upon the history of the earthly life of Jesus. His determination, expressed in 2 Co 5[16], no longer to regard Christ from a human point of view (or 'after the flesh'), may be variously explained, and perhaps he means 'as the Messiah of Judaism'; but in any case it is obvious that the Apostle was not much interested in the traditions of the life of Jesus except in so far as they concerned the crucifixion and resurrection, to which he attributed cosmic significance.

(*b*) Paul's Jewish Background.—Before proceeding further in the examination of St. Paul's thought it is necessary to glance at his background, and to appreciate the fundamental convictions from which he started. We have it on his own testimony that his education had been strictly Jewish. A Hebrew of pure Hebrew stock, he was 'a Pharisee, a son of Pharisees' (Ac 23[6]), and according to Ac 22[3] he had been brought up at the feet of Gamaliel. There is some evidence that Gamaliel represented a liberal and enlightened Pharisaism, and although his pupil Saul was far from liberal at the time of the persecution that arose about Stephen, it may be that the master's influence remained dormant in the young zealot and contributed to the later development of his thought. (See Paul.)

Little is known about contemporary Pharisaism, but there can be no doubt that the main interest of the sect lay in the meticulous observance of the Mosaic Law. Thus the young Saul—as he said later—'advanced in Judaism beyond many of my own age among my people, so extremely zealous was I for the traditions of my fathers' (Gal 1[14]). As a good Jew his predominating interest was in the question 'How is man to be justified in the sight of God?', and in his early years he did not doubt that the answer lay in the Jewish faith, 'through keeping the Law revealed to Moses.' Whether St. Paul's later dissatisfaction with the soteriology of Judaism was subconsciously present in his mind before his critical experience on the road to Damascus it is difficult to say. Knowing as we do the earnestness and sensitivity of the Apostle's nature, we may suspect that the faith of the followers of Jesus had already exerted an attraction on his mind which he was unwilling to admit. St. Paul was a good man at all times, and a good man does not take pleasure in persecution even when fanaticism drives him to make havoc of those whose convictions seem mistaken and dangerous. It is not unlikely that the martyrdom of Stephen had left a deep impression on the mind of the 'young man named Saul,' and although he took a leading part in the persecution that followed, he was kicking against the goads.

According to Gal 1[16f] the converted Saul 'conferred not with men, neither went he up to Jerusalem to them that were apostles before him; but he went away into Arabia, and again returned to Damascus.' The journey to Arabia and the subsequent residence in Damascus covered a period of three years, and although by the end of that time he was already known as a preacher of the faith (Gal 1[23]), it is reasonable to suppose that much of it was spent in thinking out his position. When in Ac 9[20] Luke says that after his conversion Saul immediately in the synagogues proclaimed Jesus, saying 'He is the Son of God,' there may be a foreshortening of the chronology; but we have no reason to doubt that, when he did begin to preach, the substance of his message was the exaltation and Divine status of the Jesus who had appeared to him. From that time his outlook was wholly Christocentric. His own experience had proved the Jewish way of attaining justification to be a failure, and Jesus must provide the true and only alternative. Henceforth his life and thought were dominated by the conviction that 'Jesus is Lord'—St. Paul's creed in its simplest form (Ro 10[9], 1 Co 12[3], Ph 2[11]).

(*c*) St. Paul and Hellenism.—Some modern writers describe the conception of the Messiah as a heavenly Being as 'mythology' and believe that St. Paul accepted without question the 'mythological' outlook and beliefs found in contemporary thought. That his convictions were in some ways similar may be allowed. For instance, St. Paul assumes the pre-existence of Christ in the heavenly sphere. The *locus classicus* is Ph 2[5ff]: 'Christ Jesus, who, though he was in the form of God, did not count equality with God a thing to be grasped, but emptied himself, taking the form of a servant, being born in the likeness of men.' Wilhelm Bousset thought that such a passage removes Jesus entirely from 'the ethical historical picture,' identifying him with the Gnostic 'Anthropos,' the Heavenly Man. So, according to Bousset and his followers, the great christological passages in the epistles, and still more the theology of the Fourth Gospel, are based upon the presuppositions of Hellenism and incipient Gnosticism. Bultmann regards the prologue of the Fourth Gospel as a Gnostic redemption myth.

These contentions have been put forward by a number

of modern scholars with great learning and persuasive ingenuity, but nothing can conceal their intrinsic improbability. St. Paul was born and bred a Jew, and many passages in his epistles testify to his remaining a Jew in outlook and sympathy to the end of his life. He was deeply versed in the OT scriptures, he was proud of Jewish privileges, he could wish to be 'anathema from Christ' for his brethren's sake. He never doubted the revelation of the old dispensation, and he was no admirer of the Gentile world (Ro 1^{20ff}), despite his lifelong labours to bring to the Gentiles the gospel of salvation. He never quotes Greek thinkers except—according to Ac 17^{28}—on the occasion at Athens, when he wishes to conciliate the philosophers, and—according to 1 Co 15^{33}—when he quotes a popular line from Menander. It is therefore in the highest degree unlikely that his conversion to Christ was in fact a conversion to hellenistic gnosticism, or that he immediately interpreted his new experience in terms of an alien theosophy. If St. Paul had been largely under the spell of the mystery religions he could hardly have avoided the term *Sōtēr* in speaking of Christ; yet avoid it he did, save in two passages, Ph 3^{20} and Eph 5^{23}—and the authorship of Ephesians is widely challenged. Indeed it may be argued that he consciously refrained from using a title which, though well suited to express his thought, might easily suggest pagan ideas to some of his readers.

It must, of course, be granted that St. Paul spent many years—between his conversion and the writing of his early epistles—at Tarsus, far removed from the centre of Jewish orthodoxy at Jerusalem; and although it is impossible to believe that he ever became a Hellenistic Gnostic, it is not impossible to suppose that he drew on some of the thought-forms of the Gentile world in seeking to formulate his christology. As he stood blinded on the road to Damascus he became convinced that the Jesus whom he persecuted was indeed a heavenly being, that though He had died upon the cross He was risen and glorified, the Redeemer from sin and from the wrath of God. How could these facts be interpreted, save in terms reminiscent of the pagan myths? But the resemblance is superficial. The pagan myths were myths and no more. The saviour-gods of the mysteries may have been represented as dying and coming to life again, but they were no more than nature-symbols, utterly unlike the living personal Christ who was the object of St. Paul's devotion. Nor is there any real similarity between the pagan ceremonies of initiation and communion and the Christian sacraments accepted by the Apostle. Initiation into the mysteries might assure the participant that he was *renatus in aeternum* (though the phrase is late); but baptism into Christ, with its death to sin and its rising again unto righteousness, belonged to a different world of ideas.

St. Paul never lost his foothold in history. He thought of Christ as a man, born of the seed of David according to the flesh, whose example and teaching established the ethical norm for His followers (Ro 1^{3}, Ph 2^{5}, Ac 20^{35}). That this aspect of the Apostle's teaching is not prominent in his epistles is a fact to be borne in mind. It may be that he was content that others should instruct his followers concerning the earthly life of Jesus; it may be that he knew little of it himself; it is certainly true that it did not occupy a central place in his thought. Yet it is there. St. Paul knew that Jesus had lived the life of man at a definite time and in a definite place, and thus his christology is firmly anchored in history. In his interpretation of the crucifixion and resurrection, St. Paul starts from historical fact, and without that his soteriology would have had no point. Moreover, his intense personal devotion to Christ must not be forgotten: 'To me to live is Christ, and to die is gain' . . . having a desire 'to depart and be with Christ, for that is far better' (Ph $1^{21, 23}$). No man ever spoke of Mithras in such a manner, and although we have no reason to suppose that St. Paul ever saw Jesus in the flesh, an outburst such as this implies that he had in mind a real historical person. The love of which men are capable for a purely mythical being can easily be exaggerated.

Yet, as we have seen, it was not on the earthly life of Jesus that St. Paul's mind chiefly dwelt. He may speak of Jesus Christ as born of the seed of David, but it is only to add 'designated Son of God in power according to the Spirit of holiness by his resurrection from the dead' (Ro 1^{4}). If this passage stood alone it might be thought to suggest an adoptianist christology. Something depends on the exact meaning of the Greek word translated 'designated' (RSV) 'declared' (RV), or 'determined' (RVm). Probably the meaning is that, although Jesus was always Son of God, His true nature was only revealed by the resurrection. Then, His work on earth done, He received the name that is above every name (Ph 2^{9}). Raised from the dead, He was acclaimed Christ and Lord.

(*d*) Paul's Conception of Christ.—Apart from its influence in dictating his apocalyptic expectations, the messiahship of Jesus does not figure largely in the thought of St. Paul. Of course Jesus was the Christ, but current conceptions of the Messiah were too much associated with Jewish nationalism to make much appeal to the Apostle to the Gentiles. Rather his interest was in Christ Jesus as the agent of God in bringing justification to men, and hence as the mediator of a new covenant of grace. His belief in the saving efficacy of Christ's death was central to his thought. Men, sinners all, children of Adam, subject to the wrath of God, are 'justified by his grace as a gift, through the redemption which is in Christ Jesus, whom God put forward as an expiation by his blood' (Ro 3^{24f}). He was 'put to death for our trespasses and raised for our justification' (Ro 4^{25}). 'While we were yet sinners Christ died for us' (Ro 5^{8}). 'Where sin increased, grace abounded all the more, so that, as sin reigned in death, grace also might reign through righteousness to eternal life through Jesus Christ our Lord' (Ro 5^{20f})' 'Christ redeemed us from the curse of the Law, having become a curse for us' (Gal 3^{13}).

This is not the place to attempt the elucidation of these tremendous claims, but we must ask, Who is this Christ Jesus whose death and resurrection have such power over the eternal destiny of men?—and not of men only, for 'the whole creation has been groaning in travail together until now' (Ro 8^{22}).

It is surprising that the great christological passages do not occur in Romans, where St. Paul describes at length the work of Christ, but in his later epistles, Philippians and Colossians. Yet in Romans the later teaching is adumbrated, if not assumed. He refers to Jesus as 'Christ,' 'Lord,' and 'Son of God,' and such a sentence as occurs in 1^{7}, 'Grace to you and peace from God our Father and the Lord Jesus Christ,' clearly implies that he thought of Jesus as belonging to the heavenly sphere, to be mentioned in the same breath as 'God our Father.' In 2^{16} we read of the day when 'God judges the secrets of men by Christ Jesus,' a clear reference to the messianic judgment. But in Romans the Apostle is too intent on the exposition of his soteriological convictions to pause and explain his faith in the Person of Christ, or to expound the exact meaning of the title 'Son.' Only we learn that the relationship of the Son to the Father, though unique—God 'did not spare his own Son, but gave him up for us all' (8^{32})—yet foreshadows the relationship to God of all who are called according to His purpose, , For those whom he foreknew he also predestined to be conformed to the image of his Son, in order that he might be the firstborn among many brethren' (8^{29}).

The references to the pre-existence of Christ are not numerous, but they are decisive. Apart from Ph 2^{5ff}, St. Paul writes in 2 Co 8^{9}, 'You know the grace of our Lord Jesus Christ, that though he was rich, yet for your sake he became poor'; and almost equally unmistakable is Gal 4^{4}, 'When the time had fully come, God sent forth his Son, born of a woman, born under the Law.' These passages must be read in conjunction with those

which emphasize the exaltation of Christ through the resurrection. 'God has highly exalted him and bestowed on him the name which is above every name' (Ph 2^9). and 'He raised him from the dead and made him sit at his right hand in the heavenly places, far above all rule and authority and power and dominion' (Eph 1^{20}, if we may quote it as Pauline). But the Apostle does not mean that such dignity was new and strange to the risen Christ, who in taking the form of a servant had humbled and emptied Himself (Ph 2^{6ff}).

Much has been written and continues to be written on the precise meaning of this 'emptying,' or *kenōsis*. St. Paul does not elaborate his thought. It is possible that in Philippians he is quoting from some hymn to Christ, and the conception is not strictly original; but at least, if Ph 2 may be read with Col 1^{15ff}, no doubt remains as to the Apostle's conviction that Christ was eternally Divine. 'For in him all things were created, in heaven and on earth, visible and invisible . . . all things were created through him and for him. He is before all things, and in him all things hold together.' This may be dismissed as 'mythology,' but it can only mean that to St. Paul Christ was pre-existent and eternal.

How then was it possible for the heavenly Christ to live and die as a man? It may be that St. Paul's preoccupation with the redemptive work of the Divine Son prevented him from realizing the difficulties that emerged in later centuries. He never asked whether the Ego of Christ was human or Divine, or how the Divine nature could persist under conditions of human life, or how two natures could coexist in a single Person. The later history of doctrine testifies to the embarrassment of the Church in proclaiming that one who was Son of God could suffer on the cross and die. Docetism was the earliest Christian heresy, but St. Paul betrays no sign of docetic tendencies. He believed in the humanity of Jesus, born of the seed of David, and he believed that He was the Son of God. To become subject to suffering and death He who was in the form of God had emptied Himself, that is, had laid aside His Divine immunity and prerogative. If it be asked what else He laid aside, His power, His knowledge, or His claim to the worship of men, St. Paul has no answer. Such questions he left for later theologians, but a strong degree of self-limitation is implied in his view of the resurrection whereby Jesus was designated Son of God in power. His thought is not alien to that of the Fourth Gospel, 'And now, Father, glorify thou me in thy own presence with the glory which I had with thee before the world was made' (Jn 17^5). The dividing line between voluntary humiliation with all that that implied and final glorification was the resurrection.

So St. Paul opened the way to the development of a christology which denies neither the divinity nor the full humanity of Christ. While not ceasing to be God, and so able to effect redemption for sinners, the pre-existent Son divested Himself of such qualities as would be altogether incompatible with the reality of human life. Looking back at such records of the ministry as are available we must admit that even the consciousness of Divine Sonship is not to be assumed. No text is more significant than Lk 2^{52}, where the evangelist writes that the young Jesus 'increased in wisdom and in stature, and in favour with God and man.'

Many problems remain unsolved, but unless either the divinity or the humanity of Christ is to be denied some form of kenotic christology is inevitable, and it must be built on the foundation of Ph 2^{5-11}.

(*e*) SUMMARY.—To summarize, then, the witness of St. Paul, it must be insisted again that his approach is soteriological, rather than dogmatic. The Jesus who had lived and died on earth, but who had appeared to him on the road to Damascus, was indeed Messiah and Son of God. His death and resurrection had been part of the Divine plan whereby sinners might be 'justified' by faith, and not by works of law. Now he was by God exalted, the object of worship, accessible in prayer. Before long the final consummation would be reached when the glorified Christ would appear to reward the faithful and sit on the throne of messianic judgment. Meanwhile the Church enjoys the gift of the Spirit, in the strength of which the 'Christian' life is possible. The precise relationship of Christ to the Spirit is a question which the Apostle is content to leave undetermined, although there are many passages in which he distinguishes the Spirit from Christ (Ro 8^{16f}, 1 Co 6^{11} 12^3, etc.). Here again he lays the foundation of later doctrinal development. In the words of Vincent Taylor, 'The doctrine of the Trinity is not taught, but its presuppositions in Pauline teaching are laid bare' (*The Person of Christ*, p. 55).

St. Paul does not seem to have been conscious of any threat to the traditional monotheism of the Jews involved in his 'high' christology. Perhaps his mind had been prepared by the exaltation of Wisdom in late Jewish literature. Certainly he is able to associate the Divine Lordship of Christ with an uncompromising assertion of the unity of God: 'For although there may be so-called gods in heaven and on earth—as indeed there are many "gods" and many "lords"—yet for us there is one God, the Father, from whom are all things and for whom we exist, and one Lord, Jesus Christ, through whom are all things and through whom we exist' (1 Co 8^{5f}).

An element of 'subordinationism' is clearly discernible in St. Paul's teaching. However exalted, Christ was in the Apostle's mind no supreme Saviour God, but the Son of the Father, and obedient to Him; He was God's agent in the work of redemption, but destined at last to surrender the kingdom that 'God may be all in all' (or RSV 'everything to everyone') (1 Co $15^{24, 28}$). However St. Paul may link together Christ Jesus and God the Father (Ro 1^7, 1 Co 1^3, 2 Co 1^2, Gal 1^3, etc.), he always ascribes the initiative to the Father, who *sent* His Son in the likeness of flesh (Ro 8^3), who *raised* Him from the dead (Ro 4^{24} 8^{11}, 1 Co 15^{15}, Col 2^{12}, 1 Th 1^{10}), who *has highly exalted* Him, and *bestowed* on Him the Name (Ph 2^9). There is nothing here to support the Arian conception of an inferior essence, but the Apostle does not equate the Father and the Son in function.

4. The Epistle to Hebrews.—We must now glance more briefly at the christology of another writer, so long and so mistakenly identified with St. Paul. Of the identity of the *Auctor ad Hebraeos* nothing is known, and all that can be said is that he was probably an Alexandrian Christian who wrote in the latter part of the 1st cent. Whether he was himself a Jew, and whether his epistle is indeed addressed to 'Hebrews' remains open to question. It has been forcibly argued that his approach to Judaism is not that of a Jew, but rather of a Gentile who has derived his conception of Jewish religion from an intensive study of parts of the OT. He shows particular interest in the Levitical sacrificial system, which, even before the destruction of the Temple in A.D. 70, had become of secondary importance in comparison with the worship of the synagogue.

The main theme of the Epistle is the superiority of the new dispensation to the old. The new is founded upon a better covenant of which Christ is the mediator, and Christ is far greater than Moses. 'Christ has obtained a ministry which is as much more excellent than the old as the covenant he mediates is better, since it is enacted on better promises' (8^6; cf 9^{15} 12^{24}). Of this new dispensation Christ is the true and eternal High Priest, far superior to the high priests of the old covenant, and offering a better sacrifice than they (7^{26-28}); hence the privilege of Christians who have 'an altar from which those who serve the tent have no right to eat' (13^{10}).

It is evident that the argument rests upon the author's christology; only because he can assume the acceptance of his own view of the Person of Christ has it any force. That his was a 'high' christology is obvious, for none but a Divine being could fulfil the functions ascribed to Christ in the Epistle. Yet he was no docetist, and he never forgets the human life of Jesus. The 'great

salvation' offered to Christians was 'declared at first by the Lord, and it was attested to us by those who heard him, while God also bore witness by signs and wonders and various miracles and by gifts of the Holy Spirit' (2^{3f}). This suggests a knowledge of the gospel history not found in St. Paul. Moreover, the difficult verse (5^{7}), 'In the days of his flesh, Jesus offered up prayers and supplications, with loud cries and tears, to him who was able to save him from death, and he was heard for his godly fear,' seems to go beyond the gospel record in emphasizing the human weakness of Jesus and the reality of his sufferings. The next verse, 'Although he was a Son, he learned obedience through what he suffered,' is a daring statement, but it accords with the author's general view. The human virtues displayed by Jesus consort with His subordination to the Father; 'He was faithful to him who appointed him, just as Moses also was faithful in God's house' (3^{2}). The voluntary character of Christ's suffering is no less strongly emphasized than its reality: 'Jesus suffered in order to sanctify the people through his own blood' (13^{12}); and in all 'he has been tempted as we are, yet without sinning' (4^{15}). Even spiritual progress was experienced, since 'he learned obedience through what he suffered' and was made perfect (5^{8f}).

It is indeed remarkable that in spite of this 'vivid portraiture of the humanity of Jesus' (Mackintosh) the author should be able to conceive the essential nature of 'the Son' in terms which almost go beyond the declared christology of St. Paul. Christ, the ideal High Priest, of whom even Melchizedek is but an adumbration, now 'is seated at the right hand of the throne of the Majesty in heaven' (8^{1}). The first paragraph of the Epistle declares Him to be 'a Son,' and as such contrasted not only with prophets but with angels: 'To what angel did God ever say, "Thou art my Son, this day I have begotten thee"?' (1^{5}). The scriptural quotations in chapter 1, however uncritically applied, are of great significance as revealing the author's convictions. Christ is a Son whose relation to the Father is unique (v.^{5}). He is the object of worship by the angels (v.^{6}). His throne and sceptre are eternal (v.^{8}). He is at once the anointed of God and the agent of creation, though in no way sharing the transitory nature of the material world, for 'they will all grow old like a garment . . . but thou art the same, and thy years will never end' (vv.$^{11, 12}$). Thus, as for St. Paul, the earthly life of Jesus was an act of condescension: 'Since therefore the children share in flesh and blood, he himself likewise partook of the same nature, that through death he might destroy him who has the power of death, that is, the devil' (2^{14}); 'He had to be made like his brethren in every respect' (2^{17}); 'Because he himself has suffered and been tempted, he is able to help those who are tempted' (2^{18}).

The author thinks of the relationship of the Son to the Father as eternal; else how could the Son have been concerned with creation? (1^{10}). It is the Son who founded the earth in the beginning, who built the 'house' of the Mosaic dispensation (3^{3}), and whose work as High Priest on earth and in heaven secures the salvation of men (10^{12-14}). He uses 'Christ' and 'Son' without clear distinction, and he teaches the pre-existence of Christ without ambiguity. There is no exposition of the incarnation so formal as that of Ph 2^{5-11} or the Prologue to the Fourth Gospel; but the fact is taken for granted.

Hebrews has been called 'the Epistle of Priesthood,' for it is on the Priesthood of Christ that the author's mind chiefly dwells. He looks at the OT mainly as embodying a sacerdotal system, centred in the Tabernacle, whereby the Levitical priests, by the blood of bulls and of goats, sought to make atonement for the sins of the people. Their sacrifices had no true validity, since they served as 'a copy and shadow of the heavenly sanctuary' (8^{5}). Levitical priests were but men, constrained to offer daily the same sacrifices for themselves and for others, sacrifices which 'can never take away sins' (10^{11}); but Christ, the one true High Priest, offered Himself, 'for all time a single sacrifice for sins,' and 'sat down at the right hand of God' (10^{12}). Thus the whole of the old dispensation, with its covenant, its priests, and its sacrifices, is no more than an adumbration of the new, and 'what is becoming obsolete and growing old is ready to vanish away' (8^{13}).

The author is no more concerned than was St. Paul to explore the relation of his christology to monotheism. The Son is indeed unique, reflecting the glory of God and bearing the very stamp of His nature (1^{3}), so that he may fittingly sit down at God's right hand; but however exalted, he is not identified with God, and the note of subordination is maintained throughout. The eternal work of the Son, His task fulfilled on earth, is to make intercession for those who draw near to God through Him (7^{25} 9^{24}).

On the whole it may be said that the christology of Hebrews rests on convictions that do not differ essentially from those of St. Paul. The manhood of Jesus is emphasized rather more strongly than in the Pauline Epistles, but the author is no less convinced of His divinity. Indeed, the close relationship of Christ to the Father is assumed throughout, and the author leaves no doubt of his belief both in the eternal pre-existence of Christ and of His present exaltation. There is some shift of emphasis from the resurrection to the crucifixion: 'We see Jesus, who for a little while was made lower than the angels, crowned with glory and honour because of the suffering of death, so that by the grace of God he might taste death for every one' (2^{9}).

In Hebrews, Jewish messianism has almost disappeared, giving place to the conception of Jesus as the great High Priest. The author has his eschatology, but the apocalyptism of St. Paul is absent. He speaks of 'the end' (3^{14}), and there are references to judgment. 'Eternal judgment' is classed among those elementary doctrines from which mature Christians must advance (6^{1f}). He preaches the fear of such judgment, and the punishment of those who have spurned the Son of God (10^{29}). He does not doubt that Christ will appear a second time 'not to deal with sin, but to save those who are eagerly waiting for him' (9^{28}). 'The Day' is drawing near (10^{25}). But the realistic picture of the messianic judgment is lacking in Hebrews, and the expectation of the future is left vague: 'There remains a sabbath rest for the people of God; . . . let us strive to enter that rest' ($4^{9, 11}$). 'Let us be grateful for receiving a kingdom that cannot be shaken' (12^{28}); 'Here we have no lasting city, but we seek the city which is to come' (13^{14}). The author's hope (10^{23}) does not differ essentially from that of earlier believers, and he does not doubt that judgment will be meted out to those who refuse salvation in Christ; but he is too good a Platonist to share the materialistic outlook of those whose antecedents were Jewish rather than Greek. Like St. Paul he lays stress upon the necessity of faith whereby the benefits of Christ are appropriated; but for him faith is the religious sense in its widest aspect, 'the assurance of things hoped for, the conviction of things not seen' (11^{1}). Of St. Paul's distinctive use of the term to express personal surrender and acceptance of justification through the work of Christ the author of Hebrews has no idea. This is not surprising, in view of the neglect—or misunderstanding—of Paul's teaching in the period following his martyrdom. The specifically Pauline view was probably *sui generis* in the first century. See FAITH, 2, *ad fin.*

5. First Peter.—The place of the first Epistle of Peter in the development of christology is not easy to determine. Those who accept it as a genuine work of the Apostle naturally compare its teaching with that of the early speeches in Acts to which it bears some resemblance; but the short epistle contains little that may not be said to belong to the commonly accepted doctrine of the Church. If, as probably the majority of scholars now believe, it is a pseudonymous work of the latter part of the 1st cent., it may be legitimate to recognize not only primitive elements, but also a certain amount

of development as compared with the earlier apostolic teaching.

The author's interest centres more in soteriology than in christology, and for that reason his precise convictions are implied rather than stated. He never uses the name Jesus by itself, and for him 'Christ' is a proper name with little trace of Jewish messianic implications. Christians are such as have been sprinkled with the blood of Christ (1^{2}). They are 'ransomed from the futile ways inherited from [their] fathers . . . with the precious blood of Christ, like that of a lamb without blemish or spot' (1^{18f}). Not only was the suffering of Christ an example to those who are called (2^{21}), but it had a deeper significance, inasmuch as 'he himself bore our sins in his body on the tree, that we might die to sin and live to righteousness' (2^{24}; cf Col 3^{3}, Ro 6^{2ff}). 'Christ . . . died for sins once for all, the righteous for the unrighteous, that he might bring us to God, being put to death in the flesh but made alive in the spirit' (3^{18}). The author's use of the conception of the Spirit is obscure. In 1^{11} he writes of the prophets as inspired by 'the Spirit of Christ,' and this has been taken as implying a belief in the pre-existence of Christ; but it is more probable that he retains an OT idea of the Spirit of God, active throughout history, but specially manifest in Christ, so that it may be called the spirit of Christ even when operative centuries before his birth. Christ's earthly life in the flesh ended with the crucifixion, but His true spiritual life was uninterrupted, and even before the resurrection He went to preach to the spirits in prison (3^{19}). To the dead He imparted something of His spiritual power, that 'though judged in the flesh like men, they might live in the spirit like God' (4^{6}).

The prevailing sacrifice of Christ was in accordance with God's eternal plan; 'he was destined before the foundation of the world, but was made manifest at the end of the times for your sake' (1^{20}). Now He is exalted by God who raised Him from the dead (1^{21}), and by men should be reverenced 'as Lord' (3^{15}). As a Divine being Jesus Christ has gone into heaven and is at the right hand of God, sharing God's power, since angels, authorities, and powers are subject to Him (3^{22}).

The Epistle has a strong eschatological element, though no apocalyptism is developed. Salvation is 'ready to be revealed in the last time' when the constancy of those born anew to a living hope will enjoy 'an inheritance imperishable, undefiled, and unfading, kept in heaven for you' (1$^{4, 5}$). Genuineness of faith will be rewarded by 'praise, glory, and honour at the revelation ["apocalypse"] of Jesus Christ' (1^{7}). 'Set your hope fully on the grace that is coming to you at the revelation of Jesus Christ' (1^{13}). 'The end of all things is at hand, therefore keep sane and sober for your prayers' (4^{7}). In such passages the author reflects a faith in the imminent messianic consummation differing from that of St. Paul only in its lack of elaboration.

It may be concluded that the author of this Epistle thinks of Christ as the author of salvation by His sacrificial death, exalted to the throne of God, now the object of religious veneration, and destined at no distant time to reward the steadfastness of the faithful with the gift of their imperishable inheritance. That he was much influenced by the Christian interpretation of Isaiah 53 is certain, but in most respects he reflects the simple faith of 1st.-cent. Christianity and makes no attempt at theological systematization. He does not call Christ 'the Son,' and only in the opening words of the Epistle does he refer to God as 'Father'; there he describes the exiles of the dispersion as 'chosen and destined by God the Father and sanctified by the Spirit for obedience to Jesus Christ' (1^{2}). Dean Selwyn was surely right when he said that the Epistle 'contains the roots of later Catholic doctrine, but not yet its flower, so far as conscious formulation is concerned' (E. G. Selwyn, *The First Epistle of Peter*, p. 249). There is no Trinitarianism in the strict sense, but the materials out of which it was later constructed may be found in the Epistle. Similarly, in 3^{18} the Person of Christ is looked at from two points of view, the human and the Divine. He was 'put to death in flesh, but made alive in [the] spirit,' which is at least a pointer to the later doctrine of the Two Natures. It is a great advance on the Petrine speeches in Acts.

6. The Apocalypse of John.—Whatever may be said about the influence of Jewish apocalyptism on the synoptic gospels and the epistles of St. Paul, there can be no doubt about its dominating place in the Revelation of St. John the Divine. Here, if anywhere, the Christian faith is 'mythologized,' and the modern reader, unfamiliar with the bizarre imagery of apocalyptic literature, may find himself at a loss to understand the meaning of the book.

Yet further study makes it plain that, however strange the mode of expression, the underlying intention of the author does not differ fundamentally from that of more prosaic writers. His mind is filled with the thought of the exaltation of the risen Christ, and although his interest centres on the heavenly station, rather than on the earthly work of Jesus, he does not forget that it is the Jesus who was crucified, 'the lamb who was slain,' who is worthy to receive 'blessing and honour and glory and might for ever and ever' (5^{12f}). Amid all the cosmic terrors in which the author delights it is 'the faith of Jesus' that the enduring saints will keep (14^{12}); 'Also I saw the souls of those who had been beheaded for their testimony to Jesus' (20^{4}). Even in the most fantastic passages the historical background is still there: of the 'two witnesses' it is said that 'their dead bodies will lie in the street of the great city which is allegorically called Sodom and Egypt, where their Lord was crucified' (11^{8}). The glorification of Jesus is associated with His death and resurrection throughout. Jesus Christ is 'the firstborn of the dead' (1^{5}); 'I died, and behold I am alive for evermore' (1^{18}); 'He who conquers, I will grant him to sit with me on my throne, as I myself conquered and sat down with my Father on his throne' (3^{21}).

The thought of the glorification of Christ colours all the author's imagery. He has 'the keys of Death and Hades' (1^{18}). He 'holds the seven stars in his right hand' (2^{1}). He rewards the conquerors with eternal life (2^{7}). He is the messianic Judge (1^{7} 14^{14ff} 22^{12}). He is Lord of Lords and King of Kings (17^{14} 19^{16}). He is the Son of God (2^{18}) who has received power from His Father to rule the nations (2^{27}). Like God Himself, He is the Alpha and the Omega, the beginning and the end (21^{6}). Once He is called 'the Logos of God' (19^{13}); but the rest of the passage describes the Rider upon the white horse as the One who 'is called Faithful and True, and in righteousness he judges and makes war. His eyes are like a flame of fire, and on his head are many diadems.' This has little in common with Jn 1$^{1-14}$.

The Christ of the Apocalypse sits with God on His throne (7^{17} 22^{3} 12^{5}), is worshipped as God (5^{12f}), and is described by many passages applied to God in the OT (1^{14f} etc.). Yet the author never calls Christ 'God,' or says, as does St. John, that God and Christ are one. It is God who is the Creator (4^{11} 14^{7}); Christ is 'the beginning of God's creation' (3^{14}). Subordination, rather than equality, is presupposed.

The title that appears most frequently in the Apocalypse is 'the Lamb,' and the Greek word is not the same as that used in Jn 1^{19}. It occurs about twenty-eight times, and, as Charles pointed out, it combines two conceptions. From Isaiah 53 comes the thought of the Lamb sacrificed, 'a lamb that is led to the slaughter'; 'Worthy is the Lamb who was slain' (5^{12}); 'They have conquered . . . by the blood of the Lamb' (12^{11}). From Jewish apocalyptic literature comes the contrasting idea of the Lamb as the Leader: 'For the Lamb in the midst of the throne will be their shepherd, and he will guide them to springs of living water' (7^{17}); the 144,000 'follow the Lamb wherever he goes' (14^{4}); and he, with seven horns and seven eyes (symbols of power), makes the saints 'a kingdom and priests to our God, and they shall reign on earth' (5^{10}). He is a military leader against whom the forces of the Beast will make war, and

'the Lamb will conquer them' (17[14]). In 6[16] occurs the striking phrase 'the wrath of the Lamb.' With such language may be compared 1 En 90[38], where the Messiah becomes a lamb, a great animal with great black horns on its head, and the *Testament of Joseph* 19[8] and 17[4]. These two conceptions are interwoven in the Apocalypse, so that one shades off into the other, and this accounts in some measure for the strange combination of Christian devotion and ferocious vindictiveness which characterizes the book. No doubt the author reflects the spirit of his age, which was an age of persecution. Martyrdom was heroically accepted, and the example of Christ was not forgotten; but at the same time the thought of vengeance by the all-conquering Messiah was treasured by way of consolation. A century later Tertullian found comfort in such an expectation (*de Spect.* 30).

The author has no clear doctrine of the Spirit, who in certain passages is vaguely identified with Christ. Thus, in the Letters to the Seven Churches occurs the phrase 'Let him that hath an ear hear what the Spirit says to the churches'; but the speaker is Christ.

The seer was no philosophic theologian, but his utterances reflect the main elements of the christology of the early Church. Jesus, the Messiah, who had lived and died and risen in triumph from the dead, is now exalted to the throne of God and is the object of worship in heaven and on earth. The future history of the world is in His hands, and He will establish the kingdom which is symbolized by the New Jerusalem coming down out of heaven from God, whose temple is the Lord God the Almighty and the Lamb (21[22]).

7. The Fourth Gospel.—The christology of the NT may be said to reach its climax in the Johannine writings. That the Gospel and the First Epistle are by the same hand is perhaps less certain than it seemed a few years ago, but for our present purpose the question is of no great importance. Gospel and Epistle alike present a view of the Person of Christ which, though having much in common with the synoptic gospels, and reflecting ideas familiar in the Pauline Epistles, goes far beyond them in development and in systematic expression.

(*a*) JESUS THE 'SON OF GOD.'—Christology is the main interest of the evangelist; indeed it is his whole concern. Though the Gospel is cast in narrative form, it is in the main a portrayal of Jesus as the Son of God. Thus it concludes, 'Now Jesus did many signs in the presence of the disciples which are not written in this book; but these are written that you may believe that Jesus is the Christ, the Son of God, and that believing you may have life in his name.' 'Believing' is crucial, for salvation, which is life, is dependent upon the realization of the true nature of Jesus (cf 1 Jn 4[15] 5[5]).

That Jesus is the Messiah is assumed. Thus Andrew announces to Simon Peter, 'We have found the Messiah' (1[41]); and in the first chapter of the Gospel messianic titles are multiplied. So far St. John follows the synoptic tradition, but he is constantly at pains to refute erroneous Jewish conceptions, and his understanding of the title has little in common with current Jewish messianism. Thus Jesus is indeed 'the King of Israel,' a fact which even Pilate admits (for 18[33] is surely a declaration, not a question); but His kingdom is the kingdom of Truth, and everyone who is of the truth hears His voice (18[37]). The most probable interpretation of the title 'Lamb of God' is that which associates it with the Messiah, one of whose functions was to abolish sin, and throughout the Gospel the writer shows himself well acquainted with Jewish ideas, even though he is frequently concerned to refute them. But, in the words of C. H. Dodd, 'It is the titles "Son of God" and "Son of Man" that the evangelist has selected to bear the weight of his interpretation of the Person of Christ' (*The Interpretation of the Fourth Gospel*, p. 230). Indeed, in many passages 'Christ' is simply the equivalent of 'Son of God.' When Martha exclaims, 'Lord, I believe that you are the Christ, the Son of God, he who is coming into the world' (11[27]), she is not concerned with Jewish nationalistic expectations, but with the Divine source of eternal life; and Nathanael's confession, 'You are the Son of God, you are the King of Israel!' (1[49]), is equally far removed from traditional ideas. Even in the section 7[25–32] in which the question is debated, 'Can it be that the authorities really know that this is the Christ?' the answer is that Jesus has been sent from God, whom He knows, though the Jews do not know Him; that He will shortly go to Him who sent Him; that He has the water of life and is the vehicle of the Spirit. Whether He was descended from David or born at Bethlehem is irrelevant: 'No man ever spoke like this man.' Thus the title 'Christ' is taken up and comprehended in wider conceptions. Not even the transmuted messianism of earlier Christian apocalyptism finds a place in the Fourth Gospel. The author may still speak of 'the last day,' but it is broadly true that the coming of the Paraclete has taken the place of hopes of the Parousia.

To the Fourth Evangelist, Jesus is pre-eminently 'the Son of God' (eight times) or simply 'the Son' (sixteen times). Men who receive the Logos have power to become 'children of God,' but Jesus is 'Son' in a wholly different sense. He is the 'only begotten' (1[14, 18] AV; 3[16, 18]); as the *only* Son, who is in the bosom of the Father, He has made known the invisible God (1[18]). In the synoptic gospels stress is laid on the Fatherhood of God, but St. John shifts the emphasis to the Sonship of Christ, and the relationship of Father and Son is elaborated theologically. Fundamentally, the Son is dependent on the Father; He is 'sent' by the Father and comes in His name (4[34] 5[43] 8[16, 28] etc.); it is as the representative of the Father that the Son exercises all Divine authority, judges, and gives life (5[21ff]). He is the resurrection and the life, the Bread of Life. He belongs wholly to the sphere of 'spirit,' which is the sphere of God, and not to this world (8[23]). His Divine status is eternal. There is no hint of a virgin birth in the Fourth Gospel, such as is described by Matthew and Luke. Christ, as the beloved Son of God, existed with God from all eternity (17[5]) and was 'sent' from God to do His will and to reveal His nature. 'The human career of Jesus is, as it were, a projection of the eternal relation (which is the divine 'love') upon the field of time. . . . The love of God, thus released in history, brings men into the same unity of which the relation of Father and Son is the eternal archetype' (Dodd, *Interpretation of the Fourth Gospel*, p. 262).

Thus the evangelist analyses and develops a term which had been in use by the Church from the earliest times and was taken for granted by St. Paul. St. Paul had felt no need to define the relationship between God and Christ, the Son; Jesus belonged to the heavenly order, and that was enough; but St. John conceived Sonship in a manner that could only be expressed in the Logos doctrine. St. Paul's interest was primarily soteriological; St. John is no less concerned with salvation as he conceives it, but he carries his thought into the realms of philosophy.

It follows from his more metaphysical approach that St. John does not give to the resurrection of Christ the central place it had in the thought of St. Paul. The Apostle had written that Jesus was designated Son of God by the resurrection from the dead, but in the Fourth Gospel Jesus is manifestly Son of God throughout His earthly life. The resurrection marks the end of certain limitations voluntarily accepted, but it adds nothing to the transparent dignity of His Person or the majesty of His status. Though He had become flesh, Jesus manifested at all times the glory and power of God. Any change is to be found in the apprehension of His followers, and it is remarkable that the evangelist only uses the title 'the Lord' after the resurrection. Here, at least, he respects early tradition.

(*b*) 'SON OF MAN' AND 'SERVANT.'—The retention of the title 'Son of Man' in the Fourth Gospel is at first sight surprising. As we have seen, the evidence points to the conclusion that the phrase was not in use in the early Church, but it occurs in the Fourth Gospel more

than a dozen times. None of the synoptic sayings in which it is found occurs in the Fourth Gospel, but the title is introduced quite naturally, as though familiar in the evangelical tradition. It is too simple an explanation to say that the author's purpose is to safeguard the manhood of Jesus as against docetic tendencies. The Platonic background of the Gospel must be remembered. In Hebraic idiom 'Son of Man' means 'Man,' and to those familiar with the vague Platonism of the Hellenistic age Man means the ideal of humanity. So to the evangelist Jesus as Son of Man is both the representative of mankind and also in a corporate sense the sum of all humanity. The Johannine usage has contacts both with Jewish thought (*e.g.* Dn 7^{13} where 'a Son of Man'—or 'one like a son of man'—signifies Israel), and with Philo and the Hermetic writings, whose references to the Heavenly Man (*Anthropos*) provide numerous parallels to the Fourth Gospel (cf Dodd, *Interpretation*, 31 ff, 43, 243). Another influence is to be found in the Servant passages of the Second Isaiah. Thus, Is 49^{3} 'You are my servant, Israel, in whom I will be glorified' and 49^{5} 'I will be glorified before the Lord' (LXX) may be compared with Jn 13^{31} 'Now is the Son of Man glorified, and in him God is glorified.' In this passage of Isaiah, the Servant is Israel, given for a light to the Gentiles (v.^{6}); and so in John Christ is the Light of the World. 'The evangelist found in the Servant of the Lord an embodiment of the people of God, and applied what is said of him to the Son of Man, conceived as embodying collectively in himself redeemed humanity' (Dodd, *op. cit.*, p. 246).

In various passages the term 'Son of Man' is related to the condescension and exaltation of the divine Son: 'What if you were to see the Son of Man ascending where he was before' (6^{62}; cf 3^{13}); and particularly significant is the use of the title in connexion with the Passion, always regarded in this gospel as the supreme triumph of Jesus. In 13^{31}, when Judas has gone out and the action of the Passion has begun, Jesus says, 'Now is the Son of Man glorified.' In three passages (3^{14}, 8^{28}, 12^{34}) there are references to the 'lifting up of the Son of Man,' and it is clear that John has in mind the exaltation of the Son of Man in the crucifixion. We may compare Mk 8^{31} where Jesus, after Peter's confession, teaches that the Son of Man must suffer many things; His messianic glory will shine from the cross.

Again the influence of Isaiah is discernible. For instance, in Is 52^{13} we read, 'My servant . . . shall be exalted and lifted up, and shall be very high'; so for St. John the cross is the glorification of Jesus, the Servant of the Lord, the Son of Man, the representative of the whole human race. C. H. Dodd sums up a learned and suggestive discussion as follows: 'The Son of Man throughout this gospel retains the sense of one who incorporates in himself the people of God, or humanity in its ideal aspect. . . . In the Fourth Gospel there is never any doubt that the evangelist is speaking of a real person, that is, of a concrete historical individual of the human race, 'Jesus of Nazareth, the son of Joseph.' He labours, grows weary, thirsts, feels joy and sorrow, weeps, suffers, and dies . . . His glory is the transfiguration of a human life by a supreme act of self-sacrifice . . . And yet, says the evangelist, in all this he was much more than one individual among the many. He was the true self of the human race, standing in that perfect union with God to which others can attain only as they are incorporate in him' (*op. cit.*, pp. 248 f).

(*c*) 'The Logos.'—The Fourth Gospel begins, not with a birth narrative like Matthew and Luke, but with a Prologue setting forth the doctrine of the Logos. In 1892 Adolf Harnack argued that this Prologue was no integral part of the gospel, but a mere preface written to secure the interest of philosophers in what was essentially an historical document. Further study has not supported this view, and it is now generally admitted that although the word Logos does not occur in the rest of the gospel (except in the ordinary sense of the spoken word), the ideas to which concise expression is given in the Prologue control the christology of the gospel throughout.

Much has been written concerning the antecedents of the Johannine Logos doctrine. Some recent scholars have thought that the use of the term can be adequately explained by comparison with Jewish thought. 'The word of the Lord' is a common phrase in the OT, and in some late Jewish literature 'Wisdom' and 'Word' are almost hypostasized. Logos is then the translation of *Memra* about which much is said in the rabbinic writings. No doubt Jewish thought and Jewish scriptures deeply influenced the Fourth Evangelist, but it is very doubtful whether by themselves they provide an explanation of his choice of the term. To mention a single point, how could the Evangelist write, 'The Logos was with God and the Logos was God,' if by Logos he meant no more than *Memra*?

On the other hand, the idea of Logos had a long history in Greek philosophy, being much used by the Stoics, and perhaps traceable to Heraclitus. It was by using a term that expressed man's highest attributes, reason, and speech, that Greek thinkers expressed their belief in the rationality of the universe, and it is not surprising that the Evangelist, who was certainly familiar with Hellenistic thought, chose to use it to express the divine Sonship of Jesus. There can be no serious doubt that the gospel reveals the influence of Philo, the Alexandrian Jew, who had already produced a synthesis of Hebrew and Greek thought, and who made use of the term 'Logos.' Philo combined the Greek notion of all-pervading Reason with Hebrew faith in divine Energy and Revelation, and so for him the universe, instinct with Reason, is, through the operation of the Logos, the projection and embodiment of God's will. The similarity of such teaching to that of the Prologue is unmistakable, and the substance of a Logos doctrine closely resembling that of Philo is present throughout the gospel.

(*d*) The Soteriology of the Fourth Gospel.—Philo's soteriology is relevant to the christology of the Fourth Gospel. According to Philo the Logos is the agent of revelation, manifesting himself in the theophanies of the OT and speaking through the prophets; thus it is through him that men come to a knowledge of God, escape from the tyranny of passion, and embark upon the spiritual life. Saved from ignorance and sensuality they become 'sons of God' and are possessed of immortality. We are reminded of Jn 1^{12f}, and of other passages such as 8^{32}, 'You will know the truth, and the truth will make you free.' Almost every sentence describing the work of the Logos in Jn 1 can be paralleled in Philo, but the Prologue ends with an affirmation that Philo could never have made, 'The Logos became flesh and dwelt among us, full of grace and truth,' which is the theme of the Fourth Gospel (cf W. R. Inge in *Cambridge Biblical Essays*, p. 275).

That the gospel is presented in historical form is of great significance. However deeply the author may have been indebted to Philo, his purpose was entirely different. Philo was a speculative philosopher; St. John was an evangelist, who had constantly in mind the interpretation of the life of Jesus. After the first few words he displays no further interest in the cosmic significance of the Logos, for he has no wish to write a metaphysical treatise. He is concerned to depict Jesus as sent out from the Father as speech goes out from men, the revealing Word of God, the source of 'Light' and 'Life' for all who believe. 'God so loved the world that he gave his only Son, that whoever believes in him should not perish but have eternal life' (3^{16}). Because Jesus is the incarnate Logos He is able to reveal the Father for the salvation of the world.

(*e*) Later Interpretations.—What problems are inherent in the Johannine christology the controversies of later centuries reveal. What was the relationship of the eternal Logos to the human personality? How could the Divine and the human coexist in one Person? Did the Divine or the human will predominate? There

is no reason to suppose that the author was conscious of the problem of the Two Natures in Christ. He does not argue, he affirms. The Divine power had manifested itself fully in a human person, and the glory of God had been revealed. Belief rather than intellectual understanding was required of those who would have life in his name.

It is significant that the Fourth Gospel was chiefly relied upon by those theologians who in later times tended to minimize or explain away the humanity of Christ. In the Gospel His humanity, though real, is not that of other men, and the contrast between the Jesus of the synoptists and the Christ of the Fourth Gospel is plain for all to see. His miracles are essentially 'signs' of His divinity, wrought to confirm belief rather than from motives of compassion. Not only is He omniscient (1^{48} 2^{25} 11^{11}), He is aloof and solitary, by no means the friend of publicans and sinners; and although He may call His disciples 'friends' He does so by an infinite condescension (15^{15}). Whether in life or death He is completely self-determined, His Divine dignity remains serene, and His enemies are powerless, save with His own consent (7^{30} 10^{18} 18^{6} 19^{11}). Most of all, in His speech Jesus reveals His divinity. His words are spirit and life ($6^{63, 68}$), and they have cleansing power (15^{3}). But they are not the words of the synoptic Jesus. Gone are the homely parables of the earlier gospels, gone is the simple moral teaching. His words disclose, not the ethics of the Kingdom, but the relation of the Son to the Father. They are christological.

That there is loss in St. John's subservience to christology can hardly be denied. In a sense he preserves the humanity of Jesus, but it is an ideal humanity, and the force of the human example is lost. There can be no moral struggle in His life, such as might encourage His followers in moments of temptation. There is no temptation in the wilderness, no agony in the garden, no bitter cry of dereliction on the cross. The sayings recorded by the synoptists which reveal Jesus as familiar with all the details of social and family life give place to 'vague and oracular utterances' (E. F. Scott), some of which, if authentic, might seem unduly egotistical. If the Fourth Gospel had stood alone Christ could never have become the ideal of human endeavour. Despite centuries of christological debate, it is Jesus of Nazareth, rather than the incarnate Logos, who remains the object of the Church's adoration.

But the Johannine interpretation must not be mistaken for the reality, in which St. John, like all the NT writers, had found the true revelation of God. He used the Logos doctrine as an explanation of the Divine quality that he found in Jesus; but his Lord was Jesus, not the Logos, and his grasp of the one was only partly obscured by the other. The Johannine theory of the Logos has value in providing testimony to the impression made by Jesus upon the early Church, conscious as it was of the numinous quality of His Person; but it needs to be supplemented, and indeed corrected, by the interpretations of other writers, some of whom stood nearer to the historic Christ. It may be true that it was through the Logos doctrine that the Greek world came to accept Christ, but after the early years of the 4th cent. it gave way to a more adequate conception of 'the Son.'

8. Other New Testament books.—Other books of the NT reflect the several aspects of the Church's christology in the 1st cent., but none make important original contributions. The essential elements of the faith of believers are contained in those books that we have examined. It would be a mistake to speak of a single christology underlying the whole of the NT, for Peter in Jerusalem did not speak of the incarnate Logos, St. Paul did not write of Jesus as the great High Priest of the order of Melchizedek, and St. John did not proclaim 'Jesus of Nazareth, a man attested to you by God with mighty works and wonders and signs which God did through him.' The several books reveal different types of thought and different lines of approach to the problem of interpreting the Person of Christ. Yet differences must not be exaggerated, for the NT as a whole witnesses to the great essentials of the Church's faith. Jesus was man; He was the Christ, for whose appearing the old dispensation had prepared; He was Revealer of God, Saviour and Judge of men; exalted and sharing the Father's throne He was the object of the Church's worship and devotion, and to Him the future had been delivered. He was the Lord. See also INCARNATION.

P. G.-S.

CHRONICLES I. AND II.—1. Position in Canon.—It is quite clear from linguistic and other considerations that Chron.-Ezr.-Neh. originally formed one book. As the first part of this large work dealt with a period which was already covered by Samuel and Kings, it was omitted, to begin with, in the formation of the Canon; while the latter part of the book, dealing with the ecclesiastical life of Jerusalem after the Exile, was granted a place. Only as the liturgical and ritual interest became more and more strong was it seen that Chronicles contained matter of special importance from that point of view. Hence the book was included in the Canon after Ezra and Nehemiah, which had originally formed its second and concluding portion. In the English Bible, which follows the LXX, the original order has been restored, but Chronicles is the last book in the Hebrew canon. Its Hebrew name is *Dibhrê Hayyāmîm*, *i.e.* 'the Annals.' The LXX entitled it the *Paraleipomena*, or 'things left out,' a reference to the fact that Chronicles contains much not found in the earlier narratives of Samuel and Kings. Our word 'Chronicles' is the Anglicized form of *Chronicon*, the name given to the book by Jerome in translating *Dibhrê Hayyāmîm*.

2. Aim.—The key to the understanding and estimation of Chronicles lies in a clear grasp of its aim. It is not a political and social history of Israel and Judah of the same kind as 1 and 2 Kings, but it is an interpretation of that history. It might be called a history of the holy congregation. It is, therefore, concerned with Judah, and with all that has reference to the worship and the institutions of the second Temple. This determines the Chronicler's choice of matter, and the treatment of such facts as he selects. The Northern Kingdom, politically so much more important than the kingdom of Judah, hardly comes within his range of view, and is referred to only when the narrative absolutely necessitates it. In the time of the Chronicler (see **5** below) the Samaritans believed that they were the true descendants of the Israelites of the Northern Kingdom, and that their sanctuary at Shechem was of greater importance than that of Jerusalem. The genealogies at the beginning of 1 Chronicles are intended to convince the Jews that they are the true, lineal descendants of the Chosen People of God, and have a unique office.

3. Contents.—With this clue the contents of the book are easily grouped.

(i) 1 Ch 1–9, Adam to the death of Saul. These chapters are filled mainly with genealogical tables, but even in these the ecclesiastical interest is supreme. Judah and Levi have the greatest space given to them (2^{3}–4^{23} 6).

(ii) 1 Ch 10–29, from the death of Saul to the accession of Solomon.

(iii) 2 Ch 1–9, the reign of Solomon.

(iv) 2 Ch 10–36, from the division of the kingdom down to the fall of Jerusalem, and the restoration edict of Cyrus.

The material is most carefully chosen with the object of showing the importance of Judah, the greatness of the line of David, and the unique place of the Jerusalem sanctuary. It manifests great interest in the cult of that sanctuary, in the Levites, and in the singers. The Chronicler writes much in the spirit of the Pentateuchal Document P, which makes the tabernacle built by Moses the only one until the Jerusalem Temple was built in the time of King Solomon. The singers, who are the successors of the cultic prophets of pre-exilic days, are given by the Chronicler rights and privileges which even

the Document P does not know. The Chronicler, indeed, is more interested in the Temple music than in its sacrificial rites, and believes that since the time of David the singers accompanied the armies to battle (cf *e.g.* 2 Ch 20[1-30]). A comparison of the narrative in Chronicles with the earlier narratives of Samuel and Kings will do more than anything else to convince the reader of the pragmatism of the Chronicler.

(*a*) *Omissions in Chronicles.*—The whole career of Samuel; the reign of Saul, except its close; the struggle David had to establish himself on the throne; the story of Uriah and Bathsheba; the story of Amnon and Tamar; Absalom's rebellion and David's flight; the characteristically Oriental intrigues attending Solomon's accession; his alliances with foreign women and his idolatries in later life; his struggle against disaffection and rebellion; practically the entire history of the Northern Kingdom;—all these sections are omitted, with the view of suppressing what might be held to be discreditable to the religious heroes.

(*b*) *The additions* to the narrative show how the Chronicler's thoughts ran. He gives, as we should have expected, full statistical lists (1 Ch 12); he describes at length matters that have to do with the gradual elevation of the sanctuary at Jerusalem (1 Ch 13, 15, 16); he details the ordering of the Temple ministry and the genealogies of its members (1 Ch 22–29). There is a large class of additions connected with ritual, and especially with musical matters, a fact which has led to the suggestion that the writer was perhaps one of the musicians (2 Ch 5[12f] 7[1, 3, 6] 13[8-12] 17[8f] 20[19, 21]). He so handles historical events as to make them bear out his particular theory of the working of Providence. To love God is to be blessed; to sin against God is immediately to feel the pressure of His hand; the religious meaning of particular events is pointed out to the wrong-doers by prophets of the Lord (1 Ch 10[13f], 2 Ch 12[2] 13[3-21] 15[1-15] 16[7-12] 20[37] 21[10, 16-19]). In 2 Ch 8[11] the removal of the daughter of Pharaoh, whom Solomon had married, from the city of David to the house that he had built for her, is said to have been occasioned by the house of David having become too holy because of the coming of the Ark. The compiler of Kings assigns no such reason for the removal to the new house (1 K 3[1] 7[8] 9[24]). It was a stumbling-block to the later writer that so bad a king as Manasseh should have enjoyed so long a reign, and so he is described as latterly a penitent, although Kings has no thought of any such change (cf 2 Ch 33[11-19] with 2 K 21 and Jer 15[4]).

(*c*) *Alterations* have been made in the narrative with the view of removing what seemed offensive to the later age. Kings distinctly says that Asa and Jehoshaphat did not abolish the high places, although they did what was right in the sight of the Lord (1 K 15[14], 22[43]). Such a conjunction of well-doing with idolatry is incredible to the Chronicler, so he says that the high places *were* abolished by these kings (2 Ch 14[5] 17[6]). He finds it necessary to change several narratives in the interests of the Levites, who were not assigned so important a place in matters of ritual under the monarchy as in the days when he was writing (cf 1 Ch 13[15] with 2 S 6, 2 Ch 5[4] with 1 K 8[3]). According to the original account (2 K 11), Jehoiada was assisted in his rebellion against Athaliah by the foreign bodyguard. In 2 Ch 23 the bodyguard is replaced by the Levites. The rule of the second Temple did not allow aliens to approach so near to the sacred things.

4. Historicity.—It is thus evident that Chronicles is not to be considered as history, in the sense in which we now use the word. The events of the time with which the writer deals have been treated in a particular religious interest. Some facts have been stated not simply as they were in themselves, but as they appeared to one whose vision was influenced by his theological viewpoint. Other facts have been suppressed when they interfered with the conveying of the impression that David and Solomon were almost immaculate kings. To a past age were attributed the customs and ceremonial of the days in which the writer lived. The Priests' Code was supposed to have been recognized and observed by David even before the Temple was built. Again and again an anachronism has been committed that the Levites might have the place of honour in the record. Some special features of this method of writing history are:

(*a*) *Exaggerated numbers.*—Everyone has felt difficulty with regard to these numbers. The population of Palestine in the time of its greatest prosperity may have reached 2,000,000, but it never remotely approached so high a figure before the time of the Chronicler. But we read (2 Ch 13[3, 17]) that Abijah with 400,000 men fought against Jeroboam with 800,000, and killed 500,000 of them. Asa (2 Ch 14[8]) takes the field against Zerah the Ethiopian, who has 1,000,000 men, with 300,000 men of Judah, and 280,000 of Benjamin, the smallest of the tribes, which had previously been practically wiped out by the slaying of 25,000 men (Jg 20[46]). It is said that the whole 1,000,000 Ethiopians 'fell until none remained alive' (2 Ch 14[13]), but it is explicity stated that the victory was due to the reliance of Asa on God (cf v.[11f]). When the numbers can be checked by the parallel passages in the older narrative, the tendency of the Chronicler to exaggerate is manifest. 1 Ch 18[4] 19[18] make David capture 7000 horsemen and slay 7000 chariotmen, while 2 S 8[4] 10[18] give 700 of each. According to 1 Ch 21[25], David pays 600 shekels of gold for Ornan's threshing-floor, while according to 2 S 24[24] he gives only 50 shekels of silver. David gathers together for the building of the Temple, according to 1 Ch 22[14], 100,000 talents of gold and 1,000,000 talents of silver; but, according to 1 K 10[14], the whole revenue in gold of the kingdom, in the much richer days of Solomon, was only 666 talents of gold.

(*b*) *Anachronisms* creep in to show that the writer was carrying back to that earlier day the customs and names of his own time. 1 Ch 26[18] states that one of the gates of the Temple—the first Temple—was called Parbar. There is here the double mistake of supposing that the Temple existed in David's time, and that one of the gates of the first Temple had a Persian name. 1 Ch 29[7] speaks of the coin 'daric' or 'dram' as being current in the time of David. This coin was Persian, and was current in Palestine only after the Captivity.

(*c*) *The speeches* put into the mouths of the personages have not been taken from any ancient document, but bear on every line the characteristics of the very peculiar Hebrew style of the Chronicler.

5. Date.—The text of 1 Ch 3[17-24] is uncertain and confused; the Hebrew text seems to give seven generations after Zerubbabel, but LXX gives eleven (it may be that the genealogy survived only in fragmentary form in the Chronicler's day). The Hebrew text might seem to suggest a date *c* 350 B.C., and the LXX *c* 250 B.C. Evidence as to date is clearer from Nehemiah, which, as we have seen, was originally part of Chronicles. Neh 12[11] speaks of Jaddua, who was, as we know from Josephus, a contemporary of Alexander the Great (333 B.C.). Neh 12[22] mentions the reign of Darius the Persian, *i.e.* Darius III., who reigned 336–332 B.C. A date, therefore, *c* 300–250 B.C. might seem to be indicated. The fact that Ben Sira gives a place to Nehemiah in the rôle of the heroes of the Fathers (49[13]), while he makes no mention of Ezra, has led some scholars to believe that such an omission of Ezra could never have been made by a writer of 190 B.C. if the work of the Chronicler had been before him. That is an important observation, but it may be that Ben Sira, whose interest was in wisdom, not in the cult, had little sympathy with the point of view of the Chronicler.

6. Sources.—Chronicles contains several additions to the narrative of Samuel and Kings—additions that have not been inserted because of any special ecclesiastical interest (2 Ch 11[9-12, 17, 23] 14[9-15] 20 25[6-10, 13] 26[6-15] 28[5-15]). Does the Chronicler then preserve any fresh and original tradition, or does he merely work up older material? Apart from Samuel and Kings, his

main authority was a work cited under a variety of different titles, 'the Book of the Kings of Israel and Judah' (2 Ch 27[7] 35[27] 36[8]), 'the Book of the Kings of Judah and Israel' (2 Ch 16[11], 25[26] 28[26]). This book must have contained genealogical tables (1 Ch 9[1]), as well as other particulars not mentioned in any book that has come down to us (2 Ch 27[7] 33[18]). Another source is the 'Midrash of the Book of Kings' (2 Ch 24[27]). A *midrash* was an exposition of the religious lessons that could be drawn from a historical work; Chronicles itself is an excellent instance of a *midrash*, and this earlier *midrash* may have been the writer's model. He frequently refers to writings quoted under the name of prophets: 1 Ch 29[29] (Samuel, Nathan, and Gad), 2 Ch 9[29] (Nathan, Ahijah, and Iddo), 12[15] (Shemaiah and Iddo), 13[22] (Iddo), 26[22] (Isaiah). As he never cites at the same time the 'Book of the Kings of Israel and Judah,' it is probable that these passages, connected with the various prophets, were only excerpts from that book. From the extracts that Chronicles preserves of this book it is probable that it was post-exilic, unless indeed the Chronicler in using it has thoroughly transformed its style and diction into his own.

Chronicles, then, so far from being a fresh source for the period of which it treats, is a *midrash* of Jewish order. The book is evidence not only of the condition of things under the monarchy, but of the religious belief and ceremonial observances of a time when national life had ceased, and when the people's interest was confined to the worship of the Temple. R. B. T.—J. Ma.

CHRONOLOGY OF THE NEW TESTAMENT.—In this article it is proposed first to examine the books of the NT, so as to determine as far as possible their relative chronology—that is, the length of time between the principal events narrated; and then to investigate the points of contact between the NT and secular history, and thus to arrive at the probable dates of the incidents in the former. It must, however, be remembered that the Gospels and Acts are not biographies or histories in the modern sense of the terms. The writers had a religious object; they wished to teach contemporary Christians to believe (Jn 20[31]), and were not careful to chronicle dates for the benefit of posterity. Indeed it may be questioned if the precise recording of history formed any part of their purpose in writing, or that absolute historicity was then a generally held idea. They unhesitatingly adopt legend and popular tale (as in Mk 6[17–29]). Even Lk 3[1f] is only a general chronological datum—there is, for example, no mention of the month. As Sir William Ramsay pointed out (*St. Paul the Traveller and Roman Citizen*[7], 1903, p. 18), the lack of any chronological sense was a fault of the age; Tacitus in his *Agricola* is no better (until the last paragraph) than the sacred writers. It must also be noted that reckoning in ancient times was inclusive. Thus 'three years after' (Gal 1[18]) means 'in the third year after' (cf Ac 19[8, 10] with 20[31]); 'three days and three nights' (Mt 12[40]) means 'from to-day to the day after to-morrow' (Mt 17[23]). Cf also Gn 42[17f].

I. Relative Chronology: Internal Evidence.—**1. Interval between our Lord's birth and baptism.**—This is stated in Lk 3[23] to have been 'about 30 years,' but the exact interval is uncertain. The RV translates: 'Jesus himself, when he began [literally was beginning] to teach [cf Mk 4[1]], was about thirty years of age;' and so most moderns, translate it, though the word 'beginning,' standing by itself, is awkward. It perhaps denotes the real commencement of the Gospel, the chapters on the Birth and Childhood being introductory (Plummer). The difficulty of the phrase was felt at an early date, for the Old Syriac and the Peshitta Syriac omit the participle altogether, and Clement of Alexandria (*Strom*, i. 21) has merely 'Jesus was coming to his baptism, being about,' etc. The AV, following Irenaeus and also the Valentinians whom he was opposing, renders: 'began to be about 30 years of age,' which can mean only that Jesus was 29 years old. Irenaeus (*Haer.* II. xxii. 4 f). says that Jesus was baptized 'being 30 years old,' having 'not yet completed his 30th year,' He 'then possessing the full age of a teacher.' The translation of AV is judged to be grammatically impossible, though it is odd that the Greek-speaking Irenaeus did not discover the fact, unless we are to suppose that his Latin translator misrepresents him. Let us, then, take the RSV translation: 'Jesus, when he began his ministry, was about thirty years of age.' But what is the meaning of 'about 30 years'? Turner (article 'Chronology of NT' in Hastings' *DB*), Plummer (*St. Luke, in loc.*), and others think that any age from 28 to 32 would suit; but Ramsay, who remarks that St. Luke's authority for his early chapters was clearly a very good one, and that he could not have been ignorant of the real age, thinks that the phrase must mean 30 plus or minus a few months. There seems to be some doubt as to the age when a Levite began his ministry at this time, as the age had varied; but we may follow Irenaeus in thinking that 30 was the full age when a public teacher began his work. On this point, then, internal evidence by itself leaves us a latitude of some little time, whether of a few months or even of a few years.

2. Duration of the ministry.—Very divergent views have been held on this subject. (*a*) Clement of Alexandria (*loc. cit.*), and other 2nd and 3rd cent. Fathers, the *Clementine Homilies* (xvii. 19, 'a whole year'), and the Valentinians (quoted by Irenaeus, II. xxii. 1), applying the phrase, 'the acceptable year of the Lord' (Is 61[2]; cf Lk 4[18f]) literally to the ministry, made it last for one year only. The Valentinians believed that Jesus was baptized at the beginning, and died at the end, of His 30th year—a view which suggests astral interpretations. A one-year ministry was also advocated by von Soden (*E Bi*, article 'Chronology') and by Hort (see below). The latter excises 'the passover' from the text of Jn 6[4]. This view is said to be that of the Synoptists, who, however, give hardly any indications of the passing of time. (*b*) The other extreme is found in Irenaeus (*loc. cit.*), who held, as against the Valentinians, that the ministry lasted for more than ten years. He takes the feast of Jn 5[1] to be a Passover, but does not mention that of Jn 6[4]. He considers, however, that the Passovers mentioned in John are not exclusive; that Jesus was a little less than 30 years old at His baptism, and over 40 when He died. This appears (he says) from Jn 8[56f], which indicates one who had passed the age of 40; and moreover, Jesus, who came to save all ages, must have 'passed through every age,' and in the decade from 40 to 50 'a man begins to decline towards old age.' He declares that this tradition came from 'John the disciple of the Lord' through 'those who were conversant in Asia with' him—*i.e.* probably Papias; and that the same account had been received from other disciples. But here Irenaeus almost certainly makes a blunder. For a 3rd cent. tradition that Jesus was born A.D. 9, was baptized A.D. 46, and died A.D. 58 at the age of 49, see Chapman in *JThSt* viii, 590 (July, 1907). (*c*) Eusebius (*HE* i. 10), followed as to his results provisionally by Ramsay (*Was Christ born at Bethlehem*?[3], p. 212 f.), makes the ministry last over three years ('not quite four full years'), and this till lately was the common view. Melito (*c* A.D. 165) speaks of Jesus working miracles for three years after His baptism (*Ante-Nic. Chr. Lib.* xxii, p. 135). (*d*) Origen and others followed by Turner (*op. cit.* p. 409 f), Sanday (article 'Jesus Christ' in Hastings' *DB*, p. 610 ff), and Hitchcock (article 'Dates' in Hastings' *DCG*, p. 415 f), allow a little more than two years for the ministry ('Judas did not spend even three years with Jesus,' *c. Cels.* ii. 12).

Indications of a ministry of more than a single year have been found in the Synoptics; *e.g.* Mk 2[23] (harvest), 6[39] (spring; 'green grass')—for the length of the journeys of 6[56]–10[32] shows that the spring of 6[39] could not be that of the Crucifixion. Thus Mark, if we accept his arrangement of the material as chronological, implies at least a two years' ministry. In Luke also

have been seen traces of three periods in the ministry: (1) 3^{21}–4^{30}, the beginning of the ministry in Nazareth and Galilee, briefly recorded—but this is clearly a 'programmatic' revision of Mk 6$^{1-6}$; (2) 4^{31}–9^{50}, preaching in Galilee and the North, related at length; (3) 9^{51}–end, preaching in Central Palestine as far as Jerusalem. Each one of these 'periods' has been taken to represent a year. But Luke's arrangement of his sources is not a sound basis for a three-year chronology of the ministry of Jesus.

In John we have several indications of time: 2$^{13, 23}$ (Passover), 4^{35} (four months before harvest; harvest near), 5^{1} ('a feast' or 'the feast'), 6^{4} (Passover, but see below), 7^{2} (Tabernacles, autumn), 10^{22} (Dedication, winter). In two cases (5^{1} 6^{4}) there is a question of text; in 5^{1} the reading 'a feast' (RSV) is somewhat better attested, and is preferable on internal grounds, for 'the feast' might mean either Passover or Tabernacles, and since there would be this doubt, the phrase 'the feast' is an unlikely one. If so, we cannot use 5^{1} as an indication of time, as any minor feast would suit it. 'It seems that John introduces a feast simply in order to account for the presence of Jesus in Jerusalem' (C. K. Barrett, Comm. *ad loc.*). In 6^{4} Hort excises 'the passover' as 'perhaps a primitive interpolation' (Westcott-Hort, *NT in Greek, Int.*, App. pp. 77 ff). But this is against all MSS and Versions and rests only on the omission by Irenaeus (who, however, merely enumerates the Passovers when Jesus went up to Jerusalem; yet the mention of 6^{4} would have added to his argument), and probably on Origen (for him and for others adduced, see Turner *op. cit.* p. 408); on internal grounds the omission is very improbable, and does not in reality reconcile John and the Synoptics, for the latter when closely examined do, as we have seen, imply more than a single year's ministry. The note of time in Jn 4^{35} seems to point to (say) January ('There are yet four months, then comes the harvest'), while the spiritual harvest was already ripe ('the fields are already white for harvest'), though Origen and others less probably take the former clause to refer to the spiritual, the latter to the material, harvest, which lasted from the middle of April to the end of May. We may probably conclude then that in the ministry, as related in John, there were not fewer than three Passovers, and that it therefore lasted (at least) rather more than two years. But did the Fourth Evangelist mention all the Passovers of the ministry? Irenaeus thought that he mentioned only some of them; and though his chronology is clearly wrong, and based (as was that of his opponents) on a fanciful exegesis, some scholars have held that in this respect he may to a very limited extent be right. Turner, on the other hand, considered that the enumeration in John is exclusive, and that the notes of time in that Gospel were intended to correct a false chronology deduced from the Synoptics. But it now appears doubtful if John presupposed any knowledge of the Synoptics on the part of his readers. On the whole we can say only that the choice apparently lies between a ministry of rather over two years, and one of rather over three years; and that the probability of the former appears to be slightly the greater. But it must be noted that more recent studies of the Fourth Gospel have tended to invalidate the whole appeal to its (admittedly uncertain) chronology. For example, have considerations of use of the evangelic materials in the Christian church (in worship and preaching) influenced their location in the Gospel? (See JOHN, GOSPEL OF.) And is John more interested in the theological significance of the Jewish festivals, and their Christian reinterpretation, than in their chronological sequence or historical date in the ministry of Jesus?

3. The Interval between the Resurrection and the Conversion of St. Paul.—There is no positive internal evidence as to the length of this period. Such a general statement as the one in Ac 2^{46f} may imply either a long or a short time. We must include in this period the spread of the Church among the Hellenists, and as far afield as Damascus and the coastal plain; the various incidents recalled from the early days, possibly reported in more than one source, written or oral; the election of the Seven, and the death of Stephen, followed closely by St. Paul's conversion. For this period Ramsay allowed 2½ to 4 years, Harnack less than one year; but these views are no longer widely held (see II). It is quite probable that in the early chapters of Acts the author had not the same exact information that he had for St. Paul's travels, or even for his Gospel (see Lk 1^{2f}).

4. St. Paul's missionary career.—The relative chronology of St. Paul's Christian life may be determined by a study of Acts combined with Gal 1^{18} 2^{1}. Indications of time are found in Ac 11^{26} 18^{11} 19$^{8, 10}$ 20$^{6, 16, 31}$ 21$^{1-5, 27}$ 24$^{1, 11, 27}$ 25$^{1, 6}$ 27$^{9, 27}$ 28$^{7, 11-14, 17, 30}$. With these data we may endeavour to reconstruct the chronology; but there is room for uncertainty (1) as to whether the visit to Jerusalem in Gal 2^{1} was that of Ac 11^{30} or that of Ac 15^{4}, and whether the 'three years' and 'fourteen years' of Gal 1^{18} 2^{1} are consecutive (so Lightfoot, Rackham), or concurrent (so Ramsay, Turner, Harnack); (2) as to the length of the First Missionary Journey; and (3) as to possible later journeys after the Roman imprisonment. If the 'three years' and 'fourteen years' are consecutive, a total of about 16 years is required for the interval between the conversion and the visit of Gal 2^{1}. But as the interval at Tarsus is indeterminate, and the First Journey may have been anything from one to three years, all systems of relative chronology can be made to agree, except in small details, by shortening or lengthening these periods (see II, and article PAUL).

The following table, in which the year of St. Paul's conversion is taken as 1, gives the various events as set forth in the traditional (19th and early 20th cent.) chronology. Ramsay's calculation is taken as a basis, and the differences of opinion are noted in brackets [H=Harnack, T=Turner, R=Ramsay, L=Lightfoot]. For more recent reconstructions, see II, 8–12.

1, 2. Conversion near Damascus, Ac 9^{3} 22^{5} 26^{12}; retirement to Arabia, Gal 1^{17}; preaching in Damascus, Ac 9$^{20-22}$ (?), Gal 1^{17}.

3. First visit to Jerusalem, Ac 9^{26}, Gal 1^{18}, 'three years after' his conversion.

4–11. At Tarsus and in Syria-Cilicia, Ac 9^{30}, Gal 1^{21} [so HR, but T gives two years less, L three years less].

12. To Antioch with Barnabas, Ac 11^{26}.

13. Second visit to Jerusalem, with alms 11^{30} [=Gal 2^{1}, R?].

14–16. First Missionary Journey, to Cyprus, 13^{4}; Pamphylia, and Southern Galatia (Pisidian Antioch, 13^{14}; Iconium, 13^{51}; Lystra, 14^{6}; Derbe, 14^{20}), and back by Attalia to Antioch, 14^{26} [so HR: TL give one year less].

17. Apostolic Council and third visit to Jerusalem, 15^{4} [=Gal 2^{1}, TL?; so Sanday and most commentators].

18–20. Second Missionary Journey, from Antioch through Syria-Cilicia to Derbe and Lystra, Ac 15^{41} 16^{1}; through the 'Phrygo-Galatic' region of the province Galatia to Troas, 16$^{6-8}$; to Macedonia, 16^{11}; Athens, 17^{15}; and Corinth, 18^{1}, where eighteen months are spent; thence by sea to Ephesus, 18^{19}; Jerusalem (fourth visit), 18^{22}; and Antioch, where 'some time' is spent, 18^{23}.

21–24. Third Missionary Journey, from Antioch by the 'Galatic region' and the 'Phrygian region,' 18^{23}, to Ephesus, 19^{1}, where two years and three months are spent, 19$^{8, 10}$; by Troas 2 Co 2^{12}, to Macedonia, Ac 20^{1}; and Corinth, 20^{2} (see 2 Co 13^{1}), where three months are spent; thence back by Macedonia to Troas, Miletus, and Caesarea, 20$^{4f. 15}$ 21^{8}; fifth visit to Jerusalem, 21^{17}; and arrest, 21^{33}; imprisonment at Caesarea, 23^{33}.

25. In Caesarea, 24^{27}.

26. Departure for Rome, autumn, 27^{1}; shipwreck off Malta, 28^{1}.

27. Arrival at Rome, 28[16].
28. (end) or 29 (early). Acquittal (?).
29–34. Later journeys (?) and death [so R; L gives one year less, T two years less].

II. External Data: Points of Contact with General History.—It will be useful to give the dates of the earlier emperors, and those of the procurators of Judaea. Some of the latter dates are approximate only; information as to them is derived from Josephus' *Antiquities*, and to some extent from his *Jewish War* (*BJ*).

Roman Emperors

Augustus	[31 B.C. (*a*)]–A.D. 14 (Aug. 19)
Tiberius	14–37 (Mar. 16)
Caligula (Gaius)	37–41 (Jan. 24)
Claudius	41–54 (Oct. 13)
Nero	54–68
Galba	68–69
Otho	69
Vitellius	69
Vespasian	69–79
Titus	79–81
Domitian	81–96
Nerva	96–98
Trajan	98–117
Hadrian	117–138
Antoninus Pius	138–161
Marcus Aurelius	161–180
Commodus	180–192
Septimius Severus	193–211

(*a*) *i.e.* the battle of Actium; Julius Caesar died 44 B.C., and Eusebius dates Augustus' reign from that year (*HE* i. 5, 9), as does also Irenaeus (*Haer.* III. xxi. 3).

Rulers of Judaea

Herod the Great, king (*a*)	37–4 B.C.
Archelaus, ethnarch (*b*)	4 B.C.–A.D. 6
Procurators: Coponius (*c*)	A.D. 6–9?
Marcus Ambivius (*d*)	9–12?
Annius Rufus (*e*)	12–15?
Valerius Gratus (*f*)	15–26
Pontius Pilate (*g*)	26–36
Marcellus (*h*)	36–37?
Marullus (*i*)	37–41?
Herod Agrippa, king (*j*)	41–44
Procurators: Cuspius Fadus (*k*)	44–46?
Tiberius Alexander (*l*)	46?–48
Cumanus (*m*)	48–52
Antonius Felix (*n*)	52–58 or 59?
Porcius Festus (*o*)	59?–61
Albinus (*p*)	61–65
Gessius Florus (*q*)	65–66

(*a*) He had been king *de jure* since 40 B.C. (*b*) Josephus, *Ant.* XVII. xi. 4 [317], xiii. 2 [342 ff]); he reigned over nine years. (*c*) *ib.*; XVIII. i. 1 [2]; he arrived with Quirinius at the time of the taxing, Ac 5[37]. (*d*) *ib.* ii. 2 [31]. (*e*) *ib.* [32]; in his time 'the second emperor of the Romans [Augustus] died.' (*f*) *ib.*; sent by Tiberius; he ruled eleven years. (*g*) *ib.* and iv. 2 [88 ff]; he ruled ten years and was deposed and sent to Rome, arriving there just after Tiberius' death. (*h*) *ib.* iv. 2 [89]; sent temporarily by Vitellius, governor of Syria. (*i*) *ib.* vi. 10 [237]; sent by Caligula on his accession. (*j*) *ib.* and XIX. v. 1 [274]; made king by Claudius on his accession, having been previously given the tetrarchies of Philip and Lysanias by Caligula. (*k*) *ib.* XIX. ix. 2 [363]; sent by Claudius on Agrippa's death. (*l*) *ib.* XX. v. 2 [100 ff]. (*m*) *ib.* (*n*) *ib.* VII. 1 [137 ff], VIII. 9 [182]; brother of Pallas; sent by Claudius; in his time was the rebellion of one Theudas; recalled by Nero. (*o*) *ib.* VIII. 9 [182 ff]. (*p*) *ib.* IX. 1 [197 ff]; sent by Nero on Festus' death; while he was on his way to Judaea, 'the brother of Jesus who was called Christ, whose name was James,' was stoned by the Jews [200]. (*q*) *ib.* XI. 1 [252 ff]; the last procurator; he was appointed through the influence of Poppaea; his bad government precipitated the Jewish War.—For the procurators see also *BJ* II. VIII. 1 [117 ff]; IX. 4 [175 ff]; XII. 1 f [223 ff]; 8 [247 ff]; XIII. 7 [266 ff]; XIV. 1 f [271 ff], etc.

1. Date of the Nativity.—Early Christian chronology is in such confusion that it is very difficult to assign exact dates to the various events, and the early Fathers give us little or no guidance. Clement of Alexandria (*Strom.* i. 21) says that our Lord was born 194 years, 1 month, 13 days, before the death of Commodus [A.D. 192], in the 28th year of Augustus; but his dating of Commodus is wrong (see **4** below). The calculation of our Christian era, due to Dionysius Exiguus in the 6th cent., is obviously wrong by several years. Even the dating by the regnal years of emperors is open to considerable doubt, as it is not always certain from what epoch calculation is made; *e.g.* whether from the death of the predecessor, or from the association with the predecessor as colleague. For the birth of Christ indications have been found in the death of Herod, the Lucan census, and the Star of the Magi.

(*a*) *Death of Herod.*—This probably took place in the spring (March) of 4 B.C. His son Archelaus (Mt 2[22]), who succeeded him in part of his dominions (Judaea, Samaria Idumaea) with the title of ethnarch, was deposed (Dio Cassius lv. 27) in the consulship of Lepidus and Arruntius (A.D. 6), either in his ninth (so Josephus *BJ.* II. vii. 3 [111 ff]) or in his tenth year (so *Ant.* XVII. xiii. 2 [342]; and the *Life*, §1, speaks of his tenth year). This would give the above dates for Herod's death; for various considerations which make 4 B.C. the preferable date, see Turner, *op. cit.* p. 404. We must then place our Lord's birth at least one or two years before this date, for Herod massacred 'all the male children . . . who were two years old or under' (Mt 2[16]), and we have to allow for the sojourn in Egypt. Luke apparently assumed that both John and Jesus were born under Herod. (*b*) *The Lucan census* (Lk 2[1ff]) is too uncertain to use as a positive datum; see articles Luke-Acts, Quirinius, and modern commentaries, *e.g.* Creed, *St. Luke*, 28 ff. (*c*) *The Magi.* The astronomer Johann Kepler calculated the date of the Nativity from a conjunction of planets, which he believed the 'star in the east' to be. (See Star of the Magi.) But it is impossible to build chronological results on such a hypothetical basis.

The date arrived at by Ramsay from these considerations was 6 B.C. (summer); by Turner, 6 B.C. (spring), or 7 B.C. But these are still not absolutely certain dates. We must remain in ignorance of the day and month. The calculations which give December 25 and January 6 are both based on fanciful exposition and a wrong date for the Crucifixion, and were involved in the transition from Hellenistic paganism to Christianity in the 3rd and 4th centuries.

2. The Baptism of Our Lord.—According to Lk 3[1], the Baptist began to preach in the fifteenth year of Tiberius, Pontius Pilate being Procurator of Judaea. Eusebius (*HE* i. 10) says that Christ was baptized in the fourth year of Pilate's governorship, and (*HE* i. 9) that Pilate was appointed 'about the twelfth year of the reign of Tiberius'; the latter statement is quoted from Josephus (*Ant.* XVIII. ii. 2 [35]), but the former seems to be Eusebius' own deduction from St. Luke. But Pilate cannot have reached Palestine before A.D. 26 or 27, as his ten years ended shortly before Tiberius' death in A.D. 37, and no date later than A.D. 27 is possible for our Lord's baptism, if we take into account the date of the Nativity and St. Luke's statement of our Lord's age—though 'about thirty' may be only approximate. It is probable, therefore, that Pilate's accession to office and John's appearance as a preacher both belong to the same year, say A.D. 26. Does this, however, suit St. Luke's phrase, 'the 15th year of the reign ['hegemony'] of Tiberius,' for that is the exact phrase? The fifteenth year from the death of Augustus would be August A.D. 28 to August A.D. 29. Ramsay and others supposed that 'the reign of Tiberius' was dated from the granting to him by Augustus of a share in the government of the provinces, just before he celebrated his triumph over

CHRONOLOGY OF THE NT

the people of Pannonia and Dalmatia, *i.e.* January 16, A.D. 12; and this would bring us to *c* A.D. 25–26. This system of counting years is not found elsewhere, but it is quite a possible one. Turner inclined to the same supposition. Several more recent writers incline to take the fifteenth year to mean A.D. 28. Lake favoured 27 (*BC* v. 467), Goguel 27–28 or 28–29 (*Vie de Jésus*, 206).

3. The rebuilding of the Temple.—In Jn 2^{20}, at a Passover not long after the Baptism, the Jews say that the Temple had been forty-six years in building, which, since the Temple was hardly completed at the outbreak of the War (Josephus, *Ant.* XX. IX. 7 [219 ff]), can only mean that the rebuilding had begun forty-six years before the Passover in question. But this rebuilding began in Herod's eighteenth year *de facto* (from 37 B.C., not 40; *ib.* XV. XI. 1 [380]; for the computation of *BJ* I. XXI. 1 [401], see Turner, p. 405); *i.e.* the Passover of 19 B.C. would be that of the first year of the rebuilding, and therefore the Passover of A.D. 27 that of the forty-sixth year (cf Goguel, p. 210). This would agree with the result already reached.

4. Date of the Crucifixion.—The Fathers seem to have known nothing certainly as to the exact year of our Lord's death. Clement of Alexandria (*loc. cit.*), who believed in a one-year ministry, gives the sixteenth year of Tiberius, forty-two and a half years before the Destruction of Jerusalem (this would be A.D. 28), which was 128 years, 10 months, 3 days, before the death of Commodus (this would make the latter seven years too late). A common tradition (Tertullian, *adv. Jud.* 8) assigns the Crucifixion to the consulship of L. Rubellius Geminus and C. Fifius (?) Geminus—Hippolytus (*in Dan.* iv.) and the *Acts of Pilate* give the names as Rufus and Rubellio,—*i.e.* A.D. 29, or possibly A.D. 28. The latest possible year is A.D. 33 (so Eusebius, *HE* i. 10), for Josephus (*Ant.* XVIII. iv. 3 [90], 6 [106]) relates that Caiaphas was deposed just before he tells us of the death of Herod Philip, which occurred in the twentieth year of Tiberius, *i.e.* A. D. 33–34, reckoning from Augustus' death; Josephus' order has every appearance of being chronological.

Now, it is not certain on which day of the month Nisan the Friday of the Passion fell. We must put aside Westcott's suggestion that our Lord died on a Thursday, as contradicting entirely the Eastern idea of 'the third day' and 'after three days' (see above). But the Synoptics would suggest that our Lord ate the Passover with the disciples on 14th Nisan, and died on the 15th, while John would lead us to suppose that He died on 14th Nisan at the time of the killing of the lambs. The determination of this difficult question will only affect the chronological investigation if in a possible year of the Passion only Nisan 15 or only Nisan 14 can positively be said to have fallen on a Friday. But there is some uncertainty in the reckoning of Nisan. The Jewish months were lunar, and (in early times at least) the first day of the month was not that of the true new moon, but that on which it was first visible. This would be some thirty hours later than the true new moon. But it seems certain that the Jews at the time of the Gospel narrative had some sort of calendrical rules or some rough cycle to determine the first day of a lunar month; otherwise the Jews of the Dispersion would never have been sure of observing the Passover all on the same day, and the difference of a cloudy or of a bright sky on a particular day would introduce confusion. Thus we have to exercise great caution. (The theory that various calendars were in use in 1st cent. Palestine, and that the Galilaeans may have celebrated the Passover on a different day from the Judaeans, is difficult to accept.) A table of the true new moons, and of the days when the moon may be presumed to have been first visible, shows that in A.D. 27, 30, 33, 34, one or other of the two days Nisan 14 and 15 might have fallen on a Friday. But A.D. 29, which has the best traditional support, is also calendrically possible. Taking the equinox as March 21, Nisan 14 that year would be Sunday, April 18; the moon would have been first visible on Monday, April 4. But the equinox was not then, as now, accurately determined, and Turner (*op. cit.* p. 411 f) gave an argument for believing that Nisan in A.D. 29 was really the month before. In that case Nisan 14 would fall on one of the three days March 17–19, of which March 18 was a Friday. Thus A.D. 29 is admissible, and the choice almost certainly lies between it and A.D. 30; for A.D. 33 or 34 is hard to fit in with the calculation as to the Nativity, and no doubt that year was selected because of the dating of the 'fifteenth year' of Lk 3^1 from the death of Augustus. Of the two years, then, A.D. 30 is chosen by Lightfoot, Wieseler, Salmon, Goguel, and others; A.D. 29 by Turner, Ramsay, Sanday, Lake, and other more recent writers—though the statement that the crucifixion took place 'the day before the Sabbath' (Friday) is 'the one really certain fact' in the chronology *BC*, v, 467). Of the days of the month, Nisan 14 is upheld by Claudius Apollinarius (*c* A.D. 160), Clement of Alexandria, Hippolytus, Tertullian, Julius Africanus; and by many moderns, *e.g.* Sanday and Westcott. Nisan 15 is supported by Origen, pseudo-Cyprian, Ambrose, Chrysostom; and in modern times by Edersheim, Lewin, and others. But the choice between these days should be determined by internal evidence of the Gospels rather than by chronological investigation, which is too uncertain to be trustworthy.

5. Aretas and the occupation of Damascus.—Most of the chronological data in the NT are found in Acts, which also provides the most serious chronological problems, chiefly in the correlation of its data with the Pauline epistles. Ac 1–8 contains no references to contemporary history, such as might enable us to fix the date of the events recorded there. Quite possibly these chapters cover a more extended period than has often been assumed. The conversion of Paul (9^{1-22}) can scarcely have taken place within a year or two of the Crucifixion, and it is not unlikely that it took place late in the A.D. 30's, rather than early. The reference to the Nabataean King Aretas (Häritha IV.), in Paul's own account of his flight from Damascus (2 Co $11^{32\pi}$; cf Ac $9^{23\pi}$) requires a date before A.D. 40, when Aretas died. It is not improbable that Paul's flight took place betwen A.D. 37 and 40, as the emperor Gaius presented Damascus to the Nabataeans in A.D. 37. If so, his conversion must have taken place shortly (*i.e.* some months) before a date between A.D. 37 and 40—*i.e.* in A.D. 37, 38, or 39.

6. The world-wide famine under Claudius.—This is described (11^{28}) as the background of the first collection for the relief of the Church in Jerusalem (presumably in A.D. 44). But it is a question if this can be identified with any particular year. Tacitus (*Ann.* xii. 43) describes a wide scarcity in the year A.D. 51. Suetonius (*Claudius* 18) describes a similar scarcity, which reduced the grain-tribute sent to Rome, but he does not give any year. Other ancient writers give various dates, from A.D. 48–50 (Claudius reigned A.D. 41–54); it is probable that there were repeated local crises during this period, rather than one year of universal famine. If the reference is chiefly to famine in Palestine (*i.e.* the province of Judaea), with only a background of partial but recurrent scarcity on a world-scale, we may assume that the date must have been A.D. 46–48 (see Jos. *Ant.* XX. V. 2 [101]; cf Ernst Haenchen, *Die Apostelgeschichte*, 1956, pp. 52 f; K. Lake in *Beginnings of Christianity*, vol V, 1933, p. 455). But the significance of this date is only general: the fulfilment of a prophecy, and the reason for the collection at Antioch of a fund for Jerusalem. There is no exact correlation.

7. The Death of Herod Agrippa I.—Another datum in Acts is the death of Herod Agrippa I. (12^{23}). This was early in A.D. 44 (probably March 10), after a reign of seven years during which his realm had grown to include most of Palestine. The use made of this date in Acts is homiletical and apologetic; the theme is the one frequent in ancient Jewish and early Christian literature, 'the deaths of the persecutors.' Hence the relevance of the story, for the author of Acts, lies in the manner of the king's death, after persecuting the apostles (12^{1-5})

and accepting a blasphemous acclamation by the mob (12^{22}), rather than its exact date.

8. Paul's Journeys.—The identification of Paul's journeys as described in Gal 1^{15}–2^{10} with those in Acts is possible on three alternative hypotheses (see Haenchen, 56 f): (1) Ac 15^{2ff}=Gal 2^{1ff}. In this case, Paul did not mention his visit to Jerusalem described in Ac 11^{27ff}, as it had nothing to do with his 'dependence' on the Apostles and elders there. (2) Ac 11^{27ff}=Gal 2^{1ff}. If so, the date of the Epistle to Galatians preceded the Apostolic Council (Ac 15), perhaps by some years, as Ramsay and Plooij held, if the journey in Gal 2^{1ff} took place in A.D. 46. (This was Lake's date for the Council: *BC*, 470.) But the Council may have been held even later, *e.g.* in A.D. 48 (Haenchen), and it has perhaps been idealized, as an ecumenical body issuing a decree affecting the whole Church (16^{4}), whereas its authority was really limited to Palestine, Syria, and Cilicia (15^{23}; cf M. Dibelius, *Studies in Acts*, 1956, p. 99). (3) Ac 11^{27ff} and 15^{2ff} are really two variant accounts of the same journey, and this is the one to which Paul referred in Gal 2^{1ff}. If so, the Apostolic Council must have been held in A.D. 43 or 44. But this would set Paul's conversion back seventeen years (Gal 1^{18}, 3 years + Gal 2^{1}, 14 years) to A.D. 27, which is impossible. (Lake's early proposal to read 'four' for 'fourteen' is improbable.) Even taking the minimal or inclusive reckoning, often used in antiquity, 2+13=15 years is equally impossible to correlate with A.D. 43 or 44. A further uncertainty centres in the date A.D. 43–44; if the action or the authority of the council has been idealized by the author of Acts, he may have pushed it back too far in time (cf the 'programmatic' dating of Jesus' visit to Nazareth in the gospel, Lk 4$^{16-30}$), and it really belonged in A.D. 48—or later. The fact that Paul in writing Galatians totally disregarded the apostolic decree, taken with the fact that his experience in Damascus (Ac 9) presupposes the settled existence of the Church in that city, and also with the fact that his conversion was a surprise to 'the churches of Christ in Judea' (Gal 1^{22}), implies (*a*) that his conversion took place somewhat later than the above chronology assumes, and (*b*) that the date of the Council was considerably later than the author of Acts represents.

9. Sergius Paulus.—The reference to the Procurator Sergius Paulus in Ac 13 has been viewed as an additional chronological datum; but unfortunately the ancient sources do not enable us to fix a date for his term of office. (Lake favours a date *c* A.D. 45.)

10. The expulsion of the Jews from Rome in the time of Claudius (Ac 18^{1f}) is mentioned by Suetonius (*Claudius* 25), but it may have been no more than the expulsion of those guilty of causing a disturbance of the peace. The leader named, one *Chrēstus*, has been supposed to refer to Christ (cf Tacitus, *Ann.* xv. 44); but it is more likely that the word was taken as a Greek *nomen proprium* meaning 'gentle,' 'honest,' or 'good.' It is not, therefore, a reference to Christians in Rome, nor to all Jews in the capital. The date of the riot and its suppression was not improbably *c* A.D. 49.

11. Gallio.—The most important of all chronological data in Acts is in 18$^{12-17}$, the Proconsulship of Gallio, brother of the philosopher Seneca. The famous inscription found at Delphi (see illustration in Deissmann's *Paul*; text in his *App.* and also in *BC* v., pp. 460–64; Dittenberger, *Sylloge Inscr. Gr.*^{3}, II. 801) describes him as appointed Proconsul of Achaia at the 26th acclamation of Claudius as Emperor. This probably took place some time between January 25 and August 1 in the year A.D. 52 (possibly 51). Gallio's term of office (if limited to one year) probably began May 1, 52 (or possibly 51) and terminated twelve months later. Ac 18^{12} does not state that the charge against Paul was made as soon as Gallio arrived; nor does 18^{18} state how much longer Paul remained in Corinth after the incident. Although we cannot be sure of the year, whether A.D. 51 or 52, a difference as slight as this, at a distance of over nineteen centuries, is excellent chronological reckoning, and we may say that the fortunate discovery of the fragmentary inscription at Delphi has provided one of the main anchors of the whole system of NT chronology.

It is possible that the conference which Acts describes as occurring on Paul's visit to Jerusalem in 15^{2ff} actually occurred on the visit briefly mentioned in 18^{21f}. If so, the chronology of Acts and of the life of Paul fit together somewhat more loosely—and more comfortably. We are not then driven to force identifications which do not really come together, and we can allow more time for the growth and expansion of the Church, for the spread of ideas and practices, doctrinal and charitable, and for the maturing of Paul's own thought as reflected in his epistles. It is clear from the location of the narrative in Acts (*i.e.* in ch. 9) that the author did not think Paul's conversion took place immediately after the Resurrection, but only some years later. (Cf 1 Co 15^{8}, where *ektrōma* means 'untimely,' not 'too soon,' *i.e.* as an abortion; see Liddell and Scott, *s.v.*, and reff.) On this hypothesis, as advocated by John Knox (see his *Chapters in a Life of Paul*, 1950) and others, Paul's conversion must have occurred in A.D. 37, his first visit to Jerusalem in A.D. 40, his missionary work in Syria, Anatolia, Macedonia, and Greece in A.D. 40–51 (with no long blank period of seven or eight years in Cilicia prior to the year in Antioch, Ac 9^{30}–11^{25f}), his second visit to Jerusalem in A.D. 51, his collection of funds in Greece and Asia in A.D. 51–52, and finally his journey to Jerusalem to deliver the fund and his arrest in the Temple in A.D. 53. (Cf Haenchen, pp. 63–69.)

Paul's transfer to Caesarea for trial by the Procurator Felix (Ac 23^{23ff}), and his two years' imprisonment there (24^{27}) followed by his trial before Festus and his appeal to Caesar must have transpired during the years A.D. 53–55 or 55–57, depending upon the chronology adopted for the preceding events. (Jülicher, *Einl.*^{7}, pp. 40 ff, even preferred A.D. 58–60.) According to Tacitus (*Ann.* xii. 54), Felix had 'long since' been Procurator of Judaea in the year A.D. 52; but this is contradicted by Josephus (*War* II. xii. 8 [247], *Ant.* XX. vii. 1 [137]), whose narrative has first claim to acceptance. It is not improbable that Felix arrived in Palestine not earlier than the summer of A.D. 53. If so, his two years in office ran from A.D. 53–55, when he was succeeded (in the summer of A.D. 55) by Festus. Paul's trial probably took place during the summer of A.D. 55 (see Ac 25$^{1, 6, 13}$), and his departure for Rome the following autumn (27^{5}); his arrival in Rome (28$^{11-16}$) early in A.D. 56. But these final dates may need to be shifted to a somewhat later period (see G. A. Barrois in *Interpreter's Bible*, I, 1952, p. 150).

12. The Persecutions of Nero and Domitian.—(1) *Death of St. Peter and of St. Paul.*—There is no good reason for supposing that the two Apostles died on the same day or even in the same year, though we may probably conclude that they both were martyred under Nero. Paul, in prison, could hardly have been accused of incendiarism; it is more likely that he died soon after his arrival in Rome, and long before the fire of A.D. 64. Their joint commemoration is due to their bodies having been transferred to the Catacombs together on June 29, A.D. 258 (so the Philocalian calendar, A.D. 354). Clement of Rome (Cor 5$^{3-7}$) mentions them in the same connexion as examples of patience; Ignatius, writing to the Romans (4^{3}), says: 'I do not order you as Peter and Paul did'; Tertullian says that they were both martyred at Rome under Nero (*Scorp.* 15, *de Praescr.* 36), and so does Origen (Euseb. *HE* iii. 1); Dionysius of Corinth says 'about the same time' (Euseb. *HE* ii. 25); Caius (*c* A.D. 200) describes their graves near Rome (Euseb. *ib.*). Prudentius (*Peristeph.* xii. 5), in the 4th cent., is the first to say that they died on the same day. Eusebius puts their death at the very end of Nero's reign, *i.e.* not long before A.D. 68. The determining considerations are: (*a*) the connexion of their deaths with the fire at Rome in July A.D. 64; (*b*) the necessary interval after St. Paul's acquittal for his later travels, which would take some three years; and this, if we took Lightfoot's chronology (*Clement* i. 75 n.), would prevent us from fixing on A.D. 64 as the year of St. Paul's death; (*c*) the

date of St. Peter's First Epistle, if a genuine work; and (*d*) the fact that St. Mark attended both Apostles, the suggestion being that he served St. Peter after St. Paul's death. The last consideration, if true, would make St. Peter's martyrdom the later of the two. The date of 1 Peter (q.v.) is a difficulty. It makes Christianity a crime (1 P 4^{14}). At first Christians were accused of ill doing; at a later period they were put to death 'for the name,' *i.e. as Christians.* Sir Wm. Ramsay gave reasons for believing that the change was made by Nero, and developed in the interval A.D. 68–96 under the Flavian emperors (*Ch. in the Rom. Emp.*, pp. 245, 252 ff, 280). The fact of persecutions being mentioned makes it unlikely that 1 Peter was written before A.D. 64 (Lightfoot, *Clement*, ii. 498 ff) and its indebtedness to St. Paul's Epistles implies some interval after they were written. Dr. Charles Bigg, however (*Internat. Crit. Com.*), pleaded for a much earlier date; he believed that the persecutions mentioned were not from the State at all, but from the Jews. Dr. Ramsay, on the other hand, held that the provinces of Asia Minor cannot have been so fully evangelized as 1 Peter implies before A.D. 65, and that the Epistle was written *c* A.D. 80, soon after which date St. Peter died. But this is against all the Patristic testimony, which there is little reason to reject. Probably, then, we must date the death of both Apostles in Nero's reign. Two of the arguments mentioned above—on the one hand that the two martyrdoms must have been in close connexion with the Roman fire; and, on the other hand, that St. Mark can only have attended on the one Apostle after the other's death—appear to have little weight.

(2) *The Apocalypse.*—This work gives us our last chronological indications in NT. Like 1 Peter, it implies persecution 'for the name'; but, unlike 1 Peter, it implies emperor-worship. The tone of antagonism to the Empire is entirely different from that of St. Paul's Epistles and the Acts. The worship of Roma was greatly developed by Domitian, and was scarcely at all prominent in Nero's time. This feature in Revelation (q.v.), then, points to the scene being laid in the Domitianic persecution. Some of the older scholars (*e.g.* Lightfoot and Westcott) argued for a date during Nero's persecution, mainly because of the difference of style between Revelation and John, the latter being dated late in the century; but this argument assumes identity of authorship, for which the evidence seems quite inadequate. Other arguments for a Neronian date have been drawn from the number of the Beast, which is supposed to spell, in Hebrew letters, the name and title 'Nero Caesar' (though it can also be made to refer to Domitian), and from the indication as to the 'kings' (emperors) in 17^{10} (but this may be due to the use of an earlier source). The earlier date was popular in the 19th cent., but at present the statement of Irenaeus is more widely accepted, viz. that the book was written ('the vision was seen') towards the end of the reign of Domitian, who died A.D. 96 (Irenaeus, *Haer.* v. xxx. 3; Euseb. *HE* iii. 18). A. J. M.—F. C. G.

CHRONOLOGY OF THE OLD TESTAMENT.—The practical beginning of the political development of Israel, to judge from references in the Hebrew prophets, was the agglomeration of Aramaean tribes associated with Jacob. The traditions of the earlier patriarchs suggest the general situation known in Palestine from archaeology in the first half of the 2nd millennium, but the narrative of the Jacob-tribes from the first settlement near Shechem to the final settlement after the Exodus reflects folk-movements which agree in general with the history and ethnology of the Near East revealed in the records of the great powers of the Late Bronze Age (1600–1200 B.C.). The Amarna Tablets, in noting the activity of the *Habiru* (q.v.) near Shechem *c* 1400 B.C., may refer to Jacob's settlement there (Gn 34). The weight of the evidence of recent archaeology in Palestine and the political condition of the land known from Egyptian records together with the Biblical evidence suggest that the Exodus, to which the date of the final settlement of Israel in Palestine is relative, must be dated in the 19th dynasty (13th cent.) rather than two centuries earlier as suggested by the numerical statement of 1 K 6^{1} (480 years before the building of the Temple), which is obviously the artificial reconstruction of a late pious antiquary, like such specific numbers in the P source of the Pentateuch.

In the Hebrew Monarchy there is more specific chronological detail, though the forty years assigned to David and to Solomon suggest approximation. The duration of the reigns of the kings of Israel and Judah are noted, with synchronizations, but in the Books of Kings these precise figures often confuse rather than clarify. In Assyrian history a firm chronology is possible, thanks to official eponym (*limmu*) lists, annals recording events in the eponym's year of office, royal annals with cross-references to *limmu*-annals, and nearly complete lists of kings with the duration of their reigns, and to the cardinal date of a solar eclipse on June 15, 763 B.C. This holds good for the time coinciding with the Hebrew Monarchy to 649 B.C., after which the chronology of antiquity is supplemented and continued by Ptolemy of Alexandria (A.D. 70–161) on the basis of official annals and astronomical observations until the Roman era. Within this chronological scheme of Assyrian, Babylonian, Persian, Ptolemaic, and Seleucid history the OT affords certain synchronisms.

In the Assyrian account of the Battle of Qarqar, for instance, in the sixth year of Shalmaneser III. (853 B.C.), Ahab of Israel is mentioned. Jehu is listed among Sennacherib's tributaries in his eighteenth year (841 B.C.). Now between Ahab and Jehu fell the reigns of Ahaziah and Joram, given respectively as 2 (1 K 22^{51}) and 12 years (2 K 3^{1}). Presuming that Judaean scribes, accustomed to reckoning a king's reign from the first New Year after his accession (accession-reckoning), added a year to the official Israelite figures for the reigns of Ahaziah and Joram, which had been given from their natural accession (non-accession reckoning), the interval between Ahab and Joram is 12 years, exactly the interval between the two events associated with Ahab and Jehu which we have cited from the Assyrian inscriptions. Ahab, then, must have died in 853 B.C. and Jehu's first year was in 841 B.C. Reckoning back from 853 B.C. on the basis of statements about the duration of the reigns in Israel and Judah, and allowing for the extra year allowed by Judaean scribes, we arrive at the date 931 B.C. for the accession of Jeroboam I. of Israel and the death of Solomon, whose son Rehoboam officially acceded as king of Judah in 930 B.C. at the Autumnal New Year in the month Tishri. This is the basis of E. R. Thiele's attempt at a reconstruction of OT chronology (*The Mysterious Numbers of the Hebrew Kings*, 1951), which the writer follows, not because it is fully adequate, but because it solves more difficulties than most efforts in this direction. Thiele has explained the many chronological discrepancies in the Books of Kings by recognizing that an event may be dated so long after a king's accession or, alternatively, after another event, *e.g.* Baasha of Israel died in the twenty-sixth year of Asa of Judah (1 K $16^{6, 8}$); Baasha raided Judah in the thirty-sixth year of Asa (2 Ch 16^{6}). The first date is reckoned from Asa's accession; the second from the disruption of the kingdom. So too Omri's slaughter of Elah is dated (1 K 16^{10}) from 885 B.C., when Omri ruled with a rival king Tibni. In 1 K 16^{23} the reign of Omri is dated in 881 B.C., that is, when he became sole ruler. The dates relative to the reign of Pekah of Israel (*e.g.* 2 K 15^{33}) are reckoned not from 740–739 B.C., when he became undisputed ruler, but from 750 B.C., his first abortive attempt to gain the throne, relatively to which the reign of Ahaz is dated (2 K 16). At this point there is notorious confusion in OT chronology, but the accession of Hezekiah may be dated by cross-reference to Assyrian history in 714 B.C. Similarly a date may be reckoned from the time that a prince became co-regent with his father, as

occasionally happened, or, alternatively, from the date of his succession. Such co-regencies were those of Jeroboam II. of Israel and Azariah (Uzziah) of Judah, and Jotham.

At the end of the Jewish Monarchy and in the Exile there are more detailed synchronisms with Babylonian history, where chronology is fixed by Babylonian chronicles and by Ptolemy's canon. Accurate cross-references to the regnal years of Babylonian and, later, Persian kings in Jewish records apparently reflect the intense editorial activity in the Exile, when the Books of Kings, for instance, were finally edited, the last historical reference being to the accession of Awil-Marduk (2 K 25[27]) in 561 B.C.

The restoration of the Jewish community in the Persian period is synchronized with the regnal years of the Achaemenid kings. Ezra refers to a royal directive regarding the restoration of the Temple in Cyrus' first year, that is, his first year as suzerain of Babylon (538 B.C.). The actual rebuilding was undertaken in the second year of Darius I., *i.e.* 520 B.C. (Hag 1[1, 5]) and finished in his sixth year in 516 B.C. From the first two chapters of Ezra it is not clear whether Zerubbabel and Joshua were among the first exiles to return in 538 B.C., but Ezr 3[8ff] taken in conjunction with Haggai and Zechariah clearly implies that they returned in 522 B.C.

In the restoration of Jerusalem the activities of Nehemiah and Ezra are dated with reference to Persian chronology, Nehemiah's commission being dated in the twentieth year of Artaxerxes (Neh 2[1]) and Ezra's journey in the seventh year of Artaxerxes (Ezr 7[7f]). The internal evidence of Nehemiah and Ezra together with information in the Elephantine Papyri about personalities in Jerusalem indicates that Nehemiah's commission was in 444 B.C. in the reign of Artaxerxes I. and that of Ezra under Artaxerxes II. in 397 B.C.

The Book of Daniel, quite unreliable in its references to Babylonian chronology, is rich in allusions to Palestinian history under the Diadochi, especially to details of the career of Antiochus IV., Epiphanes (175–163 B.C.) down to his death in Ispahan in 163 B.C., to which Dan 11[44-45] probably alludes.

There are references in Zechariah to the Maccabaean conflict (*e.g.* Zec 9[13ff]) and Zec 12[10-14] may refer to the tragic death of Simon in 135–134 B.C., which would be the last topical reference in the OT. J. Gr.

CHURCH.—1. The word *ecclesia*, which in its Christian application is usually translated 'church,' was applied in ordinary Greek usage to the duly constituted gathering of the citizens in a self-governing city, and it is so used of the Ephesian assembly in Ac 19[39]. It was adopted in the LXX to translate a Hebrew word, *kāhāl*, signifying the nation of Israel as assembled before God or considered in a religious aspect (Jg 21[8], 1 Ch 29[1], Dt 31[30], etc.). In this sense it is found twice in the NT (Ac 7[38] RV 'church,' RSV '**congregation,**' He 2[12] RV and RSV '**congregation**'). The term is practically equivalent to the familiar '**synagogue,**' which, however, was more frequently used to translate another Hebrew word, *'ēdhāh*. This will probably explain our Lord's words in Mt 18[17]. For 'synagogue' was the name regularly applied after the Babylonian exile to local congregations of Jews formally gathered for common worship, and from them subsequently transferred to similar congregations of Hebrew Christians (Ja 2[2]). 'Tell it to the *ecclesia*' can hardly refer directly to communities of Jesus' disciples, as these did not exist in the time of the Galilaean ministry, but rather to the Jewish congregation, or its representative court, in the place to which the disputants might belong. The renewal of the promise concerning binding and loosing in v.[18] (cf 16[19]) makes against this interpretation. And the assurance of Christ's presence in v.[20] can have reference only to gatherings of disciples. But it may well be that these sayings were brought together by Matthew in view of the Christian significance of *ecclesia*. They were doubtless understood by his readers as referring to the Church in their own time, to which the Gospel was addressed—sometime late in the 1st cent., or after. There is no evidence that *ecclesia*, like 'synagogue,' was transferred from the congregation of Israel to the religious assemblies which were its local embodiment. But, though not the technical term, there would be no difficulty in applying it, without fear of misunderstanding, to the synagogue. And this would be the more natural because the term is usually applied to Israel in its historical rather than in its ideal aspect (see Hort, *Christian Ecclesia*, p. 12).

2. *Ecclesia* is used constantly with its Christian meaning in the Pauline Epistles. Its earliest use chronologically is probably in 1 Th 1[1]. But the growth of its use is best studied by beginning with Acts. Here the term first occurs in 5[11], applied to the Christians of Jerusalem in their corporate capacity. In 1[15] St. Peter is represented as standing up 'among the brethren.' Thus from the first Christians are a brotherhood or family, not a promiscuous gathering. That this family is considered capable of an ordered extension is evident (*a*) from the steps immediately taken to fill a vacant post of authority (1[25]), and (*b*) from the way in which converts on receiving baptism are spoken of as added to a fellowship (2[47] AV 'added to the church,' but see RSV) which continues in the Apostles' teaching, and the bond of a common table and united prayer (2[42, 46]). This community is now called 'the company of those who believed' (4[32]), the word used, as compared with its employment elsewhere, suggesting not a throng or crowd but the whole body of the disciples. In Ex 12[6] we have the phrase 'the whole assembly of the congregation (Gr. *synagōgē*) of Israel.' When, therefore, it became necessary to find a collective name for 'the believers,' *ecclesia*, the alternative to 'synagogue,' was not unnaturally chosen. For the disciples meeting in Jerusalem were, as a matter of fact, the true Israel (Gal 6[16]), the little flock to whom was to be given the Messianic Kingdom (Lk 12[32]). Moreover, they were a Christian synagogue, and, but for the risk of confusion, might have been so called. The name, therefore, as applied to the primitive community of Jesus, is on the one hand universal and ideal, on the other local and particular. In either case the associations are Jewish, and by these the subsequent history of the name is determined.

3. As Christianity spread, the local units of the brotherhood came to be called *ecclesiae* (Ac 9[31] 13[1] 14[23] 15[41] 20[17] etc.), the original community being now distinguished as 'the *ecclesia* in Jerusalem' (8[1]). Thus we reach the familiar use of the Pauline Epistles, *e.g.* the *ecclesia* of the Thessalonians (1 Th 1[1]), of Laodicea (Col 4[16]), of Corinth (1 Co 1[2]); cf 1 P 5[13], Rev 2[1] etc. They are summed up in the expression 'all the *ecclesiae* of Christ' (Ro 16[16]). This language has doubtless given rise to the modern conception of 'the churches'; but it must be observed that the Pauline idea is territorial, the only apparent departure from this usage being the application of the name to sections of a local *ecclesia*, which met for worship in the houses of prominent disciples (Ro 16[5], 1 Co 16[19] etc.). The existence of independent congregations of Christians within a single area, like the Hellenistic and Hebrew synagogues (see Ac 6[1, 9]), does not appear to be contemplated in the NT.

4. The conception of a Catholic Church in the sense of a constitutional federation of local Christian organizations in a universal community is post-Apostolic. The phrase is first found in Ignatius (*c* A.D. 115; see Lightfoot, *Apost. Fathers*, Pt. 2 ii, p. 310). But in the 1st cent. the Church of Jerusalem, as the seat of Apostolic authority (Ac 8[1, 14]), still exercises an influence upon the other communities, which continues during the period of

transition to the world-wide society. At Jerusalem Saul receives the right hand of fellowship and recognition from the pillar Apostles (Gal 2^9). Thence Apostles go forth to confirm and consolidate the work of evangelists (Ac 8^{14}). Thither missionaries return with reports of newly founded Gentile societies and contributions for the poor saints (Ac 15^2 24^{17}, 1 Co 16^{1-3}). It is this community that promulgates decisions on problems created by the extension of Christianity (Ac 15^{22-29}). Till after the destruction of the city in A.D. 70 this Church continued, under the presidency of James the Lord's brother (Gal 2^{12}, Ac 12^{17} 15^{13} 21^{18}), and then of other members of the Christian 'royal family' (Euseb. *HE* iii. 11, 19, 20), to be the typical society of Jesus' disciples.

5. But already in the NT the ideal element is present, especially as seen in the Epistle to Ephesians and the Gospel of John. Such a passage as Mt 16^{17-19} is probably a consequence rather than a source of this exalted view; it is now thought by many scholars to be a reflection of the position actually held by Peter, for a time, either in Jerusalem or in Antioch. It can scarcely be thought that the words are historical, or if historical were familiar to the other apostles—especially Paul—or to the early Christian Church either in Palestine or in the larger Gentile world outside.

6. Much 19th cent. interpretation of the NT teaching on the Church and its relation to the Kingdom of God was vitiated by a failure to recognize this secondary element in the gospels, or by a misunderstanding—or misinterpretation—of the latter term, as the 'Kingdom of the Messiah.' Always, in Jewish and early Christian teaching, *God* is the King of the Kingdom, which is *His Reign*; in Jewish and early Christian thought, it is inconceivable that Christ should usurp the prerogatives of His Father. Likewise, the identification of the Church with the Kingdom of God is also questionable. Only late passages like Mt 13^{41} assume that the Kingdom and the Church are identical, and that Christ is the head of the Kingdom of God as he is of the Church.

Normally, the Kingdom of God is viewed as the final state of the universe when sin, suffering, and death shall have been done away, and when God shall be 'all in all' (1 Co 15^{28})—or 'everything to everyone' (RSV). Even Christ will then 'be subjected to him who put all things under him': the Son 'must reign until he has put all his enemies under his feet' (v.^{25}). As the King's Son, the Young Prince now leads the armies of the Lord against all His spiritual foes, earthly or heavenly, human or angelic, demonic or diabolical; in the end, when the victory has been won, the Son will take his place for ever 'at God's right hand.' The Church is the body of His followers, who must be prepared like Him to lay down their lives, if necessary, in the expectation of rising again and sharing His victory, His judgment, and His rule. The Church is not identical with the Kingdom; but it is very remote from the modern idea of a voluntary society of religious minded people who admire Jesus and wish to follow Him, or even the idea of a body of the elect who live and die in this world, certain of their salvation in the world to come, but solely as individuals, with no vital relation to Christ, the supernatural heavenly Lord, or his warring hosts, or the Church which is His 'Body.'

7. It is only in the theology of St. Paul that we find the Kingdom of the Gospels interpreted in terms of the actual experience of the Christian *ecclesia*. The extension of the fellowship beyond the limits of a single city has shown that the ideal Church cannot be identified *simpliciter* with any Christian community, while the idealization of the federated *ecclesiae*, natural enough in a later age is, in the absence of a wider ecclesiastical organization, not yet possible. It is still further from the truth to assert that St. Paul had the conception of an invisible Church, of which the local communities were at best typical. 'We have no evidence that St. Paul regarded membership of the universal *ecclesia* as invisible' (Hort, *Christian Ecclesia*, p. 169). It was the historical fact of the inclusion of the Gentiles (cf Eph 2^{13}) that provided Paul's starting-point. Those nations which under the old covenant were alien from the people of God (Eph 2^{12}) are now included in the vast citizenship or polity (v.^{13ff}) which membership in a local *ecclesia* involves. The Church has existed from all eternity as an idea in the mind of God (3^{3-11}), the heritage prepared for Christ (1^{10f}). It is the people of possession (1^{14}, cf 1 P 2^9, Tit 2^{14}), identified with the commonwealth of Israel (Eph 2^{12}), and as such the immediate object of redemption (5^{25}); but through the reconciliation of the Cross extended (2^{14}), and, as it were, reincorporated on a wider basis (v.^{15}), as the sphere of universal forgiveness (v.^{16}), the home of the Spirit (v.^{18}), and the one body of Christ (4^{12}, etc.), in which all have access to the Father (2^{18}). The interlaced figures of growth and building ($4^{12, 16}$), under which it is presented, witness to its organic and therefore not exclusively spiritual character. Baptism, administered by the local *ecclesiae* and resulting in rights and duties in respect of them, is yet primarily the method of entrance to the ideal community (Ro 6^{3f}, 1 Co 12^{13}, Gal 3^{27f}, Eph 4^5), to which also belong those offices and functions which, whether universal like the Apostolate (1 Co 12^{27f}) or particular like the presbyterate (Ac $20^{17, 28}$; cf 1 Co 12^{8-11}, Eph 4^{11}), are exercised only in relation to the local societies. It is the Church of God that suffers persecution in the persons of those who are of 'the Way' (1 Co 15^9, Ac 8^3 9^1); is profaned by misuse of sacred ordinances at Corinth (1 Co 11^{22}); becomes at Ephesus the pillar and ground of the truth (1 Ti 3^{15}).

That St. Paul, in speaking of the Church now in the local now in the universal sense, is not dealing with ideas connected only by analogy, is proved by the ease with which he passes from the one to the other use (Col 4^{15f}; cf $1^{18, 24}$ and Ephesians *passim*). The Church is essentially visible, the shrine of God (1 Co 3^{16f}), the body of Christ (Eph 1^{23} etc.); schism and party-strife involving a breach in the unity of the Spirit (4^3). Under another figure the Church is the bride of Christ (5^{25ff}), His complement of fulness (1^{23}), deriving its life from Him as He does from the Father (v.^{22}, 1 Co 11^3).

8. Thus the Biblical view of the Church differs alike from the materialized conception of Augustine, which identifies it with the constitutionally incorporated and ecumenical society of the Roman Empire, with its canon law and hierarchical jurisdiction, and from that Kingdom of Christ which Luther, as interpreted by Ritschl, regarded as 'the inward spiritual union of believers with Christ' (*Justification and Reconciliation*, English translation, p. 287). The principle of the Church's life is inward, so that 'the measure of the stature of the fulness of Christ' remains the object of Christian hope (Eph 4^{13}). But its manifestation is outward, and includes those ministries which, though marred, as history shows, by human failure and sin, are set in the Church for the building up of the body (v.^{11f}). Just as members of the legal Israel are recognized by our Lord as sons of the Kingdom (Mt 8^{12}), so the baptized are the called, the saints, the members of the body. There is no warrant in the NT for that sharp separation between membership in the legal worshipping Church and the Kingdom of God which is characteristic of Ritschlianism and other modern views.

9. The Church in its corporate capacity is the primary object of redemption. This truth, besides being definitely asserted (Eph $5^{25, 27}$, Ac 20^{28}, Tit 2^{14}), is involved in the conception of Christ as the second Adam (Ro 5^{12-21}, 1 Co 15^{20-22}), the federal head of a redeemed race; underlies the institutions of Baptism and the Eucharist; and is expressed in the Apostolic teaching concerning the two Sacraments (see above, also 1 Co 10^{16-18} 11^{20-34}). The Church is thus not a voluntary association of justified persons for purposes of mutual edification and common worship, but the body in which the individual believer normally realizes his redemption. Christ's love for the Church, for which He gave Himself (Eph 5^{25}), constituting a royal priesthood, a holy nation, a people of possession (1 P $2^{5, 9}$) through His blood (Eph 2^{13}), completes the parallel, or rather marks the identity,

with the historical Israel. Membership in Abraham's covenanted race, of which circumcision was the sign (Gn 17[9]), brought the Israelite into relation with Yahweh. The sacrifices covered the whole 'church in the wilderness' (Ac 7[38]), and each worshipper approached God in virtue of his inclusion in the holy people. No foreigner might eat of the Passover (Ex 12[45]). The ritual of the Day of Atonement was expressly designed for the consecration of the whole nation (Lv 16). So the sacrifice of the Cross is our Passover (1 Co 5[7]). The worship of the Christian congregation is the Paschal feast (v.[8], cf He 13[10-15]). In Christ those who are now fellow-citizens have a common access to the Father (Eph 2[18], He 10[22]). Through the Mediator of a new covenant (12[24]) those who are consecrated (10[14, 22]) have come to the Church of the first-born (12[23]), which includes the spirits of the perfected saints (*ib.*) in the fellowship of God's household (Eph 2[19], He 10[21]). See also following article. J. G. S.—F. C. G.

CHURCH GOVERNMENT.—1. The general development seems fairly clear, though its later stages fall beyond NT times. The Apostles were founders of churches, and therefore regulated and supervised the first arrangements; then were added sundry local and unlocal rulers; then the unlocal died out, and the local settled down into the three permanent classes of bishops, elders, and deacons. The chief disputed questions concern the origin of the local ministry, its relation to the other, and the time and manner in which it settled down under the government of (monarchical) bishops.

2. Twice over St. Paul gives something like a list of the chief persons of the Church. In 1 Co 12[28] he counts up—'first apostles, second prophets, third teachers, then workers of miracles, then healers, helpers, administrators, speakers in various kinds of tongues.' It will be noticed that all the words after the first two plainly describe functions, not offices. A few years later he—or the author of Ephesians (4[11f])—tells us how the ascended Lord gave His gifts to the church, 'that some should be apostles, some prophets, some evangelists, some pastors and teachers, for the equipment of the saints, for the work of ministry (*diakonia*)'—they are all of them 'deacons' (*diakonoi*), whatever more they may be.

3. At the head of both lists is the **Apostle** (q.v.). The Apostles were not limited to the Eleven, or to the number twelve, though twelve was always the ideal number (1 Co 15[5], Rev 21[14]; perhaps Ac 2[14] 6[2]). Whether Matthias *remained* an Apostle or not, Paul and Barnabas were certainly Apostles (*e.g.* Ac 14[14]), and so was James the Lord's brother (Gal 1[19]). The old disciples Andronicus and Junias (not Junia) were 'notable' Apostles (Ro 16[7]). On the other hand, Timothy seems excluded by the greetings of several Epistles (*e.g.* 2 Corinthians), and Apollos by the evidence of Clement of Rome, who most likely knew the truth of the matter.

The Apostle's first qualification was to have seen the risen Lord (Ac 1[22], 1 Co 9[5]), for his first duty was to bear witness of the Resurrection. This qualification seems never to have been relaxed in NT times. A direct call was also needed, for (1 Co 12[28], Gal 1[1], Eph 4[11]) no human authority could choose an Apostle. The call of Barnabas and Saul was acknowledged (Ac 13[3]) by a commission from the church at Antioch.

Therefore the Apostle was in no sense a local official. His work was not to serve tables, but to preach and to make disciples of all nations, so that he led a wandering life, settling down only in his old age, or in the sense of making, say, Ephesus or Corinth his centre for a while. The stories which divide the world among the Twelve are legends: the only division we know of was made (Gal 2[9]) at the Conference, when it was resolved that the Three should go to the Jews, Paul and Barnabas to the Gentiles. With this preaching went the founding and general care of churches, though not their ordinary government. St. Paul interferes only in cases of gross error or *corporate* disorder. His point is not that the Galatians are mistaken, but that they are altogether falling away from Christ; not that the Corinthian is a bad offender, but that the church sees no great harm in the matter. He does not advise the Corinthians on further questions without plain hints (1 Co 6[5] 10[14] 11[14]) that they ought to have settled most of them for themselves.

4. Next to the Apostle comes the shadowy figure of the **Prophet** (q.v.). He too sustained the Church, and shared with the apostle (Eph 2[20] 3[5]) the revelation of the mystery. He spoke 'in the Spirit' words of warning, of comfort, or it might be of prediction. He too received his commission from God and not from men, and was no local officer of a church, even if he dwelt in the city. But he was not an eye-witness of the risen Lord, and 'the care of all the churches' did not rest on him. Women also might prophesy (1 Co 11[5]), like Philip's daughters (Ac 21[9]) at Caesarea, or perhaps the mystic Jezebel (Rev 2[20]) at Thyatira. Yet even in the Apostolic age prophecy (1 Th 5[20]) is beginning to fall into discredit, and false prophets are flourishing (1 John, 2 Peter, Jude).

5. It will be seen that St. Paul's lists leave no place for a local ministry of office, unless it comes in under 'helpers and administrators' or 'pastors and teachers.' Yet such a ministry must have existed almost from the first. We have (1) the appointment of the Seven at Jerusalem (Ac 6); (2) elders at Jerusalem about the years 44, 50, 58 (11[30] 15[6, 22] 21[18]), appointed by Paul and Barnabas in every church about 48 (14[23]), mentioned Ja 5[14]; at Ephesus (Ac 20[17]), mentioned 1 P 5[1]; (3) Phoebe a deaconess at Cenchreae (Ro 16[1]), bishops and deacons at Philippi (Ph 1[1]). Also in the Pastoral Epistles, Timothy at Ephesus is (1 Ti 3, 4) in charge of four orders: (1) bishops (or elders) (5[1]); (2) deacons; (3) deaconesses (3[11]) ('women' [in Greek without the article] cannot be wives of deacons); (4) widows. With Titus in Crete only bishops are mentioned (Tit 1[5ff]). To these we add (5) the prominent *quasi*-episcopal positions of James at Jerusalem about 44 (Ac 12[17]), in 50, and in 58; and (6) of Timothy and Titus at Ephesus and in Crete.

To these we must *not* add (1) the 'young men' (*neōteroi*) who carried out Ananias (Ac 5[6]) [The tacit contrast with *presbyteroi* is of age, not office, for it is *neaniskoi* who bury Sapphira]; (2) the indefinite *proistamenoi* of 1 Th 5[12] and Ro 12[8], and the equally indefinite *hēgoumenoi* of some unknown church shortly after 70 (He 13[7, 17]) [If these are officials, we can say no more than that there are several of them]; (3) the angels of the seven churches in Asia. [These cannot safely be taken literally.]

6. The questions before us may be conveniently grouped round the three later offices of Bishop, Elder, and Deacon. But *bishop* and *deacon* seem at first to have denoted functions of oversight and service rather than definite offices. The *elder* carries over a more official character from the synagogue; but in any case there is always a good deal of give and take among officials of small societies. If so, we shall not be surprised if we find neither definite institution of offices nor sharp distinction of duties.

(1) **Deacons** (q.v.). The traditional view, that the choice of the Seven in Ac 6 marks the institution of a permanent order of deacons, is open to serious doubt. The opinion of Cyprian and later writers is not worth much on a question of this kind, and even that of Irenaeus is far from decisive. The vague word *diakonia* (also used in the context of the Apostles themselves) is balanced by the avoidance of the word 'deacon' in the Acts (*e.g.* 21[8] Philip the evangelist, one of the Seven). Since, however, Phoebe was a deaconess at Cenchreae, there were probably deacons there and at Corinth, though St. Paul does not mention any; and at Philippi we have bishops and deacons. In both cases, however, the doubt remains, how far the name has settled into a definite office.

(2) **Elders** (see BISHOP). Elders at Jerusalem receive the offerings in 44 from Saul and Barnabas. They are joined with the Apostles at the Conference (Ac 15[4]), and with James (21[18]). As Paul and Barnabas appoint elders in every city on their first missionary journey, and we find elders at Ephesus (Ac 20[17]), we may infer that the

churches generally had elders, though there is no further certain mention of them till the Pastoral Epistles and 1 Peter. Possibly Ja 5[14] is earlier, but there we cannot be sure that the word is official.

The difference of name between elders and bishops may point to some difference of origin or duties; but in NT (and in Clement of Rome) the terms often appear equivalent. Thus the elders of Ephesus are reminded (Ac 20[28]) that they are bishops. In the Pastoral Epistles, Timothy appoints 'bishops and deacons'; Titus, 'elders and deacons,' though Timothy also (1 Ti 5[17]) has elders under him. The qualifications of the elder, as described to Titus, are practically those of the bishop as given to Timothy, and it is added (Tit 1[7]) that the elders must be such 'because the bishop, as God's steward, must be blameless,' etc.—which is decisive that the bishop's office was at least as wide as the elder's. Moreover, in both cases the duties implied are ministerial, not governmental. If the elder's duty is to rule (1 Ti 5[17]), he does it subject to Timothy, much as a modern elder rules subject to his bishop.

(3) **Bishops.** See BISHOP. H. M. G.—M. H. S.

CHURCHES, ROBBERS OF.—This is in Ac 19[37] an AV mistranslation (RV has 'robbers of temples'). Even the RV is inexact. The word ought to be translated simply 'sacrilegious persons,' that is, persons acting disrespectfully to the goddess of Ephesus. See RSV 'sacrilegious,' *i.e.* desecrators of the temple. In 2 Mac 4[42] (RV 'author of the sacrilege') the expression is applied to Lysimachus, brother of Menelaus the high priest, who perished in a riot caused by sacrilege (170 B.C.). RSV reads 'temple robber.' See Ro 2[22], and Cicero, *De Nat. Deor.* i. 82, with note in edition of A. S. Pease. A. So.—F. C. G.

CHURCHES, SEVEN.—See ANGELS OF THE SEVEN CHURCHES, REVELATION [BOOK OF], also the articles on EPHESUS, SMYRNA, etc.

CHUSHAN-RISHATHAIM.—AV form of **Cushan-rishathaim** (q.v.).

CHUSI (Jth 7[18]), mentioned with Ekrebel (*'Akrabeh*), is possibly *Kuzah*, 5 miles S. of Shechem and 5 miles W. of 'Akrabeh (RSV 'Acraba').

CHUZA.—The steward of Herod Antipas. His wife Joanna (q.v.) was one of the women who ministered to our Lord and His disciples (Lk 8[3]).

CIELED, CIELING.—See CEILED, CEILING.

CILICIA.—A district in the SE. corner of Asia Minor, which in NT times was divided into two portions. The Roman province Cilicia, which alone is referred to in the NT, stretched from a little E. of Corycus to Mt. Amanus, and from the Cilician Gates to the sea. For administrative purposes it was combined with Syria and Phoenicia. The sense of the unity of Syria and Cilicia is seen clearly in Gal 1[21] (also in Ac 15[23, 41]). The capital of the province Cilicia was Tarsus (Ac 21[39] 22[3]). The other portion to which the name was applied was the client-kingdom of king Antiochus of Commagene, which was under the suzerainty of Rome, and included Cilicia Tracheia (Rugged Cilicia) to the W., as well as a belt surrounding the Roman province on the N. and E. A. So.

CIMMERIANS.—The name, which has come to us through the Greek, of the people known as **Gomer** (q.v.) in the Bible, the *Gimirrai* of the cuneiform inscriptions.

CINNAMON (Ex 30[23], Pr 7[17], Ca 4[14], Rev 18[13]; Sir 24[10] [AV, RV; RSV **cassia**, q.v.]).—Almost without doubt the product of *Cinnamomum zeylanicum* of Ceylon. The inner bark is the part chiefly used, but oil is also obtained from the fruit. Cinnamon is still a favourite perfume and flavouring substance in Palestine. E. W. G. M.

CINNEROTH, 1 K 15[20] (AV).—See CHINNERETH.

CIRAMA, 1 Es 5[20] (AV).—See RAMAH, 3.

CIRCUIT.—Occurs four times in AV: 1 S 7[16] (according to which Samuel went on circuit to various high places), Job 22[14] (RVm and RSV 'vault' [of heaven]), Ps 19[6] (of the sun's course in the heavens), Ec 1[6] (of the circuits of the wind). RV retains these instances and substitutes 'make a circuit' for AV 'fetch a compass' in 2 S 5[23] (RSV 'go around'), 2 K 3[9] (RSV 'made a circuitous march'), Ac 28[13] (so RSV); see COMPASS. RSV further reads 'in complete circuit' in 1 Ch 11[8] (AV, RV 'round about'), 'the circuit round Jerusalem' in Neh 12[28] (AV 'plain country,' RV 'plain,' RVm 'circuit').

CIRCUMCISION.—**1.** The origins of this rite are wrapped in obscurity. Many scholars have thought in terms of African origin, and Egypt as the medium through which the practice spread to the Semites. Herodotus says the Phoenicians and Syrians learned it from the Egyptians, and Jos 3[2-3, 8-9] suggests that Egyptian disdain of the uncircumcised was a motive for its introduction into Israel. On the other hand, the use of the term *ḥtn* in Ugaritic (=Heb. *ḥāthān* 'bridegroom' Ex 4[26]='circumcised') suggests that circumcision played a part in West Semitic marriage ceremonial in the 2nd millennium. The use of a flint (Jos 5[2-3]) attests the antiquity of the rite. The original motive seems to have been either to please the god by making a redemption-offering of the foreskin or to provide a sign of initiation into the clan. The hygienic motive, where it existed, was secondary. It was carried out variously at puberty (six to fourteen amongst the Egyptians), and before marriage (*i.e.* to make a boy a true adult); but the circumcision of infants was also practised. The rite was observed by Egyptians, Arabs, Phoenicians, Edomites, Ammonites, Moabites. The Philistines from Asia Minor were the only uncircumcised known to the ancient Israelites, before the appearance of the Assyrians in the 9th cent.

2. All this is reflected in the OT. Thus (*a*) the idea of the redemption-offering is plain in Lv 19[23f.]. (*b*) Circumcision at puberty is attested in the case of Ishmael at the age of thirteen (Gn 17[25]). (*c*) It is a preparation for marriage in Ex 4[26] ('A bridegroom of blood, because of the circumcision'), where also it is possible to detect the primitive tradition of a prophylactic against desert demons. (*d*) Jos 5[2, 8f] is another pointer to primitive custom. At the pre-Israelite sanctuary of Gilgal, there was a 'hill of foreskins,' associated traditionally with the mass circumcision by Joshua of all the uncircumcised in Israel. In the earliest traditions, the connexion of circumcision with Yahwism is tenuous. There is no divine command. Moses apparently was and remained uncircumcised.

3. Firm evidence of the use of circumcision as a sign of membership of the covenant-community comes mainly from the 5th cent. In the priestly tradition (Gn 17[1-27]), it is the primary, God-given sign of the covenant made with Abraham, and every male (whether foreigner or slave) is to be circumcised at eight days (cf Lv 12[3]). In Ezekiel also it is the mark of initiation into the community, so that, even in Sheol, the uncircumcised has no right to be reunited with his people (Ezk 28[10] 31[18] 32[18]). No doubt exilic contact with uncircumcised Babylonians and Persians made circumcision nationally and religiously distinctive. Along with the sabbath, circumcision assumed the status of a *confession*.

4. When circumcision had become a self-evident pre-supposition of Jewish life, it was given a spiritual interpretation. There is a deeper circumcision of the heart (Jer 4[4], Dt 10[16] 30[6]). The uncircumcised ear is the ear that does not perform its proper function of hearing (Jer 6[10]). Uncircumcised lips cannot speak (Ex 6[12, 30]). So also in the thought of the Qumrân community, the wicked priest is one who 'did not circumcise the foreskin of his heart'; and the 'men of truth' are those who 'circumcise in unity the foreskin of impulse and a stiff neck.'

5. This is the background of the Pauline teaching that 'circumcision is that of the heart, in the spirit, not in the letter' (Ro 2[29]). But St. Paul went further to declare that this inward circumcision alone is effective.

'He is not a Jew who is one outwardly' (v.[28]). Circumcision of the heart is equivalent to forgiveness through Jesus Christ; and in Col 2[11f] 'the circumcision of Christ' is baptism. Hence for the Christian Church the Jewish ordinance ceased to have importance. 'In Christ Jesus neither circumcision nor uncircumcision is of any avail' (Gal 5[6]). St. Paul was involved in a critical conflict, in the early Church, with Jewish Christians who wished to insist on circumcision. This was settled, according to Ac 15[3–21] on the principle that St. Peter should be the apostle of the Jews, St. Paul of the gentiles, without any requirement of circumcision. The missionary appeal was for faith leading to baptism, and henceforth the Christian Church was the true Israel. 'We are the circumcision' (Ph 3[3]). D. R. J.

CIS, Ac 13[21] (AV).—See KISH, **1.**

CISAI, Ad. Est 11[2] (AV).—See KISH, **4.**

CISTERN.—In Palestine, the climate and geological formation of the country render the storage of water a prime necessity of existence. Hence cisterns, mostly hewn in the solid rock, were universal in Bible times, and even before the Hebrew conquest (Dt 6[11], Neh 9[25], where AV has 'wells'). Thus at Gezer it has been found that 'the rock was honeycombed with cisterns, one appropriated to each house [cf 2 K 18[31]] or group of houses . . . (and) fairly uniform in character. A circular shaft, about 3 feet in diameter and 5 feet deep, cut through the rock, expands downwards into a chamber roughly square or circular in plan, about 13 to 25 feet in diameter and generally about 20 feet deep. . . . The wall is generally covered with coarse plaster' (*PEFSt*, 1903, 111 f).

A cistern might contain only rain water conveyed from the court or flat roof during the rainy season by gutters and pipes, or might be fed by a conduit led from a spring at a distance. The largest of the innumerable cisterns of Jerusalem, the 'great sea' in the Haram area, which is estimated to have held 3,000,000 gallons, derived its water-supply partly from surface drainage and partly from water brought by a conduit from Solomon's Pools near Bethlehem (Wilson).

The mouth of a cistern, through which the water was sometimes drawn by a wheel (Ec 12[6]), was legally required to have a cover (Ex 21[33], cf Jos. *Ant.* IV. viii. 37 [283 f]). A disused or temporarily empty cistern formed a convenient place of detention, as in the case of Joseph (Gn 37[20ff]) and of Jeremiah (Jer 38[6ff]).

A. R. S. K.

CITADEL.—This word is found in RSV in 1 K 16[18], 2 K 15[25] (AV '**palace,**' RV '**castle**'), where it denotes the fortified part of the king's palace, which served as a refuge from, and a last defence against, the enemy when the city itself had been stormed. In Ps 48[3, 13] it is used of the city of Zion. Such a citadel was the '**strong tower**' of Thebez (Jg 9[50]), and perhaps the '**tower**' of 2 K 9[17] (though this may have been a watch-tower or gate tower; see FORTIFICATION). The most frequent designation in EV, however, is **hold** or **stronghold** (Jg 9[46, 49], 2 S 5[7]). In the later struggles with the Seleucids and the Romans, respectively, two Jerusalem forts played an important part: the **citadel** (so RV, RSV; AV 'strong hold') of 1 Mac 1[33] 3[45] etc. (*i.e.* the **Acra,** built by Antiochus IV.), and the castle of **Antonia,** on the site of the earlier fortress (so RSV; AV 'palace,' RV 'castle') of Nehemiah's day (Neh 2[8]), and itself the **barracks** (AV, RV 'castle') of Ac 21[34] 22[24].

CITHERNS.—1 Mac 4[54] (AV; RV, RSV 'harps'); see MUSIC.

CITIES OF THE PLAIN.—See PLAIN [CITIES OF THE].

CITIMS, 1 Mac 8[5] (AV).—See KITTIM.

CITIZENSHIP.—See PAUL, ROMAN PUBLIC LAW, **6,** ROME.

CITY.—1. In the OT 'city' translates both the very common '*îr* and the more poetic *kiryāh*. Neither term in any way connotes bigness or prestige; in size they varied in Canaanite times from the 5 acres of Chephirah (population 1250?), or less, to the 175 acres of Hazor (population 40,000?). Near the lower limit were *Tell en-Naṣbeh* (Mizpah?), and Jericho (now hailed as the earliest 'city' on earth) with areas of 8 and 9 acres respectively, then Shechem (11), Taanach and pre-Davidic Jerusalem (11); Megiddo covered about 15 acres, while pre-exilic Jerusalem was roughly double.

Four factors influenced the siting of Palestinian cities: defensibility, control of communications, food supply, and water; though, naturally, many cities owed their founding to one of these more than to others, *e.g.* Jerusalem was ideally sited for defence (2 S 5[6]), but its water supply was a constant problem for centuries (2 K 20[20]), and it was off the main highways; Bethshean controlled the important routes along the Jordan valley, and the best gateway to the west, and drew on a rich agricultural area. Among the few cities founded by the Israelites on virgin sites may be reckoned Samaria (1 K 16[24]); but usually Israelite towns grew up near, or on, the sites of earlier Canaanite cities. Much of the building material being adobe, rather than stone, earthquake, or weathering following enemy conquest, would soon make a city uninhabitable, but then a shift in political fortune might raise a new city on the roughly levelled ruins of the old. At *Tell ed-Duweir,* 60 feet of debris have been built up by successive destructions of the city of Lachish, giving rise here as elsewhere to the typical sugar-loaf shape of mound referred to in Jos 11[13], Jer 30[18] (Heb. *tillîm*=Arab. *tell*).

The city was the centre of authority and defence for the surrounding countryside with its mainly open villages (Heb. 'daughters,' Jos 15[32] etc.). A city might be autonomous and ruled by a 'king' (Jos 2[2f] etc.), or by a senate (Jos 9[3, 11]). Several cities might form a confederacy (Jos 9[17]), or a miniature empire (Jos 11[1–5], Jg 1[7]). Seven years after David's accession authority was centred in Jerusalem (2 S 5[6]), but was later shared with Samaria as the ultimate capital of the northern portion (1 K 16[24]), so that all other cities were demoted to provincial status (1 K 4[7–19]).

For the structure of walls and gates see FORTIFICATION. Owing to its natural or artificial elevation **access** to the city was usually up an inclined ramp directly to the city gate, though there might be a space immediately outside, but more commonly inside, the gate, sufficiently spacious to merit—in contrast to the almost incredible congestion of houses and narrow alleyways usual 'down-town'—the title **square** (RV 'broad place,' Jer 5[1], Neh 8[1]). Space was at such a premium, especially for the houses of the poor, that they might be built even up against the city wall (Jos 2[15]); the dwellings of the rich, and *a fortiori* the king, naturally took up more space, the latter often inhabiting an additionally fortified **acropolis** ['*îr*, the common word for 'city,' originally had this connotation, 2 S 5[7], or **strong tower** (Jg 9[51]), where a last stand could be made in case of need. But domestic architecture, at least of the early Israelite period (see HOUSE) was not, on the whole, impressive, nor cities sanitary, though sewers, or at least drains, were not uncommon on a small scale. Garbage was thrown into the street (2 S 22[43], Jer 14[16]), or at best, dumped over the city wall or outside the gate (Job 2[8]), and all water had to be fetched from the well (Gn 24[11]), or drawn from the private or public cisterns constructed to hold rainwater (2 K 18[31], cf Mesha [q.v.] inscr. ll. 20–25).

The main meeting place for the inhabitants was the **gate** (Ru 4[1]), *i.e.* either the restricted but shady passage through the city wall, or the open space within, see above. Here news and gossip were retailed (Ps 69[12]), legal, civic, and private business transacted (Dt 22[24]).

No city, finally, was without its **sanctuary** or **high place,** either within its own precincts, as in most cities of note (see HIGH PLACE), or on an adjoining height (1 S 9[12ff]). With due religious rites, too, the city had been founded in far-off Canaanite, or even, as we now know, pre-Canaanite days, when the **foundation sacrifice** claimed its human victim (see HOUSE, **3**). A survival of this

wide-spread custom has been recognized in connexion with the rebuilding of Jericho, the foundation of which was laid by Hiel the Bethelite, 'at the cost of Abiram his first-born,' and whose gates were set up, 'at the cost of his youngest son Segub' (1 K 16[34]).

2. In the NT period there was a sharp rise in the number of cities (*poleis*) in Palestine, owing to the eastward growth of Hellenism following the footsteps of Alexander the Great. Almost entirely in Trans-Jordan we have the confederacy of cities known as **Decapolis** (q.v.) (Mk 5[20]), some admittedly on ancient sites, but all now centres of Hellenic culture, and as such, shunned by the conservative among the Jews. New cities founded by the Herods were Caesarea Maritima and Tiberias; others were built in the coastal areas of ancient Philistia. Although under Roman suzerainty, these cities, like others of the Roman empire, had a certain degree of self-government, and their citizens often possessed a considerable civic pride (Ac 21[39]).

With the partial exception of Jerusalem, Jesus seems to have avoided the larger cities—perhaps because of their Hellenism—but this policy seems to have been reversed by the apostles as soon as it became evident that the conservative Jews had broken with Christianity (Ac 8[5]). Paul practically limited his mission to the chief cities of the north-eastern Mediterranean.

A. R. S. K.—D. R. Ap-T.

CLASPS.—See TACHES.

CLAUDA.—See CAUDA.

CLAUDIA.—A Roman Christian, perhaps wife of Pudens and mother of Linus (2 Ti 4[21]); but Lightfoot (*Clement*, i. 76) shows that this is improbable. The two former names are found in a sepulchral inscription near Rome, and a Claudia was wife of Aulus Pudens, friend of Martial. If these are identified, Claudia was a British lady of high birth; but this is very unlikely.

A. J. M.—E. R. H.

CLAUDIUS.—Claudius, the fourth Roman emperor, who bore the names Tiberius Claudius Caesar Augustus Germanicus, reigned from January (24) 25, A.D. 41 till his murder on October 13, A.D. 54. He was a son of Nero Claudius Drusus (the brother of the emperor Tiberius) and Antonia minor (a daughter of the triumvir Mark Antony and Octavia, sister of the emperor Augustus), and was born on August 1, 10 B.C. at Lyons. From childhood he was weakly, and a prey to disease, which affected his mind as well as his body. This caused him to be neglected and despised. He was, however, a man of considerable ability, both literary and administrative, as he showed when he was called to succeed his own nephew Gaius (Caligula) as emperor. He has been compared with James I. (VI. of Scotland) in both his weak and his strong points. It was in his reign that the first real occupation of Britain by the Romans took place. He is twice mentioned in Acts (11[28] and 18[2]). The great famine over the whole of the Roman world which Agabus foretold took place in his reign. The expulsion of Jews from Rome, due to dissensions amongst them, occurred in the year A.D. 50. This latter date is one of the few fixed points of chronology in the Book of Acts. The reign of Claudius was satisfactory to the Empire beyond the average. The government of the provinces was excellent, and a marked feature was the large number of public works executed under the emperor's supervision.

A. So.—E. R. H.

CLAUDIUS LYSIAS.—See LYSIAS.

CLAW.—In Dn 4[33] 'claw' means a bird's claw; but in AV in Dt 14[6] and Zec 11[16] it has the obsolete meaning of an animal's hoof (so RV, RSV).

CLAY.—See POTTERY.

CLEAN AND UNCLEAN. — Introductory. — The words 'clean,' 'unclean,' 'purity,' 'purification,' have acquired in the process of religious development a spiritual connotation which obscures their original meaning. Their primitive significance is wholly ceremonial; the conceptions they represent date back to a very early stage of religious practice, so early indeed that it may be called pre-religious, in so far as any useful delimitation can be established between the epoch in which spell and magic predominated, and that at which germs of a rudimentary religious consciousness can be detected. In a conspectus of primitive custom, one of the most wide-spread phenomena is the existence of 'taboo.' Anthropology has yet to say the last word about it, and its general characteristics can be differently summarized. But, broadly speaking, taboo springs from the religion of fear. The savage met with much which he could not understand, which was supra-normal to his experience. Such phenomena appeared to him charged with a potency which was secret and uncanny, and highly energetic. They were therefore to be avoided with great care; they were 'taboo' to him. It would be rash to dogmatize about the origin of this notion; it most probably dates back to days prior to any conscious animistic beliefs, and may even be traceable ultimately to instincts which mankind shares with the higher animals. No doubt in later times the idea was artificially exploited in deference to the exigencies of ambition and avarice on the part of chiefs and priests, to the distrust of innovations (cf Ex 20[25], Dt 27[5f], Jos 8[31]), to the recommendations of elementary sanitation, etc. But originally the savage regarded as taboo certain persons, material substances, and bodily acts or states which he considered to possess a kind of transmissible electric energy with which it was very dangerous to meddle; and these taboos were jealously guarded by the sanctions of civil authority, and later of religious belief.

It seems probable that even at such an early epoch taboos could be viewed from two distinct points of view. A taboo might be either a blessing or a curse, according as it was handled by an expert or a layman. Thus blood produced defilement, but, properly treated, it might remove impurity. A chief or king was taboo, and to touch him produced the primitive equivalent of 'king's evil'; and yet his touch could remove the disease it created. The reasons for this twofold point of view are very obscure, and do not come within the scope of this article. But the differentiation seems to have existed in a confused way at the earliest era. Afterwards this notion crystallized into a very vital distinction. On the one hand we find the conception of holiness as expressing an official consecration and dedication to the Divine beings. A sanctuary, a season, a priest or chief, were set apart from common life and placed in a peculiar relation of intimacy to God or the gods; they were tabooed as holy. On the other hand, certain taboos were held to arise from the intrinsic repulsiveness of the object or condition, a repulsiveness which affected both God and man with dislike. Such taboos were due to the essential uncleanness of their object.

With the rise of animistic beliefs and practices this differentiation was reinforced by the dualism of benevolent and malignant spirits. Uncanny energy varied according as it arose from the one or the other class, and much care must be taken to propitiate the one and avert the power of the other. Thus on the one side we find sacrificial ritual, which has as its object to please the good demons, and on the other side we have a cathartic ritual, which aims at expelling evil demons from the vicinity (cf Lv 16, where the two notions are united in one ceremony). But even after the growth of such refinements, ideas and rules survived which can be explained only as relics of primitive and even primeval taboo customs. A still later stage is seen when rules of purity are attributed to the conscious command of God, and their motive is found in His own personal character (Lv 11[44]). The Jewish sacred books teem with references which demonstrate the survival of primitive taboos. Thus Frazer draws especial attention to the Nazirite vows (Nu 6[1–21]), to the Sabbath regulations (Ex 35[2f]), to the views as to death (Nu 19[11ff]), and childbirth (Lv 12). Similarly the origin of the conception of holiness may be seen in the idea that it is transmissible by contact (Ex 29[37] 30[29], Lv 6[27], Ezk 44[19]), or in the penalty for meddling with a holy object (1 S 6[19], 2 S 6[7]); whilst allusions to

ritual uncleanness occur frequently in Ezekiel, and the legislation on the subject forms a large part of Leviticus and Deuteronomy. In some cases these ideas may have arisen in protest against historical developments of Hebrew custom. Thus it has been supposed that the Nazirite vows originated in the desire for a return to primitive simplicity by way of contrast to the habits of Palestinian Canaanites. But many of the regulations about uncleanness can be explained only by a reference to primitive ritualism, with its conceptions of objects charged with a secret energy which the ordinary man does well to shun.

The word 'clean,' it may be remarked, conveyed originally no positive idea. A clean object was one which was not under a taboo, which had contracted no ceremonial taint. And so again 'purification' meant the removal of a ceremonial taint by ceremonial means, the unclean object being thus restored to a normal condition. Fire and liquids were the best media of purification. Similarly '**common**,' the opposite of 'holy,' merely meant 'undedicated to God,' and expressed no ethical or spiritual notion. In fact, when the conceptions of holiness and uncleanness had been definitely differentiated, the rule would be that, though the holy must be clean, the clean need in no way be holy. Later thought, however, confused the two ideas (cf Ac 10^{14}).

I. Uncleanness in the OT.—The consequences of uncleanness and the methods of purification naturally differed in different races. But in the Jewish religion uncleanness was always held to disqualify a man for Divine worship and sacrifice. In practice a certain amount of laxity seems to have been tolerated (Ezk 22^{26} 44^{7}), though this did not pass without protest (Ezk 44^{9}, Is 52^{1}). But, strictly, an unclean man was debarred from religious offices (Lv $7^{19, 20}$); and nobody could perform them in an unclean place, *e.g.* in any land but Palestine (2 K 5^{17}, Hos 9^{3}).

The Jewish rules about uncleanness can be roughly classified under five main heads: sexual impurity, uncleanness due to blood, uncleanness connected with food, with death, and with leprosy. This division is not scientific; some rules are equally in place in more than one class; but at present none but a rough classification is possible.

1. Sexual impurity.—All primitive religions display great terror of any functions connected, however remotely, with the organs of reproduction. Sexual intercourse produced uncleanness; and later animism taught that demons watched over such periods and must be averted with scrupulous care. The time when marriage is consummated was especially dangerous, and this idea is clearly seen in To 8^{1-3}, though this instance is unique in Jewish sacred literature. But, apart from this, the Jews considered all intercourse to defile till evening, and to necessitate a purificatory bath (Lv 15^{18}). Under certain circumstances, when cleanness was especially important, complete abstinence from women was required (Ex 19^{15}). Thus, too, from 1 S 21^{5} it appears as if soldiers on a campaign came under this regulation; perhaps because war was a sacred function, duly opened with religious rites (cf 2 S 11^{11}), and this may also be the cause for a bridegroom's exemption from military service for a year after marriage (Dt 24^{5}).

Uncircumcision was regarded as unclean. The reason for this is not obvious; rites of circumcision were performed by many primitive nations at the time of puberty (whether for decorative purposes, or in order to prepare a young man or woman for marriage, or for some other reason), and it is possible that among the Jews this custom had been thrown back to an earlier period of life. Or it may be that they regarded circumcision as imposing a distinct tribe-mark on the infant. The condition of uncircumcision might be held as unclean because it implied foreign nationality. Taboos on strangers are very common in savage nations.

Seminal emission made a man unclean till the evening, and necessitated bathing and washing of clothes (Lv 15^{16f}).

Childbirth was universally regarded as a special centre of impurity, though among the Jews we find no evidence that the newborn child was subject to it as well as the mother. The mother was completely unclean for seven days; after that she was in a condition of modified impurity for thirty-three days, disqualified from entering the sanctuary or touching any hallowed thing. (These periods were doubled when the baby was a girl.) After this, in order to complete her purification, she must offer a lamb of the first year and a pigeon or turtle dove, though poorer people might substitute another pigeon or dove for the lamb (Lv 12, cf Lk 2^{24}).

Analogous notions may perhaps be traced in the prohibition of any sexual impersonation (Dt 22^{5}), any mingling of different species (Dt 22^{9-11}, Lv 19^{19}), and in the disqualifications on eunuchs, bastards, and the Ammonites and Moabites, the offspring of an incestuous union (Dt 23^{1-6}); though some of these rules look like the product of later refinement.

Human excreta were sources of uncleanness (Dt 23^{12-14}); but the directions on this subject very possibly date from the epoch of magical spells, and arose from the fear lest a man's excrement might fall into an enemy's hands and be used to work magic against him.

The prohibition to priests of woollen garments which caused sweat, is possibly an extension of a similar notion (Ezk 44^{17f}). Finally, the abstinence from eating the sinew of the thigh, which in Gn 32^{32} is explained by a reference to the story of Jacob, may have originated in the idea that the thigh was the centre of the reproductive functions.

2. Uncleanness due to blood.—The fear of blood dates back in all probability to the most primeval times, and may be in part instinctive. Among the Jews it was a most stringent taboo, and their aversion from it was reinforced by the theory that it was the seat of life (Dt 12^{23}). A clear instance of the all-embracing nature of its polluting power is seen in Dt 22^{8}. The same idea would probably cause the abstinence from eating beasts of prey, carrion birds, and animals which had died without being bled (Ezk 4^{14}, Ex 22^{31}, Lv 17^{15} 22^{8}). To break this rule caused defilement (1 S 14^{33}, Ezk 33^{25}). Such a taboo is so universal and ancient that it cannot reasonably be accounted for by the Jewish hatred for heathen offerings of blood.

The taboos on menstrual blood and abnormal issues must come under this category or that of sexual impurity. Menstruation was terribly feared. It was exceedingly dangerous for a man even to see the blood. The woman in such a condition was unclean for seven days, and her impurity was highly contagious (Lv 15^{19-24}). Similarly, abnormal issues produced contagious uncleanness for seven days after they had stopped. The purification required was the offering of two turtle doves and two young pigeons. A man had also to bathe and wash his clothes, but we are not told that a woman was under the same necessity, though it is hardly credible that she was exempt (Lv $15^{2-15, 25-30}$).

3. Uncleanness connected with food.—Anthropology no longer explains all food taboos as survivals of totemism, though no doubt this explanation may account for some. It appears rather that 'theriolatry' was the more general phenomenon. For reasons which cannot even be conjectured in many cases, certain animals were treated as sacred, and tabooed accordingly; it might be that the animal was very useful or very dangerous or very strange; the savage had no consistent theory of taboo. Some animals may be cases of sympathetic taboo; they were not eaten from the fear lest their qualities should be imparted to the consumer. In later times some animals might be tabooed from more elaborate motives. But food taboos cover so wide a range, and appear in many cases so inexplicable, that no single derivation of them can be adequate.

The Jews themselves dated the distinction between clean and unclean animals from an early antiquity (cf Gn 7^{2} and 8^{20}); Gn 9^{3}, however, appears to embody a theory of antediluvian vegetarianism.

The lists of clean and unclean beasts are given in Lv 11 and Dt 14[4ff]. It is impossible to give any certain explanation of the separate items. Clean animals are there classified as those which part the hoof, are cloven-footed, and chew the cud. But this looks like an attempt of later speculation to generalize regulations already existent. The criterion would exclude the ass, horse, dog, and beasts of prey, which are nowhere mentioned as unclean. The last class, as we have seen, would probably be so on different grounds. The horse and dog seem to have been connected with idolatrous rites (2 K 23[11], Is 66[3]), and so perhaps were forbidden. But Jg 6[4] appears to treat the ass as an ordinary article of diet. (The circumstances in 2 K 6[25] are exceptional.) The rule that a kid must not be seethed in its mother's milk (Ex 23[19] 34[26], Dt 14[21]) is difficult to account for. A magical conception appears to underlie the prohibition, and it has been suggested that some nations used to sprinkle the broth on the ground for some such purposes. In that case the taboo would be of great antiquity. But the matter is not at present satisfactorily explained. The taboo on the tree in Eden (Gn 3[3]) hardly calls for discussion. So far as we know, it had no subsequent history; and the general colouring of the story makes it improbable that the prohibition had any origin in Jewish custom.

4. Uncleanness connected with death.—Death, as well as birth, was a source of great terror to the savage. The animistic horror of ghosts and theories of a continued existence after death, gave a rationale for such terror; but it probably existed in pre-animistic days, and the precautions exercised with regard to dead bodies were derived partly from the intrinsic mysteriousness of death, partly from the value of a corpse for magical purposes. Among the Jews a corpse was regarded as exceptionally defiling (Hag 2[13]). Even a bone or a grave caused infectious uncleanness, and graves were whitened in order to be easily recognizable. He who touched a corpse was unclean for seven days (Nu 19[11ff]). Purification was necessary on the third and seventh days; and on the latter the unclean person also washed his clothes and bathed. A corpse defiled a tent and all open vessels in it. For similar reasons warriors needed purification after a battle (Nu 31[19–24]); a murderer defiled the land and had to flee to a city of refuge, where he must remain till the death of the high priest (Nu 35). It has been suggested that this provision was due to the notion that the high priest, the temporary representative of Yahweh, was regarded as suffering from the defilement of murder as God suffered, and as the land suffered (Dt 21[1]). It is singular that apparently a person who was unclean from touching a corpse might yet eat the Passover (Nu 9[6–12]).

The kinsmen of a dead man were usually also unclean; Hos 9[4] points to a similar idea among the Jews. Indeed, mourning customs were in origin probably warnings of such impurity. Some of the most common are prohibited in Dt 14[1] and Lv 19[28], perhaps because of their heathenish associations.

The ritual of purification from corpse-defilement, described in Nu 19, must be of high antiquity. The purifying medium was water, the blood and ashes of a red heifer, with cedar, hyssop, and scarlet. This was sprinkled over the unclean person on the third and seventh days, and the priest and attendants who performed the ceremony were themselves defiled by it till evening, and needed purification (cf Dt 21). The ritual thus unites the three great cathartic media, fire, water, and aromatic woods and plants. The last, perhaps, were originally considered to be efficacious in expelling the death-demons by their scent.

5. Uncleanness connected with leprosy.—Orientals considered leprosy the one specially unclean disease, which required not healing but cleansing (cf Nu 12[12]). The term covered a wide range of skin diseases, and Lv 13 gives directions for its diagnosis. If pronounced unclean, the leper was excluded from the community (cf 2 K 7[3]). He could not attend a synagogue service in a walled town, though in open towns a special part of the synagogue was often reserved for lepers. If he was cured, he must undergo an elaborate process of purificatory ritual (Lv 14), including (*a*) the sacrifice of one bird and the release of another, perhaps regarded as carrying away the demon; fragrant plants, water, and the blood of the dead bird were used at this stage; (*b*) the washing of clothes, shaving of the hair and bathing of the body; then (*c*) after seven days' interval this second process was repeated; and finally (*d*) on the eighth day sacrifices were offered, and the man ceremonially cleansed with the blood and oil of the sacrifice.

II. Uncleanness in the NT.—Legal casuistry carried the cathartic ritual to a high pitch of complexity, and Jesus came into frequent conflict with the Jewish lawyers over the point (cf Mk 7[1–5]). He denounced it energetically (Lk 11[38], Mt 15[10]), and, by insisting on the supreme importance of moral purity, threw ceremonial ideas into a subordinate position. The full force of this teaching was not at once realized (cf Ac 10[14]). The decree in Ac 15[29] still recommends certain taboos. But St. Paul had no illusions on the subject (cf Ro 14[14], 1 Co 6[13], Col 2[16, 20–22], Tit 1[15]). In practice he made concessions to the scruples of others (Ac 21[26], Ro 14[20]) as Jesus had done (Mk 1[44]); and it was recognized that a man who had scruples must not be encouraged to violate them. But it was inevitable that with the process of time and reflection, ceremonial prohibitions and ritualistic notions of cleanness should disappear before the Christian insistence on the internal elements in religion. There are certain survivals of such notions even now, and ceremonialism is not extirpated. But its scope is very narrow, and it is the custom to explain such ritual regulations as survive, on grounds that accord better with the spirit of Christianity and the ideas of civilized society. A. W. F. B.

CLEMENT.—The name of a fellow-worker with St. Paul (Ph 4[3]). There are no sufficient grounds for identifying him with Clement, bishop of Rome, the writer of the *Epistle to the Church of Corinth*.

CLEMENT.—A leader, traditionally third (or fourth) bishop, of the Roman Church, author of its *Letter to the Church of Corinth* (I Clement, about A.D. 96), a document of importance for the theology and church order of the post-apostolic age. Later other works were (fictionally) connected with him, as a typical figure of the period, a sermon (II Clement), several works in the field of church order, and the pious novels known as the Clementine *Recognitions* and *Homilies*. There seems little reason for identifying him with the Clement of Ph 4[3], a fellow-worker of St. Paul's, at Philippi apparently. The Christians named Clement may have been freedmen or dependents of the aristocratic Roman family of the same name. E. R. H.

CLEOPAS.—One of the disciples at Emmaus, Lk 24[18]; the name is probably the same as Clopas (Jn 19[25]), and Alphaeus (Mk 3[18] and parallels) may be used as a Greek equivalent; but any identification of the characters is merely conjectural. E. R. H.

CLEOPHAS, Jn 19[25] (AV).—See Clopas.

CLEOPATRA.—A daughter of Ptolemy Epiphanes. She married in 173 B.C. her own brother Ptolemy Philometor, and afterwards her second brother Ptolemy Physcon (Liv. xlv. 13, *Epit.* 59; Justin, xxxviii. 8). She greatly favoured the Jews in Egypt (Jos. *c. Apion.* ii. 5 [49]), and encouraged Onias IV. in the erection of the temple at Leontopolis (Jos. *Ant.* XIII. iii. 2 [69–71]). **2.** A daughter of Ptolemy Philometor. In 150 B.C. she was given in marriage by her father to Alexander Balas (1 Mac 10[57f]; Jos. *Ant.* XIII. iv. 1 [80–82]). When Balas was driven into Arabia she became (146 B.C.), at her father's bidding, the wife of his rival, Demetrius Nicator (1 Mac 11[12]; Jos. *Ant.* XIII. iv. 7 [110]; Liv. *Epit.* 52). **3.** Daughter of Antiochus III.—the first of the Cleopatras—married Ptolemy V. She is referred to in Dn 11[17].

CLIFF.—Found only in AV in 2 Ch 20[16] (AV, RV 'ascent'), Job 30[6] (RV 'cliffs'; RSV 'gullies'), in ARV twice in Job 39[28] (AV, RV 'rock' and 'crag of the rock'; RSV 'rock' and 'rocky crag'), and in RSV in Ca 2[14] (AV, RV 'rock'), Is 2[21] (AV, RV 'ragged rocks'), Ezk 38[20] (AV, RV 'steep places').

CLOAK (AV, RV 'cloke').—See DRESS, **4.**

CLOPAS (AV **Cleophas**) is named only in Jn 19[25]. See ALPHAEUS and BRETHREN OF THE LORD.

CLOSET.—The Greek word so rendered in NT properly denotes 'a storehouse' as Lk 12[24] RSV, then any inner or more private room as opposed to the living-room; so Lk 12[3] RSV 'private room.' Cf 1 K 20[30] 22[25], literally 'a chamber within a chamber,' and HOUSE, **2.** For Jl 2[16] see Driver, *Joel and Amos, in loc.*

A. R. S. K.—**F. W. G.**

CLOTHES, CLOTHING.—See DRESS.

CLOUD.—In Scripture, as with us, the clouds are the visible masses of aqueous vapour, darkening the heavens, sources of rain and fertility, telling the present state of the weather or indicating a coming change. They serve also for figures of instability and transitoriness (Hos 6[4]), calamity (La 2[1]), the gloom of old age (Ec 12[2]), great height (Job 20[6]), immensity (He 12[1]). The following points should be noted. **1.** The poetic treatment in Job. The waters are bound up securely in the clouds, so that the rain does not break through (26[8]); when the ocean issues from chaos like a new-born child, God wraps it in the swaddling-bands of clouds (38[9]); the laws of their movements are impenetrable mysteries (36[29] 37[16] 38[37]). **2.** The cloud indicates the presence of God, and at the same time veils the insufferable brightness of His glory (Ex 16[10] 19[9] etc.). Similarly the bright cloud betokens the Father's presence, and His voice is heard speaking from it (Mt 17[5]). But a dark cloud would effectually hide Him, and thus furnishes a figure for displeasure (La 3[44]). At Rev 10[1] the cloud is an angel's glorious robe. **3.** The **pillar of cloud and fire** directs and protects the journeyings of the Exodus (Ex 13[21], Ps 105[39]). This corresponds with the fact that armies and caravans have frequently been directed by signals of fire and smoke. **4.** The cloud alternates with the cherub as Yahweh's chariot (Ps 18[10], Is 19[1]). Indeed, the cherub is a personification of the thunder-cloud. The Messianic people and the Messiah Himself sweep through the heaven with clouds (Dn 7[13], Mk 14[62], Rev 1[7]), or on the clouds (Mt 26[64]): hence the later Jews identified Anani (='He of the clouds,' 1 Ch 3[24]) with the Messiah. The saints are to be caught up in the clouds (1 Th 4[17]). The Messiah's throne is a white cloud (Rev 14[14]). **5.** In the 'Cloud Vision' of Apoc. Bar 53–73, the cloud from which the twelve streams of water pour is 'the wide world which the Almighty created'—a very peculiar piece of imagery.

J. T.—**D. R. Ap.-T.**

CLOUT.—Jer 38[11f] 'old cast clouts' (AV, RV; RSV 'old rags'). The word is still used in Scotland for cloths (as in 'dish-clout'), but for clothes only contemptuously. Formerly there was no contempt in the word. Sir John Mandeville (*Travels*, Macmillan's edition p. 75) says, 'And in that well she washed oftentime the clouts of her son Jesu Christ.' The verb 'to clout' occurs in Jos 9[5] (AV, RV; RSV 'patched') of shoes.

CLUB.—**1.** *tôthāḥ*, Job 41[29] (RV, RSV; AV '**dart**'). **2.** *mēphîṣ*, Pr 25[18] (RSV; AV, RV '**maul**'). **3.** The stout shepherd's club (*shēbheṭ*), with its thick end probably studded with nails, with which he defended his flock against wild beasts, is rendered by '**rod**' in Ps 23[4] and elsewhere. **4.** *Xylon*, Mt 26[47, 55], Mk 14[43, 48], Lk 22[52] (RSV; AV, RV 'staves').

CNIDUS.—A city of Caria, on Cape Crio (=Roman Triopium), in SW. of Asia Minor. It was the dividing point between the S. and W. coasts of Asia Minor, and at this point St. Paul's ship changed its course in the voyage to Rome (Ac 27[7]). It contained Jewish inhabitants as early as the 2nd cent. B.C. (1 Mac 15[23]), and had the rank of a free city. A. So.

COAL.—Mineral coal was unknown in Bible times. Wherever 'coal' (or 'coals') is mentioned, therefore, we must in the great majority of cases understand wood or charcoal. Several species of wood used for heating purposes are named in Is 44[14–16], to which Ps 120[4] adds 'coals of the broom tree' (RSV, cf RVm; AV, RV 'coals of juniper'). In two cases, however, the 'live coal' (RSV 'burning coal') of Isaiah's vision (Is 6[6]) and the 'coals' (RSV 'hot stones') on which was 'a cake baken' for Elijah (1 K 19[6]), the Hebrew word denotes a hot stone (so, in both cases, RVm—see BREAD). The charcoal was generally burned in a **brazier** (Jer 36[22ff] RSV; RV 'brasier'; AV 'hearth') or chafing-dish, the 'pan of fire' of Zec 12[6] (RV; RSV 'blazing pot'; AV 'hearth of fire'). See, further, HOUSE, **7.**

Coal, or rather charcoal, supplies several Scripture metaphors, the most interesting of which is illustrated by the expression of the wise woman of Tekoa, 'thus shall they quench my coal that is left' (2 S 14[7]). By this she means, as shown by the following words, the death of her son and the extinction of her family, an idea elsewhere expressed as a putting out of one's lamp (Pr 13[9]). A. R. S. K.—**H. H. R.**

COAST.—Coast, now confined to the shore of the sea, was formerly used of the border between two countries, or the neighbourhood of any place. When St. Paul 'passed through the upper coasts' (Ac 19[2] AV), he was in the interior of Asia Minor. Herod 'slew all the children that were in Bethlehem, and in all the coasts thereof' (Mt 2[16] AV).

COAT.—See DRESS, **2** (*d*), **4.**

COAT OF MAIL.—See ARMOUR, ARMS, **2** (*c*).

COCK.—Mt 26[34, 74], Mk 13[35] 14[30, 72], Lk 22[34, 60, 61], Jn 13[30] 18[27]. Cocks and hens were probably unknown in Palestine until from two to three centuries before Christ's time. In the famous painted tomb at Marissa (see MARESHAH), a work of about 200 B.C., we have the cock depicted. Cocks and hens were introduced from Persia. The absence of express mention of them from the Law, and the fact that it is a 'clean' bird, have made it possible for the Jews for many centuries to sacrifice these birds on the eve of the Day of Atonement—a cock for each male and a hen for each female in the household. Talmudic tradition finds references to the cock in Is 22[17], Job 38[36], and Pr 30[31], but all these are very doubtful. The '**cock-crowing**' was the name of the third watch of the night, just before the dawn, in the time of our Lord, the four night watches being, Late, Midnight, Cock-crowing, and Early. 'Before cock-crowing' may have had reference to the trumpet call which marked the end of the third watch. E. W. G. M.—**S. T.**

COCKATRICE.—This word is used in AV only to render: **1.** Hebrew *ṣepha'*, Is 14[29] (RV 'basilisk': RSV 'adder'); **2.** *ṣiph'ōnî*, Pr 23[32] (AVm; AV, RV, RSV 'adder'), Is 11[8] 59[5], Jer 8[17] (all RV 'basilisk' and RSV 'adder'). See SERPENT.

COCKER.—Sir 30[9] (AV, RV) 'Cocker thy child, and he shall make thee afraid,' that is 'pamper' (RSV). Cf Shakespeare, *King John*, v. i. 70—

> 'Shall a beardless boy,
> A cocker'd silken wanton, brave our fields?'

and Hull (1611), 'No creatures more cocker their young than the Asse and the Ape.' The word is not found earlier than the 15th cent. Its origin is obscure.

COCKLE.—Found only in Job 31[40] (AV, RV; AVm 'stinking weeds'; RVm 'noisome weeds'; RSV 'foul weeds'). The Hebrew is *bo'shāh*, from the root *b'sh*, 'stink.' G. Dalman identifies with **darnel,** *Lolium temulentum* (*Arbeit und Sitte* II, 248 f).

COELE-SYRIA.—The meaning and origin of the first part of the name are obscure. The traditional interpretation is that it means 'Hollow Syria' and applies properly to the great hollow running N. and S.

between the Lebanon and Anti-Lebanon ranges (1 Es 4[48]; Strabo, xvi. 2). It then would correspond to the *Biq'ath hal-L'bhānôn* of Jos 11[17] etc. The first element of the latter name persists in the modern name of the valley S. of Baalbek, *el-Beqā'*. The Orontes drains the valley northward, and the *Lîṭânî* southward, both rivers rising near Baalbek. The soil is rich, producing large crops of wheat, etc., while some of the finest vineyards in Syria clothe the adjoining slopes. But 'Coele-Syria' came to have a wider significance, covering indeed, with Phoenicia, all the Seleucid territory S. of the River Eleutherus (2 Mac 3[5], etc.; Strabo, xvi. 753). In 1 Es 2[17] etc., Coele-Syria and Phoenicia denote the whole Persian province, stretching from the Euphrates to the borders of Egypt. Josephus reckons the country E. of Jordan to Coele-Syria (*Ant.* I. xi. 5 [206], XIII. xiii. 2 f [355 ff], etc.), including in it Scythopolis, the only member of the Decapolis W. of the river. W. E.—**E. G. K.**

COFFER occurs only in 1 S 6[8, 11, 15] (AV, RV; RSV 'box'), and the Hebrew term *'argaz*, of which it is the translation, is also found nowhere else. It appears to have been a small chest (*KB* suggests 'saddle-bag') which contained the golden figures sent by the Philistines as a guilt-offering.

COFFIN.—Gn 50[26] only 'of the disposal of Joseph's body in Egypt). Israelitish burial rites (see MOURNING CUSTOMS, TOMB) did not include the use of coffins.

COHORT.—See BAND, LEGION.

COINS.—See MONEY.

COLA, Jth 15[4] (AV).—See KOLA.

COLEWORT.—See HERB, **4.**

COL-HOZEH ('seeing all').—A Judahite, Neh 3[15] 11[5].

COLIUS, 1 Es 9[23] (AV, RV).—See KELAIAH.

COLLAR.—See ORNAMENTS, **2.**

COLLEGE.—This stands in AV (2 K 22[14], 2 Ch 34[22]) for the Hebrew *mishneh*, which RV and RSV correctly render 'second quarter'—a quarter of the city lying to the north (Zeph 1[10]), and possibly referred to in Neh 11[9], where EV have 'second over the city.' The idea of a 'college' came from the Targum on 2 K 22[14], 'house of instruction.' J. T.

COLONY.—The word *colonia* is a pure Latin word, which is written in Greek letters in the only place where it occurs in the Bible (Ac 16[12]), and expresses a purely Roman institution. It is a piece of Rome transported bodily out of Rome itself and planted somewhere in the Roman Empire. In other words, it is a body of Roman citizen-soldiers settled on a military road to keep the enemies of the Empire in check. These retained their citizenship of Rome and constituted the aristocracy of every town in which they were situated. Their constitution was on the model of Rome and the Italian States. Philippi became a *colonia* when Augustus settled there the former Italian supporters of Mark Antony. A number of places are mentioned in the NT which were really *coloniae*, but only one, Philippi, is so *named*, and the reason for this naming is perhaps that the author of Acts was proud of this city, with which he had some connexion. Pisidian Antioch, Lystra, Corinth, and Ptolemais, not to mention others, were *coloniae*. Sometimes these *coloniae* were merely settlements of veterans for whom their generals had to find a home.

A. So.—**J. C. B.**

COLOSSAE was an ancient city of Phrygia (in the Roman province of Asia), at one time of great importance, but dwindling later as its neighbour Laodicea prospered. Xenophon's Ten Thousand had stopped here on their way to Babylon. In the days of its prosperity it shared in the wool industry; Strabo mentions the fine black wool of its sheep. It was situated in the upper part of the valley of the Lycus, a tributary of the Maeander, about 10 miles E. of Laodicea, and 13 SE. of Hierapolis. The three cities naturally formed a sphere of missionary labour for Epaphras (Epaphroditus), who lived at Colossae (Col 4[12f]), Timothy (Col 1[1]) and others. St. Paul himself never visited any of them (Col 2[1]). It has been suggested with great probability that in Rev 1[11] 3[14] the single church of Laodicea must represent the other churches of the Lycus valley also. The church in Colossae had developed tendencies which St. Paul found it necessary to combat in the Epistle which has come down to us. If, as some scholars believe, 'the epistle from Laodicea' (Col 4[16]) is our 'Epistle to the Ephesians,' or, as others hold, the epistle to Philemon, it also was read in the church at Colossae. Probably both letters were carried from Rome by Tychicus, who was accompanied by Onesimus, whose master Philemon was an inhabitant of Colossae. See also following article.

A. So.—**F. C. G.**

COLOSSIANS, EPISTLE TO THE.—1. Authenticity.—This Epistle is one of the ten Epistles of St. Paul included in Marcion's collection (A.D. 140). It appears to have been accepted without question as genuine both by Churchmen and by heretics, and is referred to by the Muratorian Fragment, by Irenaeus, and by Clement of Alexandria. Its authenticity remained undisputed till the early part of last century, and was then contested only on internal grounds of style and subject-matter.

As to the first objection, the Epistle is marked, to a greater degree than St. Paul's earlier writings, by 'a certain ruggedness of expression, a want of finish that borders on obscurity.' The vocabulary also differs in some respects from that of the earlier writings, but this is amply accounted for by the difference of subject. As a matter of fact, the resemblances in style to St. Paul's other writings are as marked as the differences; and in any case arguments from style in disproof of authenticity are very unreliable. The later plays of Shakespeare, as compared with those of his middle period, show just the same condensation of thought and want of fluency and finish.

The argument from subject-matter is more important. The Epistle was regarded by earlier German critics as presupposing a fully developed system of Gnostic teaching, such as belongs to the middle of the 2nd cent., and a correspondingly developed Christology. But a more careful study of the Epistle has shown that what St. Paul has in view is not a system of teaching, but rather a tendency. Words like *plērōma*, to which later Gnosticism gave a technical sense, are used in this Epistle with their usual non-technical signification. And our study of early Christian and Jewish thought has shown that Gnostic tendencies date from a much earlier time than the great Gnostic teachers of the 2nd cent., and are, indeed, older than Christianity. The Christology of the Epistle certainly shows an advance on that of St. Paul's earlier Epistles, especially in the emphasis laid on the cosmical activity of the pre-incarnate Christ. This may be accounted for in part by the special purpose of the Epistle (see below), and in part by a development in St. Paul's own Christological ideas. It is irrational to deny the authenticity of an Epistle claiming to be St. Paul's, merely because it shows that the mind of the Apostle had not remained stagnant during a period of imprisonment that must have given him special opportunities for thought. (See EPHESIANS.)

The great majority of scholars agree in accepting the Epistle as St. Paul's, although many, beginning with H. J. Holtzmann, would argue that the text of the original letter has been amended in various ways by later editors and scribes. The authenticity of the Epistle is sustained by its close relation to the Epistle to Philemon, the Pauline authorship of which is hardly seriously disputed. (On the relation of our Epistle to the Epistle to the Ephesians, see EPHESIANS.)

2. Occasion and Purpose.—Most of Paul's Epistles were written under some definite external stimulus. In the case of this Epistle two events seem to have led to its composition. (1) Epaphras, who had been the

first evangelist of the Colossians, and who seems to have held at Colossae a position somewhat similar to that which Timothy is represented in the Pastoral Epistles as holding in Ephesus, had come to Paul bringing information as to the special needs and dangers of the Colossian Church. Paul was in prison at the time—whether at Rome, Caesarea, Ephesus, or elsewhere, we do not know, nor can we be sure at just what period in the Apostle's career this imprisonment occurred. Because Epaphras elected to remain with Paul and apparently shared for a time the Apostle's imprisonment (Phn 23), Tychicus was sent to Asia, taking with him this letter. (2) Onesimus, a slave from Colossae, had found his way to the city of the Apostle's imprisonment and had there come under the influence of Paul. The Apostle took advantage of Tychicus' journey to send Onesimus back to his master at Colossae, with a letter of commendation and appeal (see PHILEMON).

The special purpose of the Epistle, as distinct from its general purpose as a message of goodwill, was to warn the Colossian Christians against a danger of which Epaphras had no doubt informed Paul. The exact nature of the so-called Colossian heresy is a matter of some uncertainty. On its doctrinal side it was probably a blend of Jewish theosophical or Gnostic ideas with floating Oriental speculations. It appears to have denied the direct agency of God in the work of creation, and to have inculcated the worship of angels and other mysterious powers of the unseen world (2^{18}). On its practical side it combined rigorous asceticism (2^{23}) and strict observance of Jewish ceremonial (2^{16}) with an arrogant claim to special enlightenment in spiritual things (2^{18}). Its special danger lay in the fact that it tended to obscure, or even to deny, the unique grandeur of the ascended Lord, the one Mediator, through faith in whom the life of the Christian was lifted into the new atmosphere of liberty. On one side, therefore, this Epistle may be compared with He 1, where the supremacy of the Son over all angels is strongly insisted on, while on the other side it takes up the line of thought of the Epistle to the Galatians—the relation of the Christian life to external ordinances. The way in which Paul deals with the question can best be seen by a short summary of the Epistle.

3. Summary.—After the usual salutation, thanksgiving, and prayer, in which Paul associates Timothy with himself (perhaps because he was known personally to the Colossian Church), he plunges at once into a doctrinal statement (1^{13}–2^{3}) of the Person and Work of Christ, who is the image of the invisible God, the origin and goal of all created things, in whom all the fulness (*plērōma*) of the Godhead abides. After a personal reference to his own commission and to his sufferings for the Church, he passes to the directly controversial part of the Epistle (2^{4}–3^{4}), warning the Colossians against being led astray by strange philosophies. The fulness of the Godhead is in Christ; He is over all principalities and powers; the life of externally imposed ordinances—'Touch not, taste not, handle not'—is a life to which the Christian has died in Christ. He has risen to a new life whose centre and secret are in heaven. He must still mortify the deeds of the flesh, but from a new motive and in the power of a new life. The third section of the Epistle (3^{5}–4^{6}) applies this principle to various relations of life—the mutual relation of Christians, husbands and wives, children and fathers, slaves and masters; and lastly, to the relation of Paul to them, and to their relation with the world. The closing section (4$^{7-18}$) deals with personal matters—with the mission of Tychicus, with whom Paul tactfully associates Onesimus; with Mark's proposed visit, in connexion with which St. Paul writes a word of special commendation, showing how completely the former discord has been healed. Then follow a warm commendation of Tychicus, greetings from Luke and Demas, instructions for exchanging letters with the neighbouring Church of Laodicea, and a final message for Archippus (q.v.).

J. H. B. M.—J. K.

COLOURS.—The colours named in OT and NT, as in other ancient literatures, are few in number, and of these several are used with considerable latitude.

1. White as the colour of snow in Is 1^{18}, of the teeth described as milk-white (Gn 49^{12}), and of horses (Zec 1^{8} 6$^{3, 6}$); also of wool (Rev 1^{14})—the prevailing colour of the Palestinian sheep being white (see Ca 4^{2} 6^{6})—and of garments (Ec 9^{8}, Mk 9^{3}). **Gray** (and **grey**) occurs only in the expression 'gray hairs,' while **grisled** (literally 'grey,' from French *gris*) apparently means black with white spots (Gn 31^{10}, Zec 6$^{3, 6}$; cf **6** below). **Green** is not a colour adjective (in Est 1^{6} read as RSV), but a noun signifying green plants and herbs, as *e.g.* in Gn 1^{30} and Mk 6^{39}. A kindred word rendered **greenish** (Lv 13^{49} 14^{37}) is probably a greenish **yellow**, since it is also used in Ps 68^{13} of 'yellow gold.'

2. The darker colours likewise merge into each other, black and brown, for example, not being clearly distinguished. **Black** is the colour of hair (Ca 5^{11} 'black as a raven'), of horses (Zec 6$^{2, 6}$, Rev 6^{5}), and of ink (2 Co 3^{3}). In Ca 1^{5} the same Hebrew word signifies dark-complexioned (AV 'black'). Laban's black sheep (Gn 30^{32ff} RV) were probably dark brown (AV **brown**).

3. Red is the colour of blood (2 K 3^{22}), and of grape juice (Is 63^{2}). The same word is used of the reddish-brown colour of the 'red heifer' of Nu 19, and of the chestnut horse of Zechariah's vision (1^{8}, AV 'red'), although the precise colour distinction between the latter and his companion, the **sorrel** (AVm **bay**; in Zec 6^{3} for 'bay' [AV, RV], RSV has 'dappled,' and in v.^{7} has 'red') horse, is not clear. 'Red' is used also of the sky (Mt 16^{2f}—literally 'of the colour of fire').

4. Crimson and **scarlet** are shades of the same colour, and were both derived from the same insect, the *coccus ilicis* or cochineal, which 'attaches itself to the leaves and twigs of the *quercus coccifera*' (Post), and is termed in Hebrew 'the scarlet worm.' Scarlet-coloured garments were regarded as a mark of distinction and prosperity (2 S 1^{24}, Pr 31^{21}), but in OT scarlet is most frequently mentioned as one of the four liturgical, or, as we should say, ecclesiastical colours (see below). **Vermilion** is mentioned as a pigment (Jer 22^{14}, Ezk 23^{14}).

5. Associated with scarlet in the Priests' Code of the Pentateuch are found two colours, *'argāmān* rendered purple and *t^{e}khēleth* rendered blue. In reality these are two shades of purple, the red tone predominating in the former, the blue tone in the latter. Since blue predominates in our modern purple it would be well to drop the cumbrous terms red-purple or purple-red, and blue-purple or purple-blue in favour of the simpler terms **purple** and **violet** as in AVm of Est 8^{15} (RSV 'purple') 1^{6} (RSV 'blue'). Both shades were obtained by the use, as a dye, of a colourless fluid secreted by the gland of a shell-fish (*murex trunculus*) found in great quantities on the Phoenician coast. Hence Tyre became the chief seat of the manufacture of the purple cloth for which Phoenicia was famous throughout the ancient world (cf Ezk 27$^{7, 16}$). Most probably the word *Canaan* originated from this industry and like the Greek term Phoenicia means 'the land of the purple.' Purple raiment was the mark of high rank (cf 'born to the purple') and was generally worn by kings and nobles (Mk 15^{17}, Lk 16^{19}, Jn 19^{2}).

In the Priests' Code, as has been noted, from Ex 25 onwards, 'violet' (AV, RSV 'blue'), 'purple,' and 'scarlet' are used—and always in this order—to denote the fine linen thread, spun from yarn that had been dyed these colours (cf Ex 35^{25}), which, with the natural white thread, was employed in weaving the rich material for the hangings of the Tabernacle, and for certain parts of the priests' dress.

6. Jacob's small cattle 'striped (AV '**ring-straked**'), speckled, and spotted' (Gn 30^{39}) showed white mixed with black or brown in the case of the sheep, and black mixed with white in the case of goats.

It may be added that the art of **dyeing** was one in which the Jews of later times excelled. In NT times, as may be gathered from the Mishnah, dyeing was a

flourishing branch of native industry. The true Tyrian purple was always a monopoly and consequently imported: but many less costly dyes were known, such as the cochineal insect for scarlet, dyer's woad (*isatis*) for true blue, madder (Heb. *pû'āh*) and others. Archaeology has shown that certain cities seem to have been centres of the dyeing industry. The city of Debir (*Tell beit Mirsim*) seems to have been such a centre and may have held a monopoly of the industry. In the Philistine region Gezer seems to have played a similar rôle.

A. R. S. K.—J. Pn.

COLT is applied in the Bible not to the young horse, but to the young ass, and once (Gn 32^{15}) to the young camel. Outside the Bible it is not applied to the young of any animal but the horse.

COMFORT, from late Latin *confortare*, 'to strengthen.' 'reinforce,' denoted in old English (*a*) physical, or (*b*) mental refreshment of an active kind (*invigoration, encouragement*)—obsolete meanings. In modern use it denotes (*c*) mental refreshment of the softer kind (*consolation*). Sense (*a*) appears in Gn 18^5, Jg $19^{5,8}$, Ca 2^5; (*c*) elsewhere in OT. In NT, 'comfort' usually represents a Greek verb and noun, common in Paul, which include any kind of animating address; in this connexion the sense (*b*) prevails, as in Ac 9^{31} 16^{40}, Ro 1^{12} 15^4, 2 Co 13^{11} etc.; the tenderer signification (*c*) appears in Mt 5^4, 2 Co 1^{3ff}, etc. For the above Greek *noun*, however, AV fourteen times writes '**consolation**' (interchanging 'comfort' and 'consolation' in 2 Co 1^{3-7}), alike in senses (*b*) and (*c*): this RSV replaces several times (in Paul) by 'comfort.' 'Comfort' is also in AV the rendering of a second and rarer group of Greek words denoting *consolation* (in sorrow): so in Jn $11^{19,31}$, 1 Co 14^3, and Ph 2^1 (RSV 'encouragement'), 1 Th 2^{11} 5^{14}; the original of 'comfort' (*soothing*) in Col 4^{11} is an isolated expression kindred to the last. 'Of good comfort' in Ph 2^{19} renders a fourth Greek word *in good heart, cheerful*; while 'of good comfort' in Mt 9^{22} ‖ =*of good cheer* in v.^{2} and elsewhere (RSV 'take heart' here, and in Mk 10^{49}).

For OT and NT, comfort has its source in the tender love of God for His people, and for the individual soul; it is mediated (in the NT) by the sympathy of Christ, the visitings of the Holy Spirit, the help of brethren, and the hope of glory; it counteracts the troubles of life, and the discouragement of work for God: see especially Jn 16^{33}, Ro 5^{2-5}, 2 Co 1^{3-7}.

G. G. F.—F. W. G.

COMFORTER.—See COUNSELLOR.

COMING OF CHRIST.—See PAROUSIA.

COMMANDMENTS.—See TEN COMMANDMENTS.

COMMENTARY.—Mentioned only in RV in 2 Ch 13^{22} 24^{27} (AV, RSV 'story'). The Hebrew word is *midhrāsh*, which does not mean exactly what we understand by a commentary. It is 'an imaginative development of a thought or theme suggested by Scripture, especially a didactic or homiletic exposition, or an edifying religious story' (Driver).

COMMERCE.—See TRADE AND COMMERCE.

COMMON.—In Ac 10^{14f} synonymous with 'ceremonially unclean' (cf Mk 7^2, and see CLEAN AND UNCLEAN).

COMMUNICATION.—While 'conversation' in AV means *manner of life* or *conduct*, '*communication*' usually means *conversation, talk*. So Col 3^8 'filthy communication' AV ('foul talk,' RSV) and elsewhere. RSV entirely abandons AV usages of 'communication,' adopting instead renderings less likely to be misunderstood; *e.g.* Mt 5^{37} ('what you say'), 1 Co 15^{33} ('company'), Phn ^{6} ('sharing'). Similarly the verb 'to communicate,' in AV frequently used with the general sense of making common cause with one, appears only twice in RSV, both times in the sense of 'to impart.'

H. L. R.

COMMUNION.—See FELLOWSHIP.

COMPASS.—A 'compass' is the space occupied by a circle, or the circle itself: Pr 8^{27} 'he set a compass upon the face of the deep' (AVm and RV 'a circle'; RSV 'drew a circle') usually explained of the horizon, which seems to be a circle resting on the ocean. To 'fetch a compass' (Nu 34^5, Jos 15^3 [RV, RSV 'turn about'], 2 S 5^{23} [RV 'make a circuit; RSV 'go around'], 2 K 3^9 [RV 'make a circuit'; cf RSV], Ac 28^{13} [RV, RSV 'make a circuit']) is to make a **circuit** (q.v.). The tool for making a circle is a compass, mentioned Is 44^{13}. See ARTS AND CRAFTS, **1.**

COMPASSION.—See PITY.

CONANIAH.—**1.** A Levite who had charge of the tithes and offerings in the time of Hezekiah, 2 Ch 31^{12f} (AV **Cononiah**). **2.** A chief of the Levites in Josiah's reign, 2 Ch 35^9; called in 1 Es 1^9 **Jeconiah** (RSV; AV, RV **Jeconias**).

CONCISION.—A name applied contemptuously by St. Paul (Ph 3^2 AV) to the merely fleshly circumcision (Gr. *katatomē*; the ordinary word for 'circumcision' is *peritomē*). Prefer RSV, 'those who mutilate the flesh.'

CONCORDANCES.—The Latin word *concordantiae*, for an alphabetical list of words of Scripture drawn up for purposes of reference to the places where they occur, was first used by Cardinal Hugh of St. Cher (†1263), who compiled a Concordance to the Vulgate in 1244. This was revised by Arbottus (1290), and became the basis of a Hebrew Concordance by Isaac Nathan (1437–45). Nathan's work was revised and enlarged by John Buxtorf, the elder, whose *Concordantiae Bibliorum Hebraicae* (1632) held the place of standard Concordance for two centuries, and served as the model for many others. John Taylor's *Hebrew Concordance adapted to the English Bible, disposed after the manner of Buxtorf* (2 vols. folio, Norwich, 1754–57), is another link in the succession. The first Concordance to the English Bible is that of John Marbeck (folio, London, 1550). The earliest Concordance to the Septuagint is Conrad Kircher's (1607). The first Greek NT Concordance was published at Basle by Sixt Birch (Xystus Betuleius) in 1546. In the use of the following lists it will be understood that, while the most recent works, other things being equal, are to be preferred, there is so much common material that many of the older works are by no means obsolete.

1. Hebrew.—Fuerst, *Libr. Sacrorum Vet. Test. Concordantiae Heb. atque Chald.* (1840); *The Englishman's Hebrew and Chaldee Concordance of OT* (2 vols., Bagster); B. Davidson, *A Concordance of the Hebrew and Chaldee Scriptures* (Bagster, 1876); Bagster's *Handy Hebrew Concordance* [an invaluable work]; Mandelkern, *Vet. Test. Concordantiae* (folio, Leipzig, 1896), and a smaller edition without quotations (Leipzig, 1897). A revised edition was produced by Herner, 1909, and another edition by F. Margolin. Since 1955 there have been three independent photo-lithographic reproductions.

Another work based on *Biblia Hebraica*^{3} is G. Lisowsky, *Concordantiae Veteris Testamenti Hebraicae atque Aramaicae*, 1958, exquisitely written by hand.

2. Greek.—(*a*) THE SEPTUAGINT.—Bagster's *Handy Concordance of the Septuagint*; Hatch-Redpath's *Concordance of the Septuagint and other Greek Versions of the OT*, with two supplemental fasciculi (Clarendon Press, 1892–97). This is the standard work, and its latest reprint is 1955.

(*b*) THE NT.—*The Englishman's Greek Concordance of the NT* (Bagster), 9th edition, 1903; C. F. Hudson, *Greek Concordance to NT*, revised by Ezra Abbot (do.); Schmoller, *Concordantiae manuales NT graeci* (1890), *Handkonkordanz zum griech. N.T.* (Nestle Text), 1949; Bruder, *Concordantiae omnium vocum. NT graeci*^{4} (1888). All these works are superseded by Moulton-Geden's *Concordance to the Greek Testament* (1897, which is now in the third edition (1926), reprinted 1957).

3. English.—Until recent times the standard work was Cruden's *Complete Concordance to the Holy Scriptures*

(1st edition, 1738. Cruden's is truly a marvellous work, and was frequently copied. Its latest revision, 1954, was reprinted in 1957). More recent works are Eadie's *Analytical Concordance*; Young's *Analytical Bible Concordance* (1879–84, 11th edition, 1936, reprinted 1956), with supplementary vol. by W. B. Stevenson; Strong's *Exhaustive Concordance* (1894); Thom's *Concordance to RV of NT* (1882). For the Roman (Douay) Bible, see N. Thompson and R. Stock, *Concordance to the Bible in the Douay Version*, 1953. For the best known of recent Bible translations the following concordances are available: M. C. Hazard, *A Complete Concordance to the American Standard Version* (1922); W. J. Grant, *The Moffatt Bible Concordance* (1950); J. W. Ellison, *Nelson's Complete Concordance of the Revised Standard Version*, 1957.

W. F. A. and J. S. B.—**B. J. R.**

CONCUBINE.—See FAMILY, MARRIAGE, 6.

CONCUPISCENCE.—Concupiscence is intense desire, always in a bad sense, so that it is unnecessary to say 'evil concupiscence' as in Col 3^5 (AV). The reference is nearly always to sexual lust. RSV, 'evil desire.'

CONDUIT.—An aqueduct for bringing water into a city. In early Jerusalem a tunnel was cut from the spring outside the city into the hill and a shaft cut through the rock so that the people might draw water from the point to which it was led. (For the arrangements at Gibeon see GIBEON.) Later a conduit was made to bring the water from the spring into the lower part of the city, and this is the conduit referred to in Is 7^3 and 2 K 18^{17}, Is 36^2. In 2 K 20^{20} (cf 2 Ch 32^{30}) the conduit prepared by Hezekiah is probably to be identified with the **Siloam** tunnel, leading to the pool of Siloam. See SILOAM.

CONEY.—See BADGER.

CONFECTION.—This word in AV (Ex 30^{35}) means 'perfume,' and 'confectionary' (1 S 8^{13}, AV, RV) means 'perfumer' (q.v.).

CONFESSION.—In the English Bible the words 'confess' and 'confession' in relation to the Hebrew OT and the Greek NT carry the sense of agreement, promise, pointed and open declaration, acknowledgment, and the developed sense of grateful praise. In reference to an object they may refer to an open acknowledgment of sin or a profession of religious faith.

1. Confession of faith.—(1) In the OT the use of the word 'confess' in this sense is rare: AV 1 K $8^{33, 35}$ = 2 Ch $6^{24, 26}$; RSV Is 48^1. But there are other references to 'confession,' and the idea of acknowledging God as God and declaring personal trust in Him is found frequently in the OT. The Psalms are a storehouse of confessional utterance (see 48^{14}).

(2) In the NT the word usually translated 'confess' sometimes carries the sense of grateful praise and acknowledgment to God. But usually the verb 'confess' in relation to faith reflects the lively proclamation of Jesus as Lord and the requirements of discipleship and trust in Him. Here the context of the early Church and its life should be kept in mind.

(*a*) *The meaning of confession.*—The NT literature was written under the prompting of faith in Jesus which began in personal commitment and went on to recognition of his true role as 'Messiah,' 'Son of God,' 'Son of man.' The Synoptic Gospels reach a climax and turning point in Peter's confession at Caesarea Philippi: 'You are the Christ' (Mk 8^{29}||). After the Resurrection the primitive community found its faith in Jesus as Messiah confirmed in power (Ro 1^4), for Jesus then was 'designated Son of God in power.' All that was at first demanded of converts was the confession, 'Jesus is Lord' (1 Co 12^3; cf Ph 2^{11}); a view that is confirmed by the fact of their being baptized 'in the name of the Lord' (Ac 8^{16} 10^{48} 19^5).

The Fourth Gospel from the opening chapter is a conscious defence of the confession that Jesus is the Christ, over against the Baptist (1^{20}) and the Jewish opposition (9^{22} 12^{42}). Thomas' confession in 20^{28}, 'My Lord and my God!' is a climax in this confessional Gospel.

The growth of heresy made more precise confession necessary. In the Johannine Epistles it is essential to confess, on the one hand, that 'Jesus Christ has come in the flesh' (1 Jn 4^{2f}, 2 Jn^7), and, on the other hand, that 'Jesus is the Son of God' (1 Jn 4^{15}). In the Fourth Gospel Jesus' true humanity is asserted over against current docetic tendencies. With this developed type of confession may be compared the gloss that has been attached to the narrative of the Ethiopian eunuch's baptism (Ac 8^{37}, see RSV footnote), probably representing a formula that had come to be employed as a baptismal confession. It was out of baptismal formulae like this that there gradually grew those formal 'Confessions' of the early Church which are known as the Apostles' and the Nicene Creeds.

(*b*) *The value of confession.*—In the Synoptic Gospels Jesus Himself lays great stress on open confession of Him. If we confess Him before men, He will confess us before His Father in heaven; if we deny Him, He will also deny us (Mt 10^{32f}||, Mk 8^{38}||). But confession of Him as Lord must be backed up by obedience to the will of the Father (Mt $7^{21, 22, 23}$). In the sequel to Peter's confession at Caesarea Philippi in the Gospel of Matthew, Jesus pronounced Peter blessed on the basis of his outspoken affirmation, and gave the assurance that against the Church so founded the gates of Hades should not prevail (Mt 16^{17-19}). This section may have been added by the evangelist, but it reflects the emphasis on confession in one section of the Church.

In the Epistles the value of confession is emphasized not less strongly. According to St. Paul, the spirit of faith must speak (2 Co 4^{13}), and confession of faith is necessary to salvation (Ro 10^{8-10}). And in 1 John 4^2 a true confession of Christ is a sign of the presence of the Divine Spirit, a proof of the mutual indwelling of God in man and man in God (v.^{15}).

2. Confession of sin.—(1) This holds a prominent place in the OT. The Mosaic ritual makes provision for the confession of both individual (Lv 5^{1ff}, 26^{40}) and national (16^{21}) transgressions; and many examples may be found of humble acknowledgment of both classes of sin, for instance in the Penitential Psalms and in such prayers as those of Ezra (10^1), Nehemiah (16^f), and Daniel ($9^{4ff, 20}$). It is fully recognized in the OT that confession is not only the natural expression of penitent feeling, but the condition of the Divine pardon (Lv 5^{5f}, Ps 32^5, Pr 28^{13}).

(2) In the NT 'confess' occurs but seldom to express acknowledgment of sin (Mt 3^6 = Mk 1^5, Ac 19^{18}, 1 Jn 1^9). But the duty of confessing sin both to God and to man is constantly referred to, and the relation of confession to forgiveness is made plain (Lk 18^{10f}, 1 Jn 1^9).

(*a*) *Confession to God.*—This meets us at many points in our Lord's teaching—in His calls to repentance, in which confession is involved (Mt 4^{17} = Mk 1^{15}, Lk $11^{29, 32}$ 24^{47}), in the petition for forgiveness in the Lord's Prayer (Mt 6^{12}, Lk 11^4), in the parables of the Prodigal Son (Lk $15^{17, 18, 21}$) and the Pharisee and the Publican (Lk 18^{10f}). It has been noted that while He recognizes confession as a universal human need (Lk 11^4||), He never confesses sin on His own account.

(*b*) *Confession to man.*—Besides confession to God, Christ enjoins confession to the brother we have wronged, and He makes it plain that human as well as Divine forgiveness are related to readiness to confess (Lk 17^4). In Ja 5^{16} (RSV) we are told to confess our sins one to another. The sins here spoken of are undoubtedly sins against God as well as sins against man. But the confession referred to is plainly not to any official of the Church, much less to an official with the power of granting absolution, but a mutual unburdening of Christian hearts with a view to prayer 'one for another.'

J. C. L.—**P. E. D.**

CONFIRMATION.—The noun 'confirmation' is used only twice in AV and RSV (Ph 1^7, He 6^{16}), the

reference in the first case being to the establishment of the truth of the gospel, and in the second to the ratification of a statement by an oath. The verb 'confirm,' however, is used in RSV to translate various Hebrew and Greek words which are used in a general and non-technical sense. Thus it renders *ḳûm* in Dt 27^{26} where the Hebrew verb signifies 'confirm' the Law, or 'give one's solemn assent' to it, by carrying out its precepts. The same Hebrew word is used of God confirming His words, spoken through the prophets, by His acts in history (Is 44^{26}, Dn 9^{12}). It also denotes legal attestation of a transaction (Ru 4[7]), and authoritative attestation by a royal letter (Est 9^{29}). 'Confirm' also appears as the translation of *mālē'* in 1 K 1^{14}, where it signifies the act of confirming or attesting a story by the evidence of a second witness, and it renders both *ḥāzaḳ*, in the sense of 'strengthen' (2 K 15^{19}, Dn 11^{1}), and *'āmadh* which means 'ratify' (1 Ch 16^{17}). In the NT it is used for *bebaioō* in 1 Co 1^{6}, of the experience of the Corinthians which attested the truth of the gospel. The noun 'confirmation' renders *bebaiōsis* in the sense of 'establishment' (Ph 1[7]), and in the more formal or legal meaning of the attestation or guarantee furnished by an oath (He 6^{16}). In AV 'confirm' is used more often as a translation of verbs denoting strengthening, establishing, securing, and ratifying, and represents a greater variety of Hebrew and Greek words.

There is no clear evidence in the NT that the part of the baptismal rite which, after it became detached from the rest of the rite of initiation, came to be known in the West as *confirmatio* (cf 1st Council of Orange, 441; Canon 2), that is, the imposition of hands and/or consignation with chrism of the newly baptized, was practised in NT times. Tertullian (*De bapt.* 8–10; cf *Res. carn.* 8) and Cyprian (*Ep.* lxxiii. 9; cf Firmilian ap. Cypr. *Ep.* lxxv. 8) find authority for the imposition of hands by the bishop immediately after the baptized have emerged from the font in the narratives recorded in Ac 8^{17} 19^{6}; but it is unlikely that these instances of the laying of the apostles' hands on the newly baptized represent a normal feature of Christian initiation in NT times. They seem rather to be connected with major turning points in the Church's mission when a renewal of the special Pentecostal gifts of tongues and prophesying took place. They do, however, represent a confirmation of baptism, albeit in exceptional circumstances. He 6^{2} might be cited in support of the view that the baptismal rite already included an imposition of hands; but it is far from certain that the reference in this passage is to initiation. There is, in any case, no support in the NT for the theory of Tertullian and many later writers that the beginning of the Christian life in the power of the indwelling Spirit is to be associated with the laying on of hands, or consignation, rather than with baptism in water.

CONFISCATION.—See BAN, **2**,

CONFUSION OF TONGUES.—See TONGUES, CONFUSION OF.

CONGREGATION, ASSEMBLY.—In AV these terms are both employed to render either of the two important Hebrew words *'ēdhāh* and *ḳāhāl*, with a decided preference, however, in favour of 'congregation' for the former and 'assembly' for the latter. In RV, as we read in the Revisers' preface, an effort was made to secure much greater uniformity in the use of these words. This is also true of RSV. Of the two Hebrew words, *ḳāhāl* ('assembly') is the more widely distributed, although neither is frequent in pre-exilic literature; *'ēdhāh* ('congregation') is not used in the earlier sources of the Pentateuch, but is found at least 115 times in the Priestly Narrative, where it denotes *the theocratic community of Israel as a whole*, the church-nation in its relation to Y". The full designation, as found in Nu 1^{2} and a score of times elsewhere, is 'all the congregation of the people of Israel,' which is the equivalent of the Deuteronomic phrase 'all the assembly (*ḳāhāl*) of Israel' (Dt 31^{30}). In the older and more secular writers a similar idea could be expressed by the phrase 'all the tribes of Israel,' as in 2 S 24^{2}.

It is doubtful if there is any valid ground for the attempts to find a distinction between the two expressions 'congregation' and 'assembly,' even with P itself. For in the very same verse P sometimes employs the two terms synonymously, as in Lv 4^{13}, Nu 16^{3} RV and RSV, and in the priestly redaction of Jg 20^{1f}, the whole body of the people being intended in every case. The only two passages which seem to imply that the 'assembly' was a limited section of the 'congregation' viz. Ex 12^{6} and Nu 14^{5} ('all the assembly of the congregation'), clearly show conflate readings (cf LXX). What difference, finally, can be detected between 'the assembly of the LORD' in Nu 16^{3} 20^{4} (cf Dt 23^{3}) and 'the congregation of the LORD' in 27^{17} 31^{16}—all P passages?

In the LXX *'ēdhāh* is in most cases rendered by *synagōgē*, *ḳāhāl* by *ekklēsia*, both Greek terms being used, according to Schürer, without essential distinction to signify the religious community of Israel, as in the original Hebrew. But later Judaism, as Schürer has shown, began to distinguish between *synagōgē* and *ekklēsia*, applying the former in an empirical, the latter in an ideal, sense: the one to signify the religious community in a particular place, the other 'the community of those called by God to salvation,' the ideal Israel. This Jewish usage explains how, while *synagōgē* is occasionally found in early Patristic literature in the sense of 'the Christian congregation,' the rival word finally gained the day in Christian usage. The Christian community saw itself as the ideal Israel, and thus called itself 'the Church' (*ekklēsia*), while its Jewish counterpart remained 'the Synagogue' (see under CHURCH, SYNAGOGUE).

The word translated 'assembly' in Dt 33^{4} and Neh 5^{7} is *ḳᵉhillāh*, a form related to *ḳāhāl*. *Mōʿēdh*, related to *'ēdhāh*, and usually meaning 'appointed time or place,' is translated 'assembly' in Nu 16^{2} and La 1^{15} RSV. In Ezk 13^{9} the word *sōdh* (literally 'secret council') is used to designate the whole community (AV 'assembly,' RSV 'council'). Cf 'assembly' (*mōshābh*, literally 'a sitting') in Ps 107^{32}.

The expression **solemn assembly,** in which 'solemn' has its etymological, but now obsolete, sense of 'stated,' 'appointed' (literally 'yearly,' *sollemnis*), represents another Hebrew word, *ʿᵃṣārāh* or *ʿᵃṣereth*. This word was originally applicable to any religious gathering (Is 1^{13}, Jl 1^{14}, Am 5^{21}, 2 K 10^{20}; Jer 9^{1} (EV 9^{2}), sarcastic, RSV 'company'), but was afterwards limited mostly to connexion with the seventh day of the Feast of Unleavened Bread (Dt 16^{8}), or the eighth day of the Feast of Booths (Lv 23^{36}, Nu 29^{35}, Neh 8^{18}, 2 Ch 7^{9}).

'Holy **convocation**' occurs nine times in Lv 23, and six times in Nu 28–29; but for the same original, RSV has 'holy assembly' in Ex 12^{16}. Since *miḳrā'* comes from the verb meaning 'to call,' 'convocation' would seem the best possible rendering; yet AV, RV, ARV, and RSV all have 'assemblies' in Is 1^{13} and 4^{5}.

The '**mount of assembly** (AV, RV 'of [the] congregation') in the far north' (Is 14^{13} RSV) refers to the Babylonian or Canaanite mountain of the gods from which an aspiring lesser deity might be cast down. This mythological conception is probably also to be found in Ezk 28^{16}, Ps 48^{2} and $82^{1,6}$.

For '**tabernacle of the congregation,**' now called the 'tent of meeting' see TABERNACLE, **2**, and TENT.

CONIAH.—See JEHOIACHIN.

CONONIAH, 2 Ch 31^{12f} (AV).—See CONANIAH, **1.**

CONSCIENCE.—1. The term.—The Greek word for 'conscience,' which occurs thirty times in the NT, has a narrower meaning than the English term used to translate it. In the NT the 'conscience' is a judge of one's past acts rather than a moral guide. The term is borrowed by NT writers, especially Paul, from the

ordinary Greek language of the time. The OT has no word for 'conscience'; there the sense of guilt and obligation is expressed in more general terms, *e.g.* 'David's heart smote him' 1 S 24[5], 2 S 24[10]; 'my heart does not reproach me' Job 27[6].

The word translated 'conscience' in the NT may have the general meaning 'consciousness.' (He 10[2] RSV, ASV 'consciousness of sin(s)' is preferable to AV 'conscience of sins'; 1 P 2[19] RSV 'mindful of God,' translated literally would be 'through consciousness of God'; this is preferable to AV, ASV 'for conscience toward God.') Generally, however, 'conscience' is a moral-religious term meaning the pain experienced when one has done wrong. Usually conscience is concerned with wrong acts (He 10[22]), and a 'good conscience' (Ac 23[1], 1 Ti 1[5, 19]), or a 'clear conscience' (Ac 24[16], 1 Ti 3[9], 2 Ti 1[3], He 13[18], 1 P 3[16, 21]) is good in the sense that it reports nothing wrong about one's actions (C. A. Pierce, *Conscience in the NT*, 1955). Generally also conscience is thought of as reacting to acts which have already taken place (2 Co 1[12]). It is not thought of as a 'guide' to direct one's path.

2. Conscience and obedience to God.—Paul and other NT writers adopt a term which then as now was often used without religious meaning, and they expect that men generally, whether believers or not, will have some sensitivity of conscience. But for the NT the sense of guilt and obligation which the common-sense language named 'conscience' is a sign that each man is responsible to God (Ac 24[16], Ro 2[15f] 13[5], 2 Co 1[12]). Conscience is an index of this responsibility, even though it still functions in men who do not recognize its source.

3. Its sphere.—The sphere of conscience is choice in all its aspects. The judgment of conscience may test a Christian's loyalty to his faith or to the specific vocation to which Christ has called him (Ac 23[1] 24[16], 1 Ti 3[9]; cf 1 Co 4[4], where 'I am not aware of anything against myself' represents the verb corresponding to the noun 'conscience'), or it may deal with a specific practice like eating food offered to idols (1 Co 8[1-13] 10[23-33]), or test right and wrong action in general. Thus Paul expects that God's judgment on each man—pagans included—will be confirmed inwardly by that man's conscience (Ro 2[15f] '. . . while their conscience also bears witness and their conflicting thoughts accuse or perhaps excuse them on that day when, according to my gospel, God judges the secrets of men by Christ Jesus.')

4. The limitations of conscience.—Paul discusses conscience at length in connexion with eating food offered to idols. He shows two weaknesses of conscience. (*a*) Not all consciences judge alike. One person may find it right to eat food offered to idols, while another may find it wrong (1 Co 8[7] 10[28f]). The judgments of conscience are shaped in large measure by social and religious environment; in this case, the impact of pagan worship. Thus Paul speaks of a 'weak conscience' (1 Co 8[7, 10, 12]), which will be thrown into turmoil by seeing another Christian doing something which it judges wrong, and may thereby be led to consent to an act which is wrong for it. But Paul does not give his principal attention to the means of educating these 'weak' consciences. He accepts the variety of judgments about moral and religious practices as a permanent feature of life in the Christian fellowship. (*b*) Rather he turns to a second weakness of conscience, its self-centredness. Though a more thoughtful Christian may not be disturbed in conscience by eating food offered to idols, he must learn that the silence of his own conscience does not mean that he is free to do what seems right to him. Far more important is the obligation to exercise his freedom in a way not hurtful to the faith of another, even though the other may not be as mature as he (1 Co 8[13] 10[28-31], cf Ro 14[1-23]). Thus conscience is too self-centred a test of action to be adequate for a Christian—it does not make room for love (q.v.).

The Pastoral Epistles point out that conscience may become so seared (or scarred) by persistent falsehood that it is in effect destroyed (1 Ti 4[2]) or corrupted (Tit 1[15]).

CONSCIENCE

5. Conscience and the acts of others.—Though conscience in the NT usually refers to the acts of others only when they attract or affect one's own acts (as in eating food offered to idols), conscience may also evaluate the acts of others. Thus Paul appeals to the Corinthians that their consciences may test him, and that they may know that he is truly Christ's representative (2 Co 4[2] 5[11]). He believes that they can make an inner judgment of what is right that goes beyond their party-loyalties and personal preferences.

6. Conscience as the sense of responsibility.—In the NT 'conscience' usually has the restricted meaning of a faculty of judgment that causes pain when one has done wrong. The modern meaning of conscience, as a sense of obligation or responsibility which guides men towards what is right and restrains them from wrong, is represented in the NT not by the word 'conscience,' but in more general terms. Thus Paul says of the Gentiles that 'what the law requires is written on their hearts' (Ro 2[15]), and he speaks of God having made known in the creation his invisible nature (Ro 1[19f]). He expects that believers and non-believers will share many basic standards of right and wrong, both for instance recognizing the value of honest work (1 Th 4[12]), and with respect to the customs of dress and appearance he can speak of what 'nature teaches' (1 Co 11[14f]). He speaks of the 'inmost self' that delights in the law of God, although there is another element in personality that wars against this inmost self (Ro 7[21-25]). Likewise in the Gospels, Jesus appeals to the sense of responsibility and to an inner judgment between better and worse (*e.g.* Lk 10[36], Mt 12[9-12]). That conscience in this broader sense receives little attention in the NT is not the result of the fact that the Greek word available had a more restricted meaning. For where men believe that 'conscience,' as a sense of obligation which guides men to do right, can be an important or sufficient guide to the moral life, a word is quickly found, as 'conscience' was among some later Greek and Latin writers, and in some modern ethics. NT writers recognize the sense of obligation as the fundamental human quality, but they also see its limitations and failures so clearly that it cannot be for them the central guide to life. It has been shown above that conscience even in the narrow sense of a judge of past actions is limited by the fact that different consciences judge differently, since their moral background is different, and that its self-centred nature makes it inadequate for the Christian. These same limitations apply to conscience in the modern meaning of the sense of obligation. Furthermore, NT writers prefer to speak about obligation in ways which make it clear that man's obligation is to God, not simply to his better self or to his sense of duty. Since God has revealed Himself in His law and in Christ, the NT usually presents man's responsibility in terms of his response to these clearer demands of God (*e.g.* Lk 10[26], Jn 3[16], Ro 3[19], 1 Co 12[3]). But from the NT point of view the fundamental difficulty with the sense of obligation which modern men call conscience is that men do not follow their sense of obligation even to that degree to which it is clear to them. Paul states the situation in Romans. Men fail to respond to what they know is right, and this failure is a rejection of God who commands what is right (Ro 3[9-20]). Thus the sense of obligation, taken seriously in the presence of God, results in man's knowing his failure and sin (q.v.). Only a new action of God in Christ can set men free from their guilt and enable them to find new energy from God's presence, and thus make it possible for them to fulfil the demands which their own nature puts upon them (Ro 3[21-26] 5[1-11]). Then a new guide to action, the Spirit (q.v.) gives men power to do what is required of them (Ro 8[1-39]), and the sense of obligation finds its fulfilment, not in self-centred 'conscience,' but in love (Ro 12[1-21] 13[8-10]). Once this basic change in their relation to God has come about, men will, however, still need to train and develop their sense of responsibility, as the NT often recognizes, and a growing understanding of one's responsibility is a central feature of the Christian life (Ph 1[9f], Col 1[9], Ja 1[5]).

7. The NT and modern problems of conscience.—Two limitations of 'conscience,' as a sense of responsibility, are seen clearly in recent discussions. (*a*) Conscience varies with the setting in which it is trained. The insufficiency of 'let your conscience be your guide' is shown by the variety of moral judgments which conscientious men make. The NT also recognizes this limitation of the sense of obligation, and holds that responsibility must be trained by participation in the life of the Church, which bears witness to Christ and His will. Within the fundamental commitment to Christ and His will, however, there is room for genuine variety of opinion about what one ought to do. (*b*) Studies of the self have shown how powerful are the effects of conscience (as a sense of guilt) in limiting man's freedom by creating compulsions below the level of conscious choice. A NT perspective would admit that men may destroy themselves by trying to find a motivation simply in their own sense of obligation and by preoccupation with their failures to fulfil their responsibilities. Though many instances of preoccupation with guilt may so deprive a person of freedom that healing requires special (psychological or psychiatric) treatment, a NT perspective would hold that beyond the inward preoccupation with guilt lies the reality of man's inadequacy and guilt before the holiness of God. Just as love and acceptance may be powers which overcome the preoccupation with guilt, so in the presence of God the love and forgiveness of Christ manifested in the Cross enable the believer to be free of an 'evil conscience' (He 10^{22}). Thus though preoccupation with one's failure to accept responsibility may be destructive, the sense of guilt (q.v.) is not an aberration but a proper response to man's real situation before God and a means through which he may be led to open himself to God's love. W. J. He.—**W. A. B.**

CONSECRATION.—See CLEAN AND UNCLEAN, NAZIRITE.

CONSOLATION.—See COMFORT.

CONSUMPTION.—The Hebrew word (*kālāh*) which is translated 'consummation' in Dn 9^{27} (AV, RV; RSV 'end') is rendered 'consumption' in Is 10^{23} (AV; RV 'consummation'; RSV 'full end') 28^{22} (AV; RV 'consummation'; RSV 'destruction'), these English words having formerly the same meaning. Cf Foxe, *Actes and Mon.*, 'Christ shall sit . . . at the right hand of God till the consumption of the world.' Consumption occurs also with the same meaning in Is 10^{22} (AV, RV; RSV 'destruction'), where Hebrew has *killāyôn* (rendered 'failing' in Dt 28^{65}). But in Lv 26^{16}, Dt 28^{22} (AV, RV, RSV) 'consumption' (Heb. *shaḥepheth*) is used of a disease of the body. See MEDICINE.

CONTENTMENT.—1. The word does not occur in the OT, but the duty is implied in the Tenth Commandment (Ex 20^{17}), and the wisdom of contentment is enforced in Pr 15^{17} 17^{1} by the consideration that those who seem most enviable may be worse off than ourselves. But the bare commandment 'Thou shalt not covet' may only stir up all manner of coveting (Ro 7^{7f}); and though a man may sometimes be reconciled to his lot by recognizing a principle of compensation in human life, that principle is far from applying to every case. It is not by measuring ourselves with one another, but only by consciously setting ourselves in the Divine presence, that true contentment can ever be attained. Faith in God is its living root (cf Ps 16^{6} with v.^{5}; also Hab 3^{17f}).

2. In the NT the grace of contentment is expressly brought before us. Our Lord inculcated it negatively by His warnings against covetousness (Lk 12$^{15-21}$), positively by His teaching as to the Fatherhood of God (Mt 6$^{25-32}$) and the Kingdom of God (v.^{33}, cf v.^{19f}). St. Paul (Ph 4$^{11-13}$) claims to have 'learned the secret' of being content in whatsoever state he was. The word he uses is *autarkēs*, literally 'self-sufficient.' It was a characteristic word of the Stoic philosophy, implying an independence of everything outside of oneself. The Apostle's self-sufficiency was of a very different kind (see v.^{13}), for it rested on that great promise of Christ, 'My grace is sufficient (*arkei*) for thee' (2 Co 12^{9}). Christian contentment comes not from a Stoic narrowing of our desires, but from the sense of being filled with the riches of Christ's grace. For other NT utterances see 1 Ti 6^{8}, He 13^{5}. J. C. L.

CONVENIENT.—This English word often has in AV its primary meaning of *befitting*, as Ro 1^{28} 'God gave them over to a reprobate mind, to do those things which are not convenient' (RV 'fitting'; RSV 'improper conduct'). So in the translation of *Agrippa's Van Artes* (1684) 'She sang and danc'd more exquisitely than was convenient for an honest woman.'

CONVERSATION.—In EV the word is always used in the archaic sense of 'behaviour,' 'conduct.' In the OT, AV gives it twice (Ps 37^{14} 50^{23}), representing Hebrew *derekh*='way' (cf RV and RVm). In the NT it is used in AV to render three sets of words. (1) The noun *anastrophē*='behaviour' (Gal 1^{13}, Eph 4^{22}, 1 Ti 4^{12}, He 13^{7}, Ja 3^{13}, 1 P 1$^{15, 18}$ 2^{12} 3$^{1, 2, 16}$, 2 P 2^{7} 3^{11}), RV substituting in each case 'manner of life,' 'manner of living,' 'life,' 'living,' or 'behaviour'; the verb *anastrephesthai*='to behave oneself' (2 Co 1^{12}, Eph 2^{3}). (2) The noun *politeuma*='citizenship' or 'commonwealth' (Ph 3^{20}); the verb *politeuesthai*='to act as a citizen' (Ph 1^{27}). (3) *tropos*='manner,' 'character,' literally 'turning' (He 13^{5}). Cf RV and RVm throughout. The main point to notice is that in every case 'conversation' in AV and RV refers not to speech merely, but to *conduct*. RSV has the word only twice (Jer 38^{27}, Lk 24^{17}), both times in the modern sense of 'talk.' J. C. L.—**F. C. G.**

CONVERSION.—The noun occurs only in Ac 15^{3} (*epistrophē*), but in AV 'convert' is found several times both in OT (Heb. *shūbh*) and NT (Gr. *epistrephō*, *strephō*) to denote a spiritual turning, RV in most cases substituting '**turn.**' 'Turn' is to be preferred because (1) in the English of AV 'convert' meant no more than 'turn'; (2) 'conversion' has come to be employed in a sense that often goes beyond the meaning of the originals. RV and RSV have further corrected AV by giving active 'turn' for passive 'be converted' in Mt 13^{15} 18^{3}, Mk 4^{12}, Lk 22^{32}, Jn 12^{40}, Ac 3^{19} 28^{27}, where the Greek verbs are reflexive in meaning. In OT *shūbh* is used to denote a turning, whether of the nation (Dt 30^{10}, 2 K 17^{13} etc.) or of the individual (Ps 51^{13}, Is 55^{7} etc.). In NT *epistrephō*, *strephō* are used especially of individuals, but sometimes in a sense that falls short of 'conversion' as the conscious change implied in becoming a Christian. Mt 18^{3} was spoken to true disciples, and the 'conversion' demanded of them was a renunciation of their foolish ambitions (cf v.^{1}). Lk 22^{32} was addressed to the leader of the Apostles, and his 'conversion' was his return to his Master's service after his fall. In Acts and Epistles, however, 'convert' or 'turn' is employed to denote conversion in the full Christian sense (Ac 3^{19} 9^{35} 11^{21} 14^{15} [cf 15^{3} 'conversion'], 2 Co 3^{16}, 1 Th 1^{9}). Conversion as a spiritual fact comes before us repeatedly in the Gospels (Lk 7^{47ff} 15^{17ff} 19^{8ff} 23^{42f}) and in the history of the Apostolic Church (Ac 2$^{41, 47}$ 8$^{5f. 12}$ 9^{3ff} etc.). RV and RSV bring out the fact that in the NT conversion (as distinguished from regeneration [q.v.]) is an activity of the soul itself, and not an experience imposed from above. This view of its nature is confirmed when we find repentance (Ac 3^{19} 26^{20}; cf Ezk 14^{6} 18^{30}) and faith (Ac 11^{21}; cf 20^{21}) associated with it as the elements that make up the moral act of turning from sin and self to God in Christ. J. C. L.—**F. C. G.**

CONVINCE.—Adams (*Serm.* ii. 38) says: 'Whatsoever is written is written either for our instruction or destruction; to convert us if we embrace it, to convince us if we despise it.' This is the meaning of 'convince' in the AV. It is what we now express by *convict* (so RSV). Thus Jd 15 'to convince all that are ungodly among them of their ungodly deeds.' But RSV uses the word in Jn 16^{8}, Ac 28^{23}, 2 Ti 4^{2}, Jd 22 etc.

COR-ASHAN, 1 S 30[30] (RV).—See Bor-ashan.

CORBAN.—Hebrew *ḳorbān* is a technical term for sacrifice, found in Ezk 20[28] and the Priestly Code, and rendered 'offering' or 'oblation.' It means something brought near, *i.e.* to the altar, or to God. The word Corban stands in the NT at Mk 7[11], where Jesus condemns the evasion of duty to parents on the ground of a vow to offer to God what is owed to them. See Sacrifice and Offerings, Vows.

CORBE, 1 Es 5[12] (AV).—See Zaccai.

CORD, ROPE.—Hebrew possesses a considerable number of words rendered, without any attempt at uniformity, by 'cord,' 'rope,' and a variety of other terms. It is difficult for the English reader to recognize the same original in the Psalmist's bow 'string' (Ps 11[2]) and the 'green **withs**' (RV '**withes**'; RSV 'fresh **bowstrings**,' cf RVm) with which Samson was bound (Jg 16[7]); or again in the tent ropes of Is 33[20] (EV 'cords') and the ships' '**tacklings**' (AV, RV; RSV '**tackle**') of v.[23]. The former set were probably of animal sinews or gut, the latter of twisted flax. The stronger ropes were of three strands (Ec 4[12]). No doubt the fibres of the palm and, as at the present day, goats' hair were spun into ropes. The process of rope-making from leather thongs is illustrated on an Egyptian tomb, the '**wreathen work**' (literally 'rope-work') of Ex 28[14] (AV, RV; RSV 'twisted like cords'), where, however, gold wire is the material used. Ec 12[6] speaks also of a silver cord, and Job 4[12] of 'a rope of rushes' (see RVm; AV 'hook'). The Greek word for the cords of our Saviour's scourge (Jn 2[15]) and the ropes of Ac 27[23] also denoted originally such a rope.

The everyday use of cords for binding evil-doers suggested the metaphor of the wicked man 'holden with the cords of his sin' (Pr 5[22]; RSV 'toils'), while from the hunter's snares comes the figure of Ps 140[5]; also 'the cords of death' of Ps 116[3] (RV; AV 'sorrows of death'; RSV 'snares of death.')

CORE.—AV in Sir 45[18], Jd [11] has this form for RV, RSV **Korah** (q.v.).

CORIANDER SEED (*gadh*, Ex 16[31], Nu 11[7]).—A product of the *Coriandrum sativum*, a common cultivated plant all over the East. It has a carminative action on the stomach. It is a globular 'fruit' about twice the size of a hemp seed. E. W. G. M.

CORINTH was the capital of the Roman province of Achaia, and, in every respect except educationally (see Athens), the most important city in Greece in Roman times. It was also a most important station on the sea route between E. and W., the next station to it on the E. being Ephesus, with which it was in close and continual connexion. Its situation made it an important centre of Christianity. The city occupied a powerful position at the S. extremity of the narrow four-mile isthmus which connected the mainland of Greece with the Peloponnese. Its citadel rises 1800 feet above sea-level, and it was in addition defended by its high walls, which not only surrounded the city but also reached to the harbour Lechaeum, on the W. (1½ miles away). The other harbour, Cenchreae, on the E., on the Saronic Gulf, was about 8½ miles away. The view from the citadel is splendid. The poverty of the stony soil and the neighbourhood of two quiet seas made the Corinthians a maritime people. It was customary to haul ships across from the one sea to the other on a made track called the Diolkos. This method at once saved time and avoided the dangers of the voyage round Cape Malea (S. of the Peloponnese). Large ships could not, of course, be conveyed in this way, and in their case the goods must have been conveyed across and transhipped at the other harbour. In A.D. 67, under Nero, a canal was begun across the isthmus, but the project was abandoned. In 1893 a modern ship canal was opened, which saves 200 miles on the voyage from Italy to Piraeus. The place was always crowded with traders and other travellers, and we find Paul speaking of Gaius of Corinth as 'my host and of the whole Church' (Ro 16[23]). The moral conditions at Corinth, in ancient times, were notorious. It was virtually a seaport, a meeting place of all nationalities, and its devotion to Aphrodite encouraged prostitution. But it had many other shrines in addition to the famous temple of Aphrodite which crowned the height of Acro-Corinthus; there were temples to Isis and Sarapis, Helios, the Great Mother, the Fates, Demeter and Korē. Within the city was at least one Jewish synagogue, a fragment of whose inscribed lintel still bears the letters AGOGEEBR, obviously part of the title, 'Synagogue of the Hebrews.'

The Corinth of St. Paul was a new city. The old Corinth had been destroyed by the Romans in 146 B.C., but exactly a hundred years afterwards it was refounded by Julius Caesar as a *colonia*, under the name *Laus Julia Corinthus* (see Colony). A number of Roman names in the NT are found in connexion with Corinth: Crispus, Titius Justus (Ac 18[7f]), Lucius, Tertius, Gaius, Quartus (Ro 16[21–23]), Fortunatus (1 Co 16[17]). The population would consist of (1) descendants of the Roman colonists of 46 B.C., the local aristocracy; (2) resident Romans, government officials, and business men; (3) a large Greek population; (4) other resident strangers, of whom Jews would form a large number (their synagogue Ac 18[4]). Of these some joined Paul (Ac 18[4–8], Ro 16[21], 1 Co 9[20]), and the consequent hatred against him led to a plot against his life. The church, however, consisted chiefly of non-Jews (see 1 Co 12[2]).

Paul did not at first intend to make Corinth a centre of work (Ac 18[1]), but a special revelation altered his plans (Ac 18[9f]), and he remained there at least eighteen months. The opposition he met in the Jewish synagogue made him turn to the Gentiles. Paul left the baptism of his converts almost entirely to his subordinates, and himself baptized only Stephanas (1 Co 16[15]), Gaius (Ro 16[23]), and Crispus, the ruler of the synagogue (1 Co 1[14–16]). Some weeks after his arrival in Corinth, Paul was joined by Silas and Timothy, returning from Macedonia. News brought by Timothy caused him to write there the First Epistle to the Thessalonians (1 Th 3[6]), and the Second was probably written there also, soon after the receipt of an answer to the First. While Paul was in Corinth, **Gallio** (q.v.) came there as proconsul of the second grade to govern Achaia, probably in the summer of the year A.D. 52. The Jews brought an action before him against Paul, but Gallio, rightly recognizing that his court could take no cognizance of a charge of the sort they brought, dismissed the action. Paul's preaching was thus declared to be in no way an offence against Roman law, and in future he may have relied more on his relation to the State, as he faced the growing enmity of the Jews. After the examination, Gallio permitted the populace to show their hatred to the Jews (Ac 18[17]). It was in Corinth that Paul became acquainted with Prisca and Aquila (Ac 18[2, 3, 18, 26]), and he lived in their house during all his stay. They worked at the same industry as himself, as leather workers or 'tent-makers,' and no doubt influenced his plans for later work. They also left for Ephesus with him.

Christianity grew fast in Corinth, but the inevitable dissensions occurred. Apollos had crossed from Ephesus to Corinth (Ac 18[27], 2 Co 3[1]) and done valuable work there (Ac 18[27f], 1 Co 1[12]). He unconsciously helped to bring about this dissension, as did also Cephas, if (but see next article 4) he visited Corinth. The subject of these dissensions is, however, more appropriately dealt with under the following two articles. The Apostle wrote at least three, perhaps four, letters to the church; the

first, which is lost (1 Co 5[9]); the second, which we call First Corinthians, and which was probably carried by Titus (Timothy also visited Corinth at the instance of Paul, 1 Co 4[17]); the third, our Second Corinthians, which was taken by Titus and Luke (2 Co 8[16-18] 12[18]). Some scholars view 2 Co 10–13 as part of the 'stern' or 'painful' letter which preceded 2 Co 1–9 (see Paul, 5, and CORINTHIANS, SECOND). Paul spent three months in Greece, chiefly no doubt at Corinth, in the winter of A.D. 56–57. Whether the Corinthians actually contributed or not to Paul's collection for the poor Christians at Jerusalem must remain uncertain though most probable.

CORINTHIANS, FIRST LETTER TO THE.—1. The Question of integrity.—We have two letters to the Corinthians, but Paul himself refers to four. In 1 Co 5[9] a former letter is mentioned (A) and in 2 Co 2[3f. 9] he speaks of a letter written 'with many tears' (C), which must be dated between 1 Co (B) and 2 Co (D). With regard to 2 Co the question has often been discussed, whether or not chs. 10–13 represent the in-between-letter (written with 'tears' C). With regard to 1 Co the question of integrity is less often discussed (yet see J. Weiss). It is improbable that the Christian congregation at Corinth lost or suppressed any letters of Paul. The literary analysis of the two existing letters leads to the further assumption that the four letters to Corinth were put together by the Corinthian congregation to form the two existing ones. Analysis shows that we can assume in

1 *Co* the letters A and B (A: 6[12-20], 9[24]–10[22], 11[2-34], 12–14; B: 1[1]–6[11], 7[1]–9[23], 10[23]–11[1], 15–16), and in

2 *Co* the letters C and D (C: 2[14]–7[4], 9, 10–13; 6[14]–7[1] is debatable; D: 1[1]–2[13], 7[5-16], 8).

This literary analysis is—with more or less agreement—supported by J. Weiss, H. Windisch, R. Bultmann, J. Héring, E. Dinkler, W. Schmithals; see also R. H. Strachan (in the Moffatt Comm.). Yet it must be noted that liberal scholars like H. Lietzmann and W. G. Kümmel think that the two canonical letters as a whole are integral, and that—as Lietzmann suggests—the breaks in the continuity of thought resulted from 'a sleepless night.' Among British and American scholars this view is also held by C. T. Craig, H. L. Goudge, A. H. McNeile, Allan Menzies, and others. Hans Windisch believed that 2 Co 10–13 belonged to a later letter than chs. 1–9. On the other hand, the majority of British and American scholars hold that 2 Co 10–13 was at least part of the 'stern' letter which preceded chs. 1–9, and that 6[14]–7[1] is perhaps a fragment of a still earlier letter. A lexicographical article can only hint at such possibilities and probabilities. We may proceed by presupposing that both 1 and 2 Corinthians are entities in themselves—though we have serious doubts on this point.

2. Outline and character of the letter.—1 Co as we have it before us may be outlined as follows:

1[1-9]: Address and Prooemium.
1[10]–4[21]: The parties in Corinth.
5[1-13]: Fornication.
6[1-11]: Lawsuits.
6[12-20]: Warning concerning prostitutes.
7[1-40]: Marriage.
8[1]–10[12]: Meals offered to idols.
10[23]–11[1]: Practical behaviour.
11[2-16]: The veiling of Women.
11[16-34]: The Eucharist.
12[1]–14[40]: Spiritual Gifts.
15[1-58]: The Resurrection of the Body.
16[1-24]: Conclusion and final Greetings.

The outline demonstrates the variety of mostly ethical themes which are anchored in christological statements. With the exception of ch. 1[1-9], which probably was composed independently by Paul and later included, all the themes considered in the letter go back to specific questions coming from Corinth or to news concerning the Corinthian congregation which had reached Paul. It is difficult to construct an inner line leading up to one central idea which embraces or underlies all other subject-matters, be it 'love' or 'resurrection' (K. Barth, *e.g.*, sees in ch. 15 the theme of the letter as a whole). Yet even when assuming that our letter is a later combination of two earlier letters one must acknowledge that there is an actual centre, a red line running through the whole, namely the Christ-event, to which all the decisions of Paul refer. And this centre implies that we must read and interpret the letter as an eschatological proclamation. Each actual question is answered in the light of Christ's resurrection, which has opened the future for those who believe in Him and determines the existential being of men and all their ethical decisions.

3. The Occasion of the Letter.—Five years had elapsed since Paul's first evangelization of Corinth (Ac 18[1-17]) when he addressed the present letter to the Christians in that great centre of commerce. Corinth was the capital of the Roman province Achaia, after 29 B.C., and had at the time of Paul a greater importance than Athens. The harbour-city was known as a vicious and pleasure-loving place, being a commercial bridge between Orient and Occident in the ancient world. No doubt there had already been frequent communications, especially during the Apostle's stay in Asia, for the journey between Corinth and Ephesus was relatively easy. These communications may have been by letter (1 Co 7[1]) or by oral report, or perhaps by a lost correspondence. The household of Chloe is mentioned (1 Co 1[11]) and may be his informant, or Stephanas, the first Christian of Achaia, who had been baptized by Paul (1 Co 16[15] 1[16]). Further we cannot say with certainty whether the words in 1[2] 'together with all those who in every place call on the name of our Lord Jesus Christ . . .' refer to Christians in Achaia outside of Corinth (cf 2 Co 1[1]). The occasion of the letter is a series of questions addressed to the Apostle by the congregation, and a private report which has reached him orally.

4. The state of the Corinthian Church.—The majority of the Christians at Corinth were Gentiles. The general Hellenistic atmosphere and Gnostic tendencies there led to most of the evils or misunderstandings for which Paul rebukes them. (The thesis of Schmithals, that Paul attacks Jewish Gnostics, probably coming from Palestine, is based upon an overexegesis and generalization of 2 Co 11[22].) During his second journey Paul travelled via Philippi, Thessalonica, and Beroea (Ac 16[11]–17[15]) to Athens (Ac 17[16ff]), where he obviously had no great success. In Corinth he first worked alone, later Aquila and Priscilla helped him, and Silas and Timothy arrived from Macedonia (Ac 18[2ff]). Paul stayed in Corinth one year and six months (Ac 18[11]). Soon after the Jewish attack upon Paul, the seizure of Sosthenes, and the trial before Gallio, the Apostle left together with Aquila and Priscilla for Ephesus (Ac 18[18ff]).

About the organization of the Corinthian Church it is difficult to form a clear judgment. We do not yet have a hierarchical order, because it is still an eschatological congregation, a 'congregational democracy.' This does not exclude regulations or a churchly order, as is made explicit in 1 Co 12[4ff]. And in 12[28] we read of apostles, prophets, and teachers (the term 'presbyter' does not occur), referring to offices which were not locally attached; local officers with various gifts are also mentioned, all being 'charismatic' officers.

The state of the Corinthian Church at the time of our first letter was marked by *party spirit* (chs. 1–4). Presumably this was the actual reason for the writing of 1 Co. In 1[12] Paul says that 'each one of you says "I belong to Peter," or "I belong to Apollos," or "I belong to Cephas," or "I belong to Christ."' It is a question whether *three* parties are meant, since 'I belong to Christ' refers to the only legitimate answer, or whether the sentence refers to *four* existing parties in Corinth. The reference by Clement of Rome (*c* A.D. 95), 'To be sure, under the Spirit's guidance, he wrote to

you a letter about himself and Cephas and Apollos, because even then you had formed cliques' (1 Clem 47[3]), is obviously written in view of 1 Co, but it is an exegetical problem whether he quoted 3[22]—where we have *three* parties—or 1[12]—where we have *four*. The result is: we cannot say on the basis of later exegesis what the Pauline text really meant. It is possible that the text of the letter as a whole says what is meant. We know about Paul's theology; through him we know also about Cephas-Peter's theological thought; Apollos is mentioned and pictured in Ac 18[24ff]; he was an Alexandrian Jew, working at Ephesus and Corinth, mentioned also in 1 Co 3[4–8, 22] 4[6], later returning to Ephesus (16[12]). He obviously worked independently of Paul (his relation to John the Baptist is questionable). Yet all these names may be just examples of churchly officers which were or could be misunderstood as mystagogical heroes. The main point is, the content of our letter (and of 2 Co too) does not give evidence of three or four parties but points to only one opposition group, namely a primarily Hellenistic Gnostic one. This observation can only be proved here with regard to 1 Co by considering its various themes. The question arises whether or not this one heretical group is to be connected with missionaries coming from Peter. Or was its hero Apollos? We can only conclude at this point that Paul sets against all factions (or schisms?) the event of the cross: 'Jesus Christ and him crucified' (2[2]), 'a stumbling-block to Jews and folly to Gentiles' (1[23]), and proclaims this event as the grace coming 'from God' (4[5]—according to K. Barth 'the secret nerve of the whole paragraph'). This implies that men can never rely upon man's judgment or a humanly designed gospel, but have to search for the Christ-centred gospel which comes 'from God.' As clear as this is, it opens up the difficulty that we hear God's *Euangelion* through man's proclamation, and are faced with the task of discrimination. Further characteristics of the opposition may be found in the following paragraphs, but they cannot be derived from Acts.

5. Moral Scandals (ch. 5).—A Christian had married his (probably heathen) step-mother. We cannot say whether his father was still alive or not (2 Co 7[12] does not refer to this incident). According to both Jewish (Lv 18[7f. 20]11) and Roman law this was forbidden. The Corinthian Church did not condemn this action and presumably did not even mention it in their letter to Paul. The Apostle reproves them for tolerating such immorality 'of a kind that is not found even among pagans' (5[1]). He orders (altering the punctuation), 'When you are assembled in the name of the Lord Jesus, and my spirit is present, with the power of our Lord Jesus . . . to deliver this man to Satan for the destruction of the flesh . . .' This cannot mean simply excommunication, since Paul continues: 'that his spirit may be saved in the day of the Lord Jesus' (5[4f]). We note that Paul demands an action from the congregation as a whole, not a decision from one of the officers. And he will not punish in order to annihilate the offender as a person, but in order to save his inner self. Just this intention to save 'his spirit' excludes excommunication (5[13b] is quotation of Dt 17[7]). Paul probably thinks in terms of a punishment by death, as told in Ac 5[5, 10] (cf *Acta Thomae* 6; *Acta Johannis* 86; cf 1 Ti 1[20]). In the further context, especially 5[9ff], the relation of the Christians to the Gentiles is discussed and a misunderstanding corrected. The Apostle does not order Christians 'to go out of the world,' but to stay in a mixed society. What he demands is this: cleanness among brothers, *i.e.* the holiness of the Church, and therefore inner-churchly discipline.

6. Legal Scandals (6[1–11]).—Paul rebukes the Corinthians for litigiousness, and writes principally about the problem of law-suits among Christians. The connexion with the previous section is given by the verb 'to judge' (twice in 5[12f] and again in 6[1]). Two different answers are given. In vv.[1–6] he demands that law-suits should be settled in the midst of the congregation through arbitration (similarly as in the Jewish diaspora), with a Christian acting as arbiter. The civil law is not discussed and the idea of right is not defined. In vv.[7] and [8] Paul demands that they suffer injustice rather than seek their own rights, *i.e.* the idea of personal rights is simply put aside and self-denying love is demanded. According to Paul's other letters this position seems to be his primary one, because looking out for one's own rights is close to 'boasting.'—The interesting point of this section is that Paul connects his decision with a reference to baptism, in vv.[9–11]: 'The unrighteous will not inherit the kingdom of God' . . . 'but you were washed, you were sanctified, you were justified. . . .' This does not imply that Christians possess a new quality, but that their baptism includes a *task of becoming*, namely to become holy, righteous, good.—The case, of course, concerns 'civil law,' not 'criminal law,' yet this historical reference does not exclude other implications, since *all* legal and political decisions of a Christian should and must go back to his awareness of being a member of the body of Christ—of his being 'holy' in the sense of Lv 17–20. The new being in Christ is a down-payment and guarantee of the Christians becoming real members of Christ.

7. Questions of Marriage (6[12–7]40).—The modern chapter divisions (introduced by Stephen Langton in the 13th cent.) are not entirely satisfactory. A break should come after 6[11]. The following section (6[12–20]) contains an answer to a previous letter from Corinth. The correspondent had said, 'All things are lawful for me.' The apostle replies, 'but not all things are helpful.' 'Food is meant for the stomach and the stomach for food' was the thesis in Corinth, *i.e.* let us allow freedom for sexual expression, since God will ultimately destroy both food and stomach as belonging to the flesh. Paul's answer is: The body as a whole belongs to the Lord; therefore the stomach and the sexual organs cannot live their own life. Our bodies are members of Christ—therefore no relation to prostitutes is allowable. Obviously the Apostle is fighting against a libertinistic and gnostic concept. Yet his argumentation involves at the same time a prejudice against marriage as such, which comes up in ch. 7. It is usually thought that the Corinthians wished to extol asceticism, basing their views on words like Mt 19[11f], and that they suggested that celibacy was to be strongly encouraged in all. The Apostle gives an answer, which is conditioned by his expectation of the approaching parousia (7[26, 29]). It does not matter whether one marries or not—but it is better not to marry. A tendency towards asceticism is obvious (7[8]); marriage is a concession for those who 'cannot exercise self-control' (7[9]). In v.[26] Paul gives his own opinion concerning marriage: 'It is well for a person to remain as he is.' And in vv.[29–30] the Apostle sounds the key for all ethical decisions: 'I mean, brethren, the appointed time has grown very short; from now on, let those who have wives live as though they had none, and those who mourn as though they were not mourning, and those who rejoice as though they were not rejoicing, and those who buy as though they had no goods, and those who deal with the world as though they had no dealings with it. For the form of this world is passing away.' This passage has an importance for *Christian ethics* like no other word of Paul. Man's relation to the world is a dialectical and paradoxical one. His existence in this world is always 'as if not,' *i.e.* he participates in all affairs yet his main interest is the 'Reign of God.' Of course he *is* married, but he is aware that 'the form of this world is passing away' (7[31]).

8. Social Questions (8[1–11]1).—The whole section concerns the right understanding of Christian freedom. (*a*) *Food.*—The opening phrase: 'all of us possess gnosis' seems to be in tension with 8[7]: 'not all possess gnosis.' The tension is removed as soon as one recognizes that knowledge as such without love and humility is nothing. And the very knowledge which is inherent in faith, all do not possess. Often it is just those who boast about their gnosis who do not search for it in Christ. This thesis is exemplified by a discussion of the

Corinthian food problem, *i.e.* whether Christians may eat meat which has previously been offered to idols, as most of the meat sold in Corinth would have been. Paul's answer may be paraphrased like this: 'The false gods are really non-existent; we have but one God; as there is no such thing really as an idol we are free to eat meats offered in idol temples.' But there are weaker brethren who would be scandalized. 'Meat will not commend us to God: it is indifferent.' But do not let your liberty cause others to fall (note the change of pronoun in v.^{8f}). The whole section is obviously directed against Gnostic Christians who think they possess the quality of holiness through baptism and participation in the Lord's Supper, and therefore mean to have all freedom, even to eat meat which was previously offered to idols, since it cannot infect the inner self of a believer. Against this Paul writes. Without mentioning the decree of Ac 15^{29} he stresses the principle of love: offence must not be given to the weaker brethren.

(*b*) *Idol Feasts* (8$^{10-13}$ 10^{14}–11^{1}).—Paul allows freedom, yet not absolutely. He forbids eating at idol feasts, if a Christian member is shocked by the participation of a brother, who does it on the ground of his conscience. In principle 'we are no worse off if we do not eat, and no better off if we do' (8^{8}). Yet our behaviour has to follow the knowledge that Christ died for all of us and that 'sinning against your brethren and wounding their conscience' means to 'sin against Christ' (8^{12}). Paul further explains the actual incompatibility of pagan cult feasts and the Christian Eucharist: 'You cannot partake of the table of the Lord and the table of the demons. Shall we provoke the Lord to jealousy?' (10^{21f}). In the context Paul's words about the Lord's supper (10^{16f}) are significant, especially in comparison with 11^{23ff}.

(*c*) *Digression on Forbearance* (9^{1}–10^{13}).—Paul says that he habitually considers the rights of the others and does not press his own rights as an Apostle to the full; he implies that the Corinthians should not press their liberty so as to scandalize others. Obviously some opponents at Corinth had questioned Paul's authority or legitimacy as an Apostle, because he did not accept financial support. Paul announces his position as an Apostle, and the right of the Christian minister to live by the gospel, but he will not use his rights to the full (9^{18}). He teaches self-denial and consistency from the example of the Isthmian games (9^{24ff}). When Paul in 10^{1} speaks of 'our fathers,' he does not turn to the Jewish section of the Corinthian Church, but considers the whole Church as being the spiritual descendants of Israel. In this line the following typology has to be understood: Moses acting with the Israelites is the prototype of Christ's acting with the Christians. The example is given in order to warn against a dangerous self-security, as if a Christian already possessed full salvation as a sacramental possession. 'Therefore let any one who thinks that he stands take heed lest he fall' (10^{12}). In the background we again must assume Gnostic concepts.

9. Christian Worship (11^{2}–14^{40}).—(*a*) *The Veiling of Women.*—In reply (as it seems) to another question, Paul says that it is the Christian custom for men 'praying or prophesying' to have their heads uncovered, but for women to have theirs covered. This apparently trivial matter is an instance of the application of general principles to Christian ceremonial. Paul's injunction is based on the subordination of the woman to the man, and his advice is: Faith in Christ does not imply a revolution of our social order.

(*b*) *The Eucharist.*—The Corinthians joined together a social meal—somewhat later called an Agape or Love-feast—and the Eucharist, probably in imitation both of the Last Supper and of the Jewish and heathen meals taken in common. To this combination the name 'Lord's Supper' (only here in NT) is given. But the party-spirit, already spoken of, showed itself in this custom; the Corinthians did not eat the Lord's Supper, but their own, because of their factions. Paul therefore gives the narrative of our Lord's Institution as he himself had received it, strongly condemns those who make an unworthy communion as 'guilty of the body and the blood of the Lord,' and inculcates preparation by self-examination. It is chiefly this passage that has led some to think that Paul is quoting the Synoptic Gospels (see below, **11**), where we have the parallels in Mk 14$^{22-25}$, Mt 26$^{26-29}$, and Lk 22$^{15-20}$. The Lukan account, as we have it in our Bibles, namely the shorter text, is very like the Pauline. But the inference is very improbable. The greater probability is (J. Jeremias), that the Lukan passage contained at first only 22$^{15-19}$, while 22^{19b} and 20 were later added on the basis of 1 Co 11. In other words: the Lukan version has no independent value. In the main points—namely proclamation of the death of Christ, re-establishment of the Covenant, anticipation of the coming messianic meal—Paul agrees with the accounts of Mark and Matthew, although the Greek texts differ. The similarity is best understood when we recognize that Paul as well as the Evangelists go back to an Aramaic source.

(*c*) *Spiritual Gifts* (chs. 12–14).—Again Paul seems to answer questions raised by the Corinthians concerning the unity of the congregation. He emphasizes, on the one hand, 'You are the body of Christ and individually members of it' (12^{27}), taking up a Gnostic metaphor (cf Ro 12); on the other hand 'There are varieties of gifts, but the same Spirit . . . the same Lord . . . the same God' (12^{4f}). Since all Christians were 'baptized into one body' (12^{13}), the variety of gifts among them does not establish a difference of value. In the hymn-like digression of ch. 13, Paul points to 'a still more excellent way' and shows that of all spiritual gifts love is the greatest, that without it all other gifts are useless. Yet love is no moral ideal, no human quality; love is God's gift to man and an eschatological possibility. Therefore Paul concludes, 'So faith, hope, love, abide, these three; but the greatest of these is love.' Paul thus proclaims that spiritual gifts are means to an end, not an end in themselves; and he therefore upholds 'prophecy' (*i.e.* in this connexion, the interpretation of Scripture and of Christian teaching) as superior to speaking with tongues, because it edifies all who are present. The principle of freedom in the use of spiritual gifts at Christian worship requires self-discipline and order. 'For God is not a God of confusion but of peace' (14^{33}). In this context he writes, further, that women are to keep silence in the public assemblies (14^{34f}), following the line of thought in ch. 11.

10. The Resurrection of the Body (ch. 15).—This, the only doctrinal chapter of the letter, cites at the beginning the earliest tradition of our Lord's Resurrection. The words 'For I delivered to you . . . what I also received' show that the passage is pre-Pauline. Whether the formula goes from v.^{3b} to v.^{5} or to v.^{7} is difficult to decide. We are inclined to think that the earliest tradition closed with v.^{5} and that Paul himself added the other witnesses according to a chronological sequence. Apparently Gnostic Christians at Corinth felt a great difficulty in accepting the doctrine of the Resurrection of the body. Paul characterizes their position in v.^{13}, 'there is no resurrection of the dead'; but he complicates the picture by assuming in v.^{29} that they practised the vicarious baptism of the dead. It seems as if the Gnostics did not deny a spiritual Resurrection but a realistic physical one, and that they hoped for a liberation of man's self from the body at death (the passage must be read together with 2 Co 5$^{1-5}$). Paul replies that Christ has risen, as many still alive can testify, and that therefore the dead will rise. For the treatment of the question how to understand this miracle (15^{35ff}) see PAUL'S THEOLOGY, **8**, and RESURRECTION. The Corinthian scepticism does not seem to have died out at the end of the century, for Clement of Rome, writing to Corinth, strongly emphasizes the doctrine (1 Clem 24–26), though it had no longer the feature of Gnostic heresy.

11. Date and genuineness of the letter.—It is referred to as Paul's by Clement of Rome, *c* A.D. 95 (1 Clem 47), who speaks of the parties of Paul, Cephas, and Apollos,

but omits the Christ-party (see above, 3); we cannot infer from his phrase 'the epistle of the blessed Paul' that he knew only one Epistle to the Corinthians, as early usage shows (Lightfoot, *Clement*, ii, 143). There are other clear allusions in Clement. Ignatius (Eph. 18) refers to 1 Co $1^{20, 23f.}$ 4^{13} and probably 2^{6}; Polycarp (§11) quotes 1 Co 6^{2} as Paul's; references are also found in the 'Martyrdom of Polycarp,' in Justin Martyr, and in the Epistle to Diognetus; while Irenaeus, Clement of Alexandria, and Tertullian at the end of the 2nd cent. quote the Epistle fully. Of the 2nd cent. heretics, the Ophites and Basilides certainly knew it. Internal evidence fully bears out the external; no Epistle shows more clearly the mark of originality. It is in fact one of the 'generally accepted' letters of Paul and all arguments against its authenticity have died out. For the open question of the literary unity and integrity see above, 1. We may then take the genuineness of the letter as being unassailable.

If so, when and where was it written? In 16^{8} Paul writes: 'But I will stay in Ephesus until Pentecost.' With this coincide the plans of $16^{3\pi}$ and the remarks in 16^{19}. Relatively to the rest of the Pauline chronology, the date can be approximately fixed. In the year of his arrest at Jerusalem, Paul had left Corinth in the early spring, after spending three months there (Ac $20^{3, 6}$). He must therefore have arrived there in late autumn or early winter. This seems to have been the visit to Corinth promised in 2 Co 13^{1}, which was the third visit. Two visits in all must therefore have preceded 2 Cor (some think also 1 Cor), and in any case an interval of some months between the two Epistles must be allowed for. In 1 Co 16^{6} the Apostle had announced his intention of wintering in Corinth, and it is possible that the visit of Ac 20^{3} is the fulfilment of this intention, though Paul certainly did not carry out all his plans at this time (2 Co $1^{15f, 23}$). If so, 1 Co would have been written from Ephesus in the spring of the year before St. Paul's arrest at Jerusalem. This date is favoured by the allusion of 5^{7f}, which suggests to many commentators that the Easter festival was being, or about to be, celebrated when Paul wrote. The absolute date will depend on our view of the rival schemes given in article CHRONOLOGY OF THE NT, I, 4. We suggest the time as Easter A.D. 55. E. D.

CORINTHIANS, SECOND LETTER TO.—1. Circumstances of the Letter.—2 Co is generally viewed as one of the most personal letters of Paul, marked by apologetic and polemic (Jülicher). Nevertheless, we must not interpret the Letter primarily as a biographical document. Paul writes first of all as an Apostle, not as a private person, and he includes personal passages only in order to lay bare his apostolic authority. We may even say that the *theme* of the Letter is the apostolic office. In order to strengthen it, Paul asks for the obedience and confidence of the congregation (2^{9} 7^{12} 10^{6-11} 13^{2f}). While in $2^{14-6^{10}}$ the apostolic office appears as the explicit theme, in chs. 10–13 the discussion concerns the apostolic qualifications of Paul himself, which had been questioned by his opponents in Corinth. Paul's main argument for his legitimacy as an apostle is formulated in 4^{5}: 'For what we preach is not ourselves, but Jesus Christ as Lord, with ourselves as your slaves for Jesus' sake'—pointedly repeated in 13^{3}: 'Christ is speaking in me.' Recognizing this argument as Paul's primary concern, one may even say, with a slight change of accent, that the Letter's theme is given in the ministry of preaching, *i.e.* in *the work of proclaiming Christ Jesus* (cf 4).

It is surprising that 2 Co does not take up the problems mentioned in 1 Co, *e.g.* the three (or four) parties (1 Co 1–4) or the problems of Christian worship, marriage, and social questions. The only recurring theme is the resurrection of the body (2 Co 5^{1-10}), which appears in a different perspective. All the other topics circle around one point: the right relationship between the Christian congregation and its Apostle.

2. Paul and Corinth.—In order to recognize the differences between 1 and 2 Co more clearly, the events must be recalled which took place between the writing of the two letters. According to 1 Co the Apostle was in Corinth only once (cf Ac $18^{1, 18}$), namely when founding the Christian congregation there as the first in Achaia. According to 2 Co he had visited Corinth twice: 12^{14} 'For the third time I am ready to come to you'; 13^{1}, 'This is the third time I am coming to you.' One must therefore conclude that Paul paid a visit to Corinth between writing 1 and 2 Co, a visit to which he also refers in 2 Co 2^{1}, 'For I made up my mind not to make you another painful visit' (cf 12^{21}). The 'pain' (more precisely 'grief,' *lupē*) apparently was caused through an offence by a fellow Christian (2^{5-11} 7^{11f}). The visit mentioned cannot be the first one nor the one planned in 1 Co 16^{5-9}, according to which Paul intended to stay longer in Corinth (perhaps throughout the winter) in order to return from here—taking with him the collection—to Jerusalem. It cannot be so, because 2 Co was written from Macedonia after he had been in Ephesus ($2^{12f.}$ 7^{5f}). In other words, the visit which took place between 1 and 2 Co was not yet intended when 1 Co was written.

Besides this 'in between' visit one must also assume an 'in between' letter. In 2 Co 2^{3f} Paul mentions a letter written 'out of much affliction and anguish of heart and with many tears,' and in 2^{9} he adds the purpose of this letter: 'This is why I wrote, that I might test you and know whether you are obedient in everything.' This letter 'with many tears' cannot be identical with 1 Co, but must have been written after the intervening visit caused by the previous offence. Therefore Paul says in 7^{12}, 'So although I wrote to you, it was not on account of the one who did the wrong, nor on account of the one who suffered the wrong, but in order that your zeal for us might be revealed to you in the sight of God.' This letter apparently was carried by Titus to Corinth because his return—at first waited for ($2^{13f.}$ 7^{5})—seems to have been the actual reason for the writing of 2 Co ($7^{6\pi}$). Titus has reported the success of the 'in between' letter. The congregation has proved obedient (2^{5f}) and Paul rejoices: 'At every point you have proved yourselves guiltless in the matter' (7^{11})

3. Integrity.—Another and independent reason for writing 2 Co was the activity of opponents—called 'false apostles' in 11^{13}—who were raising a discussion about the true apostolate, which somehow isolates chs. 10–13. This observation, made long ago, has led to the assumption that this section should be considered as a 'four chapter letter,' identical with the severe letter mentioned in 2 Co 2^{4}. As early as 1870 Hausrath demonstrated convincingly that 2 Co 10–13 cannot form an original unit with 2 Co 1–10. Since then some scholars have regarded the four chapters as the letter written between 1 and 2 Co. But more than that needs to be noted. Inside chs. 1–7 we recognize 2^{14}–7^{4} as a coherent unit, 2^{13} being well connected with 7^{5}. This agreed upon, literary analysis further recognizes the inner link between 1^{1}–2^{13} and 7^{5-16} and the character of the latter as a concluding part (letter D); consequently 2^{14}–7^{4} plus 10–13 represents the 'in between' letter (C). The real difficulty is in ch. 8 and 9, which cannot originally have belonged together. Although conclusive proof is lacking, we suggest identifying ch. 9 with C and ch. 8 with D (see CORINTHIANS, FIRST LETTER TO THE, 1.

4. Outline and character of the Letter.—We present the following outline of 2 Co without taking up the results of the literary analysis.

(1) 1^{1-11}. Preface and prooemium: a personal introduction.
(2) 1^{12}–2^{13}. Paul and his relation to the Corinthian church (explanation of his change of plans; the offence of an opponent is forgiven).
(3) 2^{14}–7^{4}. The apostolic office.
  (A) 2^{14}–4^{6}. The openness (*parrēsia*) of Paul.
    (*a*) 2^{14}–3^{6}. Paul's conception of his vocation as Apostle.

(*b*) 3$^{7-18}$. The vocation gives the Apostle his openness.
(*c*) 4$^{1-6}$. Paul fulfils his office in proclaiming the 'open statement of the truth.'
(B) 4^{7}–6^{10}. The concealment and revelation of glory (*doxa*) and life (*zōē*).
(*a*) 4^{7}–5^{10}. The concealment of life in the shape of the old aeon.
(*b*) 5^{11}–6^{10}. The revelation of life in the proclamation of the gospel.
(C) 6^{11}–7^{4}. The quest for confidence.
6^{14}–7^{1}. *parenesis*.
(4) 7$^{5-16}$. Titus' arrival from Corinth with good news, strengthening Paul's confidence.
(5) 8^{1}–9^{15}. The collection for Jerusalem.
(6) 10^{1}–13^{10}. The Apostle and his opponents.
(7) 13$^{11-13}$. Greetings.

The *character* of 2 Co is marked by those sections which are listed under C. The theme is 'the apostolic office' and 'the word of proclamation,' *i.e.* the office of the preaching ministry; the revelation is 'the fragrance (*osmē*) of the knowledge of God' (2^{14}), 'the light of the knowledge of the glory of God in the face of Christ' (4^{6}). This light (*phōtismos*) is paralleled with the creation of light at the beginning of the world (4^{6}): the proclamation sets forth 'the new creation' (5^{17}). The preaching of the word is itself an eschatological event. It reveals itself as bestowing both death and life: 'to one a fragrance from death to death, to the other a fragrance from life to life' (2^{16}). This means no less than that in the proclamation of God's Word the ultimate judgment takes place for man.

How is this possible? It is because the apostolic proclamation sets forth *the* 'salvation-event' which occurred in the death and resurrection of Christ Jesus. This crucial event is not told like a story but proclaimed as *the* event of God's reconciliation with the world, *the* event which in its very proclamation becomes effective for the hearer. And in proclaiming the reconciliation the preacher actualizes it in his call: 'be reconciled to God' (5^{20}). Just because the preacher calls upon his congregation for decision, the proclamation is an inherent part of the 'salvation occurrence' itself, is itself an eschatological event. The preaching ministry is not an additional possibility for the Church, restricted to apostles only, but is given together with the 'once for all' Christ-event when God had founded the *diakonia tēs katallagēs* (ministry of reconciliation) and given it the *logos tēs katallagēs* (word of reconciliation, 5^{18f}). This implies for Paul, as the context proves, that Christ and God are present in the proclamation. Whenever the sermon commences and wherever Christians open their hearts to the proclamation, the *hēmera sōterias* (day of salvation) is present in the *nun* (now). 'Behold, now is the acceptable time; behold, now is the day of salvation' (6^{2}).

Paul thus lays before the readers of 2 Co the decisive paradox of Christianity, namely that a historical event—Christ's death and resurrection—is at the same time an eschatological occurrence, ultimately done for the sake of mankind. This theological qualification of the Christian ministry of proclamation presents the highlight of 2 Co, unique in the Pauline correspondence (though Paul everywhere presupposes the same understanding of it by his readers; *e.g.* see Ro 10$^{14-17}$). The very soteriological basis of this Pauline 'sacrament of proclamation' (*sacramentum audibile*) consists in God's action, namely that He gave Christ over to death and raised Him again. Thus He gave the old *aiōn* of the *sarx* over to death and opened up the possibility of a new life to all believers who put on Christ in baptism and thus participate in His death and resurrection. And because this eschatological occurrence has already taken place, Paul can rejoice: 'Therefore, if any one is in Christ, he is a new creation; the old has passed away, behold, the new has come' (5^{17}).

Before believing in Christ men had been 'enemies' of God (Ro 5^{10}). Now a man participating in the 'salvation-occurrence' is 'reconciled,' *i.e.* he has 'peace with God,' is 'righteous.' The office of the preaching ministry can be called both a 'ministry of righteousness' (3^{9}) and a 'ministry of reconciliation' (5^{18}). Its meaning does not consist in the effort of kindling man's activity in order to accomplish a human 'reconciliation,' but it proclaims God's own initiative. 'All this has its origin in God who through Christ reconciled us to himself' (5^{18}).

The living representative of the ministry of God's reconciliation with man is the Apostle. He is an authority because he works as an 'ambassador for Christ,' represents Christ and God to his hearers (5^{20}). His calling is a qualified one: 'God making his appeal through us'; he speaks 'on behalf of Christ' (5^{20}). Therefore the Apostle must claim obedience (2^{9} 7^{15}) and exposes himself to a possible misunderstanding, that of being a tyrant (1^{24}), although he is under the same Lordship as the believers. Yet it is only as the bringer of God's Word that the Apostle is an authority; he has no external proof of his legitimacy. In his person, the Christian paradox becomes visible insofar as in his own weakness and strength the crucified and risen Lord is reflected (13^{4}). Outwardly his weakness, the *astheneia* (weakness) of death, prevails; yet under this mask the *dynamis Christou* (power of Christ), the life of the risen Lord, is working decisively and effectively (4^{7ff} 6^{9}: 'as dying and behold we live'). The apostle thus exemplifies the whole Christian existence. It is not by chance that in chs. 3–5 the subject often changes back and forth between the Apostle and the congregation—who live in paradoxes: 'as having nothing and yet possessing everything' (6$^{4-10}$). This eschatological gift, to exist *hōs mē* (as if not) (see 1 Co 7$^{29-31}$), actualizes itself in the Christian 'openness' and 'freedom.' It gives to the believer the radical openness towards the future, the constant 'renewal day by day' (4^{16}), the unique 'change into his likeness from one degree of glory to another.' And this freedom exists wherever there is the Spirit of the Lord (3^{17}).

Clarifying or rather correcting 1 Co 15, Paul takes up again *the theme of eschatology* in 2 Co 5$^{1-10}$. Apparently he has learned that his Corinthian opponents did not totally deny the resurrection of the dead, but spiritualized its very essence in hoping for a 'nakedness' of the soul, in other words, an eternal existence without imprisonment by *sarx* (flesh) or *sōma* (body). Gnostic ideas of an eternal *gymnotēs* (nakedness), based on an identification of *sōma* with *sēma* (tomb) marked this their heretical belief. (Note: 5^{3} should read, with D* G it Marcion Chr etc., *ekdusamenoi*, 'even in putting it off.')

5. Authenticity.—The evidence for the text of the letter is, of course, practically the same as that for 1 Co. The real proofs of authenticity are internal, and are given in the character of the letter. Only a short section, the six verses in 6^{14}–7^{1}, seems questionable. Both its vocabulary and thought are strange. The whole paragraph probably goes back to a Jewish source. If ever it was Paul himself who 'Christianized' this Jewish *parenesis* in 6^{14}–7^{1}, it fits better in the context of 1 Co (in letter B, namely before 5$^{9-11}$).

A brief remark is needed regarding the so-called 3 *Corinthians*, which is now included in the apocryphal Acts of Paul and was first found with Ephrem the Syrian around A.D. 370. A Latin translation goes back to the 3rd cent. The letter represents itself as an answer to one which the Corinthians had sent to Paul, and speaks about Simon and Cleobius, who tried to introduce heretical doctrines: 'They say that we must not use the prophets, and that God is not almighty, and that there will be no resurrection of the flesh, and that man was not made by God, and that Christ did not come down in the flesh, neither was born of Mary, and that the world is not of God but of angels' (M. R. James, *The Apocryphal NT*, 1924, p. 289). Interesting as this heresy and its refutation are, there is no doubt about the non-Pauline origin of the letter. The text was probably written at the end of the 2nd cent. and was later incorporated in a Syrian collection of Paul's epistles, and thus for some time was regarded as authentic by the Armenian and Syrian Churches.

6. Date.—2 Co, written from Macedonia, dates probably from the same year as 1 Co. A short interval between them seems adequate, though the time cannot be given exactly. Perhaps the fall months of the year A.D. 55 may be assumed (for other dates see article CHRONOLOGY). E. D.

CORMORANT.—Renders two words in EV. **1.** *Shālākh*, Lv 11[17], Dt 14[17]; see OWL. **2.** *Ḳā'ath*, Zeph 2[14] (AV; RV 'pelican,' RSV 'vulture'), Is 34[11] (AV; RV 'pelican,' RSV 'hawk'). See HERON, OWL, PELICAN, VULTURE.

CORN.—This term may be taken to include—(1) Barley, (2) Wheat, (3) Fitches, (4) Lentils, (5) Beans, (6) Millet, (7) Rye, wrong translation for 'spelt,' (8) Pulse—for most of which see separate articles. Rye and Oats are not cultivated in Palestine. E. W. G. M.

CORNELIUS.—A 'devout man' (Ac 10[1]), *i.e.* a 'God-fearer' who leaned toward Judaism, and not necessarily a proselyte, whose baptism was a step forward towards admitting Gentiles into the Church. He was a Roman centurion of the Italic cohort (see BAND). The name is a common one, as thousands of Sulla's freedmen took this as a family name. An inscription discovered near Vienna shows that an Italic cohort was stationed in Syria shortly before A.D. 69, and this makes St. Luke's statement (once said to be an anachronism) quite probable. If the presence of such an officer in Caesarea was not possible during the semi-independent rule of Agrippa (A.D. 41–44), we must date the episode before that; but we cannot assert such an impossibility. A. J. M.—F. C. G.

CORNER, CORNER-STONE.—There are two Hebrew words translated 'corner' in the OT: (*a*) *pē'āh*, 'corner,' or 'side' (part cut off). This is found in the following connexions: Am 3[12], the corner (or side) of a divan; Ex 25[26] *et al.*, the four corners of the table of show-bread; Lv 19[9], the corners of a field, which are to be left unreaped at harvest-time for the benefit of the poor and the *gēr* (stranger). It has been suggested that this custom is a relic of an ancient tabu or sanctity attaching to the corner, but as the word also means 'side,' and there is no supporting evidence in the OT for such an idea, the suggestion may be rejected. The same holds good about the prohibition in Lv 19[27] against shaving the temples (corners of the head) and trimming the beard. Any notion of sanctity attaches, not to the 'corner' as such, but to the hair of the head and beard. Jer 9[25] refers to the Arab custom of shaving the head. The word is used in Ezk 41–48 and in P for the sides of the Temple and the land. It is used figuratively in Nu 24[17], 'smite through the corners of Moab.'

(*b*) *pinnāh*, from the verbal root meaning 'to turn.' It is used in Ex 27[2], the horns of the brazen altar of burnt-offering are to be placed on the four 'corners' of the altar. Here again the idea of sanctity, if any, attaches, not to the corners, but to the horns which, as in Crete and elsewhere, are connected with the symbol of the bull. It is used in Job 1[19] for the four corners of the house. It is also frequently used figuratively for the chiefs of the people, the heads of tribes, as the corner-stone binds the sides of the wall together. In Zec 10[4] the corner (stone) and the tent-peg, both symbols of that which holds the body politic firm, are said to come from Y".

There is an important use of the corner-stone with a figurative, and possibly Messianic, sense in Ps 118[22] and Is 28[16], both of which passages are quoted in the NT with reference to Christ (cf Mt 21[42]||, Ac 4[11], 1 P 2[4f]). The question has been raised whether the corner-stone of Scripture is a foundation-stone, or the stone which crowns the building. The answer would seem to be that both uses are found in both OT and NT. The passage in Is 28 is almost certainly a reference to a foundation-stone, while the Psalm quite certainly refers to a stone crowning the building. Similarly in the NT, Christ is referred to both as the foundation on which the Church is built, and the coping stone which crowns the building. S. H. He.

CORNER GATE.—See JERUSALEM, GATES OF.

CORNET.—See MUSIC AND MUSICAL INSTRUMENTS.

CORRUPTION.—The Greek term underlying this word is translated in the RSV by a variety of English expressions such as 'decay,' 'corruption,' 'the perishable.' When all these are gathered together, four general meanings emerge in the NT. **1.** Sometimes corruption refers simply to dissolution in the world of nature (Col 2[22], 2 P 2[12a]) including the physical dissolution of man, *i.e.* death and the decay which follows upon death (Ac 2[27, 31] 13[34–37]). The contrast drawn in the latter passages between corruption and the resurrection of Christ does not yet yield the level of meaning to be discussed next. **2.** The adjective related to this noun may indicate what is mortal in contrast to what is immortal, namely, God (Ro 1[23]). In 1 Co 15[43–54] a similar contrast, which is here stated in terms of the antagonism between the man of dust (Adam) and the spiritual man (Christ), brings us close to a dualism between matter and spirit. In the last analysis, however, it appears that for Paul the weakness of man's flesh and death itself are a result of sin (1 Co 15[55–58], cf Ro 8[21]). So also the 'decay' to which the whole universe is subject was imposed upon it by God and is not the result of a natural antagonism between matter and spirit (Ro 8[21], cf Gn 3[17]). **3.** In Gal 6[8] the same word has an eschatological significance and refers to the destruction that will come upon those who are not fit for eternal life. This is also the meaning in 2 P 2[12b]. **4.** Corruption may refer to moral depravity (2 P 1[4] 2[19]). The verb related to this noun is also used in this sense (*e.g.* 1 Co 15[33], 2 Co 11[3], Eph 4[22]). W. R. S.

COS.—An island off the coast of Caria, SW. of Asia Minor, famous for its fertility and beauty. It was a Dorian colony, and a great seat of the worship of Aesculapius and of the study of medicine. Its position made it also an important place for trade, as it lay on the cross lines of traffic between Greece, Asia Minor, Syria, and Egypt. It is uncertain whether Cos, which had been a faithful ally of the Romans, was incorporated in the province of Asia in 139 B.C. (see CARIA), but it certainly was a part of it in the time of Augustus. Its trade connexion made it one of the Jewish centres of the Aegean. The Jews there were favoured by the Romans in 139–138 B.C. (1 Mac 15[23]). It was a place on the route of the Jewish pilgrims to Jerusalem (cf Ac 21[1]). Herod the Great was a benefactor of the people of Cos. A. So.

COSAM.—An ancestor of Jesus (Lk 3[28]).

COSMOGONY.—See CREATION.

COSSAEANS.—A name adapted from the Greek form of Bab. *Kaššu*, a semi-barbarous people inhabiting the mountain region between Elam and Media proper. They answer to Cush (q.v.) in Gn 10[8] (and 2[13]? AV 'Ethiopia') as distinguished from the African Cush. They were a powerful people between the 18th and the 12th cent. B.C., during which time Babylonia was ruled by a Cossaean dynasty. J. F. McC.

COTTON is the better translation (so RVm, RSV) of *karpas*, which in AV and RV is translated 'green,' Est 1[6]. It was either muslin or calico. A different word is rendered 'cotton' in RVm and RSV in Is 19[9] (AV 'networks'; RV 'cloth'). This is elsewhere rendered by RSV 'linen' and 'flax.'

COUCH.—See HOUSE, **8.** The verb 'to couch' occurs in Dt 33[13] 'the deep that couches beneath.' The word means simply to *lie down*, but it is used almost exclusively of animals, as is the Hebrew word also. The subterranean deep, says Driver, is perhaps pictured as a gigantic monster.

COULTER.—Only 1 S 13[20f] (AV, RV; RSV 'mattock') for the word elsewhere rendered 'plowshare,' and so it should be here, as the Hebrew plough,

like its Syrian representative to-day, had no coulter. See AGRICULTURE, 1.

COUNCIL.—See SANHEDRIN. For the Council of Ac 15, Gal 2, see PAUL, GALATIANS [EPISTLE TO], 3.

COUNSELLOR.—This is the spelling in modern editions of the AV. In the edition of 1611 it is 'counseller,' except in Ezr 8^{25}, Pr 12^{20} 15^{22}, where the spelling is 'counsellour.' The word is used mostly of a king's counsellor, or more generally of one who gives counsel (*bouleutēs*). But in Dn 3^{2f} it means a justice; and in Mk 15^{43}, Lk 23^{50}, it is used of Joseph of Arimathaea as a member of the Sanhedrin (RSV 'member of the council). In Dn $3^{24, 27}$ 4^{36} 6^{7} the peculiar word rendered 'counsellor' in AV is hesitatingly translated by Driver 'minister'; RV, RSV retain 'counsellor.' In Jn $14^{16, 26}$ 15^{26} 16^{7} RSV translates *Paraklētos* by 'Counsellor,' a meaning supported by the papyri.

COUNSELLOR (Gr. *paraklētos*).—The word occurs only in the writings of John: four times in his Gospel ($14^{16, 26}$ 15^{26} 16^{7}) of the Holy Spirit and once in his Epistle (2^{1}) of Jesus. It is unfortunate that our English Versions have rendered it in the former 'Comforter' (RVm 'or *Advocate*, or *Helper*, Gr. *Paraclete*') and in the latter 'Advocate' (RVm 'or *Comforter*, or *Helper*, Gr. *Paraclete*'). The RSV reads 'Counsellor' except in 1 Jn 2^{1} where 'Advocate' is retained.

'Comforter,' though a true designation of the Holy Spirit, is an impossible rendering. The Greek verb *parakalein* means either 'comfort' (Mt 5^{4}, 2 Cor 1^{4} 7^{6}) or 'call to one's side' (Ac 28^{20}). *Paraklētos* is a passive form and thus denotes if the former meaning is retained 'one comforted'; the latter meaning, 'one called to stand beside', accords both with grammatical requirements and with the meaning of Paraclete in the Gospel according to John. In 1st cent. Greek, *Paraklētos* was a legal term used mainly of advocate, defender, or intercessor. True to its basic meaning one 'called out to stand beside, defend, advise or intercede,' it was used of legal counsel and witnesses alike. RSV 'Counsellor' embraces this variety of meanings and describes one who in adversity stands by one's side—truly a Comforter (especially in the Latin sense of *Confortator*, 'Strengthener'). It should be noted that 'comfortless' AV Jn 14^{18} is a mistranslation (RV and RSV read 'desolate'—AV and RV margins literally 'orphans'). Singularly enough, the Greek-speaking Fathers mostly took the word in the impossible sense of 'Comforter,' influenced perhaps by the false analogy of *Menahem* (*Consolator*), a Jewish name for Messiah; cf Cyril of Jerusalem, *Cat.*, Or. xvi. 20: 'He is called *Paraklētos* because he comforts (*parakalei*) and consoles and helps our infirmity.'

During His earthly ministry Jesus had been God's Counsellor with men, pleading God's cause with them and seeking to win them for Him. He was going away and on the night in which He was betrayed He assured the Eleven that they would not be left without a Counsellor on the earth. 'I will pray the Father and He will give you another Counsellor, to be with you for ever, even the Spirit of truth.' Not received because unrecognized by the unspiritual world, the Counsellor would be recognized and welcomed by believers (Jn $14^{15f, 25f}$). He would testify to them about Jesus, the unseen Lord, and they would repeat His testimony to the world (15^{26f}). He would make their testimony effective: 'when he comes he will convince the world regarding sin, righteousness, and judgment' (16^{8-11}).

Jesus told the Eleven that it was 'to their advantage' that He should go away, since His departure was the condition of the advent of the Counsellor (16^{7}); 1 Jn 2^{1} furnishes a profound commentary on this declaration. Jesus in the days of His flesh was God's Counsellor on earth, pleading with men for God. The Holy Spirit had taken His place and performs this office. But Jesus is still a Counsellor. For He is the heavenly Advocate of sinners, pleading their cause with God and, in the language of St. Paul (Ro 8^{34}), 'making intercession for them.'

There are three dispensations in the history of redemption, each richer and fuller than the last: (1) The OT dispensation under which men knew only God in high heaven; (2) that of the Incarnation under which the Father came near to men in Jesus Christ and by His gracious advocacy appealed to their hearts; (3) that of the Holy Spirit under which the Holy Spirit is the Father's Counsellor here and Jesus 'our advocate above, our friend before the throne of love.' See Bauer's *Lexicon*, s.v. *paraklētos*, with bibliography. D. S.—S. I. E.

COUNTERVAIL.—To countervail (Est 7^{4}, Sir 6^{15} AV) is to make up for, give an equivalent, as in More's *Utopia*: 'All the goodes in the worlde are not liable to countervayle man's life.'

COURAGE.—Courage in the OT is the strength, directness and determination of the soul in face of obstacles and dangers. These might weaken the soul and its purpose, but God strengthens His servants and encourages them. The prime example is Joshua as he is deputed to lead the entry into Canaan (Dt 31^{7}, Jos 1^{6}). It is not a virtue of the autonomous man but of the man properly strengthened by Yahweh. Even the stout-hearted man will lose his courage if Yahweh is acting against him (Am 2^{16}). Courage is needed not only in military operations but in supporting hope in times of desolation (*e.g.* Is 35^{3-4}) and in obeying the law of God (Jos 1^{7}). In the NT the same lines are followed. The despairing are told to be of good courage (Mt 9^{2} etc.); the servants of the Lord must be firm and courageous (1 Co 16^{13}). Boldness in speaking the truth is based on confidence in God (2 Co 10^{1-2} etc.). Courage as a general virtue hardly appears, for it is understood to go with obedience to Christ and not (as in much Greek thought) to be one of the main aspects of the autonomous ethical life. J. Ba.

COURIER.—See POST.

COURSE.—See PRIESTS AND LEVITES, 3 (*a*).

COURT.—See HOUSE, 2; JUSTICE; TABERNACLE; TEMPLE.

COUSIN.—Elizabeth is called Mary's 'cousin' in Lk 1^{36}, and the relationship is often understood in the modern sense of that word. But 'cousin' in the English of 1611 meant no more than kinsman or kinswoman. The relationship between Mary and Elizabeth is not known. RSV uses 'kinswoman' here. In other passages, both OT and NT, 'cousin' is used where the modern sense is clearly intended (*e.g.* Col 4^{10}, *anepsios*).

COUTHA, 1 Es 5^{32} (AV).—See CUTHA.

COVENANT.—1. This very important term is a translation of the Hebrew word *bᵉrîth*. The etymology of the latter is much disputed, but is most probably to be connected with the Akkadian root of *birîtum*, 'space between,' in prepositional phrases 'between,' with reference to the rite of dividing an animal as in Gn $15^{10, 17}$. The semantic development has also been traced through Akkadian *berîtu*, 'fetter,' hence 'binding agreement,' and from Hebrew *bārāh*, 'eat.'

A *bᵉrîth* is an agreement between two parties in which they pledge themselves in loyalty to one another. It differs from the modern concept of contract in that there is not only an obligation to carry out some specific commitment externally, but a pledge of loyalty or community of soul. This spiritual content of a covenant, if we can so call it, the inward will which goes beyond outward conformity, is *ḥesedh* (RSV usually 'steadfast love'). Thus God in His covenant is 'the faithful God who keeps the covenant and the loyalty to those who love him' (Dt 7^{9}).

Covenants between man and man are numerous in the OT. A few typical cases may be noted. In Gn 31^{43-54} the covenant between Laban and Jacob is an ending of past differences, and a restoration therefore of harmony between them (the word *shālôm*, peace or harmony, is often used of covenants, though in fact not in this case);

it is also a kind of boundary treaty at the Gileadite frontier; and it includes or implies good treatment for Laban's daughters, for whose welfare the covenant is a witness, with an oath in which the covenant conditions are placed under God's vindication. Another notable covenant is between David and Jonathan, 1 S 18^{1-4} $20^{12-16, 42}$. It is an expression of the community of the soul in love. Here the covenant relation conflicts with Jonathan's natural solidarity with his father; convinced that the Lord is with David, he invokes the loyalty of the covenant to ensure the survival of his name and house in the time of David's success. In Jos 9^{15} a covenant entered into by the leaders is binding on the whole people, even though the leaders were deceived in agreeing to it. Political covenants also abound; in 1 S 11^{1-3} the covenant or treaty amounts to terms of surrender; in 1 K 5^{12} it expresses friendly relations with a commercial agreement; in Ezk 17^{13f} it is an allegiance of submission to Nebuchadrezzar. Such covenants include an element of promise or oath, have conditions the non-fulfilment of which constitute the breaking or annulment of the covenant, and inaugurate an intended period of *shālôm* or harmonious relations. The covenant of 2 K 11^{4} is an agreement among conspirators, but in 11^{17} it is a restoration and regulation of right relations between God, king, and people. Marriage too is a covenant, Mal 2^{14}.

The parties to a covenant may be equal but perhaps more commonly are not, or are unequal in their interest in some object specially concerned in the covenant. Solomon and Hiram are roughly equals. Jonathan is superior to David in being the king's son, but it is he who is specially drawn to David, and David becomes the senior partner in the relation because Jonathan believes in David's future success and is anxious to safeguard his descendants in the days to come. Laban is perhaps a greater than Jacob, but it is his daughters whom he is anxious to protect.

Covenants between men are not a matter of word only, nor are they guaranteed by a written agreement usually, but they have a material expression. Jonathan gave David his armour and clothes (1 S 18^{4}); Jacob built a cairn, offered sacrifice and ate a common meal with his kin (Gn 31^{43-54}). The common eating of salt led to the expression 'a covenant of salt' (Nu 18^{19} etc.). The verb for making a covenant is *kārath* 'to cut,' and goes back probably to the ritual of dividing an animal.

2. God's covenant with Israel.—The relation of Yahweh to Israel was probably from an early date understood as a covenant, and this tradition almost certainly goes back before the entry into Canaan and represents Israel's understanding of her own origins as a people. The centrality of the covenant belongs in all probability, as the Exodus tradition holds, to the formative events of Sinai and the work of Moses. But the possibility of God, normally present in the *bᵉrîth* as guarantor between man to man, also relating Himself in the *bᵉrîth* to men who willed to adhere to Him, may well be pre-Mosaic. A recent attempt to invoke the similarities of covenant presentations to the Hittite treaties of sovereignty (Mendenhall, *BA*, Sept. 1954) seems to the writer only to pick out points which might belong to any treaty supported by sacral sanctions, and not to explain more for the covenant in Israel than at most the form of certain more developed statements of it. In any case it seems likely that the tradition of a covenant with Abraham is old tradition and not merely a secondary extension back of the Mosaic covenant. A covenant was indigenous to the traditions both of the Mosaic period and of 'the fathers,' and neither completely overwhelmed the other.

In the old Abraham tradition the covenant is made by the division of animals (Gn 15); its content is mainly promise of the later possession of the land. The old Mosaic story (Ex 24) begins with the recital of the words spoken by God to Moses; when these are accepted by the people as obligation, we have sacrifice and the ritual of the blood of the covenant, and in v.^{11} a sacrificial meal in the presence of God. In the Shechem covenant of Jos 24 Joshua tells the story of God's acts for Israel and challenges the people to choose whether He should be their God; on their declaration He makes the covenant. The content of the covenant of God with the people was thus roughly 'I will be your God and you will be my people,' as Jer 31^{33} reiterates for the 'new covenant.' The covenant binds God and Israel in loyalty together. In entering this the initiative with God is infinitely greater, and it is not a two-sided contract; yet it leaves and demands freedom of choice on Israel's side. When the time comes for the covenant to be solemnly entered, Israel must choose to enter.

The understanding of the covenant idea, and the terminology connected with it, undergo certain interesting changes during the OT period. The old term 'to cut a covenant' appears in the early story of Gn 15^{18}. In Deuteronomy and the Deuteronomic historical literature this is still used, but more emphasis is laid on the covenant as *law*, and we hear of God 'telling' or 'commanding' the covenant (Dt 4^{13}). The tables of the law are the covenant, 1 K 8^{21}, and are contained by the Ark, whose name 'Ark of the covenant' is now understood in this way. Meanwhile it is noticeable that the classical prophets before Jeremiah use the covenant conception very little (cases occur Hos 6^{7} 8^{1}). This is probably not because it meant nothing to them, but because they emphasize the covenant virtues, the loyalty and faithfulness which are the interior of the covenant relationship. Jeremiah shows a renewed interest in the old covenant (11^{1-13}), but with it an understanding that it is irretrievably broken; and thus he envisages the new covenant (33^{31ff}) where the outward law is written inwardly and enjoys the loyalty of will the lack of which destroyed the old covenant.

The priestly narrative in the Pentateuch uses 'covenant' only of covenants with God, not with man, and the verb is now 'set up' or 'give,' emphasizing the Divine initiative (Gn 9^{9-17} 17^{1-21}) and the element of promise. A covenant is made with Noah, and therefore with all living men, since all men after the Flood were descended from him; it promises the continuance of the world, gives certain laws, and its sign is the rainbow which reminds God of His covenant. The great covenant, however, is that with Abraham, and its sign is the circumcision; it is not associated with law. The sabbath too, in the Mosaic period, is a 'perpetual covenant' or sign (Ex 31^{16f}).

Among the later prophets Ezekiel follows lines similar to those of Jeremiah (Ezk 34^{25} 37^{26}), and the covenant emphasis is moved to the future; so also Deutero-Isaiah where, however, the most important innovation is the mission of the servant of the Lord as a 'covenant to the people' (so RSV), a phrase which in its context clearly indicates the extension of covenant to the other nations (42^{6} 49^{8}).

In the reforming groups of late Judaism the Jeremiah passage about the new covenant had great influence, and the *Zadokite Documents*, for instance, can speak of the 'new covenant in the land of Damascus' (vi. 19 etc.); the *Habakkuk Commentary* shows the same expression, and the *Manual of Discipline* shows how this was no mere metaphor for the Qumrân sect, who had the most solemn covenant ceremonies, and who understood that loyalty, love, and truth were the inward content of a covenant in the last days, as the prophets had spoken.

The LXX translated covenant with *diathēkē*, which in Hellenistic Greek usage meant 'will or testament,' and which has this sense in He 9^{16f}, Gal 3^{15}, both of which, however, are fitted into arguments where the sense 'covenant' is proper. For the rest, the NT word 'covenant' is heavily coloured and determined by OT usage. Like the Qumrân community, the early Church saw itself as the community of the new covenant (2 Co 3^{6}, He 8^{13} 9^{15}). The OT covenants are remembered as a privilege of Israel (Ro 9^{4}) and it is possible to argue from the priority of covenant to law in the OT (Gal 3^{15-18}). NT usage, as expressed in the word *diathēkē*, and avoiding, in the steps of the LXX, *synthēkē* which is more a double-sided pact, seems to stand with that side of OT

usage which emphasizes the sole action of God in the covenant as His dispostion or promise. On the other hand, the tradition of the ceremonies of initiation into the covenant, which involved the hearing of God's claims and the acceptance of Him by the people, was in the early Church as in the Qumrân community very much alive and was active especially in the initiatory ceremony of baptism. On the other hand the wine at the Last Supper is called 'my blood of the covenant' (Mk 14^{24}) or 'the new covenant in my blood' (1 Co 11^{25}). Into the intricate problems of this passage we cannot go. But it is clear that we have the understanding of the Supper as a covenant meal with OT reminiscences (especially Ex 24), and that the blood, which is an interpretation of Christ's death as sacrificial and expiatory, is here taking up the covenant blood of the same chapter. The repetition of the Eucharist may be related to the renewal of covenant in the OT (*e.g.* Dt 29^{1}).

With the understanding of the new covenant as established in Christ and His church comes an assertion of the finality of this covenant and its superiority to the temporary and imperfect 'first covenant' (He 9^{1}). None the less the first covenant, even in the argument of Hebrews, continues to provide the forms and categories for the understanding of the new (He 9^{18ff}). Meanwhile this old covenant, in its written embodiment in the OT, is still read by Israel, but they have a veil which obstructs its understanding (2 Co 3^{14}). In Ro 11^{27} a reference to the covenant from Isaiah is used as a promise of the eventual salvation of Israel. J. Ba.

COVENANT, BOOK OF THE.—The oldest Hebrew laws which have come down to us are to be found in the code contained in Ex 20^{22}–23^{19}. It is composed of material derived from earlier codes and, with the parenetic peroration (23^{20-33}) now loosely attached to it, is called the Book of the Covenant in 24^{7}, the representation being that it had just been delivered to Moses (cf 20^{21f}) and that it laid down the conditions upon which Yahweh was making the covenant with Israel. There can be little doubt, however, that the author of 24^{3-8} in its original form represented the Decalogue (20^{2-17}) as the basis of the covenant. If so, then the Book of the Covenant was placed in its present position at a relatively late stage in the growth of the Pentateuch. Whether at an earlier stage it had been included in one of its component documents, or whether, having taken form independently, it was inserted here by a redactor, it is impossible to say. Some scholars have thought that it once came immediately before the account of the death of Moses and that it was moved from that position to make room for the more elaborate code of Deuteronomy.

1. Contents.—The code is composed of three different kinds of material:—(1) *mishpāṭîm* (rendered 'ordinances' in 21^{1} 24^{3}). In early Semitic life justice was administered according to a series of *Tôrôth*, or judicial and priestly decisions, originally transmitted orally but gradually written down for more exact use as precedents, and to serve as a handbook for those who had to administer the law. The *mishpāṭîm* are decisions of this kind. Each one consists of a conditional sentence introduced by 'when' (=in case that), which describes the possible situation in general terms; this is usually followed by one or more sentences introduced by 'if' or 'and/but if,' dealing with special circumstances; *e.g.* 21^{28f} 'when an ox gores a man or a woman to death the ox shall be stoned . . . but the owner of the ox shall be clear. But if the ox has been accustomed to gore in time past . . . its owner shall be put to death.'

There are fifteen laws in the code formulated in this way (21^{2} should begin 'when a man buys,' cf 'his master' in vv.^{4,6}; and in $22^{1,7,10}$ the Hebrew word rendered 'if' is that rendered 'when' elsewhere in these laws): $21^{2-6, 7-11, 18f, 20f, 22-24, 26f, 28-32, 33-36}$ $22^{1-4, 5, 6, 7f, 10-13, 14f, 16f}$. They deal with manumission of Hebrew slaves, the sale of a daughter into slavery, murder and homicide, bodily injury to men and women, injuries to animals, theft, damage to another's crops, property held in trust or on loan, seduction of an unbetrothed virgin. The only reference to Yahweh in these laws is in 22^{11}, where it is probably a substitution for an original 'God' (cf 21^{6} 22^{8f}); nor is there anything specifically Israelite in their requirements. For this reason, and because the laws in the code of Hammurabi and the Assyrian and Hittite laws are cast in this precedent form, it has been suggested that they were derived ultimately from a Canaanite code which had been taken over by Israel—the word 'Hebrew' in 21^{2} being an adaptation. Additional laws in this form are found in Deuteronomy, possibly going back to the same ancient code.

(2) Akin to the precedent laws in form are five laws beginning with 'whoever' (rendering the Hebrew participle) and ending with the formula 'shall be put to death' (*môth yûmath*): 21^{12} against murder (expanded in vv.^{13f} in the style of the precedent laws), v.^{15} violence against one's parents, v.^{16} abduction, v.^{17} cursing one's parents, 22^{19} bestiality; 22^{20}, forbidding the worship of other gods than Yahweh, begins with 'whoever' but has a different conclusion—which may of course be the result of redactional alteration. The concluding formula 'shall be put to death' is used in eleven laws in Leviticus: $20^{2a, 9, 10, 11, 12a, 13, 15, 16, 27}$ 24^{16} (cf Ex 22^{19}) ^{17} (cf 24^{21b}, Ex 21^{12}), against the worship of Molech, cursing one's parents, adultery, incest, sodomy, necromancy, blasphemy, murder. Of these only that against blasphemy (24^{16}) has the participial introduction, which is found again, together with the conclusion, in the law against Sabbath-breaking in Ex 31^{15b}. Nevertheless the use of the concluding formula may indicate that these laws have been derived from an earlier code. The formula *môth yûmath* is early, being found in Gn 26^{11} in a story which comes from the 11th cent. This lends weight to the possibility that at least the nucleus of this code is early—that is the laws against practices which appear to have been characteristic of Canaanite religion: bestiality, adultery, incest, sodomy, and necromancy. These laws may indeed have been decreed in the early days of the settlement, and reflect the revulsion with which desert Yahwism regarded the excesses of the fertility cults. The laws against murder, violence to one's parents, abduction, cursing one's parents (Ex 21^{12-17}) and blasphemy (Lv 24^{16}) may come from the same period, but those against the worship of Molech and Sabbath-breaking are more likely to have been later. Upon what principle the compiler of the Book of the Covenant made his selection from this code (supposing it existed) it is now impossible to determine; we cannot indeed be sure that the covenant code has come down to us intact.

(3) *dᵉbhārîm* (rendered 'words' in Ex 24^{3}) or commands, in form akin to the commands of the Decalogue, being introduced by 'you shall' or 'you shall not.' These fall into two groups, those which regulate relations between man and man and those which regulate man's relation to God. To the former group belong $22^{21-24, 25-27}$ $23^{1-3, 4f, 6-8, 9, 10}$, demanding fair treatment and kindness for the stranger, the widow, the orphan, the poor, justice in the courts, and neighbourliness towards an enemy in difficulties. Characteristic of much of this material is its hortatory tone ($22^{23f, 27}$ $23^{7f, 9}$), suggesting that in their present form at any rate these laws come from the prophetic period.

Most of the commands regulating men's relation to God, are found again, though sometimes expanded, in the so-called ritual Decalogue, Ex 34^{14-26}: 22^{29b-30} (=$34^{19-20b\alpha}$), the law of firstlings; 23^{12} (=34^{21}), the Sabbath; 23^{13} (=34^{14}), only Yahweh to be worshipped; $23^{14, 17}$ (=34^{23f}), the three annual festivals; 23^{15a} (=34^{18}), unleavened bread; 23^{15b} (=$34^{20b\beta}$), none shall appear before Yahweh empty-handed; 23^{16} (=34^{22}), feasts of harvest and ingathering; 23^{18} (=34^{25}), of sacrifice; 23^{19a} (=34^{26a}), first fruits; 23^{19b} (=34^{26b}), a kid not to be boiled in its mother's milk. This material undoubtedly has a Canaanite foundation but it has been carefully adapted to Yahwism. There is no agreement among

scholars as to whether these commands, derived from a common source, were placed here independently of Ex 34, or whether they were taken from Ex 34 and appended here by a redactor who wished to include them explicitly within the terms of the covenant.

The remaining religious commands are 20[24-26] dealing with the construction of an altar; 22[18] forbidding sorcery; 22[28] against reviling God or the ruler; the first part of this is found in a slightly different form in Lv 24[15] (cf 24[16]); the second part has usually been regarded as late, but if the word rendered 'ruler' (*nāśî*) was, as some scholars have maintained, the title of certain officials in the pre-monarchical federation of the Israelite tribes, it may be early. 22[29a], probably (the Hebrew is very terse) commanding the offering of first fruits; 22[31], animals found torn in the field are not to be eaten.

The fact that the peroration (23[20-33]) nowhere states that obedience to the laws just promulgated is a condition of the angel's presence strongly suggests that it was at one time independent of the code. Some scholars have thought that in its original form it was Moses' farewell charge, delivered just before his death, conveying Yahweh's promise that the guidance and counsel which He had provided for His people through Moses would, in the future, be otherwise mediated.

2. Date.—As to the date of the code of the Covenant there is no evidence save what the document itself affords us. Basically it reflects an agricultural society; the law of blood-revenge is just beginning to be modified (21[24f]); a woman is still the property of her father (21[22] 22[16f]); sacrifice is emerging from its primitive domestic character (20[24] 23[18]); and the only possible reference to anything approaching to a State is in 22[28]. Allowing for some late additions (*e.g.* 22[23-26]) the code would seem to date from the early days of Israel's settlement in Palestine. R. B. T.—C. A. Si.

COVERT.—This word is used in AV in three senses. **1.**=a covered place; so 2 K 16[13] (RV, RSV 'covered way'). **2.**=a shelter; so Is 4[6] (so RV; RSV 'shelter'), 1 Mac 9[38] (so RV; RSV 'cover'). **3.**=an animal's lair; so Jer 25[38] (so RV and RSV). RV has 'covert' where AV has 'den' in Job 37[8] (RSV 'lair'), Ps 10[9] (RSV 'covert'). See also DEN.

COVETOUSNESS.—Normally the translation of Hebrew *ḥ-m-d* (desire) and Greek *epithumeō* (set the heart upon), the word means 'to desire earnestly in order to appropriate to oneself.' In AV 'covet' is capable of a good sense (1 Co 12[31] 14[39]) but RV and RSV use it only in the now more normal bad sense. To desire intensely to possess something is not wrong, if the object is in itself good, and if to possess it does not wrongly deprive some other person. The sin which is forbidden in the Ten Commandments is that of selfish greed, and it is significant that that early formulation of ethical instruction singles out this one inner motivation for condemnation. The other commandments prohibit outward acts; the tenth prohibits a state of mind which unchecked gives rise to a whole way of wrong living (Ezk 33[31]). Nor is this necessarily a case of a later addition to the code, for the disruption and injustice wrought by greed are plain to see in the most primitive communities (cf 2 S 12[1f]). It is, moreover, a very common fault (Jer 6[13]). Jesus warned His followers particularly of the dangers of covetousness (Lk 12[15], Mk 4[19]) and Paul saw the whole Mosaic Law, the means whereby man's sinful nature is made apparent to him, as typified by the Tenth Commandment (Ro 7[7]). Biblical teaching emphasises three points: (*a*) Only as men learn to discipline their desires can society function justly and happily; otherwise oppression and injustice are inevitable (Mic 2[2]). (*b*) It is harmful to the individual also, since it dominates him (Pr 21[26], Hab 2[5b]) and finally destroys him (Pr 1[19], Heb. *b-ṣ-ʿ*, RSV 'gain by violence'; Ja 1[14f]). (*c*) Selfish desire or covetousness is a general sin in that it often breeds wrong sexual desires or lust (Mt 5[28]), and also leads to idolatry, *i.e.* setting on material objects or human goals the values that should be reserved for God alone (Eph 5[5]). Hence covetousness, sexual immorality and idolatry are frequently linked together (1 Co 6[9-11], Eph 5[3]). The opposite to covetousness is to love one's neighbour as oneself (Ro 13[8-10]), to accept gratefully what God has given to enjoy (Mt 6[33], Phn 4[11-13], He 13[5]), to desire earnestly the higher gifts of the Spirit (1 Co 12[31]), and to set the mind upon the things that are above (Col 3[1]). S. B. F.

COZ, 1 Ch 4[8] (AV).—See Koz, **1.**

COZBI.—The Midianitess slain by Phinehas, Nu 25[15, 18].

COZEBA.—Place mentioned 1 Ch 4[22] (AV **Chozeba**). Possibly=**Achzib, 2**; alternatively identified with *Kh. ed-Dibb*, NW. of Hebron.

CRACKNELS.—1 K 14[3] (AV, RV); RSV has 'cakes'; see BREAD.

CRAFT, in the sense of 'trade,' survives in RV only in Rev 18[22], and in RSV in Ex 31[5] 35[33] (where AV and RV have 'workmanship' or 'work'), Rev 18[22] 'no craftsman of whatever craft.' In Ac 18[3] 19[25, 27] 'trade' or 'business' has been substituted for AV 'craft.' 'Craftsman' and 'craftsmen,' however, are retained. See list under ARTS AND CRAFTS. In Is 2[16] RSV has 'craft' in the sense of 'ships' where RV has 'imagery' (AV 'pictures').

CRANE.—In Is 38[14] and Jer 8[7] *sūs* or *sîs* is rendered in AV 'crane,' RV and RSV correctly 'swallow' (q.v.). In the same passages *ʿāghûr* is rendered in AV 'swallow,' RV and RSV 'crane.' The crane (*Grus communis*) is the largest bird which visits W. Palestine; its length is four feet. They arrive in large flocks in the winter (Jer 8[7]). Its trumpeting note is strangely described (in Is 38[14] AV, RV; RSV 'clamour') as 'chattering,' and this makes the translation somewhat doubtful.

CRATES.—A deputy left in charge of the citadel at Jerusalem (Acra) when the regular governor, Sostratus, was summoned to Antioch by Antiochus Epiphanes, in consequence of a dispute with the high priest Menelaus (2 Mac 4[29]). Crates was 'commander of the Cyprian troops': probably he was sent to Cyprus shortly afterwards, when, in 168 B.C., Antiochus obtained possession of the island.

CREATION—a word of Latin origin commonly applied to the beginnings of the universe and all that is in it. The relevant Hebrew verb—the abstract noun does not occur—is of indefinite meaning but devoid of evidence that it implies calling into being from nothingness. The earliest certain expression of this idea is in 2 Mac 7[28], but the somewhat later mention in He 11[3] is more familiar. The great accounts of creation are those in Gn 1 and 2–3, but there are several others of more or less extent and completeness. It is apparent that Ps 104 and Job 38 treat the theme; Ps 74[12-17] and Job 26[10-13] are also cosmological allusions; then we recognize there are many others, some quite brief, though considerable importance must be assigned to Hab 3[1-15]. It will be apparent on study that through this total there is considerable diversity from the Genesis narratives; also the theme of the primordial combat comes to light, though completely lacking from Gn 1–3. To it there are far more references (*e.g.* Job 9[13]) than can profitably be listed here. The classic presentation of this phase of ancient thinking is the story of Marduk's fight with Tiamat in the Babylonian so-called *Epic of Creation* (Pritchard, *ANET*, 60 ff). More recently a group of Canaanite documents that deal with a comparable theme were discovered at Râs Shamra on the northerly coast of Lebanon (Pritchard, *op. cit.*, 129 ff). It becomes apparent that both sources are related to antitheses such as are prominent in Zoroastrian alleged dualism: light and darkness, good and bad, true and false, etc. Early speculation was evidently much impressed with the existence of opposites, which are so

far-reaching that man's early adventures into understanding the mystery of the world were led to make it basic and to conclude that the principle of opposites was creative.

Whether this had its origin in the creative reality of the male-female principle, of which primitive man was keenly aware, we do not know. But certainly some mythologies make the inception of creation an act of generation. Further it is notable that most of these ideas were also components of the myth of the dying and rising god; *i.e.* they were integral to the fertility cultus. This entails two other facts that are of the greatest importance for our understanding. All this thinking was not primarily speculative at all, but practical and ritualistic: practical in that it aimed at serving human need, specifically man's welfare and supply; and ritualistic in the means employed to this end; through certain liturgies, notably the re-enactment of the episodes of the myth, the triumph of the god in his creative and bountiful roles was renewed. The other fact here calling for emphasis is then implied, that creation was not some far off, primeval event accomplished once for all; it was annually renewed in a liturgical presentation shared in variously by all the people under a sense of its profound reality. Our logic-obsessed minds will doubtless quibble that ancient man must surely have realized that the earth continued; it was not renewed each year, but must have had a single beginning in some sort of process. But it is revealing to note the seeming inconsistency—really the full consistency with ancient thought—of Gn 2; for it starts even less than ch. 1 with a *creatio ex nihilo*, rather with a waste and desert earth on which the drama of creation was enacted. The latter, not the origin of the desert expanse, was the centre of social, hence religious, interest.

How far these ideas entered Hebrew religious thought and practice is disputed. But the declared character of Hab 3 as a psalm, and the fact that certain of the poems in the Psalter are cosmogonic, still more the recurrence of the cultic themes just now referred to throughout much of the Psalter, is cogent evidence that for Israel, as for its neighbours and contemporaries, creation was a repetitive experience in public worship, and that the stories in Genesis as well as the relevant psalms were used in some way as liturgies.

This is a matter of far-reaching significance. The victory of God was primeval and annual; it was written deep in the nature of things, but also it was re-enacted for each year as the time came around. What an enhancement and assurance of faith it was to know and be reminded through liturgical participation that God is eternally triumphant! Whatever foe might arise, whether Pharaoh, Sennacherib, or Antiochus Epiphanes —or, shall one add, Adolf Hitler?—his defeat was already accomplished, and God and his people were for ever victorious. The discerning reader can sense this in Hab 3, fitting as it does with the rest of the little book to make of it a brief classic of religious faith. Relevant as all this is for us as well, another and quite different merit is its deliverance of us from the futile undertaking to defend the scientific accuracy of Gn 1–3. The stories never were science at all except that the writers made use of the scientific ideas of their time—in reality the religious ideas—but their prime concern, as it should be with us in interpreting their work, was with religious faith. It is a distortion of their original and continuing function to use the narratives as scientific sources or as antithetic to the findings of modern science. Happily the sincere believer in Biblical revelation and inspiration is not required to insult his intelligence with an effort to assent to propositions which he knows to be inherently absurd.

Thus it is we gain, also, perspective to realize the exaltation and greatness of these narratives. In the total of man's wistful, age-long exploration of the all-encompassing mystery there is nothing to rival Gn 1: the majesty of an all-powerful God who speaks and things spring into being; the orderliness of His working; His benign purpose; and then the unique profundity of man's creation—he was 'made in the image and likeness of God'! There at the outset of the Bible we have its great insight that man is not a brute, nor yet a half-demon of 'total depravity'; his spirit's home is with God, and he is restless and ill at ease until he finds rest in Him. Although chs. 2–3 go on with the equally necessary truth that even so man is a sinner, it nowhere repudiates or modifies this exalted insight. On the contrary, it is echoed so often through the OT that we can accurately assert it to be the Hebraic understanding of man: a sinner capable of horrible brutalities, but yet in his true nature made in the image of God and partaking of the Divine mind and nature.

Yet the relations of chs. 1 and 2 call for some further comment. Professor Skinner well spoke of 'the existence side by side of two independent and mutually irreconcilable accounts of the creation.' They are just that: irreconcilable in their starting point, in their sequence of events, but most of all in their theology. Little attention to detail is needed to show that over against the transcendent God of ch. 1, the viewpoint of ch. 2 is highly anthropomorphic. There is no thought here of relative evaluation. Actually both approaches to an understanding of God are of immense worth; here we are concerned only to recognize relevant facts.

The understanding of man differs also in the two accounts. In contrast to the unique origin described in ch. 1, the second story (which continues through ch. 3) tells how the race developed, as a result of human conduct, it is true, yet by Divine action, out of an otherwise unknown primeval condition to the status of its historic being, toilful, suffering, and sinning. It may seem a drab, even a pessimistic, view of man. Rather let us say it is realistic; it gives us man as he is. The great feature, too commonly overlooked in excessive emphasis on his sinful nature, is that this man is possessed of 'the knowledge of good and evil' which clearly is a prerogative of God himself, though arrogated by man in wilful disobedience of Divine prohibition. As well his further possibilities are hinted at; he might eat from the 'tree of life,' with incredible results.

An immense literature of interpretation, much of it of high value, at least demonstrates that the story possesses implications apparently not exhausted by any single exposition. It may then be permissible to add one more, which in any case has the merit of drawing on ancient thinking, hence perhaps of gathering up something of the author's actual intent.

Early speculation was much attracted by the problem, Why and how is it that man is so like the animals and yet so different? From one point of view he is just another animal (Ec 3^{18-21}); yet such easy conclusion will not convince, for equally he is more than animal; but why?

A variety of answers was given, seeming to stress, however, by their common element, the pervasive belief that man is possessed of a Divine quality—it is that which sets him apart. It is convenient to turn for illustration away from the Orient and invoke instead one of the delightful myths with which the Greeks sought answer for their profound questions, the story of Prometheus, best known in the remnants surviving from the great trilogy of Aeschylus. This ancient god, in revolt against triumphant new-comers, stole fire from the gods and gave it to man. The result was, as Aeschylus sketches at some length, that this hitherto savage and degraded being learned to build houses, to make and wear clothes, to build ships, to work metals—in brief, he became civilized. So for the Greeks, man's superiority is due to an inherent divine 'fire.' Equally it was characteristic of Oriental thinking that this supra-mundane essence in humanity was divine knowledge. The important matter is not the difference but rather the agreement that in man's nature, as man, there is something that is not of the earth, earthy.

The parallels with Gn 3 are such that we must conclude we have here the Hebraic explanation of man's

more than biological being, his innate relationship to God (which, it will be apparent, is but another approach to the great insight of ch. 1). For this privilege he suffers acutely. But is it the author's thought that, even so, the boon is worth the price? For thus man became a responsible moral being. Consciously he refused to remain a passive imprint of the Divine fiat. It was disobedience; it was sin; but through it he became man! He chose rather the hazardous way of self-reliance and free will. It is illuminating to recognize that such high estate was won, not by man's boldness, but through woman in her weakness and emotionalism. She 'saw that the tree was good' . . . and 'she took of its fruit and ate; and she also gave some to her husband,' who evidently in his smug superiority was content to remain forever in secure mediocrity! W. A. I.

CREATURE.—In AV 'creature' is used in the general (and original) sense of 'what is created.' Thus 2 Co 5^{17} 'if any man be in Christ, he is a new creature'; 1 Ti 4^{4} 'for every creature of God is good.' In Ro 8^{19ff} it is not merely living creatures in the modern use of the word that wait for deliverance, but the whole creation of God (as AV itself has it in v.^{22}). See RSV. F. C. G.

CREDITOR.—See DEBT.

CREED (AS. *creda*, from Lat. *credo* = 'I believe').—The technical term for a fixed formula summarizing the essential articles of Christian belief and enjoying the sanction of ecclesiastical authority. The three best-known creeds are the Apostles' Creed, which is an 8th cent. elaboration of the late 2nd cent. baptismal creed of the Roman Church, the so-called Nicene (more properly Niceno-Constantinopolitan) Creed, which is probably connected with the Council of Constantinople (A.D. 381) and is the only truly ecumenical creed, and the Athanasian Creed (often designated, from its opening words, the *Quicunque Vult*), which some attribute to St. Ambrose but which more probably dates from *c* A.D. 500. There are no traces of creeds in the strict sense in the apostolic age, but the NT points to the existence of (*a*) an apostolic preaching, or *kērygma*, with a fairly definite outline, and (*b*) a variety of brief, semi-stereotyped confessions with a credal ring. Some of these were Christological, the most important being the slogan 'Jesus is Lord' (cf 1 Co 12^{3}, Ph 2^{11} etc.); others were dyadic, mentioning the Father and the Son (*e.g.* 1 Co 8^{6}, Ti 2^{5f}, 6^{13f}), while yet others were triadic (*e.g.* Mt 28^{19}, 2 Co 13^{14}). Formal creeds began to emerge in the 2nd cent. in connexion with the questions and answers about belief employed at baptism. The ancient Roman baptismal creed is preserved, in the form of interrogations, in Hippolytus's *Apostolic Tradition*. In the 3rd and 4th cents. Church councils adopted the practice of drafting creeds as expressions of orthodox belief and requiring the bishops present to sign them. The most famous example is the creed promulgated at the Council of Nicaea in A.D. 325. At a much later date creeds found their way into the public services of the Church, the Nicene Creed establishing itself in the Eucharist from the 6th cent. onwards and the Apostles' Creed in the offices from the 7th cent. onwards. J. N. D. K.

CREEPING THINGS.—In AV and RV this term is the translation of two distinct words, which have no etymological connexion, and in usage are not synonymous. The Hebrew words are *remeś* and *sheres*. It is unfortunate that the latter term is translated 'creeping thing,' for the root means to *swarm*. Hence RSV renders by 'swarming creatures,' or 'winged insects.' It includes both terrestrial and aquatic animals which appear in great swarms; in Gn 1^{20} it refers to the creatures that teem in the waters, while in other passages it includes insects, as locusts, crickets, and grasshoppers (Lv 11^{20-23}), together with the smaller quadrupeds as the weasel and mouse, as well as reptiles proper (Lv 11^{29-31}). The verb is used of frogs (Ex 8^{3}). Etymologically *remeś* signifies that which *glides* or *creeps*, and for its usage the two crucial passages are Gn 1^{24} and 1 K 4^{33}. In the latter the entire animal kingdom is popularly divided into four classes: beasts, birds, creeping things, and fishes (cf Hos 2^{18}). In Gn 1^{24} the land animals are put into three groups: cattle, creeping things, and beasts of the earth. By eliminating the first and third classes, which respectively include domesticated quadrupeds, and the wild animals, we see that the expression 'creeping things' is, roughly speaking, equivalent to our term 'reptiles,' exclusive of those which are aquatic. Delitzsch defines *remeś* as 'the smaller creeping animals that keep close to the earth'; Dillmann as creatures 'which move along the ground either without feet or with imperceptible feet.' From this discussion it is evident that the two are not interchangeable terms. *Remeś* has also a wider signification: in Ps 104^{25} it is used of marine animals, in Gn 9^{8} (EV 'moving thing') it includes all living creatures. See, further, the careful discussion by Professor Driver in Hastings' *DB* i. 517 f. J. A. K.

CRESCENS.—According to 2 Ti 4^{10} a companion of Paul sent by him to Galatia, a name used at this time to designate both Galatia in Asia Minor and ancient Gaul. A few good Greek manuscripts of the NT support the latter interpretation by reading Gallia. A decision on this point rests upon one's conception of the situation out of which the Pastoral letters grew. To-day scholars generally regard this as a reference to the province in Asia Minor. The tradition that Crescens founded the churches of Mayence and Vienne in France is late and may have been suggested by this verse. Late tradition also regards Crescens as one of the seventy disciples of Christ. W. R. S.

CRESCENTS.—See AMULETS, and ORNAMENTS, 3.

CRETE, CRETANS.—Crete, the modern *Candia*, is an island 60 miles S. of Greece proper, about 150 miles long, and varying in breadth from 30 to 7 miles, with mountains as high as 7000 feet. It is about equidistant from Europe, Asia, and Africa. The researches of Sir Arthur J. Evans and others have revealed traces of a very ancient civilization, including an alphabet hitherto unknown, the famous linear B Script of *c* 1200 B.C. recently (1954) deciphered by Michael Ventris and recognized as early Greek, and an earlier linear A Script which seems to be Babylonian (C. H. Gordon). In later times it was famed for its archers, who were valued in the armies of Europe. It was conquered by Rome in 67 B.C., and became, in conjunction with the district Cyrenaica in North Africa, a Roman senatorial province governed by a proconsul. Jews were early to be found there, and were very numerous. Some were present at Pentecost in the year of the crucifixion (Ac 2^{11}). St. Paul's ship, on the voyage to Rome, sailed along the Cretan coast close in (Ac 27^{7}), and came to Fair Havens near Lasea. These places (q.v.) were on the S. coast, which had few harbours.

The epithets which a native of the island, the poet Epimenides (flourished 600 B.C.), flung at the Cretans, are quoted in a somewhat un-apostolic manner in the Epistle to Titus (1^{12}). Epimenides styled them 'always liars, evil beasts of prey, lazy gluttons.' Such vituperation must not be taken too seriously. The ancients were much given to it, and it probably reveals as much of the taste and even character of the persons who used it as it does the nature of those they attacked. When and by whom Christianity was planted in Crete cannot be said. It is probable that it was well established there in the 1st cent. In the Epistle to Titus we find Titus introduced as having been left by St. Paul in charge of the churches. A. So.—E. G. K.

CRIB.—This is the modern **manger** (Lk 2^{7}). It survives in RSV in Is 1^{3}, Job 39^{9}. In AV and RV it is found also in Pr 14^{4} (RSV 'there is no grain').

CRICKET.—The Hebrew *ḥargōl* is rendered 'cricket' in Lv 11^{22} (RV, RSV; AV 'beetle') erroneously. The term denotes a kind of **locust** (q.v.).

CRIME.—In 1611 the word 'crime' had not lost its early meaning of *accusation*, whence Ac 25[16] 'the crime laid against him' (RSV 'charge'). It is possible that in Job 31[11] 'crime' is used in the more modern sense; elsewhere it means 'charge.'

CRIMES AND PUNISHMENTS.—The term 'crimes' is here used loosely in the sense of punishable offences, including not merely crimes (*crimina*) in the sense of breaches of the criminal law in the modern sense, and torts (*delicta*) or breaches of the civil law, but also those offences in the sphere of religion and worship to which definite penalties were attached. Within the limits of this article it is possible to present only a summary of the more important and typical punishable offences recognized in the various Hebrew law-codes. The latter, indicated by the usual symbols, are: (1) BC, the oldest code, known as the Book of the Covenant, Ex 20[22]–23[33], with which for convenience sake is joined the Decalogue of Ex 20[2–17]; (2) D, the Deuteronomic Code, Dt 12–28; (3) H, the Holiness Code, Lv 17–26; and (4) P, the great collection of laws known as the Priestly Code, and comprising the rest of the legislative material of the Pentateuch. In the case of P alone will it be necessary to name the books (Exodus, Leviticus, or Numbers) to which reference is made.

The penal offences of the Pentateuch may be conveniently grouped under the three heads of crimes against Y", against society (including property), and against the individual.

1. A. CRIMES AGAINST Y", or offences in the sphere of religion and worship.—Although it is true that misdemeanours of every kind were in the last resort offences against Y", who was regarded as the only fountain of law and justice, it will be convenient to group under this head those belonging to the special sphere of religious belief and its outward expression in worship. Among these the first place must be given to the **worship of heathen deities**—condemned in the strongest terms in BC (from 20[3] onwards) and D—and of **the heavenly bodies,** D 17[3] (cf 4[19]). The penalty is death under the ban (BC 22[20], D 13[12ff] [see BAN]), or by stoning (D 17[5]). Inseparable from this form of apostasy is the crime of **idolatry,** entailing the curse of God (D 27[15]). **Blasphemy,** or profanation of the Divine name, is forbidden in all the codes; the penalty is death by stoning (H 24[13ff]). The **practice of magic,** wizardry, and similar black arts, exposes their adepts and those who resort to them to the same penalty (H 20[27]).

2. The punishment for doing 'any **work on the Sabbath day**' is death, but only in the later legislation (Ex 31[15] [probably H] 35[2] [P]; cf the very late Haggadic section, Nu 15[32ff]). For neglect of ordinances, to use a familiar phrase, such as **failing to observe the fast** of the Day of Atonement (H 23[29]), or to keep the Passover (Nu 9[13] [P]), an offender was liable to be 'cut off from his people'; (see below). This was also the punishment prescribed for a number of offences that may be grouped under the head of **sacrilege,** such as partaking of blood (Lv 7[27] [P]), and the unauthorized manufacture and use of the holy anointing oil (Ex 30[32f] [P]).

3. B. CRIMES AGAINST SOCIETY.—As the family, according to Hebrew ideas, was the unit of society, the crimes that mar the sanctities of family life may be taken first. Such pre-eminently was **adultery,** severely condemned in all the codes, the punishment for both parties being death (D 22[22], H 20[10]). In a case of **seduction** the man was required to marry her whom he had wronged, if her father gave consent (BC 22[16f]), paying the latter a 'dowry,' *i.e.* the usual purchase price (see MARRIAGE), estimated in D 22[29] at 50 shekels of silver. On the other hand, the penalty for **rape,** if the victim was betrothed, was death (D 22[25ff]), as it was for unnatural crimes like **sodomy** (H 18[22] 20[13] 'thou shalt not lie with mankind as with womankind') and **bestiality** (BC 22[19], H 20[15f]). The **marriage of near kin** is forbidden in H 18[6–18] under seventeen heads (see MARRIAGE). **Incest** with a stepmother or a daughter-in-law was punishable by the death of both parties (H 20[11ff]), while for a man to marry 'a wife and her mother' was a crime that could be expiated only by the death of all three, and that, as many hold (see below), by being burnt alive (*ib.* v.[14]). Ordinary **prostitution** is condemned by H 19[29] (cf D 22[21])—for a priest's daughter the punishment was even death by burning (21[9])—while the wide-spread heathen practice of establishing religious prostitutes, male and female, at the local sanctuaries is specially reprobated in D 23[17f], where the male prostitute is to be recognized under the inexact term 'sodomite,' and the contemptuous 'dog.'

4. To carry **disrespect for** one's **parents** to the extent of smiting (BC 21[15]), or cursing them (BC 21[17], H 20[9]), or even of showing persistent contumacy (D 21[18ff]), entailed the extreme penalty of death at the hands of the local authorities.

5. Everything that would tend to impair the impartial and effective administration of justice is emphatically condemned in the Hebrew codes, the giving and receiving of **bribes,** in particular, being forbidden even in the oldest legislation (BC 23[8] 'for a gift blindeth them that have sight'). Against those who would defeat the ends of justice by **perjury** and **false witness,** the law is rightly severe (D 19[15ff]). **Tale-bearing** (H 19[16]), and the spreading of a report known to be false (BC 23[1]), are condemned, while in the more heinous case of a man **slandering** his newly wedded wife, the elders of the city are to amerce him in an hundred shekels (D 22[13–21]).

6. Property had also to be protected against **theft** (BC 20[15]) and **burglary** (22[2]), with which may be classed the crime of **removing the boundary-stones** of a neighbour's property to increase one's own (D 19[14]), and the use of **false weights and measures** (D 25[15ff], H 19[35ff]). The earliest code likewise deals with **trespass** (BC 22[5]), and **arson** or wilful fire-raising (*ib.* v.[6]), for which the penalty in either case was restitution.

7. C. CRIMES AGAINST THE INDIVIDUAL.—BC 21[15–26] deals with various forms of **assault,** a crime to which the pre-Mosaic *jus talionis* (see below) was specially applicable. **Kidnapping** a freeman was a criminal offence involving the death penalty (BC 21[16], D 24[17]). **Murder** naturally has a place in the penal legislation of all the codes from BC 20[13] onwards. The legislators, as is well known, were careful to distinguish between murder deliberately planned and executed (BC 21[14], D 19[11f]) and unpremeditated **homicide** or **manslaughter** (BC 21[13], D 19[4ff], and especially P, Nu 35[9ff]). The former, with certain exceptions (BC 21[20] 22[2]), entailed capital punishment in accordance with the fundamental principle laid down in Gn 9[6]; in the case of 'the man-slayer' special provision was made for the mitigation of the ancient right of blood-revenge (see REFUGE [CITIES OF]).

8. PUNISHMENTS.—From the earliest period of which we have any record two forms of punishment prevailed among the Hebrews and their Semitic kinsfolk, viz. retaliation and restitution. **Retaliation,** the *jus talionis* of Roman law, received its classical expression in the oldest Hebrew code: 'then you shall give life for life, eye for eye, tooth for tooth, hand for hand, foot for foot, burn for burn, wound for wound, stripe for stripe' (BC 21[23f]). The *talio*, as has already been mentioned, was specially applicable in cases of injury from assault. When life had been taken, whether intentionally or unintentionally, the right of enforcing the *jus talionis* lay with the dead man's next of kin (see KIN [NEXT OF]).

In BC **restitution** varies from fivefold for an ox, and fourfold for a sheep that has been stolen and thereafter killed or sold, to twofold if the animal is still in the thief's possession (BC 22[1–4]), and finally to a simple equivalent in the case of wilful damage to a neighbour's property (*ib.* v.[5f]). **Compensation** by a money payment was admitted for loss of time through bodily injury (BC 21[19]), for loss of property (v.[33–35]), but not, in Hebrew law, for loss of life, except in the cases mentioned BC 21[30]. The payments of 100 shekels and 50 shekels respectively ordained in D 22[19, 29] appear to the modern eye as **fines,** but fall in reality under the head of compensation paid to the father of the women in question.

9. In the penal code of the Hebrews there is a comparative lack of what may be termed intermediate penalties. **Imprisonment,** for example, has no place in the Pentateuch codes as an authorized form of punishment, although frequent cases occur in later times and apparently with legal sanction (see Ezr 7^{26}). The use of the **stocks** also was known to the Jewish (Jer 20^{2f}) as well as to the Roman authorities (Ac 16^{24}). **Beating** with rods and **scourging** with the lash were also practised. The former seems intended in D 25^{1ff}, but later Jewish practice substituted a lash of three thongs, thirteen strokes of which were administered (cf 2 Co 11^{24}). Many, however, would identify the punishment of this passage of D with the favourite Egyptian punishment of the bastinado. **Mutilation,** apart from the *talio,* appears only as the penalty for indecent assault (D 25^{11f}).

10. The regular form of capital punishment was death by **stoning,** which is prescribed in the Pentateuch as the penalty for eighteen different crimes, including Sabbath-breaking. 'For only one crime—murder—is it the penalty in all the codes.' The execution of the criminal took place outside the city (H 24^{14}), and according to D 17^{7} the witnesses in the case cast the first stone (cf Jn 8^{7}). In certain cases the dead body of the malefactor was **impaled** upon a stake; this, it can hardly be doubted, is the true rendering of D 21^{22f} (EV 'hang him on a tree'), and of the same expression elsewhere. **Hanging** or strangulation is mentioned only as a manner of suicide (2 S 17^{23}, Mt 27^{5}). **Crucifixion,** it need hardly be said, was a Roman, not a Jewish, institution. **Beheading** appears in Mt 14^{10}||, Ac 12^{2}, Rev 20^{4}.

11. The meaning of the expression frequently found in P, 'to be cut off from his people, from Israel,' etc., is uncertain; most probably it denotes a form of **excommunication,** with the implication that the offender is handed over to the judgment of God, which also seems to be intended by the **banishment** of Ezr 7^{26} (note RVm). A similar division of opinion exists as to the penalty of **burning,** which is reserved for aggravated cases of prostitution (H 21^{9}) and incest (20^{19}). Here the probability seems in favour of the guilty parties being burned alive (cf Gn 38^{24}), although many scholars hold that they were first stoned to death. The most extreme form of punishment known to the codes, in that a whole community was involved, is that of total destruction under **the ban** of the first degree (see BAN) prescribed for the crime of apostasy (BC 22^{20}, more fully D 13^{15-17}).

In recent years the emphasis on the importance of the cult in OT religion has brought with it a tendency to regard as cultic some of the legislation that was formerly regarded as secular. Indeed, Bentzen (*Introduction to the OT,* 1948, i, p. 218) says, 'when we regard the Israelite laws, the religious point of view must always be kept in mind. The distinction of Roman law between *jus* and *fas* cannot be carried through clearly in Israel nor in the Orient as a whole.' A similar view may be found in most discussions of this point. Moreover, the literary style and pattern of legislative writing has been examined (especially by Alt) during recent years, with interesting results. Individual laws have been classified according to three groups: (*a*) Hypothetical or casuistic, such as 'if (or 'when') a man does this or that thing, then such and such a punishment is imposed. (Cf Ex $21^{7-11, 14, 20f, 22f}$, and a sub-division in $21^{12, 15-17}$; or yet again, Lv 20^{6ff}, literally 'The man who . . . shall be . . .') (*b*) Categorical, such as the commandments and prohibitions in the Decalogue and very frequently. (*c*) A mixture of (*a*) and (*b*), as in Ex 21^{2-6} 23^{4f}. Bentzen (op. cit., p. 226) ventures the view that the hypothetical forms are used for civil law and the categorical for sacral. It is to be noted, too, that the collections of laws within the Pentateuch, both in small units and larger, contain the above patterns without apparent distinction. A. R. S. K.—B. J. R.

CRIMSON.—The word *tôlā'*, translated in Is 1^{18} 'crimson' and in La 4^{5} 'purple' (RSV; AV, RV 'scarlet') is closely similar to the word *tôlē'āh, tôla'ath,* usually translated '**worm**' (q.v.), exactly as the Arabic *dūdeh,* the common word for 'worm,' is to-day also used in Palestine for the imported cochineal insect. The Palestine insect is the female *Coccus ilicis* of the same Natural Order as the American *C. cacti*; it feeds on the holm-oak.

CRISPING PINS.—Is 3^{22} AV; RV has **satchels** and RSV 'handbags'; see BAG.

CRISPUS.—The 'ruler' of the Jewish synagogue at Corinth (Ac 18^{8}). Convinced by the reasonings of Paul that Jesus was the Messiah, he believed with all his household. The Apostle mentions him (1 Co 1^{14}) as one of the few persons whom he himself had baptized.

CRITICISM, BIBLICAL.—1. Lower and Higher.—Criticism of the Bible, as of any ancient literature, includes two branches: (1) Lower Criticism, which seeks to reach the most reliable approximation to the text of the author's Hebrew (or Aramaic) or Greek autograph (see TEXT OF THE NT), and (2) Higher Criticism, which on the basis of the most reliable text seeks discriminating insight into the questions of authorship, date, circumstances of origin, historicity, literary integrity, evidence for and isolation of sources, literary category, doctrinal tendency, and the like. The object upon which such discriminating observation is practised is the text itself and, secondarily, related texts within and without the Canon. The tools are the lexicography and grammar of the language involved and archaeology in the widest sense: history, antiquities, monuments, and the vast lore of the history of considered opinion (which may be valuable even when false). However, these branches are only the two poles, toward one or the other of which criticism tends, for countless decisions made in lower criticism are made on premises of higher criticism, while higher criticism is constantly reweighing alternatives presented and partially clarified by lower criticism.

The title of the second branch of criticism is open to misuse and misunderstanding. Because lower criticism is seldom heard of except among experts, while higher criticism is often publicly mentioned, the comparative in both names often escapes notice and the latter term is taken for arrogance on the part of certain scholars who thus seem to call themselves 'higher critics' in contempt for 'lower,' older, and more conservative scholars. 'Criticism' itself is also understood as carping or fault-finding, rather than as discrimination. Worse yet, criticism is still often regarded as merely negative, an attack upon the Bible—for the results of criticism that attract popular attention are usually those startling ones which shatter preconceived notions. But the uncritical do not readily distinguish between such notions and saving faith. Not that negative criticism with an anti-biblical animus has been, or is now, unknown! But there is also higher criticism that is thoroughly constructive and leaves faith deprived only of previous false supports, and now all the more firmly undergirded by the genuine supports. In itself higher criticism is neutral; it is a scientific process. Even the champions of long-accepted but now threatened views are compelled to use this very process against the 'higher critics' with whom they disagree. There is a tendency in this generation to drop the wider term and use instead the name of some subdivision of it, such as historical criticism, literary criticism, form criticism.

2. Its Origin.—Only a kind of historical myopia can hold that any valid higher criticism has existed only since the Reformation, or even, as some have asserted, during the two centuries since 1750. Unless it be held that the determination of the Canon was entirely the work of the Holy Spirit working independently of the judgment of human minds, the Canon itself is the oldest monument of higher criticism, an eminent piece of discrimination which the Church by and large has always approved. The whole tenor of ancient and mediaeval exegesis was not congenial to the development of conscious, systematic criticism, for this requires a

freedom from mere tradition and hierarchic authority that could only slowly and painfully be won. Nevertheless it appeared at an early date in the consideration of individual questions. Origen was certainly practising it in his analysis of the non-Pauline style of Hebrews; so was Julius Africanus in his proof that Susanna was composed in Greek and hence is no part of the Hebrew-Aramaic Daniel. Theodore of Mopsuestia recognized the Song of Solomon as an erotic poem, and saw that the author of Job was not a Jew. The *canons* of St. Victor (12th cent.) assumed that the Wisdom of Solomon is not the work of Solomon and that the key to Dn 11 lies in 1 and 2 Maccabees. But this kind of thing was sporadic, not systematic.

Neither did Luther practise systematic criticism, though he did question the validity of the Canon as to the inclusion of four books of the NT; the order of the German NT and of some Lutheran versions in other languages still shows traces of his originally more drastic criticism. Perhaps Calvin cautiously agreed with him to the extent that of all the books of the NT Revelation alone was left without a commentary from his hand.

To the embarrassment of professional exegetes, it must be admitted that modern higher criticism was first systematically practised by non-theologians: the jurist and diplomat Grotius, the philosophers Hobbes and Spinoza, and the medical professor Jean Astruc. For the OT, at least, Hobbes' *Leviathan* (ch. 33) contains an embryonic 'introduction' to the Bible such as our century knows. It is higher criticism nearly free from unquestioned tradition. Perhaps Spinoza's greatest 'sin' was to bring to the light of day in universal Latin the esoteric Rabbinic critical lore which he knew from the hints in Ibn Ezra and Rashi. The works of both Hobbes and Spinoza were proscribed by the High Court of Holland, though neither had ventured to deal in the same way with the NT. Astruc was the father of modern source-criticism of the Pentateuch. As a pioneer he overdid his search for sources, finding some thirteen in Genesis alone; but for what validity they have, he discovered the E and J 'sources.'

Seventy-five years before Astruc's book a fellow Frenchman, Richard Simon, a Catholic priest of the Oratory, had published his *Histoire Critique du Vieux Testament*. It treated first textual criticism, then higher. Here his most important insight (to-day a truism, but we owe it to him) was that the historical books of the OT are the product of gradual compilation and much later redaction. In the 18th cent. both Simon and Astruc were translated into German, and it was in Germany that their work bore fruit.

In Christian Europe free investigation of the NT was more dangerous than that of the OT, all the more so if it dealt with the Gospels and Jesus Himself. So it is not surprising that the first brilliant work of this sort was written by a non-theologian and published not only anonymously but posthumously: *Vom Zwecke Jesu und seiner Jünger*: *Noch ein Fragment des Wolfenbüttelschen Ungenannten* ('On the Purpose of Jesus and His Disciples—One More Fragment by the Anonymous Writer of Wolfenbüttel'), published by G. E. Lessing in 1778. The answers offered by this violent and much-hated little book may all be wrong, but it raised the *right questions*—all the basic questions that are still the core of investigation on the Gospels. The author was that Reimarus with whom Albert Schweitzer began his *Quest of the Historical Jesus* (*Von Reimarus zu Wrede*, 1906).

From the end of the 18th cent. onward the names and works in biblical criticism for both Testaments become so numerous that it is necessary to schematize. By a great over-simplification one may say that the 18th cent. fought for and won the right of independent criticism even of the Bible; that the 19th cent. was most concerned with source criticism; and that the first half of the 20th cent. has had for its central advancing concern stylistic analysis and deductions derived therefrom (=form criticism). See below, **4.**

3. Source Criticism.—Following the pioneer steps of Simon and Astruc, a whole series of scholars worked out multiple sources for the Pentateuch, proceeding with a degree of confidence in the (often subjective) techniques of literary criticism which to-day seems naive but which was an inevitable consequence of the intellectual atmosphere of the century and probably a necessary transitional stage in the history of biblical criticism. Only their names can be mentioned here: Semler, Michaelis, Eichhorn, DeWette, Ewald, Hupfeld, Kuenen, and especially Graf and Wellhausen, after whom the 'classic' 19th-cent. conception of the Pentateuch is usually named. This very source-criticism also brought the prophets into prominence as perhaps the earliest distinct figures in Hebrew religious history, since their predecessors are known only through the eyes of editors later than the 8th-7th cent. (Kuenen, Robertson Smith). Studies in the Mesopotamian languages and cultures, along with archaeology and comparative religion, were also characteristic of the period, frequently supplementing the prevailing literary-critical studies. In the NT field source-criticism centred around the Synoptics. Scholars at the end of the century came nearly unanimously to the Two-Source Theory, but only after travelling successive blind alleys: a lost gospel as common source to all three gospels (Lessing), little slips of written memoranda (Schleiermacher), direct and sole use of oral tradition (Gieseler), Mark digested from Matthew and Luke (Griesbach), and many others. The priority of Mark was first detected and defended by Lachmann, the classical and Germanistic philologist (1835). The direct father of the Two-Source Theory was H. J. Holtzmann (1863), though it was anticipated by C. H. Weisse and C. G. Wilke in 1838. Various addenda and modifications of this theory, that is multiple-source theories, have been proposed, of which the most successful, at least in English-speaking lands, is the Four-Source theory of B. H. Streeter. But world scholarship prefers the older, simpler theory. There was also much discussion of the sources of Acts, but it still has not come to any definite conclusion. Much more important was the related question of the relative value of Acts and the Pauline corpus as sources for historical knowledge of Paul (F. C. Baur and the Tübingen School). This necessitated a critical sifting of the Pauline corpus: what really comes from the hand of Paul? The Tübingen School (except for Dutch extremists) always maintained the authorship of Romans, 1 and 2 Corinthians, and Galatians by Paul, but doubted all the rest. Even severely critical scholars to-day add to the big four three others: 1 Thessalonians, Philippians, Philemon, while they hold in suspension 2 Thessalonians and Colossians, and assign Ephesians and the Pastorals to disciples of Paul.

4. Form Criticism.—Partly by fructification from secular studies in folk-literature, partly by reaction against the strait-jacket of pure literary criticism, there arose towards the end of the 19th cent. a new method of criticism which now is best known by the name Form Criticism, though this name dates only from 1919. The immediate founder of the method was H. Gunkel, though he acknowledges great debt to Herder and recognizes Holtzmann and the philologist Edward Norden as predecessors. The great folklorists from the Grimm brothers on (and especially the Dane, Oxel Olrik) also directly influenced the NT branch of the school. The advantage of this method is that it offers a way, where there had been none, of dealing with oral tradition. There are 'laws' of folk-behaviour in passing on tradition. Gunkel discovered in the OT certain recurrent literary categories which exhibited related form, with a related style appropriate to each form. This led him to inquire after their *Sitz im Leben*—their actual functioning-place in the life of the group whose motivating tradition they were. But to many *Form Criticism* means the specific application of Gunkel's OT method to the NT by three of his pupils: Martin Dibelius, K. L. Schmidt, and Rudolf Bultmann. In the

years 1919–21 all three published books on the Synoptics using this method. Perhaps the most fruitful insight here has been Dibelius's (and Bultmann's) recognition of the paradigm (pronouncement-story; Bultmann's apophthegm) as the most important vehicle of relatively reliable tradition from and about Jesus. Form Criticism frankly recognizes the active and creative part of the Community in shaping the pre-Marcan tradition; no other of its assertions has aroused so much resistance and contradiction as this one. Less controversial has been the acceptance of their contention that the pericopes were originally independent except in the passion-story. The method has also been applied to other areas of traditional material elsewhere in the NT: Acts, James, and the exhortations, confessional statements, and 'hymns' embedded in the epistles. See ORAL TRADITION, and GOSPELS, 4. W. F. A.—K. G.

CROCODILE.—1. *liwyāthān* is rendered 'crocodile' in RVm, RSVm in Job 41[1], but in the text here and elsewhere '**Leviathan**' (q.v.). **2.** *ḥayyath ḳāneh*, 'the beasts that dwell among the reeds' (RSV, cf RV; AV 'the company of spearmen'), is thought by some to be the crocodile or the hippopotamus as symbolizing Egypt. **3.** *tannîm* is rendered 'crocodile' in RVm in Jer 14[6] (RV, RSV 'jackals'; AV 'dragons'). See DRAGON and JACKAL. **4.** *kōaḥ* is rendered 'land crocodile' in RV and RSV in Lv 11[30] (AV 'chameleon'). See LIZARD.

The crocodile probably still exists in the *Nahr ez-Zerḳā*, S. of Mount Carmel, called by Pliny the Crocodile River. It is supposed to have been brought there by some Egyptian settlers. A dead crocodile was brought from there to the late Rev. J. Zeller of Nazareth. Herr Schumacher reports that he saw one there, and fifty years ago a number of crocodile's eggs were brought from this river and sold in Jerusalem. A stuffed specimen is in the *PEF* museum, London.

CROCUS.—See ROSE.

CROOKBACKT.—See MEDICINE.

CROSS.—The cross in its literal sense is dealt with under CRUCIFIXION, but there are certain spiritual uses of the word in the NT that call for separate consideration. (1) It is *a symbol of self-sacrifice*.—According to the Gospels, Jesus on at least three occasions affirmed the necessity for those who would follow Him of taking up the cross (Mt 10[38]; Mk 8[34]=Mt 16[24]=Lk 9[23]; [Mk 10[21] only in AV]; Lk 14[27]). The words imply a prophetic anticipation of His own experience on Calvary; but even although on Christ's earliest use of them this special application was hidden from His disciples (cf Mt 16[21f] 20[17–19]), the figure of bearing one's cross would convey a quite intelligible meaning. In Galilee multitudes had been crucified after the rebellion under Judas the son of Hezekiah (Jos. *Ant.* XVII. x. 10 [295], *BJ* II. v. 2 [75]; in Jerusalem, as we see from the execution of two robbers side by side with Jesus, a crucifixion must have been an ordinary incident under the Roman administration (Jos. *BJ* II. xii. 6 [241], xiii. 2 [253], xiv. 9 [306], v. xi. 1 [449–451]). And as it was usual to compel a *cruciarius* to carry to the place of execution the transverse beam (*patibulum*) of his own cross, Christ's figure would have a meaning as plain as it was vivid. But, unlike the wretched *cruciarius*, His disciples of their own free will were to take up the cross and follow Him. Luke's addition of the word 'daily' draws attention away from the historic event to self-sacrifice as a permanent obligation (9[23]; cf 1 Co 15[31]).

(2) It is *a thing of shame*.—The author of Hebrews tells us how Jesus 'endured the cross, despising the shame' (12[2]). Both to the Roman and the Jew, the death on the cross was the most shameful death a man could die—to the former because reserved by Roman usage for slaves, foreigners, or desperate criminals; to the latter because it came under the curse pronounced by the Jewish Law upon any one whose dead body hung upon a tree (Dt 21[23]; cf Gal 3[13]). To Jew and Gentile alike this was the great 'stumbling-block of the cross' (Gal 5[11], 1 Co 1[23]). And even Paul himself regards 'death on a cross' as the very lowest point in Christ's long pathway of humiliation (Ph 2[8]).

(3) There are certain theological uses of the word peculiar to the Pauline writings. Paul makes the cross *a summary of the gospel*. Thus for 'the preaching of the gospel' in 1 Co 1[17] he substitutes in v.[18] 'the word of the cross,' and in v.[23] 'the preaching of Christ crucified' (cf 2[2]). Again in Gal 6[12] he speaks of suffering persecution 'for the cross of Christ,' where the meaning evidently is 'for the confession of faith in the Christian gospel.' And when he glories in 'the cross of our Lord Jesus Christ' (v.[14]), the cross is used, as the clauses following show, to epitomize the saving work of Jesus both *for* us and *in* us.

(4) Further, in the Pauline theology the cross is set forth as *the great instrument of reconciliation*. It is 'by the blood of his cross' that Christ has effected a reconciliation between God and man (Col 1[20ff]). He took out of the way the bond written in ordinances that was against us, 'nailing it to the cross' (2[14]). It is 'through the cross' that He has reconciled the Gentile and the Jew, abolishing that 'law of commandments' which rose between them like a middle wall of partition (Eph 2[14–16]). And there are glimpses of a still wider reconciliation accomplished by Jesus through His cross—a reconciliation of all things to God the Father, whether they are things on the earth or things in the heavens (Col 1[20], cf Eph 1[10]).

(5) Once more, the cross is to Paul *the symbol of a mystical union with Christ Himself*. In the great figure of the Gospels (Mt 10[38]||) cross-bearing stands for the imitation of Christ. Paul goes deeper, and sees in the cross a crucifixion with Christ from which there springs a possession of the indwelling life of Christ (Gal 2[20]). The old man is crucified (Ro 6[6]), that a new man may rise from the dead (cf v.[4]). The flesh is crucified, with its passions and lusts (Gal 5[24]), that the Christian may live and walk by the Spirit (v.[25]). And yet this mysticism of the cross never causes the Apostle to lose sight of the cross as the means of an objective redemption. On the contrary, he regards the two ideas as inseparably connected; and, glorying in the cross of our Lord Jesus Christ, does so because through it (*a*) the world—the sphere of external ordinances—is crucified to him; and (*b*) he himself is crucified to the world (Gal 6[14]). J. C. L.—W. D. S.

CROW occurs once in Apocrypha (Bar 6[54]), where the helplessness of idols is illustrated by the remark that 'they are as crows between heaven and earth.' See also RAVEN.

CROWN.—1. In the OT.—The word represents several Hebrew terms with distinct meanings. (1) *zēr*, properly an edge or border, with the suggestion of a twisted or wreathed appearance. It occurs only in Ex (25[11] and frequently). It is always of gold, and in the furniture of the Tabernacle surrounds the Ark, the table of show-bread and its border, the altar of incense. RVm gives as alternative renderings 'rim,' 'moulding,' and RSV has the latter. Its purpose seems to have been ornamental merely. (2) *nēzer*, properly 'mark of separation or consecration' (from *nāzar* 'to separate, consecrate'; whence *nāzîr*='Nazirite'). Originally it was no more than a fillet to confine hair that was worn long (W. R. Smith, *RS*[2] p. 483). It is used of the crown set upon the forehead of the high priest (Ex 29[6] etc.)—a plate of pure gold with the engraving 'Holy to Y"' (39[30], cf Lv 8[9]), and also of the crown worn by Hebrew kings (2 S 1[10], 2 K 11[12]). In both cases it was the symbol of consecration. (3) *kether*, similar in meaning to (2) but without the idea of consecration, is used in Est (1[11] 2[17] 6[8]) to denote the **diadem** of a Persian king or queen. (4) *ʿaṭārāh*, the word that is most frequent and of the most general significance. It is applied to the crown worn by kings, whether Jewish (2 S 12[30] etc.) or foreign (1 Ch 20[2], Est 8[15] [cf 6[8]]), to the wreath worn at banquets

(Is 28[1, 3], Ezk 23[42]); but also in a figurative sense, as when, *e.g.* a virtuous woman is called her husband's crown (Pr 12[4]), a hoary head the crown of old age (16[31]), the Lord of hosts the crown of His people (Is 28[5]). (5) *kodhḳōdh* is the crown or top of the head, as in the expression 'from the sole of his foot to the crown of his head' (Job 2[7]); cf Gn 49[26], Dt 33[20] etc.—The verb 'to crown' is comparatively rare in the OT: *'āṭar* (corresponding to (4) above) is found in Ps 8[5] 65[11] 103[4], Ca 3[11], Is 23[8]; *kāthar* (corresponding to (3)) in Pr 14[18]; *nāzar* (corresponding to (2)) in Nah 3[17] (RSV 'princes'; the Hebrew should probably be read as 'your crowned ones.')

2. In the NT.—In AV 'crown' represents two Greek words: (1) *stephanos* (whence *stephanoō*, 'to crown'), (2) *diadēma*; the former being the badge of merit or victory, the latter (found only in Rev 12[3] 13[1] 19[12]) the mark of royalty. This distinction, though not strictly observed in LXX, is properly maintained in RV and RSV where (2) is in each case rendered 'diadem.' The *stephanos* (properly 'wreath'=Lat. *corona*) was the **garland** given as a prize to the victors in the games (1 Co 9[25] [RSV 'wreath']; cf 2 Ti 2[5]). It is the word applied to our Lord's 'crown of thorns' (Mt 27[29], Mk 15[17], Jn 19[2, 5]). It is used figuratively of 'the crown of righteousness' (2 Ti 4[8]), 'of life' (Ja 1[12], Rev 2[10]), 'of glory' (1 P 5[4]). St. Paul applies it to his converts as being his joy and reward (Ph 4[1], 1 Th 2[19]); and in Revelation it is employed in various symbolical connexions (4[4, 10] 6[2] 9[7] 12[1] 14[14]). J. C. L.

CRUCIBLE.—See FINE.

CRUCIFIXION.—1. Its nature.—Crucifixion denotes a form of execution in which the condemned person was affixed in one way or another to a cross (Lat. *crux*) and there left to die. The Greek term rendered 'cross' in the English NT is *stauros* (*stauroō*='crucify'), which has a wider application than we ordinarily give to 'cross,' being used of a single stake or upright beam as well as of a cross composed of two beams. The crucifixion of living persons is unknown in OT, though death by impaling is referred to in Ezr 6[11] and by hanging in Est 7[19]. The *stauroō* of LXX here renders the Hebrew *tālāh*='to hang'; but the hanging up of a dead body, especially on a tree, is familiar (Jos 10[26]; cf 1 S 31[10], 2 S 4[12] 21[12]), and is sanctioned by the Law (Dt 21[22]), with the proviso that a body thus hung, as something accursed, must be removed and buried before nightfall (v.[23]). This enactment explains Jn 19[31], Gal 3[13], as well as the references in the NT to the cross as a tree (Ac 5[30] 10[39] 13[29], 1 P 2[24]). See CROSS.

2. Its origin and use.—The origin of crucifixion is traced to the Phoenicians, from whom it passed to many other nations, including both Greeks and Romans. Among the latter it was exceedingly common, but was confined almost exclusively to the punishment of slaves, foreigners, or criminals of the lowest class, being regarded as incompatible with the dignity of any Roman citizen (cf Cic. *in Verr.* i. 5 [13], ii. v. 61–67 [158–173]). This explains why, as tradition affirms, Paul was beheaded, while Peter and other Apostles, like the Master Himself, were put to death on the cross. The Jews in Palestine were familiar with the Roman penalty—see *e.g.* Josephus, *War* II. v. 2 [75], where Varus's crucifixion of two thousand Jews is described.

3. Forms of the cross.—The primitive form was the *crux simplex*—a single post set upright in the earth, to which the victim was fastened; or a sharp stake on which he was impaled. The Roman cross was more elaborate, consisting of two beams, which, however, might be put together in different ways. Three shapes are distinguished: (1) The *crux commissa* (T), shaped like a capital T, and commonly known as St. Anthony's cross; (2) the *crux immissa* (†), the form with which we are most familiar; (3) the *crux decussata* (X), shaped like the letter X, and known as St. Andrew's cross. Early Christian tradition affirms that it was on (2) that Jesus died (*e.g.* Iren. *Haer.* ii. 24, § 4; Justin, *Trypho*, 91); and this is confirmed by the statements of the Gospels as to the 'title' that was set above His head (Mt 27[37], Mk 15[26], Lk 23[38], Jn 19[19f]).

4. Method and accompaniments of crucifixion.—These are very fully illustrated in the Gospel narratives of the death of Jesus. Immediately after being condemned to the cross, a prisoner was brutally scourged. [In the case of Jesus the scourging appears to have taken place before His condemnation (Jn 19[1]), and to have been intended by Pilate as a compromise with the Jews between the death sentence and a verdict of acquittal (Lk 23[22])]. The cross-beam (*patibulum*), not the whole cross, was then laid on his shoulders, and borne by him to the place of execution, while his *titulus* (Jn 19[19f], Greek *titlos*, English 'title' (q.v.) or tablet of accusation hung around his neck, or was carried before him by a herald. If it was only the *patibulum* that Jesus carried, the probable failure of His strength by the way, leading to the incident of Simon the Cyrenian (Mk 15[21]||), must be attributed not to the weight of His burden, but to sheer physical exhaustion aggravated by loss of blood through scourging, as well as to the anguish that pressed upon His soul.

Arrived at the place of execution, which both with the Romans and the Jews was outside of the city (see article GOLGOTHA), the condemned was stripped of his clothing by the soldiers detailed to carry out the sentence, who immediately appropriated it as their lawful booty (Mk 15[24]||). He was then laid on the ground, the cross-beam was thrust beneath his shoulders, and his hands were fastened to the extremities, sometimes with cords, but more usually, as in the case of Jesus (Jn 20[25], Lk 24[39f]; cf Col 2[14]), with nails. The beam was next raised into position and securely fixed to the upright already planted in the ground. On the upright was a projecting peg (*sedile*) astride of which the victim was made to sit, thereby relieving the strain on the pierced hands, which might otherwise have been torn away from the nails. Finally the feet were fastened to the lower part of the upright, either with nails (Lk 24[39f]) or with cords.

The cross was not a lofty erection—much lower than it is usually represented in Christian art (cf Mt 27[48]||). Hanging thus quite near the ground, Jesus, in the midst of His last agonies, was all the more exposed to the jeers and insults of the bystanders and passers-by. It was a custom in Jerusalem to provide some alleviation for the physical tortures and mental sufferings of the crucified by giving him a stupefying draught. This was offered to Jesus before He was nailed to the cross; but He refused to take it (Mk 15[23]||). He would drink every drop of the cup that His Father had given Him, and go on to death with an unclouded consciousness.

In crucifixion the pains of death were protracted long—sometimes for days (cf Jos. *BJ* v. xi. 1 [449–451], *Life*, 75 [420]). Even when the victims were nailed and not merely tied to the cross, it was hunger and exhaustion, not loss of blood, that was the direct cause of death. Sometimes an end was put to their sufferings by the *crurifragium*—the breaking of their legs by hammer-strokes. It is not likely that in ordinary circumstances the Jews would induce a Roman governor to pay any attention to the law of Dt 21[22f]. But, as the day following our Lord's crucifixion was not only a Sabbath, but the Sabbath of Passover week, Pilate was persuaded to give orders that Jesus and the two robbers crucified along with Him should be despatched by the *crurifragium* and their bodies removed (Jn 19[31]). The soldiers broke the legs of the robbers first, but when they came to Jesus they found that He was already dead. One of them, either in sheer brutality or to make sure of His death, ran a spear into His side. The blood and water that gushed out (Jn 19[34], cf 1 Jn 5[6, 8]) have been held by some medical authorities to justify the opinion that the Saviour died of a broken heart; but their significance in John is more probably as proof of the reality of Jesus' physical body, against the Docetic theory of a phantom which resembled Him. His death being certified, Joseph of Arimathaea, who

had begged the body from Pilate, removed it from the cross and laid it in his own sepulchre (Mk 15^{42ff} ||).

J. C. L.—F. C. G.

CRUELTY.—The word 'cruelty' has nearly disappeared from our Bibles. RV and RSV have introduced 'violence' (Gn 49^{5}, Jg 9^{24}, Ps 74^{20}), 'harshness' (Ezk 34^{4} [RSV]), and 'rigour' (Ezk 34^{4} [RV]), but RV retains 'cruelty' in Ps 27^{12} (RSV 'violence') and RSV has 'inflicted cruelties' in 2 Ch 16^{10} (AV, RV 'oppressed'). However, many instances of cruelty remain in the OT records, and some of these seem to have the sanction of Scripture. Such passages as Dt 20^{17} and Jos 6^{21} no longer trouble the devout student of the Bible as they once did. He now recognizes the fact that in the Bible we have a faithful record of the slow evolution of spiritual ideals, and that the revelation of the NT brands as unchristian and inhuman many things that were written by the ancient scribes and some things that were done by ancient saints. The spirit of Elijah may not be the spirit of Christ (Lk 9^{55}). Cruelty is unchristian; kindness is the law of the Christian life. D. A. H.

CRUSE.—See HOUSE, 9.

CRYSTAL.—See JEWELS AND PRECIOUS STONES.

CUB.—This place, mentioned in Ezk 30^{5} (RV; AV **Chub**), is almost certainly a corruption of *Lub*, *i.e.* **Libya** (so RSV), as was read by LXX. The 'Libya' of AV is a misrendering of *Put* (so RV, RSV). Cf Nah 3^{9}, where Libyans are mentioned along with Cush (Ethiopia), Egypt, and Put, as here; also 2 Ch 12^{3} 16^{8}.

CUBIT.—See WEIGHTS AND MEASURES.

CUCKOW, Lv 11^{16}, Dt 14^{15} (AV).—See OWL.

CUCUMBERS.—Two varieties of cucumber are very common in Palestine. The *Cucumis sativus* (Arab. *khyār*), a smooth-skinned, whitish cucumber of delicate flavour, is a prime favourite with the Arabs. It is cool and juicy, but for cultivation requires abundant water. The second (*C. chate*, Arab. [in Jerusalem] *faqqūs*, [in Syria] *qiththā*) is a long slender cucumber, less juicy than the former. The reference in Nu 11^{5} is probably to the latter, which is an Egyptian plant. The 'lodge in a cucumber field' (Is 1^{8}) is the rough booth erected by the owner, raised, as a rule, high upon poles, from which he may keep guard over his ripening vegetables. When the harvest is over, the 'lodge' is not taken down but is allowed to drop to pieces. It is a dreary ruin of poles and dried branches during more than half the year.

E. W. G. M.

CUMI.—See TALITHA CUMI.

CUMMIN.—The seed of an umbelliferous plant, the *Cuminum cyminum* (*syriacum*), widely cultivated in and around Palestine. It is used to flavour dishes, and, more particularly, bread; in flavour and appearance it resembles carraway; it has long been credited with medicinal properties; it certainly is a carminative. It is even now beaten out with rods (Is 28^{27}). Tithes of cummin were paid by the Jews (Mt 23^{23}). E. W. G. M.

CUN.—A city of Syria, despoiled by David, 1 Ch 18^{8} (AV **Chun**). In the parallel 2 S 8^{8} it is replaced by **Berothai.** Possibly Cun is to be located at *Râs Baʿalbek*.

CUNNING.—As a substantive 'cunning' in AV means either *skill* or *knowledge*; as an adjective either *skilful* or *wise* (we cannot say *knowing*, for that adjective has also degenerated). It is the present participle of the Anglo-Saxon verb *cunnan*, which meant both 'to know' and 'to be able.' In the Preface to the Wycliffite version of 1388 we read of 'the Holy Spyrit, author of all wisdom and cunnynge and truth.'

CUP.—**1.** In OT the rendering of various words, the precise distinction between which, either as to form or use, is unknown to us. The usual word is *kōs*, the ordinary drinking-vessel of rich (Gn 40$^{11, 13, 21}$) and poor (2 S 12^{3}) alike, the material of which varied, no doubt, with the rank and wealth of the owner. Joseph's divining cup (*gābhîaʿ*, Gn 44^{2ff}) was of silver, and, we may infer, of elaborate workmanship, since the same word is used for the **bowls** (AV) or cups (RV and RSV), *i.e.* the flower-shaped ornamentation on the candlestick of the Tabernacle. That the *gābhîaʿ*, was larger than the *kōs* is clear from Jer 35^{5}. The *kᵉsāwôth* of 1 Ch 28^{17} were more probably **flagons,** as RV and RSV in Ex 25^{29} 37^{16} (but Nu 4^{7} RV 'cups,' RSV 'flagons'). The *'aggān* (Is 22^{24}) was rather a **basin,** as Ex 24^{6}, than a cup (EV).

In NT *potērion* is the corresponding name of the ordinary drinking-cup (water Mt 10^{42} etc., wine 23^{25} etc.). The 'cup of blessing' (1 Co 10^{16}) is so named from the *kōs habbᵉrākhāh* of the Jewish Passover (q.v., also EUCHARIST).

2. The word 'cup' has received an extended figurative application in both OT and NT. (*a*) As in various other literatures, 'cup' stands, especially in Psalms, for the happy fortune or experience of one's earthly lot, mankind being thought of as receiving this lot from the hand of God, as the guest receives the wine-cup from the hand of his host (Ps 16^{5} 23^{5} etc.). But also, conversely, for the bitter lot of the wicked, Ps 11^{6} 75^{8} (cf (*c*) below), and in particular for the sufferings of Jesus Christ, Mt 20^{22f}, Mk 10^{38f} 14^{36}, Lk 22^{42}, Jn 18^{11}. (*b*) Another figure is the 'cup of salvation' (literally 'of deliverances'), Ps 116^{13}. The reference is to the wine of the thank-offerings, part of the ritual of which was the festal meal before Y^{H} (cf vv.$^{14, 17f}$). (*c*) By a still bolder figure the punitive wrath of the offended Deity is spoken of as a cup which the guilty, Israelites and heathen alike, must drain to the dregs. So Jer 25^{15ff} (the wine-cup [of] wrath), Ezk 23$^{32-34}$, Is 51^{17ff} ('the cup of trembling,' RV and RSV 'staggering'), Zec 12^{2} (RV and RSV 'cup of reeling'), Ps 75^{8}, Rev 14^{10} 16^{19} 18^{6}, for all which see the commentaries. (*d*) Lastly, we have 'the cup of consolation' offered to the mourners after the funeral-rites, Jer 16^{7} (cf Pr 31^{6}).

CUPBEARER.—An officer of considerable importance at Oriental courts, whose duty it was to serve the wine at the table of the king. The first mention of this officer is in the story of Joseph (Gn 40$^{1-15}$), where the term rendered **butler** in EV is the Hebrew word which is rendered in other passages 'cupbearer.' The holder of this office was brought into confidential relations with the king, and must have been thoroughly trustworthy, as part of his duty was to guard against poison in the king's cup. In some cases he was required to taste the wine before presenting it. The position of Nehemiah as cupbearer to Artaxerxes Longimanus was evidently high. Herodotus (iii. 34) speaks of the office at the court of Cambyses, king of Persia, as 'an honour of no small account,' and the narrative of Nehemiah shows the high esteem of the king, who is so solicitous for his welfare that he asks the cause of his sadness (2^{2}). The cupbearers among the officers of king Solomon's household (1 K 10^{5}) impressed the queen of Sheba, and they are mentioned among other indications of the grandeur of his court, which was modelled upon courts of other Oriental kings.

CUPBOARD (1 Mac 15^{32} AV and RV).—A 'sideboard' (RSV) used for the display of gold and silver plate. This is the earliest meaning of 'cupboard'; cf Greene (1592), 'Her mistress . . . set all her plate on the cubboorde for shew.'

CURDS.—See MILK.

CURSE.—See BLESSING AND CURSE, BAN, and EXCOMMUNICATION.

CURTAIN.—See TABERNACLE, 5 (*a*).

CUSH.—A personal name found only in the title of Ps 7. He is described as a Benjamite, and was probably a follower of Saul who opposed David.

CUSH in OT designates **Ethiopia** (q.v.), and is the only name used there for that region. It is the same as the Egyptian *Kôsh*. Broadly speaking, it answers to the modern Nubia. More specifically, the Egyptian *Kôsh* extended southwards from the first Cataract at Syene (Ezk 29^{10}), and in the periods of widest extension of the empire it embraced a portion of the Sudan. A rich source of gold, it attracted the lucrative caravan trade of

Egypt from early times. It was conquered and annexed by Egypt under the 12th dynasty (*c* 1991–1786 B.C.) and remained normally a subject country. After the decline of the 22nd (Libyan) dynasty, the Cushites became powerful and gradually encroached on northern Egypt, so that at length an Ethiopian dynasty was established (the 25th, 715–656 B.C.), which was overthrown by the Assyrians. Within this period falls the attempt of Tirhakah, king of Cush, to defeat Sennacherib of Assyria in Palestine (2 K 19[9]).

In Gn 10[6] Cush is a son of Ham, though his descendants as given in v.[7] are mostly peoples of central and southern Arabia. Surprising also is the statement in 2 Ch 14[9ff] that Zerah the Cushite invaded Judah in the days of Asa, at a time when the Cushites had no power in Egypt. An attempt has been made to solve these and other difficulties by the assumption of a second Cush in Arabia (cf 2 Ch 21[16]). Instructive references to the Cushite country and people are found in Am 9[7], Is 18[1ff], Jer 13[23]. Cushites were frequent in Palestine, probably descendants of slaves; see 2 S 18[21ff], Jer 36[14] 38[7ff]. These were, however, possibly Arabian Cushites. For the explanation of the Cush of Gn 10[8ff], and possibly of 2[13], as the Kassites, see COSSAEANS. See also ETHIOPIA.

J. F. McC.—R. J. W.

CUSHAN.—A tribe near Midian, Hab 3[7]; perhaps the Arabian **Cush** (q.v.).

CUSHAN-RISHATHAIM.—King of Mesopotamia, or Aram-naharaim, first of the oppressors of Israel, from whom Othniel, son of Kenaz, delivered them after eight years (Jg 3[8–10]). It has been conjectured that he was a king of the Mitanni, whose territory once covered the district between the Euphrates and Habor, or—more probably—that 'Aram' is a mistake for Edom (with 'naharaim' a later addition). 'Rishathaim' ('two wickednesses') is doubtless a corruption, perhaps deliberate, of his name; Rêsh-hattêmânî, 'chief of the Temanites,' has been suggested. The name has not yet received any monumental explanation, and its nationality is unknown. C. H. W. J.—H. H. R.

CUSHI, CUSHITE.—The word *Kûshî* occurs with the article in Nu 12[1], 2 S 18[21]; without the article in Jer 36[14], Zeph 1[1]. **1.** With the article it is probably merely an expression of nationality, 'the Cushite' (see CUSH). It was looked upon as a disgrace that Moses should have married a Cushite. **2.** Without the article the word is used merely as a proper name. It is borne by (*a*) the great-grandfather of Jehudi, the latter one of Jehoiakim's courtiers (Jer 36[14]); (*b*) the father of the prophet Zephaniah (Zeph 1[1]).

CUSHION.—See PILLOW.

CUSHITE WOMAN.—See ETHIOPIAN WOMAN.

CUSTOM(S) (Mt 17[25], Ro 13[7]): 'receipt of custom' (Mt 9[9], Mk 2[14], Lk 5[27]), RSV 'toll,' 'revenue,' 'tax.'—This is to be carefully distinguished from 'tribute' (q.v.). The customs ('dues' or 'duties') were paid on the value of goods, in Galilee and Peraea to the Herods, but in the Roman province of Judaea to the procurator as agent of the Roman government. The 'receipt of custom' was the collector's office. A. So.

CUTH, CUTHAH.—One of the cities from which Sargon brought colonists to take the place of the Israelites whom he had deported from Samaria, 721 B.C. (2 K 17[24, 30]). These colonists intermingled with the Israelite inhabitants who were left by Sargon; and their descendants, the Samaritans, were in consequence termed by the Jews 'Cuthaeans.' According to the old Arabic geographers, Cuthah was situated not far from Babylon. This view is borne out by the Assyrian inscriptions, from which we learn that *Kutû* was a city of Middle-Babylonia. It has now been identified with the modern *Tell Ibrâhîm*, NE. of Babylon, where remains of the temple of Nergal (cf v.[30]) have been discovered.

CUTHA (1 Es 5[32]).—His sons were among the Temple servants who returned from Babylon with Zerubbabel.

CUTTING OFF FROM THE PEOPLE.—See CRIMES AND PUNISHMENTS, **11.**

CUTTINGS IN THE FLESH.—The phrase itself occurs only in Lv 19[28] 21[5], but a similar prohibition is found in Dt 14[1]. The reference is to a custom widespread among primitive peoples of gashing the body as part of mourning rites (Jer 16[6]). The possible original reason may have been to make mourners unrecognisable to the departed, who would thus cease to haunt them; or to provide blood for the departed, who might thus be enabled to live again. In any case, the original rationale had long since been forgotten and the practice had become a ritual custom. The extravagance which often accompanies grief led to this practice being extended to other occasions of urgent need, *e.g.* lamenting before a deity in time of famine or defeat (Hos 7[14] RVm, RSV; Jer 41[5] 47[5]). The practice also became a feature of the ecstatic phenomena exhibited by the more primitive prophets (1 K 18[28], Zech 13[6]). The practice began to be condemned, at least from the time of Deuteronomy, because of undesirable religious associations rather than from ethical or aesthetic reasons. It was not Yahwistic and therefore to be abhorred. Shaving the whole head (Ezk 44[20]) or the frontal area (Dt 14[1]) or the temples (Jer 9[26]) and shaping the beard were likewise forbidden, together with tattooing (Lv 19[28]) because they were characteristic of non-Yahweh cults. Yet circumcision, a particular instance of cuttings in the flesh, was enjoined; it was a later custom to shave the head at the conclusion of the period of a vow (Nu 6[1–21], Ac 18[18] 21[24]); and tattooing is mentioned favourably at least twice (Is 44[5] RVm, RSV; Rev 3[12]). In both these last instances, however, the monogram definitely marks the bearer as a worshipper of the true God. Thus it was the pagan associations rather than the practices themselves which were condemned.

S. B. F.

CYAMON, Jth 7[3] = **Jokneam** (q.v.).

CYLINDER.—Ca 5[14] (RVm) for AV, RV 'ring' (RSV 'rounded'). See RING.

CYMBAL.—See MUSIC AND MUSICAL INSTRUMENTS.

CYPRESS.—**1.** *b*^{e}*rôsh* is rendered 'fir tree' in AV and RV, but 'cypress' in RVm in 2 S 6[5] and elsewhere. RSV has 'fir' in Ezk 27[5] 31[8], Ps 104[17] (also in RSVm 2 S 6[5]), but elsewhere 'cypress' (*e.g.* 1 K 5[8, 10], Is 41[19] 55[13], Ho 14[8], Zec 11[2]), probably rightly. See FIR. In Palestine to-day cypresses are extensively planted, especially in cemeteries. **2.** *tirzâh* is rendered 'cypress' in AV in Is 44[14], but '**holm tree**' in RV, RSV. It is an unknown species of tree with very hard wood, the root meaning in Arabic *to be hard*. 'Holm oak' is the rendering of OL. This is the *Quercus ilex*, a tree now rare W. of the Jordan, but still found in Gilead and Bashan. **3.** *t*^{e}*'ashshûr* is rendered 'cypress' in RVm in Is 41[19], but here and in Is 60[13] AV and RV have 'box' and RSV 'pine' (cf Ezk 27[6], where AV has 'Ashurites'). See BOX-TREE.

CYPRUS.—An island in the NE. corner of the Mediterranean Sea, about 40 miles W. of the coast of Syria and 60 miles S. of Turkey, whose mountains are visible on a clear day. Third largest of the islands of the Mediterranean (after Sicily and Sardinia), Cyprus has an area of 3572 square miles with 486 miles of coast line which is characterized by a few small harbours and long sandy beaches. Its greatest length is 140 miles, breadth 60 miles. In configuration it consists of a long plain shut in on the N. and the SW. by mountain ranges, Mount Olympus (Troodos) being the highest peak at 6406 feet; at the NE. it tapers into a narrow strip of land about 6 miles wide and 46 miles long, terminating in Cape Andreas. Once covered by extensive forests which are gradually being restored in modern times, the island has been coveted by great world powers since the dawn of history because of its natural resources and its strategic importance for the political and military control of the Middle East.

In the AV of the OT the name 'Cyprus' does not occur. The RSV has 'Cyprus' in four passages (Is 23[1, 12]; Jer 2[10], Ezk 27[6]) where it is a translation of the Hebrew *Kittîm* (Gr. *Kition* and *Chettion*). The contexts of these passages, with their references to wood from **Kittim** (q.v.) and implying proximity to the Phoenician cities of Tyre and Sidon, make it probable that Cyprus is mentioned. The name *Kittîm*, which is the same as the name of the Phoenician town Kition, now the city of Larnaka in Cyprus, was also used to designate a larger region of the Mediterranean and its peoples. In Gn 10[4] Kittim is spoken of as a son of Javan together with Elishah, Tarshish, and Dodanim. This probably implies that the earliest population of Cyprus was akin to the pre-Hellenic population of Greece. But the name Kittim is also used in the OT of the West generally, as in Dn 11[30] of the Romans (cf Dead Sea Scroll *Habakkuk Commentary*, col. iia, 12), and in Nu 24[24] where the context does not make clear whether the name refers to Cyprus or the Mediterranean countries generally.

In the early records of the Egyptian, Hittite, and Mesopotamian rulers, the island is mentioned under various names such as 'Asi' (records of the military campaigns of Thut-mose III.), 'Alashiya' (Journey of Wen-Amon to Phoenicia, War of Rameses III. against the Sea Peoples, and Hittite ritual texts) and 'Iadanana' (Inscriptions of Sargon II. and Sennacherib). The evidence pertaining to these early names for the island is summarized by R. Dussaud (cf C. Schaeffer, *Enkomi-Alasia*, I. (1952).

The name 'Cyprus' is a transliteration of the Greek *Kypros* (see 1 Mac 15[23], 2 Mac 4[29] 10[13] 12[2]) which is also the Greek word for 'copper,' the mineral which was mined in quantities in ancient times and exported to other regions of the Mediterranean. A Hittite ritual text refers to copper and bronze brought from Mount Taggata in Cyprus (Alasiya); copper was exported to Europe as late as the Middle Ages. In the NT, Cyprus (Gr. *Kypros, Kyprios*) is mentioned only in connexion with the missionary journeys of Paul and Barnabas (see below).

The history of Cyprus can be traced, not only through literary references to the island in ancient Near Eastern texts, but also through other results of archaeological work beginning during the period of Turkish domination and continuing in the 20th cent. under British control. Excavations have been conducted under the auspices of Swedish, British, and American institutions, and by the Department of Antiquities with headquarters in Nicosia, the capital of the island (see P. Dikaios, *A Guide to the Cyprus Museum*, 1953). Human occupation has been traced back to the Neolithic (New Stone) age, about 3700 B.C., when large communities existed near springs or rivers, some animals were domesticated, flint and bone implements were used, and the presence of obsidian blades suggests a contact with Asia Minor. Copper was apparently first used about 3200 B.C. (the beginning of the Chalcolithic period), although stone implements continued to be used during the period. The demand for copper in other parts of Asia Minor doubtless encouraged commercial relationships with Cyprus.

It was once thought that copper was first exported by Phoenicians, who early founded Kition and other towns in Cyprus, and introduced the worship of the Syrian Aphrodite who became known to the Greeks as the 'Cyprian goddess.' However, recent excavations have uncovered material remains of the early Bronze Age (also called Early Cypriot Age, *c* 2400–2000 B.C.) and of the Middle Bronze Age (also called Middle Cypriot Age, *c* 2000–1550 B.C.) which indicate commercial relationships with Anatolia, Minoan Crete, and Egypt, as well as with the peoples of the Syrian coast. The Late Bronze (or Late Cypriot) Age (*c* 1550–1050 B.C.) was a very significant one, witnessing as it did, further contacts with the Syro-Palestinian areas, and also the arrival of Mycenaean settlers, military occupation by the Egyptians under Thut-mose III., and waves of Achaean colonists following the Trojan War. During this period Cyprus became an island link between the lands of the East and the West; excavations reveal considerable wealth and a high degree of culture.

Although Cyprus did not develop as a strong independent power, some degree of independence was maintained under Cypriot kings during the Iron Age (*c* 1050–950 B.C.). Commercial relationships with Phoenicia were strong, but it was not until about 800 B.C. that Phoenician penetration reached its height, especially at the Tyrian city of Kition. In 709 B.C. Assyrian control of the island began, as recorded in the inscription of Sargon II. at Kition, and later Assyrian kings report tribute received from Cyprus. The prism of Esar-haddon (673 B.C.) refers to ten kings from Cyprus (Iadnana) who were, among others, subject to him. Shortly thereafter, Assyrian domination of Cyprus came to an end, and there was almost a century of independence which was characterized by much activity in the building of palaces, ships and homes, and advances in ceramic art and poetry. About 560 B.C. Amasis of Egypt conquered the island, and it passed with Egypt to Cambyses of Persia in 525 B.C., although Cypriot kings continued in power and minted their own coinage under the Persian kings. In 500 B.C. the Greek cities of the island joined in the Ionic revolt against the Persians, but Kition and probably other Phoenician cities on the island remained loyal to Persia. During the 5th cent. the island remained subject to Persia and in 480 B.C. supplied 150 ships for the fleet of Xerxes. Athens made repeated attempts to secure the island, but the mixed population prevented any strong Hellenic movement, and it only passed definitely into Greek hands by submission to Alexander the Great after the battle of Issus in 333 B.C. On the division of his empire it fell to the Ptolemies of Egypt, until it was annexed by Rome in 57 B.C. It was made a separate province after the battle of Actium in 31 B.C., becoming at first an 'imperial' province, but was, in 22 B.C. transferred to 'senatorial' government, so that in Ac 13[7] Luke rightly describes the governor as the proconsul, Sergius Paulus. An inscription found near Paphos about A.D. 1870 and dated about A.D. 55 mentions a Paulus who was proconsul, although scholars do not agree that this is the same individual mentioned in Ac 13[7].

Jews first settled in Cyprus under the Ptolemies, and their numbers there were considerable before the time of the Apostles. Barnabas is described as a 'Levite, a native of Cyprus' (Ac 4[36]). When he and Paul started from Antioch on the First Missionary Journey, they first of all passed through Cyprus (Ac 13[4–12]). They landed at Salamis, then a Greek port flourishing with Syrian trade (as demonstrated by modern excavations); the city now deserted—with its harbour silted up—is three miles from Famagusta. Here they preached in the synagogue, where their message was probably not entirely new (Ac 11[19]), and then journeyed through 'the whole island' (Ac 13[6], RSV) to New Paphos in the W.—a three or four days' journey, even if they preached nowhere on the way. New Paphos, like Old Paphos, was the seat of the worship of Aphrodite (see PAPHOS), and was at this time the Roman capital. (For the incidents connected with the proconsul and the *magus*, see articles SERGIUS PAULUS and BAR-JESUS.)

Besides Barnabas we have mention of Mnason, 'an early disciple' (RSV), as coming from Cyprus (Ac 21[16]), but little information is available regarding the fortunes of the Christian community under later centuries of Roman rule. The Jews of Cyprus took part in the great revolt in A.D. 117 (when Trajan was busy with Parthia) which was participated in by Jews of Egypt and Cyrene, and they are said to have massacred 240,000 of the Gentile population on Cyprus. Hadrian, who later became emperor, put down the revolt and expelled all Jews from the island.

Following the division of the Roman empire in A.D. 395 Cyprus was ruled from Constantinople by the Byzantine emperors. The Christians enjoyed a degree of autonomy having been granted the right to elect and consecrate their own bishops and archbishop by the councils of Ephesus

(A.D. 431) and Trullan (A.D. 692). During the following centuries Cyprus was often the scene of conflict involving Moslem and Byzantine forces. Seized in 1191 by Richard Coeur de Lion (Richard I.), it was sold to the Knights Templars, and it became a bastion of the Crusaders after defeats in Syria and Palestine. In 1373 Italian forces from Genoa were able to seize the port of Famagusta and assume control of the government and commerce for almost a century. In the 15th cent. Cyprus became a part of the Mediterranean empire ruled from Venice. After three centuries of Turkish rule it passed under British rule in 1878, by a convention requiring continued payment of tribute to the Sultan.

In 1914 Cyprus became a British crown colony and its people, a mixture of Greek and Turkish communities, enjoyed a period of peace and increasing prosperity. Following World War II. and the expulsion of British military forces from Egypt and Jordan, Cyprus became a strong British base in the eastern Mediterranean. This development coincided with a renewal of the demand by segments of the Greek population for union (*enosis*) with Greece. The Turkish population reacted against this movement, and the 1950's were characterized by violence and bloodshed caused by extremists in both segments of the population. In spite of this situation, the tourist trade and commerce increased. New roads were built, harbour installations were improved at Famagusta and Larnaka with the construction of piers, although Limassol remained an open roadstead where large ships must be loaded and unloaded by means of lighters. A modern airport near Nicosia served to link the island with Greece, Italy, Turkey, and the countries of the Middle East. The copper mines, which made Cyprus famous in ancient times but were neglected from the Roman occupation until the 19th cent., became in modern times the source of cupreous pyrites; other minerals being mined include iron pyrites, asbestos, chrome ore, and gypsum.

In 1960 Cyprus became an independent sovereign state with a Greek Cypriot President and a Turkish Cypriot Vice-President. It continues to belong to the British Commonwealth. Two areas of the island where there are military bases remain under United Kingdom sovereignty. A. E. H.—W. L. R.

CYRENE.—Capital of Libya (Tripoli) in N. Africa (Ac 2^{10}), the home of numerous Jews who with the 'Libertines' (freedmen from Rome?) and Alexandrians had a synagogue of their own at Jerusalem (Ac 6^{9}). Many of these became Christians, as Simon and his sons (doubtless), Mk 15^{21}; Lucius, Ac 13^{1}; and those in Ac 11^{20} who preached to the 'Greeks' (*v.l.* 'Hellenists'). A. J. M.

CYRENIUS.—See QUIRINIUS.

CYRUS (Pers. *Kurush*, Bab. *Kurash*, Heb. *Kōresh*, possibly in origin an Elamite throne name meaning 'shepherd').—Cyrus the Great, founder of the Persian empire, was son of Cambyses I. of the Achaemenid family. He describes his ancestors as 'kings of Anshan,' formerly an Elamite province with its capital at Susa, and a vassal state of the Median empire. He himself became king in 559 B.C., but rebelled in 553 B.C. and defeated the Median king Astyages. Cyrus then termed himself 'king of the Persians,' and he soon made himself master of the whole Median empire. He was then faced with an alliance of Croesus of Lydia, Nabonidus of Babylon, and Amasis of Egypt, but defeating Croesus in 546 B.C., he turned his attention to Babylonia, where Nabonidus was unpopular because of his neglect of the worship of Marduk, having devoted his attention to Sin the moon-god. Belshazzar, son of Nabonidus, and regent in Babylon, was defeated and Babylon itself surrendered in October 539 B.C. to Gobyras (Gubaru, Ugbaru), Cyrus' general. From early 538 B.C., when he himself entered Babylon, Cyrus described himself as 'king of Babylon and king of the countries'; he claimed to have been welcomed by the people, and especially by the priests and nobles, as a liberator, chosen by Marduk to be his restorer. He also returned other gods to their homes and asks that they should intercede for him with Marduk (Bel) and Nabu. Subsequently he established a new capital at Pasargadae, north of Persepolis, and reigned until 529 B.C., when he was killed on campaign in the east, having appointed his son Cambyses as ruler in Babylon.

Cyrus is referred to as 'king of Persia' 2 Ch 36^{22} = Ezr 1^{1}, Dn 10^{1} and often; as 'the Persian' Dn 6^{28}; 'king of Babylon' Ezr 5^{13}. In Deutero-Isaiah, he is described as specially destined by Yahweh to redeem Israel, and to execute judgment upon Babylon, to set free the captives and restore Jerusalem and its Temple (by name 44^{28} 45^{1}). He had not known Yahweh before his call, but carried out his mission in Yahweh's name, and is styled 'the friend of Yahweh' and 'Yahweh's anointed.' According to Ezr 1^{1-4}, he granted permission to the Jews to return to Palestine and to rebuild the Temple; but the other copy of the decree in Ezr 6^{2-5} does not mention permission to return, so that it may well be that only a commissioner and some leaders were sent. It may indeed be doubted whether Cyrus exercised more than nominal control of Syria and Palestine; only under Cambyses was the west visited by a Persian ruler.

The sources of information for his reign are various, notably the so-called Nabonidus Chronicle, and the Cyrus Cylinder which describes him as called by Marduk. A text from Ur attributes his victory to Sin, the moon-god. The Old Testament claims the honour for Yahweh. The career of Cyrus not unnaturally led to the gathering of legends about him, concerning his birth and upbringing, various versions of which may be found in classical literature. C. H. W. J.—P. R. A.

D

DABAREH, Jos 21^{28} (AV).—See DABERATH.

DABBASHETH, Jos 19^{11} (AV).—See DABBESHETH.

DABBESHETH (? 'hump').—A town of Zebulun, Jos 19^{11} (AV **Dabbasheth**); perhaps modern *Tell esh-Shammām.*

DABERATH.—A city assigned to Zebulun, Jos 19^{12}, but said to be a Levitical city of Issachar, Jos 21^{28} (AV **Dabareh**), 1 Ch 6^{72}; perhaps on the border between the two tribes; probably modern *Dabûriyeh*, at the foot of Mount Tabor. Abel (*Géographie* ii, 61) reads Daberath for **Rabbith** (q.v.) in Jos 19^{20}.

DABRIA.—One of the five scribes who wrote to the dictation of Ezra (2 Es 14^{24}).

DACOBI, 1 Es 5^{28} (AV).—See AKKUB, 2.

DACUBI, 1 Es 5^{28} (RV).—See AKKUB, 2.

DADDEUS, 1 Es 8^{46} (AV).—See IDDO, 1.

DAGGER.—See ARMOUR, ARMS, 1 (*c*).

DAGON.—A god whose worship was general among the Philistines (at Gaza, Jg 16^{23}; at Ashdod, 1 S 5^{2-7}, 1 Mac 10^{83f} 11^{4}; perhaps at Beth-shan, 1 Ch 10^{10}, cf 1 S 31^{10}; probably at the southern Beth-dagon (q.v.), which may at one time have been under Philistine rule). Dagon (earlier form, Dagan) was an old Semitic agricultural deity worshipped in Mesopotamia before 2400 B.C. From there he passed to Syria, having a temple in his honour at Ugarit (see RÂS SHAMRA),

where he was considered the father of Baal (q.v.). Next his cult was found in northern Palestine (Jos 19[27]), then in the south (Jos 15[41]), whence it was probably taken over by the non-Semitic Philistines. The rare Hebrew word *dāghān*, meaning 'corn' ('grain') or 'bread,' is probably to be explained from the name and nature of the god. The name of this deity also appears on a Phoenician seal cylinder of the 7th cent. B.C. now in the Ashmolean Museum, Oxford, and again on the later Phoenician sarcophagus of Eshmun'azar in connexion with the city of Joppa. It survives in the Palestinian place-name *Khirbet Dajūn* (and *Beit Dajān*) near Joppa (Abel, *Géog. de la Pal.*, ii, 269). There is also a *Beit Dajān* near Nâblus. The older explanation, connecting the name of the deity with the Hebrew word *dāgh*, 'fish,' and thus making Dagon a fish-god, seems no longer tenable (see Albright, *Archaeol. and the Rel. of Israel*, 74 f). N. K.—W. F. S.

DAISAN, 1 Es 5[31] AV and RV=**Rezin**, Ezr 2[48], Neh 7[50]. The form in 1 Esdras is due to confusion of Hebrew *r* and *l*; RSV **Rezin**. See REZIN, **2.**

DALAIAH, 1 Ch 3[24] (AV).—See DELAIAH, **1.**

DALAN, 1 Es 5[37] (RV).—See DELAIAH, **5.**

DALETH.—The fourth letter of Hebrew alphabet, and so used to introduce the fourth part of Ps 119, every verse of which begins with this letter.

DALMANUTHA.—The place to which Jesus sailed after the feeding of the four thousand (Mk 8[10]). In Mt 15[39] the name is **Magadan**, which Eusebius asserts is the right reading, and which some MSS also read in Mk 8[10]. The Palestinian Syriac Gospel has *Magdal*, which probably is the correct form of the name. Dalmanutha is the product of a series of errors by copyists of NT MSS. E. G. K.

DALMATIA.—A mountainous district on the E. coast of the Adriatic Sea. More exactly used, it is the southern half of the Roman province Illyricum (q.v.). The writer of the Second Epistle to Timothy makes Titus journey there (2 Ti 4[10]). The nearest Paul came to it in recorded travels is Beroea (Ac 17[10]), still 90 miles away from Dalmatia. A. So.—E. G. K.

DALPHON.—Second son of Haman, put to death by the Jews, Est 9[7].

DAMARIS.—A convert at Athens (Ac 17[34]). As women of the upper classes were kept more in the background there than in Macedonia or Asia Minor, she was probably not of noble birth (cf 17[4, 12]). But Codex Laudianus (E) describes her as *timia*.

DAMASCUS.—1. Situation, etc.—The chief city of inland Syria and the modern political capital, it lies in a plain E. of the Anti-Lebanon famous for its beauty and fertility and watered by the Baradā River, biblical Abana (q.v.). It derives its modern importance from local manufactures (woodwork, furniture, artistic metal, and textile work), from its situation as the metropolis of the N. Arabian steppe and from its position as the capital of the state. Formerly it was the starting-point of the annual Syrian pilgrim caravan to Mecca. In Ottoman times it was connected by rail with Beirut, Haifa, Aleppo, and Medina, the last line now being discontinued at Ma'ân.

The history of Damascus begins reputedly in remote antiquity, this being suggested by its favourable natural situation, though its actual origins are not certainly known. It certainly appears as the capital of a city-state in Egyptian inscriptions of the 15th cent. B.C.

2. OT references.—Reference is made to Damascus in defining the line of Abram's pursuit of the four kings (Gn 14[15]). In Gn 15[2] the name of Abram's steward is given in the MT as *Dammesek Eliezer* (so RV). It is explained in the Targum and Syriac version as 'Eliezer the Damascene' (cf RSV), though this does violence to Hebrew grammar. Probably *dammesheq* of the MT is an early Midrashic gloss such as the Qumrân 'commentaries' have made familiar to us. As a reprisal for assistance given to Hadadezer, king of Zobah, David garrisoned Damascus and reduced it to a tributary condition (2 S 8[5f], 1 Ch 18[5]). Rezon, however, Hadadezer's general, succeeded in establishing himself as king in Damascus in the time of Solomon and made himself continuously a very troublesome neighbour (1 K 11[23f]). In the wars between Asa and Baasha (1 K 15[17ff], 2 Ch 16[2ff]) the king of Judah invoked the aid of Benhadad, king of Aram, whose royal city was Damascus, against his Israelite enemy, suborning him to break the existing truce with Israel, thus enabling Judah to fortify her N. frontier to within two miles of Bethel. Hostilities continued between Aram (Damascus) and Israel till the days of Ahab; Ahab's sparing of Benhadad after the battle of Aphek and his making a truce with him were the cause of a prophetic denunciation (1 K 20[42]). This incident may be connected with an alliance of W. Asiatic states against Assyrian aggression culminating in the famous stand at the battle of Qarqar (853 B.C.). The relative significance of Damascus is indicated by the fact that in the inscription of Shalmaneser III. Ahab is recorded as having sent 2000 chariots and 10,000 footmen, while Damascus sent 1200 chariots and the same number of mounted cavalry, and 20,000 footmen. In the reign of Jehoram, the Syrian general Naaman came to be cleansed of leprosy and Elisha's directions led to his famous depreciating comparison of the muddy Jordan with his own Abana and Pharpar (2 K 5). The Chronicler reports a victorious invasion by Damascus on Judah in the days of Joash (2 Ch 24[23]). During this time, however, Damascus bore the brunt of Assyrian attack and it was probably after one of her many reverses that Jeroboam II. took the city (2 K 14[28]), though he apparently could not hold it, since it was again in open revolt against Assyria in the time of Ahaz under its king Rezin (2 K 16) in alliance with Pekah of Israel. Prophetic denunciations of Damascus are found in Is 17, Jer 49[23], Am 1[3–5], and Zec 9[1], the last referring to Damascus and Hamath as part of the Seleucid Empire in the 2nd cent. B.C. The state of which Damascus was the capital was liquidated by Assyria in 732 B.C. Damascus as a commercial centre was always of great importance and Ezekiel (27[18]) alludes to trade in wine and wool. It is included in the imaginary restoration of the kingdom (Ezk 47[17]).

3. NT references.—Damascus appears only with reference to St. Paul. His conversion is located here (Ac 9[22, 26]), and his escape from Aretas (q.v.), the Nabataean ruler, by being lowered in a basket over the wall (Ac 9[25], 2 Co 11[32f]), and here he returned after his Arabian retirement (Gal 1[17]).

4. Later history.—After the Asiatic campaigns of Alexander the Great, Damascus became a centre of Hellenism, being occupied both by Ptolemies and Seleucids. As the metropolis of the N. Arabian steppe and an important land-port it was the object of Nabataean ambition and twice fell into their hands, once in the 1st cent. B.C. and again in the time of St. Paul. At other times in the same period it was one of the cities in the mercantile federation of the Decapolis. The great temple of the city, devoted to the cult of Baal-Hadad, was transformed into a church, dedicated to St. John, which was converted into the famous Umayyad mosque, the principal mosque in the city, which contains the tomb of Salāh ed-Dîn. Since A.D. 635 Damascus has been a Moslem city. It was the brilliant capital of the Umayyad Caliphs under whom the Empire of Islam reached the Pyrenees. It was conquered by the Seljuk Turks in 1075. In the Crusades it was the fatal mistake of the Crusaders to allow it to stand untaken as a vital link in the internal line of communication between Iraq and Egypt. The Umayyad mosque, a mediaeval castle, and part of the Byzantine walls are the principal relics of antiquity to be seen in the modern city. There are the usual traditional sites of historical events, such as the house of Ananias and the street called Straight, but these are not more trustworthy at Damascus than they are in Palestine, though, if, as

is probable, 'the street called Straight' referred to the main thoroughfare, *cardo maximus*, of the Graeco-Roman city, tradition here is more than usually reliable.

R. A. S. M.—J. Gr.

DAMNATION.—The words 'damn,' 'damnable,' and 'damnation' have, through their use in the literature of theology, come to express *condemnation to everlasting punishment*. But in the English Bible they mean no more than is now expressed by 'condemn' or 'condemnation.' RSV omits 'damnation' and cognates. In some places a better translation than 'condemnation' is 'judgment,' as in Jn 5^{29} 'the resurrection of damnation' (Gr. *krisis*, RSV 'judgment'). See JUDGMENT.

DAN.—According to the popular tradition, Dan was the fifth son of Jacob, and full brother of Naphtali, by Bilhah, Rachel's handmaid (Gn $30^{6,8}$). Rachel, who had no children, exclaimed *dānannî* ('God hath judged me'), and he was therefore called *Dan*. As in the case of so many names in the OT, this is clearly a 'popular etymology.' Probably Dan was the titular attribute of a tribal god whose name has dropped out (cf Assyr. *Ashur-dan*).

Of this eponymous ancestor of the tribe tradition has preserved no details, but some of the most interesting stories in the Book of Judges tell of the exploits of the Danite Samson in border wars against the Philistines. These are heroic rather than historical tales, yet they are suggestive of the conditions that prevailed when the tribes were settling Palestine.

P makes Dan a large tribe, giving the fighting strength of Dan in the Wilderness census as 62,700, more than that of any other except Judah (Nu 1^{33}; cf 26^{43}, Moab census). All the other data point in the opposite direction. J (Jg 18^{11}) speaks of Dan as a 'family' (Heb. *mishpāḥāh*), which is less than a tribe; elsewhere Dan is said to have had only one son, Hushim or Shuham (Gn 46^{23}, Nu 26^{42}). The tribe at first occupied the hill-country in the SW. of Ephraim, and thence attempted to spread out into the Valleys of Aijalon and Sorek. That it ever reached the sea, either here or later in the N. is unlikely. The passage in Jg 5^{17} ('And Dan—why did he abide in ships?'), if the text is correct, must refer to the location of the tribe by Lake Huleh. In the S. the Danites were severely pressed by the Amorites and the Philistines, and the major part were compelled to emigrate northward, where they found at the foot of Mt. Hermon an isolated Sidonian colony, Laish or Leshem, at the headwaters of one of the sources of the Jordan, adjoining the territory of Naphtali, with whom they had the closest affinity among the Hebrew tribes (Jos 19^{47}, Jg 18). This settlement the Danites ruthlessly destroyed. A new town was built, to which they gave the name of Dan, the Arab name of the site being *Tell el-Qâḍî* ('Mound of the Judge'). In this colony there were only 600 armed men and their families. On their way thither they induced the domestic priest of the Ephraimite Micah to accompany them with his sacred equipment, an ephod, a graven and molten image, and the teraphim, which were duly installed in a permanent sanctuary, in which the descendants of Moses are said to have ministered until the Exile (Jg 18^{30}). 'From Dan to Beersheba' denoted the extent of the Israelite occupation, and at Dan Jeroboam I. established a rival shrine to Jerusalem, a feature of which was the use of the bull as a sacred symbol of the presence of Yahweh. Here Jeroboam possibly adapted the local Phoenician cult of Baal, whose cult-animal was the bull, to the worship of Yahweh. That the remnant of the Danites left in the S. was either destroyed by their enemies, or, more likely, absorbed by the neighbouring Hebrew tribes is made probable by Jg 1^{35}, which ascribes the victory over their enemies to the 'house of Joseph'; cf Jos 19^{41-46}, which assigns to Dan certain localities elsewhere assigned to Judah and Ephraim. Gn 49^{17} says 'Dan shall be a serpent in the way, an adder in the path'; and Dt 33^{22} 'Dan is a lion's whelp that leapeth forth from Bashan,' the latter passage alluding probably to Dan's northern habitat. The allusions may be to the harassing of caravans from the Hauran to Phoenicia, or to border warfare with Damascus. It would aptly refer to guerilla tactics in the Assyrian wars of the 8th cent., but the passage is probably much earlier than that. See also TRIBES.

J. A. C.—J. Gr.

DAN.—A city in northern Palestine, once called **Laish** (Jg 18^{29}) or **Leshem** (Jos 19^{47}), though the ancient record of the battle of four kings against five gives the later name (Gn 14^{14}). It was a city remote from assistance, and therefore fell an easy prey to a band of marauding Danites, searching for a dwelling-place. It was in the north boundary of Palestine. The story of the Danites stealing the shrine of Micah is told to account for its sanctity, which Jeroboam I. recognized by setting up here one of his calf-shrines (1 K 12^{29}). It was perhaps the same as **Dan-jaan**, 2 S 24^{6} (AV, RV; RSV **Dan**), one of the borders of Joab's census district. It was captured by Ben-hadad (1 K 15^{20}). It is identified with *Tell el-Qâḍî* on account of the similarity of meaning of the names, Arabic *qâḍî*=Hebrew *dān*='judge.' The site would well suit the geographical context of the narratives.

DANCING.—See GAMES.

DANIEL.—**1.** Two passages in the book of Ezekiel ($14^{14,20}$ 28^{3}) mention a Daniel who was famed for righteousness and wisdom, and named with Noah and Job. All three evidently belonged to the far-distant past, and Daniel, occupying the middle place, cannot be conceived of as the latest of them. He is not, therefore, to be identified with **2** below. We now have a long epic text from Râs Shamra about Aqhat and his son Danel, where the name is spelt as in Ezekiel. It is probable that he was the person referred to in the above passages. **2.** The hero of the book of Daniel, who was probably created by the author of the book, who used older materials and traditions, which he adapted for a practical purpose. See next article. Stories continued to grow round Daniel's name, and in Greek MSS some have been preserved. See APOCRYPHA, **10, 11, 12.** **3.** A son of David and Abigail, 1 Ch 3^{1}; called **Chileab** in 2 S 3^{3}. **4.** A priest of the house of Ithamar who accompanied Ezra to Jerusalem, Ezr 8^{2}; called **Gamael** in 1 Es 8^{29}. **5.** One who sealed the covenant, Neh 10^{6}.

J. T.—H. H. R.

DANIEL, BOOK OF.—**1. Authorship and Date.**—The first six chapters of this book contain a series of narratives which tell of (*a*) the fidelity of Daniel and his friends to their religion, and (*b*) the incomparable superiority of their God to the deities of Babylon. The remaining six chapters relate four visions seen by Daniel and the interpretation of them. Chs. 1–6 speak of Daniel in the third person; ch. 7 begins in the third person but turns over to the first; chs. 8–12 are in the first person (but cf 10^{1}). The traditional view has been that the whole is from the hand of Daniel who lived in Babylon in the 6th cent. B.C. Porphyry argued against this in the 3rd cent. A.D., and it is now generally abandoned, for such reasons as the following: (1) Neither the man nor the book is mentioned in the list of Sir 44–50 (*c* 200 B.C.): and Sir 49^{15} seems to have been written by one who was not acquainted with the story. (2) There is no reason for believing that a collection of sacred writings, including Jeremiah, had been formed in the reign of Darius, as is implied Dn 9^{2}. (3) The Hebrew of Daniel is of a later type than even that of Chronicles. The Aramaic (see below, **2**) can be dated with certainty later than the 5th cent. B.C., and with probability not earlier than the 3rd cent. B.C. (cf Rowley, *The Aramaic of the OT*, 1929). (4) More Persian words are employed than a Hebrew author would be familiar with at the close of the Babylonian empire, and the few Greek loan-words imply the Greek period as the setting. One of these, *symphonia* ('bagpipe,' Dn 3^{5}), first occurs in Greek literature as the name of a musical instrument in the 2nd cent. B.C. (5) There are inaccuracies which a contemporary would have avoided. Nebuchadnezzar did not besiege Jerusalem in the 3rd year of Jehoiakim. The name 'Chaldaeans'

as designating the learned class is a later usage (2[2]). Belshazzar was not 'the king' (5[1])—though for many years he administered the state while his father Nabonidus was in Tema—nor was Nebuchadnezzar his ancestor (5[2, 11]). Darius the Mede (5[31]) is an unhistorical character (cf Rowley, *Darius the Mede*[2], 1959). Xerxes did not follow Artaxerxes (11[2]) but preceded him. (6) The relations between Syria and Egypt, from the 4th to the 2nd cents. B.C., are described with a fulness of detail which differentiates Dn 7, 11 from all OT prophecy: see the precision with which the reign of Antiochus Epiphanes is related in ch. 11; the events from 323–175 B.C. occupy 16 verses; those from 175–164 B.C. take up 25; at v.[34] the lines become less definite, because this is the point at which the book was written; at v.[40] *prediction* begins, and the language no longer corresponds with the facts of history. There can be little doubt that Daniel appeared about 164 B.C. Its object was to encourage the faithful Jews to adhere to their religion, in the assurance that God would intervene. The unknown writer was intensely sure of the truths in which he believed: to him and to his readers the historical setting was but a framework. Not that he invented the stories. He worked with older stories which he adapted and attached to Daniel. One of the Dead Sea Scrolls tells a story of Nabonidus which may be the source of Dn 4, where the madness is transferred to Nebuchadnezzar. It is possible that Dn 4 was first about Nabonidus, and that a subsequent substitution of the name of Nebuchadnezzar here and in 5[2, 11, 18] gave rise to the historical error noted above.

2. Language, Unity, Theology.—(1) From 2[4] to 7[28] is in *Aramaic*. Five explanations have been offered: (*a*) This section was originally written in Aramaic, about 300 B.C., and incorporated, with additions, into the work of 166 B.C. (*b*) The corresponding portion of a Hebrew original was lost and its place filled by an already current Aramaic translation. (*c*) The author introduced the 'Chaldees' as speaking what he supposed was their language, and then continued to write it because it was more familiar than Hebrew to himself and his readers. (*d*) The entire book was Aramaic, but would not have found admission into the Canon if it had not been enclosed, so to speak, in a frame of Hebrew, the sacred language. (*e*) The stories were first created and circulated in Aramaic separately, and later the first vision was composed in Aramaic; but this was less suitable for popular narration, and subsequent visions, still less suitable for this, were written in Hebrew, which was still the literary language. When the stories were collected, ch. 1 was rewritten to make it the introduction to the whole book (*e.g.* Daniel's three friends were introduced), and was now written in Hebrew, the language of the later sections. The point of transition was determined by the amount that needed to be rewritten.

(2) The *unity of the book* has been increasingly impugned in recent years. There is no agreement amongst those who divide the book as to where it should be divided, and in particular to which part ch. 7 belongs. Those who attach it to the first part hold it to be glossed, while those who attach it to the second part do not. Similarly ch. 2 must be held to be glossed by those who make it older than the visions. In language ch. 7 is linked with the stories; in ideas with the visions. Ch. 2 is closely linked with ch. 7. The climax of the expectations of chs. 2, 7, 8–12 lies in the Maccabaean age, and particularly in the attack of Antiochus on the faith of the Jews. The phrase 'abomination of desolation,' found in varying forms in 8[13] 9[27] 11[31] 12[11], indicates the heathen image and altar set up in the Temple by Antiochus. Moreover all the stories would have point in that age. Hence it is preferable to hold to the unity of the book (cf Rowley, 'The Unity of the Book of Daniel,' *HUCA* xxiii, Part 1, 1951, 233 ff).

(3) The *pseudonymity of the book* is variously accounted for. Some have supposed that it was to gain a hearing. But the stories are not pseudonymous. Probably the creator of the stories, which became immediately popular and encouraged resistance to Antiochus, wrote the visions under the name of Daniel, not to conceal his identity, but to attach the prestige of the stories to the visions.

(4) The *theological features* are what might be expected in the 2nd cent. B.C. Eschatology is prominent. The visions and their interpretations all culminate in the final establishment of the Kingdom of God. And in this connexion it should be mentioned that Daniel is the earliest example of a fully developed *Apocalypse*. The doctrine of the Resurrection is also distinctly asserted: *individuals* are to rise again; not all men, or even all Israelites, but the martyrs and the apostates. At no earlier period is there such an angelology. Watchers and holy ones determine the destinies of an arrogant king. Two angels have proper names, Gabriel and Michael. To each nation a heavenly patron has been assigned, and its fortunes here depend on the struggle waged by its representative above. All of these features closely link the book with the apocalyptic works which began to appear in the 2nd cent. B.C. (cf Rowley, *The Relevance of Apocalyptic*[2], 1947).

3. Text.—The early Church set aside the LXX in favour of the less paraphrastic version of Theodotion. In both translations are found the Additions to Daniel (see APOCRYPHA, **10, 11, 12**). (1) Sixty-seven verses are inserted after 3[22], consisting of (*a*) the *Prayer of Azariah*, (*b*) details concerning *the heating of the furnace*, (*c*) the *Benedicite*. These teach the proper frame of mind for all confessors, and dilate on the miraculous element in the Divine deliverance. (2) *The History of Susanna*, which demonstrates God's protection of the unjustly accused and illustrates the sagacity in judgment of the youth who is rightly named *Daniel*, 'El is my judge.' (3) *Bel and the Dragon*, two tracts which expose the imbecility of idolatry, and bring out Daniel's cleverness and God's care for His servant in peril. Swete (*Introd. to OT in Greek*, p. 260) rightly remarks that internal evidence appears to show that (1) and (2) originally had a separate circulation. J. T.—H. H. R.

DAN-JAAN.—Joab and his officers in taking the census came 'to Dan-jaan and round about to Zidon,' 2 S 24[6] (RV, cf AV). No such place is mentioned anywhere else in OT, and it is generally assumed that the text is corrupt. The reference is probably to the city of Dan, and accordingly RSV reads 'to Dan, and from Dan they went around to Sidon.'

DANNAH.—A town of Judah mentioned next to Debir and Socoh, Jos 15[49]. Its site is unknown, but it was clearly in the mountains SW. of Hebron.

DAPHNE.—A place mentioned in 2 Mac 4[33] to which Onias withdrew for refuge, but from which he was decoyed by Andronicus and treacherously slain. It is the modern *Beit el-Mâ* ('House of Waters') about 5 miles from Antioch. Daphne was famous for its fountain, its temple in honour of Apollo and Diana, its oracle, and its right of asylum. See also ANTIOCH.

DARA.—See DARDA.

DARDA.—Mentioned with Ethan the Ezrahite, Heman, and Calcol as a son of Mahol, and a proverbial type of wisdom, but yet surpassed by Solomon (1 K 4[32]). In 1 Ch 2[6] apparently the same four (**Dara** is probably an error for *Darda*) are mentioned with Zimri as sons of Zerah, the son of Judah by Tamar (Gn 38[30]). See also MAHOL.

DARIC.—See MONEY, **3.**

DARIUS.—**1.** Darius I., the Great, son of Hystaspes, king of Persia 522–486 B.C., well-known from the Greek historian Herodotus, and from his inscriptions, especially the trilingual account at Behistun of how he gained the crown after considerable struggles. He is especially noted as organizer of the Persian empire (cf Dn 6[1]). When Haggai and Zechariah were encouraging the rebuilding of the Temple, and the authority for this was demanded by Tattenai, governor of 'Beyond the

River,' an inquiry was sent to Darius and the decree of Cyrus authorizing the work was found in Ecbatana. Darius confirmed this and ordered provision to be made for the building and for sacrifices. The Temple was completed in his sixth year (Ezr 5–6). **2.** Darius the Persian (Neh 12[22]). Possibly Darius III. Codomannus (336–330 B.C.), last king of Persia (cf 1 Mac 1[1]). **3.** 'Darius' (1 Mac 12[7] AV) is an error for the Spartan 'Arius' q.v. (so Old Lat., Josephus, RV, RSV. Cf v.[20]). **4.** 'Darius the Mede' (Dn 11[1]), son of Ahasuerus q.v. (9[1]) is said (5[31]) to have become king of Babylon at the age of sixty-two years after Belshazzar's death. Dn 6[1] indicates identification with No. **1**, But this account does not correspond to what we know of any king called Darius. Attempted identifications with Gobyras, Cyrus' general who actually entered Babylon, or with Cyrus, or some other historical character, are none of them satisfactory. It is easiest to believe that the author of Daniel confused the fall of Babylon in 538 B.C. with that in 520 B.C., and believed that a 'kingdom of the Medes' preceded the rule of Cyrus the Persian (cf Dn 6[28] and Is 13[17]). C. H. W. J.—P. R. A.

DARKNESS.—See LIGHT.

DARKON.—His sons were among those who returned with Zerubbabel, Ezr 2[56], Neh 7[58]; called in 1 Es 5[33] **Lozon.**

DARK SAYING.—See RIDDLE.

DARLING.—Ps 22[20] (AV, RV) 'Deliver my darling from the power of the dog'; 35[17] (AV, RV) 'rescue my soul from their destructions, my darling from the lions.' The Hebrew word (*yāḥîdh*) means an only son. In the Psalms it is used poetically of the psalmist's own life, as his unique and priceless possession. RSV renders 'my life.'

DART.—See ARMOUR, ARMS, **1** (b).

DATES.—See CHRONOLOGY.

DATHAN.—A Reubenite, who conspired with Abiram against Moses (Nu 16[1], Dt 11[6], Ps 106[17]). See KORAH.

DATHEMA (1 Mac 5[9]).—A fortress in Bashan. It may perhaps be the modern *Dāmeh* on the S. border of the Lejā district, N. of Ashteroth-karnaim.

DAUGHTER.—See FAMILY.

DAVID.—The second and greatest of the kings of Israel; the youngest of the eight sons of Jesse, the Bethlehemite; he belonged to the tribe of Judah. There is no sound basis for the old theory that the name means 'beloved,' and its derivation remains uncertain.

The details of David's life are gathered from 1 S 16[3]–1 K 2[11], 1 Ch 11[1]–29[30] (besides some scattered notices in the earlier chapters of 1 Chronicles), the Psalms which may bear on this period, and Book VII. of the *Antiquities* of Josephus, although the last two items add but little to our knowledge. It is necessary to bear in mind two points of importance in dealing with the records of the life of David: Firstly, the Hebrew text is in a number of cases very corrupt (notably in the books of Samuel), and in not a few passages the text of the LXX is to be preferred, as evidenced by the Qumrân Scrolls; secondly, our records have been gathered from a number of sources, and therefore do not present a connected whole, and for this reason they are sometimes at variance with one another.

1. Early years.—David was a shepherd by calling, and he continued this occupation until he had reached full manhood. There are altogether three different accounts of David's entry into public life:

(i) 1 S 16[1–13]. David is here represented as having been designated by Yahweh as Saul's successor; Samuel is sent to Bethlehem to anoint him; seven sons of Jesse pass before the prophet, but the Spirit does not move him to anoint any of these; in perplexity he asks the father if he has any more children, whereupon the youngest is produced, and Samuel anoints him.

(ii) 1 S 16[14–23]. In this second account the servants of Saul recommend that the king should send for someone who is a skilful player on the lyre (not harp), in order that by means of music the mental disorder from which Saul is suffering may be allayed. The son of Jesse is proposed, and forthwith sent for. When Saul is again attacked by the malady—said to be occasioned by 'an evil spirit from God'—David plays upon the lyre, and Saul 'is refreshed' in spirit.

(iii) 1 S 17. The Greek version omits a large part of this account (vv.[12–31, 55–58]), which seems itself to have been put together from different sources. According to it David's first appearance was on the eve of a battle between the Israelites and the Philistines. His father is in the habit of sending him to the Israelite camp with provisions for his oldest brothers, who are among the warriors in the Israelite army; on one such occasion he finds the camp in consternation on account of the defiance of a Philistine hero, the giant Goliath. This man offers to fight in single combat with any Israelite who will come out and face him, but in spite of the high reward offered by the king to anyone who will slay him—namely, great riches and the king's daughter in marriage—nobody comes forward to answer the challenge. David gathers these details from different people in the camp, and feeling sure of the help of Yahweh, he determines to fight the giant. He communicates his purpose to Saul, who at first discourages him, but on seeing his firmness and confidence he arms him and bids him go forth in the name of Yahweh. David, however, finds the armour too cumbersome and discards it, taking instead nothing but five smooth stones and a sling. After mutual defiance David slings one of the stones; the giant is hit and falls down dead; David rushes up, draws the sword of the dead warrior, and cuts off his head. Thereupon panic takes hold of the Philistine host, and they flee, pursued by the Israelites, who thus win a complete victory.

It is worthy of note that these three accounts connect with David just those three characteristics which subsequent ages loved to dwell on. The first presents him as the beloved of Yahweh, who was specially chosen, the man after God's own heart, the son of Jesse; the second presents him as the musician whose playing on the lyre had a soothing effect on Saul; while the third presents him as the warrior-hero. Of these three accounts some have thought that the third is nearest to actual history, but it is not at all certain that David was the slayer of Goliath, because 2 S 21[19] gives that honour to Elhanan (q.v.), but 1 Ch 20[5], apparently in an effort to harmonize the two accounts, says that the giant slain by Elhanan was Goliath's brother, Lahmi. In any case there is good reason to believe that David did win a victory over some Philistine giant, who was perhaps nameless at first, and only later had the name Goliath transferred to him. David's heroic deed called forth the admiration and later the love of the king's son, Jonathan; a covenant of friendship was made between the two, in token and in ratification of which Jonathan took off his robe and armour, and presented David with them. This friendship lasted until the death of Jonathan, and David's pathetic lamentation over him (2 S 1[22–27]) points to the reality of their love.

In recognition of David's victory over the Philistine giant Saul gave him an important command in his army, but as David's victories continued amid the acclaim of the people, it aroused Saul's envy, a not wholly unnatural feeling under the circumstances. The adage in 1 S 18[7]—assuredly one of the most ancient authentic fragments of the history of the time—

> 'Saul has slain his thousands,
> And David his ten thousands'

was not flattering to one who in days gone by had been Israel's foremost warrior. For the present, however, Saul conceals his real feelings (1 S 18[10f] are evidently out of place, and do not appear in the Greek version), intending to rid himself of David in such a way that no blame would attach to himself. In fulfilment of his promise to the slayer of the Philistine he expresses his

intention of giving his daughter Michal to David in marriage, but as David can offer no marriage-price, all he asks is a hundred Philistine foreskins, hoping that David would lose his life in attempting to procure these (1 S 18[25]). The scheme fails, and David receives Michal in marriage. A further attempt to get rid of David is frustrated by Jonathan (19[1-7]), and at last Saul himself tries to kill him by throwing a javelin at him while he was playing on his lyre; again he fails, for David nimbly avoids the javelin and escapes to his own house (19[9ff]). Thither Saul sends men to kill him, but with the help of his wife he again escapes and flees to Ramah to seek counsel from Samuel. On Samuel's advice, apparently, he goes to Jonathan by stealth to see if there is any possibility of reconciliation with the king; Jonathan does his best, but in vain (20[1-42]), and David realizes that his life will be in danger so long as he is anywhere within reach of Saul or his emissaries.

2. David as refugee.—As in the case of the earlier period of David's life, the records of this second period consist of a number of fragments from different sources, not very skilfully put together. We can do no more here than enumerate the various localities in which David sought refuge from Saul's vindictiveness, pointing out at the same time the more important episodes in his refugee life.

David flees first of all to *Nob*, the priestly city (1 S 21[1]). His stay here is short, for he is seen by Doeg, one of Saul's followers, and he takes refuge in the *cave of Adullam* (22[1]). Here his relatives come to him, and he gathers together a band of desperadoes, who make him their captain. Finding that this kind of life is not fitted for his parents, he takes them to *Mizpeh* and entrusts them to the care of the king of Moab (22[3]). On his return he is advised by the prophet Gad to leave the stronghold; he therefore takes refuge in the forest of *Hereth* (22[5]). While hiding here, news is brought to him that the Philistines are attacking Keilah; he hastens to succour the inhabitants by attacking the Philistines; these he overcomes with great slaughter, and thereupon he takes up his abode in *Keilah* (23[7]). In the meantime Saul's spies discover the whereabouts of the fugitive, and David, hearing that the men of Keilah will deliver him up to his enemy, escapes with his followers to the hill-country in the wilderness of *Ziph* (23[14]). A very vigorous pursuit is now undertaken by Saul, who seems determined to catch the elusive fugitive, and the chase is carried on among the wilds of *Ziph*, *Maon*, and *Engedi* (23[18-29]). It is during these wanderings that Saul falls into the power of David, but is magnanimously spared (chs. 24, 26). The episode of David's dealings with Nabal, and his marrying Abigail and Ahinoam, also falls within this period (ch. 25). At one time there seemed to be some hope of reconciliation between Saul and David (26[24f]), but evidently this was short-lived, for soon afterwards David escapes once more, and finally is driven to flee with six hundred followers to the court of Achish, king of Gath, who welcomes him as an ally and gives him the city of *Ziklag* (ch. 27). David stays there for a year and four months (27[7]), occupying the time by fighting against the enemies of his country, the Geshurites, Amalekites, etc. At the end of this time war again breaks out between the Israelites and the Philistines. The question arises whether David shall join the forces of Achish against the Israelites; David himself seems willing to fight on the side of the Philistines 29[8]), but the Philistines suspect treachery on his part, and at the request of Achish he returns to *Ziklag* (ch. 29). On his arrival here he finds that the place has been sacked by the Amalekites, and forthwith he sets out to take revenge. This is ample and complete; part of the spoil he sends as a present to the elders of Judah and to his friends (30[26-31]), a fact which shows that there was a party favourable to him in Judah. In the meantime the war between Israel and the Philistines ends disastrously for the former, and Saul and Jonathan are slain. David received news of this during his sojourn in Ziklag. With this ends the refugee life of David, for, leaving Ziklag, he comes to Hebron, where the men of Judah anoint him king over the house of Judah (2 S 2[4]), evidently with the approval of the Philistines. David must have ruled at Hebron under the suzerainty of the Philistines, because otherwise there surely would have been war with them, for they controlled Judah at this time, as they did practically all of Palestine.

3. David as king.—For seven years David ruled over Judah, with his capital at Hebron. In spite of his evident desire to make peace with the followers of Saul (2 S 9), it was but natural that a vigorous attempt should be made to uphold the dynasty of the late king, at all events in Israel, as distinct from Judah (see ISHBOSHETH). It is therefore just what we should expect when we read that 'there was a long war between the house of Saul and the house of David' (3[1]). The final victory lay with David, and in due time the elders of Israel came to him in Hebron, and he was anointed king over Israel (5[3]). That made him king over the whole land, and that meant defiance of the Philistines and immediate war with them (5[17ff]). He realized now that he needed a stronger and more central capital than Hebron; so he fixed on Jerusalem, a neutral city lying on the border between Israel and Judah. With his personal army he captured it from the Jebusites, and renamed it 'City of David' (5[7]). Thither he brought the Ark with great ceremony (6[1ff]), thus making his own City of David the religious, as well as the political and military, capital of his state. Yahwism was made the official religion of the united state, and to secure it in that place the priests were organized under Abiathar as chief priest, and he and Zadok, together with the leading priests, were made members of the royal court at Jerusalem (8[17]), and according to v.[18] David's sons were made priests.

David owes his greatness largely to his genuis in organization which he seems to have borrowed in large part from Egypt, either directly or through the Phoenicians, with whom he was on friendly terms (2 S 5[11], 1 Ch 14[1]), and who helped him build his palace in Jerusalem. We have two lists of his officials, 2 S 8[16-18] and 20[23-25], presumably from different times and differing only slightly. In both Jehoshaphat is listed as 'the recorder,' the exact equivalent of the Egyptian Royal Herald, the officer of public relations, who regulated the ceremonies in the palace, and was the intermediary between the king and the people. Another of David's officials was 'the scribe,' again corresponding to an official in Egypt. He functioned as the royal private secretary and the secretary of state. His name is given in a different form every time it is mentioned, but whatever it was, Shisha or the like, it is evidently Egyptian and not Hebrew. Two of his sons were scribes of Solomon, and one of these was named Elihoreph (1 K 4[3]), again manifestly an Egyptian name, at least in its second element. The taking of a census (2 S 24), despite popular prejudice against it, was another device on David's part to centralize the authority in himself and break down the old tribal system; and for the same reason he divided the land into districts, because it was apparently he who initiated the practice, although Solomon carried it out in more sweeping fashion.

Not only was the government reorganized, but the army as well. Early in his career David had gathered about himself his own band of professional soldiers, whose loyalties were to him alone, and around this solid core he built an army of peasants that was invincible, with Joab as commander of the whole, and Benaiah the commander of the mercenaries. In addition there was a special band of warriors of exceptional ability, known as the Thirty, and a still more exclusive group known as the Three (2 S 23[8ff]).

Despite all of David's attempts to unify the country and despite the esteem in which he himself was held the old rivalries between north and south continued, and there were revolts against him, the most serious of which was led by his own son Absalom. Of an ambitious nature, Absalom sought the succession, even at the

expense of dethroning his father. After four (not 'forty' as in EV) years of ingratiating himself with the people (2 S 15^{1-7}) the rebellion broke out. At first Absalom was successful; he attacked Jerusalem, from which David had to flee. David withdraws across the Jordan and halts at Mahanaim; here he marshals his forces under the leadership of Joab. The decisive battle follows; Absalom is defeated, and fleeing, he is caught by his hair on the overhanging branch of a tree. While hanging thus, he is slain by Joab, despite David's strict command that he should not be harmed. The touching account of David's sorrow is given in 2 S 19^{1-4}. A second rebellion, of a much less serious character, was that of Sheba, who sought to draw the northern tribes away from their allegiance; it was, however, easily quelled by Joab (ch. 20). Another rebellion (if such it can be called) was that of Adonijah, which occurred at the very end of David's reign (see ADONIJAH).

One of the features of David's reign was its many foreign wars. It is, however, necessary to bear in mind that in the case of a newly established dynasty this is only to be expected. Also the spoils and tribute of successful war helped David to meet his many expenses. The following is, very briefly, a list of David's foreign wars; they are put in the order found in 2 Samuel, but this order is not strictly chronological; moreover, it seems probable that in one or two cases duplicate, but varying accounts appear: Philistines (5^{17-25}), Moabites (8^{2}), Zobah (8^{3f}), Aramaeans (8^{5-13}), Edomites (8^{13f}), Ammonites, Aramaeans (10^{1} 11^{1} 12^{26-31}), and Philistines (21^{15-22}). David was victorious over all these peoples, the result being a great extension of his kingdom, which reached, according to tradition, right up to the Euphrates (cf Ex 23^{31-33}, Dt 11^{23-25}).

While it is impossible to deny that the role of musician in which we are accustomed to picture David is largely the product of later ages, there can be no doubt that the role is based to some degree on fact (cf *e.g.* Am 6^{5}), and he must evidently be regarded as one of the sources of inspiration which guided the nation's musicians of successive generations (see article PSALMS).

The character of David offers an intensely interesting complex of good and bad, in which the former largely predominates. As a ruler, warrior, and organizer he stands pre-eminent among the heroes of Israel. His importance in the domain of the national religion lies mainly in his founding of the sanctuary of Zion, with all that this denotes. While his virtues of open-heartedness, generosity, and valour, besides those already noted, stand out as clear as the day, his faults are to a large degree due to the age in which he lived, and must be discounted accordingly.

DAVID, CITY OF.—See JERUSALEM.

DAY.—See TIME.

DAY OF ATONEMENT.—See ATONEMENT [DAY OF].

DAY OF THE LORD.—The day of Yahweh's decisive intervention in history, the day of his judgment upon his foes and the triumphant vindication of his kingly rule. The concept is fundamental to OT eschatology and informs many passages even where the term is not used (often 'in that day' etc.). It is first attested in the 8th cent. (Am 5^{18ff}) but, since it was even then an established popular belief, it was certainly much older. Its origins, however, are disputed. Possibly recollection through cultic recitation of the great days in the past on which Yahweh had intervened in behalf of His people, together with confidence in His promise for the future, had conspired to produce the expectation of a coming day of definitive intervention when the Divine purpose for Israel would be brought to fruition. Amos' hearers expected the Day of Yahweh in the near future and looked forward to it as a day of national triumph. Amos, however, denouncing their crimes against justice, declared that Yahweh would on that day judge Israel also. Succeeding prophets for the most part followed in the path of Amos, viewing the Day of Yahweh as the day of His judgment on the nations of the world (see the oracles against the nations in various prophetic books), and on sinful Israel as well (*e.g.* Is 2^{6-21}, Zeph 1–2). This judgment they expected in the form of historical calamity; the destruction of the nation by the Babylonians was widely regarded as the fulfilment of that judgment (cf Lamentations). But since the prophets did not surrender faith in the promises of Yahweh, the expectation grew that, beyond the judgment, Yahweh would establish a repentant and purified remnant of His people (*e.g.* Hos 2^{14ff}, Is 9^{1ff} 10^{20ff}, Zeph 3^{8ff}, Jer 31^{31ff}, Ezk 37).

In the exile and after, the Day of Yahweh was looked forward to as the great, final turning point in history when Yahweh would redeem His people and consummate His purposes for them. This hope is expressed in various ways: the overthrow of Babylon and the restoration of Israel (Is 13^{1}–14^{23}); the rejuvenation of creation after a terrible judgment (Is 34 f); a new Exodus deliverance and the establishment of Yahweh's rule in all the earth (Is 40–66, *passim*); the final battle between Yahweh and the enemies of His rule (Ezk 38 f, Zec 14); cosmic and earthly cataclysms, and the outpouring of Yahweh's spirit upon His people (Joel). Progressively the Day of Yahweh came to be viewed as a supra-historical day of judgment (*e.g.* Is 24–27, Daniel), when Yahweh's foes celestial and terrestrial would be destroyed and His universal rule would be established.

The NT transmutes the concept into the day of Christ's coming in glory: 'that day' (1 Th 5^{4}); 'the day' (1 Co 3^{13}), 'the day of the Lord Jesus' (2 Co 1^{14}), etc. It is the day of final judgment (Ro 2^{5-16}), and also of the establishment of Christ's rule forever. J. Br.

DAY STAR, Is 14^{12} (RV, RSV; AV 'Lucifer'), 2 P 1^{19} (AV, RV; RSV 'morning star').—See STARS.

DAY'S JOURNEY.—A 'day's journey' (Nu 11^{31}, 1 K 19^{4}, Jon 3^{4}, Lk 2^{44}; cf three days' journey, Gn 30^{36}, Ex 3^{18}, etc.; seven days, Gn 31^{23}) was not, like the 'sabbath day's journey' (see WEIGHTS AND MEASURES), a definite measure of length, but, like our 'stone's throw,' 'bow-shot,' etc., a popular and somewhat indefinite indication of distance. This would naturally vary with the urgency and *impedimenta* of the traveller or the caravan. Laban in hot pursuit of Jacob, and the Hebrew host in the wilderness, may be taken to represent the extremes in this matter of a 'day's journey' (see above), although it is scarcely possible to take literally the 'seven days' journey' of the former (Gn 31^{23})—from Haran to Gilead, *c* 350 miles in 7 days. From 20 to 30 miles is probably a fair estimate of an average day's journey with baggage animals.

A. R. S. K.

DAYSMAN.—A daysman is an arbiter. The compound arose from the use of the word 'day' in a technical sense, to signify a day for dispensing justice. The same use is found in Greek; thus 1 Co 4^{3} 'human court' is literally 'man's day.' The word occurs in Job 9^{33} 'Neither is there any daysman betwixt us' (AV, RV; RSV 'umpire,' with AVm, RVm). Tyndale translates Ex 21^{22}, 'he shall paye as the dayesmen appoynte him' (EV 'as the judges determine').

DAYSPRING.—An old English expression denoting the dawn ('the day sprynge or dawnynge of the daye gyveth a certeyne lyght before the rysinge of the sonne,' Eden, *Decades*, 1555, p. 264). It occurs in Job 38^{12} 'Hast thou . . . caused the dayspring to know its place?' (AV, RV; RSV 'the dawn'); Wis 16^{28} 'at the dayspring pray unto thee' (RV; RSV 'at the dawning of the light'). Virtually the same expression occurs in AV and RV in Jg 19^{25} and 1 S 9^{26}; cf also Ps 65^{8} (east and west called 'the outgoings of the morning and evening'). In Lk 1^{78} the expression 'dayspring from on high' (AV, RV; RSV 'the day shall dawn upon us from on high') probably goes back to a Hebrew original which was a well-understood personal designation of the Messiah (combining the ideas of 'light'

and 'sprout'); it would then be a poetical equivalent for 'Messiah from heaven.' G. H. B.

DEACON.—The Greek word *diakonos*, as well as the corresponding verb and abstract noun, is of very frequent occurrence in the text of the NT, but in AV is always translated 'servant' or 'minister' except in Ph 1[1], 1 Ti 3[8–13], where it is rendered 'deacon,' these being the only two passages where it is evidently used in a technical sense.

In the Gospels the word has the general meaning of 'servant' (cf Mt 20[26] ||, 23[11], Jn 2[5, 9]). St. Paul employs it constantly of one who is engaged in Christian service, the service of God or Christ or the Church (*e.g.* 2 Co 6[4] 11[23], Col 1[23–25]), but without any trace as yet of an official signification. Once in Romans we find him distinguishing *diakonia* ('service') from prophecy and teaching and exhortation (12[6–8]); but it seems evident that he is speaking here of differences in function, not in office.

In Acts the word *diakonos* is never once employed, but 6[1–6], where we read of the appointment of the Seven, sheds a ray of light on its history, and probably serves to explain how from the general sense of one who renders Christian service it came to be applied to a special officer of the Church. The Seven are nowhere called deacons, nor is there any real justification in the NT for the traditional description of them by that title. The qualifications demanded of them (v[3]., cf v.[5]) are higher than those laid down in 1 Timothy for the office of the deacon; and Stephen and Philip, the only two of their number of whom we know anything, exercise functions far above those of the later diaconate (6[8ff] 8[5–13, 26ff]). But the fact that the special duty to which they were appointed is called a *diakonia* or ministration (v.[1]) and that this ministration was a definite part of the work of the Church in Jerusalem, so that 'the *diakonia*' came to be used as a specific term in this reference (cf Ac 1[1][29] 12[25], Ro 15[25, 31], 2 Co 8[4] 9[1, 12f]), makes it natural to find in their appointment the germ of the institution of the diaconate.

It is in the mission churches of the Gentile world that we first find the deacon as a regular official, called to office after probation (1 Ti 3[10]), and standing alongside the bishop in the ministry of the Church (Ph 1[1], 1 Ti 3[1–13]). As to his *functions* nothing is said precisely. We can infer that the *diakonia* of the deacons, like the *diakonia* of the Seven in Jerusalem, was in the first place a ministry to the poor, closely associated with the deacons' assistance in 'serving tables' at the Church's Eucharist. In the Gentile as in the Jewish world it would naturally be a service of a responsible, delicate, and often private kind—an inference that is borne out by what is said in 1 Timothy as to the deacon's qualifications.

Comparing these *qualifications* with those of the bishop we observe that the difference is just what would be suggested by the names bishop or 'overseer' and deacon or 'servant' respectively. Bishops were to rule and take charge of the Church (1 Ti 3[5]); deacons were to 'serve well' (v.[13]). Bishops must be 'apt to teach' (v.[2]); deacons were only called to 'hold the mystery of the faith with a clear conscience' (v.[9]). That the work of the deacon and his fellow-servant the deaconess (q.v.) was of a house-to-house kind is suggested by the warnings given against talebearing (v.[8]) and backbiting (v.[11]). That it had to do with the distribution of Church moneys, and so brought temptations to pilfering, is further suggested by the demand that the deacon should not be greedy of filthy lucre (v.[8]) and that his female counterpart should be 'faithful (*i.e.* trustworthy) in all things' (v.[11]). J. C. L.—M. H. S.

DEACONESS.—The word occurs in RSV in Ro 16[1]. In this verse Phoebe is described as 'a *diakonos* of the church at Cenchreae.' AV and RV render 'servant,' RVm 'deaconess.' The term may describe a technical office in the Church, or may refer only to service in general.

In 1 Ti 3[11], however, although the word 'deaconess' is not used, it may be that female deacons are referred to. AV makes it appear that the wives of deacons are spoken of; RV corrects this by rendering 'Women in like manner must be grave, not slanderers, temperate, faithful in all things.' And when the whole passage (vv.[8–13]) is read, it seems possible that the women referred to in v.[11] are *diakonoi* 'in like manner' as the men described both before and after. We know from Pliny, writing early in the 2nd cent., that by that time there were deaconesses in the Christian Churches of Bithynia (*Ep.* x. 96). And in the ancient world the need must have been early felt for a class of women who could perform some at least of the duties of the diaconate for their own sex in particular.

DEAD.—See DEATH.

DEAD SEA.—An inland lake 53 miles long and from 2¾ to 10 miles in breadth, which is fed by the Jordan. Its level is about 1290 feet below that of the Mediterranean, being the lowest body of water on the earth's surface. It has no outlet, and the water received by it is all carried off by evaporation. In consequence, the waters of the lake are impregnated with mineral substances to a remarkable degree; they yield 25 per cent. salt, whereas the ocean yields but 4 to 6 per cent. Valuable as a source of salt in Biblical times (Ezk 47[11]), its mineral deposits are exploited commercially to-day.

The modern name is of late origin (first used apparently by Pausanias) and refers to the total absence of life in its waters—in contrast with the apocalyptic hope of Ezk 47[8–10]. Hebrew writers spoke of it as the 'Salt Sea' (Gn 14[3], Nu 34[3], Jos 15[5], etc.), the 'sea of the Arabah' (Dt 3[17], 4[49]) and the 'eastern sea' (Ezk 47[18], Jl 2[20]). Greek writers called it 'Asphalt Lake,' because asphalt sometimes rises to the surface and floats ashore. In Arabic it is known as *Baḥr Lût*, 'the sea of Lot,' a name probably due to the direct influence of the history as related in the Qur'ān. South of the lake was once the **Valley of Siddim** (Gn 14[10]) where stood the cities of **Sodom and Gomorrah**, which are believed to be entirely submerged by water. Earthquakes, accompanied by irruptions of ignited petroleum and gas, may have contributed to the sinking of the valley.

The Dead Sea owes its origin to a fracture produced in the surface of the region by earth-movements whereby the land of Palestine was raised above sea-level. This fault took place towards the end of the Eocene period; it extends along the whole Jordan Valley from the Gulf of 'Aqaba to Hermon. Thus the general appearance of the lake has not radically altered during the whole period of human existence.

Round the border of the lake are numerous small springs, some bursting actually under its waters, others forming lagoons of comparatively brackish water. The springs of **En-Gedi** and *'Ain Feshkhah* on the western side made possible the cultivation of crops—the latter place by the Essene community of Khirbet Qumrân. In the lagoons small fish are to be found; but in the main body of water life of any kind is impossible.

Modern observations show that the surface of the lake varies. An island that was a conspicuous feature at the north end disappeared under the surface in 1892, and became visible again in 1960.

R. A. S. M.—W. H. Br.

DEAD SEA SCROLLS.—On the west side of the Dead Sea, not far from its northern end, a rugged valley named Wâdī Qumrân descends from the Judaean plateau. A promontory on its northern edge bears a ruin called Khirbet Qumrân (Qumrân Ruin), which has been shown by excavation to be the remains of a Jewish monastic establishment of the last century B.C. and the first century of our era. The major occupation of the site was in two periods, separated by a gap of about thirty years corresponding roughly to the reign of Herod the Great, just before the beginning of the Christian era. Coins found in the excavation indicated that the first

period began near the end of the 2nd cent. B.C., in or shortly before the reign of Alexander Jannaeus (103–76 B.C.). It was brought to an end by an earthquake in 31 B.C., and the buildings were not restored and reoccupied until some time in the reign of Archelaus (4 B.C.–A.D. 6). The second period of occupation then lasted until A.D. 68, when the settlement was violently destroyed, probably by the Romans.

The excavation of this site was a consequence of a previous discovery. At some time during the years 1945–47 an Arab goatherd accidentally found a cave, about half a mile north of Kirbet Qumrân, containing Hebrew and Aramaic manuscripts stored in clay jars. In 1947 these scrolls were brought to Jerusalem. Four of the seven documents contained in them were bought by the Syrian Orthodox Archbishop there and three by the Hebrew University, which later acquired the others also.

In 1949 the cave was scientifically excavated by the Department of Antiquities of Jordan and the French School of Archaeology at Jerusalem, and hundreds of fragments of manuscripts were unearthed. The excavation of Khirbet Qumrân followed in 1951–56; meanwhile and after the completion of the excavation ten more caves containing a few scrolls and thousands of fragments were found. The results of the excavations, combined with the palaeographical evidence of the manuscripts themselves, made it clear that all but the oldest of them had been made by the community at Khirbet Qumrân.

During the course of these discoveries another and quite unconnected collection of fragments was found in another valley some miles to the south, the Wâdī Murabba'āt. These came from the 2nd cent. A.D. and consisted of letters, contracts, and similar documents, as well as biblical manuscripts, from the period of the revolt of Bar Cochba (A.D. 132–35). A third body of material, coming from later Christian centuries, appeared in the excavation of Khirbet Mird, the ruins of a Byzantine monastery farther up in the hills. All three collections are included under the term Dead Sea Scrolls in its widest sense, and all have their own importance. Major interest, however, has naturally centred in the oldest and largest collection, the fragments and scrolls from the Wâdī Qumrân. Most of these are of leather, some of papyrus, and one of copper. With the exception of the seven documents found in the initial discovery, which are now in Israel, all the material is in Jordan at the Palestine Archaeological Museum of Jerusalem, where it is being studied and published by an international and interconfessional team of scholars.

The contents of the Qumrân texts exhibit an astonishing range and variety, though all are of a religious nature. Roughly a fourth of them are biblical manuscripts. All the books of the OT except Esther are represented, some of them in several copies. There are also selections of texts, paraphrases, and even commentaries on Genesis, Psalms, and several of the prophetic books. Several of the Apocrypha and Pseudepigrapha, including Tobit, Sirach, Enoch, and Jubilees, have been found also.

In addition to these there are many non-biblical works, both in Hebrew and in Aramaic. Most of them were previously quite unknown. Portions of the Damascus Document (Zadokite Fragments) were found in three of the caves. An almost complete copy of a composition resembling it, the Manual of Discipline or Rule of the Community, was found in the first cave; parts of eleven other copies appeared in another (Cave 4). The Rule of the Congregation is still another composition closely related to the Manual of Discipline and included in the same scroll with it in the copy from Cave 1. There are also collections of psalms, hymns, prayers, and blessings. Other scrolls contain directions for worship. Several texts have to do with the impending end of this world and with the world to come.

From all this emerges a vivid picture of a strict monastic order within Judaism, a community which regarded itself as the true Israel of the last days, deeply involved in the cosmic struggle between the sons of light and the sons of darkness, the 'lot' of God and the 'lot' of Belial. Many of the texts reflect a quiet group withdrawn from the world and devoted to worship and study. One scroll, however, gives detailed directions for the conduct of the war against the hosts of evil, with weapons and military tactics plainly copied from those of the Romans. The community's life at Qumrân was strictly regulated by rules of probation, admission, discipline, the sharing of property, eating together, and the continual, ardent searching of the Scriptures. The nature of their life and organization and the location of their settlement make it natural to identify them with the Essenes (q.v.), described by Josephus and Philo. They were at least a closely related sect, part of the same general movement.

The significance of the Dead Sea Scrolls for biblical studies is twofold. The biblical manuscripts provide a wealth of material for the textual criticism of the OT; the other texts acquaint us with a little known phase of Jewish history and by so doing fill in an important part of the background of the NT. For textual criticism the importance of these texts lies in the fact that they are a thousand years and more older than the oldest Hebrew manuscripts of the OT previously known. They carry us back to a stage in the history of the text before it had been standardized in the form preserved by all the later manuscripts. In the Wâdī Murabba'āt manuscripts of the 2nd cent. the standardization is complete; in the Qumrân fragments and scrolls the text is still much more fluid. In some books there is little difference from the traditional (Massoretic) text; in others there is a notably close relation with the text represented by the Septuagint. Many readings not found in any other form of the text are found, and occasionally they seem to be superior to the traditional readings. Fragmentary as the Qumrân texts are, they afford invaluable assistance for the correction of the text and still more for the reconstruction of its history.

For the study of the NT the literature of the Qumrân sect affords many striking parallels in language, thought, and practice. The sense of living in the last days was characteristic of both the sect and the early church. The sharp division between the realms of light and darkness recalls many passages in the NT, especially in the Johannine writings. The stress on the sinfulness of man and on salvation by the grace of God alone reveals a surprising affinity with the experience and doctrine of Paul. The life of the early apostolic church at Jerusalem resembled that of the Qumrân community at such points as the common meals and the sharing of property. Many scholars, impressed by these contacts, have inferred that the sect had some direct influence on the early church, through John the Baptist or through Jesus or through later connexions. If there was any such influence, which is possible but cannot be proved, there were also radical differences which were even more significant. In any case, the vocabulary, presuppositions, and ways of thinking inherited by the first Christians from Judaism are illuminated at many points by the Dead Sea Scrolls. M. B.

DEAFNESS.—See MEDICINE.

DEAL.—A deal is a part or share. It is still in use in the phrase 'a great deal' or 'a good deal.' In AV occurs 'tenth deal,' Ex 29^{40}, Lv 14^{21} etc. (RV 'tenth part'; RSV 'tenth measure' or 'tenth'), the Hebrew *'iśśārôn* being a measure used in meal-offerings. See WEIGHTS AND MEASURES, II.

DEATH.—**I. IN THE OT.—1.** The Hebrew term *māweth* and our corresponding word 'death' alike spring from primitive roots belonging to the very beginnings of speech. One of man's first needs was a word to denote that stark fact of experience—the final cessation of life to which he and the whole animated creation, and the very trees and plants, were all subject. It is, of course, in this ordinary sense of the term as denoting a physical fact that the expressions 'death' and 'die' are mostly used in the Scriptures.

2. The Scriptures have nothing directly to say as to

the place of death in the economy of nature. St. Paul's words in Ro 5^{12ff} as to the connexion between sin and death must be explained in harmony with this fact; and, for that matter, in harmony also with his own words in Ro 6^{23}, where death, the 'wages of sin,' cannot be simply physical death. The Creation narratives are silent on this point, yet in Gn 2^{17} man is expected to know what it is to die. We are not to look for exact information on matters such as this from writings of this kind. If the belief enshrined in the story of the Fall in Gn 3 regarded death in the ordinary sense as the penalty of Adam and Eve's transgression, they at any rate did not die 'in the day' of their transgression; v.[22] suggests that even then, could he but also eat of 'the tree of life,' man might escape mortality. All we can say is that in the dawn of human history man appears as one already familiar with the correlative mysteries of life and death.

3. From the contemplation of the act of dying it is an easy step to the thought of death as a state or condition. This is a distinct stage towards believing in existence of some kind beyond the grave. And to the vast mass of mankind to say 'he is dead' has never meant 'he is non-existent.'

4. Divergent beliefs as to what the state of death is show themselves in the OT.—(*a*) In some instances death is represented as *a condition of considerable activity and consciousness*. Certain dead are regarded as 'knowing ones,' able to impart information and counsel to the living. Such are indicated by the term translated 'wizards' in Lv 19^{31} 20^{6}, Is 8^{19} 19^{3}. These are departed spirits who are sought unto or inquired of 'on behalf of the living.' A vivid instance of this belief is furnished in the story of the medium at Endor (1 S 28), in which the departed Samuel 'coming up out of the earth' is called 'a god' (*'elōhîm*, v.[13]). Also in Is 14^{9f} there is a graphic description of the commotion caused in Sheol by the arrival of the king of Babylon. Some scholars have held that in all this there is a relic of ancient Semitic ancestor worship. In any case, the frequency of strict OT prohibitions of necromancy and the cult of the dead (Ex 22^{18}, Lv $19^{26, 31}$ $20^{6, 27}$, Dt 18^{10f}) indicates the probable pagan origin of such beliefs and practices.

(*b*) In contrast to necromancy with its weird appeals to the dead for guidance and information, in the common OT view the state of death was *one of unconsciousness, forgetfulness, and silence* (Ps 88^{12} 94^{17} 115^{17}). The present world is emphatically 'the land of the living' (Ps 27^{13} 116^{9}). Death is simply 'being gathered to one's fathers' (Jg 2^{10}, 2 K 22^{20}) who are now departed souls in the underworld or Sheol. Death is man's common fate, even shared by the beasts (Ps $49^{10-12, 18-20}$, Ec 3^{20}). It is regarded as tragic primarily when premature or violent, but for one who has lived out his days in righteousness the realm of death may be regarded as well-earned rest (Gn 15^{15} 25^{8}, Nu 23^{10}, 1 K 2^{6}, Ps 116^{15}, Jer 34^{4f}). Sheol also appears inviting to a soul in distress because it is a state of tranquility and sleep (Job $3^{13, 17}$); and there is nothing to be known or to be done there (Ec 9^{10}). In a few instances death is described as non-existence or complete dissolution 'like water spilt on the ground' (2 S 14^{14}, cf Job 7^{21}, Ps 39^{13}). Usually, however, death is the state of being in a very weakened state, with vitality and strength lost, and the soul (*nephesh*) either emptied out or escaped from the body (Gn 35^{18}, 1 K 17^{21}, Is 14^{10} 53^{12}). Thus there continues only a dreary, meaningless existence cut off from 'the land of the living' with no hope of return (Job 10^{21f}), and, most distressing of all, cut off also from all communion with Yahweh (Is $38^{10f. 18}$, Ps 6^{5} 115^{17}). Therefore death was often regarded as 'bitter,' a 'terror,' and a 'snare' (see below, **6**). These OT ideas concerning death show affinities, perhaps not primarily with those of Egypt, but certainly with Mesopotamian conceptions, as in the Epic of Gilgamesh.

(*c*) The inevitability and finality of death are taken for granted in most of the OT. However, since this limitation of human life was set by Yahweh, He could allow certain rare individuals to escape death: the patriarch Enoch (Gn 5^{24}) and the prophet Elijah (2 K 2^{1-12}). A peculiarly pious soul might hope to escape the customary snares of Sheol (Job 19^{25f}, Ps 16^{10f} 49^{15} 73^{23f}). God's power working through a prophet may restore a dead boy to life (1 K 17^{22}, 2 K 4^{32-35}). But normally death is completely victorious (Hos 13^{14}). Only in late apocalyptic passages (Is 26^{19}, Dn 12^{2}) does firm belief in the resurrection of the dead appear.

5. Death as standing in penal relation to man's sin and unrighteousness is frequently insisted on. This insight is most clearly expressed in Gn 3 (see above, **2**): 'You are dust, and to dust you shall return' (v.[19]). This connexion between death and sin apparently arose from the realization that sin, like death, separates man from God. Thus both sin and death are alien to the Divine nature. While no account is given as to the origin of death, it seems evident that death was not regarded as part of God's original intention in creation. That death as penalty for sin may be something more than natural death, perhaps spiritual death, seems clear from such an antithesis as in Dt $30^{15, 19}$ ('life and good: death and evil'), and this set in strict relation to conduct and faithfulness to Israel's covenant with Yahweh. Cf the burden of Ezk 18, 'the soul that sins shall die,' with the correlative promise of life; cf Pr 15^{10}. In this sense Yahweh takes 'no pleasure in the death of anyone' (Ezk 18^{32}).

6. OT poetical uses of references to death may be pointed out: 'bitterness of death,' 1 S 15^{32}, cf Ec 7^{26}; 'chambers of death,' Pr 7^{27}; 'gates of death,' Job 38^{17}, Ps 9^{13} 107^{18}, cf Is 38^{10} and Babylonian and Egyptian mythologies where death is a walled city with strong gates from which escape is impossible; 'dust of death,' Ps 22^{15}, cf Gn 3^{19}, Ec 12^{7}; death as 'the reaper,' Jer 9^{22}; 'the sleep of death,' Ps 13^{3}, cf Dn 12^{2}; 'snares of death,' 2 S 22^{6}, Ps 18^{5} 116^{3}, Pr 13^{14} 14^{27}, cf Pr 21^{6} RSV LXX and 'cords of death,' Ps 18^{4}, as though death were a monster setting traps; 'terrors of death,' Ps 55^{4}; the phrase 'vexed to death,' Jg 16^{16}, *i.e.* 'to an extreme degree'; 'waves of death,' 2 S 22^{5}. J. S. C.—C. F. K.

II. In the Apocrypha.—**1.** The chief advance in the conception of death found in the Apocrypha is the belief in the resurrection (q.v.), especially in 2 Mac (*e.g.* $7^{9, 11, 23}$), and the immortality of the soul, in the Wisdom of Solomon (especially chs. 1–5). (*a*) In Sirach, the longest book in the Apocrypha, there is no clear conception of either; the old, traditional view of *Sheōl* still prevails, and the dead are not to be mourned overmuch (38^{23}); death may come either as a relentless foe (40^{1-11}), whom all men fear (cf He 2^{15}), or as a friend bringing grateful release (41^{1-4}). 'Whether life is for ten or a hundred or a thousand years, there is no inquiry about it in Hades (=*Sheōl*).' (*b*) The wicked take a dismal view both of this life and the life to come: men are born by mere chance, and when life is extinguished the body turns to ashes, and the spirit 'dissolves like empty air' (Wis 2^{2f}). Yet God did not make death (1^{13}); indeed He intended men for incorruption (2^{23}), and the 'eat, drink, and be merry' ethics of the materialists, who are also persecutors of the righteous (1^{6-20}), is unfounded. 'The souls of the righteous are in the hand of God, and no torment will ever touch them' (3^{1}), but the ungodly will be punished 'as their reasoning deserves' (3^{10}). **2.** On a historical view, Sirach (*c* 185 B.C.; translated into Greek 132 B.C.) antedates the Book of Daniel (*c* 164 B.C.), where the first strong affirmation of belief in the resurrection is to be found (12^{2f}); this is followed by 2 Maccabees (*c* 65 B.C.) and Wisdom (*c* 50 B.C.). But the Book of Wisdom comes from Alexandria, and is Greek not only in language but in thought and ideology; the influence of popular Platonism is quite apparent in it, and the Palestinian conception of resurrection is not mentioned. **3.** As James Denney pointed out in his *Factors of Faith in Immortality*, the belief in resurrection was born of martyrdom: God, being just, will not permit those who have given their

lives in His service (in the Maccabaean revolt) to lie down in the dust for ever, but will raise them to a glorious life in the age to come. On the other hand, the conception of immortality involves theories of the soul as a centre of force or vitality, superior to death, and perhaps pre-existent, and it views the separation of the soul from the body as an advantage. Both views contribute to the shaping of the Christian doctrine of the life to come, which retains the conception of resurrection but with strong emphasis on the transformation of the body (cf Paul's doctrine of the 'spiritual body' in 1 Co 15^{35-54}, and his antipathy for mere bodiless survival in 2 Co 5^{1-5}). 2 Maccabees also represents the Maccabees as offering sacrifice for the departed, even for the disloyal (12^{39-45}), and is thus one more testimony to the religious variety found within Hellenistic Judaism. (2 Maccabees was an abridgement of the five-volume work on the Maccabaean War by Jason of Cyrene; see 2^{23}.)

F. C. G.

III. In the NT.—**1. The Gospels.**—(*a*) Our Lord says nothing about death as a physical phenomenon. He makes no attempt to explain what death will be like nor to answer the questions that have always excited man's curiosity. Even in stories that concern the raising of the dead there are no references to these matters. In this respect the attitude of Jesus and the evangelists is in strong contrast with that found in Rabbinical writings. The conception of 'the angel of death,' so characteristic of the latter, is absent, though traceable perhaps in 1 Co 15^{26}, He 2^{14}, and Rev 20^{13f}.

(*b*) The current Jewish view that death was an evil persists in the Gospels but never becomes obtrusive. There are various stories of Jesus raising the dead, but they are not given particular prominence and there is no sign of preoccupation with this problem. If one searches, however, signs of the common view come to light. Those aspects of death that make the living and active shrink from it are evident. Jesus in Rabbinic phrase speaks of *tasting* death (Mk 9^{1}) and of *seeing* death (Jn 8^{51}), and the overtone of these expressions is the antithesis of that attaching to 'seeing life' and 'seeing many days.' Death is to common human feeling an unwelcome, though inevitable, draught. When Jesus approached death Himself, He was 'greatly distressed and troubled' (Mk 14^{33}), a mental state due not to fear of men or of pain but to revulsion from death itself. The cry of dereliction (Mk 15^{34}) and the other inarticulate cry that accompanied His last breath (Mk 15^{37}) bear witness to the fact that in His humanity Jesus experienced even the horror of death. For all this, the pessimism of parts of the OT never appears in the Gospels, Jesus does not often point to death as the solemn and inescapable end (Lk 12^{16-21} and Jn 9^{4} are two exceptions). His intense concern for this life, coupled with His promise that believers will never die (Jn 11^{26}), supplies the reason.

(*c*) Jesus speaks of death as a sleep (Jn 11^{11-13}, see also Mt 27^{52}); but the same euphemistic use is found in the OT and in extra-Biblical writers. It did not of itself lessen the terrors of death (Ps 13^{3}). In conjunction with the Christian doctrine of resurrection, however, this representation of death does mitigate its bitterness (1 Th 4^{13ff}). The figure of sleep only describes the relation of the dead to the activities and interests of this world. Death is a falling asleep after life's day—and 'we sleep to wake': but there is nothing here to shed light on the question of whether that sleep is a prolonged period of unconsciousness or not.

(*d*) More important than natural death is the much larger and more solemn conception found in the fourth Gospel where death is primarily the condition of man resulting from sin (5^{24} $6^{20, 50}$ 8^{51f}). The exemption and deliverance promised in Jn 11^{25f} relate to this spiritual death, and by that deliverance natural death is shorn of its real terrors. The process of life begins here and now and reaches its consummation hereafter. Physical death, for the believer, is simply a moment of transition. It derives its solemn significance from its frequent association with the tragedy of sin and unbelief. The Johannine point of view is summed up in 1 Jn 3^{14}, 'We know that we have passed out of death into life, because we love the brethren. He who does not love remains in death.' The conception, however, is not found exclusively in the Johannine writings. The saying in Lk 9^{60} has a bearing on this point. In Mt 7^{13f} 'destruction' is the antithesis of 'life' (see also Mt 5^{29f} Mk 8^{35}, cf Jn 3^{16}). Luke's reference to 'perishing' ($13^{3, 5}$) conveys the same impression. Hardened impenitence means the loss of all that makes the man.

2. The rest of the NT.—(*a*) The Pauline doctrine that *natural* death was the consequence of the first sin (Ro 5^{12-17}, 1 Co 15^{21f}) was drawn from common Jewish belief (see, for example, 2 Bar 17^{3} 19^{8} 23^{4}). It finds no direct support in the Gospels.

(*b*) The notion that 'the sting of death is sin' (1 Co 15^{56}) is found throughout the NT. It means that, had there been no sin, death would have been a simple and desirable form of transition. Sin and unbelief have transformed the situation so that what was a stepping-stone is now a snare.

(*c*) The use of the term 'death' to denote a spiritual state in which men may live and still be destitute of all that is worth calling 'life' is common (Eph $2^{1, 5}$ 5^{14}, Col 2^{13}, 1 Ti 5^{6}, Ja 1^{15}, Jd ^{12}, Rev 3^{1}).

(*d*) The universal horror of death, to Paul Satan's supreme achievement, is only a passing show. Death, the last enemy (1 Co 15^{26}), will be destroyed. It will be swallowed up in the great victory (1 Co 15^{54-57}). The answer to the death of Adam was the resurrection of Christ.

(*e*) Paul's longing for death (2 Co 5^{8}, Ph 1^{23}) was possible because he believed that God had overcome death for him (Ro 6^{8}, 2 Ti 1^{10}).

(*f*) The figure of death is used to describe the change, from the life of sin to the life of righteousness. The believer, the man spiritually alive, is 'dead to sin' (Ro 6^{2}, 1 P 2^{24}) and 'dead with Christ' (Ro 6^{8}, Col 2^{20}).

(*g*) The phrase 'the second death' occurs in Revelation for the final doom of 'the cowardly, the faithless, the polluted,' etc. (21^{8}). It is equated with 'the lake of fire' (20^{14}). The phrase is taken from current Jewish writings. Over the faithful who have conquered their tribulations and who are gathered up in the first resurrection the 'second death' has no power (2^{11} 20^{6}).

J. S. C.—W. D. S.

DEBATE.—This word had formerly the meaning of 'strife,' as in the Geneva translation of Gn 13^{7}, 'there was debate betweene the heardmen of Abrams cattell, and the heardmen of Lots cattell.'

DEBIR.—1. A town first known as **Kiriath-sepher** (Jos 15^{15}, Jg 1^{11}) in the neighbourhood of Hebron, and inhabited by Anakim (Jos 11^{21}), conquered by Joshua (10^{38} 11^{21} 12^{13}), or more specifically by Othniel (15^{17}), assigned as a Levitical city (21^{15}, 1 Ch 6^{58}) in the tribe of Judah (Jos 15^{49}). An alternative name **Kiriath-sannah,** once recorded (15^{49}), is probably a corruption of Kiriath-sepher, due primarily to the similarity of *p* and *n* in the old Hebrew alphabet. It is identified with *Tell Beit Mirsim*, excavated by M. G. Kyle and W. F. Albright, who found remains of more than ten cities.

2. A place named in the northern boundary of Judah, near the valley of Achor (Jos 15^{7}); possibly modern *Throghet ed-Debr*.

3. A place, not identified, in the border of the trans-Jordanic territory of Gad (Jos 13^{26}). An alternative reading is **Lidebir** (see Lo-debar).

DEBIR.—The king of Eglon, who according to Jos 10^{3} joined other four kings against Joshua, but was defeated and put to death along with his allies at Makkedah.

DEBORAH ('bee').—**1.** Rebekah's nurse, who accompanied her mistress to her new home when she married Isaac (Gn 24^{59}).

2. The fourth of the leaders or 'Judges' of Israel; called also a 'prophetess,' *i.e.* an inspired woman—one of four mentioned in the OT—of the tribe of Issachar

(Jg 5^{12}), wife of Lappidoth (4^{4}). Her home was between Bethel and Ramah in the hill-country of Ephraim; here the Israelites came to her for guidance. She was the deliverer of the Israelites when they had sunk into a state of impotence through the oppression of Jabin, king of Hazor. A personality of great power and outstanding character, she was looked up to as a 'mother in Israel' (5^{7}).

Deborah's Song (Jg 5^{2-31}), better called **Song to Deborah** (since the poem is addressed to her), is the most ancient and magnificent example of early Hebrew literature. It is probably to be dated *c* 1125 B.C., at which time Megiddo lay in ruins and hence not it, but Taanach, was used to indicate the location of the battle (Jg 5^{19}). The poem has many parallels with Canaanite literature in language, imagery, and literary technique, particularly its ascending parallelism. In fact, like Ps 29, it may have been a Canaanite poem originally, made over later into a Yahweh hymn. Its great antiquity makes it difficult to translate, but the general sense is clear.

It is a song of victory, sung in honour of Israel's triumph under the leadership of Deborah and Barak over Sisera and the kings of Canaan. The vivid pictures which the poem brings up before the mind's eye make it certain that the writer lived at the time of the events described. The parallel and somewhat later prose account (Jg 4^{4-24}) agrees in the main with the poem. The Song may be divided into four distinct sections:

Praise to Yahweh, and the terror of his approach, vv. 2–5.
Condition of Israel prior to Deborah's activity, vv. 6–11.
Gathering of the tribes of Israel, vv. 12–18.
Victory of Israel and death of Sisera, vv. 19–31.

The chief importance of the Song lies in its historical *data* and the light it throws on some of early Israel's conceptions of Yahweh. Of the former, the main points are: that at this time the Israelites had securely settled in the hill-country, but had not as yet obtained any hold on the fertile lands of the Plain; that unity had not yet been established among the tribes of Israel; and that the 'twelve tribes' of later times had not yet come into existence.

Of the latter, the main points are: that Yahweh has His dwelling-place in the mountains of the South; that therefore He has not yet come to dwell among His people; that He comes forth from His dwelling-place to lead His people in battle; and that His might is so great that the very elements are shaken at His approach.

3. The mother of Tobit's father; she seems to have taught her grandchild the duty of almsgiving (To 1^{8}).

W. O. E. O.—T. J. M.

DEBT.—1. In OT.—Loans in the OT period were not of a commercial nature. They were not granted to enable a man to start or extend his business, but to meet the pressure of poverty. To the borrower they were a misfortune (Dt $28^{12, 44}$); to the lender a form of charity. Hence the tone of *legislation* on the subject.

Interest is forbidden in all three codes (Ex 22^{25} [JE], Dt 23^{19}, Lv 25^{36} [H]); it was making a profit out of a brother's distress. In Deuteronomy it may be taken from a foreigner. Pledges were allowed, but under strict limitations (Dt 24^{10}, Job 24^{3}). In Dt 15 is a remarkable law providing for the 'letting drop' of loans every seventh year (see Driver, *ad loc.*). Its relation to the law of the Sabbatical year in Ex 23^{10} (JE), Lv 25^{1ff} (H) is not clear, but the cessation of agriculture would obviously lead to serious financial difficulties, and debtors might reasonably look for some relief. This consideration makes for the modern view, that the passage implies only the suspension for a year of the creditor's right to demand payment. It must be admitted, however, that apart from a *priori* considerations the obvious interpretation is a total remission of debts (so the older, and Jewish commentators). Foreigners do not come under the law. The other codes have no parallel, except where the debt may have led to the bondage of the debtor's person.

Historically the legislation seems to have been largely ignored. In 2 K 4^{1-7} a small debt involves the bondage of a widow's two sons (cf Is 50^{1}, Mt 18^{23}), and Elisha helps her, not by invoking the law, but by a miracle. In Neh 5 mortgaged lands and interest are restored under the pressure of an economic crisis. Nehemiah himself has been a creditor and taken interest. There is an apparent reference to Dt 15 in Neh 10^{31}. In later times the strictness of the law was evaded by various legal fictions: Hillel introduced a system of 'contracting out.' That loans played a large part in social life is shown by frequent references in the Prophets, Psalms, and Proverbs (Is 24^{2}, Ps 15^{5} 37^{21}, Pr 19^{17} 28^{8}). Jer 15^{10} shows that the relation between debtor and creditor was proverbially an unpleasant one. In Ps 37^{21} it is part of the misfortune of the wicked that he shall be unable to pay his debts; there is no reference to dishonesty. Pr 22^{7}, Sir 18^{33} warn against borrowing, and Sir 29 has some delightful common sense advice on the whole subject.

2. In NT.—Loans are assumed by our Lord as a normal factor in social life (Mt 25^{27}, Lk 16^{5} 19^{23}). Lk 6^{34f} suggests that the Christian will not always stand on his rights in this respect. *Debt* is used as a synonym for *sin* in Mt 6^{12} (cf the two parables Mt 18^{23}, Lk 7^{41}; and Col 2^{14}). The context of these passages is a sufficient warning against the external and legalistic view of sin which might be suggested by the word itself. Christ does not imply that it is a debt which can be paid by any amount of good deeds or retributive suffering. The word is chosen to emphasize our duty of forgiveness, and it has a wide meaning, including all we owe to God. The metaphor of the money payment has ceased to be prominent, except where it is implied by the context.

C. W. E.—J. W. W.

DECALOGUE.—See TEN COMMANDMENTS.

DECAPOLIS.—Originally a league of ten cities, Greek in population and constitution, for mutual defence against the Semitic tribes around them. It must have come into existence about the beginning of the Christian era; perhaps in the time of Pompey (see GERASA and PERAEA). The original ten cities, as enumerated by Pliny, were Scythopolis, Pella, Dion, Gerasa, Philadelphia, Gadara, Raphana, Kanatha, Hippos, and Damascus. Other cities joined the league from time to time. The region of Decapolis (Mt 4^{25}, Mk 5^{20} 7^{31}) was the territory in which these cities were situated; that is (excluding Damascus), roughly speaking, the country E. and SE. of the Sea of Galilee.

R. A. S. M.—F. C. G.

DECEASE.—The Greek word *exodos* ('exodus,' 'outgoing') is translated 'departure' in Lk 9^{31} and 2 P 1^{15}, *i.e.* departure out of the world. In this sense the Greek word is used also in Wis 3^{2} 7^{6}, Sir 38^{23}. The opposite, *eisodos*, is used of the 'coming' of Christ. The only other occurrence of the Greek *exodos* in NT is in He 11^{22}, of the Exodus from Egypt (AV and RV 'departure' but RSV 'exodus').

DECENTLY.—1 Co 14^{40}, 'All things should be done decently and in order,' that is, in a proper or decorous manner; for that is the old meaning of 'decent,' and it is the meaning of the Greek word used.

DECISION.—Duly constituted and recognized authorities have the power of decision granted to them in all questions of right in the Bible. Moses (Ex 18^{16}), the judges (1 S 7^{16}), and the kings (1 K 3^{16ff}) exercise this power upon occasion. Questions of right between Christian brethren are to be decided by Church courts—*i.e.* either by the Church assembled as a court, or by a judge or judges chosen by the Church—and not by civil authorities (Mt 18^{17}, 1 Co 6^{1-8}). The only method of decision sanctioned in the NT is the exercise of godly judgment on the part of the individual to whom authority has been granted. The casting of lots by heathen soldiers (Mk 15^{24}) and the sortilege of Ac 1^{21-26} cannot

be cited as examples for the Christian Church to follow. See MAGIC. D. A. H.

DECISION, VALLEY OF.—The phrase is found only in Jl 3[14] 'Multitudes, multitudes in the valley of decision; for the day of the Lord is near in the valley of decision.' This valley is evidently the valley of Jehoshaphat mentioned in the preceding context (vv.[2, 12]). The decision is that of Yahweh Himself, His final judgment upon the heathen assembled. The scene of this judgment has been fixed by Jews, Roman Catholics, and Mohammedans in the Valley of the Kidron. The valley of Jehoshaphat has been identified with the Valley of the Kidron since the time of Eusebius. Many scholars are of the opinion that the valley of this prophecy is purely a symbolic one, the valley of 'Yahweh's judgment,' as the Hebrew name *Jehoshaphat* ('Yahweh hath judged') suggests. D. A. H.

DECREE.—What theologians speak of as the 'decrees of God,' and describe as one, immutable, eternal, all-embracing, free, etc., do not receive this designation in Scripture. The equivalents are to be sought for under such headings as ELECTION, PREDESTINATION, PROVIDENCE, REPROBATE. In the EV the term is frequently used in Esther, Ezra, Daniel, with different Hebrew and Aramaic words, for royal decrees (in Dn 6 RV and RSV 'interdict'; in 2[9] RV 'law' [RSV 'sentence'], elsewhere 'decree'). In the NT also the Greek word *dogmata* is employed of decrees of Caesar (Lk 2[1], Ac 17[7]); in Ac 16[4] it is used of decisions of the Church; elsewhere (Eph 2[15], Col 2[20]) it is translated **'ordinances'** (RSV 'regulations' in the latter). The nearest approach to the theological sense of the term is, in OT, in the Hebrew word *ḥôḳ*, ordinarily translated **'statute'** or 'decree' (sometimes 'limit' or 'bound'), which is used in various places of God's sovereign appointments in nature and providence (Job 28[26], Ps 148[6], Pr 8[29], Jer 5[22], Zeph 2[2] [but cf RSV in the last]). The Hebrews had not the modern conception of 'laws of nature,' but they had a good equivalent in the idea of the world as ordered and founded by God's decrees; as regulated by His ordinances (cf Ps 104[5, 9] 119[88-91], Jer 10[12f]). The same word is used in Ps 2[7] of God's 'decree' regarding His king; in Dn 4[17, 24] (Aramaic) we have 'decree' of 'the watchers' and 'the Most High.' J. O.

DEDAN.—A north Arabian people, according to Gn 10[7] descended from Cush, and according to 25[3] from Abraham through Keturah. The combination is not difficult to understand when we remember the Arabian affiliations of the Cushites (see CUSH). In Ezk 25[13] Dedan is placed almost within the Edomite territory, which it must have bordered in the south-east (cf Jer 25[23] 49[8]). The Dedanites were among the Arabian peoples who sent their native wares to the markets of Tyre (Ezk 27[20]). Dedan is probably the oasis of *el-'Ulâ*. In Ezk 27[15] read 'Rodan'=**Rhodes** (so RSV) for 'Dedan.' J. F. McC.

DEDICATION.—See HOUSE, 3.

DEDICATION, FEAST OF THE (Heb. *Ḥ^{a}nukkāh*).—An annual eight-day festival instituted by Judas Maccabaeus. Following his recapture of the Temple in the still beleaguered Jerusalem, he removed the heathen altar that had been set up three years earlier, during Antiochus Epiphanes' campaign of forceful hellenization of Judaea, and restored and rededicated (*ḥ^{a}nukkāh*) the altar of the God of Israel with festivities and illuminations on 25th of Kislev, 165 B.C. (1 Mac 4[59]). The festivities lasted eight days. (According to 2 Mac 10[6-8], the number corresponded to the days of the Feast of Tabernacles, which had not been observed during the Syrian occupation.) The events which the festival commemorated are recorded in 1 and 2 Maccabees and in Josephus, and are referred to in *Megillath Ta'anith*, which includes the feast among the days on which no fasting was to take place. The scholium to this scroll includes the legend, which appears also in the Talmud (Sabbath 21b), concerning the small cruse of consecrated oil which the priests found as they entered the Temple, just enough to feed the *m^{e}nōrāh* (lamp) one day, but which miraculously burned for eight days.

The 25th of Kislev roughly corresponds to the date of laying the cornerstone of the Second Temple (Hag 2[18]), and the number eight to the duration of the feast of the dedication of the Temple by Solomon (1 K 8[63-66]).

The letter of the senate of Jerusalem, recommending to the Jews of Alexandria the observance of Hanukkah, refers to it as 'the feast of fire' because of the miraculous lighting of the altar fire at the time of the Temple dedication by Nehemiah (2 Mac 1[18f]).

The legend of the cruse of oil aims to account for the duration of the festival and for its character as a 'Feast of Lights,' by which name Josephus knew it. This name and its chief ceremonial, consisting of public kindling of lights in a progressive number during the evenings of the festival, seem to point to the earlier observance of a winter solstice festival, which was fused with the Maccabaean feast.

Psalm 30, introduced as 'a song at the dedication of the Temple,' came to form part of the liturgy of the festival. It is also marked by chanting the *Hallel* (Pss 113–118). The Pentateuchal readings for the eight days are taken from Numbers 7 (cf vv.[84-88]). The Prophetic lesson for the Sabbath of Hanukkah is from Zec 2[14-17] (because of the symbolism of the menorah) If a second Sabbath occurs during the festival, the second Prophetic lesson is from 1 K 7[40-50]. Thus the festival is linked with the erection of the Tabernacle and of the First and Second Temples. S. S. C.

DEEP.—See ABYSS.

DEER.—See FALLOW-DEER, HART.

DEFENCED.—In AV and RV 'defenced' means 'provided with fences,' 'protected,' 'fortified.' It is used of fortified cities (Is 25[2] 27[10], Jer 1[18]; 'fortified' in RSV), and in AVm and RVm in Zec 11[2] of a forest (RSV 'thick').

DEFILEMENT.—See CLEAN AND UNCLEAN.

DEGREES, SONGS OF.—See PSALMS.

DEHAITES.—In Ezr 4[9] (RV) the Dehaites (AV **Dehavites**) are mentioned among the peoples settled in Samaria by Osnappar (q.v.). But it is probable that the consonants should be differently vocalized, and the word understood to mean 'that is' (so RSV).

DEHAVITES, Ezr 4[9] (AV).—See DEHAITES.

DEKAR, 1 K 4[9] (AV).—See BEN-DEKER.

DELAIAH.—**1.** One of the sons of Elioenai, 1 Ch 3[24] (AV **Dalaiah**). **2.** A priest and leader of the 23rd course of priests, 1 Ch 24[18]. **3.** The son of Shemaiah, Jer 36[12, 25]. **4.** The son of Mehetabel, and father of Shemaiah, Neh 6[10]. **5.** The head of a family that returned with Zerubbabel, Ezr 2[60], Neh 7[62], 1 Es 5[37] (AV **Ladan,** RV **Dalan**). **6.** Though he is not mentioned in the Bible, we know from the Elephantine Papyri that Sanballat, the adversary of Nehemiah, had a son named Delaiah.

DELILAH.—The Philistine woman who betrayed Samson into the hands of the Philistines. See SAMSON.

DELOS.—A small rocky island in the Aegean Sea, which has played an extraordinary part in history. It belongs to the Cyclades. It was the seat of a widespread worship of Apollo, who, with his sister Artemis, was said to have been born there. In 478 B.C. it was chosen as the meeting-place of the confederacy of Greek States united against their common enemy the Persians, and became a rival of Athens. In the 2nd and 1st cents. B.C. it became a great harbour, and was under Roman protection from 197 to 168 B.C. It flourished greatly after Corinth was destroyed (146 B.C.). It was later a portion of the Roman province Achaia. It is mentioned in the letter of the Romans in favour of the Jews (139–138 B.C., 1 Mac 15[16-23]). It was a great

exchange, where slaves and products from the E. were bought for the Italian market. It was the scene in 87 B.C. of a horrible massacre carried out by Mithridates, king of Pontus, who slaughtered 80,000 Italians of the province of Asia there and in neighbouring islands. Its mercantile position was damaged by the refounding of Corinth in 46 or 44 B.C. A. So.—E. G. K.

DELUGE.—**1. The Biblical story,** Gn $6^{5-9^{17}}$ [6^{1-4} is probably a separate tradition, unconnected with the Deluge (see Driver, *Genesis*, p. 82)]. The two narratives of J and P have been combined; the verses are assigned by Driver as follows: J 6^{5-8} $7^{1-5, 7-10, 12, 16b, 17b, 22, 23}$ $8^{2a-3b, 6-12, 13b, 20-22}$; P 6^{9-22} $7^{6, 11, 13-16a, 17a, 18-21, 24}$ $8^{1, 2a, 3b-5, 13a, 14-19}$ 9^{1-17}. J alone relates the sending out of the birds, and the sacrifice with which Y″ is so pleased that He determines never again to curse the ground. P alone gives the directions with regard to the size and construction of the Ark, the blessing of Noah, the commands against murder and the eating of blood, and the covenant with the sign of the rainbow. In the portions in which the two narratives overlap, they are at variance in the following points. (*a*) In P one pair of every kind of animal (6^{18-20}), in J one pair of the unclean and seven of the clean (7^{2f}), are to be taken into the Ark. (In 7^{9} a redactor has added the words 'two and two' to make J's representation conform to that of P). The reason for the difference is that, according to P, animals were not eaten at all till after the Deluge (9^{3}), so that there was no distinction required between clean and unclean. (*b*) In P the cause of the Deluge is not only rain but also the bursting forth of the subterranean abyss (6^{11}); J mentions rain only (v.^{12}). (*c*) In P the water begins to abate after 150 days (8^{3}), the mountain tops are visible after 8 months and 13 days (7^{11} 8^{5}), and the earth is dry after a year and 10 days (8^{14}); in J the Flood lasts only 40 days (7^{12} 8^{6}), and the water had begun to abate before that.

2. The Historicity of the story.—Efforts to establish the historicity of the Flood by archaeological discoveries are futile. Stories of the finding of remains of the Ark on Mount Ararat crop up every now and then, but even if the finds themselves can ever be authenticated, there is no evidence to connect them with Noah's Ark. Usually, indeed, the stories refute themselves by presupposing things archaeologically impossible. More respectable claims have been made for the thick layers of clay found in Babylonian excavations, particularly at Ur and Kish. That these were deposited by floods is unquestionable, but they were not deposited by the same flood, since they are demonstrably from different periods, and other sites in the region have no such deposits from any of these periods. The inundations in question were therefore evidently of a local nature. The modern study of geology and comparative mythology has made it impossible to see in the story of the Deluge the literal record of an historical event. The fact that marine fossils are found on the tops of hills cannot be used as an argument, for, though it proves that some spots which are now at the tops of hills were at one time submerged, that is not equivalent to asserting that a flood ever occurred which covered the whole planet—apart from the extreme improbability that the submergence of mountains was within the period of man's existence. All the water in the world, together with all the vapour if reduced to water, would not cover the whole earth to the height of Mount Ararat. The collection by Noah of a pair of every kind of animal, bird, and creeping thing, which would include species peculiar to different countries from the arctic regions to the tropics, is inconceivable. And no less so the housing of them all in a single chest, the feeding and care of them by eight persons, the arrangements to prevent their devouring one another, and the provision of the widely diverse conditions of life necessary for creatures from different countries and climates. From every point of view it is clear that the story is legendary, and similar in character to the legends which are found in folk-lore of all peoples.

3. Other Flood-stories.—Such stories are found principally in America, but also in India, Cashmir, Tibet, China, Kamschatka, Australia, some of the Polynesian Islands, Lithuania, and Greece. In the great majority of cases the flood is caused by some startling natural phenomenon, which often has a special connexion with the locality to which it belongs; *e.g.* the melting of the ice or snow, in the extreme N. of America; earthquakes, on the American coastlands where they frequently occur; the submergence or emergence of islands, in districts liable to volcanic eruptions; among inland peoples the cause is frequently the bursting of the banks of rivers which have been swollen by rains. Sometimes the stories have grown up to account for various facts of observation; *e.g.* the dispersion of peoples, and differences of language; the red colour, or the pale colour, of certain tribes; the discovery of marine fossils inland, and so on. In some cases these stories have been coloured by the Bible story, owing to the teaching of Christian missionaries in modern times, and often mixed up with other Bible stories, and reproduced with grotesque details by local adaptation. But there are very many which are quite unconnected with the story of Noah. (For a much fuller discussion of the various flood-stories see the valuable article 'Flood' in Hastings' *DB* ii.). It is reasonable, therefore, to treat the Hebrew story as one of these old-world legends, and to look for the cause of it in the natural features of the land which gave it birth. And we are fortunate in the possession of an earlier form of the legend, which belongs to Babylonia, and makes it probable that its origin is to be ascribed to the inundation of the large Babylonian plain by the bursting forth of one of the rivers by which it is intersected, and perhaps also, as some think, to the incursion of a tidal wave due to an earthquake somewhere in the South. This, among a people whose world was bounded by very narrow limits, would easily be magnified in oral tradition into a universal Deluge.

4. The Babylonian story.—(*a*) One form of the story has long been known from the fragments of Berosus, an Egyptian priest of the 3rd cent. B.C. It differs in certain details from the other form known to us; *e.g.* when the birds return the second time, clay is seen to be attaching to their legs (a point which finds parallels in some N. American flood-legends); and not only the hero of the story, Xisuthros, and his wife, but also his daughter and the pilot of the ship are carried away by the gods.

(*b*) The other and more important form is contained in Akkadian cuneiform tablets in the British Museum, first deciphered in 1872. It is part of an epic in 12 parts, each connected with a sign of the Zodiac; the Flood story is the 11th, and is connected with Aquarius, the 'water-bearer.' Gilgamesh of Uruk (Erech, Gn 10^{10}), the hero of the epic, contrived to visit his ancestor Ut-napishtim, who had received the gift of immortality. The latter is in one passage called Adra-ḫasis, which being inverted as Ḫasis-adra appears in Greek as Xisuthros. He relates to Gilgamesh how, for his piety, he had been preserved from a great flood. When Bel and three other gods determined to destroy Shurippak, a city 'lying on the Euphrates,' Ea warned him to build a ship. He built it 120 cubits in height and breadth with 6 decks, divided into 7 storeys, each with 9 compartments; it had a mast, and was smeared with bitumen. He took on board all his possessions, 'the seed of life of every kind that I possessed,' cattle and beasts of the field, his family, servants, and craftsmen. He entered the ship and shut the door. Then Ramman the storm-god thundered, and the spirits of heaven brought lightnings; the gods were terrified; they fled to heaven, and cowered in a heap like a dog in his kennel. On the 7th day the rain ceased, and all mankind were turned to clay. The ship grounded on Mount Nisir, E. of the Tigris, where it remained 6 days. Then Ut-napishtim sent forth a dove, a swallow, and a raven, and the last did not return.

He then sent the animals to the four winds, and offered sacrifice on an altar at the top of the mountain. The gods smelled the savour and gathered like flies. The great goddess Ishtar lighted up the rainbow. She reproached Bel for destroying all mankind instead of one city only. Bel, on the other hand, was angry at the escape of Ut-napishtim, and refused to come to the sacrifice. But he was pacified by Ea, and at length entered the ship, and made a covenant with Ut-napishtim, and translated him and his wife to 'the mouth of the rivers,' and made them immortal.

The similarities to the Hebrew story, and the differences from it, are alike obvious. It dates from at least 3000 B.C., and it would pass through a long course of oral repetition before it reached the Hebrew form. And herein is seen the religious value of the latter. The genius of the Hebrew race under Divine inspiration gradually stripped it of all its crude polytheism, and made it the vehicle of spiritual truth. It teaches the unity and omnipotence of Y"; His hatred of sin and His punishment of sinners; but at the same time His merciful kindness to them that obey Him, which is shown in rescuing them from destruction, and in entering into a covenant with them.

5. It is strange that, apart from Gn 9^{28} $10^{1,32}$ 11^{10}, there are only two allusions in the OT to the Flood, Is 54^{9} and Ps 29^{10} (the latter uncertain; see commentaries). In the Apocrypha: 2 Es 3^{9f}, Wis 10^{4}, Sir 44^{17f} (40^{10} in LXX, but not in Hebrew). In the NT: Mt 24^{38f}, Lk 17^{27}, He 11^{7}, 1 P 3^{20}, 2 P 2^{5}.

A. H. McN.—M. B.

DELUS.—AV form of Delos (q.v.).

DEMAS (=Demetrius?).—A companion of St. Paul in an imprisonment (Col 4^{14}, Phn ^{24}). According to the Pastoral Epistles, he deserted the Apostle, 'being in love with this present world' (2 Ti 4^{10}). It has been conjectured, on the basis of this same allusion, that he was a native of Thessalonica. A. J. M.—J. K.

DEMETRIUS.—1. *Soter*, the son of Seleucus *Philopator*. In his boyhood he was sent (175 B.C.) to Rome as a hostage, but made his escape after the death of his uncle, Antiochus Epiphanes. Landing at Tripolis, he was joined by large bodies of the people, and even by the bodyguard of his cousin, Antiochus Eupator. Eupator was soon defeated and put to death, and in 162 B.C., Demetrius was proclaimed king (1 Mac 7^{1-4}, 2 Mac 14^{1f}; Jos. *Ant.* XII. x. 1 [389 f]). After seven years, Alexander Balas (q.v.) was set up as a claimant to the crown of Syria (153 B.C.); and he and Demetrius competed for the support of Jonathan (1 Mac 10^{1-21}; Jos. *Ant.* XIII. ii. 1–3 [35 ff]). Balas prevailed in spite of the attempts of his rival to outbid him (1 Mac 10^{25-45}). In 150 B.C. a decisive engagement took place, in which Demetrius was defeated and slain (1 Mac 10^{48-50}; Jos. *Ant.* XIII. ii. 4 [58–60]).

2. *Nicator*, sent by his father, D. *Soter*, for safety to Cnidus after the success of Balas seemed probable. After several years of exile he landed (147 B.C.) with an army of Cretan mercenaries on the Cilician coast, and finally inflicted a fatal defeat upon Balas (145 B.C.) on the banks of the Oenoparas, from which event Demetrius derived his surname (1 Mac 11^{14-19}; Jos. *Ant.* XIII. iv. 8 [116 f]). He bought off the opposition of Jonathan by the addition of three Samaritan provinces to Judaea, and the exemption from tribute of the country thus enlarged (1 Mac 11^{20-37}; Jos. *Ant.* XIII. iv. 9 [124–128]). After varying fortunes in the war with Trypho (q.v.) Demetrius invaded the dominions of the king of Parthia, by whom, in 140 B.C., he was taken prisoner (1 Mac 14^{1-3}). Upon regaining his liberty at the end of ten years, he undertook a war against Ptolemy *Physcon* of Egypt. Having been defeated by Zabinas at Damascus, he fled to Ptolemais, and thence to Tyre, where in 125 B.C. he was murdered (Jos. *Ant.* XIII. ix. 3 [268]), possibly at the instigation of his wife Cleopatra (Appian, *Syr.* 68; Livy, *Epit.* lx.).

3. *Eucaerus*, grandson of D. *Nicator*. On the death of his father he established himself in Coele-Syria, with Damascus as his capital (Jos. *Ant.* XIII. xiii 4 [370]). When civil war broke out between Alexander Jannaeus and his Pharisee subjects, the latter invited the assistance of Demetrius (Jos. *Ant.* XIII. xiii. 5 [372–376], *BJ* I. iv. 4 [92]), who defeated Jannaeus in a pitched battle near Shechem (Jos. *Ant.* XIII. xiv. 1 [377 f], *BJ* I. iv. 5 [93–95]). After a chequered career, Demetrius fell into the hands of the Parthians, by whom he was detained in captivity until his death (Jos. *Ant.* XIII. xiv. 3 [385 f]).

4. 5. Two persons of the name are mentioned in NT—the ringleader in the riot at Ephesus (Ac 19^{24}), and a disciple commended in 3 Jn ^{12}. Probably the same name occurs in a contracted form as *Demas*.

S. M.—F. C. G.

DEMONS AND DEMONOLOGY.—In common with most ancient peoples, the Biblical writers believed in the existence of spiritual beings capable of exerting a malign influence on human affairs. **1. Terminology**—The most general term for a being of this kind is 'demon' (Gr. *daimōn*). The etymology of this word is uncertain. In the earliest Greek usage, it meant a divine being. Then the demons came to be understood as beings intermediate between the gods and men, often as the companions or guardians of particular men. Such demons might be either good or bad. The final stage in the development of the term was reached when all demons came to be recognized as evil. This stage had, of course, already been reached when the term was used in the NT. The word 'demon' does not occur in AV, where it is represented by 'devil.' In RV it is substituted for 'devil' in the margin of many passages and also occurs twice in the text (Dt 32^{17}, Ps 106^{37}), representing a word denoting a species of genii or demi-gods who were conceived as invested with power for good or evil, and to whom even human sacrifices were offered. In RSV 'demon' is used in the text as the general term for a malevolent spiritual being, while 'devil' is reserved for Satan, and this procedure restores the diversity of terminology found in the NT.

The term 'devil' is also of Greek origin (=*diabolos*). Meaning the 'accuser,' it came to stand for the accuser and traducer of men, the supreme spirit of evil, and even the enemy of God. As noted above, the term takes the place of 'demon' in AV, but is primarily applied, as in RSV, to the chief or prince of the demons, who is known also by various proper names (see SATAN; BAALZEBUB).

We notice also the terms 'evil spirit,' 'lying spirit,' 'unclean spirit.' In the OT an evil spirit is represented as being sent by God. The treachery of the men of Shechem is so explained (Jg 9^{23}), also Saul's moodiness (1 S 16^{14}) and his raving against David (1 S 18^{10} 19^{9}). Micaiah speaks of a 'lying spirit' from God (1 K 22^{21-23}, 2 Ch 18^{20-23}). These spirits, therefore, are represented as under the control of God, but in some of the writers this control is more direct and active, in others more permissive. But God's supreme control is recognized by all, and in using or permitting the activity of these spirits God is assumed or asserted to be punishing people for their sins. In that sense God has 'a company of destroying angels' (Ps 78^{49}). As the understanding of God's nature and purpose developed, the activity of these spirits was conceived more and more in a permissive way. Thus, whereas David was incited to number Israel through the anger of the Lord against the people (2 S 24^{1}), according to the Chronicler it was Satan who instigated David (1 Ch 21^{1}). Jeremiah denies the inspiration of lying prophets, and makes them entirely responsible for their own words and influence ($23^{16,21,25f}$). They are not used by God, and will be called to account. They speak out of their own heart, and are so far from executing God's justice or anger upon the wicked that He interposes to check them, and to protect men from being misled. Thus the idea of an 'evil spirit' moves gradually from the conception of an angel of God to that of a quasi-independent force working against God, though powerless to withdraw

from God's ultimate control. This is the sense in the NT, where St. Luke uses the expression 'evil spirit' as a synonym for 'demon' (7[21] 8[2], Ac 19[12, 13, 15, 16]). Another common expression in the Synoptic Gospels is 'unclean spirit.' Since the demons are usually represented in the Synoptic Gospels as the cause of physical rather than moral evils, we may suppose that the adjective 'unclean' refers rather to the wretched state of the victim than to moral or ceremonial defilement.

2. History and Development.—Ancient Semitic demonology recognized a host of spirits, most of which were probably regarded as hostile. An important class of these were embodied in animals, especially in animals found in lonely places—in the desert, among tombs, in ruined houses. There are traces of these beliefs in the OT—the serpent in Gn 3[15], the satyrs (Lv 17, 2 Ch 11[15], Is 13[21] 34[14]), the night hag (Is 34[14], cf Ps 91[5]), Rahab (Is 51[9]), Behemoth (Job 40[15ff]), Leviathan (Job 41[1ff], Ps 74[14] 104[26], Is 27[1]), and the catalogue of animals in Is 34. The enigmatic figure of Azazel (Lv 16[8ff]) may come into the same category. Very diverse activities were ascribed to these early demons, especially any 'unnatural' happening or mischance, and above all, sickness, madness, and death.

Further development took place under various foreign influences—Babylonian, Persian, Greek. In Judaism the range of demonic beings is increased to take in a host of invisible bodiless spirits, for Babylonian and Persian thought had made familiar the idea of a multitude of spiritual beings with graded powers. To these demons were attributed all ills, moral as well as physical. They came to be thought of as organized in their own kingdom, under the leadership of Satan, but it is important to notice that since Satan was conceived as a fallen angel, not as an independent spirit like the Persian Ahriman, we never arrive at a thoroughgoing dualism, for God is always supreme. Another important idea, which later became very prominent in the Early Church, was that the heathen gods are demons (Dt 32[17], Ps 106[37], cf Ps 96[5]).

It was against the background of this fully developed demonology that the NT was written, yet its references to demons are remarkably restrained and avoid the crudities which are so common in later Christian writings. As already noted, the Synoptic Gospels represent the demons primarily as producing physical evils (including madness). Yet they are under the rule of the prince of demons whose activities are more definitely in the moral sphere. It is he who tempts Christ (Mt 4[1ff], Lk 4[2ff]), and in the parables sows tares (Mt 13[39]) and snatches up the good seed (Lk 8[12]). He thus appears as the enemy of God's good purposes. In the Fourth Gospel, the subordinate demons tend to fall into the background, and demonic activity is concentrated in the person of the devil. It is he who prompts the treason of Judas (13[2]) and he is described as a liar and a murderer (8[44]). St. Paul refers to the belief that the pagan deities are demons (1 Co 10[20]). For him, the activities of demonic powers are primarily in the moral and spiritual sphere. But he speaks of these demonic powers as 'rulers of this age' (1 Co 2[6, 8]), 'principalities' (Ro 8[39], Col 2[15]) under the 'god of this world' (2 Co 4[4]). The language is that of dualism and some scholars assign to it a Gnostic origin, but we are also told that 'thrones,' 'dominions,' 'principalities,' 'authorities' are all created (Col 1[16]) and there is certainly no absolute dualism in St. Paul's thought. St. James (2[19]) speaks also of demons in a way which shows them as ultimately subject to God. The idea that the demons inhabit the air appears in Eph 2[2]. In this epistle, and also in 1 P (5[8]) and Rev (2[18] 12[9ff] 20[10]) the tendency is, as in the Johannine literature, to emphasize the place of Satan so that the lesser demons are not so prominent. (See SATAN.)

3. Significance.—The final picture which emerges represents the superhuman evil of the world in terms of an organized realm of evil set over against God. The 'dominion of darkness' is contrasted with 'the kingdom of his [God's] beloved Son' (Col 1[13]), the devil is the 'ruler of this world' and Christ's kingdom is contrasted with it (Jn 12[31] 18[36]). Yet nowhere is there anything like an exact co-ordination of the two. The representation is not that of a dualism, but that of the revolt of a subordinate, though superhuman power. Even now, this power is broken (Jn 16[11], Col 2[15]) and its defeat will be final and complete (1 Co 15[24ff]). See BAALZEBUB, and EVIL SPIRITS. See also EXORCISM; POSSESSION; SATAN.

J. Macq.

DEMOPHON (2 Mac 12[2]).—A Syrian commandant in Palestine under Antiochus *Eupator*.

DEN.—The six Hebrew or Aramaic words represented by 'den' signify respectively 'hollow place,' 'cave' (Is 32[14], Jer 7[11]; cf Mt 21[13] and ||s), 'thicket' (Ps 10[9] AV, RV; RSV 'covert'), 'place of ambush' (Job 37[8] AV; RV 'covert'; RSV 'lair'), 'hiding place' (Job 37[8] RV, RSV; AV 'places'), 'place of light' (Is 11[8]; but the text may be corrupt), 'pit' (Dn 6[7]).

DENARIUS.—See MONEY, 6, 7.

DEPUTY.—**1.** AV of Est 8[9] 9[3] (RV, RSV 'governor') as translation of *peḥāh*. See GOVERNOR. **2.** RV of Jer 51[23, 28] (AV 'ruler'; RSV 'commander'), Dn 3[2f, 6[7] (AV 'governor'; RSV 'prefect' as translation of *sāgān* or its Aramaic equivalent. The term denotes in these passages a superior official or prefect of the Babylonian Empire. It is applied elsewhere (Ezr 9[2], Neh 2[16] 4[14, 19] etc.) to petty officials in Judah (RVm 'deputies'; AV, RV 'rulers'; RSV 'chief man' or 'officials'). **3.** AV, RV and RSV of 1 K 22[47] as translation of *niṣṣābh* (literally one set up *or* appointed), used of the vassal-king of Edom. **4.** AV of Ac 13[7f. 12] 18[12] 19[38] (RV, RSV 'proconsul') as translation of Greek *anthupatos*.

DERBE.—A city in the ethnic district Lycaonia and in the region Lycaonia-Galatica of the Roman province of Galatia. It lay on the road from the Cilician Gates to Lystra and Iconium. The city belonged for a while to Antipater, friend of Cicero, but was then annexed by Amyntas, king of Galatia in 27 B.C. and formed part of the province of Galatia as at first organized in 25 B.C. after the death of that ruler. Eventually, along with Laranda, it seems to have passed under the rule of Antiochus of Commagene. It was honoured with the prefix *Claudio-*. It was in that period that St. Paul visited it (Ac 14[6]), and then retraced his steps to Lystra (q.v.). On his second and third journeys he came to Derbe first, coming from Cilicia. Gaius of Derbe was one of Paul's helpers (Ac 20[4]). The Lycaonian tongue was still spoken at Derbe (Ac 14[11]). Second cent. coins of Derbe are known. The site of the city seems now to have been recovered through an inscription found in 1956 at *Kerti Hüyük*, 13 miles from *Karaman*. It thus lay NNE. of Laranda, and not as close to Lystra as had been supposed. The site is in a plain that was marshy until recently.

DESCENT INTO HELL.—In the OT 'hell' (Heb. *she'ōl*, Gr. *Hadēs*) is the shadowy nether world which is the dwelling place of the dead. Initially it is morally neutral, but later it is identified at times with Gehenna, a place of torment for the wicked. Our Lord makes use of this connotation in the NT. In the parable, Dives is said to be in torment whereas Lazarus is represented as in the company of Abraham (Lk 16[19–31]). It should, however, be observed that it is not the point of the parable to describe the nature of hell. The promise to the penitent robber (Lk 23[43]) raises the problem implicit in the parable: how far and in what sense Jesus accepted or sanctioned the conventional doctrine of his day.

Ac 2[24–31] certainly suggests apostolic belief that Christ himself passed at his death into Hades. The descent of a redeemer into the underworld may be exemplified outside the Jewish sphere (*e.g.* the Babylonian Ishtar, the Greek mysteries, and Mandaism), but no direct connexion with non-Jewish sources has been established. In the passage cited, Peter alludes to Ps 16[10]: 'For thou

wilt not abandon my soul to Hades.' This is taken as a prophecy of the Resurrection. Paul wrote in Ro 10[7] to the effect that since Christ has risen from the dead there is no need to 'descend into the abyss' to bring Him up (cf Dt 30[13]). Eph 4[9] is more ambiguous ('In saying "He ascended" what does it mean but that he also descended into the lower parts of the earth?'): this has been taken by some to refer not to His descent into Hades but to His descent in the Incarnation (cf Gnostic parallels). But Ps 63[9] has the phrase 'shall go down into the depths of the earth' meaning Hades, so the NT passage may also be understood in this sense. The implication would then be that through obedience even unto death Christ became Lord of the underworld also, His descent being an assertion of this Lordship. Cf Ph 2[10] and Rev 1[18].

Rudolf Bultmann denies that the crucial passage 1 P 3[18-20] originally referred to a descent into hell; but it has traditionally been considered in this light. It runs: 'For Christ also died for sins once for all, the righteous for the unrighteous, that he might bring us to God, being put to death in the flesh but made alive in the spirit; *in which he went and preached to the spirits in prison*, who formerly did not obey, when God's patience waited in the days of Noah, during the building of the ark, in which a few, that is, eight persons, were saved through water.' (Bultmann alludes to a Gnostic myth in which the prison of the dead is in the *air*.)

There is evidence of a Jewish belief that a time of repentance would be allowed to the sinners who perished in the Flood; and until the time of Augustine Christian interpretations followed the line that Christ preached to their spirits. Augustine himself suggested that it was Christ *in Noah* who preached to these men of Noah's time.

Mention in *Enoch* of preaching punishment to the fallen angels has led a number of critics in more modern times to link this passage with that, particularly since 2 P 2[4] and Jd [6] show the acquaintance of the early Christians with such apocryphal literature. But *Enoch* says nothing of preaching repentance or salvation to the souls of the departed, which is required by the context, and particularly by 1 P 4[6], 'For this is why the gospel was preached even to the dead, that though judged in the flesh like men, they might live in the spirit like God.'

The connexion with *Enoch* has led also to the notable conjecture of Rendel Harris (followed by James Moffatt and others) that in 3[19] *en hō kai* should be followed by *Enōch*, omitted by haplography. But there is no MS evidence to back this up and traditional interpretations from Patristic times onwards may be placed against it. Moreover the Christian 'New Testament Apocrypha' develop the notion of the descent of Jesus Christ (M. R. James, *The Apocryphal New Testament*: index).

In the present state of scholarship it may fairly be said that the concept, known traditionally as the Harrowing of Hell, can be regarded as a product of apocalyptic thought-forms dominant in the Jewish-Christian world of apostolic times. Its validity for credal dogma and as the basis of conceptions such as limbo has to be examined—*e.g.* in the light of Bultmann's interpretation of such facets on the 'first century world-view' as myth which is existentially significant. Many would represent it (whatever categories they use) as a natural attempt to vindicate the love, power, and justice of God towards those who could not know Christ in the flesh. J. C. G. G.

DESERT.—See WILDERNESS.

DESSAU.—A village where an encounter took place between the Jews and Nicanor, 2 Mac 14[16] (RV **Lessau**). The site is unknown, and the text is uncertain.

DESTROY (utterly).—See BAN.

DEUEL.—Father of Eliasaph, leader of Gad, Nu 1[14] 7[42, 47] 10[20]; also 2[14] (AV, RV **Reuel**).

DEUTERONOMY.—1. Place in the Canon.—Deuteronomy is the fifth book of the Torah, the first division of the Hebrew canon. It is likely that at one time it formed the first part of the Deuteronomist history of Israel, which continued through Joshua, Judges, 1 and 2 Samuel, and 1 and 2 Kings (see article on JOSHUA, BOOK OF).

2. Contents.—The nucleus of the book is a code of laws, represented as having been promulgated by Moses in a speech delivered east of the Jordan just before his death. This begins with a reference to the covenant made at Horeb, rehearses the Decalogue given there, exhorts the people to obey its commands (ch. 5), and passes into a further exhortation to obey the laws about to be proclaimed (6[1]–11[25]). In this Moses affirms the unity of Yahweh (6[4]) who is the God of the whole earth (10[14, 17]) and who has taken Israel to be His people (7[6] 10[15]) and cared for them (8[2-4, 14b-16]), not for any merit of theirs—for they are stubborn and rebellious (9[6]–10[5, 10f])—but because of the promise He made to their forefathers to give the land to their descendants (6[10] 7[7-9]), a promise He is now about to fulfil (7[1f, 17-24] 8[7-10, 17f] 9[1-3]). Israel's obligation is to serve Him only and to keep His commandments (6[5-9, 13, 16-18, 20-25] 8[6] 10[12f] 11[13, 18-20]). If they do this it will be well with them (6[18f] 7[11-15] 8[1] 11[9-15, 21-25]), but if they forget Him and serve other gods He will destroy them (6[12, 14f] 7[2-5, 16, 25f] 8[11-14, 19f] 11[16f]). A command, pointing ahead to ch. 27 and Jos 8[30ff], to set a blessing on Mount Gerizim and a curse on Mount Ebal when they have crossed the Jordan to take possession of the land (11[26-32]) is followed by the code (12[1]–26[15]), with a brief concluding exhortation (26[16-19]).

The recurrence of the various themes in 6[1]–11[25] and the awkward way in which the story of the golden calf (9[8]–10[11]) is introduced into the exhortation suggest that the present form of the introductory speech is an expanded version of a more concise original, whether the expansion was by casual redactional addition from time to time or by conflation with a parallel introduction.

Preceding this speech is an historical sketch of events from Israel's departure from Horeb until their arrival in the valley by Beth-peor (1[6]–3[29]), cast in the form of another speech delivered by Moses beyond the Jordan (1[1–5]). This is substantially a unity, and may have been written as an introduction to the deuteronomist history of Israel referred to above. At any rate it stands outside the immediate introduction to the code and it is presumably by another than the author of that part of chs. 5–11 from which 5[3] (cf 11[2ff]) is derived; for 5[3] represents Moses as speaking to the men with whom Yahweh had made His covenant at Horeb whereas 1[35ff] 2[14-16] state that all these men were dead with the exception of Caleb and Joshua. The sketch passes into an exhortation to the people to obey the statutes and ordinances about to be proclaimed (4[1-40]), and this is followed by a notice of the setting apart of three cities of refuge E. of the Jordan (4[41-43]), and two sentences introducing the code (4[44, 45-46a]), which, however, are left hanging in the air for they lead up only to a summary of events (4[46b-48]) already recounted at some length in 2[26]–3[8].

What the relation of 4[1-40] is to chs. 5–11 it is difficult to say. Its argument is a summary of the argument of chs. 6–11, and indications are not wanting that it may not be a unity: *e.g.* 4[23] (cf vv.[10, 33]) refers to 'the covenant of the Lord your God which he made with you,' but 4[31] speaks of 'the covenant with your fathers which he swore to them.' This may indeed be an allusion to Yahweh's promise to Abraham, Isaac, and Jacob (cf 6[9] 7[8]), but this promise is not referred to as a 'covenant' elsewhere in Deuteronomy. Furthermore, the implication of 4[10-14] is that the deuteronomic code was delivered to Moses by Yahweh at Horeb, and so that its authority was equal to that of the ten words which Yahweh had spoken at that time. The same claim is made in ch. 5, and this suggests that the chapters originally stood in different contexts. The meaning of 4[3], 'Behold, I have taught you statutes,' etc., is ambiguous, but if it refers to the code of Deuteronomy it

indicates that 4[1-40], in whole or in part, originally came not before but after the code. Certainly 4[41-43] would better follow than precede 19[1-13].

Following the speech containing the code is an account of Moses commanding the people to erect an altar on Mount Ebal 'on the day you pass over the Jordan,' and in a solemn ceremony to lay a curse upon those who shall break the laws just promulgated (ch. 27). This charge passes into an enumeration of the blessings which Yahweh will pour out upon the nation if they keep the law (28[1-14]), followed by a warning of the dire consequences of disobedience (vv.[15-68]). Moses then summons all Israel again to remind them of what Yahweh has done for them in the past and to warn them of the fate awaiting them if they fail to keep the terms of the 'sworn covenant of the Lord your God which the Lord your God makes with you this day' (29[2-29])—a covenant which supplements that made at Horeb (29[1]). He then goes on to assure them that Yahweh will always be ready to forgive them if they turn back to Him in their distress (30[1-14]), and puts before them the choice they must now make between 'life and death, blessing and curse' (30[11-20]).

There can be no doubt that at one stage in the history of the material 28[2] followed immediately on 26[19], the substance of which, 'the Lord will set you on high above all the nations of the earth,' is repeated in 28[1]. That is to say, ch. 27 is derived from another tradition than 26[16-19] 28[2ff]. The nucleus of vv.[1-8] appears to have been taken from the older (JE) history; the account of the fulfilment of the command it contains is now found in Jos 8[30ff]. Vv.[9f] connect vv.[1-8] with vv.[11-26] in which a liturgy of some kind is preserved. Similarly ch. 29 breaks the connexion between chs. 28 and 30. Its intent appears to be to make explicit the fact that the code, like the Decalogue in ch. 5, is the basis of a covenant (vv.[10-15]), to insist upon the obligation of the individual Israelite to conform to it (vv.[18-21]), and to interpret the exile as the consequence of the failure of the nation to fulfil its requirements (vv.[22ff]). The fact that the material in these two chapters comes where it does can only be due to the exigencies of conflation.

Chs. 28 and 30 provide a conclusion to the speech in 5[1]–26[19]. The indications are that it is the result of expansion from time to time. The blessings in 28[2-6] are balanced by the curses in vv.[15-19]; but where the exposition of the blessings comprises only eight verses ([7-14]) that of the curses runs through forty-nine verses ([20-68]). There is furthermore considerable repetition in this latter section: diseases of the body are referred to in vv.[21-22a, 27, 35, 59-62]; natural disaster affecting crops and animals in vv.[22b-24, 38-40, 42]; enemy action in vv.[29b-34, 36f, 41, 47-57, 63-68]; 30[1-10] with its promise of restoration on repentance quite destroys the effect of the picture of hopeless misery presented in 28[20-68]; and 30[11ff] does not connect smoothly with vv.[1-10], which, indeed, are not presupposed by v.[18].

Chs. 31–33 are in the nature of a supplement. In addition to an account of Moses' last days (31, 32[44-52]), they contain a song which he is represented as having composed and recited to the people (32[1-43])—a didactic poem giving an interpretation of Israel's entire history and bearing traces of influence from the Wisdom Literature; and the blessing with which he blessed Israel (ch. 33), composed of oracles on the several tribes, with an introduction and a conclusion. Ch. 34 records Moses' death.

There can be no doubt that the framework to the code (1[1]–11[32] 26[16]–34[12]) has a somewhat complicated literary history the pattern of which it is difficult to recover. The code itself is also the result of elaboration, and it is reasonable to suppose that the pattern of this may throw some light upon the structure of the framework.

The first law in the code is the so-called law of the central sanctuary (12[5-25]), which lays it down that sacrifice may legitimately be offered to Yahweh only in the place which He 'will choose out of all your tribes to put his name there.' One version of this is contained in vv.[5-7, 17-25], and a second in vv.[11-14, 26-28]. The difficulty to which this law would give rise—that it would make it impossible for anyone to eat meat at home—is met by the permission to kill and eat animals apart from the context of sacrifice provided the blood is not eaten; this permission is also given twice (vv.[15f, 20-25]).

Wherever sacrifice is mentioned in the laws which follow the requirement that it shall be offered in the place which the Lord shall choose is repeated (15[20] 16[2, 6, 10f, 15f] 26[2]). But here there is a difficulty, for in three places it is explicitly laid down that the sacrifice shall be eaten by the offerer and his household (15[19] 16[11, 14]); the household must accordingly be present at the sacrifice, an obvious impossibility if it was offered at the central sanctuary. These laws are, moreover, found, without mention of the central sanctuary, in Ex 34[19-22]; they are thus earlier than Deuteronomy, and were adapted to their new setting by the compiler of the code.

The laws in the code seem to be arranged in no logical order. The law of the central sanctuary is followed not by the laws concerning the cult, as might have been expected, but by a number of laws prescribing death for anyone who tries to entice an Israelite to idolatry (12[29]–13[18]). Then comes a prohibition of certain mourning customs (14[1f]); a series of dietary laws (vv.[3-21]); laws of the tithe (vv.[22-29]), of the year of release (15[1-11]), of the manumission of Hebrew slaves (vv.[12-18]), of firstlings (vv.[19-23]), and of the annual festivals (16[1-17]). These are followed by directions concerning the administration of justice (16[18-20] 17[2-13]), in the middle of which are three laws, completely unrelated to the context, prohibiting the planting of a tree, or the erection of a pillar, beside the the altar of Yahweh, and the offering of a blemished animal in sacrifice (16[21-17[1]]). Related to the laws on the administration of justice are the laws concerning official persons: the king (17[14-20]), the Levitical priests (18[1-8]), and the prophets (18[15-22]). Again the series is interrupted by the prohibition of magic and soothsaying (18[9-14]). Laws prescribing the setting apart of cities of refuge and dealing with the right of sanctuary (19[1-13]) are followed by an isolated command not to remove a neighbour's landmark (v.[14]). Then comes a law against false witness (vv.[15-21]), which might have been expected after 17[13]. Laws concerning warfare follow (20[1-20] 21[10-14]) in the middle of which is laid down the procedure for the expiation of an unknown murderer's crime (21[1-9]). Two laws on family relations (21[15-21]) are followed by a law requiring that the body of a criminal be buried on the day he is executed (21[22f]). This in turn is followed by a law laying down what a man should do when he finds a straying animal belonging to another (22[1-4]). Four laws concerning chastity (22[13-21, 22, 23-27, 28f]) and one against incest (22[30]) are followed by four laws excluding certain classes of people from 'the assembly of the Lord' (23[1-8]), two of them for reasons having to do with sex; but the principle on which the laws which follow are arranged is not immediately apparent: two laws having to do with ritual cleanness in camp during warfare (23[9-14]), which would have been expected after 21[14]; laws concerning an escaped slave (vv.[15f]), prohibiting cult prostitution, male or female (vv.[17f]), prohibiting the taking of interest (vv.[19f]), concerning vows (vv.[21-23]), concerning gleaning (vv.[24f]), prohibiting a man from again marrying his divorced wife (24[1-4]), exempting a newly married man from military service for a year (v.[5]), concerning a pledge for a loan (v.[6]), which would fit better after 23[20]; and seven miscellaneous laws (vv.[5-12]): a woman is not to wear a man's clothing or a man a woman's (v.[5]), young birds or eggs may be taken from a nest, but not the mother (vv.[6f]), the roof of a house must have a parapet (v.[8]), crops may not be sown in a vineyard (v.[9]), ox and ass may not be yoked together (v.[10]), clothing may not be of mingled stuff (v.[11]), tassels are required on a cloak (v.[12]). The laws in vv.[6-8] break the connexion between those in v.[5] and vv.[9-11], which are obviously related to each other. These

are followed by a law against abducting a man and selling him into slavery (v.7), which would have come better after 15[18]; laws concerning leprosy (vv.[8ff]), concerning pledges for a loan (vv.[10–13]), related to that in 24[6], concerning the payment of a hired servant (vv.[14f]), two more laws concerning the administration of justice (vv.[16–18]), which would seem to belong with 16[18ff] 17[2ff] 19[15–21]; on gleaning (vv.[19–22]), related to that in 23[24f], and still another on the administration of justice (25[1–3]). After a law against muzzling an ox when it treads out the grain (v.4), completely unrelated to its context, comes the law concerning levirate marriage (vv.[5–10]), a law concerning a woman who seizes a man fighting with her husband 'by the private parts' (vv.[11f]), a law concerning just weights and measures (vv.[13–16]), and a command to 'blot out the remembrance of Amalek from under heaven' (vv.[17–19]). The code closes with a law concerning the offering of first-fruits and the disposition of the tithe (26[1–15]).

It is difficult to determine to what extent this disorder is due to the addition of other laws to an original deuteronomic code, and to what extent it is due to the haphazard introduction of new laws from time to time into the earlier codes from which the compilers of the deuteronomic code presumably derived much of their material. A number of scholars who believe that it is for the most part due to additions to an original deuteroonmic code have endeavoured to reconstruct this by putting to one side laws which break the connexion between two related laws (*e.g.* 16[21]–17[1] between 16[18–20] and 17[2ff]), and by taking account of the alternation of singular (thou/thee) and plural (you) in certain laws (*e.g.* 12[2–12, 16, 32], plural; vv.[13–15, 17–31], singular; 13[1–3a, 5aγb], singular; vv.[3b–5aαβ], plural). None of these attempts has met with general acceptance, nor has any satisfactory explanation been suggested as to why the scribes who added these 'secondary' laws added them where they did.

Another possible solution is suggested by the duplication of the law of the central sanctuary and of the permission for non-sacrificial slaughter in ch. 12: that the disorder is due, in part, to the conflation of two codes, regarded as of equal authority and to some extent overlapping, to each of which new laws had earlier been added at different times. The code is patient of analysis along these lines, and this solution has this in its favour, that it leaves fewer loose ends than the hypothesis of gradual and casual expansion of an original deuteronomic code. It also suggests that the duplications and repetitions in the framework may in part be due to the conflation of the introductory and concluding speeches of the respective codes—*in part*, for it is highly probable that additions have been made, subsequent to this conflation, both to the code and to the framework. But such a solution would have to stand the test of historical criticism. Each of the codes postulated would presumably represent the use and customs of a particular sanctuary. This in itself would create no difficulty, were it not that, *ex hypothesi*, each code contained the law of the central sanctuary, and this in each case would, it may be assumed, refer to the sanctuary to which the code in question belonged. This would seem to indicate that the law of the central sanctuary was in the first instance regional; that in course of time a similar law was made for another region; that eventually each of the two sanctuaries claimed to be the sole legitimate cult centre for the whole land; and that the fusion of the uses and customs of both sanctuaries to form the present deuteronomic code was part of an attempt to reconcile their conflicting claims.

In favour of the validity of this theory is the fact that it suggests a solution to the problem raised by Dt 11[29–31] 27[2–8], Jos 8[30–34]. These passages together point to a tradition that on the day the Israelites crossed the Jordan an altar was erected in the vicinity of Shechem and sacrifice offered thereon to Yahweh. A number of scholars have maintained that the fact that this tradition is preserved in Deuteronomy is evidence that the law of the central sanctuary in ch. 12 originally referred to Shechem. This reading of the evidence has been disputed on the ground that the account of the discovery of the deuteronomic code and the initial enforcement of the law of the central sanctuary (2 K 22 f) clearly indicates that Jerusalem was the sanctuary referred to; and this is supported by the deuteronomic editing of the books of the Kings (*e.g.* 2 K 12[2f] 14[3f]). On the hypothesis that the present deuteronomic code is a conflation of two codes, each containing a law prescribing a central sanctuary, it might be argued that one of these codes originated in Shechem, and that the code upon which Josiah based his reforms was drawn up under the influence of this northern code, to claim for Jerusalem in the south the position claimed for Shechem in the north as the sole legitimate place of sacrifice.

The possibility thus stated assumes that the account of Josiah's reformation is a literary unity. This however has been called in question and the thesis advanced that the reformation was in fact limited to a purging of the Temple of Assyrian cult objects which had been placed there by Manasseh. The account of this, it is argued, is the nucleus of 2 K 23[4ff], and this was later elaborated to make it an account of the implementation of the deuteronomic code with its law of the central sanctuary, which, it was claimed, had just been 'discovered' in the Temple. This article is not the place for an examination of this thesis, but this much may be noted, that even supposing the thesis is valid, the fact that an original account of Josiah's somewhat limited reforms was thus expanded suggests, if it does not indeed indicate, that those reforms were undertaken under the influence of the deuteronomic programme which had already been put into effect elsewhere—most likely at Shechem. And from this a further inference might reasonably be drawn: that the 'Shechem code' was one of the first-fruits of the prophetic movement, and that it was drawn up as a 'constitution' for the Yahwist community remaining in the north after the fall of the kingdom, when Samaria had become a province of the Assyrian empire—a community which was a 'church' freed from the control of the State. And there is the further possibility, that during the half-century of the Babylonian exile it was Shechem with its deuteronomic code which was the real centre of Palestinian Yahwism. The community there may not have welcomed the re-establishment of Jerusalem at the restoration—the books of Ezra and Nehemiah indeed reflect their opposition—but the very existence of Deuteronomy in its present form and the fact of the Samaritan Pentateuch witness to the effort which was made to reconcile the traditions of the north and the south, even though it was ultimately unsuccessful and Shechem became the centre of the Samaritan schism.

Admittedly this discussion of the origin of the code is conjectural. It may nevertheless throw some light upon the question as to the purpose of the centralization of the cult in the first place. For this was a radical departure from the past in that it made illegal the sacrificial worship which had long been offered to Yahweh in every place where he caused His name to be remembered (cf Ex 20[24]), that is in the village sanctuaries throughout the land. On the assumption that the new law originated as part of the programme of reform put into effect by Josiah, it has been maintained that it was simply a measure designed to ensure the purification of the cult by confining it to one centre where it could be supervised and controlled. Others have held that the compilers of the code had come to realize that the multiplicity of sanctuaries was a hindrance to faith in the unity of Yahweh (cf 6[4]), for the reason that the old idea of baalism that each sanctuary had its own god still lingered on, even though the sanctuaries had long been Yahwist sanctuaries. They hoped that the restriction of the cult to one sanctuary would make for monotheism. If the code originated at Shechem after the fall of Samaria the compilers were more likely influenced by this latter consideration, for

they could scarcely have been planning a programme of cult purification if there was no longer any king to enforce it. In this case, the 'central sanctuary' may at first have been central only to a very limited area; and the idea of one sanctuary for the whole land will have developed from this.

3. Main Principles.—However complex the history of the book may be, in its contents it is theologically and religiously consistent throughout. (*a*) Its fundamental principle is 'The Lord our God is one Lord' (6^{4}); He is the God of the whole earth (10^{14}), and ultimately the arbiter of history (9^{5} 32^{8}). This carries with it the consequence that idolatry is the supreme sin (6^{13} 17^{2ff} etc.). It is to prevent even the possibility of this that Israel is commanded to destroy utterly the inhabitants of Palestine (7^{1ff} etc.), and older customs of worship are forbidden (16^{21} etc.). (*b*) As He is God of the whole earth, Yahweh's will is the moral law, and in connexion with its requirements He rewards and punishes (cf the teaching of Amos). Also as the God of Israel, the fundamental principles of His relation to His people are ethical. (*c*) He is a person, not merely a moral principle or a glorified code. He revealed Himself to Israel and chose them to be His people, and His love to them was shown before they could prove any desert (9^{4f} etc.). He gave them their land—a gift they must not imagine themselves to have merited (8^{7ff}). Hence love is the supreme return for His love (6^{4f} etc., and cf Hosea). Hence also the necessity for worship and prayer. Their cult, an expression of their loving gratitude, is to be joyous in character, not like the darker superstitions to which national disaster and foreign rites were making them incline (12^{18} etc.). (*d*) A religion, the heart of which is loving gratitude, naturally expresses itself in humanity towards all with whom men live, even towards the lower animals (22^{6f} 25^{4}). A religion also with so strong a sense of the Divine personality brings with it respect for human personality (24^{10ff}). (*e*) Because Yahweh made Himself known through events in history, the cult is to commemorate these events, and the national festivals which in their origin were harvest festivals are associated with them (16$^{3, 12}$). Even the individual Israelite is to commemorate this past in his worship as he acknowledges that the fruits of the land come not from the baalim but from Yahweh (26^{1ff}). (*f*) Such a religion with its strong sense of the historic unity of God's dealings with the nation and its conviction of the reasonableness of God's demands can and ought to be taught. Children are to have it explained to them (6^{6f} 11^{19}); and means are to be used to bring it into men's thoughts daily (6^{9} 11^{20}). The book thus represents a valiant attempt to relate the entire work and life of the people to Yahweh. Its great defect is that it shows no concern for the Gentiles as objects of Yahweh's love, and that its only vision for the future is a reconstruction of the past. C. A. Si.

DEVIL.—See Demons.

DEVOTED.—See Ban.

DEW.—The process whereby dew is formed is enhanced in Eastern countries like Palestine, where the surface of the ground and the air in contact therewith are highly heated during the daytime, but where at night, and particularly under a cloudless sky, the heat of the ground is radiated into space and the air becomes rapidly cooled down. The excess of moisture in the air then gently 'falls as dew on the tender herb,' and sometimes so copiously as to sustain the life of many plants which would otherwise perish during the rainless season; or even, as in the case of Gideon, to saturate a fleece of wool (Jg 6^{38}). Deprivation of dew, as well as of rain, becomes a terrible calamity in the East. On this account 'dew and rain' are associated in the imprecation called down by David on the mountains of Gilboa (2 S 1^{21}); and in the curse pronounced on Ahab and his kingdom by Elijah (1 K 17^{1}), as also by the prophet Haggai on the Jews after the Restoration (Hag 1^{10}) owing to their unwillingness to rebuild the Temple. In the Book of Job the formation of dew is pointed to as one of the mysteries of nature insoluble by man (Job 38^{28}); but in Proverbs it is ascribed to the omniscience and power of the Lord (Pr 3^{20}). Dew is a favourite emblem in Scripture: (*a*) *richness and fertility* (Gn 27^{28}, Dt 33^{13}); (*b*) *refreshing and vivifying effects* (Dt 32^{2}, Is 18^{4}); (*c*) *stealth* (2 S 17^{12}); (*d*) *inconstancy* (Hos 6^{4} 13^{3}); (*e*) *the young warriors of the Messianic king* (Ps 110^{3}).

DIADEM.—See Crown, and Dress, **5.**

DIAL (2 K 20^{11}, Is 38^{8}).—The Hebrew word commonly denotes 'steps' (see Ex 20^{26},1 K 10^{20}), and is so rendered elsewhere in this narrative (2 K 20$^{9-11}$, Is 38^{8}; AV 'degrees'). The 'steps' referred to doubtless formed part of some kind of sun-clock. According to Herod. ii. 109, the Babylonians were the inventors of the *polos* or concave dial, the *gnōmon*, and the division of the day into 12 hours. The introduction by Ahaz of a device for measuring the time may be regarded as a result of his intercourse with the Assyrians (2 K 16^{10ff}), but it is uncertain what kind of clock is intended. See also Time.

DIAMOND.—See Adamant, and Jewels and Precious Stones.

DIANA OF THE EPHESIANS.—See Artemis.

DIASPORA.—See Dispersion.

DIBLAH.—An unknown place mentioned by Ezekiel, 6^{14} (RV; AV **Diblath**). A variant reading, followed by RSV, is **Riblah** (q.v.).

DIBLAIM.—The father of Gomer, Hosea's wife, Hos 1^{3}; see Hosea.

DIBLATH, Ezk 6^{14} (AV).—See Diblah.

DIBON.—1. A city E. of the Dead Sea and N. of the Arnon, in the land which, before the coming of the Israelites, Sihon, the king of the Amorites, had taken from a former king of Moab (Nu 21$^{26, 30}$). The tradition in Jos (13$^{9, 17}$) states that the Hebrews dispossessed Sihon, and the territory was assigned to Reuben. Dibon, however, is mentioned as among the places built (or rebuilt) by Gad (Nu 32$^{3, 34}$), hence the name **Dibon-gad** (Nu 33^{45}). It was taken by Moab under King Mesha, who was of a family of Dibon apparently, and is mentioned several times in his famous stele, which was actually discovered at *Dhîbān*, about 2 miles N. of *'Ar'â'ir* on the edge of the Arnon valley (*Wâdī el-Mûjib*). Dibon is noted in Is 15^{2} and Jer 48$^{18, 22}$ as a Moabite town. The large mound of *Dhîbân* has recently been excavated, but, though abundant Nabataean and Roman remains were found, little was found of the Iron Age except tombs from the 9th cent. onwards. Glueck's surface exploration, however, has discovered Early Iron Age potsherds NE. of the main area of excavation, and it is evident that Moabite Dibon was situated at the southern extremity of the fertile corn-land.

In Is 15^{9} AV and RV follow the Hebrew in reading **Dimon,** while RSV has Dibon. The form Dimon may have been used here for the word play with 'blood' (*dām*).

2. A town in Judah inhabited in Nehemiah's time by returned exiles (Neh 11^{25}). Its association with Kiriath-arba (Hebron) indicates its location, but since there is no mention of Dibon in the description of the territory of Judah and Caleb in Jos 15, we may suspect textual corruption of some other name, possibly Debir (Kiriath-sepher) or **Dimonah** (Jos 15^{22}). J. Gr.

DIBON-GAD.—See Dibon, **1.**

DIBRI.—A Danite, grandfather of the blasphemer who was stoned to death, Lv 24^{11}.

DICTIONARIES.—1. Of the Bible.—W. Smith, *Dict. of Bible* (3 vols., 1863); J. D. Davis, *Dict. of the Bible* (1898); rev. ed., by H. S. Gehman (1944); P. Schaff, *Religious Encyclopaedia*, based on Herzog's *PRE* (3 vols., 1883); M'Clintock-Strong, *Cyclopaedia of Biblical, Theological, and Eccles. Literature* (10 vols. and 2 vols.

suppl., 1871–87); J. J. Herzog, *Realencyclopädie f. protest. Theol. u. Kirche* (18 vols., 1877–88), new ed., by A. Hauck (22 vols. and 2 vols. suppl., 1896–1913); *The New Schaff-Herzog Encyclop. of Religious Knowledge*, based on the preceding, ed. by S. M. Jackson (12 vols., 1908–12); revised ed., with Index and 2 additional vols., ed. by L. A. Loetscher (15 vols., 1955); F. Vigouroux, *Dict. de la Bible* (5 vols., 1895–1912), *Supplément*, ed. by L. 3. Greek (especially NT).—*A Greek-English Lexicon of the New Testament and Other Early Christian Literature*, by Wm. F. Arndt and F. Wilbur Gingrich (Cambridge and Chicago, 1957), now supersedes all earlier Greek NT lexicons. It is a translation and adaptation of Walter Bauer's German work (4th ed., 1952), and takes fuller account of British and American studies. *The Vocabulary of the Greek New Testament Illustrated from the Papyri and Other Non-Literary Sources*, by J. H. Moulton and G. Milligan (London, 1930), is a rich treasury of illustrative material. For classical Greek, the new edition of Liddell and Scott's *Greek-English Lexicon* by H. S. Jones and R. McKenzie (Oxford, 1940) is indispensable. The theological articles in R. Kittel, *Theologisches Wörterbuch zum Neuen Testament*, begun in 1933 and continued after Dr. Kittel's death by Gerhard Friedrich, takes the place of older works of this type. A number of the longer articles have been translated into English. For further titles, see Arndt and Gingrich, pp. xxxiii. ff. F. C. G.

DIDRACHMA.—In margin of older EV at Mt 17^{24}; AV has 'tribute money,' RV correctly 'half-shekel,' RSV 'the half-shekel tax' (*i.e.* the temple tax as the tax *par excellence*). The corresponding Greek word, of which there is more than one form, is used in LXX to translate the Hebrew *shekel*, a rendering not infrequently corrected by Aquila to '*stater*.' See Money, 7.
H. St. J. H.

DIDYMUS.—See Thomas.

DIET.—This word occurs only in Jer 52^{34} (AV; RV, RSV more correctly 'allowance,' *i.e.* of food, as in AV, RV, RSV in the parallel 2 K 25^{30}; the same word is rendered 'victuals' in AV, RV in Jer 40^{5} and 'allowance' in RVm, RSV) and Sir 30^{25} (AV, RV; RSV 'food').

DIKLAH.—The name of a son of Joktan (Gn 10^{27}, 1 Ch 1^{21}), probably representing a nation or community. The names immediately preceding and following Diklah give no clue to its identification.

DILAN, Jos 15^{38} (AV).—See Dilean.

DILEAN.—A town of Judah, in the same group with Lachish and Eglon, Jos 15^{38} (AV **Dilan**); possibly modern *Tell en-Nejileh*.

DILL.—See Anise and Fitches.

DIMNAH.—A Levitical city in Zebulun, Jos 21^{35}. The name is possibly a copyist's error for **Rimmon,** Jos 19^{13}. See Rimmon, **4.**

DIMON.—See Dibon, **1.**

DIMONAH.—See Dibon, **2.**

DINAH.—The daughter of Jacob by Leah, and sister of Simeon and Levi, according to Gn 30^{21}.

This verse appears to have been inserted by a late redactor, perhaps the one who added the section Gn 46$^{8-27}$ (cf v.^{15}). Nothing is said in 29^{31}–30^{24} 35$^{16ff.}$, where the birth stories of Jacob's children are given, of other daughters of Jacob; but 37^{35} (J) and 46^{7} (P) speak of 'all his daughters.' P, moreover, clearly distinguishes between his 'daughters' and his 'daughters-in-law.'

In Gn 34 we have a composite narrative of the seizure of Dinah by the Hivite prince, Shechem, the son of Hamor. The probable remnants of J's story make it appear that the tale, as it was first told, was a very simple one. Shechem took Dinah to his house and cohabited with her, and her father and brothers resented the defilement. Shechem, acting on his own behalf, proposed marriage, promising to accept any conditions of dower her father and brothers might impose. The marriage took place, and afterwards her full brothers, Simeon and Levi, slew Shechem and took Dinah out of his house. Jacob rebuked them for this, because of the vengeance it was liable to bring upon his house. Jacob thinks only of consequences here. If, as is generally supposed, Gn 49$^{5ff.}$ refers to this act, the reprimand administered was based by him not upon the dread of consequences, but upon the turpitude of a cruel revenge.

The remaining verses of ch. 34 make Hamor spokesman for his son. He not only offered generously to make honourable amends for Shechem's misconduct, but also proposed a mutual covenant of general intercourse, including the *connubium*. Jacob and his sons see their opportunity for revenge, and refuse, except upon the one condition that all the males of the city be circumcised. When, as a result, the latter were unable to defend themselves, all the sons of Jacob fell upon them with the sword, sparing only the women and children, whom they took captive with the spoil of the city. The words 'two of' and 'Simeon and Levi, Dinah's brothers' in v.^{25} are interpolated (cf v.^{13}). This story is clearly an elaboration of the earlier form, despite its one or two more antique touches, and suggests, moreover, the spirit at work in Ezra's marriage reforms.

This story reflects a tradition that the tribes of Simeon and Levi overthrew Shechem, but did not inhabit it.

According to Gn 48[22] it was given to the House of Joseph (' one mountain slope '; Hebrew *sh*[e]*khem*, ' shoulder '). The excuse for their action was an outrage on their sister, Dinah, who may here represent a smaller group of Jacob-peoples whom the Hivites overcame and incorporated by treaty, which, however, was violated by Simeon and Levi. Gn 34[26] ' and went away ' would then refer to their migration elsewhere (cf Gn 49[7]), and to the disappearance of the Dinah-group as such.

J. A. C.—R. A. B.

DINAITES.—According to AV and RV of Ezr 4[6], a people settled in Samaria by Osnappar (q.v.). They have been variously identified, but no secure identity can be found. Many scholars think the Aramaic word should be differently vocalized to yield the meaning ' judges ' (so RSV). Other words in this verse may be official titles rather than gentilics.

DINHABAH.—The capital city of king Bela in Edom, Gn 36[32], 1 Ch 1[43]; its location is unknown.

DINNER.—See MEALS, **2.**

DIONYSIA, a feast in honour of the Greek god Dionysus (q.v.), also known as Bacchus (2 Mac 6[7]), the Italian god with whom he was identified. Dionysus was the god of tree life, but especially the life of the vine and its produce, wine. In time his cult acquired emotional features not associated with wine or its effects; these may be seen in the Athenian drama, in the international association of Dionysiac artists, and in the widespread and popular Hellenistic-Roman mystery cult. The primitive festival celebrated the revival of the life-giving vine and of nature as a whole after the deadness of winter. It was accompanied by orgiastic excesses (see Euripides, *Bacchae*), at once symbolic of and caused by this renewal. The most famous festivals of Dionysus, four in all, were held in Attica at various periods of the year, corresponding more or less to the stages in the life of the vine: the *Anthesteria* in the spring, the *Lenaea* in the winter, the *Lesser* or Rural, and the *Greater* or City *Dionysia*. The Rural Dionysia was a vintage festival held in the country in December; the City Dionysia was held at Athens in the spring, and it was in connexion with this festival that the tragedies and comedies were produced in the theatre of Dionysus. Attendance at these plays was an act of worship—at least of devotion. In 2 Mac 6[7] we are told that Antiochus Epiphanes compelled Jews to attend a festival of Dionysus, walking in the procession in honour of the god and wearing wreaths of ivy, a plant sacred to him. See A. W. Pickard-Cambridge, *The Dramatic Festivals of Athens* (1953).

A. So.—F. C. G.

DIONYSIUS THE AREOPAGITE.—A member of the Court of the Areopagus (q.v.) at Athens, converted by Paul (Ac 17[34]). Eusebius in his *Church History* (III. iv. 10), naming Dionysius of Corinth (*fl* A.D. 171) as his authority, designated the Areopagite as the first bishop of Athens. Some three or four centuries later, a series of theological writings, pronouncedly Neoplatonic in character, were attributed to him (*On the Celestial Hierarchy* [of Angels], *On the Ecclesiastical Hierarchy*, *On the Divine Names*, and *The Mystical Theology*). Throughout the Middle Ages these works were widely read and influential. Another misleading tradition (in the 9th cent.) identified the Areopagite with St. Denys, martyr and patron saint of France.

H. R. W. and F. C. G.

DIONYSUS.—One of the various names applied to the god who is most commonly called Bacchus, because of the Hellenistic identification of Dionysus with the Italian god of the vine. It is probable that, to begin with, he was a god of vegetation in general, but as time went on he became identified exclusively with the vine. It is supposed that this specialization originated in Thrace. Still later the worship took on the form of mysteries, like those of Demeter. Mythology told of a triumphal journey taken by the god to India. His worship was widely disseminated in Greek lands, and it was assumed by enthusiastic Hellenizers that even Jews in the homeland could be induced or compelled to participate in Dionysian cultic acts (2 Mac 6[7] 14[33]). Ptolemy Philopator also attempted to force the worship of Dionysus, the god of his family, upon the Jews living in Egypt (3 Mac 2[29]).

A. So.—H. R. W.

DIOSCORINTHIUS.—See TIME.

DIOSCURI (RVm), or **The Twin Brothers** (RV, RSV), or **Castor and Pollux** (AV).—The sign or figurehead of the Alexandrian ship in which St. Paul sailed from Malta (Ac 28[11]), perhaps one of those employed to bring grain to Rome. The Twins (*Gemini*) were the protectors of sailors; in mythology they were sons of Zeus and Leda, and were placed in the sky as a constellation for their brotherly love.

A. J. M.

DIOTREPHES.—A person, otherwise unknown, who is introduced in 3 John (vv.[9f]) as ambitious, resisting the writer's authority, and standing in the way of the hospitable reception of brethren who visited the Church.

DIPHATH.—One of the sons of Gomer, 1 Ch 1[6] (RV, RSV); probably a scribal error for **Riphath** (so AV), as in the parallel Gn 10[3].

DISALLOW.—1 P 2[4] AV, ' a living stone, disallowed indeed of men, but chosen of God '; 2[7], ' the stone which the builders disallowed.' The English word means emphatically *disowned*, as in the AV heading to 1 S 29, ' David, marching with the Philistines, is disallowed by their princes.' RSV gives ' rejected,' as the same Greek verb is rendered in Mt 21[42], Mk 8[31], Lk 17[25]. But in Nu 30[5, 8, 11] ' disallow ' means no more than *disapprove*, as in Barlowe's *Dialogue*, p. 83, ' ye can not fynde that they be dysalowed of God, but rather approved.'

DISCIPLES.—In the ancient world every teacher had his company of disciples or learners. The only use of the word in the OT, in Is 8[16], is not certain, for the text is ambiguous. The Greek philosophers and the Jewish Rabbis had theirs, and John the Baptist had his (Mk 2[18] ' John's disciples and the disciples of the Pharisees '; cf Jn 1[35], Mt 14[12]). In like manner Jesus had His disciples. The term had two applications, a wider and a narrower. It denoted (1) all who believed in Him, though they remained where He had found them, pursuing their former vocations, yet rendering no small service to His cause by confessing their allegiance and testifying to His grace (cf Lk 6[13] 19[37], Jn 4[1] 6[60, 66f]). (2) The inner circle of the Twelve, also called ' Apostles,' and whom He required to forsake their old lives and follow Him whithersoever He went, not merely that they might strengthen Him by their sympathy (cf Lk 22[28]), but that they might aid Him in His ministry (Mt 9[37] 10[1, 5]), and, above all, that they might be trained by daily intercourse and discipline to carry forward the work after He was gone. These were ' the disciples ' *par excellence* (Mt 10[1] 12[1, 49] 15[23, 32], Mk 8[27], Lk 8[9], Jn 11[7] 12[4] 16[17, 29]). See also APOSTLES.

D. S.—J. H. Sc.

DISCOVER.—In AV ' discover ' is used in some obsolete meanings. **1.** To *uncover*, make to be seen, as Knox, *Hist.* p. 250, ' who rashly discovering himself in the Trenches, was shot in the head.' So Ps 29[9], ' The voice of the Lord . . . discovereth the forests,' and other passages. **2.** To *disclose*, as Shakespeare, *Merry Wives*, II. ii. 190, ' I shall discover a thing to you,' So Pr 25[9], ' discover not a secret to another,' etc. **3.** To *descry*, get sight of, as Ac 21[3], ' When we had discovered Cyprus, we left it on the left hand '; 27[39] ' they discovered a certain creek.'

DISCUS.—See GAMES.

DISEASE.—See MEDICINE.

DISH.—See CHARGER; HOUSE, **9**; MEALS, **5**; and TABERNACLE, **6** (*a*).

DISHAN (' ibex ' or ' mountain goat ').—A son of Seir (q.v.), Gn 36[21, 28, 30], 1 Ch 1[38, 42]; eponym of a Horite clan.

DISHON (' ibex ' or ' mountain goat ').—**1.** A son of Seir (q.v.), Gn 36[21], 1 Ch 1[38]. **2.** A son of Anah and grandson of Seir, Gn 36[25, 30], 1 Ch 1[41]. In Gn 36[26]

Hebrew has Dishan, but Dishon should be read with AV, RV, RSV (cf 1 Ch 1[41]). The name is the eponym of a Horite clan.

DISPERSION.—The name (Gr. *Diaspora*) given to the Jewish communities outside Palestine (2 Mac 1[27], Jn 7[35], Ja 1[1], 1 P 1[1]). The word is derived from *diaspeirō*, to scatter, which is used in the LXX for the ultimate degree of God's punishment of disobedient Israel (*e.g.* Lv 26[33]). It is not a merely geographical term, but means separation from the unity of the nation in the holy land, and suffering among the Gentiles. In Jewish eschatology the regathering of the people and their restoration to the country chosen for them by God was a constant feature (*e.g.* Is 11[12] 56[8]).

It is uncertain when the establishment of non-Palestinian Jewish communities began. It appears from 1 K 20[34] that an Israelitish colony was established in Damascus in the reign of Ahab. In the 8th cent. Tiglath-pileser III. carried many Israelites captive to Assyria (2 K 15[29]) and Sargon transported from Samaria 27,290 Hebrews (cf *KIB* ii, 55), and settled them in Mesopotamia and Media (2 K 17[6]). Probably they were absorbed and thus lost to Israel.

The real Dispersion began with the Babylonian Exile. Nebuchadrezzar transplanted to Babylonia the choicest of the Judaean population (2 K 24[12-16] 25[11], Jer 52[15]). Probably 50,000 were transported, and Jewish communities were formed in Babylonia at many points, as at Tel-abib (Ezk 3[15]) and Casiphia (Ezr 8[17]). Here the Jewish religion was maintained, prophets like Ezekiel and priests like Ezra sprang up, the old laws were studied and worked over, the Pentateuch elaborated, and from this centre the Jews radiated to many parts of the East (Neh 1[1ff], To 1[9-22], Is 11[11]). Thus the Jews reached Media, Persia, Cappadocia, Armenia, and the Black Sea. Only a few of these Babylonian Jews returned to Palestine. They maintained the Jewish communities in Babylonia till about A.D. 1000. Here, in the 5th cent. of the Christian era, the Babylonian Talmud was compiled.

In 608 B.C., Necho took king Jehoahaz and probably others to Egypt. In this general period colonies of Jews were living at Memphis, Migdol, Tahpanhes, and Pathros in Egypt (Jer 44[1]). The Aswan Papyri prove the existence of a large Jewish colony and a Jewish temple at the First Cataract, in the 5th cent. B.C. Other Jews seem to have followed Alexander the Great to Egypt (Jos. *BJ* II. xviii. 8 [494 ff] ; *c. Apion.* ii. 4 [33 f]). Many others migrated to Egypt under the Ptolemies (*Ant.* XII. i. 1 [7] ; ii. 1 ff [11 ff]). Philo estimated the number of Jews in Egypt in the reign of Caligula (A.D. 38–41) at a million (*In Flac.* 6 [43]).

Josephus states that Seleucus I. (312–280 B.C.) gave the Jews rights in all the cities founded by him in Syria and Asia (*Ant.* XII. iii. 1 [119]). This has been doubted by some, who suppose that the spread of Jews over Syria occurred after the Maccabaean uprising (168–143 B.C.). At all events by the 1st cent. B.C. Jews were in all this region, as well as in Greece and Rome, in the most important centres about the Mediterranean, and had also penetrated to Arabia (Ac 2[11]).

At Leontopolis in Egypt, Onias III., the legitimate Aaronic high priest, who had left Palestine because he hated Antiochus IV., founded a temple about 170 B.C., as a fulfilment of Is 19[19] ; this temple was destroyed in A.D. 73. It had little importance. With few exceptions the Dispersion was loyal to the religion of the home land. Far removed from the Temple, they developed in the synagogue a spiritual worship without sacrifice, which, after the destruction of Jerusalem in A.D. 70, kept Judaism alive. All Jews paid the annual half-shekel tax for the support of the Temple cultus, and at the great feasts they made pilgrimages to Jerusalem from all parts of the world (Ac 2[10f]). They soon lost the use of Hebrew, and had the Greek translation—the Septuagint—made for their use. Contact with the world gave some of them a broader outlook than the Palestinian Jews, and they tried to express the fundamental ideas of their religion in forms appealing to adherents of Greek and Roman philosophy. Through the Diaspora, Judaism exerted a great influence upon its surroundings and paved the way for Christianity. On the other hand, it aroused hostile feelings among Gentiles, as may be seen in the writings of several classical authors (*e.g.* Tacitus) ; this antagonism sometimes exploded into pogroms, as in Alexandria in A.D. 36 and in Antioch at the beginning of the Jewish revolt in A.D. 67. On the whole, Roman legislation was favourably disposed toward the Jews. The scattering of the Jews after A.D. 70 was not spoken of as a 'dispersion' ; instead, it was described as a new Exile. The term Diaspora was taken over by the Christians as an image of the Church (Ja 1[1], 1 P 1[1]). G. A. B.—W. C. v. U.

DISTAFF.—See SPINNING AND WEAVING.

DIVES.—See LAZARUS.

DIVINATION.—See MAGIC, DIVINATION, AND SORCERY.

DIVINERS' OAK.—A place mentioned only in Jg 9[37] (AV 'plain of **Meonenim**,' RV 'oak of **Meonenim**'). The word *mᵉʿōnᵉnîm*, of uncertain derivation, is frequently used in OT for 'diviners' or 'soothsayers,' and RSV rendering is to be preferred.

DIVORCE.—See MARRIAGE.

DIZAHAB.—A place in Moab, mentioned only Dt 1[1], standing 'over against Suph.' Its site is unknown. Probably the text is corrupt. In Nu 21[14] we find Suphah (cf Dt 1[1] Suph) in conjunction with **Waheb** (AVm, RV **Vaheb**), and *Waheb* is almost identical in writing with *Zahab*, which LXX read. There seems to be some relationship between the two passages, but neither has been satisfactorily explained. In Gn 36[39], 1 Ch 1[50] we have **Mezahab** (='waters of gold'), which looks more like the name of a place than a person, and this may be the proper form of the name. J. T.—H. H. R.

DOCTOR.—In Lk 2[46] AV, RV, it is said that the boy Jesus was found in the Temple, 'sitting in the midst of the doctors.' The English word, like the Greek (*didaskalos*), means simply 'teacher' (so RSV). In Lk 5[17] and Ac 5[34], the Greek for 'teacher of the law' is one word (*nomodidaskalos*). Lord Bacon called St. Paul 'the Doctor of the Gentiles.'

DOCTRINE.—The OT word *leḳaḥ* which means instruction, or literally 'what is received,' is rendered 'doctrine' by the AV (Dt 32[2], Job 11[4], Pr 4[2], Is 29[24]). RSV keeps 'doctrine' in Job 11[4] but substitutes 'teaching' or 'instruction' in the others. In the NT, RSV agrees with AV in retaining 'doctrine' for *logos* in He 6[1]. Otherwise 'doctrine' is used for *didachē* and *didaskalia*, of which the former denotes especially the act of teaching, the latter the collection of specific things taught. For *didaskalia* RSV sometimes retains the 'doctrine' of AV (1 Ti 1[10], Tit 2[1, 10]) but sometimes uses 'teaching' (2 Ti 4[3]). It is noteworthy that *didaskalia* is never used of the teaching of Jesus, always *didachē*. For *didachē* RSV sometimes changes AV's 'doctrine' to 'teaching' (Mk 1[22], Ro 6[17], Rev 2[14f. 24]), but in 2 Jn 9[f] RSV keeps 'doctrine.' *Didaskalia* is found chiefly in the Pastoral Epp., and outside of these, with two exceptions (Ro 12[7] 15[4]), it refers to worldly teachings opposed to the Gospel (Mt 15[9], Mk 7[7], Eph 4[14], Col 2[22]). This is in keeping with a distinction between the use of *didachē* for the substance of the teaching appropriate to the communication of the Gospel, and *didaskalia* as meaning specific items of belief in a system of propositions.

This linguistic development reflects the transition from the earliest proclamation of the Gospel when the message of Jesus Christ was creating and shaping the first Christian communities, to a later period when the crystallization of doctrine and ecclesiastical interests led to the prescription of items of belief deemed essential for the preservation of Christian truth. D. D. W.

DODAI.—See DODO.

DODANIM.—Named in the MT of Gn 10 among the descendants of Javan, or Ionians. The LXX and Samaritan versions and the parallel passage 1 Ch 1[7] read **Rodanim,** *i.e.* Rhodians. Cf the true reading of Ezk 27[15] under DEDAN.

DODAVAH, 2 Ch 20[37] (AV).—See DODAVAHU.

DODAVAHU (? 'Y" is my uncle').—Father of Eliezer of Mareshah, the prophet who censured Jehoshaphat for entering into alliance with Ahaziah, 2 Ch 20[37] (AV **Dodavah**).

DODO.—**1.** The father of Eleazar, the second of David's three mighty men, 2 S 23[9] (RV **Dodai,** with *k*[e]*thîbh*), 1 Ch 11[12] (where 'the Ahohite' stands instead of the erroneous 'son of Ahohi' of 2 S 23[9]); called **Dodai** in 1 Ch 27[4], where he is described as in charge of the division of the second month, but the words 'Eleazar the son of' appear to have been accidentally omitted. **2.** A Bethlehemite, father of El-hanan, one of 'the thirty,' 2 S 23[24], 1 Ch 11[26]. **3.** A man of Issachar, the forefather of Tola the judge, Jg 10[1].

DOE.—Named in Pr 5[19] (RV, RSV; AV 'roe'), Hebrew *ya*[*e*]*lāh,* this is the *female ibex.* See 'Wild goat,' *s.v.* GOAT.

DOEG.—An Edomite, and chief of the herdmen [or some prefer 'runners,' reading *hā-rāṣîm* for *hā-rō*[*e*]*îm*] of king Saul. When David fled to Nob to Ahimelech (or Ahijah) the priest, Doeg was there 'detained before the Lord.' Upon his report Saul ordered Ahimelech and his companions to be slain. The order was carried out by Doeg, when the rest of the king's guard shrank from obeying it (1 S 21[7] 22[9–19]). Doeg is mentioned in the title of Ps 52.

DOG.—Hebrew *kelebh,* Greek *kuōn.* The biblical references to dogs generally breathe the traditional oriental dislike of them as unclean animals; they are pariahs, living as scavengers, feeding on carrion and meat unfit for human consumption (Ex 22[31]) and even on human bodies thrown out unburied (1 K 14[11] 16[4] 21[24], Ps 68[23], Jer 15[3]), as happened in the case of Jezebel (2 K 9[36]). They are described as prowling about the streets at night and making sleep impossible with their noise (Ps 59[6f, 14f]). No wise man will meddle with them (Pr 26[17]). A man beset by foes may speak of himself as surrounded by such a snarling pack (Ps 22[16, 20]). They may attach themselves to an encampment for the food thrown to them, and will then become useful sentinels; but 'dumb dogs' that 'cannot bark' are useless watchmen (Is 56[10f]). Even under modern conditions packs of dogs may become a menace in the Near East if they are left uncontrolled; in the summer of 1957 Israel and Jordanian police had to collaborate in clearing the 'no man's land' between the two parts of Jerusalem of pariah dogs which had multiplied unchecked during the preceding years and some of which were suffering from rabies. In OT to call a man a dog is a grave insult; to call him a dead dog (2 S 16[9]) or a dog's head (2 S 3[8]) is even worse. But a man may use such terms of himself to express humility, as in 2 S 9[8], 2 K 8[13]; the idiom in the latter passage ('What is your servant, who is but a dog, that he should do this . . . ?') is paralleled in Lachish Letter 6. 'The price of a dog' (Dt 23[18]) refers probably to the hire of a *kādhēsh,* a male prostitute attached to a Canaanite fertility cult.

Sheepdogs (Job 30[1]) are dogs of a much superior quality; many of them are handsome beasts of a Kurdish breed and have the intelligent ways of the best sheepdogs in western lands.

The *saluqi,* a hound not unlike our greyhound, has been common in the Near and Middle East since the 4th millennium B.C., when it appears on seals from Tepe Gawra, NW. of Nineveh; it is used in hunting the gazelle. It is considered to be a different animal from the dog, is kept in the home and treated as a pet and companion. In Pr 30[31] 'greyhound' (AV, RV) is literally 'girt of loins'; RSV follows LXX in rendering it 'strutting cock'; the sense is quite uncertain.

Tobias's dog (To 5[16] 11[4]) is the first example in Hebrew literature of the dog as man's friend and fellow-traveller.

The general OT attitude to dogs persists in NT. The dogs that licked Lazarus's sores (Lk 16[21]) aggravated his misery; they were not expressing sympathy. Holy flesh must not be thrown out like carrion for dogs to eat (Mt 7[6]); this proverbial saying is extended to teach that sacred truths should not be exposed to the abuse of people unable to appreciate their sacredness (cf *Didache* 9[5]). In the story of the Syrophoenician woman the dogs which eat the children's crumbs (Mt 15[26f], Mk 7[27f]) are *kynaria,* 'pups.' It is doubtful if the diminutive was expressed in Aramaic (if that was the language spoken on this occasion); but in any case it was probably young dogs that were envisaged in association with children. Even pariah pups are attractive pets while they are small; cf M. Wheeler, *Walls of Jericho,* p. 8: 'She [Dr. Kathleen Kenyon] rules us all, but the stray pariah puppies who seek sanctuary in the camp rule her.'

The 'dogs' against whom Paul warns his converts in Ph 3[2] are Judaizing marauders, disturbing the peace of the church; the 'dogs' excluded from the New Jerusalem in Rev 22[15] are people of unclean lives.

E. W. G. M.—F. F. B.

DOK.—A fortress near Jericho, where Simon the Maccabee, along with two of his sons, was murdered by his son-in-law Ptolemy, 1 Mac 16[15]. The name survives in the modern *'Ain Dûk,* 4 miles NW. of Jericho.

DOLEFUL CREATURE.—See JACKAL.

DOMINION.—Lordship, or the possession and exercise of the power to rule. In Col 1[16] the word is used in the plural, along with 'thrones,' 'principalities,' and 'authorities' (powers), to denote supernatural beings possessed of the power of lordship, and ranking as so many kings, princes, and potentates of the heavenly regions. The same word in the singular, and in essentially the same meaning, appears in Eph 1[21], where allusion is made to the exaltation of Christ 'far above all rule and authority and power and dominion, and above every name that is named, not only in this age, but also in that which is to come.' There is no necessary reference in either of these texts to evil angels, but a comparison of what is written in Eph 2[2] 6[12] shows that 'the spiritual hosts of wickedness in the heavenly places' need not be excluded. Similar indefiniteness is apparent in the other two passages, 2 P 2[10], Jd [8], where the same word is found. It is understood by some to refer here to the lordship of civil rulers, or to any concrete representative of such lordship. Others believe that the reference is to angels, either good or evil, as representing some form of supernatural power and dominion, and the reference in the context to Michael, the archangel, not bringing a railing judgment even against the devil, may be thought to favour this view. A third explanation is also possible, and is favoured by the mention in Jd [4] of 'our only Master and Lord, Jesus Christ.' Those ungodly men, who deny the Lord Jesus, would not hesitate to despise, set at nought, and rail at all manner of glorious lordships and dignities. See AUTHORITY, POWER. M. S. T.

DOMITIAN.—Titus Flavius Domitianus, younger son of Vespasian (q.v.), succeeded his brother Titus (q.v.) as emperor in A.D. 81. Under him the provinces were generally well administered and the frontiers soundly defended, with notable advances in Britain and Germany. But Domitian was increasingly disposed to press his claims as 'master and god' (*dominus et deus*), and suspicious of all possible rivals (hence perhaps the episode, recorded by church historians, of the arrest of obscure survivors of the family of Jesus, as descendants of David). Among the victims of his tyranny were his niece Domitilla and her husband, Domitian's cousin Flavius Clemens, accused of 'atheism,' probably meaning Jewish or Christian sympathies; the distresses of the Roman Church referred to at the beginning of the First Epistle of Clement (q.v.) may be connected with these

events. Pressure in the province of Asia to take part in the imperial cult as a sign of loyalty is the background of the persecutions referred to in Revelation (1^9 2^{13}), where the beast (ch. 13) is the line of emperors and the second beast the civic priesthood of the deified rulers. Domitian's behaviour finally turned his close associates against him, and led to his assassination on September 16, A.D. 96. E. R. H.

DOOR, DOORKEEPER, DOORPOST.—See HOUSE, 6. For 'doorkeeper' in the Temple, see PRIESTS AND LEVITES.

DOPHKAH.—A station in the itinerary of the children of Israel, Nu 33^{12f}; possibly modern *Serābîṭ el-Khâdim*.

DOR.—One of the cities which joined Jabin against Joshua, and whose king was killed, Jos 11^2 12^{23} (RSV **Naphoth-dor** and **Naphath-dor**). It lay apparently on or near the border between Manasseh and Asher, so that its possession was ambiguous, 17^{11}. The aborigines were not driven out, Jg 1^{27}. It was administered by Ben-abinadab for Solomon, 1 K 4^{11} (RSV **Naphath-dor**). It is mentioned in 1 Mac $15^{11, 13, 25}$ (RV, RSV; AV **Dora**). Though Josephus refers to it as on the sea-coast, and it is generally identified with *el-Burj*, N. of *eṭ-Ṭanṭûrah*, N. of Caesarea, the reference to the 'heights of Dor' (*i.e. nāphôth dôr*) rather suggests that it was in some hilly district such as the slope of the range of Carmel. R. A. S. M.—H. H. R.

DORA, 1 Mac $15^{11, 13, 25}$ (AV).—See DOR.

DORCAS (Gr. form of Aram. *Tabitha*, literally 'gazelle,' Ac 9^{36ff}).—The name of a Christian woman at Joppa, 'full of good works and almsdeeds,' who, having died, was raised by St. Peter's prayer and the words 'Tabitha, rise.' The description recalls the 'Talitha cumi' spoken by Jesus in Jairus' house (Mk 5^{41}). A. J. M.

DORYMENES.—The father of Ptolemy Macron, who was a trusted friend of Antiochus Epiphanes (2 Mac 4^{45}), and was chosen by Lysias to command the Syrian army in Palestine in conjunction with Nicanor and Gorgias (1 Mac 3^{38}).

DOSITHEUS.—1. The priest who, according to a note in one of the Greek recensions of Esther, brought the book to Alexandria in the 4th year of Ptolemy Philometor (?) and Cleopatra, *c* 178 B.C. (Ad. Est 11^1). **2.** A soldier of Judas Maccabaeus, who made a vain attempt to take Gorgias prisoner (2 Mac 12^{35}). **3.** A renegade Jew who frustrated the plot of Theodotus to assassinate king Ptolemy Philopator (3 Mac 1^3). **4.** An officer of Judas Maccabaeus (2 Mac $12^{19, 24}$).

DOT.—See JOT AND TITTLE.

DOTAEA, Jth 3^9 (RV).—See DOTHAN.

DOTHAIM, Jth 4^6 $7^{3, 18}$ 8^3 (AV, RV).—See DOTHAN.

DOTHAN (Gn 37^{17}, 2 K 6^{13}, Jth 3^9 (RV **Dotaea,** AV **Judea**), 4^6 (AV, RV **Dothaim**)).—To-day *Tell Dôthān*, some 15 miles N. of Shechem, a strategic point at the entrance to the pass leading into the great Plain of Esdraelon. The *tell* to-day covers 10 acres, and the steeply sloping sides include several more acres. It is surrounded on three sides by hills (2 K 6^{17}), and must have been of great importance when the neighbouring highroad, still much used, was a main thoroughfare between Egypt and the countries to the east. Its pastures are even finer than those at Shechem, and several seasons of excavation on the site since 1953 show that the city was a flourishing one from very early times. T. J. M.

DOUBT (from Lat. *dubitare*, 'to hold two (opinions),' 'hesitate').—The AV used 'doubt' (verb and noun) to translate a variety of Greek words, such as *aporeō* Jn 13^{22} (RSV 'be uncertain') and *airō* Jn 10^{24} (RSV 'hold in suspense'). The word has increasingly become obsolete in these senses, and the RSV completes the tendency begun in the RV by using 'doubt' only eight times in the NT, apart from the fixed phrase 'no doubt' in Ac 28^4. In six of these eight occurrences it translates *diakrinō*, which means basically 'separate,' 'distinguish,' but which comes in the NT to signify 'be at odds with oneself,' 'doubt,' 'hesitate,' 'waver' (*e.g.* Mt 21^{21}, Ro 14^{23}; cf Ro 4^{20}). In the other two (Mt 14^{31} 28^{17}) it renders *distazō*, 'hesitate in choosing between two possibilities.' As used in these passages, 'doubt' has a religious signification, and stands in express or tacit antithesis to 'faith' (q.v.). It indicates a state of *qualified faith*, of faith mixed with misgiving, something between whole-hearted faith and decided unbelief. Thus wavering, faith is robbed of its power; hence such hesitation, in regard to Christ and the promises and commands of God, is strongly deprecated and reproved. In the above examples the doubt, affecting the mind of a believer, arises from contradictory circumstances or conscientious scruples; unless this be the case in Mt 28^{17} (cf Lk 24^{38}), it has none of the quality of rationalistic doubt or scepticism. G. G. F.—F. W. G.

DOVE.—The words translated 'dove' apply equally to doves and pigeons. In Palestine seven varieties of the *Columbae* are found. The most noticeable are: the wood pigeons or ring-doves (*Columba palumbus*), which fly in great flocks all over the land; the turtle-dove (*Turtur communis*), a harbinger of spring, arriving in the land of April (Jer 8^7, Ca 2^{12}); and the palm turtle-dove (*Turtur senegalensis*), which is common in a semi-domesticated state in the streets and courts of Jerusalem. 'Dove' is a favourite name of affection (Ca 1^{15} 4^1 $5^{2, 12}$ 6^9), and to-day it is one of the commonest names given to girls by Eastern Jewish parents. It is typical of harmlessness (Mt 10^{16}), helplessness (Ps 74^{19}), and innocence. The last quality doubtless makes it typical of the Holy Spirit (Mt 3^{16} etc.). Doves were used in sacrifice (Lv 5^7 12^6 etc.), and have been kept as pets for long ages. E. W. G. M.

DOVES' DUNG.—'A fourth of a kab' of this material was sold at a high price in Samaria during the siege (2 K 6^{25}). The words *ḥ^{a}rê yônîm*, as they stand, are plain, and no suggested alternative has cleared up the difficulty. It is an example of the actual extremity of the siege comparable with the threats of the approaching siege of 2 K 18^{27}. Whether, as Josephus suggests, the dung was a source of salt, or was used as medicine or as food, it is impossible to say. E. W. G. M.

DOWRY.—See MARRIAGE.

DRACHM.—See DRAM; MONEY.

DRAGON.—Hebrew *tannîn* (*tannîm* in Ezk 29^3 32^2), Greek *drakōn*. The Hebrew word is used of 'sea monsters' (Gn 1^{21}, Job 7^{12}, Ps 148^7, Jer 51^{34}) and of the serpents into which the rods were turned in Moses and Aaron's trial of strength with the Egyptian magicians (Ex 7^{9ff}; cf Ps 91^{13}, AV 'dragon,' RV and RSV 'serpent'), but principally of the seven-headed chaos-monster Leviathan (Ugaritic *Lotan*) and his associates (Ps 74^{13}, Is 27^1, 51^9), historicized to denote the king of Egypt (Ezk 29^3 32^2, where the crocodile has influenced the details of the picture; cf Job 41^{1ff}). The seven-headed chaos-monster reappears as the great red dragon of Rev 12^{1ff}, where he is further identified with the serpent of Eden and with Satan.

In AV 'dragons' appears thirteen times where 'jackals' is the proper rendering (Job 30^{29}, Ps 44^{19}, Is 13^{22} 34^{13} 35^7 43^{20}, Jer 9^{11} 10^{22} 14^6 49^{33} 51^{37}, Mic 1^8, Mal 1^3); this is the sense also in La 4^3 (AV 'sea monsters'). See JACKAL. F. F. B.

DRAM, from the Greek *drachma*, is used in AV to render two words which RV, RSV render 'darics' (see more fully under MONEY, **4**). The 'ten silver coins' of Lk 15^{8f}, however, were real drachmas, for which see MONEY, **7**.

DRAUGHT (AV and RV in Mt 15^{17}, Mk 7^{19}) and **DRAUGHT HOUSE** (AV and RV in 2 K 10^{27}; RSV 'latrine') both signify a privy or closet, which in the Mishnah is 'water-house.' Jehu, according to the last-cited passage, turned the temple of Baal in Samaria into public latrines.

DREAMS.—Sleep impressed primitive man as a great

mystery, and a peculiar significance was accordingly attributed to the dreams of sleepers, as phenomena which they could not control by their will or explain by their reason. In lower stages of culture all dreams were regarded as objectively real experiences; a god or spirit actually visited the dreamer, the events dreamed actually occurred. Hence anyone subject to frequent dreaming was regarded as a special medium of divine energy, and many sought to produce the state by artificial means such as fasting or drugs. Later, dreams came to be treated rather as Divine warnings than as actual occurrences. Such admonitions could be deliberately sought, *e.g.* by sleeping in a sacred spot, such as the temples of Asklepios or Serapis or the cave of Trophonius; or they could come unsought, when the gods wished to make a revelation to someone, or even to deceive him (but Plato denies that the gods could ever wish to deceive men). Thus among the Hittites, the Babylonians, the Assyrians, the Egyptians, and the Arabs, a profound importance was attached to dreams. Typical is the account by the Hittite king Hattusilis III. (*c* 1290–1260 B.C.) of his accession to the throne by grace of Ishtar, his patron-goddess, who prepared the way for this by communications given in dreams both to his father and to himself. In these cultures there were professional interpreters of dreams (cf Gn $40^{5,8}$ 41^{1}, Dn 2^{5}), and manuals were compiled to aid in their elucidation (*e.g.* the *Oneirocritica* of Artemidorus of Ephesus). Wiser theorists might discriminate between dreams, but the popular tendency was to regard them all as omens, to be explained as far as possible in accordance with definite rules.

1. Among the Jews.—In both Testaments significance is attached to dreams; cf Gn $37^{6,9}$ 41^{25}, Jg 7^{13}, Dn 2^{1ff} 4^{5ff} 7^{1ff}, Mt 1^{20} $2^{13,20}$, Ac 23^{11} 27^{23}. We find hardly any traces, however, of dreams being regularly sought; Saul's expedition to Endor can scarcely be brought within this category, although he had previously been unable to obtain a divine response by dreams (1 S $28^{6,8ff}$). Jacob's dream at Bethel (Gn 28^{12ff}) and Solomon's at Gibeon (1 K 3^{5}) have been linked with the practice of 'incubation'—sleeping in a sacred place in order to receive a divine communication in sleep—but in neither case does the text suggest any such intention on the sleeper's part. The general trend of OT teaching is as follows: Dreams may be genuine communications from God (Job 4^{12ff} 33^{15}); in the 'E' narratives of Genesis they are his regular means of communicating with men, as compared with the theophanies of the 'J' narratives. But Nu 12^{6-8} treats dreams as an inferior medium of revelation, and in Jer 23^{28} Yahweh dismisses 'the prophet who has a dream' with short shrift by contrast with 'him who has my word.' For there are false dreams and lying dreamers, against whom precautions are necessary (Dt 13^{1ff}). Habitual dreaming is no sure sign of Divine inspiration (Jer 23^{25ff} 27^{9} 29^{8}; Zec 10^{2}, Ec 5^{7}). The interpretation of dreams belongs to God and is not a matter of human codification (Gn 40^{8}, Dn 2^{27f}).

2. General.—The consideration of dreams belongs chiefly to those branches of study which treat of the general relation of body and mind, in particular, psychology and parapsychology. Freud's attempt to account for all dreams in terms of wish-fulfilment or attempted wish-fulfilment is well known, and has proved in some ways remarkably fruitful. But as yet the interpretation of dream symbols is a matter of great uncertainty, as appears from the diverse interpretations given by the different schools of analytical psychology. It seems clear, however, that dreams are connected with physical states, and that their psychological origin lies mainly in the region beneath the threshold of consciousness. But if any dreams can be regarded as vehicles of divine or other communication, this can be only because of the character and content of the messages conveyed. It is a matter of experience that the power of intellectual and spiritual perception can occasionally be heightened in the dream-state, so that insights can be obtained or problems solved in a way that the waking consciousness had found impossible. A line of poetry necessary to complete a poem has taken shape in the dream state—more rarely, indeed, a complete poem, of which Coleridge's *Kubla Khan* is the best known example. Similarly Condorcet is said to have solved in a dream a mathematical problem which baffled his waking powers. But in any circumstances the interpretation of a dream 'belongs to God'; its religious significance (if any) must be settled by an appeal to the higher reason or the spiritual consciousness, which will reach a decision in line with what is already known of the Divine nature and will. The awakened intelligence, enlightened by the Word and Spirit of God, must criticize and appraise the deliverances received in dreams, and its verdict must determine how much attention should be paid to them. Dreams, in short, may be the source of suggestions, but not of authoritative directions. A. W. F. B.—F. F. B.

DRESS.—The numerous synonyms for 'dress' to be found in English versions—'apparel,' 'attire,' 'clothes,' 'raiment,' 'garments,' etc.—fairly reflect a similar wealth of terminology in the original Hebrew and Greek, more especially the former. As regards the particular articles of dress, the identification of these is in many cases rendered almost impossible for the English reader by the curious lack of consistency in the renderings of the translators, illustrations of which will be met with in this article. For this and other reasons it will be necessary to have recourse to transliteration as the only certain means of distinguishing garments to be discussed.

In seeking to describe the various garments worn in Biblical times, we must not assume that they were similar to the clothes of modern Palestinians, especially the Bedouin Arabs. A more trustworthy source of information is the representation of ancient Palestinians and Syrians on Near Eastern monuments of various kinds. No clothes of pre-Roman times have been discovered, but these representations may be considered fairly reliable if we remember that they were usually made by foreigners, that they often depict captives or tribute-bearers, and that they probably tend to be standardized. Many of these representations may be seen in *ANEP*, 1954. Of special importance are the Megiddo ivories (frontispiece and No. 125), the *Beni Hasan* tomb painting of the 19th cent. B.C. (No. 3), the Black Obelisk of Shalmaneser III., second register (Nos. 351–355), and the Assyrian sculptures depicting the fall of Lachish (Nos. 371–373).

1. Materials.—Scripture and anthropology are in agreement as to the great antiquity of the **skins of animals,** wild and domesticated, as dress material (Gn 3^{21} 'garments of skins'; cf for later times, He 11^{37}). The favourite materials in Palestine, however, were **wool** and **flax** (Pr 31^{13}). The finest quality of linen, byssus, was probably an importation from Egypt (see LINEN). **Goats' hair** and **camels' hair** supplied the materials for coarser fabrics. The first certain mention of **silk** is in Rev 18^{12}, for the meaning of the word so rendered in Ezk $16^{10,13}$ is doubtful, and the silk of Pr 31^{22} (AV) is really 'fine linen' as in RSV.

2. Under Garments.—(*a*) The oldest and most widely distributed of all the articles of human apparel is the **loin-cloth** or **waistcloth** (Heb. *'ēzōr*), originally a strip of skin or cloth wrapped round the loins and fastened with a knot. On Egyptian monuments of the Middle and Late Bronze Ages, Syrians and possibly Palestinians are frequently represented as wearing a waistcloth, which is either a wrap-around type of garment or a kilt (*ANEP*, Nos. 1–8). These are in many cases captives, and thus probably soldiers. On the Lachish scenes, the soldiers wear kilt-like waistcloths, over which are tunics. It appears that the waistcloth was the basic garment of Israelite soldiers and workers; it is possible that others wore it as an undergarment, but this is not certain.

In the OT, *'ēzōr* is usually rendered incorrectly by '**girdle,**' a term which should be reserved for *ḥ*^{a}*ghôrāh* (see below). RSV correctly renders it by 'waistcloth' in Is 5^{27}, Jer 13^{1ff}, and Job 12^{18}. Some of the prophets

wore the wasitcloth, such as Elijah, who ' was girt about with an *'ēzōr* of leather on his loins ' (2 K 1[8]), and John the Baptist (Mt 3[4], Mk 1[6]). Jeremiah on one occasion put on a waistcloth of linen in a symbolic action (Jer 13[1ff]; this may have been a vision experience).

The noun and the cognate verb are frequently used in figurative senses, the point of which is lost unless it is remembered that the waistcloth was always worn next the skin, as *e.g.* Jer 13[11], Is 11[5], the figure in the latter case signifying that righteousness and faithfulness are essential and inseparable elements in the character of the Messianic ' Shoot.'

(*b*) The **aprons** (Gr. *simikinthia*) of Ac 19[12] were the Roman *semicinctium*, a short waistcloth worn especially by slaves and workmen.

(*c*) In early times the priests wore a waistcloth of linen, which bore the special name of the **ephod** (1 S 2[18]), and which the incident recorded in 2 S 6[14ff]—David, as priest, dancing before the Ark—shows to have been of the nature of a short kilt. By the Priests' Code, however, the priests were required to wear the under garment described under BREECHES.

(*d*) In OT, the ordinary under garment for both sexes is the shirt or **tunic** (*kuttōneth* or *kᵉtōneth*, a term which reappears in Greek as *chitōn*). English versions often translate this word as ' coat.' RSV renders it by four different words: (*a*) ' garment,' Gn 3[21], Ca 5[3], Ezr 2[69], Neh 7[70, 72]; (*b*) ' coat,' Ex 28[4], 2 S 15[32] etc.; (*c*) ' robe,' Gn 37, 2 S 13[18f], Is 22[21]; and (*d*) ' tunic ' in Job 30[18] only. In the NT, *chitōn* is rendered by RSV as ' tunic ' in Mt 10[10], Lk 9[3], and Mk 6[9]; as ' coat ' in Mt 5[40], Lk 3[11]; and as ' garment ' in Jd [23].

The Assyrian sculpture representing the siege and capture of Lachish by Sennacherib shows the Jewish captives, male and female alike, dressed in a moderately tight garment fitting close to the neck (cf Job 30[18]) and reaching almost to the ankles. The soldiers have over the waistcloth, described above, a long shirt reaching below the waist; or it may be a long tunic which is drawn up above the knees and fastened in place by the waistbands. On the Megiddo ivories of about the 12th cent. B.C., men and women wear a long tunic reaching to the ankles.

As regards **sleeves**, which are not expressly mentioned in OT—but see RSV at Gn 37[3] (Joseph) and 2 S 13[18] (Tamar)—three modes are found. The early Egyptian representation of a group of Semitic traders, from *Beni Hasan*, shows a highly coloured sleeveless tunic, which fastens on the left shoulder, leaving the right shoulder bare. The Lachish tunics, above mentioned, have short sleeves reaching almost to the elbows. This probably represents the prevailing type of tunic among the Hebrews of the earlier period at least, since a third variety, fitted with long and wider sleeves and reaching almost to the ground, was evidently restricted to the upper and wealthier classes. This is the ' tunic of (*i.e.* reaching to) palms and soles ' (' long robe with sleeves,' RSV) worn by Joseph and the royal princess Tamar (see above). It is more familiar as the **' coat of many** (or diverse) **colours,'** a rendering which represents a now generally abandoned tradition. In Josephus' day the long white linen tunic, which was the chief garment of the ordinary priesthood, had sleeves which for practical reasons were tied to the arms (Jos. *Ant.* III. vii. 2 [154]). By this time, also, it had become usual even among the lower ranks of the people to wear an under tunic or real shirt (*ib.* XVII. v. 7 [136]); Mishnah, *passim*, where this garment is named *ḥālūḳ*). In this case the upper tunic, the *kuttōneth* proper, would be taken off at night (Ca 5[3]).

The ordinary tunic was made in at least three ways. (1) It might consist of two similar pieces of woollen or linen cloth cut from a larger web, which were sewed together along the sides and top. (2) The material for a single tunic might be woven on the loom, and afterwards put together without cutting, in the manner of the Egyptian tunics described and figured in Smith's *Dict. of Gr. and Rom. Antiq.*[3] *s.v.* ' Tunica ' (ii. 904). (3) As we known from the description of the *chitōn* worn by our Lord at the time of His Passion (Jn 19[23]), and from other sources, a third variety was woven ' without seam ' on a special loom (see SPINNING AND WEAVING) and required no further adjustment.

The garment intended by the ' coats ' of Dn 3[21, 27] (AV) is uncertain. Most recent authorities favour mantles (so RSV). For the ' coat of mail,' see ARMOUR, **2** (*c*).

3. The Girdle.—Almost as indispensable as the tunic was the **girdle** (Heb. *ḥᵃghôrāh* or *ḥᵃghôr*). This is the usual rendering of English versions, including RSV, but the item of apparel is not that which is ordinarily called a ' girdle ' to-day. It was a belt or waistband, and usually consisted of a long strip of cloth, folded several times and wound round the waist over the tunic, with or without the ends hanging down in front. The *ḥᵃghôrāh* varied in material and workmanship from a simple rope (Is 3[24]) to the rich and elaborate waistbelt of the priests, and the ' golden girdles ' of Rev 1[13] 15[6]. When a person was working or travelling, the lower part of the tunic might be drawn up and tucked into the *ḥᵃghôrāh*. Hence this operation of ' girding the loins ' became a figure for energetic action. The waistband served also as a sword-belt (2 S 20[8]); through it probably was stuck the writing-case (Ezk 9[3, 11]), while its folds served as a purse (Mt 10[9]). The special priests' waistband, termed *'abnēṭ* (Ex 28[4] and often) was a richly embroidered sash wound several times round the waist, according to Josephus (*Ant.* III. vii. 2 [154 f]), and tied in front, the ends falling to the ankles.

4. Upper Garments.—While the *kuttōneth* or tunic was the garment in which the work of the day was done (see Mt 24[18], Mk 13[16]), men and women alike possessed a second garment, which served as a protection against inclement weather by day and as a covering by night (Ex 22[26f]). The two are sharply distinguished in the familiar saying of Jesus: ' If any one would sue you and take your **coat** (*chitōn*), let him have your **cloak** (*himation*) as well ' (Mt 5[40]).

(*a*) This upper garment had several names; we cannot now be certain of the differences in the various garments, if indeed the various names stood for different garments. In the OT, the commonest name is *śimlāh* or *śalmāh*, and in the NT *himation*; these words sometimes signified, however, garments or clothing in general (Gn 41[14] 44[13], Ex 19[10], Lk 8[27] etc.).

The figures on the *Beni Hasan* tomb painting do not have any garment over the multi-coloured tunic. On Egyptian tomb paintings of the Late Bronze Age (15th–13th cents. B.C.), Syrians are often represented as wearing over the tunic a robe that is wound around the body and thrown over the shoulders as a cape (see *ANEP*, nos. 43, 47, 49, 52–54). The edges of the cloth usually have an embroidered hem. The Megiddo ivories show a robe over the tunic reaching to the knees or almost to the ground. On the Black Obelisk of Shalmaneser III. the Israelites have a fringed upper garment that is almost as long as the tunic. On the Assyrian sculptures of the Lachish surrender, the women have over the tunic a long shawl that covers the head and reaches to the ankle.

From these representations it is apparent that the *śimlāh*, or upper garment, varied in its appearance. Sometimes it was wrapped around the body. At other times, it was a fringed garment that was put on, like the tunic. In the Israelite period, the latter form may have predominated, and the *śimlāh* was obviously not unlike the *'abayeh* of the modern Palestinian Arab.

In the English versions, *śimlāh* (or *śalmāh*) is rendered in a variety of ways. RSV translates it as ' mantle(s) ' in Ex 12[34] 22[27], Is 3[6, 7], and ' cloak ' in Dt 24[13]. Greek *himation* is rendered as ' mantle ' in Mt 24[18], Mk 13[16], Lk 22[36], and ' robe ' in Jn 19[2], Rev 19[16]. Usually a colourless rendering such as ' garment,' ' clothes,' or ' clothing ' is used, and frequently it is difficult to determine whether a specific garment is intended.

(*b*) Another variety of upper garment known as the *mᵉʿîl* is mentioned only in connexion with men of high social position or of the priestly order. It is the robe of Saul—the skirt (literally ' corner ') of which was cut off

by David (1 S 24[4f])—of Jonathan (18[4]), and of Ezra (Ezr 9[3, 5]), the little robe of the boy-priest Samuel (1 S 2[19]) and his robe at a later stage (15[27]). RSV usually has 'robe' for *me'îl*, sometimes 'mantle.' We do not know just how the *me'îl* differed from the *śimlāh*. From its constant association with men of rank and of the priesthood, we may assume that it was more elaborate and ornate. The violet 'robe of the ephod' prescribed for the High Priest (Ex 28[31ff] 39[22ff]) had 'in it an opening for the head, with a woven binding around the opening,' and was trimmed with an elaborate bell-and-pomegranate fringe. By the time of Josephus, the High Priest's *me'îl* had become a sleeveless and seamless upper tunic of blue, held by a sash (*Ant.* III. vii. 4 [159]).

(*c*) A third variety of upper garment, the *'addereth*, appears to have been the distinctive garment of the prophets (see Zec 13[4] RSV 'hairy mantle'). Elijah's **mantle**, in particular, is always so named (1 K 19[13, 19], 2 K 2[8, 13f]). In 2 K 1[8] Elijah is called a *ba'al śē'ār*; RSV renders, 'He wore a garment of haircloth.' In Gn 25[25] the body of Esau at birth is said to have been 'like a hairy mantle.' John the Baptist wore a mantle of camel's hair (Mt 3[4], Mk 1[6]). The *'addereth* may not always have been made of haircloth, for Achan coveted and stole 'a beautiful *'addereth* from Shinar' (Jos 7[21, 24]), and in Jon 3[6] the robe of the king of Nineveh is denoted by this word. See also RUG.

(*d*) Among the products of the domestic loom was a fourth garment, the *sādhîn* (Pr 31[24]). From the Mishnah we learn that it was a plain **sheet** of fine linen, sometimes with tassels, which could be used as a light upper garment, as a curtain, and as a shroud. In this last respect it resembled the NT *sindōn*, the 'linen shroud' of Mt 27[59], Mk 15[46]. It is probably as an upper garment of fine white linen for gala use that the *sādhîn* is introduced in Jg 14[12f] and Is 3[23] (RSV 'linen garments' in both passages).

(*e*) Mention must also be made of the 'scarlet robe' (*chlamys*) in which Jesus was arrayed by the Roman soldiers (Mt 27[28, 31]). It is the *paludamentum* or military cloak worn over their armour by the superior officers of the Roman army. The '**cloak**' (*phailonēs*) which St. Paul left at Troas (2 Ti 4[13]) was the Roman *paenula*, a circular travelling cape. For the brooch or buckle by which an upper garment was sometimes fastened, see ORNAMENTS, **5**.

5. Headdress.—(*a*) The Hebrews appear at first to have had no covering for the head, except on special occasions, such as war, when a leather **helmet** was worn (see ARMOUR, **2** (*b*)). On the Egyptian monuments of the Middle and Late Bronze Ages, Syrian men are represented as bare-headed or only with a rope or cord on the hair, serving as a fillet. The name for this may have been *pe'ēr*, as in Is 3[20] 61[3, 10] (but see Ex 39[28], Ezk 24[17, 23] 44[18], and cf 1 K 20[31f]). In cases of prolonged exposure to the sun, it is probable that recourse would be had to a covering in the style of the modern *keffiyeh*, which protects not only the head but also the neck and shoulders. A clay figurine found at Gezer, probably from the Late Bronze Age, appears to be wearing a *keffiyeh* (Macalister, *Excavation of Gezer*, ii, p. 77, fig. 271). Jehu's tribute-carriers on the Black Obelisk are depicted in a 'stocking cap' which resembles the familiar Phrygian cap. On the Assyrian sculptures of the Lachish siege, the men often have a turban on the head. This is the *ṣānîph*, from a root signifying to 'wind round.' It is the royal '**diadem**' of Is 62[3], the '**turban**' of Is 3[23] (AV '**hood**') and Zec 3[5] (the last a priestly headgear; AV '**mitre**'). A kindred word, *miṣnepheth*, is used for the High Priest's turban in Ex 28[4] etc. for which see MITRE. The '**hats**' (Aram. *karbe'lā'*) of Dn 3[21] were probably a variety of the conical Babylonian headdress; it is incorrect to render as 'mantles.' Antiochus Epiphanes, it is recorded, induced the young Jewish nobles to wear the *petasus*, the low, broad-brimmed hat associated with Hermes (2 Mac 4[12], RSV 'the Greek hat'; RV '**cap**').

In NT times, as may be learned from the Mishnah, many forms of headdress were in use. One was the *sûdhār*, a scarf wound about the head and hanging down over the neck. The name resembles Latin *sudarium*, a cloth for wiping off perspiration. The latter is Greek *soudarion*, translated as '**napkin**' in Lk 19[20], Jn 20[7], the '**cloth**' in which Lazarus' face was wrapped, Jn 11[44], and '**handkerchief**' in Ac 19[12].

(*b*) As regards the headdress of the female sex, Is 3[23] indicates that women sometimes wore the turban, mentioned above. On the Egyptian monuments, Syrian women are often bare-headed or wear only a headband on the hair. The female captives from Lachish wear over their tunics an upper garment like a very long shawl, covering the hair and falling down over the shoulders as far as the ankles. Whether this is the garment intended by any of the words rendered **vail** in AV it is impossible to say: such as that of Ruth (3[15] *miṭpaḥath* RSV 'mantle'), or the 'veils for the head' (*mispāḥāh*) of Ezk 13[18] RSV, or the word *re'edhîdh*, 'veils' in Is 3[23] RSV, 'mantle' in Ca 5[7] RSV. The veil (*ṣā'îph*) with which Rebekah and Tamar covered themselves (Gn 24[65] 38[14]), was more probably a large mantle with which the whole body could be wrapped. Indeed, it is impossible to draw a clear distinction in OT between the mantle and the veil. The only express mention of a face-veil is in the case of Moses (Ex 34[33]).

6. Shoes and sandals.—Within doors the Hebrews went barefoot. On the monuments Hebrew or Syrian captives are usually thus represented (cf Is 20[2]). Out of doors it was customary to wear sandals or shoes, mostly the former. The simplest form of **sandal** consisted of a plain sole of leather, bound to the feet by a leather thong, the '**sandal-thong**' of Gn 14[23] and the '**thong**' (AV, RV '**latchet**') of Mk 1[7] etc. The Assyrians preferred a sandal fitted with a heel-cap, by which they are distinguished from Jehu's attendants on the Obelisk of Shalmaneser III., who wear shoes completely covering the feet and turned up at the toes, like the Hittite shoe. The laced **boot** of the soldier is apparently referred to in Is 9[5]. The sandals were removed not only in cases of mourning (2 S 15[30]) and of a visit to a friend, but also on entering a sacred precinct (Ex 3[5], Jos 5[15]); the Jewish priests, accordingly, performed all their offices in the Temple barefoot.

7. It need hardly be said that the taste for 'purple and fine linen' was not peculiar to the days of Dives, as may be seen from the remarkable list of finery and ornaments in Is 3[18ff]. Richly embroidered garments are mentioned as early as the time of the Judges (Jg 5[30] RSV). King Josiah had an official who bore the title of 'keeper of the wardrobe' (2 K 22[14]). The '**changes of raiment**,' however, several times mentioned in OT, were not so many complete outfits, but special gala robes, for which one's ordinary garments were 'changed'; RSV renders as 'festal garments' (Gn 45[22], Jg 14[12ff], 2 K 5[5, 22f]). In the East, such robes have continued a favourite form of gift and expression of esteem from sovereigns and other persons of high rank to the present day.

For what may be termed accessories of dress, see ORNAMENTS, SEAL, STAFF.

8. A special interest must always attach to the question of the outward appearance of the Man of Nazareth, so far as it is associated with the dress He wore. This must have consisted of at least six separate articles. By the 1st cent. it had become usual to wear a linen shirt (*ḥālûḳ*) beneath the tunic (see **2** (*d*) above). In our Lord's case this seems required by the mention of the upper garments (*himatia*, *i.e.* mantle and tunic) which He laid aside before washing the disciples' feet (Jn 13[4]). The tunic proper, we know, was 'woven without seam' throughout, and therefore fitted closely at the neck, with the usual short sleeves as above described. Above the tunic was the linen girdle wound several times round the waist. On His feet were leather sandals (Mt 3[11]). His upper garment, *himation*, was probably of white woollen cloth, as is suggested by the details of the Transfiguration narrative in Mk 9[3], with the four prescribed tassels at

the corners. To the form of His headdress we have no clue, but it may be regarded as certain—the traditional artistic convention notwithstanding—that no Jewish teacher of that period would appear in public with head uncovered. Probably a white linen 'napkin' (*sûdhār*) was tied round the head as a simple turban, the ends falling down over the neck. A. R. S. K.—J. P. H.

DRINK.—See MEALS, 6, WINE AND STRONG DRINK.

DRINK-OFFERING.—See SACRIFICE AND OFFERING.

DROMEDARY.—See CAMEL.

DROPSY.—See MEDICINE.

DROVE, 1 K 10^{28}, 2 Ch 1^{16} (RV).—See KUE.

DRUNKENNESS.—See WINE AND STRONG DRINK.

DRUSILLA.—The wife of the procurator Felix (Ac 24^{24}). She was the youngest daughter of Herod Agrippa I., born *c* A.D. 37, and is said to have been persuaded by a Jewish astrologer (perhaps Atomos of Cyprus; see Haenchen *ad. loc.*) to desert her first husband, Azizus king of Emesa, for Felix. She was sister to Agrippa II. and Bernice (25^{13}). See Jos. *Ant.* xx. vii. 2 (141 ff). F. C. G.

DUALISM.—The belief in, or doctrine of, two ultimate conflicting principles, powers, or tendencies in the universe. Haeckel describes as dualism the distinction between God and the world, and between matter and mind, and opposes to it his monism, which identifies both (*Riddle of the Universe*, ch. 1, p. 8). In this sense of the word the Bible teaches dualism. It does distinguish God as Creator from the world as created (Gn 1^{1}, Is 40^{26}, Jn 1^{3}), and describes God as Spirit in contrast with matter (Jn 4^{24}). In man it distinguishes the body taken from the dust, and the spirit given by God (Gn 2^{7}, Ec 12^{7}). This conclusion need not be proved further, as this view is implied in all the teaching of the Bible about God, world, man. But, setting aside this new sense of the term, we must consider whether the Bible gives evidence of dualism in the older sense, as opposing to God any antagonist or hindrance in His creating, preserving, and ruling the world. It is held that dualism in three forms can be traced in the Bible—(1) the mythical, (2) the metaphysical, (3) the ethical. Each must be separately examined.

1. Mythical dualism.—In the Babylonian cosmology, *Marduk*, the champion of the upper deities, wages war against *Tiamat*, who leads the lower deities; at last he slays her, divides her body, and makes part a covering for the heavens to hold back the upper waters. There is little doubt that the account of the Creation in Gn 1 reproduces some of the features of this myth, but it is transformed by the monotheism of the author. Tiamat appears under the name **Rahab** in several passages (Job 9^{13} [RV] 26^{12f} [see Davidson's *Job*, p. 54), Is 51^{9}, cf 27^{1} 'leviathan the swift serpent,' 'leviathan the crooked serpent,' 'the dragon that is in the sea'). See Cheyne's notes on these passages in the *Prophecies of Isaiah*, i, 158, ii, 31. In illustration of Is 51^{9} he quotes the address to *Ra* in the Egyptian Book of the Dead: 'Hail! thou who hast cut in pieces the Scorner and strangled the *Apophis*' [*i.e.* the evil serpent, Ps 89^{10}, cf Ps 74^{13f} 'the dragons,' 'leviathan']. This name is used as a symbolic name of Egypt (Ps 87^{4}, Is 30^{7}), probably on account of its position on the Nile, and its hostility to the people of God. The **sea** is regarded as God's foe (Dn 7^{3} 'four great beasts came up from the sea'; Rev 13^{1} 'a beast coming up out of the sea,' 21^{1} 'the sea is no more,' that is, the power hostile to God has ceased), a conception in which the myth survives. The influence of the myth is seen only in the poetical language, but not in the religious beliefs of the Holy Scriptures.

2. Metaphysical dualism.—Greek thought was dualistic. Anaxagoras assumed *hylē*, 'matter,' as well as *nous*, 'mind,' as the ultimate principles. Plato does not harmonize the world of ideas and the world of sense. Aristotle begins with matter and form. Neo-Platonism seeks to fill up the gulf between God and the world by a series of emanations. In Gnosticism the *plērōma* and the *logos* mediate between the essential and the phenomenal existence. St. John ($1^{1, 14}$) meets this Greek thought of his environment by asserting that Christ is the Word who is with God and is God, and who has become flesh. Against Gnostic heretics St. Paul in *Colossians* (1^{19} 2^{9}) asserts that the *plērōma*, the fulness of the Godhead, dwells bodily in Christ; to this dualism is opposed the union of Creator and creation, reason and matter in Christ.

From this metaphysical there resulted a practical dualism in Greek thought, between sense and reason. While Aristotle thought that reason might use sense as an artist his material, Neo-Platonism taught that only by an ascetic discipline could reason be emancipated from the bondage of sense; and Stoicism treated sense as a usurper in man's nature, to be crushed and cast out by reason. Holsten has tried to show that this dualism is involved in St. Paul's doctrine of the **flesh**, and Pfleiderer also holds this position. It is held that St. Paul, starting from the common Hebraic notion of flesh (*sarx*), 'according to which it signifies material substance, which is void indeed of the spirit, but not contrary to it, which is certainly weak and perishable, and so far unclean, but not positively evil,' advances to the conception of the flesh as 'an agency opposed to the spirit,' having 'an active tendency towards death.' 'From the opposition of physically different substances results the dualism of antagonistic moral principles' (Pfleiderer's *Paulinism*, i. 52 ff). This conclusion is, however, generally challenged with good reason, and cannot be regarded as proved. The question will be more fully discussed in article FLESH.

3. Ethical dualism.—In Persian thought there are opposed to one another, as in conflict with one another, *Ormuzd* and *Ahriman*, the personal principles of good and evil. While the OT recognizes the power of sin in the world, yet God's ultimate causality and sole supremacy are affirmed. In post-exilic Judaism, however, there was a twofold tendency so to assert the transcendence of God that angels must be recognized as mediating between Him and the world, and to preserve His moral perfection by assigning the evil in the world to the agency of evil spirits under the leadership of *Satan*, the adversary. While these tendencies may be regarded as inherent in the development of Hebrew monotheism, both were doubtless stimulated by the influence of Persian thought with its elaborate angelology and demonology. In the Apocalyptic literature the present world is represented as under Satan's dominion, and as wrested from him only by a supernatural manifestation of God's power to establish His Kingdom. This dualism pervades the Apocalypse. In the NT generally the doctrine of the *devil* current in Judaism is taken over, but the Divine supremacy is never denied, and the Divine victory over all evil is always confidently anticipated. (See articles PSEUDEPIGRAPHA, DEVIL, ESCHATOLOGY.)

While in the Bible there are these traces of the threefold dualism, it is never developed; and monotheism is throughout maintained, God's sole eternity, ultimate causality, and final victory being asserted, while God is distinguished from the world, and in the world a distinction between matter and mind is recognized.

A. E. G.

DUKE.—The title of 'duke' in the AV has a very general meaning. It is an inheritance from the English versions, in which (after Vulg. *dux* 'duke' meant any leader or chief. Latimer calls Gideon a duke, and Wycliffe uses this title of Christ, as in his *Works* (iii. 137), 'Jesus Christ, duke of oure batel.' The title of 'duke' is confined in AV to the chiefs of Edom (RV also has 'dukes,' but RSV 'chiefs'), with the exception of Jos 13^{21} 'dukes of Sihon' (RV, RSV 'princes'), and 1 Mac 10^{65} (applied to Jonathan Maccabaeus; RV 'captain,' RSV 'general').

DULCIMER.—This term, which denotes a *stringed* instrument (? the mediaeval 'psaltery'; see MUSIC, 4

1) (*b*)), is given incorrectly by AV, RV in Dn 3[5, 15] as translation of *sûmpônyāh* (Gr. loan-word), which probably = 'bagpipe' (so RSV); see MUSIC, 4 (2) (*d*).

DUMAH.—1. Cited in Gn 25[14], 1 Ch 1[30] as among the twelve tribes of Ishmael. The region thus indicated is supposed to be the oasis formerly called by the Arabs *Dûmat el-Jendel* and now known as *el-Jôf*, about three-fourths of the way from Damascus to Medina. The same place may be referred to in the obscure oracle Is 21[11], but the LXX has 'Idumaea,' and it is possible that Edom is meant. **2.** The name of a town in the highlands of Judah (Jos 15[52]). The reading is not certain. The LXX and Vulgate indicate *Rumah*, and not all editions of the Hebrew agree. If the received text is correct, an identification may be plausibly made with *ed-Dômeh* 10 miles SW. of Hebron. J. F. McC.

DUMBNESS.—See MEDICINE.

DUNG.—1. Used in the East as manure (Lk 13[8]) and for fuel; especially that of cattle, where wood and charcoal are scarce or unattainable. Directions for personal cleanliness are given in Dt 23[13–14]; and in the case of sacrifices the dung of the animals was burnt outside the camp (Ex 29[14], Lv 4[11f., 8]17, Nu 19[5]). **2.** The word is used (*a*) to express contempt and abhorrence, as in the case of the carcase of Jezebel (2 K 9[37]); and in that of the Jews (Jer 9[22], Zeph 1[17]). (*b*) To spread dung upon the face was a sign of humiliation (Mal 2[3]). (*c*) As representing worthlessness, Paul counted all things but dung that he might win Christ (Ph 3[8]).

DUNG GATE.—See JERUSALEM, GATES OF.

DURA, PLAIN OF.—Mentioned Dn 3[1]. The precise locality is uncertain, but it must have been in the vicinity of Babylon. Perhaps the name is derived from the Babylonian *dūru* = 'wall,' which is frequently used as a town name. Oppert (*Exped. en Mésop.* I. 238) found a small river so named, falling into the Euphrates 6 or 7 miles SE. of Babylon, the neighbouring mounds being also named *Tulûl Dûra* (cf also Baumgartner, *ZAW* xliv, 40 n.). A curious Talmudic legend makes this plain the scene of Ezekiel's vision (37[1–14]), which it regards as an actual event (*Sanh.* 92 *b*).

DWARF.—The rendering in EV in Lv 21[20] of *daḳ*, a word denoting one of the physical disqualifications by which a priest was unfitted for service. The word means *thin, lean, small*. The conjecture that it here means a dwarf is plausible. But others regard it as meaning an unnaturally thin man—a consumptive, perhaps.

DYEING.—See ARTS AND CRAFTS, 6; COLOURS, 6.

DYSENTERY.—See MEDICINE.

E

EAGLE.—The Hebrew *nesher*, whose name is an onomatopoeic term describing a bird that drops flashing through the air, is commonly taken as the eagle (LXX and Vulgate). It certainly is the 'imperial eagle' (*aquila heliaca*), which is very common in Palestine, when described as flying towards heaven (Pr 23[5]); for, having a peculiar membrane over the eyes, it can see against the sun, as the Ugaritic *nšr* can do (Aqhat I. ii. 56–57; cf Shakespeare 3 *Henry the Sixth* II. i. 91–92). In passages referring to its speed (2 S 1[23], Jer 4[13], La 4[19]) the 'golden eagle' (*aquila chrysaetus*), which can attain a speed of 3 or 4 miles in 10 minutes, may be meant; and the female of this eagle has been seen, even though only on a few occasions, to catch her falling young and carry it off on her back (Ex 19[4], Dt 32[11]). Contrariwise, when reference is made to its bald patch (Mic 1[16]), the bird is the 'griffon-vulture' (*gyps fulvus*) which has a white patch giving the effect of baldness on its head; and the same bird is remarkable for the width of its wings (Ezk 17[3]), which may reach 8 or 10 feet across. Further, this bird begins the consumption of its victims by attacking the eyes and other soft parts of the body; and this habit explains the proverb about the unfilial son (Pr 3[7]). Other features characteristic of vultures rather than eagles are nesting on cliffs (Jer 44[16]; cf Job 39[27–30]), which vultures regularly and eagles (which also build on trees) only sometimes do, and gathering from distant places to devour the spoil (Dt 28[49], Hab 1[8]); for, while eagles are mostly solitary, vultures often congregate in considerable numbers from invisible distances, for which their keen sight is invaluable (Jer 44[22]), to devour dead or dying beasts. The description of the *nesher* as renewing its youth (Ps 103[5]; cf Is 40[31]) is an allusion to the notion that moulting gives it fresh strength. The Hebrew *nesher*, then, like the Arabic *nisr*, designates eagles and vultures of every kind, and which of the 8 eagles and 4 vultures found in Palestine is meant will depend on the context. The Greek *aetos*, which also is an onomatopoeic term (cf Heb. *'ayiṭ* 'bird of prey' from *'âṭ* 'screamed'), is used for both the eagle and the vulture, which is clearly intended in the NT (Mt 24[28], Lk 17[37]); elsewhere identification is uncertain (Rev 4[7] 12[14]).

The Hebrew *rāḥām*(*āh*), variously mistranslated 'swan' and 'peacock' (LXX), 'coot,' or 'moorhen' (Vulgate) is another raptor, since it is classed as unclean (Lv 11[18], Dt 14[17]); it can hardly be the 'gier-eagle' (AV) or 'vulture' (RV, RSV; in Dt 14[17] RSV 'carrion vulture'), since these are otherwise named. The Arabic *raḥamu* 'white carrion-bird' cannot override this fact; but this word, as well as *'arḥamu* 'horse) having a white back and black body' and *ruḥâmu* 'soft white stone,' suggests the 'osprey' (*pandion haliaetus*), an almost cosmopolitan bird found also in Palestine; for it is a large brown bird whose head and nape are white with brown streaks and its lower parts white. If so, it appropriately heads the aquatic birds in the list of unclean birds. G. R. D.

EANES, 1 Es 9[21] (AV).—See MAASEIAH, 2.

EAR.—Both in OT and NT the spiritual disposition to attend, which issues in obedience, is thus designated (*e.g.* Is 6[10], Mt 11[15], Rev 2[7]). Hence 'to uncover the ear' (RVm, 1 S 9[15] etc.) = to reveal; the 'uncircumcised ear' (Jer 6[10] AV, RV; RSV 'closed') = the ear which remains unpurified and clogged and therefore unable to perceive; hence 'thou hast given me an open ear' (Ps 40[6]) = Thou hast enabled me to understand. The perforated ear was a sign of slavery or dependence, indicating the obligation to attend (Ex 21[6], Dt 15[16f]). The tip of the priest's right ear was touched with blood in token that the sense of hearing was consecrated to God's service (Ex 29[20], Lv 8[23]).

EARING.—Gn 45[6] (AV), 'There shall be neither earing nor harvest.' 'Earing' is the old expression for 'ploughing' (RV, RSV 'plowing'). The verb 'to ear' (connected with Lat. *arare*) also occurs, at Dt 21[4] 'a rough valley, which is neither eared nor sown' (RV, RSV 'plowed').

EARNEST.—In 2 Co 1[22] 5[5], Eph 1[14] AV, St. Paul describes the Holy Spirit as the believer's 'earnest,' RSV 'guarantee.' The word means 'part-payment,' the deposit being the same in kind as what is to follow. Cf Tyndale's (1533) use of 'earnest-penny': 'that assured saving health and earnest-penny of everlasting life.' Rabbi Greenstone (*JE* v, 26) quotes *Kid.* 3*a* to the effect that the payment of a *peruṭah*, the smallest coin of Palestinian currency, on account of the purchase, was sufficient to bind the bargain. The Greek word

was probably introduced by the Phoenicians. Deissmann (*Bible Studies*, pp. 108 f) shows that in 2 Co 1[21] the verb 'establishes' connotes a legal idea and stands in 'an essential relation' to 'earnest' in v.[22]. St. Paul represents the relation of God to believers under the image of 'a legally guaranteed security.' J. G. T.

EAR-RING.—See ORNAMENTS, 2.

EARTH in OT stands for one or other of the Hebrew words *'ereṣ* and *'ᵃdhāmāh*. In AV these are rendered indiscriminately 'earth' and '**ground,**' but RV distinguished them by using, to some extent, 'earth' for the former, and 'ground' for the latter. Both words have a wide range of meanings, some of which they possess in common, while others are peculiar to each. Thus *'ereṣ* denoted: (*a*) earth as opposed to heaven (Gn 1[1]), and (*b*) dry land as opposed to sea (1[20]). *'ᵃdhāmāh* is specially used: (*a*) for earth as a specific substance (Gn 2[7], 2 K 5[17]); and (*b*) for the surface of the ground, in such phrases as 'face of the earth.' Both words are employed to describe (*a*) the soil from which plants grow, *'ᵃdhāmāh* being the more common term in this sense; (*b*) the whole earth with its inhabitants, for which, however, *'ᵃdhāmāh* is but rarely used; and (*c*) a land or country, this also being usually expressed by *'ereṣ*. In one or two cases it is doubtful in which of the two last senses *'ereṣ* is to be taken, *e.g.* Jer 22[29] (AV, RV 'earth'; RVm, RSV 'land').

In NT the Greek words for 'earth' are *gē* and *oikoumenē*, the former having practically all the variety of meanings mentioned above, while the latter denoted specially the whole inhabited earth, and is once used (He 2[5]) in a still wider sense for the universe of the future. See WORLD. J. Pk.

EARTHQUAKE.—The great Rift Valley, and the associated faulting on either side, show that Palestine must have suffered intense earthquake activity in geological history. This activity is not yet quite exhausted, earth tremors being not uncommon, and a major earthquake occurring about twice a century. Great damage and loss of life on both sides of the Jordan were caused by the last earthquake in 1927, and more recently slight tremors have shaken the structure of the Holy Sepulchre and the Dome of the Rock. A severe earthquake occurred in the reign of Uzziah and was long remembered (Am 1[1], Zec 14[5]). Josephus records another at the time of the battle of Actium, in the seventh year of the reign of Herod the Great (*Ant.* xv. v. 2 [121]), and the imagery of an earthquake is common in the OT.

Among the earthquakes which belong to the OT accounts of theophanies, or Divine manifestations of wrath, must be included such references as Ex 19[18], 1 K 19[11], Nu 16[31], Ps 18[7] 68[8] 104[4], Is 29[6] etc. In the NT an earthquake is recorded during St. Paul's imprisonment at Philippi (Ac 16[26]), and Matthew speaks of earthquakes at the Crucifixion and Resurrection (Mt 27[51, 54] 28[2]). Further, it is foretold that there shall be earthquakes at Christ's second coming (Mt 24[7], Mk 13[8], Lk 21[11]); their mention in Revelation is characteristic of apocalyptic literature. W. O. E. O.—A. D. B.

EAST GATE.—The name of a gate of Jerusalem, Neh 3[29]. In Jer 19[2], where AV has 'east gate' we should read **Potsherd Gate** (q.v.), with RVm, RSV.

EAST, PEOPLE OF THE.—A common designation of the inhabitants of the Syrian desert (AV, RV 'children of the east'), who were partly Aramaean and partly Arabian (Jg 6[3] 8[10], Ezk 25[4, 10], Is 11[14], Jer 49[28], Job 1[3]). Certain of them had obtained great renown for wisdom (1 K 4[30]).

EAST SEA, EASTERN SEA.—See DEAD SEA.

EASTER (AV of Ac 12[4]; RV, RSV 'the Passover').—The anachronism of AV was inherited from older VSS which avoided, as far as possible, expressions which could not be understood by the people.

EBAL.—1. Name of a son of Joktan, 1 Ch 1[22]; called **Obal** in Gn 10[28]. The name probably represents a place of tribe in Arabia. **2.** A son of Shobal son of Seir, Gn 36[23], 1 Ch 1[40].

EBAL.—Now *Jebel Eslāmîyeh*, a mountain N. of *Nâblus* (Shechem), 1207 feet above the valley, 3077 feet above the sea. Ruins of a fortress and of a building called a 'little church' exist on its summit, as well as a Mohammedan shrine said to contain the skull of John the Baptist. The mountain commands an extensive view over almost the whole of Galilee, which includes points from Hermon to Jerusalem and from the sea to the Hauran. On this mountain Joshua built an altar and erected a monument bearing the law of Moses (Jos 8[30]); and the curses for breaches of the moral law were here proclaimed to the assembled Israelites on their formally taking possession of the Promised Land (Dt 11[29] 27[4, 13], Jos 8[33]). R. A. S. M.

EBED.—1. The father of Gaal, Jg 9[26ff]. **2.** One of those who returned from Babylon with Ezra, Ezr 8[6]; called **Obed** in 1 Es 8[32] (AV, RV **Obeth**).

EBED-MELECH.—An Ethiopian eunuch, by whom Jeremiah was released from the pit-prison (Jer 38[7ff] 39[15ff]). It is possible that the name *Ebed-melech*, which means 'servant of [the] king,' may have been an official title.

EBEN-EZER ('the stone of help' [LXX 'of the helper']).—**1.** The scene of a disastrous battle in which the Ark was lost, 1 S 4[1] 5[1]. **2.** The name of the stone erected to commemorate an equally glorious victory, 7[12]. The precise situation is uncertain, but if Jeshanah, 7[12] (RSV; AV, RV **Shen**) is modern *Burj el-Isâneh*, the locality is approximately defined. Samuel's explanatory words should be read thus: 'This is a witness that Yahweh has helped us.'

EBER.—1. The eponymous ancestor of the Hebrews (the first letter in both words being the same in the Hebrew), the great-grandson of Shem, and 'father' of Peleg and Joktan (Gn 10[21, 25] 11[14ff]). He is mentioned in Lk 3[35] in the genealogy of Jesus. The word *'ēbher* signifies 'the other side,' 'across'; and *'ibhri*, '**Hebrew,**' which is in form a gentilic name, denoting the inhabitant of a country or member of a tribe, is usually explained as denoting those who have come from *'ēbher han-nāhār* (see Jos 24[2, 3]), or '*the other side* of the River' (the Euphrates), *i.e.* from Haran (Gn 11[31]), in Aram-naharaim, the home of Abraham and Nahor (Gn 24[4, 7, 10]).

Many writers have connected the word Hebrew rather with the *Ḫabiru* (or *Ḫapiru*) mentioned in the Tell el-Amarna letters, or with the *'Apiru* of Egyptian texts. No simple equation can be made here, however, since the *Ḫabiru* were very widely spread in the early part of the 2nd millennium B.C. and included far more than the Israelites or Hebrews. In many texts the term has social rather than ethnic significance. See HABIRU.

2. A Gadite, 1 Ch 5[13] (AV **Heber**). **3.** A Benjamite, 1 Ch 8[12]. **4.** Another Benjamite, 1 Ch 8[22] (AV **Heber**). **5.** Head of a priestly family, Neh 12[20]. **6.** Eber is mentioned with Asshur in Nu 24[24]; but the meaning here is quite uncertain. S. R. D.—H. H. R.

EBEZ.—A city of Issachar, Jos 19[20] (AV **Abez**). The site is unknown.

EBIASAPH ('father has increased').—See ABIASAPH.

EBONY.—Hebrew *hobhnîm* (Ezk 27[15]) is the black heart-wood of the date-plum, *Diospyros ebenum*, imported from S. India and Ceylon. It was extensively imported by Phoenicians, Babylonians, and Egyptians for the manufacture of valuable vessels and of idols. In Am 4[15] for 'great houses' some editors read 'houses of ebony.' E. W. G. M.

EBRON.—A town of Asher, Jos 19[28] (AV **Hebron**), probably the same as **Abdon, 5** (q.v.).

ECBATANA.—The capital of Media (in Old Persian *Haghmatāna*), modern *Hamadân*. The Aramaic form of the name is **Achmetha** (AV, RV in Ezr 6[2]). It is mentioned but once in the canonical books as the place where the archives of the reign of Cyrus were deposited

Ezr 6[2]), but it stands several times in the Apocrypha (2 Mac 9[3], To 3[7] 6[5] 7[1] 14[13f], Jth 11[1f, 14]).

ECCLESIASTES.—1. Title and Canonicity.—The title has come to us through Jerome from the LXX, in which it was the translation of the Hebrew **Ḳōheleth,** which in form is a feminine singular participle, apparently a title used as a proper name after the order of *Sōphereth* (*Ezr* 2[55]) and *Pōkhereth* (v.[57]), but the exact meaning is quite unknown. That which accords best with the character of the book is 'one who assembles wise sayings for the purpose of teaching' (cf 12[9ff]). The book belongs to the third group in the Hebrew Bible—the *Kᵉthûbhîm* or 'Writings'—which were the latest to receive recognition as canonical Scripture. After long controversy between the Palestinian school of Shammai and the less stringent Babylonian school of Hillel, it was finally accepted by A.D. 100. In Judaism it is read on the third day of the Feast of Booths (Tabernacles).

2. Author and Date.—The book contains the outpourings of the mind of a rich Jew, at the beginning of the 2nd cent. B.C. We may perhaps gather that he was in a high station of life, for otherwise his very unorthodox reflexions could hardly have escaped oblivion. He could provide himself with every luxury (2[4-10]). But he had private sorrows and disappointments; 7[26-28] seems to imply that his life had been saddened by a woman who was unworthy of him. He was apparently an old man, because his attempts to find the *summum bonum* of life in pleasure and in wisdom, which could hardly have been abandoned in a few years, were now bygone memories (1[2]–2[11]). And he lived in or near Jerusalem, for he was an eye-witness of events which occurred at the 'holy place' (8[10]). That is all that he reveals about himself. But he paints a lurid picture of the state of his country. The king was 'a child' (10[16a])—much too young for his responsible position, and his courtiers spent their days in drunken revelry (v.[16b]); he was capricious in his favouritism (vv.[5-7]), violent in temper (v.[4]), and despotic (8[2a, 4]). The result was that wickedness usurped the place of justice (3[16]), and the upper classes crushed the poor with an oppression from which there was no escape (4[1]); the country groaned under an irresponsible officialism, each official being unable to move a finger in the cause of justice, because he was under the thumb of a higher one, and the highest was a creature of the tyrannous king (5[7]); and in such a realm of social rottenness espionage was rife (10[20]). The only passage which distinctly alludes to contemporary history is 4[13-16], but no period has been found which suits all the facts. In 8[10] an historical allusion is improbable, and 9[13-15] is too vague to afford any indication of date.

In the superscription (1[1]) *Ḳōheleth* is identified with Solomon, but the literary convention is dropped in 2[12]. That Solomon could not have been the author of the book is clear from its language. From the time of the book of Kings changes began to appear in the Hebrew language. In Ezra, Nehemiah, and Malachi the changes are more marked, and still more evident in Chronicles, Esther, and Ecclesiastes, the last named, rather clearly, the latest of them all, but somewhat earlier than Jesus ben Sira (*c* 180 B.C.), who alludes to several passages in Ecclesiastes. It may thus be dated *c* 200 B.C. or slightly earlier. The language of the book is peculiar to itself. It is manifestly the work of a North Israelite who wrote in the northern dialect of Hebrew, influenced by the spoken language of his day, which was Aramaic, and by the language of the neighbouring Phoenicians. It is only thus that certain of its usages in grammar, syntax, and vocabulary can be explained.

3. Composition.—It used to be thought that the book is full of pious interpolations, intended to counterbalance the scepticism of the original writer, but the prevailing opinion to-day is that it is the work of a single author with very few interpolations, of which the clearest is 12[9-14], which was probably added by a pupil. *Ḳōheleth* lived in an age when there was much intermingling of cultures throughout the Near East, from west to east through the Greeks, and from east to west through the Phoenicians. It was the Phoenician Zeno who brought Stoicism to Greece, and it was the Greek Epicurus who developed a counter-philosophy that swept the world and aroused everywhere the thinking of man on the problem of life, and amongst those stimulated by the clashing currents of thought was the author of Ecclesiastes. Like Jesus ben Sira he was a member of the wisdom school, a professional teacher of wisdom, an honest thinker who bared his soul to the world, with all its perplexities and doubts. He wrote partly in prose and partly in poetry.

4. Ḳoheleth's reflections.—(*a*) *His view of life.*—After the exordium (1[1]–2[11]), in which, under the guise of Solomon, he explains that he made every possible attempt to discover the meaning and aim of life, the rest of his writing consists of a miscellaneous series of pictures, illustrating his recurrent thought that 'all is vanity and a striving after wind' (2[17]), or better translated, 'everything is futile and fret of spirit.' And the conclusion at which he arrives is that man can aim at nothing, can guide himself by nothing. His only course is to fall back on present enjoyment and industry, and to this conclusion he incessantly returns whenever he finds life's mysteries insoluble: 2[24f] 3[12f, 22] 5[17-19] 8[15] 9[7-10] 11[1-10] 12[1-7].

(*b*) *His religious ideas.*—It is improbable that he read Greek or came into immediate contact with any of the Greek schools of thought, but Greek ideas were in the air, and they undoubtedly helped to mould his thought. His statements regarding chance and destiny seem tinged with Epicureanism, and likewise his idea that the enjoyment of life is man's highest good, and his belief that there is no future life (3[19ff]). His idea of the cyclic recurrence of natural phenomena (1[5ff]) is close to Stoicism, and closer still is his statement in 12[7] that 'the dust returns to the earth as it was, and the spirit returns to God who gave it.' But there is little, if anything, that a thinking Jew of a philosophical turn of mind could not have arrived at independently. *Ḳoheleth* occupies what may be called debatable ground between Semitic and Greek thought. He has lost the vitality of belief in a personal God, which inspired the prophets, and he takes his stand on a somewhat colourless monotheism. He never uses the personal name 'Yahweh,' but always the descriptive title 'Elohim' (four times), 'God,' or 'the Elohim' (sixteen times), 'the Deity' who manifests Himself in the inscrutable and irresistible forces of Nature. At the same time he never commits himself to any definitely pantheistic statements. He has not quite lost his Semitic belief that God is more than Nature, for God's action shows evidence of design (3[11, 18, 22] 6[12b] 7[14] 8[17] 11[5]). Moreover, God's work—the course of Nature—appears in the form of an endless cycle. Events and phenomena are brought upon the stage of life and then banished into the past, only to be recalled and banished again (1[4-11] 3[15]). And this, for *Ḳōheleth*, paralyses all real effort; for no amount of labour can produce anything new or of real profit—no one can add to, or subtract from, the unswerving chain of facts (1[15] 3[1-9, 14a] 7[13]); no one can contend with him who is mightier than he (6[10]). *Ḳōheleth* gains no relief from the expectation of Messianic peace and perfection, which animated the orthodox Jew of his day. There are left only the shreds of the religious convictions of his fathers, with a species of 'natural religion' which has fatalism and altruism among its ingredients.

5. The value of the book for us lies largely in the light that it sheds on Jewish thinking in its time. Here was a man who dared to delve deep into the riddle of the universe, even though he had to end up with most of his problems unsolved, and for his candour and honesty he has been justly praised. As one of his own pupils says of him in 12[10], '*Kōheleth* tried to find pleasing words, but honestly to write down the truth,' and his courage in a day not so tolerant as our own must ever be a challenge to all his readers even to-day.

A. H. McN.—T. J. M.

ECCLESIASTICUS.—See APOCRYPHA, 7.

ECLIPSE.—See SUN.

ECSTASY.—No completely satisfactory psychological definition of the term *ecstasy* has ever been formulated. The common feature of all ecstasies is the increased activity of certain functions of the psyche. Consciousness, will, and sensory perception are often depressed or altogether suspended. The subject experiences a temporary access of extraordinary power or receptivity and may speak or act in a very abnormal manner. Greek literature employs the word in this sense and in several others. Philo, for example, distinguishes four kinds of ecstasy and describes the last as 'what happens to the man who is divinely possessed and inspired' (*Quis rerum divinarum heres*, 258). The human *nous*, withdrawing when the Spirit approaches, does not resume its place until the ecstasy is over. This extreme view has no real Biblical counterpart, despite a multitude of references to phenomena of a more or less ecstatic nature (Nu 11^{25}, Jg 14^{19}, 1 S 19^{23f}, 1 K 19^{9ff}, 2 K 3^{15}, Is 21^{1-10}, Jer 4^{19-21}, Mk 1^{9ff}, Ac 9^{3ff} 22^{17ff}). LXX *ekstasis* and *existēmi* translate a rich Hebrew vocabulary denoting partly the symptoms of fear (occasionally joy) and similar emotions and partly the states themselves. Much of this 'ecstasy' is the immediate result of God's action. NT usage has approximately the same range, with emphasis on amazement at God's wonders. Yet even in passages like Ac 10^{9ff} 11^{5ff} and—to cite an example of the experience without the name—2 Co 12^{2ff} the NT is far removed from Philo's idea of ecstasy. All in all, the Biblical attitude towards 'ecstasy' is wholesomely and soundly critical. See also PROPHECY. W. C. K.

ED.—In the Hebrew (and also in the Greek) text of Jos 22^{34} the name given by the two and a half tribes to the altar erected by them on the east bank of the Jordan has dropped out. Our English translators have filled the gap by inserting *Ed* (AV, RV) = *Witness* (RSV) as the name of the altar in question. For this they have the authority of a few MSS.

EDAR, Gn 35^{21} (AV).—See EDER, **1.**

EDDIAS, 1 Es 9^{26} (AV).—See IZZIAH.

EDDINUS.—One of the 'holy houses' at Josiah's passover (1 Es 1^{15}). In the parallel passage 2 Ch 35^{15} the corresponding name is **Jeduthun,** which is read also, contrary to MS authority, by AV in 1 Esdras. The text of the latter is probably corrupt.

EDEN.—2 Ch 29^{12} 31^{15}, a Levite, or possibly two. It is not certain that *Eden* is the true form of the name: LXX has *Jodan* in the first, *Odom* in the second passage. When it transliterates Eden elsewhere it is usually in the form *Edem.*

EDEN.—Mentioned in 2 K 19^{12}, Is 37^{12}, where the 'people of Eden' are said to have been in **Telassar** (q.v.), and to have been conquered by the Assyrians. Eden was in trade relations with Tyre, Ezk 27^{23} (see CANNEH). It is probably to be identified with the *Bît Adini* of the Assyrian inscriptions, situated S. of Haran. See BETH-EDEN.

EDEN, GARDEN OF.—The JE account of creation is a composite narrative consisting of two interwoven strands of different origin. The first has a Palestinian background and represents the scene of Yahweh's creative activities as a waterless steppe where nothing grows and no rain has fallen. The Yahwist has interwoven with this a myth of Mesopotamian origin which represents Yahweh, after forming man out of 'dust' from earth (*ʾᵃdhāmāh*), as 'planting' a garden in Eden, in the east (*miḳḳedhem*), where He placed the man whom He had formed. Much ingenuity has been expended on the question of the locality of Eden, but recent research has shown that the original source of the Eden myth is to be found in the Sumerian myth of Enki and Ninhursag. In this text (translated in *ANET*, pp. 37–41; explained by Jacobsen in *The Intellectual Adventure of Ancient Man*, pp. 157–160), the Sumerian paradise was located in the land of Dilmun, a land that was probably situated in SW. Persia. In this 'land of the living' there was neither sickness nor death, and the animals did not harm one another. It was watered by fresh water brought up from under the earth. Among other details the myth provides an explanation why Adam's rib was chosen as the material from which Eve was formed. There can be little doubt that this Sumerian myth, taken over by the Semitic invaders of Sumer and Akkad, is the ultimate source of the myth in the form in which it was known to the Yahwist. By him it was purged of its grossness and made the great symbolic picture of man's state before the act of disobedience which broke the relationship between God and man and 'brought death into the world and all our woe.' According to the myth Eden was the source whence the four great rivers of the world flowed, and while two of them, the Tigris and the Euphrates, are mentioned by their Hebrew names, the other two, Gihon and Pishon, cannot be identified, although many untenable suggestions have been put forward. Neither can the 'land of Havilah' be identified. It is clear that we are dealing with mythical cosmography, and not with any real geography. There are a number of references in the OT to the mythical garden, and the detailed description in Ezk 28^{11-19} shows that there were other forms of the myth known to the Hebrew writers. In that great lamentation for the king of Tyre the garden is placed in the mountain of the gods and is the abode of 'the anointed cherub,' a semi-divine being, who falls from his high estate by reason of pride, 'thy heart was lifted up.' Other references to the garden occur in Gn 13^{10}, Is 51^{3}, Jl 2^{3}, Rev 2^{7}. The word 'Paradise' which is used in the NT is the LXX form of the Hebrew word *pardēs*, a Persian loan-word, meaning an enclosed garden, or park (Neh 2^{8}, Ca 4^{13}, Ec 2^{5}). The theme of the garden has been much expanded in later apocalyptic literature, and has coloured the description of the heavenly city in Rev 21.

S. H. He.

EDEN, HOUSE OF, Am 1^{5} (AV, RV).—See BETH-EDEN.

EDER.—1. Gn 35^{21} 'And Israel journeyed, and spread his tent beyond the tower of Eder' (AV **Edar**). '*Edher* means 'a flock'; and the phrase **Migdal-eder** ('tower of the flock,' cf Mic 4^{8}) would have been the appellation given to a tower occupied by shepherds for the protection of their flocks against robbers (cf 2 K 18^{8}, 2 Ch 26^{10}). The tower here mentioned lay between Bethlehem and Hebron (cf vv.$^{19, 27}$). Jerome mentions a Jewish tradition that this Eder was the site of the Temple, but himself prefers to think that it was the spot on which the shepherds received the angels' message. **2.** A town of Judah, in the south, near the Edomite frontier, Jos 15^{21}; possibly identical with **Arad, 1** (q.v.). **3.** A Merarite Levite in the days of David, 1 Ch 23^{23} 24^{30}. **4.** A Benjamite, 1 Ch 8^{15} (AV **Ader**).

EDES, 1 Es 9^{35} (AV).—See IDDO, **3.**

EDNA.—Wife of Raguel of Ecbatana, and mother of Sarah, who became wife of Tobias (To 7^{8} 10^{12} 11^{1}).

EDOM, EDOMITES.—The Edomites were a tribe or group of tribes residing in early Biblical times in Mount Seir (Gn 32^{3}, Jg 5^{4}), but covering territory on both sides of it. At times their territory seems to have included the whole region from the Dead Sea to the Red Sea and Sinai (1 K 9^{26}, Jg 5^{4}). The original population of this region were the Horites (Hurrians) whom the Edomites dispossessed at some early time in their history (Dt 2^{12}, Gn 14^{6} 36^{21f}). Edom or **Esau** was their reputed ancestor. The Israelites were conscious that the Edomites were their near kinsmen and an older nation, hence the tradition that Esau was the firstborn twin brother of Jacob (Gn 25^{24f}). The story how Jacob tricked Esau out of his birthright (Gn 27), with the result that enmity arose between the brothers, is an actual reflection of the hostile relations of the Edomites and Israelites, for which the latter were to a considerable degree responsible.

Before the conquest of Canaan, Edom is said to have refused to let Israel pass through his territory. During the monarchy Saul fought the Edomites (1 S 14^{47}) and

David conquered Edom and put garrisons in the country (2 S 8^{13f}). Solomon exploited the rich copper and iron mines of Edom and built the metal-manufacturing city of Ezion-geber on the Gulf of 'Aqaba as N. Glueck's explorations have revealed (*AASOR*, xv [1935], 22 ff; *BASOR*, 71 [1938], 3–18; 72 [1938], 2–13; 75 [1939], 8–22; 79 [1940], 2–18). Ezion-geber also served as port of departure for Solomon's Ophir expeditions (1 K 9^{26}, 2 Ch 8^{17}). These evidences show how important Edom had become in the economy of Solomon's empire. The country seems to have regained its independence shortly before Solomon's death (1 K 11$^{14-22}$), but Jehoshaphat reconquered it a century later during his reign (cf 1 K 22^{47f}), and Edomites helped him in his war with Moab (2 K 3). In the reign of Joram, his successor, the Edomites regained their independence after a bloody revolution (8$^{20-22}$). At the beginning of the 8th cent. B.C. Amaziah reconquered them for a short time. He even captured Sela, their capital, slaughtering a large number of Edomites (2 K 14^{7}). However, Edom quickly regained its independence from Judah, and took revenge on his former masters. Amos accuses Edom of pursuing his brother with the sword (Am 1^{11f}).

In Assyrian records Edom appears for the first time under Adadnirari III., spelled *Udummu* (*ANET*, p. 281b). King Kaushmalaku of Edom paid tribute to Tiglath-pileser III. (*ANET*, p. 282a) and Aiarammu to Sennacherib (*ANET*, p. 287b), while Esarhaddon summoned to him Qaushgabri, King of Edom (*ANET*, p. 291a), who also paid tribute to Ashurbanipal (*ANET*, p. 294a).

In connexion with the wars of Nebuchadnezzar, which resulted in the destruction of Jerusalem in 586 B.C., many Jews migrated to Edom (Jer 40^{11}); but the Edomites rejoiced in the overthrow of the Jews. This deepened the old-time enmity, and called forth bitter denunciations and predictions of vengeance from Israel's prophets (cf Ezk 25$^{12-14}$, Ob 1^{ff}). A little later the **Nabataeans** overran Edom and pushed the Edomites into southern Judah. This invasion of Nabataeans is probably referred to in Mal 1^{4ff}, for by 312 B.C. they were in this region and Antigonus and Demetrius came in contact with them (cf Diodorus Siculus, x. 95, 96, 100).

From that time on the Edomites occupied the territory of Judah as far north as Beth-zur, which became the **Idumaea** of the NT period. Here Judas Maccabaeus fought with the Edomites (1 Mac 5$^{3, 65}$), and John Hyrcanus shortly before the end of the 2nd cent. B.C. conquered them, and compelled them to be circumcised and to accept the Jewish religion (cf Jos. *Ant.* XIII. ix. 1 [257], XIV. i. 3 [8], and XV. vii. 9 [254]). This was the end of the Edomites as a nation, but they obtained a kind of revenge on the Jews by furnishing the Herodian dynasty to them. G. A. B.—S. H. Hn.

EDOS, 1 Es 9^{35} (RV).—See IDDO, 3.

EDREI.—1. A royal city of Og, king of Bashan (Dt 1^{4} 3^{10}, Jos 12^{4} 13^{12}), the scene of the battle at which Og was defeated (Nu 21^{33}, Dt 3^{1}); assigned to the eastern division of Manasseh (Jos 13^{31}). It seems to be the modern *Der'â*, where are several important remains of antiquity, including a great subterranean catacomb. **2.** A town in Naphtali, Jos 19^{37}. It was near Kedesh, possibly modern *Tell Khureibeh*.

EDUCATION.—In the importance which they attached to the education of the young, it may fairly be claimed that the Hebrews were *facile princeps* among the nations of antiquity. Indeed, if the ultimate aim of education be the formation of character, the Hebrew ideals and methods will bear comparison with the best even of modern times. In character Hebrew education was predominantly, one might almost say exclusively, religious and ethical. Its fundamental principle may be expressed in the familiar words: 'The fear of the Lord is the beginning of knowledge' (Pr 1^{7}). Yet it recognized that conduct was the true test of character; in the words of Simeon, the son of Gamaliel, that 'not learning but doing is the chief thing.'

As to the educational attainments of the Hebrews before the conquest of Canaan, it is useless to speculate. On their settlement in Canaan, however, they were brought into contact with a civilization which for a thousand years or more had been under the influence of Babylonia, and in a less degree of Egypt. The language of Babylonia, with its complicated system of wedge-writing, had for long been a medium of communication not only between the rulers of the petty states of Canaan and the great powers outside its borders. The Canaanites themselves had developed an alphabetic system of writing, and an extensive literature This implies the existence of some provision for instruction in reading and writing. Although in this early period such accomplishments were probably confined to a limited number of high officials and professional scribes, the incident in Gideon's experience, Jg 8^{14} (where we must render with RSV 'wrote down'), warns us against unduly restricting the number of those able to read and write in the somewhat later period of the Judges. The more stable political conditions under the monarchy, and in particular the development of the administration and the growth of commerce under Solomon, must undoubtedly have furthered the spread of education among all classes.

Of **schools** and schoolmasters, however, there is no evidence till after the Exile, for the expression 'schools of the prophets' has no Scripture warrant. Only once, indeed, is the word 'school' to be found even in NT (Ac 19^{9}), and then only of the lecture-room of a Greek teacher in Ephesus. The explanation of this silence is found in the fact that the Hebrew child received his education in the home, with his parents as his only instructors. Although he grew up ignorant of much that 'every school-boy' knows to-day, he must not on that account be set down as uneducated. He had been instructed, first of all, in the truths of his ancestral religion (see Dt 6$^{20-25}$ and elsewhere); and in the ritual of the recurring festivals there were provided for him object-lessons in history and religion (Ex 12^{26f} 13$^{8, 14}$). In the traditions of his tribe and nation some of which are still preserved in the older parts of OT—he had a unique storehouse of the highest ideals of faith and conduct, and these after all are the things that matter.

Descending the stream of history, we reach an epoch-making event in the history of education, not less than of religion, among the Jews, in the assembly convened by Ezra and Nehemiah (Neh 8^{1ff}), at which the people pledged themselves to accept 'the book of the law of Moses' as the norm of their life in all its relations. Henceforward the Jews were pre-eminently, in Mohammed's phrase, 'the people of the Book.' But if the Jewish community was henceforth to regulate its whole life, not according to the living word of priest and prophet, but according to the requirements of a written law, it was indispensable that provision should be made for the instruction of all classes in this law. To this practical necessity is due the origin of the **synagogue** (q.v.), which, from the Jewish point of view, was essentially a meeting-place for religious instruction, and, indeed, is expressly so named by Philo. In NT also the preacher or expounder in the synagogue is invariably said to 'teach' (Mt 4^{23}, Mk 1^{21}, and *passim*), and the education of youth continues to the last to be associated with the synagogue (see below). The situation created by this new zeal for the Law has been admirably described by Wellhausen: 'The Bible became the spelling-book, the community a school. . . . Piety and education were inseparable; whoever could not read was no true Jew. We may say that in this way were created the beginnings of popular education.'

This new educational movement was under the guidance of a body of students and teachers of the Law known as the *Sōphᵉrîm* (literally 'book-men') or **scribes**, of whom Ezra is the typical example (Ezr 7^{6}). Alongside these, if not identical with them, as many hold, we find an influential class of religious and moral teachers, known as the Sages or the Wise, whose activity culminates in the century preceding the fall of the Persian

empire (430–330 B.C.). The arguments for the identity in all important respects of the early scribes and the sages are given in Hastings' *DB* i, 648; but even if the two classes were originally distinct, there can be no doubt that by the time of Jesus ben Sira, the author of Ecclesiasticus (*c* 180–170 B.C.), himself a scribe and the last of the sages, they had become merged in one.

To appreciate the religious and ethical teaching of the sages, we have only to open the Book of Proverbs. Here life is pictured as a discipline, the Hebrew word for which is found thirty times in this book. 'The whole of life,' it has been said, 'is here considered from the view-point of a paedagogic institution. God educates men, and men educate each other' (O. Holtzmann).

With the coming of the Greeks a new educational force in the shape of **Hellenistic culture** entered Palestine —a force which made itself felt in many directions in the pre-Maccabaean age. From a reference in Josephus (*Ant.* XII. iv. 6 [191]) it may be inferred that schools on the Greek model had been established in Jerusalem itself before 220 B.C. It was somewhere in this period, too, that the preacher could say: 'Of making many books there is no end; and much study is a weariness of the flesh' (Ec 12^{12})—reflections which necessarily presuppose a wide-spread interest in intellectual pursuits. The edict of Antiochus Epiphanes at a later date (1 Mac 1^{57}) equally implies a considerable circulation of the Torah among the people, with the ability to profit by its study.

Passing now, as this brief sketch requires, to the period of Jewish history that lies between the triumph of the Maccabees and the end of the Jewish State in A.D. 70, we find a tradition—there is no valid reason for rejecting it as untrustworthy—which illustrates the extent to which elementary education, at least, was fostered under the later Maccabaean princes. A famous scribe of the period (*c* 75 B.C.), Simon ben-Shetach, brother of Queen Alexandra, is said to have got a law passed ordaining that 'the children shall attend the elementary school.' This we understand on various grounds to mean, not that these schools were first instituted, but that attendance at them was henceforth to be compulsory. The elementary school, termed 'the house of the Book' (*i.e.* Scripture), in opposition to 'the house of study' or college of the scribes (see below), was always closely associated with the synagogue. In the smaller places, indeed, the same building served for both.

The elementary **teachers,** as we may call them, formed the lowest rank in the powerful guild of the scribes. They are 'the doctors (literally teachers) of the law,' who, in our Lord's day, were to be found in 'every village of Galilee and Judaea' (Lk 5^{17} RV), and who figure so frequently in the Gospels. Attendance at the elementary school began at the age of six. Already the boy had learned to repeat the *Shema'* ('Hear, O Israel,' etc., Dt 6^{4}), selected proverbs and verses from the Psalms. He now began to learn to read. His only textbooks were the rolls of the sacred Scriptures, especially the roll of the Law, the opening chapters of Leviticus being usually the first to be taken in hand. After the letters were mastered, the teacher copied a verse which the child had already learned by heart, and taught him to identify the individual words. The chief feature of the teaching was learning by rote, and that audibly, for the Jewish teachers were thorough believers in the Latin maxim, *repetitio mater studiorum.* The pupils sat on the floor at the teacher's feet, as did Saul at the feet of Gamaliel (Ac 22^{3}).

The subjects taught were 'the three R's'—reading, writing, and arithmetic, the last in a very elementary form. The child's first attempts at writing were probably done, as in the Greek schools of the period, on sherds of pottery; from these he would be promoted to a wax tablet (Lk 1^{63} RV), on which he wrote 'with a pointed style or metal instrument, very much as if one wrote on thickly buttered bread with a small stiletto.' Only after considerable progress had been made would he finally reach the dignity of papyrus.

For the mass of young Jews of the male sex, for whom alone public provision was made—the girls being still restricted to the tuition of the home—the teaching of the primary school sufficed. Those, however, who wished to be themselves teachers, or otherwise to devote themselves to the professional study of the Law, passed on to the higher schools or colleges above mentioned. At the beginning of our era the two most important of these colleges were taught by the famous 'doctors of the law,' Hillel and Shammai. It was a grandson of the former, Gamaliel I., who, thirty years later, numbered Saul of Tarsus among his students (Ac 22^{3}). In the *Beth hammidrash* (house of study) the exclusive subjects of study were the interpretation of the OT, and the art of applying the regulations of the Torah, by means of certain exegetical canons, to the minutest details of the life of the time. See also SCHOOL.

A. R. S. K.—W. F. S.

EGG.—See FOOD, 7.

EGLAH ('heifer').—One of the wives of David, and mother of Ithream, 2 S 3^{5}, 1 Ch 3^{3}.

EGLAIM.—A town of Moab, Is 15^{8}; the site is unknown.

EGLATH-SHELISHIYAH.—A place mentioned in Is 15^{5}, Jer 48^{34}. In both these passages RV and RSV take the word to be a proper name, RV giving in margin the alternative translation '[as] an heifer of three years old,' which is AV in Jer 48^{34}. In Is 15^{5} AV omits '[as].' It is uncertain whether the word is an appellative or a proper name, although the latter view has commended itself to the majority of modern scholars.

EGLON.—King of Moab, under whose leadership the Ammonites and Amalekites joined with the Moabites in fighting and defeating the Israelites. The latter 'served,' *i.e.* paid tribute to, Eglon for eighteen years. Towards the end of this period Ehud assassinated Eglon, and brought to an end the Moabite ascendancy over Israel (Jg 3^{12ff}).

EGLON.—A town near Lachish, mentioned in connexion with the campaign of Joshua, Jos 10^{3ff} 12^{12}. Its king, Debir, joined the coalition against the Gibeonites (Jos 10^{3}), and after the reduction of Lachish Joshua captured and destroyed it (10^{34f}). It was later included in the territory of Judah, Jos 15^{39}. It is probably to be identified with modern *Tell el-Ḥesī.*

EGYPT.—Modern Egypt lies at the NE. corner of Africa and has an area of about 400,000 square miles. The inhabitable and cultivable part of Egypt, excluding Sinai and the oases to the west of the Nile, only amounts to some 12,000 square miles, and was undoubtedly less in Pharaonic times. Egypt proper has always consisted only of that part of the Nile Valley between the Mediterranean Sea in the north and the 1st Cataract (Assuan) in the south that could be reached by the annual Nile flood and the fertile alluvium it deposited. The name Egypt is derived from the Greek *Aigyptos* from Egyptian *Hutkaptah,* a name of Memphis; the principal ancient names of the land were *To-meri* (Timuris) and *Kemet* 'The Black Land.'

Egypt is composed of two distinct portions: Lower Egypt comprising the broad, fan-shaped Delta and a small part of the valley to the S. of Memphis; and Upper Egypt, the narrow valley proper. In early times Upper Egypt appears to have been subdivided at Assiut, and even earlier the effective southern boundary seems to have been Jebel Silsileh, about 45 miles N. of Assuan. Each of the two main divisions was divided into a varying number of nomes or provinces, the standard numbers being 22 and 20 in Upper and Lower Egypt respectively.

Egypt has been formed by the action of the Nile, which in rainy periods roughly corresponding to the Ice Ages in Europe, gouged out a deep valley, and in the intervening inter-pluvials deposited deep layers of gravels and alluvium on the floor of the valley. The alluvium is about 30 feet in average depth and until very recently

was accumulating by about 3 inches a century. The deposition of the alluvium thus began about 8000 B.C. and it was not until this process had continued for several thousand years that the valley floor could have been fit for occupation and exploitation by Man. Apart from the Mediterranean coast, rainfall is very slight—one or two inches per annum at Cairo, and practically nil S. of Cairo. Since the Nile receives no tributaries between Atbara (below the 5th Cataract) and the sea, the whole country is dependent on the river and wells for its water, the principal source being the annual inundation which brought both water and fertility to the soil. Egypt is equally deficient in other natural resources; its timber is useless for building, industrial or artistic purposes; it has no minerals except gold in the eastern desert and copper in Sinai. Its principal resources are the Nile mud, the basis of agriculture and an inexhaustible source of supply of mud-brick, and building stone from the cliffs—excellent limestone from Cairo to a point S. of Luxor, sandstone in the extreme south, and granite and other igneous rocks at the Cataracts.

The racial type of the Egyptians cannot be exactly defined. It is probable that the original population was composed of small groups and tribes attracted to the Nile valley by the gradual desiccation of the Sahara. The Ancient Egyptians were thus basically Hamitic in type, but essentially mixed. In modern Egypt there is a small Arab element in the population, and a rather greater negroid strain, especially in the south, but even the latter was not appreciable in Pharaonic times until after about 1500 B.C.

1. The History of Egypt.—*Chronology.*—The division of Egyptian history into thirty-one dynasties from the time of Menes, the founder of the 1st Dynasty, until the accession of Alexander the Great was the work of Manetho, an Egyptian priest who lived in the time of Ptolemy I. and II., who wrote in Greek a history of Egypt of which only a summary and the framework survive. The division into dynasties has proved to be approximately correct and has been adopted as a convenient tool, but Manetho's dates, especially those of the early dynasties, are less reliable. The Egyptians did not use era dates: in the earliest historical times each year was named after some important event, a system that was quickly succeeded by dating the events of each reign by the biennial cattle census. For the greater part of Egyptian history dating was by the regnal years of each king. By combining the evidence of Manetho, the surviving regnal years, the native king-lists and synchronisms with kings and events in neighbouring lands it is possible to draw up a loose chronological framework to part of which some precision can be given by astronomical data. The Egyptian civil year was of 365 days: it was supposed to commence on the first day of the annual rise of the Nile (19th July, Julian) on which day also occurred the heliacal rising of Sothis (Sirius). The discrepancy of a quarter of a day between the inaccurate civil year and the correct astronomical year produced a cycle of 1456 years, the Sothic Cycle. When native references to the rising of Sothis exist, events can be dated within a margin of error of four years. In this way it is possible to date the beginning of the 12th Dynasty to 1991 B.C. and by dead reckoning to assign the beginning of the 11th Dynasty to approximately 2133 B.C. Before this time there are no known Sothic dates and no absolute precision in dating is possible. Nevertheless, it is unlikely that the 1st Dynasty is to be put much earlier than 3000 B.C. and some modern authorities put it as low as 2850 B.C.

It is now customary to group the dynasties into a number of periods: the Proto-dynastic or Archaic Period (Dyns. 1 and 2, 3000–2780 B.C.); the Old Kingdom (Dyns. 3–6, 2780–2254 B.C.); the First Intermediate Period (Dyns. 8–11, 2254–1991 B.C.); the Middle Kingdom (Dyn. 12, 1991–1778 B.C.; the latter half of Dyn. 11, from 2040 B.C., would properly belong to this period); the Second Intermediate Period (Dyns. 13–17, 1778–1573 B.C.; in part contemporaneous and including the Hyksos 15th and 16th dynasties, approximately 1674–1567 B.C.); the New Kingdom (Dyns. 18–20, 1573–1085 B.C.); the Late Period (Dyns. 21–31, 1085–332 B.C., including the 25th (Ethiopian) Dynasty, 751–664 B.C., and the 26th (Saïte) Dynasty, 664–525 B.C.). Before the 1st Dynasty is the Predynastic Period, a long prehistoric period before the introduction of writing, for which no calendar dates can be presented, but it is highly unlikely that any predynastic cultures in the Nile Valley proper are to be dated much earlier than about 4500 B.C.

Historical Outline.—In Upper Egypt three *Predynastic* cultures have been found, *i.e.* people living on the valley floor or at its edges and subsequent to the prehistoric peoples of the Old Stone Age whose artefacts have been found on the river terraces. These three cultures are generally called Badarian, the earliest, Naqada I. (Amratian), and Naqada II. (Gerzean). They lived in settlements or villages, which in Naqada II. at the latest at times were genuine walled towns with mud-brick houses. Their dead were buried in cemeteries separate from the settlements. All had some knowledge of copper and practised agriculture. They made excellent hand-made pottery, some of which had painted decoration which in Naqada I. shows the influence of early Iran, and in Naqada II. that of Sumer. They clearly had a belief in some form of after-life, and their principal deity may have been the mother-goddess. These cultures are found in Upper Egypt only (and Naqada II. in Lower Nubia also). In the Fayum, at Merimde on the western edge of the Delta, and at El Omari slightly to the S. of Cairo, other predynastic sites have been found: these are entirely different from the Upper Egyptian series, they are much more primitive and do not know copper.

At the end of predynastic times a new, but not necessarily numerous, racial element entered Egypt, bringing with it influences from Sumer, notably the cylinder seal, the idea of writing, and certain architectural and artistic forms and techniques: these newcomers, however, were not Sumerians. Almost simultaneously the predynastic Upper Egyptian kingdom under Menes defeated Lower Egypt and thus united Egypt and founded the 1st Dynasty. Little detail is known of the political history of *Proto-dynastic* Egypt but it was clearly a time of very rapid development in the arts of civilization and most of the permanent features of Egyptian culture soon show themselves. Writing and written records develop slowly, the 365-day civil calendar was introduced, metal was exploited on a larger scale, magnificent stone vessels were produced, the first experiments were made in the use of stone for building, the royal tombs of the 1st Dynasty at Sakkara show a superb and exciting architecture, trading or exploring parties reached at least as far south as the 2nd Cataract, and timber was imported from Syria.

With the 3rd Dynasty we begin the *Old Kingdom.* The change is epitomized by the Step Pyramid at Sakkara, the tomb of Zoser first king of the 3rd Dynasty, and the first monumental building to be made of stone. There was rapid cultural and economic progress and a peak of power and prosperity is reached in the 4th Dynasty with its colossal pyramids, superb statuary and its very highly centralized and materialistic organization. The 5th Dynasty is marked by the triumph of the solar cult of Re of Heliopolis, but by a decline in the size and quality of pyramids: at the end of the dynasty first appear the Pyramid Texts. The 6th Dynasty saw the first systematic attempts to explore and trade in Africa, at least as far as the 3rd Cataract, but progressively declined as the power and position of the king deteriorated, as decentralization increased the powers of the monarchs and as economic distress provoked eventually some form of social upheaval; all these factors, combined with infiltration of Asiatics into the Delta, led to the complete collapse of the regime.

The story of the *First Intermediate Period* is very largely that of the struggle between the princes of Herakleopolis (Dyns. 9–10) with the princes of Thebes who ultimately formed the 11th Dynasty. The Delta

was under Asiatic control. After a protracted civil war, the Thebans triumphed and Egypt was once more united (2040 B.C.). In spite of war and artistic decline, there was a high level of material prosperity and some of the most remarkable of all Egyptian literary works were written. Osiris finally triumphed as god of the dead and heaven, in a sense, was democratized.

The 11th Dynasty ended in civil war and confusion. The new ruling family was composed of remarkable and energetic kings who ruled for 200 years and raised Egypt to her second period of greatness, *the Middle Kingdom*. Nubia was conquered as far as the 2nd Cataract but the 12th Dynasty is essentially a peaceful era. Only one military expedition in Syria-Palestine is known, but Egyptian political and economic influence was paramount. Internally there was energetic exploitation of natural resources, vast and imaginative irrigation schemes were initiated towards the end of the dynasty, and the power of the provincial nobles was broken. This is the classical period of Egyptian language and literature; a very high standard was achieved in jewellery, royal statuary, and relief.

The *Second Intermediate Period* is very largely the story of the gradual decline from the prosperity of the Middle Kingdom, the obtaining of power by Semitic intruders known collectively as the Hyksos or Shepherd Kings, and Egyptian attempts to regain their independence. After the 12th Dynasty, the country split into two kingdoms, one in the Delta (Dyn. 14) of which little is known, and one over all Upper Egypt (Dyn. 13) which maintained its independence and a large measure of prosperity for about 100 years. The Hyksos infiltrated into the Delta as small groups of Semites. By 1720 they had occupied Avaris (the later Tanis) which became their capital, and by 1674, when their main (15th) dynasty was founded, they controlled all Egypt and Nubia. This wide domain was not long maintained; Nubia became independent, and the princes of Thebes (Dyn. 17) waged a long and eventually successful war of liberation. Several important innovations, including the horse, chariot, and composite bow, were introduced into Egypt in the later stages of the Hyksos Period.

The first years of Ahmose I., first king of the 18th Dynasty and founder of the *New Kingdom*, were occupied by the final stages of the expulsion of the Hyksos. After a brief interval to reorganize and regain control over Nubia, Egypt set out on a policy of expansion in Asia. This policy, after the peaceful interlude of the reign of Queen Hatshepsut, reached its peak in the seventeen successive Asiatic campaigns of Tuthmosis III. as a result of which Egyptian control extended from the Euphrates in the north to beyond the 4th Cataract in the south. But the political situation in Asia was changing; the growing power of Assyria and the Hittites forced Egypt and Mitanni to reverse their traditional policies and conclude an alliance. At this critical moment Egypt was ruled by supine kings and was disrupted by the attempts of Akhenaten to introduce a form of monotheism, the worship of the Aten or Sun's Disk. Ceaseless pressure and intrigues by the Hittites in Syria and infiltration by the *Habiru* or *'Aperu* from the east into Palestine eventually undermined the whole Egyptian position in Syria-Palestine with no noticeable Egyptian reaction. Akhenaten's religious reform failed; after his death the country reverted to the old ways, and the prime concern of the last king of the dynasty, Haremhab, was the restoration of internal law and order.

The new ruling family that formed the 19th Dynasty originated in the Delta, and it was to the eastern Delta that eventually they transferred their capital. A determined attempt was made to reassert Egyptian supremacy in Asia, but the drawn battle of Kadesh (1286 B.C.) between Ramesses II. and the Hittites led to a stalemate, and in 1270 B.C. a treaty of alliance was concluded. The Hittite alliance was dictated by the rise of Assyrian power and the growing menace of the Peoples of the Sea who, in the reign of Merenptah, made their first attack on Egypt, only repulsed after it had almost reached Memphis.

The 19th Dynasty collapsed after a brief period of weakness and confusion and Ramesses III. of the 20th Dynasty was almost immediately confronted with the necessity to deal with the final attacks of the Sea Peoples, who by now had destroyed the Hittite Empire. The Sea Peoples were eventually defeated after six years' struggle, but Egypt had exhausted herself in the process and the remainder of the dynasty is a sorry tale of increasing economic distress, weak kings, and growing priestly power and intrigues. Already a few years before the death of Ramesses XI., the 21st Dynasty was ruling independently in the Delta with capital at Tanis and eventually ruled over the whole land. The 21st Dynasty in turn was overthrown by the descendants of Libyan mercenaries who had been settled in the region of Herakleopolis and had acquired great power and authority. The outstanding figure of the 22nd Dynasty was its first king, Sheshonk I. (Shishak) who conducted a successful campaign in Palestine, but the latter years of the dynasty were times of civil war and the 22nd, 23rd, and 24th Dynasties were in part contemporary.

Egypt thus fell an easy prey to the Ethiopian king, Piankhi, who by 730 B.C. had control of the Thebaid. At first the Ethiopians seem to have thought in terms of a protectorate rather than of direct rule but the intrigues and ambitions of local princes forced their hand, and Piankhi and his successor, Shabaka, were eventually forced to occupy and rule the whole land. The foreign policy of the 25th Dynasty was dominated by the threat from Assyria: the aim was clearly to establish some sort of buffer on the eastern frontier, but the kings were curiously parochial with little understanding of the international situation and all too often were in their Sudanese capital of Napata when most urgently needed in Egypt. The most active was Taharka (Tirhakah), but he was outmanoeuvred and defeated by Esarhaddon and forced to flee. When the Assyrians withdrew, Taharka returned, but was again surprised and defeated by Ashurbanipal (669 B.C.). Taharka's successor, Tanutamon, regained possession of Egypt but foolishly returned to Napata and was there when the final Assyrian attack developed, culminating in the sack of Thebes (664 B.C.).

The Assyrians left the control of Egypt in the hands of a group of princes of whom the leader, Psammetichus, gradually made himself independent of Assyria and founded the 26th Dynasty under whom Egypt for 140 years enjoyed a final period of relative power and prosperity. The power of the dynasty rested primarily on a picked body of Greek mercenaries, the encouragement of Greek traders, and the building of a powerful navy and mercantile marine. Internally, efforts were made to foster a nationalistic spirit by a conscious archaism, an interest in archaeology, and a deliberate emphasis on those things, such as animal worship, which were peculiarly Egyptian. The apparent inconsistency of the foreign policy of the dynasty, as reflected in the Bible narrative, is in reality the outcome of a deliberate policy of maintaining the balance of power and creating a buffer against the strongest power in Asia: it is this that explains why Egypt first supported Assyria against Babylon, and, after the fall of Assyria, Babylon against the Persians; Egyptian naval and economic power were the principal and potent weapons in the application of this policy. The only exception was Apries (Hophra) a young hot-head who, for no obvious reason except perhaps opportunism, challenged Babylonia but failed to prevent Nebuchadnezzar from capturing Jerusalem. Some of the Jews who escaped from the sack of Jerusalem fled to Egypt and formed colonies in various places, the best known being the Jewish military colony at Elephantine (*c* 586–399 B.C.). But Egypt could not withstand Persia indefinitely and in 525 B.C. Cambyses defeated Psammetichus III. and Egypt fell under direct Persian rule (Dyn. 27). At first Persian rule, especially under Darius I., a wise and moderate ruler, was mild, but the excessive harshness of the later

kings provoked constant and unsuccessful native revolts until the successful rebellion of Amyrtaeus in 404 B.C. Thereafter for 63 years Egypt had a precarious and uneasy independence (Dyns. 28–30) until in 341 B.C. the Persians once more conquered the country (Dyn. 31). The second Persian dynasty came to an end with the victory of Alexander the Great at Issus (332 B.C.), when Egypt automatically became part of the Macedonian Empire.

After 332 B.C. the history of Egypt is that of the Hellenistic world. Under the Ptolemies Alexandria became the capital and the intellectual centre of the world. The country on the whole was prosperous, though prone to native revolts. The government and administration were Greek, but the native cults were encouraged as a matter of deliberate policy. Behind the façade of active temple building the old Egypt and the old gods were slowly dying, only the cults of Osiris, Isis, and later the mystery religions having any real life. The defeat of Cleopatra (30 B.C.) brought Egypt under Roman rule and for long she was very prosperous and the granary of the ancient world.

2. Egyptian Religion.—The ancient world was particularly impressed by the piety of the Egyptians, the multiplicity of their gods and their strange forms, and the mystery of their temples and priests: hence there was a tendency to read far more into the religion than really existed. Four points are characteristic: (*a*) conservatism—a belief, however primitive, was rarely completely abandoned, but was maintained no matter how contradictory it might appear when compared with other and later ideas; (*b*) parochialism—an emphasis on local cults; a man's loyalties were more to his local god than to the state god; this in part explains the great number of gods, the similarity of the attributes of many, and the ease with which syntheses and syncretisms were effected; (*c*) mildness—Egyptian religion is singularly lacking in fanaticism or excess of any sort; (*d*) the family—the human side of the god, the family organization of the principal gods in a temple, the domestic nature of the daily cult. There was no general dogma or system, no Sacred Book but plenty of religious books, no theological treatises and hence no heresy hunts. The basis of religion in Egypt was not belief but cult, and particularly the local cult; the essentials were ritual purity, and manual and oral perfection in the celebration of the ritual.

The earliest gods were probably nature gods, animals and birds, who were essentially localized and speedily partially or completely anthropomorphized: they were the natural outcome of primitive man's love, fear or reverence of forces or beings that were useful or good, that were powerful or harmful, or that were beyond his understanding. Also early were certain inanimate objects, whose origin is still uncertain but may have been due to purely local conditions. The cosmic gods, the forces of nature such as sun, moon, wind, and storm, were a somewhat later development; they were of a higher order, universal in character but speedily localized, and had either human or animal form. Animal gods always had a special place in Egypt, and in late times, possibly as a reaction to foreign domination, were particularly popular. Sometimes all of a species were worshipped in a locality: sometimes it was only one animal, distinguished by special markings, who was worshipped, tended, mummified, and buried; such for instance were the famous bulls, Apis of Heliopolis, Mnevis of Memphis, Buchis of Armant. Genii or familiar spirits were not infrequent, and from time to time, especially in the New Kingdom, foreign gods were introduced into the pantheon. A few human beings were sometimes deified, but their cult was usually short-lived and local; the two most notable exceptions were Imhotep, architect and chief minister of Zoser (Dyn. 3) who when deified was regarded as son of Ptah, and as a god of wisdom and medicine, later identified with Asklepios; and Amenophis son of Hapu, a famous minister and executive of Amenophis III. (Dyn. 18) who enjoyed a wide reputation as a god of wisdom. The special position of the king as a god is discussed below.

Three theological systems in particular must be mentioned. The first, Heliopolitan, postulated primeval chaos from which, self-engendered, emerged Atum, who produced from himself Shu (air) and Tefnut (moisture). The union of this couple produced Geb (earth) and Nut (sky), from whom were born Osiris, Seth, Isis, and Nephthys. These formed the Ennead. Later a Little Ennead, an artificial creation, was also formed. The Heliopolitan theology dominates Egyptian temple ritual from the 5th Dynasty onwards. The Hermopolitan system was the Ogdoad, or Company of Eight. From chaos emerged the primordial gods, created by the voice of Thoth as four frogs (male) and four snakes (female) who represented Night, Darkness, Mystery, and Eternity. They created at Hermopolis an egg from which appeared the Sun who conquered his enemies, created men, and organized the world. According to the Memphite system, Ptah was the supreme god who made eight other Ptahs who were all embodied in him; thus Atum was his thought, Horus his heart, Thoth his tongue. This system was probably formulated in the first half of the Old Kingdom to enhance the prestige of Memphis, the early dynastic capital, in order to combat the growing power of the solar cult. It is an intellectual system with little popular appeal; creation was an intellectual act, markedly different from the grosser concepts of the other cosmologies. Its essential feature is the Creative Word, an early formulation of the doctrine of the Logos. Although this system had no hold on the popular imagination, there is evidence to suggest that it always had an appeal to a small intellectual *élite* in the temples, and remarkable references to the idea of the creative word are to be found in the Graeco-Roman temples.

Entirely distinct is the Aten cult introduced by Akhenaten towards the end of the 18th Dynasty. It is differentiated above all by its intolerance and exclusiveness, in its abolition of all the old gods and the substitution for them of the worship of a single god, the Aten or Sun's Disk, and more particularly the life-giving power of the sun. It is a mistake to seek to detect foreign, still less Semitic, influences in Atenism: for all its revolutionary nature it is resolutely Egyptian and the seeds of such a cult already existed in Egypt. It is doubtful whether the movement was purely religious; it is far more likely that Akhenaten used religion for political ends—by abolishing the old gods and setting up a single new god with universalistic characteristics and with peculiarly close attachments to the king, he broke the menacing political power of the priesthood, created a new focus of loyalty to the throne by very closely linking the Aten with the person of the king, and simultaneously presented a single god that could be worshipped equally well by Egyptian, Syrian, and Nubian, all the peoples of the Egyptian Empire. The new religion necessitated a new type of temple with courts and sanctuary open to the sky and all rites celebrated in the open air. Unfortunately, Akhenaten failed to supply a teaching or an ethic; he swept away the old gods, he abolished the old funerary beliefs with their moral ideals and sanctions, and created nothing in their place. Atenism is frankly amoral; nobles profess veneration for Aten because it pleased the king who rewarded them. Because Atenism failed to fill the vacuum it had created and did not provide the people with a way of life, it did not take hold on the mass of the people, and failed.

Worship was of two kinds: the ordinary daily cult celebrated within the temples, and the great festivals which were mainly processional both inside and outside the temple. There were three daily services, at dawn, noon, and sunset. The morning service was the most elaborate and was essentially a religious dramatization of events of daily life: the god was awakened by a morning hymn, and then the officiant entered the sanctuary alone, disrobed the god, performed an elaborate toilet, and offered the god a meal. After the service and after the

co-templar gods had been similarly awakened, dressed and fed, there was a reversion of the divine offerings within the temple to the royal ancestors, and then a second reversion outside the temple to the priests. There was no congregational worship; the king alone, or his deputy, entered the sanctuary and performed the ritual by himself. Sacrifice bore no implication of atonement but symbolized the destruction of enemies or evil forces. The great calendar festivals were very numerous, varying in length from a single day to a whole month, and involved processions to other temples, either in the same town or in distant towns; they were the occasions of great popular rejoicings and participation in free food and drink. Some festivals included dramatic performances somewhat like mystery plays.

The religious system described so far was the state religion, the only aspect that is sufficiently documented in the records. It is probable that this religion left the vast mass of the people largely untouched; except at the popular festivals, the mass of the people had little direct contact with the state cult, though its ceremonies were conducted for their benefit. Nevertheless, special provision was made at the outer doors of the temple enclosure for private prayer, petition, devotion, and offering. The religion of the mass of the people was probably concentrated on much simpler, elemental, folk-type gods and genii; thus the patroness of the necropolis workers at Thebes was the great peak that towers at the end of the Valley of the Kings and who was personified and worshipped as Ta-dehenet, 'The Peak.'

The cultus temple of the New Kingdom and later periods was shut off by massive walls which enclosed, in addition to the temple proper, a sacred lake, magazines, store-houses, abattoirs and administrative offices, and quarters for the priests on duty. The temple was in essence the house of the god, and the idea of house or home was always present, though naturally centuries of architectural development obscured this. The temple also to a very real extent was alive: at the dedication ceremony and at the annual renewal on New Year's Day the temple, all its reliefs and all statues underwent the ceremony of Opening the Mouth by virtue of which the temple and all in it was filled with permanent, latent life. The temple itself was a steady progress from the brilliant sunlight of the outer court, through the increasing gloom and mystery of one or more hypostyle halls (lit only by restricted clerestory lighting) to the pitch darkness of the sanctuary. The effect of mystery and darkness was enhanced by a slight but progressive raising of the floor level and a marked lowering of roof levels the nearer one approached the sanctuary.

In the Old Kingdom there was no professional priesthood: the King was in theory the sole officiant and the various cults were celebrated by duly delegated lay nomarchs and officials. Professionalism and the hereditary principle gradually grew through the need to ensure the continuity of the funerary cult. In the Middle Kingdom there was a considerable increase in professionalism, but a fully professional priesthood did not emerge until the New Kingdom. Many priests were pluralists; all could engage in secular activities and many combined religious duties with the highest secular offices. The temple priesthood was divided into four companies or *phylae* (increased to five in Ptolemaic times) each of which served in rotation for a month at a time. There was a complicated organization: the senior grade was the prophet (Egyptian, 'servant of the god') divided into four classes; the high priest was usually the first prophet, but in certain priesthoods bore a special title. Other important grades were 'father of the god' and 'lector' whose exceedingly important role was to ensure the literal accuracy of the recitation of the ritual. The ordinary priest was a *wâb*, 'pure one.' Priests could marry, engage in commerce and trade, and indulge in almost any secular activity. Payment was in kind, and appointment and installation in the higher grades at least was the direct act of the king. The strongest emphasis was laid on the ritual purity of the priests: the whole body, including the head, was shaved, circumcision may have been essential, and the normal dress was white linen. No priest of whatever grade could enter the temple or celebrate the ritual without first purifying himself either in the sacred lake or from some other source of purified water. There were also lay-priests, and from the New Kingdom onwards lay fraternities appear to have been linked with certain temples. The temples were great centres of learning and attached to the temple was the 'house of life,' a scriptorium for the copying of religious and learned works, astronomer priests who watched and recorded the hours, doctors, and scribes. Women normally acted as musician-priestesses, but in special circumstances could hold higher ranks. The strictly limited and very important office of 'God's Wife of Amun,' first introduced in the 18th Dynasty, was confined to certain ladies of blood royal and was in essence more political than religious.

The world has always been impressed by the importance laid by the Egyptians on their funerary beliefs and on preparations for death and the after life. This interest was not due to any morbid outlook but is explained by the paradox that the intense preoccupation of the Egyptians with preparations for death was due to their passionate desire to live. It was not physical death that the Egyptian feared, but the ultimate disaster of the 'second death,' *i.e.* the destruction of the last thing in which the soul (*Ba*) of the dead could find shelter, food and drink, for without these he would die. The soul was conceived as being able to leave the corpse and tomb by day, but needed to return at night for shelter and sustenance. The basis of funerary practice was therefore the overriding necessity to make that permanent provision for the soul on which survival depended. For this reason in Egypt the dead were far more afraid of the living than the living were of the dead, for it was the acts or omissions of the living that could most easily cause the second death.

From predynastic times onwards the provision for death was of the utmost importance, and almost at the same time survival and the preservation of the material body became ever more closely linked. The first attempts at mummification are attested at least as early as the 2nd Dynasty, but mummification was not in fairly general use until the Middle Kingdom. Mummification at its best consisted of the removal of the brain and the contents of the abdomen and thorax (the heart was left in the body); the corpse was then dehydrated by being surrounded with raw natron. At the end of this process the abdomen was packed with linen or other substances soaked in resin, and the body was wrapped in linen bandages in a long and complicated process; sometimes amulets were inserted at appropriate points in the bandages. When mummification was complete, the mummy was stood upright on a heap of sand at the entrance to the tomb and the final rites were performed, including the Opening of the Mouth, which restored the vital functions to the body. The tomb of the private individual was normally decorated with scenes of daily life and with offering scenes; since over these the Opening of the Mouth was probably performed, they were capable of serving the needs of the dead, but special provision was made for the endowment of mortuary priests and for the regular celebration of the funerary cult. The standard period of mummification was 70 days, 40 days for the dehydration, 30 days for bandaging.

In the Old Kingdom funerary practices were linked to the conception of a solar hereafter; there was even a solar judgment of the dead. The triumph of the worship of Osiris in the First Intermediate Period entailed that thereafter it was the Osirian hereafter that prevailed. No man could hope to attain that hereafter without first passing a trial before Osiris and a court of forty-two assessors. The dead man had to make a Denial of Sin (the misnamed Negative Confession) to the gods, and his heart was weighed in the balances against a feather, the symbol of truth, justice; if he failed to pass the test, he was devoured by a monster. In theory the judgment

implied a very high ethical ideal; in practice the ideal was nullified because of the emphasis on the correct recital of the Denial of Sin, and the increasing use of magical practices which made it easy to escape the consequences of the most sinful life.

3. Social Organization and Institutions.—The Egyptian conception of the state and the cosmos was a static one. The world order was one instituted in all perfection at the moment that the first god-king brought kingship to the earth. It is significant that when Re, the first god-king, came to earth he brought with him his daughter Maat, goddess of truth and justice. This conception of truth and justice, brought to earth at the very foundation of the earth, is central to the whole Egyptian way of life. Gods, king, and men were all equally bound by the law and in theory could not break it. It is this central idea of truth, justice, that goes far to explain the essential mildness and humanity of the Egyptian social order. In Egypt there was no Utopian thought; in so far as the Egyptian thought of a better future, he considered that he lived in a world that had fallen short of a perfection instituted once and for all at the dawn of time, and thus he was constantly looking back over his shoulder, so to speak, hoping to return to a past Golden Age.

At the centre of Egyptian society stood the king, Pharaoh. He was in a very real sense a god, immensely elevated and remote from ordinary men, but a veritable good shepherd, as the texts repeatedly declare, and father of his people. He was the living Horus, the last of the divine kings. But Horus was the son of Osiris, who had avenged his murdered father, and whose claim to his father's throne had been upheld by a divine court of law. Thus every king on dying became Osiris, but in life he was the living Horus who had a legal title to the throne as a result of the verdict of the gods, as the dutiful son of his father, and by virtue of celebrating the cult of the royal ancestors. In theory the king was the source of all activity: he initiated legislation, he was the sole officiant in every temple, he led his people in all activities of peace and war. His health and prosperity automatically entailed the prosperity of Egypt and her people. In practice, of course, the king delegated most of his religious, military, and social duties, but he always remained the genuine mainspring.

In the Old Kingdom society was essentially amateur, any man could be delegated to perform any type of duty in temple, on field of battle, on expeditions to quarries or for trade, or in the administration. In the New Kingdom society was organized on a more rigidly professional basis but still one man could play many parts. The chief minister of the king was the vizier, who apart from daily audience with the king, was responsible for finance, taxation, the administration and execution of justice, and a host of other duties. Under him was a vast organization of governors, administrators, inspectors, and a very large and efficient civil service of scribes. The professional army was the creation of the New Kingdom: it was then organized, in the field, in four divisions, and was composed of chariotry (the *élite*), the infantry, and mercenaries. The Egyptian as a whole was not warlike and the native element was conscript. The mass of the people were simple, unlettered peasants working in the fields, with a smaller proportion engaged in minor industries, quarries, etc. A system of *corvée* entitled the state to call on every man, unless specially exempted by law, to perform any manner of duties in times of national emergency. Slavery as an institution is exceptionally difficult to define and isolate in Egypt: in the Old Kingdom slavery did not exist, every man was free, but economic distress at the end of the Old Kingdom certainly produced a kind of serfdom. In the New Kingdom most slaves were prisoners obtained in the wars of empire, but as power and prosperity declined the number of native slaves increased and so did the institution of voluntary servitude.

The position of women in Egypt was extraordinarily free and high. A woman was free and respected, there was no system of *purdah*, and she was not veiled. She could reign as sovereign, she could buy, sell, and inherit property, and engage in commerce on her own. Her rights in marriage and divorce, which was recognized, were strictly safeguarded; it is not known if there was any special marriage ceremony. Contrary to popular belief, brother-sister marriage, except in the royal family, was relatively rare.

4. Egypt in the Bible.—Egyptian records are conspiciously lacking in direct reference to events and persons familiar in the Bible narratives. Israel is mentioned once only in an inscription of the fifth year of Merenptah (*c* 1219 B.C.) in the words 'Israel is destroyed, its seed does not exist.' The visit of Abraham is probably to be assigned to the first hundred years of the 12th Dynasty (*c* 2000–1900 B.C.). It is known that parties of Semites were in Egypt at this time: a tomb in Middle Egypt depicts the visit of thirty-seven Semites in the reign of Amenemhet II.; a 13th Dynasty papyrus preserves the names of seventy-seven slaves of whom forty-eight are Asiatic, some of the Semitic names being directly related to those of the patriarchal family; the same papyrus throws much light on the prison system.

The story of Joseph, the Sojourn in Egypt and the Exodus raises serious problems of chronology for which no precise solution is yet possible. It is certain that the immediate background of the Biblical narrative is Ramesside Egypt to which all the local colour applies. A conservative appreciation of the facts suggests that the entry of Joseph into Egypt should be placed at an undefined point in the Hykos Period (probably after 1700 B.C.) and that the most probable date of the Exodus is in the latter half of the reign of Ramesses II. (1290–1223 B.C.).

Topographical details in the Bible indicate a familiarity with the eastern Delta; Upper Egypt is virtually unknown except for No (Thebes) and Syene (Elephantine Assuan). Many of the towns mentioned can be identified with reasonable certainty.

Many attempts have been made to identify a variety of linguistic influences and borrowings from Egypt in the OT, and it has been suggested, for reasons difficult to justify, that portions of Psalm 104 are influenced by Akhenaten's Hymn to the Aten. There is no reason to doubt that there may have been borrowings, but in all oriental languages there must have been many common expressions and ways of thinking, and it would be unwise to press them too far. Similarly, some stress has been laid on the supposed influence of Egyptian Messianic literature. It is true that there are 'Messianic' works of a kind, but the works in question were exclusively political in purpose: it is doubtful whether these works had any serious influence on the Hebrews.

The well-known Teaching of Amenemope (*c* Dyn. 20–21) has aroused much interest because of its remarkable resemblance to passages in the Book of Proverbs, especially Pr 22^{17}–24^{22}, and it has been suggested that these passages are a direct, and somewhat imperfect, translation from the Egyptian. The resemblances are striking, but there are very great difficulties in such a theory, principally because of the extreme difficulty of the text of Amenemope, its frequent use of non-Egyptian idioms and ideas, and its employment of an unusually large proportion of Semitic loan-words. A recent study has therefore suggested that the Teaching of Amenemope is itself a translation from an Aramaic original. This raises the problem of a proto-Proverbs and other difficulties, and the only wise course is to conclude that a satisfactory solution has not yet been found.

H. W. F.

EGYPT, RIVER (RV, RSV 'brook,' better 'wady') OF.—The SW. boundary of Palestine (Nu 34^{5}, Is 27^{12} etc.; cf 'river [*nāhār*] of Egypt,' Gn 15^{18}, and simply 'the wady,' Ezk 47^{19} 48^{28} [RV, RSV add 'of Egypt']). It is the *Wâdī el-ʿArîsh*, still the boundary of Egypt, in the desert half-way between Pelusium and Gaza. Water is always to be found by digging in the bed of the wady, and after heavy rain the latter is filled with a rushing

stream. *El-ʿArîsh*, where the wady reaches the Mediterranean, was an Egyptian frontier post to which malefactors were banished after having their noses cut off; hence its Greek name *Rhinocorura*. See also SHIHOR, SHUR. F. Ll. G.

EGYPTIAN, THE.—An unnamed leader of the 'Assassins' or 'Sicarii' for whom Claudius Lysias took St. Paul (Ac 21[38]). This man is also mentioned by Josephus as a leader defeated by Felix, but not as connected with the 'Assassins' (*Ant.* xx. viii. 6 [169–172]. See also *BJ* II. xiii. 3–6 [254–265], which points more directly toward Zealotism. In his *Ant.*, Josephus was playing down this revolutionary movement, for the benefit of his Graeco-Roman readers). The Egyptian escaped, and Lysias thought that he had secured him in St. Paul's person. The discrepancies between Josephus and St. Luke here make mutual borrowing improbable. See THEUDAS. A. J. M.—F. C. G.

EGYPTIAN VERSIONS.—See TEXT OF THE NEW TESTAMENT.

EHI.—See AHIRAM.

EHUD.—1. The deliverer of Israel from Eglon, king of Moab, Jg 3[12–30]. The story of how Ehud slew Eglon bears upon it the stamp of genuineness; according to it, Ehud was the bearer of a present from the children of Israel to their conqueror, the king of Moab. On being left alone with the king, Ehud plunges his sword into the body of Eglon, and makes good his escape into the hill-country of Ephraim. Israel is thus delivered from the Moabite supremacy. **2.** Son of Bilhan, a Benjamite, 1 Ch 7[10] 8[6].

EKER.—A Jerahmeelite, 1 Ch 2[27].

EKREBEL.—See ACRABA.

EKRON.—Most northerly of the five important cities of the Philistine plain. It was not conquered by Joshua (Jos 13[3]), but was theoretically a border city of Judah (15[11]) and Dan (19[43]); said, in a passage which is probably an interpolation, to have been smitten by Judah (Jg 1[18]). Hither the captured Ark was brought from Ashdod (1 S 5[10]), and on its restoration, the Philistine lords who had followed it to Beth-shemesh returned to Ekron (1 S 6[16]). Ekron was the border town of a territory that passed in the days of Samuel from the Philistines to Israel (1 S 7[14]), and it was the limit of the pursuit of the Philistines after the slaying of Goliath by David (17[52]). Its local *numen* was Baal-zebub, whose oracle Ahaziah consulted after his accident (2 K 1[2]). Like the other Philistine cities, it is made the subject of denunciation by Jeremiah, Amos, Zephaniah, and the anonymous prophet whose writing occupies Zec 9–11, but it does not appear in the OT as a place of great importance. This city is commonly identified with the modern *ʿÂqir*, a village on the Philistine plain between Gezer and the sea. Scripture references point to a site in this general area, but the identification with *ʿÂqir* is uncertain, depending largely on the coincidence of name, and Albright identifies with *Qaṭra*. No remains of antiquity have been found at *ʿÂqir*.
R. A. S. M.—A. G. McL.

EL.—See GOD.

ELA.—1. 1 Es 9[27] (AV, RV); see ELAM, **4.** **2.** 1 K 4[18], father of Solomon's commissariat officer in Benjamin. See also SHAMMAH, **3.**

ELAH.—1. A 'duke' of Edom, Gn 36[41], 1 Ch 1[52]. **2.** Son of Baasha, king of Israel. He had nominal possession of the throne two years or fractions of years, 1 K 16[8–14]. He gave himself to drunken dissipation, until Zimri, one of his generals, revolted and killed him. The usual extirpation of the defeated dynasty followed. **3.** Father of Hoshea, 2 K 15[30] 17[1] 18[1, 9]. **4.** Second son of Caleb, 1 Ch 4[15]. **5.** A Benjamite, 1 Ch 9[8].

ELAH ('terebinth').—A valley in the Shephelah, the scene of the battle between David and Goliath, 1 S 17, 21[9]. It is most likely the modern *Wâdī es-Sanṭ*, which, rising in the mountains about Jeba, about 11 miles due SW. of Jerusalem, runs westward, under various names, till it opens on the Maritime Plain at *Tell eṣ-Ṣâfī*. In the middle of the valley is a watercourse which runs in winter only; the bottom is full of small stones such as David might have selected for his sling.

ELAM.—1. A son of Shem (Gn 10[22], 1 Ch 1[17]), the eponymous ancestor of the Elamites (see following article). **2.** A Korahite, 1 Ch 26[3]. **3.** A Benjamite, 1 Ch 8[24]. **4.** The eponym of a family of which 1254 returned with Zerubbabel (Ezr 2[7], Neh 7[12], 1 Es 5[12]) and 70 with Ezra (Ezr 8[7], 1 Es 8[33]). It was one of the Bene-Elam that urged Ezra to take action against mixed marriages (Ezr 10[2]), and six of the same family are reported to have put away their foreign wives (Ezr 10[26], 1 Es 9[27] [AV, RV **Ela**]). Elam according to Neh 10[14] 'sealed the covenant.' **5.** In the parallel lists Ezr 2[31], Neh 7[34] 'the other Elam' has also 1254 descendants who return with Zerubbabel, but in 1 Es 5[22] (so RSV; AV, RV **Calamolalus**, q.v.) 725. **6.** A priest who took part in the dedication of the walls, Neh 12[42].

ELAM.—An important country of Western Asia, called *Elamtu* by the Babylonians and *Elymais* by the Greeks (also *Susiana*, from **Shushan** or **Susa** the capital). It corresponds nearly to the modern *Chuzistan*, lying to the east of the lower *Tigris*, but including also the mountains that skirt the plain. The portion south of Susa was known as Anshan (Anzan). In Gn 10[22] (1 Ch 1[17]) Elam is called a son of Shem, from the mistaken idea that the people were of the Semitic race. They belonged to the great family of barbarous or semi-barbarous tribes which occupied the highlands to the east and north of the Semites before the influx of the Aryans.

Historically Elam's most important place in the Bible is found in Gn 14[1ff], where it is mentioned as the suzerain of Babylonia and therewith of the whole western country including Palestine. The period there alluded to was that of Elam's greatest power, a little later than 1800 B.C. For many centuries previous, Elam had upon the whole been subordinate to the ruling power of Babylonia, no matter which of the great cities west of the Tigris happened to be supreme. Not many years later, Hammurabi of Babylon (formerly believed to be alluded to in Gn 14[1] under the name **Amraphel**, q.v.) threw off the yoke of Elam, which henceforth held an inferior place. Wars between the two countries were, however, very common, and Elam frequently had the advantage. The splendidly defensible position of the capital contributed greatly to its independence and recuperative power, and thus Susa became a repository of much valuable spoil secured from the Babylonian cities. This explains how it came about that the Code of Hammurabi was found in the ruins of Susa. A change in relations gradually took place after Assyria began to control Babylonia and thus encroach upon Elam, which was thenceforth, as a rule, in league with the patriotic Babylonians, especially with the Chaldaeans from the south-land. Interesting and tragic is the story of the combined efforts of the Chaldaeans and Elamites to repel the invaders. The last scene of the drama was the capture and sack of Susa (*c* 645 B.C.). The conqueror Ashurbanipal (Biblical Osnappar [q.v.]) completed the subjugation of Elam by deporting many of its inhabitants, among the exiles being a detachment sent to the province of Samaria (Ezr 4[9]). Shortly thereafter, when Assyria itself declined and fell, Elam was occupied by the rising Aryan tribes, the Medes from the north and the Persians from the south. Cyrus the Persian (born about 590 B.C.) was the fourth hereditary prince of Anshan.

Elam has a somewhat prominent place in the prophetic writings, in which Media+Elam=Persian empire. See especially Is 21[2ff], Jer 49[34ff], and cf Is 22[6], Jer 25[25], Ezk 32[24]. Particular interest attached to the part taken by the Elamites in the overthrow of Babylonia. An effect of this participation is perhaps shown in the fact that after the Exile, Elam was a fairly common name among the Jews themselves (Ezr 2[7, 31], Neh 7[12], 1 Ch 8[24] *et al.*). Jews from Elam were present at the first Pentecost, Ac 2[9]. J. F. McC.—C. J. M. W.

ELASA (1 Mac 9[5]).—The scene of the defeat and death of Judas Maccabaeus (AV **Eleasa**). The site may be at the ruin *Il'asa*, near Beth-horon.

ELASAH (' God hath made ').—**1.** One of those who had married a foreign wife, Ezr 10[22], 1 Es 9[22] (AV **Talsas**, RV **Saloas**). **2.** The son of Shaphan, who, along with Gemariah the son of Hilkiah, carried a message from king Zedekiah to Babylon, Jer 29[3].

ELATH (called also **Eloth**, Aram. ' trees ') is mentioned together with Ezion-geber as one of the places passed by the Israelites in their wanderings (Dt 2[8]) and in connexion with Solomon's trading voyages down the Red Sea (1 K 9[26], 2 Ch 8[17]). Hence it is to be located on the N. shore of the Gulf of 'Aqaba. Taken by the Israelites from the Edomites in the time of David, it remained in their hands apparently till the time of Joram, when it seems to have been lost in the Edomite revolt (2 K 8[20]). It was recovered under Amaziah (2 K 14[22]), its rebuilding being completed by Uzziah (2 Ch 26[2]), but was finally lost in the time of Ahaz (2 K 16[6], where Aram is a scribal error for Edom and Rezin a gloss). Strategically important in its situation on the caravan route from Arabia to Gaza and Egypt, it flourished in Nabataean and Roman times, and in Byzantine, Arab, and Crusading times it was named *Aela*. These periods of occupation are attested by large deposits of potsherds at a site just over half a mile WNW. of *'Aqaba*. There is no trace here of earlier occupation, and it is supposed that the Hebrew and Edomite towns were sanded up before the later occupation. W. O. E. O.—**J. Gr.**

EL-BERITH.—See BAAL-BERITH.

EL-BETHEL.—The name which Jacob is said to have given to the scene of his vision on his way back from Paddan-aram, Gn 35[7].

ELCIA, Jth 8[1] (AV).—See ELKIAH.

ELDAAH.—A son of Midian, Gn 25[4], 1 Ch 1[33].

ELDAD.—One of the seventy elders appointed to assist Moses in the government of the people. On one occasion he and another named **Medad** were not present with Moses and the rest of the elders at the door of the Tabernacle to hear God's message and receive His spirit. But the spirit of the Lord came upon them where they were, and they prophesied in the camp. Joshua regarded this as an irregularity, but Moses declined to interfere (Nu 11[26-29]).

ELDER (in OT).—The rudimentary form of government which prevailed amongst the Hebrews in primitive times grew out of family life. As the father is head of the household, so the chiefs of the principal families ruled the clan and the tribe, their authority being ill-defined, and, like that of an Arab sheikh, depending on the consent of the governed. In our earliest documents the ' elders of Israel ' are the men of position and influence, who represent the community in both religious and civil affairs (Ex 3[16, 18] 12[21] 17[5f] 18[12] 19[7], Nu 11[16], Dt 5[23] 27[1] 31[28]) : the ' elders ' of Ex 24[1] are the ' chief men ' of v.[11]. Josephus sums up correctly when he makes Moses declare : ' Aristocracy . . . is the best constitution ' (*Ant.* IV. viii. 17 [223]). The system existed in other Semitic races (Nu 22[4], Jos 9[11], Ezk 27[9], Ps 105[22]). After the settlement in Canaan the ' elders ' still possessed much weight (1 S 4[3] 8[4] 15[30], 2 S 3[17] 5[3] 17[15f], 1 K 8[1]). And now we find ' elders of the city ' the governing body of the town (Ru 4[2, 9], 1 S 11[3], 1 K 21[8, 11], 2 K 10[1, 5]) ; the little town of Succoth boasted no fewer than seventy-seven (Jg 8[14]). Deuteronomy brings into prominence their judicial functions (Dt 16[18] 19[12] 21[2ff] 22[15ff] 25[7ff]), which were doubtless infringed upon by the position of the king as supreme judge (1 S 8[20], 2 S 15[4], 1 K 3[9], 2 K 15[5], Is 11[5], Am 2[3]), but could not be abolished (1 K 20[7ff], 2 K 10[1ff] 23[1]). During the Exile the ' elders ' are the centre of the people's life (Jer 29[1], Ezk 8[1] 14[1] 20[1], Ezr 5[9ff] 6[7ff] ; cf Sus [5]), and after the Return they continue active (Ezr 10[8, 14], Ps 107[32], Pr 31[23], Jl 1[14] 2[16]). It is not improbable that the later Sanhedrin is a development of this institution. J. T.

ELDER (in NT).—See BISHOP ; CHURCH GOVERNMENT.

ELEAD.—An Ephraimite, 1 Ch 7[21].

ELEADAH.—An Ephraimite, 1 Ch 7[20].

ELEALEH.—A town of the Moabite plateau, conquered by Gad and Reuben, and rebuilt by the latter tribe, Nu 32[3, 37], Is 15[4] 16[9], Jer 48[34]. It is now the ruined mound of *el-'Âl*, about a mile N. of Heshbon.

ELEASA, 1 Mac 9[5] (AV).—See ELASA.

ELEASAH.—**1.** A Judahite, 1 Ch 2[39f]. **2.** A descendant of Saul, 1 Ch 8[37] 9[43].

ELEAZAR (' God hath helped ').—**1.** A son of Aaron. It was natural that priestly traditions should have much to say about him. But in earlier writings his name appears only twice, both probably from E : Dt 10[6] (his succession to the priestly office at Aaron's death), Jos 24[33] (his death and burial). In P he is the third son of Aaron by Elisheba, his brothers being Nadab, Abihu, and Ithamar (Ex 6[23], Nu 3[2]). With them he was consecrated priest (Ex 28[1]), and was chief over the Levites (Nu 3[32]). Nadab and Abihu having died (Lv 10[1f]), he succeeded Aaron as chief priest (Nu 20[25-28]). He took part in the census in Moab (Nu 26[1, 63]), and afterwards played a prominent part in the history of the settlement under Joshua (Jos 14[1] 17[4] 19[51] 21[1]). He married a daughter of Putiel, and she bore him Phinehas (Ex 6[25]). When the Zadokite priests returned from Babylon, they traced their descent to Aaron through Eleazar, ignoring the house of Eli (1 Ch 6[3-8]) ; in some cases, however, the claim was made through Ithamar (1 Ch 24[5f]). **2.** Son of Abinadab (1 S 7[1]). **3.** One of David's three heroes (1 Ch 11[12f]) ; called **Shammah** in 2 S 23[11]. See SHAMMAH, **3.** **4.** A Levite, 1 Ch 23[21f]. **5.** One of the messengers to Iddo (1 Es 8[43] AV, RV ; RSV **Eliezar**) ; called **Eliezer** in Ezr 8[16]. **6.** A priest (Ezr 8[33], Neh 12[42], 1 Es 8[63]). **7.** A priest who had married a foreign wife (1 Es 9[19] AV, RV ; RSV **Eliezar**) ; called **Eliezer** in Ezr 8[16]. **8.** One who took a non-Israelite wife (Ezr 10[25], 1 Es 9[26]). **9.** A brother of Judas Maccabaeus (1 Mac 2[5] 6[43-46], 2 Mac 8[23]). **10.** A martyr under Antiochus Epiphanes (2 Mac 6[18-31]). **11.** Father of Jason (1 Mac 8[17]). **12.** Sirach Eleazar (Sir 50[27] RV ; RSV ' Sirach, son of Eleazar ' ; AV ' Sirach of Jerusalem '). **13.** An ancestor of Jesus (Mt 1[15]). A. H. McN.—**H. H. R.**

ELEAZURUS, 1 Es 9[24] (AV).—See ELIASHIB, **2.**

ELECTION.—The idea of election, as expressive of God's method of accomplishing His purpose for the world in both providence and grace, though (as befits the character of the Bible as peculiarly ' the history of redemption ') especially in grace, goes to the heart of Scripture teaching. The word ' election ' itself occurs but a few times (Ac 9[15] ' vessel of election,' Ro 9[11] 11[5, 7, 28], 1 Th 1[4], 2 P 1[10]) ; ' elect ' in NT much oftener (see below) ; but equivalent words in OT and NT, as ' choose,' ' chosen,' ' foreknow ' (in sense of ' foredesignate '), etc., considerably extend the range of usage. In the OT, as will be seen, the special object of the Divine election is Israel (*e.g.* Dt 4[37] 7[7] etc.) ; but within Israel are special elections, as of the tribe of Levi, the house of Aaron, Judah, David and his house, etc. ; while, in a broader sense, the idea, if not the expression, is present wherever individuals are raised up, or separated, for special service (thus of Cyrus, is 44[28] 45[1-6]). In the NT the term ' elect ' is frequently used, both by Christ and by the Apostles, for those who are heirs of salvation (*e.g.* Mt 24[22, 24, 31]‖, Lk 18[7], Ro 8[33], Col 3[12], 2 Ti 2[10], Tit 1[1], 1 P 1[2]), and the Church, as the new Israel, is described as ' an elect race ' (1 P 2[9]). Jesus Himself is called, with reference to Is 42[1], God's ' chosen ' or ' elect ' One (Mt 12[18], Lk 9[35] RV, 23[35]) ; and mention is once made of ' elect ' angels (1 Ti 5[21]). In St. Paul's Epistles the idea has great prominence (Ro 9, Eph 1[4] etc.). It is now necessary to investigate the implications of this idea more carefully.

Election, etymologically, is **the choice of one, or of some, out of many.** In the usage we are investigating, election is always, and only, of God. It is the method

by which, in the exercise of His holy freedom, He carries out His purpose (' God's purpose of election,' Ro 9^{11}). The **' call '** which brings the election to light in this world, as in the call of Abraham, Israel, believers, is in time, but the call rests on God's prior, eternal determination (Ro 8^{28ff}). Israel was chosen of God's free love (Dt 7^{6ff}); believers are declared to be blessed in Christ, ' even as he chose ' them ' in him '—the One in whom is the ground of all salvation—' before the foundation of the world ' (Eph 1^{4}). It is strongly insisted on, therefore, that the reason of election is not anything in the object itself (Ro $9^{11, 16}$); the ground of the election of believers is not in their holiness or good works, or even in *fides praevisa*, but solely in God's free grace and mercy (Eph 1^{1-4}; holiness as result, not a cause). They are ' destined and appointed ' ' according to the purpose of him who accomplishes all things according to the counsel of his will ' (Eph 1^{11f}); or, as in an earlier verse, ' according to the purpose of his will to the praise of his glorious grace ' (v.^{6}). It is nevertheless plain that there is no unrighteousness with God (Ro 9^{14}); that His loving will embraces the whole world (Jn 3^{16}, 1 Ti 2^{4}); that He can never, in even the slightest degree, act partially or capriciously (Ac 10^{34}, 2 Ti 2^{13}); and that, as salvation in the case of none is compulsory, but is always in accordance with the saved person's own free choice, so none perishes but by his own fault or unbelief. It is obvious that difficult problems arise on this subject which can be solved only by close attention to all Scripture indications and in the continued and growing experience of the believer.

1. In the OT.—Valuable help is afforded, first, by observing how this idea shapes itself, and is developed, in the OT. From the first, then, we see that God's purpose advances by a method of election, but observe also that, while sovereign and free, the election is never an end in itself, but is subordinated as a means to a wider end. It is obvious also that it was only by an election—that is, by beginning with some individual or people, at some time, in some place—that such ends as God had in view in His Kingdom could be realized. Abraham, accordingly, is chosen, and God calls him, and makes His covenant with him, and with his seed; not, however, as a private, personal transaction, but that in him and in his seed all families of the earth should be blessed (Gn 12^{2f} etc.). Further elections narrow down this line of promise—Isaac, not Ishmael; Jacob, not Esau (cf Ro 9^{7-13})—till Israel is grown, and prepared for the national covenant at Sinai. Israel, again, is chosen from among the families of the earth (Ex 19^{3-6}, Dt 4^{34}, Am 3^{2}); not, however, for its own sake, but that it may be a means of blessing to the Gentiles. This is the ideal calling of Israel which peculiarly comes out in the prophecies of the Deutero-Isaiah (Is 40–55)—a calling of which the nation as a whole so fatally fell short (Is 42^{19f}). So far as these prophecies of the Servant point to Christ—the Elect One in the supreme sense, as both Augustine and Calvin emphasize—His mission also was one of salvation to the world.

Here, however, it will naturally be asked—Is there not, after all, a reason for these and similar elections in the greater congruity of the object with the purpose for which it was designed? If God chose Abraham, was it not because Abraham was the best fitted among existing men for such a vocation? Was Isaac not better fitted than Ishmael, and Jacob than Esau, to be the transmitters of the promise? This leads to a remark which carries us much deeper into the nature of election. We err grievously if we think of God's relation to the objects of His choice as that of a workman to a set of tools provided for him, from which he selects that most suited to his end. It is a shallow view of the Divine election which regards it as simply availing itself of happy varieties of character spontaneously presenting themselves in the course of natural development. Election goes deeper than grace—even into the sphere of nature. It presides, to use a happy phrase of Lange's, at the *making* of its object (Abraham, Moses, David, Paul, etc.), as well as uses it when made. The question is not simply how, a man of the gifts and qualifications of Abraham, or Moses, or Paul, being given, God should use him in the way He did, but rather how a man of this spiritual build, and these gifts and qualifications, came at that precise juncture to be there at all. The answer to that question can be found only in the Divine ordering; election working in the natural sphere prior to its being revealed in the spiritual. God does not simply find His instruments—He creates them: He has had them, in a true sense, in view, and has been preparing them from the foundation of things. Hence St. Paul's saying of himself that he was separated from his mother's womb (Gal 1^{15}; cf of Jeremiah, Jer 1^{5}; cf of Cyrus, Is 45^{5} etc.).

Here comes in another consideration. Israel was the elect nation, but as a nation it miserably failed in its vocation (so sometimes with the outward Church). It would seem, then, as if, on the external side, election had failed of its result; but it did not do so really. This is the next step in the OT development—the realization of an election within the election, of a true and spiritual Israel within the natural, of individual election as distinct from national. This idea is seen shaping itself in the greater prophets in the doctrine of the remnant (cf Is 1^{9} 6^{13} 8^{16-18} etc.); in the idea of a godly kernel in Israel in distinction from the unbelieving mass (involved in prophecies of the Servant); and is laid hold of, and effectively used, by St. Paul in his rebutting of the supposition that the word of God had failed (Ro 9^{6} ' for they are not all Israel that are of Israel,' $11^{5, 7}$ etc). This yields us the natural transition to the NT conception.

2. In the NT.—The difference in the NT standpoint in regard to election may perhaps now be thus defined. (1) Whereas the election in the OT is primarily national, and only gradually works round to the idea of an inner, spiritual election, the opposite is the case in the NT—election is there at first personal and individual, and the Church as an elect body is viewed as made up of these individual believers and all others professing faith in Christ (a distinction thus again arising between inward and outward). (2) Whereas the personal aspect of election in the OT is throughout subordinate to the idea of service, in the NT, on the other hand, stress is laid on the personal election to eternal salvation; and the aspect of election as a means to an end beyond itself falls into the background, without, however, being at all intended to be lost sight of. The believer, according to NT teaching, is called to nothing so much as to active service; he is to be a light of the world (Mt 5^{13-16}), a worker together with God (1 Co 3^{9}), a living epistle, known and read of all men (2 Co 3^{2f}); the light has shined in his heart that he should give it forth to others (2 Co 4^{6}); he is elected to the end that he may show forth the excellencies of Him who called him (1 P 2^{9}), etc. St. Paul is a ' vessel of election ' to the definite end that he should bear Christ's name to the Gentiles (Ac 9^{15}). Believers are a kind of ' first-fruits ' unto God (Ro 16^{5}, 1 Co 16^{15}, Ja 1^{18}, Rev 14^{4}); there is a ' fulness ' to be brought in (Ro 11^{25}).

As carrying us, perhaps, most deeply into the comprehension of the NT doctrine of election, it is lastly to be observed that, apart from the inheritance of ideas from the OT, there is an experiential basis for this doctrine, from which, in the living consciousness of faith, it can never be divorced. In general it is to be remembered how God's providence is everywhere in Scripture represented as extending over all persons and events—nothing escaping His notice, or falling outside of His counsel (not even the great crime of the Crucifixion, Ac 4^{28})—and how uniformly everything good and gracious is ascribed to His Spirit as its author (*e.g.* Ac 11^{18}, Eph 2^{8}, Ph 2^{13}, He 13^{20f}). It cannot, therefore, be that in so great a matter as a soul's regeneration (see REGENERATION), and the translating of it out of the darkness of sin into the light and blessing of Christ's Kingdom (Ac 26^{18}, Col 1^{12f}, 1 P 2^{9f}), the change should not be viewed as a supreme triumph

of the grace of God in that soul, and should not be referred to an eternal act of God, choosing the individual, and in His love calling him in His own good time into this felicity. Thus also, in the experience of salvation, the soul, conscious of the part of God in bringing it to Himself, and hourly realizing its entire dependence on Him for everything good, will desire to regard it and will regard it; and will feel that in this thought of God's everlasting choice of it lies its true ground of security and comfort (Ro $8^{28, 33, 38f}$). It is not the soul that has chosen God, but God that has chosen it (cf Jn 15^{16}), and all the comforting and assuring promises which Christ gives to those whom He describes as 'given' Him by the Father (Jn $6^{37, 39}$ etc)—as His 'sheep' (Jn 10^{3-5} etc)—are humbly appropriated by it for its consolation and encouragement (cf Jn 6^{39} 10^{27-29} etc).

On the experimental basis Calvinist and Arminian may be trusted to agree, though it leaves the speculative question still unsolved of how precisely God's grace and human freedom work together in the production of this great change. That is a question which meets us wherever God's purpose and man's free will touch and probably will be found to embrace unsolved elements till the end. Start from the Divine side, and the work of salvation is all of grace; start from the human side, there is responsibility and choice. The elect, on any showing, must always be those in whom grace is regarded as effecting its result; the will, on the other hand, must be freely won; but this winning of the will may be viewed as itself the last triumph of grace—God working in us to will and to do of His good pleasure (Ph 2^{13}, He 13^{20f}). From this highest point of view the antinomy disappears; the believer is ready to acknowledge that it is not anything in self, not his willing and running, that has brought him into the Kingdom (Ro 9^{16}), but only God's eternal mercy. See, further, PREDESTINATION, REGENERATION, REPROBATE.

J. O.—N. H. S.

ELECT LADY.—See JOHN [EPISTLES OF, II.].

EL-ELOHE-ISRAEL.—Upon the piece of land which he had bought at Shechem, Jacob built an altar and called it *El-elohe-Israel*, 'El, the god of Israel,' Gn 33^{20} (E). This appears a strange name for an *altar*, and it is just possible that we should emend the text, so as to read with the LXX, 'he called upon the God of Israel.'

EL-ELYON.—See GOD, and MOST HIGH.

ELEMENT.—A component or constituent part of a complex body or a link in a series. 'Elements' can mean the first or fundamental principles. The ancient philosophers inquired after the essential constituent elements, principles, or substances of the physical universe; and many supposed them to consist of earth, air, fire, and water. But in later Greek language also the heavenly bodies, the stars, could be called 'elements.' As used in the NT the word always appears in the plural.

1. In 2 P $3^{10, 12}$ the physical elements of the heavens and the earth are referred to as destined to destruction at the sudden coming of the Day of the Lord, 'because of which the heavens will be kindled and dissolved, and the elements will melt with fire.' In the same sense the Book of Wisdom (7^{17}) employs the word, and speaks of 'the structure of the world and the activity of the elements.' But possibly the elements in 2 P $3^{10, 12}$ are the heavenly bodies. It should be observed also that the later Jewish angelology conceived these different elements and all the heavenly bodies as animated by living spirits, so that there were angels of the waters, the winds, the clouds, the hail, the frost, and the various seasons of the year. Thus we read in the NT Apocalypse of the four angels of the four winds, the angel that has power over fire, the angel of the waters, the winds, and an angel standing in the sun. And so every element and every star had its controlling spirit or angel, and this concept of the animism of nature has been widespread among the nations (see ANGEL).

2. The exact meaning of the phrase 'elements of the world' in the four texts of Gal $4^{3, 9}$ and Col $2^{8, 20}$ has been found difficult to determine. (*a*) Not a few interpreters, both ancient and modern, understand the 'elements' mentioned in these passages to refer to the physical elements possessed and presided over by angels or demons. It is argued that the context in both these Epistles favours this opinion, and the express statement that the Galatians 'were in bondage to beings that by nature are no gods' (Gal 4^{8}), and the admonition in Colossians against 'philosophy and empty deceit,' and 'worship of angels' (Col $2^{8, 18}$), show that the Apostle had in mind a current superstitious belief in cosmic spiritual beings, and a worship of them as princes of the powers of the air and world-rulers of darkness. RSV reads 'elemental spirits of the universe.' Such a low and superstitious bondage might well be pronounced both 'weak and beggarly.' (*b*) Other interpreters understand by these 'elements of the world' the ordinances and customs of Jewish legalism. But against this interpretation it must be said that the 'we' of Gal 4^{3} includes both Jews and Gentiles. Therefore the 'elements' must be understood as the cosmic powers and especially as the rulers of the stars to which the Jews are subjected as well as the Gentiles. The 'elements of the world' are identical with the 'angels' of Gal 3^{19}, just as the 'elements of the world' in Col $2^{8, 20}$ are identical with the 'angels' of Col 2^{18}. The interesting point is that the Apostle treats alike the Jewish ritualism (especially the observing of 'days and months and seasons,' Gal 4^{10}) and the heathen worship.

3. The word is found also with yet another meaning in He 5^{12}, where the persons addressed are said to need instruction in 'the first principles of God's word.' Here the term 'element' is used in the well-known sense of the first elements of Christian education or instruction as they are enumerated in He 6^{1f}. M. S. T.—R. B.

ELEMENTAL SPIRITS.—See DEMONS, 2.

ELEPH, Jos 18^{28} (AV, RV).—See HA-ELEPH.

ELEPHANT.—Job 40^{15} (AVm); see BEHEMOTH. The use of elephants in warfare is frequently noticed in the Books of Maccabees (*e.g.* 1 Mac 3^{34} 6^{30} 8^{6} 11^{56}, 2 Mac 11^{4} 13^{15}). See also IVORY.

ELEPHANTINE PAPYRI.—Aramaic documents of the 5th cent. B.C. found on Elephantine Island opposite Assuan (see SEVENEH). The publication of a first group of these texts by A. H. Sayce and A. E. Cowley in 1906 was an event in OT and Semitic studies. The texts have a great importance for the period of Ezra and Nehemiah. They revealed the existence of a military colony containing many Jews and provided with a temple of the god Yahweh (written **Yhw**, and pronounced Yahu or Yaho). The texts were of a legal nature, but a Berlin Museum expedition under O. Rubensohn, which dug on the island, recovered other kinds of papyri. The publication of these finds by E. Sachau (in final and complete form in 1911) greatly enriched the picture of the life of the colony and above all shed light on the history of the Yahu temple. The prize piece was the letter of the Jews of Elephantine to **Bagoas,** governor of Judaea (**Yehud**), appealing for his aid in obtaining a restoration of the temple of Yahu which had been destroyed in 410 B.C. at the instigation of the priests of Khnum, ram-headed patron divinity of Elephantine. Mention is made of **Sanballat** (q.v.) and the high priest Johanan (Neh 12^{22}). Brief but significant is the papyrus instructing the Jewish messenger to convey to Arsames, the satrap of Egypt, the recommendation of Bagoas and a son of Sanballat that the temple should be rebuilt. Other documents of prime importance were: a letter ordering the Jews in the name of Darius II. to celebrate the feast of Unleavened Bread in 419 B.C. and perhaps reflecting the first introduction of that festival among the Jews; a list of temple-contributors, showing that the treasurer not only handled funds for the god Yahu but also for the deities Eshembethel and Anathbethel (called Anathyahu in another text); part of an Aramaic version of the Behistun inscription of Darius I.; and portions of an Aramaic

book of **Ahikar** (q.v.). After all these texts had been thoroughly discussed by scholars, A. E. Cowley published an invaluable handbook of them in 1923. Recently the Elephantine repertoire has been augmented by the surprising turning up of what must be regarded as the first find of all—a body of texts acquired in 1893 by the American Egyptologist Charles Edwin Wilbour. Indeed, it appears likely that Sayce got on the track of the 'Assuan Papyri' through Wilbour, who had shown him some fragments he had acquired. The new texts were published by the Brooklyn Museum. They are largely the family archive of a man who had some kind of a position at the Yahu temple, Ananiah bar Azariah, and contain some texts of significance for ancient law—notably with respect to slavery. A number of the texts date from the time of Artaxerxes II. The latter is in no way differentiated from Artaxerxes I. and this is of interest in connexion with the dating of Ezra (q.v.). The new papyri show that the Elephantine temple must have been restored, and further that Persian sovereignty was still recognized on the island as late as the end of 402 B.C. Pharaoh Amyrtaeus thus did not gain control until the spring of 401 B.C.—the time of the Anabasis of Cyrus the Younger. A document dated under Amyrtaeus was published by Sachau. One of the Brooklyn texts mentions the end of Amyrtaeus' reign and the accession of Nepherites I. (399–393 B.C.). This Pharaoh probably terminated the existence of the Jewish temple and of the Jewish element in the colony. The Elephantine papyri are supplemented by numerous ostraca, a corpus of which is to be published by A. Dupont-Sommer, and by the Aramaic Leather Documents acquired by L. Borchardt and published in 1954 by G. R. Driver. These are from the archives of Nehti-Hur, major domo of the satrap Arsames.

The Jewish temple, according to the Bagoas letter, existed already when Cambyses invaded Egypt (525 B.C.). The oldest dated papyrus is from 495 B.C. Some have argued that the Jews of Elephantine were sent down from Judah in the 7th cent., or were from Israelite territory. That the kings of Judah sent mercenaries down to Egypt is revealed by Dt 17^{16}. But it seems more likely that the Elephantine colony was established under Pharaoh Amasis (569–526 B.C.).

See E. G. Kraeling, *The Brooklyn Museum Aramaic Papyri*, 1953, pp. 3–119. E. G. K.

ELEUTHERUS (1 Mac 11^{7} 12^{30}).—A river which separated Syria and Phoenicia, the modern *Nahr el-Kebîr* or 'Great River,' which divides the Lebanon in two north of Tripoli.

ELHANAN ('God is gracious').—**1.** The son of **Jair** according to 1 Ch 20^{5}, of **Jaare-oregim** according to 2 S 21^{19}; in the former text he is represented as slaying **Lahmi** the brother of Goliath, in the latter as a Bethlehemite who slew Goliath himself. A comparison of the Hebrew of these two texts is instructive, because they offer one of the clearest and simplest examples of how easy it is for corruptions to creep into the OT text. It is difficult, without using Hebrew letters, to show how this is the case here; but the following points may be noticed. *Oregim* means 'weavers,' a word which occurs in the latter half of the verse in each case, and may easily have got displaced in the 2 Samuel passage; in both the texts the word which should be the equivalent of *Jair* is wrongly written; the words 'the Bethlehemite' (2 S) and 'Lahmi the brother of' (1 Ch) look almost identical when written in Hebrew. The original text, of which each of these two verses is a corruption, probably ran: 'And Elhanan the son of Jair, the Bethlehemite, slew Goliath the Gittite, the staff of whose spear was like a weaver's beam.' But if this is so, how are we to reconcile it with what we read of David's killing Goliath? Judging from what we know of the natural tendency there is to ascribe heroic deeds to great national warriors, realizing the very corrupt state of the Hebrew text of the Books of Samuel, and remembering the conflicting accounts given of David's first introduction to public life (see DAVID, **1**), the probability is that Elhanan slew Goliath and that this heroic deed was in later times ascribed to David.

2. In 2 S 23^{24} and 1 Ch 11^{26} Elhanan the son of Dodo of Bethlehem is numbered among David's 'mighty men.' Remembering that the word *Jair* above is wrongly written in each case, and that it thus shows signs of corruption, it is quite possible that this Elhanan and the one just referred to are one and the same. W. O. E. O.

ELI, ELI, LAMA SABACHTHANI.—See ELOI, ELOI, etc.

ELI.—A 'judge' and high priest in the important sanctuary at Shiloh, where the Ark was kept. He belonged to the house of Ithamar, the fourth son of Aaron. Excepting in the final scene of his life, every time he comes before us it is in connexion with others who occupy the position of greater interest. Thus in his interviews with Hannah, in the first one it is she in whom the chief interest centres (1 S 1^{12ff}); in the second it is the child Samuel (1 S 1^{24ff}). The next time he is mentioned it is only as the father of Hophni and Phinehas, the whole passage being occupied with an account of their evil doings (1 S 2^{12ff}). Again, in 1 S 2^{27ff}, Eli is mentioned only as the listener to 'a man of God' who utters his prophecy of evil (a prophecy which is said to be fulfilled by the incident recorded in 1 K 2^{27}). And lastly, in his dealings with the boy Samuel, the whole account (1 S 3) is really concerned with Samuel, while Eli plays a quite subsidiary part. All this seems to illustrate the personality of Eli as that of a humble-minded, good man of weak character; his lack of influence over his sons serves to emphasize this estimate. His death takes place when he learns that the Philistines have captured the Ark. W. O. E. O.—E. R. R.

ELIAB ('God is father').—**1.** The representative, or 'prince,' of the tribe of Zebulun, who assisted Moses and Aaron in numbering the children of Israel in the wilderness of Sinai, Nu 1^{9}. **2.** The father of Dathan and Abiram, Nu 16^{1}. **3.** The eldest brother of David, and thought by Samuel to have been destined for kingship in Israel on account of his beauty and stature, 1 S 16^{6f}. He is mentioned as being a warrior in the Israelite camp on the occasion of Goliath's challenge to and defiance of the armies of Israel (17^{13}); he rebukes his younger brother David for his presumption in mixing himself up with the affairs of the army (17^{28}); his attitude towards David, after the victory of the latter over Goliath, is not mentioned. **4.** One of the musicians who were appointed by the Levites, at David's command, to accompany the procession which was formed on the occasion of bringing the Ark from the house of Obed-edom up to Jerusalem, 1 Ch 15^{18}. **5.** One of the Gadites who joined David, during his outlaw life, in the hold in the wilderness, 1 Ch 12^{9}. **6.** An ancestor of Samuel, 1 Ch 6^{27} (see ELIHU, **1**); called **Eliel** (q.v.) in v.^{34}. **7.** One of Judith's ancestors, Jth 8^{1}. W. O. E. O.

ELIADA ('El knows').—**1.** A son of David, 2 S 5^{16}; called **Beeliada** in 1 Ch 14^{7}. **2.** Father of Rezon, an 'adversary' of Solomon, 1 K 11^{23} (AV **Eliadah**). **3.** A Benjamite, one of Jehoshaphat's commanders, 2 Ch 17^{17}.

ELIADAH, 1 K 11^{23} (AV).—See ELIADA, **2.**

ELIADAS 1 Es 9^{28} (AV, RV).—See ELIOENAI, **5.**

ELIADUN, 1 Es 5^{58} (AV).—See ILIADUN.

ELIAH.—**1.** 1 Ch 8^{27} (AV); see ELIJAH, **2.** **2.** Ezr 10^{26} (AV); see ELIJAH, **4.**

ELIAHBA.—One of David's 'Thirty,' 2 S 23^{32}, 1 Ch 11^{33}.

ELIAKIM ('God will establish').—**1.** The son of Hilkiah, he who was 'over the household' of king Hezekiah, and one of the three who represented the king during the interview with Sennacherib's emissaries, 2 K 18^{18}, Is 36^{3}. In Is 22^{20-24} (v.^{25} seems to be out of place) he is contrasted favourably with his predecessor Shebna (who is still in office), and the prophet prophecies that Eliakim shall be a 'father' in the land. **2.** The

name of king Josiah's son, who reigned after him; Pharaoh Neco changed his name to **Jehoiakim,** 2 K 23^{34}. **3.** In Neh 12^{41} a priest of this name is mentioned as one among those who assisted at the ceremony of the dedication of the wall. **4.** The son of Abiud (Mt 1^{13}). **5.** The son of Melea (Lk 3^{30}). The last two occur in the genealogies of our Lord. W. O. E. O.

ELIALI, 1 Es 9^{34} (AV, RV).—See ELIALIS.

ELIALIS.—This name, found in 1 Es 9^{34} (AV, RV **Eliali**), is unrepresented in Ezr 10^{38}.

ELIAM ('El is kinsman').—**1.** Father of Bathsheba, whose first husband was Uriah the Hittite, 2 S 11^{3}; called **Ammiel** in 1 Ch 3^{5}; see AMMIEL, **4.** **2.** Son of Ahithophel, of Gilo, and one of David's heroes, 2 S 23^{34}; possibly the same as the preceding.

ELIAONIAS, 1 Es 8^{31} (AV, RV).—See ELIEHOENAI, **2.**

ELIAS.—The AV form of **Elijah** (q.v.) in NT.

ELIASAPH.—**1.** Son of Deuel or Reuel, and prince of Gad at the first census, Nu 1^{14} 2^{14} 7$^{42, 47}$ 10^{20}. **2.** Son of Lael, and prince of the Gershonites, Nu 3^{24}.

ELIASHIB.—**1.** The High Priest who was contemporary with Nehemiah. He was son of Jozadak, the contemporary of Zerubbabel (Neh 12^{10}, Ezr 3^{1}), and father of Joiada (Neh 12^{10} 13^{28}). He assisted in the rebuilding of the walls of Jerusalem during Nehemiah's governorship (Neh 3^{1}). He can have had no sympathy with the exclusive policy of Ezra and Nehemiah, for both he himself and members of his family allied themselves with the leading foreign opponents of Nehemiah. See JOIADA, **2,** TOBIAH, and SANBALLAT. **2.** A singer of the time of Ezra, who had married a foreign wife, Ezr 10^{24}, 1 Es 9^{24} (AV **Eleazurus,** RV **Eliasibus**). **3.** An Israelite of the family of Zattu, Ezr 10^{27}, 1 Es 9^{28} (AV **Elisimus,** RV **Eliasimus**); and **4.** another of the family of Bani, Ezr 10^{36}, 1 Es 9^{34} (AV, RV **Enasibus**), who had married foreign wives. **5.** A son of Elioenai, 1 Ch 3^{24}. **6.** The name of a priestly house, 1 Ch 24^{12}. **7.** Father of Jehohanan, to whose chamber in the Temple Ezra resorted, Ezr 10^{6}, 1 Es 9^{1} (AV, RV **Eliasib**); probably identical with **1.**

ELIASIB, 1 Es 9^{1} (AV, RV).—See ELIASHIB, **7.**

ELIASIBUS, 1 Es 9^{24} (RV).—See ELIASHIB, **2.**

ELIASIMUS, 1 Es 9^{28} (RV).—See ELIASHIB, **3.**

ELIASIS (1 Es 9^{34}).—This name corresponds to **Jaasu** of Ezr 10^{37}.

ELIATHAH.—A Hemanite, whose family formed the twentieth division of the Temple service, 1 Ch 25$^{4, 27}$.

ELIDAD.—Son of Chislon, and Benjamin's representative for dividing the land, Nu 34^{21}; perhaps the same as **Eldad** (q.v.).

ELIEHOENAI.—**1.** A Korahite, 1 Ch 26^{3} (AV **Elioenai**). **2.** The head of a family of exiles that returned, Ezr 8^{4}, 1 Es 8^{31} (AV, RV **Eliaonias**).

ELIEL.—**1.** A Korahite, 1 Ch 6^{34}; called **Eliab** in v.^{27} and **Elihu** in 1 S 1^{1}. **2, 3, 4.** Mighty men in the service of David, 1 Ch 11^{46f} 12^{11}. **5.** A chief of eastern Manasseh, 1 Ch 5^{24}. **6, 7.** Two Benjamite chiefs, 1 Ch 8$^{20, 22}$. **8.** A Levite mentioned in connexion with the removal of the Ark from the house of Obed-edom, 1 Ch 15$^{9, 11}$. **9.** A Levite in time of Hezekiah, 2 Ch 31^{13}.

ELIENAI.—A Benjamite, 1 Ch 8^{20}.

ELIEZAR.—**1.** One of the messengers to Iddo, 1 Es 8^{43} (RSV; AV and RV **Eleazar**); called **Eliezer** in Ezr 8^{16}. **2.** A priest who had married a foreign wife, 1 Es 9^{19} (RSV; AV and RV **Eleazar**); called **Eliezer** in Ezr 10^{18}.

ELIEZER (cf ELEAZAR).—**1.** Abraham's chief servant, a Damascene (Gn 15^{2} AV, RVm, RSV. The construction here is difficult, but the words can hardly be rendered as a double proper name as RV, 'Dammesek Eliezer.' Whatever the exact construction, the words, unless there is a corruption in the text, must be intended to suggest that Eliezer was in some way connected with Damascus). This same Eliezer is probably the servant referred to in Gn 24. **2.** A son of Moses by Zipporah; so named to commemorate the deliverance of Moses from Pharaoh, Ex 18^{4}, 1 Ch 23$^{15, 17}$. **3.** The son of Becher, a Benjamite, 1 Ch 7^{8}. **4.** The son of Zichri, chief officer of the tribe of Reuben in David's reign, 1 Ch 27^{16}. **5.** The son of Dodavahu of Mareshah, who prophesied the destruction of the fleet of ships which Jehoshaphat built in co-operation with Ahaziah, 2 Ch 20^{37}. **6.** One of the messengers Ezra sent to Casiphia, Ezr 8^{16}; called **Eliezar** (RSV; AV and RV **Eleazar**) in 1 Es 8^{43}. **7.** A priest who had married a foreign wife, Ezr 10^{18}; called **Eliezar** (RSV; AV and RV **Eleazar**) in 1 Es 9^{19}. **8.** A Levite who had married a foreign wife, Ezr 10^{31}; called **Jonah** (AV, RV **Jonas**) in 1 Es 9^{23}. **9.** A son of Harim who had married a foreign wife, Ezr 10^{23}; called **Elionas** in 1 Es 9^{32}. **10.** One of the priests appointed to blow with the trumpets before the Ark of God when David brought it from the house of Obed-edom to Jerusalem, 1 Ch 15^{24}. **11.** A Levite, 1 Ch 26^{25}. **12.** An ancestor of our Lord, Lk 3^{29}.

ELIHOREPH.—One of Solomon's secretaries, 1 K 4^{3}.

ELIHU.—**1.** An ancestor of Samuel, 1 S 1^{1}; called **Eliel** in 1 Ch 6^{34} and **Eliab** in v.^{27}. **2.** A brother of David, 1 Ch 27^{18}; possibly the same as **Eliab, 3.** **3.** A Manassite who joined David at Ziklag, 1 Ch 12^{20}. **4.** A Korahite porter, 1 Ch 26^{7}. **5.** See JOB [BOOK OF]. **6.** An ancestor of Judith, Jth 8^{1} (RV; AV **Eliu**; RSV **Elijah**).

ELIJAH.—**1.** Elijah, probably the strangest figure among the prophets of Israel, steps across the threshold of history when Ahab is on the throne (*c* 869–850 B.C.), and is last seen in the reign of Ahaziah (*c* 850–849 B.C.), although posthumous activity is attributed to him in 2 Ch 21$^{12–15}$. A resident of Gilead (1 K 17^{1}), he appears on the scene unheralded; there is no hint of his birth and parentage. He is called a Tishbite, but the meaning of this term is uncertain (see TISHBITE). A rugged Bedouin-like figure in his haircloth mantle (2 K 1^{8}), Elijah appears as a representative of the nomadic stage of Hebrew civilization, a sort of reincarnation of an earlier and more austere period. His name ('Yahweh is God') may be regarded as the motto of his life, and expresses the aim of his mission as a prophet.

A religious crisis had been brought on by the marriage of Ahab to Jezebel, a daughter of the Tyrian king Ethbaal, who had been a priest of Melkart, the Tyrian Baal. True to her early training and environment, Jezebel not only persuaded her husband to build a temple of Baal in Samaria (1 K 16^{31ff}), but became a zealous propagandist for her cult, and persecuted the followers of Y". The very existence of Yahwism was thus threatened.

Such was the situation, when Elijah suddenly appears before Ahab as the champion of Y". The apostate king and people are to be chastened by a drought (17^{1}), lasting three years (18^{1}). Providence first guides the stern prophet to 'the brook Cherith,' a small stream in a ravine opposite Samaria east of the Jordan (17$^{3, 5}$; not the *Wâdī Qelt* near Jericho as often asserted). Soon the little stream runs dry, and Elijah flees to Zarephath in the territory of Sidon, also suffering from drought (17^{14}; Jos. *Ant.* VIII. xiii. 2 [320]). As the guest of a poor widow, he brings blessings to her household (cf Lk 4^{25}, Ja 5^{17}) by miraculously increasing their meagre supply of food. Soon the widow's son dies, but Elijah brings joy to the bereaved mother by restoring the child to life (17^{23}; cf Lk 7$^{11–15}$).

During the long drought the hearts of Ahab's subjects have been mellowed, and many are ready to return to their old allegiance. It is time for action, and the prophet returns to confront the king (18$^{1–16}$). As the two meet, we have the first skirmish of the battle. 'Is it you, you troubler of Israel?' is the monarch's greeting; but the prophet's reply puts the matter in a truer light: 'I have not troubled Israel; but you have, . . . because you have forsaken . . . the LORD and followed the Baals' (18^{17f}). At Elijah's suggestion the prophets of Baal and the prophets of Asherah, the goddess consort of Baal, are summoned to Mount Carmel to a trial of power, to

see which deity, Baal or Yahweh, will respond to an appeal by his followers to send down fire to consume an unkindled sacrifice. The scene that follows is too well known to bear repetition. Suffice it to say that the prophets of Baal rave, dance, and cut themselves (according to the crudely ecstatic practice of their cult) from morning till late afternoon in an effort to persuade their deity to ignite their sacrifice; but nothing happens. Then Elijah, to make the performance more impressive, or perhaps as a token of the coming rain, orders Y″'s altar to be drenched with water before his invocation. At the prayer of the prophet, fire falls from heaven, devouring the altar along with the sacrificial victim. The people are convinced and shout, 'The LORD, he is God; the LORD, he is God' (18^{39}). Immediately Elijah orders the people to seize the prophets of the foreign deities and slay them by the river Kishon, where Canaanite blood had flowed in the time of the Judges (18^{40}, cf Jg 5^{21}). The guilt of the land has been atoned for, and the long awaited rain arrives. Elijah, in spite of his dignified position, runs before the chariot of Ahab, indicating that he is willing to serve the king as well as lead Yahweh's people (18$^{41-46}$).

The implacable Jezebel now threatens the life of the prophet who has dared to order the death of her minions (19^{1f}). Yahweh's champion loses heart, and flees to Beer-sheba in the far south. Gaining new strength, he presses on to Horeb, the earlier dwelling-place of his God, deep in the desert. There, after experiencing a great wind, an earthquake, and a fire, he hears Y″'s new message in the form of 'a still small voice' (19^{12}), but the message is not a gentle or quieting one. There remains much to be done in the battle against Baalism. Y″ gives His faithful servant a threefold commission: Hazael is to be anointed king of Syria and Jehu anointed king of Israel, both changes requiring the assassination of the reigning kings, with much additional bloodshed; and Elisha is to be appointed his successor in the prophetic order. Only the last of these three commissions was executed by Elijah; the other two were carried out by Elisha (see ELISHA).
